IV. Statement of Business conducted in the various Departments under H.R.H. the Field-Marshal Commanding-in-Chief 101

V. Memoranda by Admiral J. Crawford Caffin, formerly the Director of Stores, and D. Galton, Esq., formerly Assistant Under Secretary of State, on Question of Transfer of Store Accounts to Chief Auditor 123

FIRST REPORT.

We understand it to be Mr. Cardwell's wish that we should consider and report to him on the constitution of the War Office, with especial reference to the establishment of the Department of Control, and to recent proposals and discussions upon the subject of financial supervision; Mr. Cardwell being desirous that he himself, as well as his subordinate officers, may be guarded against proceedings *ultra vires*, and advised in time of the financial effect, and of the financial tendency, of their administrative decisions.

There are two totally different conceptions of financial control, between which it appears to us necessary to choose, before entering on the question of appropriate departmental organization; which, in fact, will be virtually decided when the election is made between the two ideas.

The first and, more or less, the traditionary one, based on constitutional analogies, is that Administrative Departments are to be distrusted, watched, and checked; and the function of finance, from this point of view, is confined to watching, criticising, and checking their expenditure. The practical tendency of such a theory, when put in force, is towards the creation of twin rival *antagonistic* powers; the Administrative Branch seeking to spend, the criticising Financial Branch to criticise and check; efficiency and economy are thus at war,—or rather, the expenditure which should be directed solely to secure efficiency tends to degenerate into extravagance, and economy which should check waste to result in incomplete efficiency.

This theory, with the narrow and perfunctory duties which it assigns to finance, ought, it seems to us, to be no longer accepted, when we possess, in the Secretary of State for War, a Minister responsible alike for the efficiency of the Service and for its economical administration, and able to harmonize the two.

The second and more modern notion of financial control means the union of finance and administration, so that financial considerations may attend and determine administrative policy from its inception, as well as control it during its progress, and review it in anticipation of each new financial year.

It is the latter theory which, in our opinion, attributes higher functions and a more real and profitable control to finance than the older and more limited theory of its functions, appropriate to times of imperfect administrative organization; for, whilst the one would make finance a mere critical division of War Office administration, the other recognizes the function of finance as that of governing, as far as may be necessary, the whole policy of administration, and as forming part of the primary responsibility of the Minister, and of the Cabinet of which he is a member.

As it is impossible for the Secretary of State for War to attend himself to all financial questions, he must make use of some subordinate officer to assist him.

We think that this subordinate officer should be a Parliamentary Officer whose interest in the success of the whole administration of the Army would be identical with that of the Secretary of State.

The special duty, therefore, of financial control would be exercised in behalf of the Secretary of State in accordance with his instructions from time to time, by a Parliamentary Officer who might be called Financial Secretary; his staff would be the Accountant-General's Department, now divided into the two branches of Audit and Account.

We are of opinion that it is essential that this Department, which should be re-united under the Accountant-General, should be placed directly under the Financial Secretary for two reasons, viz.:—

1. That this arrangement will give its true place and true weight to that Department, and ensure the observance of rules, which will guarantee to the Secretary of State, that its current function of advice, criticism, warning, and control are fulfilled; and

2. That this is an arrangement which, whilst calculated to give financial supervision the greatest power and influence, within the true limits of its functions, will also be felt unobjectionable by the Chiefs of the Administrative Departments.

The relations of finance to administration may be classed under two heads—

1. Financial initiative and review,

2. Concurrent financial criticism and control.

1. Financial initiative and review constitute the first and larger function of finance. The only possible great permanent administrative economies are the product of policy in

administration, and of all methods of exercising financial control the most profitable is that which deals with the policy of future administration, and determines the construction of estimates from the first.

There are two ways in which estimates may be constructed :—

1. They may be allowed to grow up out of the requirements of the spending Departments, put forward without any sufficient sense of responsibility for financial results, ultimately to be cut down to suit the financial exigencies of the time; or,

2. They may be constructed, *ab initio*, under the guidance of clear ideas of the financial and administrative policy of the Minister, and with complete responsibility for financial results.

The latter is the method by which alone the great permanen tadministrative economies to which we have referred can be secured. Whatever formal rules may be laid down, estimates must originate with the Departments which have to administer and to spend; and it is upon the Heads of those Departments, therefore, that should be imposed the duty and responsibility of constructing their estimates from the first, in accordance with the financial and administrative policy of the Government.

Thus, in the present year large reductions have been made in the Army Estimates, but they have been principally due to considerations of policy adopted before the estimates were prepared, and guiding the officers who prepared them; such as—

1. A review of the distribution of troops in the Colonies.
2. A review of the whole system of providing transport, supplies, and matérial, which has mainly resulted from the organization of the various Departments concerned with transport and supplies into a Department of Control, and because the Chief of that Department was invested with the special duty and responsibility of constructing his estimates in accordance with such policy.

A final financial review of the estimates, although of diminished need, remains.

The departmental estimates must be in the hands of the Financial Secretary in sufficient time for such review. If, from the changing condition of the times, or from any other reason, it should be thought necessary to reduce the totals, the necessary reductions should be worked out in the administrative and not in the financial Department.

The various estimates, as finally approved by the Secretary of State, would continue, as at present, to be compiled by the Accountant-General in the form approved by the Treasury for presentation to Parliament; and a sufficient time must be allowed and secured for this final review, and for the discussion and understanding which ought to precede the sanction of the Treasury to their being laid upon the table of the House.

2. The second function of finance, viz., concurrent financial criticism and control, would continue to be performed by the Accountant-General's Department, under the Financial Secretary, and with increased efficiency and certainty under the proposed arrangements.

The Accountant-General would record and watch over the expenditure of the year, and report upon all proposals for alteration of establishments in the Army, or in the several administrative Departments during the year.

He would advise upon all cases which require an alteration of the appropriation of the money allotted by Parliament to the several services in the estimates, as well as upon all questions of excesses under the several votes.

The Secretary of State has not the power to authorize alterations of establishments or the transfer of money voted for one "Subdivision" in the estimates to meet the excesses on another, without the concurrence of the Treasury.

In order to satisfy the House of Commons that the Secretary of State does not exceed his powers in this respect, the Committee of Public Accounts has recommended that a certificate should be appended by the Accountant-General to the Appropriation Account of Army Expenditure, to the effect that no "part of such expenditure has been incurred without authority superior to that of the Department, in cases where such superior authority is required by the regulations then in force." This recommendation has been adopted by the Secretary of State for War, and seems to us calculated, when carried out under proper departmental arrangements, to secure the Secretary of State against the possibility that, by the negligence of any of the officers under him, his authority should be made use of to approve expenditure, for which superior sanction is required, without such sanction having been obtained.

The Accountant-General would advise upon all questions of pay and allowances, whether in money or in kind, where a departure from regulation is proposed, or involved, as well as upon all proposed new regulations involving financial considerations.

It appears to us, as a general rule, unadviseable that any alteration in Royal Warrants or Regulations, involving an increase in establishments or pay and allowances, should be authorized during the course of a financial year, and, consequently, without the requisite provision having been made by Parliament; but cases must occasionally arise in which it is necessary that a Vote of the House of Commons should be anticipated. Such proposals should be referred to the Financial Secretary, before being submitted to the Secretary of State.

All letters to the Treasury (which would necessarily be financial communications), should be signed by the Financial Secretary, or in his absence by the Accountant-General in his name.

Many particulars regarding the relations between administration and finance in matters of account,—the organization within the War Office, and at home and on foreign stations, of accountant functions and offices,—and the detailed regulations of payment and account, will require to be elaborated and defined; but we think they will be best dealt with as subsequent and subordinate, though practically most important questions, by discussion between the Parliamentary Financial Secretary and the Chief of the Control Department, should the proposals which we have made meet with the approval of the Secretary of State.

We add, in conclusion, that it would, in our opinion, be advantageous, if not indeed almost necessary under these proposed arrangements, that the Secretary of State should have additional assistance in Parliament.

W. G. ANDERSON.

War Office,
March 11, 1869.

SECOND REPORT.

The general principles submitted in the First Report having been accepted by Mr. Cardwell, we have considered some points connected with the establishment of the system of Control which now press for final settlement. The following are the two which have chiefly occupied our attention, and on which we are now prepared to state our views for Mr. Cardwell's consideration :—

1. The separation of munitions of war from other military stores, placing them under the charge of a department, to be administered by the Director-General of Ordnance, and independent of the Chief of the Control Department.

2. The relation in which the Manufacturing Departments should stand to the Controller-in-Chief, and the proposal for establishing a local supervision and control over them, by the appointment of an officer as Head of the Woolwich Arsenal.

In dealing with these, as with all other questions of Military Administration, we consider it to be essential that any system which may be adopted should be fitted to meet the requirements of war, and should be tested and brought to perfection in time of peace. It cannot be too strongly borne in mind that when the necessity for a change in the system of military administration has become evident, to delay it until the outbreak of war is to incur the danger, not only of wasteful expenditure, but of still greater evils.

We proceed in the first place to review the position in which Mr. Cardwell found the first of these questions on taking office.

The Committee on the Transport and Supply Departments of the Army, of which Lord Strathnairn was President, had proposed the creation of a department distinct from the Control Department,—to be called the Ordnance Department,—to take charge of "munitions of war," under which head were classed,—

1. Gun and small-arm ammunition;
2. Field artillery;
3. Field equipment, Royal Engineers;
4. Pontoon trains;
5. Spare arms and accoutrements, and harness and saddlery for Artillery.

This Department was to be in close connection with the Artillery, and to consist of administrative and executive officers, responsible to the Secretary of State for War, through the Director-General of Ordnance. It was to be locally under the orders of General Officers in Command in garrison and in the field, but dependent on the Control Department for the transport of all its stores, and also for the reserves of such stores as are used by the Artillery in common with other branches of the Service.

In carrying out the main recommendation of the Committee by the appointment of a Controller-in-Chief, Sir John Pakington did not adopt this proposal, but left it, as we understand, for future consideration.

The advantages arising from unity of administration and undivided responsibility in regard to the supplies and transport of an army in the field are so obvious, and are so strongly insisted upon by Lord Strathnairn's Committee, that we have been at some pains to elicit the grounds upon which an opposite principle is advocated in dealing with munitions of war.

We have therefore taken the evidence of several witnesses of the highest authority, who have placed the arguments upon both sides very clearly before us.

The evidence of His Royal Highness the Duke of Cambridge, of Lord Dalhousie, and of other high authorities, is strongly in favour of preserving unity of administration in the field.

It will be seen also, from the evidence of Sir Henry Storks and Major-General Balfour, that whatever may have been the opinion they formerly held on this subject, they are convinced, after more than a year's experience of the working of the department as it now exists, that the proposed separation would not be desirable.

On the other hand, the evidence of Major-General Lefroy, Sir Wm. Power, and Colonel Milward, will be found to contain a complete exposition of the objections which are entertained to placing the administration of munitions of war under the Control Department, and Sir Charles Trevelyan has laid before us a well-considered scheme for carrying the separation into effect.

The main arguments of those who advocate the separation of munitions of war from the Control Department are—

1st. That the charge of munitions of war requires special and scientific qualifications altogether distinct from those required for the custody and issue of other stores, and that a department having charge of warlike matériel should consequently be under the control of those who are perfectly acquainted with the nature and uses of the articles it holds,—that such persons moreover can, as a rule, only be found amongst scientific officers of the Artillery, whose technical education fits them specially for such duties.

2nd. That the accumulation of responsibility on a Controller in the field by adding the charge of munitions of war to the administration of the other supplies and transport of an Army would be too great a strain on his energies, and that it would be impossible for any one individual satisfactorily to combine in his own person all the requisite qualifications for administering the department.

3rd. That the separation recommended is found in force in all continental armies.

On the other hand, the advocates of unity of administration admit that stores essentially different in kind from other military stores require custodians with special and professional qualifications, but contend that a branch of the Control Department may without difficulty be constituted, which, coupled with a proper system of Artillery inspection of the stores in its charge, would meet all these requirements without sacrificing unity of control.

The stores required by an army fall naturally, they say, into groups more or less distinct in kind. At Woolwich, for instance, stores are grouped under eighteen different heads, and of these, munitions of war form several; and they anticipate no more difficulty in providing for the care of these particular groups than for that of any of the others, if the storeholders immediately in charge of them are chosen with special reference to such a responsibility.

To the second objection, that a knowledge of the details of duties of every branch of the Control Department is necessary to enable an officer to exercise a satisfactory and efficient control over the whole of the Supplies and Transport of an army, they reply that it is the principle of all administration that the responsible head of every department should be enabled to rely on his subordinates for technical assistance, and that a Controller will have under him officers possessing the required qualifications.

The third objection is met by the assertion that the results obtained from such an organization in Prussia are by no means so satisfactory as the advocates of separation believe.

Having carefully considered the arguments on both sides, we are of opinion that the advantages to be derived from unity of administration in regard to all the supplies and transport of an army in the field greatly outweigh the objections which have been urged against it in regard to the munitions of war, and that all that is requisite of special and scientific knowledge in the care of such stores may, without difficulty, be provided for within the Department of Control.

We are not prepared to admit, that because a system has been adopted in continental armies which disregards this principle of unity of administration, it is necessarily the best that can be devised; on the contrary, it appears to us, from the evidence we have received, and from the experience gained during the Crimean war, when such a system was actually adopted, that both experience and argument point to the opposite conclusion.

It should also be borne in mind that our insular position specially calls for unity of administration in our sea transport.

Moreover, it has not been satisfactorily shown how the separation can be carried out in practice without involving the maintenance of double reserves in the field, and causing unnecessary expense for double establishments and storehouses in garrisons.

We therefore consider that the provision, custody, and issue of munitions of war should form part of the duties of the Control Department, both in the War Office, and in the Field up to the 3rd Reserve or Field Arsenal. At the same time we think it most important that every precaution should be taken to secure the efficiency of the reserves of munitions of war, as well by the employment of specially trained officers in taking charge of them, as by a close and constant inspection of them by the combatant arm of the Service which principally uses them in the field.

In order to secure this efficiency it seems to us that the Control Department should be divided into two main sections, in the War Office and in the Field. One for providing and issuing articles required for the daily consumption of an Army, such as food, forage, fuel and light, and for the administration of transport; and the other for receiving and issuing all other stores. The latter Division should be placed under an officer who has a professional acquaintance with munitions of war.

With regard to the organization of the Division of the Control Department under whose charge munitions of war will be placed, it has been pressed strongly upon us, by His Royal Highness the Duke of Cambridge and other witnesses, that great benefit would accrue to the Service from the employment of Officers of the Royal Artillery; and His Royal Highness has moreover suggested that such Officers might with advantage be so employed for a certain number of years, and afterwards return to their positions in the regiment.

The education and training which an Artillery officer receives is precisely that required for an officer of this Division of the Control Department; and if the Royal Artillery can, without injury to itself, spare such officers from its junior ranks, it will be greatly to the benefit of the public service that the Control Department should avail itself of such a field of selection in obtaining its officers. This is the opinion of Sir Henry Storks, who proposes that officers and non-commissioned officers of the Royal Artillery shall be eligible for appointments in it.

We have no doubt also that Artillery officers would be benefited by temporary employment in the Control Department; but the first object to be kept in view must be the efficiency of the department itself, and, as it would obviously not be for the benefit of the department that it should be constantly losing the services of experienced officers, we think that Artillery officers should not be attached to the Department for a term of service (including the probation of 2 years), of less than 10 years. It should also be provided that if, at the expiration of that term, it be found desirable to retain an Officer in the Department, he should be required to leave the Royal Artillery—that seconded Officers should not, while seconded, rise above the rank of Assistant-Controller, —and that it should be clearly laid down that while so employed no question of military rank should interfere with the performance of their duty, under whatever Officer of the Department they might be placed, whether civil or military.

As regards the second question which we have had under consideration,—viz., the relation in which the Manufacturing Departments should stand to the Chief of the Control Department, and the proposal for establishing a local supervision and control over them, by the appointment of an officer as Head of the Woolwich Arsenal,—it had been determined shortly before the late Government quitted office, to appoint a local resident Head of the Manufacturing Departments at Woolwich Arsenal, and with this view Sir John Pakington appointed a Director-General of Ordnance as Head of the Arsenal, who in addition to this duty, was to act as the scientific and professional adviser of the Secretary of State on all questions of inventions, patterns, and armaments. This measure was strongly objected to by the Heads of those departments, who argued that it was undesirable to diminish their individual responsibility.

No instructions were issued to define the nature and extent of the authority which was to be exercised by the Director-General of Ordnance.

We think that in the economical administration of these departments there is no advantage to be gained from having a military officer as local Head of the Arsenal; but on the contrary, that such an appointment would tend to weaken that direct responsibility of the heads of the departments, which it is most desirable to maintain unimpaired.

Lord Dalhousie's evidence against the necessity for such an appointment is very conclusive.

We are of opinion that as questions of Manufacture and Supply are so intimately connected, and the one is so dependent on the other, these departments, and all others for the manufacture and repair of stores, should be placed under the administrative direction of the Chief of the Control Department, leaving the responsibility of the Heads of the Departments intact as regards manufacture.

If Mr. Cardwell approves of these recommendations we will deal with the remaining questions which have been referred to us in a subsequent report.

NORTHBROOK.
J. STANSFELD.
EDWARD LUGARD.
W. G. ANDERSON.

7th May, 1869.

THIRD REPORT.

In our First and Second Reports we have described the manner in which we think that Financial Control can best be exercised over the Administration of the Army; we have given our opinion upon the supply and distribution of munitions of war, and upon some other questions connected with the formation of the Department of Control; and we have said that in our judgment it is necessary that the Secretary of State for War should be able to command more assistance in Parliament than he now possesses. Reference to 1st and 2nd Reports.

We have since received Mr. Cardwell's instructions to extend our inquiry to the Horse Guards. His Royal Highness the Field-Marshal Commanding-in-Chief, with whose entire concurrence the field of our functions has been thus enlarged, has freely and fully put us in possession of his opinions on the subject of the transaction of business at the Horse Guards, over which Department he has presided since the year 1856. We have also examined the Military Secretary, the Adjutant-General, the Quartermaster-General, the Deputy Adjutants-General of Royal Artillery and Royal Engineers, and the Inspector-General of Recruiting, besides other witnesses of high authority on different parts of our inquiry. The Minutes of Evidence, together with a Return which shows the nature and distribution of the business transacted at the Horse Guards, are appended to this Report. Extension of inquiry to the Horse Guards.

In order to prevent any possible misapprehension, we wish it to be understood that we have considered the organization of the Departments of the War Office and Horse Guards entirely from a practical point of view; and that our inquiry does not extend to any of the constitutional questions which, among others, were investigated and reported upon in 1860 by the Select Committee of the House of Commons upon Military Organization, of which Sir James Graham was the Chairman.* Constitutional questions not touched.

Being now in possession of sufficient information with respect to the manner in which the whole Administration of the Army is conducted; those of us who signed the First Report, having since had the advantage of the assistance of Lieutenant-General Sir Edward Lugard, who is well acquainted with every part of that Administration; and feeling that, if the main principles of organization are determined, many matters of detail may be left for future settlement—such matters indeed being only capable of satisfactory adjustment after the main principles have been decided—we think that we shall best meet Mr. Cardwell's wishes by embodying in a Third Report, without further delay, the general conclusions at which we have arrived. Recommendations limited to main principles of organization.

The extent of the Departments which have come under our review will be seen from the following statement of the number and salaries of the persons (civilian and military) who are now engaged in the Administration of the Army. Annual cost of Administrative Staff of the Army.

There are thus employed—

Superior Officers	82
Clerks	673
Total	755

at an annual cost of 249,079*l.*

We have, from the best information at our command, compared those numbers with the numbers engaged upon similar duties in other Countries; and the result proves that a much larger Administrative Staff is employed in this Country, in comparison with the strength of our Regular and Reserve Forces, than in any of the principal Nations of Europe. Comparison with that of other Armies.

It will naturally be asked, why the numbers employed in England are so much larger than those employed by Continental Powers; and the answer is to be found in the fact that the whole Military Administration of this Country has been organized upon a system of want of trust, which has created double establishments for the transaction of the same business. Although the different Offices which once were concerned with the Reasons for larger numbers in England.

* The expression "the Military Organization Committee," will be used in subsequent references to the Report of this Committee.

Administration of the Army are now placed under one responsible Minister,* the tradition remains; and both within the walls of the War Office itself, and more especially between the War Office and the Horse Guards, the habit is still to prefer a system of unnecessary check, double labour, and divided responsibility, to one of well-defined responsibility, simplicity, and reasonable confidence.

Effects of present system unsatisfactory.

We are satisfied that the effect of the present system has been unsatisfactory, whether regarded from an economical or from an administrative point of view; and the Report of the Military Organization Committee warrants us in assuming that no sound system of Administration can be framed if it be not established upon the following principles:—

All Departments of Army Administration should be subordinate to the Secretary of State.

1st. That the Secretary of State is the Minister responsible both for the efficiency of the Army, and for its economical administration, and that all Departments of Army Administration are subordinate and responsible to him. This principle has recently been re-asserted by Mr. Cardwell in the House of Commons.†

Responsibility should be fixed upon the Chiefs of the principal Departments.

2nd. That confidence should be placed in, and responsibility fixed upon, the Chiefs of the principal Departments. If the Secretary of State is burdened with the details of current business, it is difficult for him, even in time of Peace, to deal satisfactorily with the larger questions which constantly arise; and in time of War, it would be impossible for him to supervise the operations for which he would be responsible. It is necessary, therefore, that much of the daily work of Army Administration should be done upon the responsibility of Officers under him. The same principle applies to the business of Chiefs of Departments—more responsibility should be placed upon subordinate Officers in many Branches of Army Administration.

Army Departments should be under one roof.

Forster, 115. Paulet, 210. Grant, 616. Duke of Cambridge, 1276.

We understand that, as soon as the necessary arrangements can be made, the whole Administration of the Army will be conducted under one roof, and our recommendations have throughout been based upon this assumption. The greater facility which will thus be afforded for the transaction of business is self-evident, and is freely admitted by His Royal Highness the Duke of Cambridge, the Adjutant-General, the Quartermaster-General, and the Military Secretary. The Military Organization Committee expressed their views upon this subject in the following forcible language:—

Report, p. 21.

"It would be well if the War Office and the Horse Guards could be brought under "the same roof. General Peel earnestly recommends this union. He says that it would "be the greatest possible convenience and the greatest advantage to the Service if "there were one building which could contain both offices so immediately connected. "Though the distance which now divides them be small, yet the separation engenders "the belief that they are two distinct Departments. Public opinion confirms the error, "and necessarily leads to divided action, if not to antagonism on the part of military "men against the supremacy of the Civil power."

Distribution of business suggested.

With these preliminary remarks we shall proceed to describe, with such explanations as appear to be required, the manner in which we suggest that the business of the Army should be distributed and superintended.

The business of the Army naturally divides itself into three principal Departments,—

I. Military.
II. Control (or Supply).
III. Financial.

Secretary of State requires more assistance in Parliament.

These Departments, over which the Secretary of State for War exercises a supreme authority, and which, assisted by one Under Secretary, he represents in Parliament, have been formerly represented in Parliament by the Master-General of the Ordnance, the Clerk of the Ordnance, the Surveyor-General of the Ordnance, the Secretary to the Master-General, the Secretary to the Treasury, the Secretary at War, the Home Secretary, and the Secretary of State for War and the Colonies.‡ The Parliamentary representation of the Navy is largely in excess of that of the Army, as there are four officers connected with the administration of the Navy now in

* Order in Council of August 11, 1854. Note to Schedule of Establishment.
"The Department of War being established upon the alleged necessity of combining and amalgamating "under one Secretary of State all the divisions of the present separate military superintendence and detail "hitherto carried on in distinct offices."—*Appendix to Report of Select Committee on Military Organization, p.* 533.

† Hansard's Debates, vol. 194, p. 203, 3rd Series.

‡ The Ordnance Officers represented the Artillery, Engineers, and all questions of armaments, military stores, and works; the Secretary of the Treasury represented the Commissariat; the Secretary at War the Finance of the Army; the Home Secretary the Militia and Yeomanry, and the employment of the Army at home; the Secretary of State for War and the Colonies the employment of the Army abroad.

Parliament, and all the Members of the Board of Admiralty may be members of the House of Commons. We have no hesitation, therefore, in repeating the opinion which we have expressed in our First Report, that the present arrangements do not give to the Secretary of State sufficient Parliamentary assistance. We therefore propose that, in addition to the Parliamentary Under Secretary of State, who should give a general assistance to the Secretary of State, and represent the War Office in whichever House of Parliament the Secretary of State may not happen to sit, the Chiefs of the Control and Financial Departments should also be eligible for election as members of Parliament.

Chief of the Control Department should be a member of the Political Administration of the day.

Looking to the magnitude of the expenditure and the importance of the business connected with the supplies of the Army, it cannot fail to be a great advantage that the Control Department should be represented in Parliament; but it must not be forgotten that the duty of administering the supplies of the Army requires special qualifications, and the first object should be to appoint to the Office a person possessing those qualifications. It would, therefore, we think, be unfortunate if the appointment came to be considered as one which must, as a matter of course, be conferred upon a Member of Parliament. It would be sufficient, in our opinion, that the office should be classed with those of the Naval Members of the Board of Admiralty, who form part of the Political Administration of the day, are eligible to sit in the House of Commons, but need not necessarily always be Members of Parliament. This was the position formerly occupied by the Master-General of the Ordnance; both Sir George Murray and Sir Hussey Vivian filled that office when in and out of the House of Commons. No difficulty is likely to be experienced in the selection of a member of the House of Commons for the office of Financial Secretary.

We now proceed to explain our proposals with respect to the organization of the three Departments, and to give the principal reasons which have induced us to recommend some important alterations of existing arrangements.

I.

Military Department to be under the Officer Commanding-in-Chief.

The First, or Military, Department, under the direction of the Officer Commanding-in-Chief for the time being, embraces the business which is now transacted at the Horse Guards, relating to the discipline of the Forces, appointments, promotions, and the military command in Great Britain. It has been pointed out by the Military Organization Committee, that the Officer Commanding-in-Chief should not be connected with the Political Administration of the day, so that,—

Report, p. 20

"The Army may be enabled to feel assured that the patronage of the Army, as regards "first commissions and the ordinary promotions and appointments, will not be distributed with "a view to political objects or the necessities of successive Governments; nor will the dis-"cipline of the Army, as daily administered, vary in its character with each change in the "Civil Department."

The arrangement under which, as described by the Military Organization Committee, the conduct of this business is entrusted to the Officer Commanding-in-Chief, subject to the general responsibility of the Secretary of State, appears to us, regarded from a practical point of view, to be advantageous to the public service, and it is in accordance with the opinion which we have already expressed, that much of the daily work of Army Administration should be done upon the responsibility of Officers under the Secretary of State. In the changes we propose, our object has been to bring under the Military Department all the business which properly belongs to the organization, discipline, and distribution of the Forces; and to collect under the Officer Commanding-in-Chief all the materials which are necessary to enable him to give to the Secretary of State the most comprehensive military advice.

Officer Commanding-in-Chief should be the Secretary of State's Military Adviser.

It appears to us to be of great importance, with a view to the proper transaction of business, that a Secretary of State, usually a civilian, and liable to frequent removal, should have at his command the advice and assistance of a Permanent Military Officer of high rank and extensive experience.* And while, as we shall endeavour to show in the course of this Report, it is unnecessary that the opinion of the Principal Military Adviser of the Secretary of State should be asked or given on questions of detail, or such as are dealt with under regulations, he should always be consulted upon matters of importance. In short, while the other Departments of Army Admi-

* "In the play of parties, and by force of the constitutional action of Parliamentary Government, the Secretary "of State for War must frequently be changed, and be often not a military man. The Permanent Staff of "the Department ought to be regulated with a view to this necessity."—*Military Organization Committee*, 1860, *p.* 18.

nistration should be held responsible for the conduct of the business relating to Supply and Finance, there should be the freest interchange of opinion between them and the Military Department.

Confusion of authority and unnecessary work at the Horse Guards.

The Return of Distribution of Work in the Horse Guards, and the evidence which we have taken on the subject, show that there is some confusion of authority, and that unnecessary work is done there; both because the Administration of the Army has not been clearly distributed, and because business which might with advantage be transacted locally has been brought to Head-Quarters. In saying this, we desire to be understood as not intending in any way to depreciate the zeal and ability of those who have had the conduct of the business transacted at the Horse Guards.

Chief defects at the Horse Guards.

The following are the chief defects which have come under our notice:

No general registry of letters.

1st. There is no general registry of letters received, or of business transacted. Consequently the different Divisions of the Horse Guards correspond one with the other,—are obliged to interchange copies of letters and documents,—and a large correspondence passes between the Horse Guards and the War Office.

Unnecessary correspondence relating to supplies.

2nd. Business of minute detail relating to requisitions for supplies, instead of going straight from those who require the supplies to those who can make the issue, passes through various channels to the Horse Guards—from the Horse Guards to the War Office—and from the War Office to the Department which has to make the issue, thereby occasioning a large amount of unnecessary work.

Too much detail business.

3rd. Too much of the detail business of the Army comes to the Horse Guards.

Distribution of business not clearly defined.

4th. The distribution of business between the Adjutant-General, the Quartermaster-General, and the Military Secretary, is not clearly defined.

Defects capable of easy remedy.

We are satisfied, and our opinion is confirmed by the evidence of His Royal Highness the Field-Marshal Commanding-in-Chief, that most of these defects are capable of easy remedy; and since the commencement of our inquiry steps have been taken, by Mr. Cardwell's directions, for the purpose of remedying them.

A common Registry for Military Departments to be established. Duke of Cambridge, 1280.

A Registry is to be established in the Horse Guards, which will form part of the War Office Registry. When this plan, to which His Royal Highness the Field-Marshal Commanding-in-Chief entertains no objection, has been carried into effect, all correspondence between the several Divisions of the Horse Guards, and between the Horse Guards and the War Office, will cease, and a very great reduction will be made in the business of both Offices. No improvement, indeed, short of bringing all the Departments under one roof, will do more to economize labour, and to consolidate the transaction of business.

Requisitions for supplies will not pass through the Horse Guards.

It has been arranged that no requisitions for supplies shall hereafter be passed through the Horse Guards to the War Office. The Chief of the Control Department is responsible to the Secretary of State for the proper supply of every description of equipment to the Army. Supplies should, for the most part, be issued on requisitions from Officers in Command to the local Control Officers who can at once order the issue, and no advantage can ensue from an indirect and circuitous channel of requisition being adopted. No doubt, the general efficiency of the troops depends as much upon their being properly fed, clothed, armed, and equipped, as upon their being well drilled, and ably commanded in the field; and it is the duty of Officers in Command to satisfy themselves that nothing essential to the efficiency of the troops under their command is wanting. The monthly returns from the troops are sufficient to inform the Officer Commanding-in-Chief that no neglect has occurred; but if cases of special urgency should occur in which supplies are either unduly delayed or improperly furnished, special reports should be made to him so that he may be able at once to bring any such cases to the notice of the Secretary of State.

Reduction of correspondence relating to supplies.

This arrangement will relieve the Adjutant-General, the Deputy Adjutants-General of Royal Artillery and Royal Engineers, and the Quartermaster-General, from all business relating to the supplies of arms, ammunition, clothing, camp equipage, barrack stores, &c. We need only refer, in support of our opinion upon this subject, to the evidence given by His Royal Highness the Duke of Cambridge, Lieutenant-General Sir Hope Grant, Lieutenant-General Lord William Paulet, Major-General Gambier, Sir W. Power, Mr. Drake, Major-General Balfour, Mr. Ramsay, and Major-General Sir Henry Storks, from which our conclusions have been drawn, and among whom there is little substantial difference of opinion.

Duke of Cambridge, 1287. Grant, 597. Paulet, 156. Gambier, 266.

Double position of the Officer Commanding-in-Chief.

The cause of the great amount of business of detail which is now transacted at the Horse Guards is, that His Royal Highness the Duke of Cambridge (as he has fully explained in his evidence) occupies a "double position at home," inasmuch as he

" commands the troops at home as well as being the Commander-in-Chief of the Army." His Royal Highness might have added that, until within the last few weeks, he also occupied the position of General Officer in Command of the London District, but this anomaly will cease with the appointment of a General Officer to command that District, and therefore requires no further notice. We have no wish to diminish the power of general supervision over Officers in Command of Districts, which is exercised by the Officer Commanding-in-Chief; but we think that, without in any way diminishing his proper authority, a gradual assimilation of the home practice towards that of Foreign Stations would relieve the pressure of detail business, and be an advantage to the general efficiency of the Service. Duke of Cambridge, 1302.

The tendency which exists in the Administration of the Army, both in the War Office and at the Horse Guards, to too great centralization in matters of detail, is very natural, and is not confined to this Country. In a remarkable essay on "Responsibility in Times of War," recently published, the Archduke Albrecht, Field-Marshal Commander-in-Chief of the Austro-Hungarian Forces, ably combats this tendency, and lays down as fundamental principles of Army Administration, that there should be,— Evils of over-centralization.

"1st. A strictly-organized and sharply-defined circle of action for each one in his own "sphere, and to this end there must be—

"2nd. Prevention of meddling by a superior authority with the sphere of action of his "subordinates; for instance, laying hands upon the business, or reserving to himself the decisions, "which are their affair, not his. Above all things must be impressed upon Heads of Departments "the duty of not only exercising this restraint upon themselves, but also of keeping careful "watch over their own deputies, who are generally the prime movers in such encroachments."

These principles are in complete accord with the opinions which we entertain upon this subject.

We have not considered it to be within our province to suggest precise rules for the purpose of carrying out this part of our recommendations. Those rules should be carefully considered, and embodied in the next issue of the Queen's Regulations to the Army. Queen's Regulations to the Army should be altered.

We have next to consider the manner in which the business of the different Divisions of the Military Department should be arranged. Proposed distribution of business in the Military Department.

The Adjutant-General's Division now comprises the business relating to the Discipline, interior economy, Recruiting, and Discharge of the Army; we have already suggested that it should be relieved from all business relating to supplies, and we have to propose a very considerable addition to its duties. Adjutant-General's Division.

We understand that it has been decided that the discipline and organization of the Reserve Forces will in future be dealt with in the Military Department. The importance of this change is very great, for while the number of the Regular Forces in Great Britain and Ireland in the present year is less than 100,000, the Reserve Forces, towards which Parliament contributes a large sum, amount to no less than 300,000, with which the Officer Commanding-in-Chief has no official connexion. It appears to be absolutely necessary to establish such a connexion, in order that all the various Forces at the disposal of the Crown for the defence of the Country may be consolidated and rendered promptly available for united action. Reserve Forces should be under the Military Department.

Steps are being taken to place the Reserve Forces, when they are assembled for training or exercise, under the Generals in command of Districts for purposes of inspection and command; this would naturally bring such questions as may arise respecting their discipline and organization to be dealt with in connexion with cognate questions as to the discipline and organization of the Regular Forces, and in the same Division in which such questions are treated. It will be seen from the evidence of the Duke of Cambridge, that His Royal Highness proposes this arrangement. And in Adjutant-General's Division. Duke of Cambridge, 1328.

We found in the course of our inquiry that the duties of the Quartermaster-General had been greatly decreased in consequence of the establishment of the system of Control, under which the Quartermaster-General's Department is relieved from certain duties and responsibilities connected with Stores and Transport. This is frankly admitted by the Quartermaster-General of the Army, Lieutenant-General Sir Hope Grant; and the reasons are explained shortly and clearly by Mr. Drake, the officer who, under the direction of Lord Strathnairn, introduced the Control system in Ireland with perfect success. Mr. Drake shows that while the new system has concentrated responsibility and diminished correspondence, a General Officer in command will have "fuller and more accurate information" as to stores than he had before. Decrease in business of the Quartermaster-General's Department. Grant, 614, 615. Drake 507, 508, 510, 511, 512, 521.

It is obvious that a considerable reduction both in the local Staff of the Quartermaster-General's Department and in the establishment of the Quartermaster-General's

Division of the Military Department, must follow from this simplification of business and concentration of responsibility.

Business relating to transport should be under the Control Department.

That portion of the business of transport which relates to the provision of passages or the grant of allowances in lieu, and to travelling expenses, is at present distributed among many different Branches of the Horse Guards and War Office. Delay and conflicting decisions are the almost necessary consequence. It also appears from the evidence, that the responsibility of controlling the expenditure for the Land Transport of Troops, is not so clearly defined as it should be. By an arrangement made in 1856, Routes, sanctioning the issue of travelling expenses, are issued in blank to the Quartermaster-General, but that Officer keeps no account of the expenditure as it runs on. This is not a satisfactory state of things, looking to the extent of the expenditure involved, and by consolidating the whole business under the Control Department, we believe that the expenditure will be more effectually controlled and the transaction of business much simplified.

Grant, 602.

Opinion of Military Department only necessary on important questions.

There are some questions relating to the arrangement of barracks, transport, and other matters, which require consideration in detail; and upon which we will only observe that while it must frequently be necessary that the Secretary of State should take the opinion of the Officer Commanding-in-Chief as his Principal Military Adviser upon questions relating both to finance and supply, we think that it is both unnecessary and inconvenient that the correspondence on these subjects should pass through the Military Department of the War Office, instead of being addressed to the Departments immediately concerned with, and responsible for, such business. This correspondence will in future reach the War Office from both Home and Foreign Stations, accompanied by the recommendation of the General Officer in Command, who is necessarily an Officer of great military experience, and it will be sufficient if the Chiefs of the Supply and Finance Departments invite the opinion of the Military Department upon important or doubtful questions, before any decision is arrived at upon them.

Military Secretary's duties.

The position and duties of the Military Secretary have been explained by the Duke of Cambridge, as follows:—

Duke of Cambridge, 1309.

"The Military Secretary has a double office; he is a personal officer of the Commander-"in-Chief, but he has specific duties, such as the promotions and the patronage of the Army, "under his more immediate jurisdiction, and therefore he is acknowledged as a public officer."

And His Royal Highness confirms the description given by General Sir Charles Yorke, of the "personal" duties of the Military Secretary, which is in the following terms:—

Yorke, 1092.

"In the directions which the Commander-in-Chief wishes to give to the departments, either "to the Quartermaster-General's Department, or to the Adjutant-General's Department, or "to the War Office, he gives his directions to the Military Secretary, and the Military Secretary "communicates them."

It is obvious that when, by the establishment of a General Registry, all correspondence between the different Divisions of the Horse Guards, and between the Horse Guards and the War Office, shall have ceased, there will be no occasion for the public letters which are now signed by the Military Secretary on any subjects excepting those which relate to promotions and patronage.

Business should be disposed of in the Division to which it belongs.

We think that all business should be dealt with and disposed of in the Division to which it belongs, and by the Officers who are responsible for the conduct of that business. That this is not altogether the case at the present time, is sufficiently proved by the evidence which we have received, and by the Return of Distribution of Work at the Horse Guards. To illustrate our meaning we will take the case of business relating to General Courts-Martial. The Officer Commanding-in-Chief advises Her Majesty as to the military bearings of the sentence, and signs the letters necessary to carry the sentence into execution. At present the proceedings of General Courts-Martial pass through the Military Secretary, who is described by His Royal Highness as occasionally "assisting him in going through the work," and who afterwards prepares the requisite letters for signature. We think that the proceedings should go to the Adjutant-General, who is the Head of the Division responsible for the Discipline of the Army. Any assistance which the Officer Commanding-in-Chief may require, should primarily be given by the Adjutant-General (of course without precluding the advice of any other competent person), and the letters for the signature of His Royal Highness should be prepared in the Adjutant-General's Division.

Duke of Cambridge, 1311.

Duke of Cambridge, 1313.

Paulet, 135.

Military Secretary's duties should be confined to promotions and appointments.

The same observations apply to the relation of the Military Secretary to the official business of other Divisions. The Duke of Cambridge has explained that in his "personal" capacity—

"The Military Secretary merely collects the business for the Commander-in-Chief, "just as the Private Secretary at the War Office does for the Secretary of State." Duke of Cambridge, 1309.

The analogy appears to us to be theoretically complete, and only to require to be carried out in practice. The Private Secretary to the Secretary of State prepares no official letters for signature, has no Office Establishment, and keeps no separate official records. Letters for the signature of the Secretary of State, or conveying his decisions, are prepared in the Departments to which they belong, and we recommend that, whatever arrangement may be made for the transaction of the private business of the Officer Commanding-in-Chief, the public duties of the Military Secretary should be confined to promotions and appointments, and that all that part of his Office which is concerned with the official transaction and record of other public business should be dispensed with.

Distribution of business after the abolition of the Board of Ordnance not entirely satisfactory.

Some difficulty has been found in making a satisfactory distribution of the duties which were formerly performed by the Master-General and Board of Ordnance, and which comprised the command of the Royal Artillery and Royal Engineers, and all the business relating to armaments, munitions of war, fortifications, and other works constructed or superintended by the Royal Engineers. When the Master-General and Board of Ordnance were abolished in 1855, those duties were divided (under the general authority and responsibility of the Secretary of State for War) between the Officer Commanding-in-Chief and other Officers whose designation and functions have since been frequently changed, but as yet without arriving at a completely satisfactory result.

Command of Artillery and Engineers should be vested in the Officer Commanding-in-Chief.

It appears to be generally agreed that the command of both Corps should, together with that of the rest of the Army, be vested in the Officer Commanding-in-Chief; that questions of discipline affecting them should be disposed of as similar questions are dealt with in other Branches of the Service; and that the Military Authorities should be responsible for the proper custody and expenditure of warlike stores in the charge of the Royal Artillery, in the same manner as they are responsible with respect to arms and ammunition in possession of the Infantry and Cavalry.

Difference of opinion as to the channel through which command should be exercised.

There is some difference of opinion as to the Officers through whom the authority of the Officer Commanding-in-Chief should be exercised, and as to the manner in which business connected with the Royal Artillery and Royal Engineers, which frequently involves professional and scientific questions of great intricacy, as well as financial considerations of the largest kind, should be transacted.

"Principal "Staff Officer" of Royal Artillery and Inspector-General of Artillery. Duke of Cambridge, 1361.

His Royal Highness the Duke of Cambridge proposes to retain in the Adjutant-General's Division an officer of the Royal Artillery, who, as the "principal Staff Officer" of the Corps, shall administer its interior economy and advise the Officer Commanding-in-Chief with respect to the promotion and distribution of Officers. An Inspector-General of Artillery should, in the opinion of His Royal Highness, be attached to the Military Department for the inspection of the Corps, and of the armaments and munitions of war in their charge. The latter duty will, in our opinion, if diligently performed, conduce to economy by securing the careful preservation of armaments, and a revision, from time to time, of the quantities of warlike stores in charge of the Royal Artillery.

Recommendations for the conduct of business relating to Artillery. Adye, 956, 957, 994. Lefroy, 1139, 1140.

We recommend these arrangements for adoption as not interfering with the present organization, and because they appear to us to be correct in principle: for a distinct line is drawn between (1) the "personnel" of the Corps, together with the armaments and stores in their charge, and (2) the custody of the reserves and provision of the "matériel," which latter duties naturally belong to the Control Department. The reports of the Inspector-General of Artillery relating to discipline would be disposed of in the Military Department, and those relating to armaments and munitions of war would, when necessary, be forwarded, with the opinion of the Officer Commanding-in-Chief, to the Control Department for consideration and disposal by the Secretary of State.

Difficulties connected with the Administration of the Royal Engineers.

The administration of the Royal Engineers presents greater difficulties. So far back as the year 1837, when the Duke of Richmond proposed to separate the command of the Corps from the superintendence of the works executed by them, the disadvantages of such a separation were forcibly pointed out by all the highest authorities upon the subject, and particularly by Sir James Kempt, Sir Hussey Vivian, Lord Hardinge, and Sir John (then Colonel) Burgoyne.

The Board of Ordnance was abolished in 1855, and the complete separation was effected in 1859. In 1860, the Military Organization Committee reported as follows:—

"Mr. Herbert admits that the late transfer of the military command to the Horse Guards "has not hitherto worked to his satisfaction; that harmonious action is wanting; that the "corps is under two masters; and that the predictions of 1837, so far as the Engineers are "concerned, have in some measure been verified." P. 13.

Office of Inspector-General of Fortifications should be revived.
Simmons, 816, 817, 830, 831, 842, 864.
Jervois, 720, 721, 811, 812. 813.
Murray, 884, 885, 886.
Duke of Cambridge, 1366.

No substantial alteration has since taken place, and the evidence which we have received shows that the difficulties which then existed still remain. Such being the case, we recommend the adoption of the plan which was suggested by Lord Herbert to the Committee on Military Organization, and with which His Royal Highness the Duke of Cambridge substantially concurs,—namely, that an Officer should be appointed who should fill the same position as the Inspector-General of Fortifications filled under the Board of Ordnance, and who, under the Officer Commanding-in-Chief, should direct the distribution of the Officers and men of the Corps, and also advise the Secretary of State as to the estimates for works, and superintend their execution by the Corps.

Position of the Deputy Adjutant-General of Engineers.

It will not be necessary to disturb the present arrangement by which the Deputy-Adjutant-General of the Royal Engineers is placed under the Adjutant-General of the Army for the purpose of assisting him in questions relating to the discipline and interior economy of the Corps, if it be clearly laid down that all general arrangements relating to the distribution, both of the Officers and men of the corps, should be submitted to the Officer Commanding-in-Chief, by the Inspector-General of Fortifications. We recommend that a special and temporary arrangement should be made for the superintendence of the completion of the works provided for by the Fortification Loan, which are of an exceptional character.

Financial Control over Expenditure on Works not weakened.
Simmons, 825, 828, 829.
Jervois, 769, 772.
Murray, 887, 888, 889.

It will be seen from the evidence of Sir Lintorn Simmons, Colonel Jervois, and Colonel Murray, that no alteration whatever will be made, under the arrangements we propose, in the exercise of complete financial control over the expenditure of public money upon works.

There remains some other business connected with the Military Department as to which our remarks will be brief.

Topographical Department.

The collection and record of strategical and topographical information, should be under the direction of an Officer specially selected for his knowledge of military history and strategy, who should hold the appointment for a longer term than the ordinary length of Staff Service. It appears to us that this business should be placed under the Military Department.

Director-General of Military Education.

The subject of the Education of the Army was referred in the year 1868 to a Royal Commission, who have recently made a Report, in which they recommend the substitution of a Director-General of Military Education for the present Council of Military Education. We will only remark that the business of the Director-General of Military Education which relates to the examination of Officers for promotion, and the superintendence of Army Schools, &c., should form part of the Military Department.

Director-General of Army Medical Department and Chaplain-General.

The Director-General of the Army Medical Department, and the Chaplain-General, should be attached to the Military Department.

Future distribution of business.

We have now concluded the observations we have to make as to the several Divisions of the Military Department, and it only remains for us to state what general arrangements appear to us to be the best for their superintendence. His Royal Highness the Field-Marshal Commanding-in-Chief has been good enough to place in our hands a Table showing the distribution which he recommends, and we concur generally with that distribution, subject to the modifications which we have proposed in the duties of the Military Secretary.

Duke of Cambridge, 1337.

Offices of Adjutant-General and Quartermaster-General should be combined.

We think, however, that the reduced business to which we have proposed to limit the Quartermaster-General's Division should not be placed under an officer co-ordinate in authority with the Adjutant-General, but that the Offices of Adjutant-General and Quartermaster-General should be combined, and the business relating to the distribution of the Forces form a Subdivision of the Amalgamated Department. There would thus be under the Officer Commanding-in-Chief, one Officer who would deal with all questions relating to the discipline, organization, and distribution of the Regular and Reserve Forces, with the exception, to which we have already referred, of the distribution of the Royal Engineers. We think that greater unity of administration would thus be secured than would be the case if, as is proposed by His Royal Highness, there should be in future an Adjutant-General superintending five important subdivisions, and a Quartermaster-General with very limited functions. Our proposal is in accordance with the example of the French War Office, in which the discipline and the distri-

bution of the forces are placed in the same "Bureau" of the First "Direction" of the office of the Minister for War.

Performance of the duties of the Officer Commanding-in-Chief in his absence. Duke of Cambridge, 1383.

No arrangement now exists for the performance of the duties of the Officer Commanding-in-Chief if he should be absent, or unable from illness to perform them, and we think that the Head of the combined Division should be the "locum tenens" of the Officer Commanding-in-Chief in such a contingency; the officer at the head of the Discipline Subdivision performing the duty of the Head of the Division in the absence of the latter Officer.

Present and former functions of the Officer Commanding-in-Chief compared.

Under the organization which we recommend, the Officer Commanding-in-Chief would be relieved of some detail business; and it appears to us, that to attempt to deal with much detail is incompatible with the functions which the Officer Commanding-in-Chief will have to discharge. In considering the organization of the Military Department, we have been forcibly reminded of the great changes which have recently taken place in those functions. Before the Crimean War the authority of the Commander-in-Chief was limited to Great Britain and Ireland;*—the command of the Royal Artillery and Royal Engineers devolved upon the Master-General of the Ordnance, who was also described by the Duke of Wellington as the Military Adviser of the Administration;—no questions relating to fortifications or armaments came under the consideration of the Commander-in-Chief, and it is unnecessary for us to dilate upon the difficulty and importance of such questions at the present time;—the local European Army of the East India Company was still in existence, and none of the intricate problems which, since the Amalgamation of the European Forces of the Company and the Crown, have constantly arisen and are still far from having been finally solved, had to be considered by the Commander-in-Chief;—lastly, the Militia was then under the Home Secretary, and the Volunteer Forces had not been raised, so that there were none of the questions which have recently been so prominently brought under notice respecting the combination of those forces with Her Majesty's Regular Troops for the defence of the Country.

Evidence taken before the Commissioners on the Civil Departments of the Army, 16th July, 1836, p. 40.

Result of Comparison.

This comparison between the position occupied formerly by the Officer Commanding-in-Chief and that which he will now occupy is, we think, sufficient to show that official arrangements which might have answered in former times, are not necessarily suited to existing circumstances.

High Officers of State should not be burdened with details Grant, 591. Duke of Cambridge, 1302, 1314.

We can well understand the feeling which induces His Royal Highness the Duke of Cambridge to feel some hesitation in relinquishing any portion, even of the details, of the business with which he has been accustomed to deal. No one who has been in communication with His Royal Highness can fail to appreciate both the intimate knowledge of every Branch of the Service which he possesses, and the unwearied application with which he devotes himself to the transaction of business; but it must not be forgotten that true principles of organization demand that the higher Officers of the State should be relieved from the unnecessary burden of details; this is perhaps more necessary in the Administration of the Army than in any other Branch of the Public Service, for a Military Department is essentially for use in time of war, and a system which is worked to the highest pressure in time of peace must inevitably break down in time of war.

Distribution of duties amongst Staff Officers.

While we recommend with confidence that the Divisions of the Adjutant-General and Quartermaster-General should be amalgamated under one Officer, we are aware that the alteration would involve considerable changes in the local distribution of duties between Officers of the Military Staff of the Army.

English and Foreign systems compared. Duke of Cambridge, evidence given on 13th April, 1869. Grant, 619, 629, 630. Storks, 707, 709, 710, 711.

The Staff of the Army is divided into two distinct Branches; that of the Adjutant-General, and that of the Quartermaster-General. In France, and in the principal Military Nations of Europe a different organization is in force, under which there is one Chief Staff Officer, with such a number of Subordinate Staff Officers as may be required for the various duties which have to be performed.†

* *See* Appendix 14 to Report of Select Committee on Military Organization, 1860.

† "The division of our Staff into the two Departments of Adjutant and Quartermaster-General is injurious, "and does not work well in the Field. One Staff would be a vast improvement, and as we are at last doing "away with a number of Civil Departments, and putting the Civil Administrative duties of the Army under "one Head, it is to be hoped that a similar improvement may be soon effected regarding our disunited Staff. "Every officer who has served on the Staff in the Field knows how continually letters are sent to the wrong "Department; and, indeed, it is difficult for any one to remember the curious division of subjects between the "two. If the two Assistants do not pull well together, the Service is likely to suffer. The duty would be "better and more easily carried on by having one Chief Staff Officer and two or three Assistants with each "Division. In the same way there should be a Chief of the Staff at Head-Quarters, with Deputies and Assistants under him as required.

"According to custom, there are always with each Division in the Field, an Assistant and a Deputy-"Assistant of each Department, and a Brigade-Major with each Brigade; by this arrangement those of the "Adjutant-General's Department have but little to do, whilst the Quartermaster-General's Officers are, during "active operations, overworked."—*The Soldiers' Pocket Book for Field Service, by Colonel Wolseley, Deputy Quartermaster-General in Canada.*

Advantages of Foreign system.

If the latter organization were adopted in this country, we believe that considerable advantages would follow. A General Officer in Command would give his orders to two principal Officers under him,—a Chief of the Staff upon matters of Strategy and Discipline, and a Controller upon matters of Supply and Transport—the whole Military Staff of the Army would be concentrated and made available for every service—unnecessary correspondence would cease—and, as the natural consequence of the introduction of a simpler system, considerable reductions of establishments might be made, to the advantage of the public service, both as regards efficiency and economy.

Staff of the Army should be consolidated.

When the system of Control, by which the Supply Departments of the Army have been reorganized, has been completely established, a reorganization and consolidation of the Staff of the Army appears to us to be the next great improvement to be made in our Military Organization; and this consideration has been an additional reason for inducing us to recommend a re-arrangement of business at Head-Quarters. It may probably be thought advisable to effect the consolidation of the Staff gradually, and with this view a Quartermaster-General's Division might be provisionally retained in the Military Department on a reduced scale, with the clear understanding that, pending the complete introduction of the new system, the Adjutant-General should be the Staff Officer next in rank and position to the Officer Commanding-in-Chief.

General Commanding-in-Chief should be in the same office with Secretary of State.

It will be seen that in our recommendations with respect to the Military Department, we have taken into consideration the very considerable addition which is about to be made to the duties of the Officer Commanding-in-Chief, by including under his Department the discipline and organization of the Reserve Forces. Our proposals for the internal organization of the Department are based upon the assumption that, in accordance with statements made in Parliament,* the Officer Commanding-in-Chief will be located in the same building with the Secretary of State. Indeed, as a practical question, no scheme of re-organization and reduction can in our opinion prove successful and complete which is not based upon the accomplished fact that all the Departments of Military Administration are housed under one roof.

II.

Control Department.

We now proceed to describe the organization of the Second, or Control, Department; we have already, in our Second Report, discussed at some length several questions relating to it, and we shall therefore notice only such parts of our proposals as have not been previously dealt with.

The Control Department has been established in accordance with the recommendations of Lord Strathnairn's Committee on the Transport and Supplies of the Army, adding to it, however, as a distinct Branch, the business relating to Munitions of War and Miscellaneous Stores, for the reasons which we have given at length in our Second Report.

Distribution of business.

Under the Chief of the Department, who may, if our recommendation be carried out, be a Parliamentary Officer, there would be—

First, a Supply Division, to deal with the business relating to Transport, and the supply of the articles required for the daily consumption of an Army, such as food, forage, fuel and light.

Secondly, a Store Division, for Munitions of War and Miscellaneous Stores, under an Officer specially qualified to deal with Munitions of War.

Experiments relating to Munitions of War.

We recommend that the direction of experiments relating to Munitions of War should be placed under the Chief of the Control Department, because he is the Officer responsible not only for the provision of supplies in proper quantities, but also for seeing that they are of proper quality; moreover, the expenditure upon experiments must be provided for in the Supply Votes, for which he is responsible; in the third place, having at his command full information as to every description of supplies, he is able to give an opinion as to the economical effect of any proposed alterations; and lastly, having under him the Manufacturing Departments, he has at his disposal all the technical knowledge which the Heads of those Establishments possess.

Council of Ordnance.

Mr. Cardwell has already provided for a comprehensive consideration of all experimental questions of more than ordinary importance, which, in many cases, affect the Navy as much as the Army, by the institution of a Council of Ordnance, composed of high Officers of the War Office, India Office, and Admiralty. There are, however, experiments of minor importance, in which, before the adoption of a new pattern, the Military Department should be consulted. Experiments connected with the process of manufacture might be dealt with by the Chief of the Control Department on his own responsibility, within the Votes of Parliament for such services.

* Hansard, 3rd Series, 194, p. 355.

For the purpose of assisting the Secretary of State and the Chief of the Control Department in scientific questions, and in the conduct of experiments, we recommend that the Director-General of Ordnance should be retained, as a purely consultative Officer, and a standing Member of the Ordnance Council, without a staff of clerks, the correspondence on these subjects being carried on in the Control Department. Under this arrangement a Deputy Director-General of Ordnance would no longer be required.

Director-General of Ordnance should be retained.

The Director of Contracts, like the Heads of the Manufacturing Departments, should be subordinate to the Chief of the Control Department. The Director of Contracts should watch the cost of supplies of all kinds, and advise the Chief of the Control Department with respect to the best and most economical sources and methods of supply. The interior organization of this Branch, and the proper arrangements for the conduct of its business must be separately dealt with; and have been discussed in the Report of a War Office Committee which has recently examined into the business relating to contracts.

Duties of Director of Contracts.

The Chief of the Control Department should also have under his immediate direction a small office to record the services and deal with the distribution of the "personnel" of the Control Department and Subdepartments, and with the Establishment questions connected therewith.

The regulations of the Pay Subdepartment of the Control Department, have been carefully considered and approved by the Treasury.

The next question relating to the Control Department which we have to consider is whether the Examination of Store Accounts (that is to say, the examination of the ledgers of Store Accountants, to show that stores have been taken on charge, and issued in accordance with regulation or by the orders of a competent authority, or otherwise satisfactorily accounted for) should remain under the Chief Auditor, or be attached to the Control Department; and we shall have to state at some length our reasons for the conclusions at which we have arrived.

Examination of Store Accounts.

The Examination of Store Accounts was formerly conducted in the Store Department, and was transferred to that of the Chief Auditor three years ago. Two Memoranda, one written by Rear-Admiral Caffin, who was then Director of Stores, and who objected to the change, and the other by Mr. Galton, who recommended it, will be found appended to this Report.

The main argument in support of placing the Examination of Store Accounts under the Chief Auditor may be stated as follows:—

Argument for placing the Store Accounts under the Chief Auditor.

The expenditure of Executive Departments should be audited by an independent authority. The consumption of stores is expenditure, stores being equivalent to money. Therefore the consumption of stores should be audited in the Department of the Chief Auditor, which is a Department distinct from the Executive Department which purchases stores, and regulates their issue.

This argument appears to us to be founded upon a misconception of the functions of the Store Department, which is now comprised under the Control Department of the War Office. That Department is called an "Executive" Department, and is assumed to be a Department anxious to spend stores, and therefore requiring to be checked by a Department free from what Bentham would have called that "sinister interest."

Founded on misconception of functions of Control Department.

The Control Department, however, is not in this sense an "Executive," it is an Administrative Department. The spenders of stores are the troops; the Control Department checks the estimates of the quantities required, and provides the stores which are consumed by the troops. The duty of both Divisions of the Control Department is to take care that stores are economically consumed, no less than that they are properly supplied. The Supply Division has, on the one hand, to check irregular or excessive issues to the troops, and, on the other, to prevent improper supplies being furnished by contractors. The Store Division has similar functions, with the additional one of taking care that considerations of economy are not lost sight of, when changes are proposed either in the patterns of warlike stores, or in the quantities of such stores to be maintained in reserve. The Central Administration of the Control Department exercises a general supervision over the proper performance of their duties by the local Officers of the Department, who have themselves no interests which can interfere with the independent exercise of their functions.

Control Department a checking, not a spending, Department.

It may be argued, indeed, that the acts of the Chief of the Department himself should be checked by an independent Department. But to provide such a check is not the object or function of the detailed examination of Store Accounts of which we are now speaking. No system of mere Audit, independent or not, could expose abuses on the part of the Chief of a Department. The Auditor must take for granted that an order issued by a competent authority was necessary for the Public Service; he has neither

Chief of the Department not checked under the present system of Audit.

the authority nor the requisite knowledge to enable him to question its necessity, and his function ceases when he has satisfied himself that the Store Accountant who makes an issue has obtained a sufficient voucher to free his charge. He is, in fact, a check upon the Accountant, but he is not, and cannot be, a check upon the Chief of the Department.

Present system of Audit described.

Under the present system, the Chief Auditor, is entrusted with the duty of examining Store accounts, because he is considered to be an independent Officer; but when any question arises upon the accounts which are being examined under his direction, his instructions, as explained when the transfer was made, are—

1st. To communicate with Store Officers for the sole purpose of obtaining explanations and enforcing regulations, and not to reprimand them; and

2nd. To consult the Director of Stores before enforcing disputed disallowances, or submitting doubtful questions for decision.

The result of such a system must be to place the duty of determining, in the course of the examination of Store accounts, what particular items require further explanation, upon a Department which cannot possess adequate knowledge for the purpose; while, at the same time, the real decision of such cases is left with the person who alone possesses information sufficient to enable him to decide them, viz., the Chief of the Department concerned; whose responsibility is diminished by placing the duty under the nominal control of another Department.

Financial control over expenditure of Stores.

It is, indeed, true that the expenditure of stores is the same as the expenditure of money, and therefore that there should be a complete Financial Control over all such expenditure; but the most efficient means of securing that Control is to be found, not by charging the Financial Department with the detailed work of examination or audit, but by associating the Financial Department with the Control Department, in the consideration of all proposals for altering the regulations by which the issue of stores is governed, and by the establishment of a system of store valuation accounts, which should be attached to the cash accounts of each financial year, when the store valuation accounts must be reviewed and accepted by the Financial Department.

Store Accounts should be examined by Control Department.

If these views be correct, there are many reasons for placing the examination of Store accounts under the Control Department. Store accounts would be kept in the Department which is responsible for the preparation of the Estimates for stores,—which must have the best means of determining questions which arise relating to the consumption of stores,—and which cannot effectually fulfil its own administrative duties without itself dealing with those accounts; for the information required for the purpose of enforcing economy in the consumption of stores can only be derived from a thorough acquaintance with Store accounts, and constant reference to Store ledgers is necessary on the part of those who have to maintain supplies of stores.

We have dwelt at some length upon this subject, because it affords an illustration of the practical application of what we conceive to be erroneous principles of administration.

Administrative knowledge should be utilized in examination of Accounts.

The arguments which we have used to support our recommendation with respect to Store accounts, apply with equal force to the examination of claims on other Services, which should be checked in the Department in which the most complete knowledge can be brought to bear upon the business, and in which the most direct responsibility can be enforced.

Examination of allowances should not be conducted by Officers of the Executive Departments.

If, indeed, the examination of the allowances of Executive Officers were conducted by Officers belonging to the Executive Departments or Services, our argument would fail to apply to such claims and charges. We are therefore of opinion that the Subdivision which should deal with travelling, lodging, and other similar allowances should be entirely distinct from the Executive Departments or Services.

The principle which we advocate with respect to the examination of claims was fully recognised in the 2nd Report of the Committee upon the Organization of the War Office of 1864, who recommended that charges should undergo a previous examination in the Department which is responsible for the expenditure.*

* Extracts from the 2nd Report of a Committee appointed to enquire into the Organization of the War Office, dated 25th November, 1864.

"In connection with this subject, we recommend a consideration of the system in force for the examination of contractors' claims. In all cases the computation of quantities and prices is made in the Accountant-General's Department; but it appears to us that professional charges should undergo a previous examination in the Department which is responsible for the expenditure. The question came under our consideration in connection with the payment of bills of contractors for works. We find that in the Admiralty a system is in force by which the quantity of work done, and the correctness of the charges for it, is certified by the Director of Works and by the Storekeeper-General on reports of the local authorities, previous to an order for payment being issued by the Accountant-General, in whose Department the computations are finally

Before concluding our observations upon the Control Department, we must express our concurrence with the opinion of His Royal Highness the Duke of Cambridge, that, while Controllers should not be put under the Military Staff of a General Officer in Command, it is essential, in the interests of the public service, that there should be the freest communication between Controllers and Officers of the Military Staff. Care should be taken, however, that the business of each is strictly confined to the duties for which they are respectively responsible; and that Military questions should not be dealt with by Controllers, or Supply questions by the Military Staff.

Free communication between Controllers and Military Staff Officers essential. Duke of Cambridge, 1294.

Sir Henry Storks has assured us, that it is a misapprehension to suppose that there is any desire to prevent Controllers from freely communicating with the Military Staff. We are satisfied that any misunderstanding which may exist is only attributable to the difficulty which is usually experienced in first starting a new system.

Storks, 1385, 1386, 1387.

III.

The Third, or Financial, Department should be under the direction of the Financial Secretary who, as we have already recommended, should be a Parliamentary Officer, and a Member of the House of Commons.

Financial Department should be under the Financial Secretary.

At one period this duty was placed in the hands of the Assistant Under Secretary of State, a Permanent Officer, an arrangement which, in our opinion, tended to diminish the importance of the Office, for the Chief of the Financial Department should occupy a position equal to that of the Chiefs of other Departments of the War Office. There are therefore objections against the revival of this arrangement under any circumstances, and especially if the Control Department is placed under the direction of a Parliamentary Officer.

We have discussed at length, in our First Report, the duties of the Financial Secretary, who, with the assistance of the Accountant-General's Department, will have to exercise Financial Control over the whole Administration of the Army on behalf of the Secretary of State. It may, however, be convenient shortly to recapitulate them here.

Duties of Financial Secretary.

First. The Financial Secretary should assist the Secretary of State in communicating with the other Departments with respect to the preparation of their Estimates, and be charged with the final financial review of those Estimates.

Second. Changes in the distribution of the sums allotted to the different Subdivisions under which the Parliamentary Votes are distributed, should receive the concurrence of the Financial Secretary, or if he differs from the Chief of a Department respecting any such change, the question should be submitted to the Secretary of State by him.

Third. All proposed changes in Establishments, or in Warrants or Regulations, affecting the expenditure of money or stores, and all questions of pay or allowances, whether in money or in kind, where a departure from regulations is proposed, should be referred to the Financial Secretary for opinion, and if he differs from the Chief of a Department his objection should be subject only to be overruled by the Secretary of State. The concurrence of the Financial Secretary should be obtained to all Circulars and Regulations; all Warrants should receive his concurrence before being submitted to the Secretary of State; and, generally, all questions requiring reference to the Treasury should be referred to him for opinion, and all letters to the Treasury should be signed by him, or by the Accountant-General, on his behalf, in his absence.

Fourth. His concurrence, subject to the Secretary of State, should be necessary for the relief of Store Accountants from disallowances. He must have ample time and opportunity for reviewing the annual accounts of the manufacturing establishments, and the annual store accounts.

We recommended in our First Report that the Departments of the Accountant-General and Chief Auditor, into which the Account Department was divided in 1865, should be re-united under one Officer.

Account and Audit Departments should be re-united.

It appears from the Report of the Committee who suggested the change, and we have the authority of Mr. Anderson and Sir Edward Lugard, who were members of that

Reasons which led to the separation.

"verified. If a similar system had prevailed in the War Office, the frauds which were perpetrated by inferior "officers in the Engineers' Department in Dublin could hardly have escaped detection. The Admiralty "system of account may not be applicable, in all its details, to the regulations under which works are carried "on under direction of the War Office; but we are of opinion that checks of the same character should be "applied.

* * * * * * *

"The principle which we suggest in the case of claims from contractors for works, would seem to be "equally applicable to the claims of other contractors."

Committee, to state, that the division was recommended more on the ground that the duties of superintending the Account Department of the War Office had become excessive in consequence of the gradual increase in the establishment, than from any considerations of administrative policy. We believe that by a readjustment of duties the business of the present Account and Audit Departments can be advantageously consolidated, and that one Officer could direct the combined Department, with Assistants who should have the charge of separate Divisions.

Examination and Correspondence should be brought together.

The arrangement of these Divisions will require careful consideration, if our recommendation for the consolidation of the Department be adopted. We will only here observe that at present the correspondence relating to claims and charges of various kinds is dealt with in Branches distinct from those which examine the claims and charges. This system was originally established before the Departments of the Accountant-General and Chief Auditor were separated, for the purpose of relieving the examining rooms from all correspondence; and a further division was made, after the Departments were separated, by placing the correspondence rooms under the Accountant-General and the examining rooms under the Chief Auditor.

Evils of present arrangements.

The effect has been to diminish responsibility, and to create much unnecessary business. Only those who have had practically to decide disputed questions of this class, can understand the amount of delay and unnecessary work, and the number of different persons who have to deal in succession with such questions. When the propriety of this arrangement was discussed by the Treasury Committee of 1860, they pointed out the objections to which it is open on principle, but hesitated to recommend a change until further experience had been obtained.* We consider that the system is wrong in principle, that it has occasioned unnecessary labour, and that it should be abandoned.

Employment of Military Clerks.

Before concluding our remarks on the Financial Department, we must observe that the Chief Auditor has informed us that he has employed with great success military clerks in some portions of the detail work of his office, and that he anticipates being able to increase their number. This, or the introduction of a class of "writers," would enable a reduction to be made in the number of clerks of a superior class, who not only receive a larger scale of remuneration on their first entry into the Service, but whose employment upon such duties requires, in order to afford them a fair prospect of promotion, a greater number of positions with a comparatively high rate of salary to be provided than is necessary for the superintendence of Subdivisions.

Permanent Under Secretary of State.

It is necessary that a Permanent Under Secretary of State should form part of the Secretary of State's Office, for the purpose of superintending the general conduct of business, and the discipline of the Office, and of acquiring such a knowledge of the whole business which is transacted, as will enable him to maintain what may be called the traditions of the Office when changes of Government take place. The final arrangement of the duties of this Officer must be deferred until the War Office and the Horse Guards are brought under one roof. So long as they are separated, it is essential

* "On considering these conflicting opinions, we are disposed to think that, so far as general considerations are "concerned, there were undoubted advantages in the union of the functions of correspondence on matters of account "and of the audit in the same Department. The correspondence must necessarily arise in many cases upon "points raised on examination, and when clerks possess equal general abilities, there can be little doubt that "the habit of accuracy, and the information derived from the examination of accounts, must facilitate the "performance of all duties connected with those accounts, whether relating to questions raised previously "to payment or after the expenditure has been incurred. In illustration of this view we may observe that, on "the separation of the two branches of business, the correspondence Departments were strengthened by "attaching to them skilled examiners. And, while this arrangement prevented any inconvenience which might "otherwise have arisen from the severance of analogous functions, it may be feared that, unless under the new "arrangement, care be taken to keep up an interchange of Officers between the two branches, the want "of proper training in the double duty may hereafter be felt. In the Admiralty the two functions have "always been united in the same Department, without leading to those delays in the examination of accounts, "which led to an alteration of the system in the War Office; and in the latter office there are still branches, "as, for example, the divisions in which the correspondence relating to, and the examination of Hospital "Accounts, and of those of Military Savings Banks, are conducted, in which it is admitted that the severance "of the two functions would lead to confusion and difficulty. The recent alteration in the War Office would, "therefore, seem to be opposed to sound principle.

"On the other hand, it is undeniable that, before the alteration was made there had been a great "accumulation of arrears in the examination of accounts; and that these arrears were disposed of in a more "economical manner by the creation of a new Department for the sole duty of examination, than they could "have been by an increase of the number of regimental divisions for the purpose. These are important consider-"ations. There can be no greater evil in the examination of accounts than the occurrence of arrear. It is unfair "upon the subaccountant and discreditable to the Department. It was desirable that the best means should "be adopted for working up the arrears which had accumulated during the Russian War, and as no practical "difficulties appear yet to have occurred in carrying on the present system, we are not disposed to recommend "any alteration of it, until at least further experience of its consequences shall have been obtained."

that the Office should be filled by a Military Officer, but when they are combined, it will probably be found more desirable that the Permanent Under Secretary should be a Civilian, whose position would be somewhat analogous to that of the Second Secretary to the Admiralty, and who might superintend the Legal Business of the Office, into which we have not had time to inquire.

IV.

General remarks.

We have, lastly, to make some general remarks with reference to the reductions which we think may be made in the present Establishments.

Scope of Inquiry.

Throughout our inquiry we have been guided solely by considerations as to the best manner in which the business of the Army can be distributed and superintended. We have not understood the question referred to us to be so much whether any and what saving could be made in existing Departments—whether an officer or a clerk could be dispensed with in this or that part of the vast establishments which have come under our review—as the far larger question, of the manner in which the whole Administration of the Army can most efficiently be conducted.

Considerable reductions feasible.

We have, however, arrived at the conclusion that a sound system of Administration would be accompanied by very considerable reductions in the present Establishments.

We can only state our opinion with respect to these reductions in general terms, because they depend upon a careful consideration of the details of the transaction of business under a new organization of Departments. Such detailed arrangements can only be made in communication with those who would have to conduct the business under the new system, and we have not considered ourselves justified in entering into such communications.

War Office.

We can however say that in the War Office, it seems to us that the offices of Assistant Under Secretary of State, Chief Auditor, and Deputy Director-General of Ordnance might at once be abolished, and that a reduction may be made in the number of clerks employed in the Central Office. The amalgamation of the Departments of the Accountant-General and Chief Auditor would make a large reduction possible in the number of clerks now employed in those Departments.

Unnecessary minuting of papers in the War Office. P. 16.

We think it necessary to observe here that we have been particularly impressed with the great amount of work which is still created in the War Office by the unnecessary minuting of papers, notwithstanding the decided opinion expressed by the Military Organization Committee, and the many condemnations which that system has received from competent authorities.

Remedy pointed out.

The only real remedy is to change, as far as possible, the principle upon which business is conducted in the War Office. Questions should be dealt with immediately by Heads of Departments, Divisions, or Subdivisions, and only referred to their Subordinates when former papers have to be consulted, or a précis is required. These observations may seem to be trivial, but we are satisfied that the mode of transacting business might be substantially improved by such a change. Many of the references between different Branches which are now made upon minute papers will become unnecessary when a better distribution of the business of the Office has been adopted.

Horse Guards.

In the Horse Guards, if our recommendations are adopted, the appointment of Quartermaster-General would ultimately be abolished, the Establishments of the Military Secretary, of the Quartermaster-General, and of the Deputy Adjutants-General of Royal Artillery and Royal Engineers would be considerably reduced; and some further reductions might be made, when business comprised under the Military Department is re-arranged.

Conclusion.

Many discussions have taken place upon the organization of the War Office since the time when the Departments of the Ordnance, Secretary at War, Commissariat, Home Office, and Colonial Office were, so far as they dealt with military matters, amalgamated under a Secretary of State for War. Persons who are conversant with those discussions will confirm us when we say that in a great part of our proposals we have only given a fuller and more complete development to principles which were laid down by Lord Herbert in 1860, and which have been also asserted by other high authorities upon Army Administration. We wish, particularly, to point out that those of our recommendations which relate to the responsibility which should be placed upon the Chiefs of Departments, have long ago been made, almost in the same language which we have used, by the Treasury Committees, which have reported

upon the constitution of the War Office.* It is a satisfaction to us to know that we can claim the support of such high authorities; and we feel confident that, in framing the scheme for the organization of the War Office, which we have now the honour to propose for Mr. Cardwell's consideration, we have been guided by the only principles which can bring into complete harmony, and within reasonable dimensions, the various Departments which are now concerned with the Administration of the Army.

NORTHBROOK.

J. STANSFELD.

EDWARD LUGARD.

W. G. ANDERSON.

12*th February*, 1870

* Extract from a Report of a Treasury Committee appointed to enquire into the Account Branch of the War Office, dated 8th April, 1859.

"A large public Department like the War Office can only be maintained in efficient working order by fixing "upon every subordinate Branch clearly-defined duties and a distinct responsibility. If defects arise in any of "the duties, the remedy should be applied in the Branch itself; all attempts to correct such defects by "removing duties and responsibility from the Branches upon which they should properly rest, or by creating "new duties in one branch to supply information or checks which ought to exist in a perfect state in another, "must ultimately lead to the disorganization of the Department."

Extracts from a Report of a Treasury Committee appointed to enquire into the Account Branch of the War Office, dated 25th June, 1860.

"It appears to us that each Department which is charged with the administration of a particular vote of "Parliament ought to be held responsible for its due application, and should be able to furnish from its own "books every information that can be required regarding the progress of the expenditure entrusted to it. The "attempt to supply any want of system by independent checks must tend to weaken that sense of subordinate "responsibility, by the maintenance of which a vast Department like the War Office can alone be maintained "in order and efficiency.

* * * * * *

"In an extensive Department like the War Office, the work requires the combination of many hands, and can "only be harmoniously and efficiently carried on by a due observance of the important principle of subordinate "responsibility. Every Head of a Department is entitled to confidence in the control of the business entrusted to "him, and any proceedings which tend to weaken his authority must not only interfere with the proper discipline "of the Department, but in fact relieve him from that responsibility which he owes to his own superiors in "office.

APPENDIX No. I.

Analysis of Evidence belonging to the Second Report.

Wednesday, 17th March, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

Major-Gen. the Right Hon. Sir HENRY KNIGHT STORKS, G.C.B., G.C.M.G., Controller-in-Chief, examined.

Maj.-Gen. Sir H. K. Storks, G.C.B., G.C.M.G.

17 Mar. 1869.

On the question of the custody and issue of Artillery stores, he was strongly of opinion that all stores,—Ordnance as well as General Military,—should be consigned to, and be in the custody of, one Department, both in time of peace and war.

That the Controller should be the officer responsible to the General Officer in Command for proper supplies of ammunition; but that Commanding Officers of Artillery should not only have the fullest opportunities given them of frequently inspecting the state of the stores in charge of the Control Department, but that they should be specially ordered to do it.

That with such an inspection, there would be no necessity for any separation of Ordnance from General stores in the Field up to the "Field Arsenal," at which point the Artillery would take in charge the 1st and 2nd Field Reserves.

On the question of the necessity for any professional examination of Artillery demands by the Director-General of Ordnance, or Deputy Adjutant-General of Royal Artillery, before they were passed to the Control Department, he thought that there was no necessity for it. Proportions should be carefully fixed, and the stores should then be supplied by the Control Department periodically, within the limits so fixed.

Major-General J. H. LEFROY, R.A., F.R.S., Director-General of Ordnance, examined

Maj.-Gen. J. H. Lefroy, R.A., F.R.S.

17 Mar. 1869.

He had a strong opinion that Ordnance Stores should be separated from other Military stores, and placed in Artillery charge—*i.e.*, under a staff of Commissaries of Ordnance, under the command of Artillery officers. *ab initio.* That separate store accommodation should be provided for them, and, above all, that the Artillery should have its own transport. The duties of the Controller in the field would, he thought, be so multifarious that the paramount importance of Ordnance stores and Transport would be in danger of being lost sight of. Did not think that unity in Transport arrangements was necessarily an advantage.

The Officer Commanding the Artillery should be the adviser of the General Officer, and should control the Commissaries of Ordnance and the Ordnance Transport.

There might be great danger in any delay caused by a conflict of opinion between the Officer Commanding the Artillery and the Controller, and even the prompt decision of the General Officer on the spot would not be a sufficient remedy in many instances. The Officer Commanding the Artillery should be all-powerful to order up to the front whatever Ordnance stores he might think necessary, without check or question.

Admitted that it might be possible to place Ordnance stores under the charge of Commissaries of the Control Department, and would not so much object to such an arrangement, if those officers could be placed under the orders of Commanding Officers of Artillery.

Would not be satisfied with the mere inspection of Ordnance Stores by Artillery officers.

Recognised the difficulty of drawing a line between Ordnance and other Military stores, but would not object to stores used by Artillery, in common with other arms of the Service, being kept by the Control Department.

In favour of "Boards of Respective Officers" as a peace organization.

On the question of the Control of the Manufacturing Departments, did not agree that they should be taken away from the Director-General of Ordnance.

On the question of his position in the War Office, thought that questions relating to experiments and patterns should not be referred to the Controller-in-Chief for opinion, but that the Director-General of Ordnance should collect all the necessary information from the Store,—*i.e.*, financial,—point of view, before submitting any proposition for the Secretary of State's sanction; and that for this purpose he should be empowered to call upon the departments at Woolwich,

Maj.-Gen. J. H. Lefroy, R.A., F.R.S.

17 Mar. 1869.

—Supply and Manufacturing,—for any information he might require.

Admitted that this would hardly apply in great questions,—such as a new rifle for the Service.

The Director-General of Ordnance, he urged, was a high administrative officer, and ought to be the financial as well as the professional adviser of the Secretary of State on all such questions; if not, efficiency would generally yield to economy.

As to Artillery demands, thought that all the duties of the Deputy Adjutant-General, Royal Artillery, relating to armaments of works, should be transferred to the Director-General of Ordnance, who should be the Secretary of State's adviser on all such matters. At present he is, in theory, in that position; but although he receives the voluminous and elaborate returns from every Artillery district through the Horse Guards, he is without the staff necessary to examine them. His examination of Artillery demands is simply formal, and the decision on questions of armaments and proportions of ammunition is entirely with the Field-Marshal Commanding in-Chief, on the advice of the Deputy Adjutant-General Royal Artillery.

Thought that, wherever there was a fixed proportion laid down, Artillery demands might go direct to the Supply Branch without professional examination; but then they should not be questioned by the Controller-in-Chief, if within the fixed proportion.

Monday, 22nd March, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

Captain HENRY WILLIAM GORDON, C.B., Principal Superintendent of Stores, Woolwich, examined.

Capt. H. W. Gordon, C.B.

22 Mar. 1869.

Had modified his opinion since he gave evidence before Lord Strathnairn's Committee, and now thought that forage, food, fuel and light should be kept entirely separate from Ordnance and General Military stores.

The severance should be complete as far as custody and storage were concerned, but both should be directed by one Controller.

In the field and abroad these stores should be consigned to two distinct departments, but there should be only one Transport Train for both, under the Controller. Ordnance stores should on no account be separated from General Military stores. In fact it was practically impossible to divide them without two distinct departments keeping up reserves of the same articles.

Would allow Artillery officers to enter the General Store Department, and would put them in charge of the branch that pertains to munitions of war; but they should be available for barrack and hospital duties, if required. They should leave the regiment, and look for reward in the Civil Department.

Ordnance and Military stores should be divided into a certain number of sections or lines, and Commissaries told off for each; but one department only should be responsible for all sections being kept in an efficient state, and for their transport to the front in the field, either simultaneously or according to their relative importance.

Ordnance stores should be inspected by the Commanding Officer of Artillery at the station. Would not abolish Inspectors of Warlike Stores, but they should have no separate office or department, and should be officers under the Officer Commanding the Artillery; and that officer, as a member of the Board of Respective Officers, should be responsible for the proper condition of the stores.

Stated that the "Regulations for Ordnance Commissaries in the Field," of 1833, lay down very clearly what ought to be the course of proceeding in the supply of stores to an army in the field; and that if they had been acted on in the Crimean expedition, all the confusion which prevailed there would have been avoided.

Was strongly in favour of Boards of Respective Officers, *i.e.*, the Controller, Commanding Royal Engineer, and Officer Commanding the Royal Artillery, both in garrison and in the field. Did not think it impracticable in the field, nor was it thought so by eminent Artillery officers, such as Sir Alexander Dickson, Sir John May, Sir James Kempt, and others who compiled the Regulations of 1833.

Thought it was a most valuable machinery for obtaining, without friction, all the local information obtainable on any subject, and for deciding all questions of efficiency of reserves, necessity for fresh supplies, and disposal of obsolete or surplus stores. Practical opinion of the Officer Commanding the Royal Artillery was absolutely necessary on questions of reserves of ammunition and new armaments.

Controller would be the really responsible officer on the Board, though nominally not more powerful than the other members. They would be in reality advisers only. The Board would be strictly subordinate to the General Officer Commanding.

All Artillery demands should be checked locally by the Board, and passed to the Supply Branch without the intervention of the Deputy Adjutant-General, Royal Artillery.

There should be a similar organization at the Royal Arsenal, Woolwich, the heads of the manufacturing departments and himself forming the Board, and to it should be referred all questions arising out of demands from foreign stations.

Thought that all experimental questions should be referred to the Controller-in-Chief, who should furnish statistics of their ultimate cost, if likely to supersede any existing pattern. Many expensive experiments now made are perfectly useless, even if successful, owing to the want of such an opinion. Did not think it would be sufficient if the Director-General of Ordnance obtained such information from him previous to obtaining authority for carrying out experiments.

Thought that the Military (*i.e.*, the Commander-in-Chief's) Department was the proper one to initiate experiments, and that they should only be undertaken to meet some acknowledged want, or to remedy some defective pattern, except in the case of important questions.

The large expenditure in experimental services had been greatly owing to this system of constant experiment and change of pattern, and would never have taken place if they had been under Civil control.

The Crimean expedition was fitted out on the principle recommended by Lord Strathnairn's Committee for dealing with Ordnance stores, but there the evil results were intensified owing to the number of distinct departments. The principle having been found wanting, the various departments were concentrate

in the Crimea and at the War Office, under Mr. Godley as Director of Stores; but subsequently the Barrack, Clothing, and Purveyor's Departments had been taken away, and in consequence, when the expedition to Canada was fitted out at the time of the "Trent" affair, the confusion was lamentable. He instanced one case in which 224 telegrams were received or sent by him about the loading of one ship, which had afterwards to be re-loaded at Cork, and finally never went further than Halifax.

This had been remedied by the concentration of departments under the Controller-in-Chief, and the economy which had resulted was shown by the great reductions which had taken place in this year's estimates,—reductions which in no way impaired efficiency. When the present scheme was matured, an expedition could be fitted out without risk of failure.

Capt. H. W. Gordon, C.B.
22 Mar. 1869.

Great economy might still be made by a more general assimilation of patterns of the same article where used by differed departments, enabling him to be content with smaller reserves; also by a more extended system of local purchases at distant stations for articles of furniture, &c., which the country could supply, though not of the service pattern, which he thought need not be rigidly insisted upon.

Wednesday, 24th March, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

Sir W. TYRONE POWER, K.C.B., Commissary-General-in-Chief, examined.

Sir W. T. Power, K.C.B.
24 Mar. 1869.

On the question of separating Ordnance from other stores, as recommended by Lord Strathnairn's Committee, wished it to be understood that the Ordnance Commissaries should be Administrative Officers under the Controller of Ordnance in the War Office, responsible to the Secretary of State, and not in any way under the control of officers of Artillery. They would probably be chosen from officers and non-commissioned officers of Artillery, but they would have to resign their positions in the Army.

Would divide Ordnance stores,—*i.e.*, all guns and carriages, with the equipments of those ready for issue, according to a regulated proportion; arms of all kind, shot shell, ammunition, and combustible stores generally,—from all other stores.

Thought that one officer could never be thoroughly conversant with, or responsible for, duties of both Supply and Ordnance Departments. He would lack the technical knowlege necessary to enable him to control Ordnance stores, or to hold his own in discussing with the Officer Commanding Royal Artillery and the General Officer Commanding, questions relative to demands and other technical and professional questions. The supply of food was of vital importance to an army in the field; and the Controller's whole energies should be devoted to providing and bringing up such supplies to the front.

Did not think it would be advisable to separate food, forage, and fuel from general stores. Had experienced the great inconvenience in the field, as a Commissariat officer, of being separated from the Store Department. The Commissariat Department depends in many ways upon the Store Department for its reserves of all unconsumable stores.

It might be expedient to have unity of control, under a Controller-in-Chief, in the War Office. In the field, or in garrison, that unity would be obtained under the General Officer Commanding. Both branches must, however, be kept quite distinct, and Commissaries of Supply and Commissaries of Ordnance should not be interchangeable, as the latter would require a special technical training. The Control Department, however, might be recruited from both branches.

Would separate Ordnance stores from others in reserve depôts at home. Did not think such a separation would lead to difficulties in shipping. Guns, arms, or combustible stores, are actually stored and shipped separately from the miscellaneous stores,—from different stores and magazines, from different wharves, and, as a general rule, in different vessels.

Thought, as a matter of expediency, it might be possible to keep only one depôt for both stores, as long as a man like Captain Gordon, conversant with both, remained at the head of it; but thought it was not a satisfactory organization.

All stores, both Ordnance and General, should be consigned to one officer, in the field or in garrison,—*i.e.*, the Controller,—and he should also control the whole of the transport; but otherwise he should have no control over the Commissaries of Ordnance. He should keep the reserves of all stores except Ordnance stores required for equipment at the grand depôt, but transfer them on indent to the Ordnance Commissary, who would be responsible that sufficient reserves were demanded from the Ordnance depôts at home.

The Ordnance Commissary would be always in communication with the Officer Commanding Royal Artillery, to whom the General Officer in Command would look for the maintenance of the stores in a proper state of efficiency, but not for the charge or accountability, which would be with the Ordnance Commissary.

Would establish in every garrison a Board, consisting of the Controller, the Ordnance Commissary, and the Officer Commanding Royal Artillery, by which all local questions connected with Ordnance stores should be discussed and all demands revised, additional establishments recommended.

Inspectors of Warlike Stores should be abolished, and all inspections by Artillery officers of Ordnance stores, should be discontinued, except such as the Officer Commanding Royal Artillery would carry out as a member of the Board.

Admitted that there was more danger of antagonism between the two sets of Commissaries under different commands, than if they were under one administrative head; but did not anticipate any probability of such a contingency, as the proposed Board would regulate such matters, and there would be very few points upon which thay could come into collision.

The main point he insisted upon was the importance of a separate organization of Ordnance Commissaries; and whether they were under the Local Controller, or responsible, through the General Officer Commanding, only to the Controller of Ordnance at the War Office, was a question of secondary importance,—provided the requisite technical and professional knowledge was insisted upon for the Ordnance Commissaries, and that the charge and maintenance of Ordnance stores were given exclusively to them as the agents of the Secretary of State for War, allowing to the Officer Commanding Artillery the voice his professional position and respon-

Sir W. T. Power, K.C.B.

24 Mar. 1869.

sibility entitle him to in the preparation of demands and proportions of stores, and in the quantities to be maintained at the several depôts in the field, according to the nature of the operations.

Thought it absolutely necessary that the Controlle should have complate control over all transort. The demands of an Army for transport are insatiable, and use up all the transport means a country can supply; and it must be left to one department, subject to the control of the General Officer Commanding, to allot transport according to the relative importance of the services to be provided for.

Did not think any difficulty would ever arise in arranging for the transport of Ordnance stores, as the Artillery has its own transport for its 1st and 2nd Reserves, and there are to be Regimental Reserves of small-arm ammunition with each regiment, so that there is not the same absolute and primary necessity for the transport of such stores as for the food of an army. The quantities of Ordnance stores for immediate use and for indispensable reserves being thus with the troops and Artillery, and the depôts in the rear being maintained in fixed proportions.

Thought that the experimental business of the Director-General of Ordnance should be transferred to the Horse Guards, and any proposition for experiments should come to the War Office recommended by the Commander-in-Chief, and be there reported upon financially by the Controller of Ordnance, for the decision of the Secretary of State. There should for that purpose be a head of an experimental executive branch under the Commander-in-Chief.

Said the name of "Control" had been adopted, in preference to "Intendance" as too French, and to Commissariat as representing only a branch of the business of Control. In the scarcity of short, logical, descriptive titles in the English language, could not suggest a better title than the one adopted by the Committee for that branch of the Service, which would control Transport and Supply, and all demands for both.

Colonel T. W. Milward, C.B., R.A., Deputy Director-General of Ordnance, examined.

Col. T. W. Milward, C.B., R.A.

24 Mar. 1869.

Still held the opinions he expressed before Lord Strathnairn's Committee, but thought it was necessary and desirable to separate purely warlike stores—*i.e.*, Ordnance stores—from other stores.

Ammunition is of such vital importance in the field that there must be no danger of a preference being given to other stores in forwarding supplies to an army in the field, which might be the case if all stores were concentrated under one department. Troops could temporarily do without food and camp equipage, but not without ammunition.

Thought the division of stores for an army should be munitions of war—all other stores—both in peace and war.

The division should begin in the War Office, the Heads of the two departments reporting to one high official, an Under Secretary of State. The home reserve should be distinct, under the Head of the Ordnance Department. The sea transport should be distinct, and the stores should be consigned to different officers. The department should be a Civilian one, under Commissaries of Ordnance, up to the point of the base of operations—*i.e.*, the Grand Depôt—but the direction of the department should then be placed under Artillery officers, responsible to the Officer Commanding the Artillery. Transport of the Artillery Train should be also under the immediate direction of the Artillery. The Controller should arrange for the whole transport of the army, and be indented upon by the Artillery for its wants; and any dispute as to transport between the Controller and the Officer Commanding Royal Artillery should be settled by the Chief of the Staff. Did not think Ordnance stores should be consigned to the Controller in the field, and forwarded by him up to the Field Arsenal. The importance of the supply, and the technical knowledge required at the Grand Depôt to interpret and supplement hurried demands from the front, forbade such a concentration. Responsibility for failures under such a system would be too divided.

Saw no difficulty in dividing munitions of war from other stores. Did not think it necessary that the Ordnance Commissaries should have all stores used by Artillery in their charge. They might indent on the Supply Department for any stores which the Artillery used in common with other branches of the Service; and the rule should be that such stores should be kept by that department which had the largest demands for them. No duplicate reserves should be kept up, and each department should indent upon the other for what it required.

In peace, dual establishments would not be necessary. Commissaries of Ordnance might be placed under Controllers; and at small stations, where it was necessary to use common storehouses, one officer might do the duty of both departments, keeping separate account of his transactions for each department.

The Ordnance Department should be, to some extent, under the Artillery in time of peace, by reviving the Board of Respective Officers—*i.e.*, the Controller, the Chief Ordnance Commissary, the Commanding Royal Engineer, and the Officer Commanding Royal Artillery,—through whom all demands for Ordnance stores should pass: also by a system of inspection by Inspectors of Warlike Stores, who should be officers directly under the Officers Commanding the Artillery, and under whose superintendence would be conducted, in the Commissaries Department, the repair, &c., of Ordnance stores.

The system of Boards of Respective Officers should be carried through every stage of Supply, beginning even in the War Office, and ending in the field at the Grand Depôt.

Commissaries of Ordnance should be eligible for promotion to Controllers. Artillery Officers should only be Acting Controllers of Ordnance Stores, and that generally in the field.

If it was decided to divide Commissariat, Fuel, Light, &c., from other stores, would keep general stores under Ordnance Commissaries, but would much prefer their being separated from Ordnance stores.

In Abyssinia, stores were consigned to two departments with great advantage.

Memo.

I have read over this short *résumé* of my evidence, and agree with it generally. I would modify that part of it which refers to consignments of warlike stores. What I would rather convey would be, that all stores might be consigned to the Controller, and divided at the base of operations.

T. W. Milward.
25/3/69.

Wednesday, 31st March, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.
The Right Hon. J. STANSFELD, M.P.
Lieutenant-General Sir E. LUGARD, G.C.B.
W. C. ANDERSON, Esq.

Major-General G. BALFOUR, C.B., examined.

Maj.-Gen. G. Balfour, C.B.
31 Mar. 1869.

Was entirely opposed to the separation of munitions of war from other stores, as proposed by Lord Strathnairn's Committee, which he thought would only cause unnecessary expense in double storage and establishments.

Thought that such a division was quite impracticable. All stores would of course be classified into convenient divisions according to the store accommodation available, and the magnitude of the charge. At Woolwich, for instance, stores were classified under eighteen different heads. Classification was essential to proper storekeeping, but unity of control was just as essential.

Thought the present Regulations for the inspection of munitions of war at foreign stations nearly perfect, and that they should be extended to home stations; but that the Officer Commanding the Artillery should be the officer responsible for the inspection, the Inspector of Warlike Stores being his assistant.

Thought that the Commissaries of Stores should keep all Artillery reserves, giving to Artillery officers full liberty to inspect whenever they desired. The Artillery should keep as few stores as possible in their own magazines.

Would divide the Commissaries under the Control Department into two divisions: one for food, forage, fuel and light, transport and clothing; and the other for munitions of war, entrenching tools, harness, camp equipment, barrack and hospital stores.

Both divisions should be under one local control, and under the Controller-in-Chief in the War Office.

Considered that it was not necessary that a Controller should have a personal knowledge of all the details of the department under his control. His general knowledge would be supplemented by departmental officers possessing special qualifications. Thought that one of the great recommendations of the Control scheme was its elasticity in this respect, both in the War Office and in the field.

Liked the Indian system of employing Artillery officers as Commissaries of Ordnance, but thought that the present Store officers who had passed through a course of instruction in the Arsenal were quite as competent as Artillery officers to be in charge of combustible stores.

Would encourage non-commissioned officers of Artillery to enter the new department as warrant officers to act as Storeholders under Commissaries of Ordnance.

On the question of supply, and custody and transport of stores for an army in the field, thought that all stores should be consigned to one officer at the base of operations, and classified on arrival. Did not think it would be desirable to place the Third Reserve of Artillery stores in the hands of Artillery officers. When stores were once issued to a combatant branch of the Service, no accountability was possible; and there was no reason on the score of efficiency why the public interests should not be protected as long as possible before the uncontrolled consumption of Artillery stores commenced. The Field Arsenal was the point at which the Artillery control over their stores should begin.

The Field Arsenal should be the last depôt in the hands of the Control Department, and that department would be responsible for demanding, supplying, and maintaining proper reserves in the various depôts on the line of communication with the army.

All transport must be in the hands of one department, which should be held responsible for bringing up the necessary supplies of all sorts according to their relative importance. The transport for the First and Second Artillery Reserves should be permanently allotted to, and under the control of the Artillery, but the reserves of small-arm ammunition should be held by the Commissaries of Ordnance, and supplied to the troops without the intervention of the Artillery.

On the question of the relations between the combatant branch and the supply branch under the control of the Secretary of State for War, thought that the Director-General of Ordnance should not be a Secretary of State's officer. The combatant branch (*i. e.*, the Commander-in-Chief) should bring forward all proposals for new armaments and experiments, and the Secretary of State should then consider them in their financial aspect.

The powers of the Deputy Adjutant-General, Royal Artillery, should be limited to the personnel or discipline of the regiment of Artillery; and an officer, who should combine the duties of Director-General of Ordnance and Inspector-General of Artillery, should advise on questions of armaments and conduct experiments.

Captain HOZIER, examined.

Capt. Hozier.
31 Mar. 1869.

Opposed the division of stores suggested by Lord Strathnairn's Committee. He thought there should be but *one* department responsible for Supply, Custody, and Transport, up to the point where supplies would be handed over for the use of the Combatant branches of the Service. That point would be the Field Arsenal. This one department he would divide into two main sections:—

1. Food, Forage, &c., and General Stores.
2. Munitions of War, including Combustible Stores; and Transport.

One Controller should be over both these sections, but each should be directly controlled by an Assistant Controller. The division into sections was not based on any particular principle, unless that the second section was more military than the other.

Held it absolutely necessary that the department controlling the supplies should also control the transport, so that one department alone might be responsible for bringing up all supplies in an order according to their relative importance.

Thought that there should be in the War Office two high officers, responsible to the Secretary of State,—the one for the *personnel* of the Army, the other for its *matériel*. That the superior officers of the Control Department should be drawn from the Army, being seconded in their regiments, and holding their appointments as Staff appointments. Maintained that there was no real foundation for the jealousy of a Military Control, which existed in many minds.

Admitted that it might be a disadvantage of such a system, that under it an officer could not look for any promotion in the ranks of the Control Department. But this was equally the case of Army Staff appoint-

Capt. Hozier.
31 Mar. 1869.

ments in respect of which no evil result had been found to arise.

Would fill the appointments of Commissaries by drafting into them deserving and qualified non-commissioned officers from all branches of the Service, who should be liable to be sent back to their regiments in case of their misconduct or incompetence. Thought that such a system would have a most beneficial effect in the Army, and would create such an inducement to entering the Army, that there would not be so much need to offer bounties for enlistment; and that if the Army was the stepping-stone to the same Government offices, as in France, in time bounties might be dispensed with.

Did not think civilians competent to take charge of combustible stores. These should be entirely under the charge of non-commissioned officers of Artillery.

Insisted very strongly on the advantage of having every one employed in the field a trained soldier, liable to carry arms. Transport drivers, especially, must be armed. Every mouth fed in the field should be that of a man ready to fight if required, but not necessarily liable to ordinary military duty.

Expressed a strong opinion that this country was quite unprepared to enter upon a war, owing to the absence of any Regulations laying down clearly what should be done on an army taking the field. He held that every officer commanding a regiment was entitled to Regulations showing him the amount of his proper equipment, and how and from whom it should be drawn. This would enable such officer to march to any given point, with his regiment thoroughly equipped, at 24 hours' notice.

Had seen the present Regulations (which had never been promulgated officially), but did not think them good, or even feasible. The proportions laid down were so large that no transport could be established which would suffice to carry the stores. Thought that Regulations might easily be drawn up to show what should be the course of action for all branches of the Service in the various circumstances under which an English army might probably be called upon to take the field, as—

1. An expedition against an uncivilized nation.
2. An expedition against a Continental Power.
3. For the defence of the country against invaders.

Described the Prussian organization as to division of warlike stores. Powder, shot, shell, fuzes, &c., are there consigned to the Artillery, which has its own transport and depôts.

Was of opinion that the circumstances attending the supply of the army of a Continental Power must differ widely from ours. On the Continent the base of operations could be reached without sea transport, which made the whole difference. Where there is sea transport there must be only one consignee at the base of operations. This rule is essential to preventing confusion. Yet though Prussia had not this sea-transport difficulty, the Prussian arrangements were not satisfactory. The transport being divided, each of its divisions strove for priority of means of transport and storage. Such, he thought, must always be the result when the transport was not under the control of one department.

Thought that all regimental transport should be under the immediate charge of regiments, though liable at any moment to be withdrawn for other purposes by the Controller. Animals attached for lengthened periods to regiments are always better looked after than if only attached for a single march. As the regiments whose transport was least efficient would probably be left to garrison depôts, every regiment would strive to keep its transport as perfect as possible, in order to be taken to the front.

In Abyssinia, stores were shipped by and consigned to different departments; and the result was great confusion at the base of operations. As far as Senafé, the transport of supplies was under the control of one department; but from that point a detachment of the Land Transport Train was placed under an Artillery officer to take up ammunition.

Saturday, 10th April, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.
The Right Hon. J. STANSFELD, M.P.
Lieutenant-General Sir E. LUGARD, G.C.B.
W. C. ANDERSON, Esq.

General the Right Hon. Lord STRATHNAIRN, G.C.B., G.C.S.I., examined.

[The analysis of Lord Strathnairn's evidence, sent to his Lordship for correction, has not been returned.]

Major TREVENEN J. HOLLAND, C.B., examined.

Major T. J. Holland, C.B.
10 Apr. 1869.

Is Assistant Quartermaster-General of the Bombay Army. Superintended the embarkation at Bombay of the Force for Abyssinia. Was President of the Board of Survey on ships tendered as transports. Was responsible for the ventilation of all transports; also for accommodation, fittings, &c., for troops, followers, horses, and cattle; and for stowage room for regimental baggage. Vacant accommodation in transports was allotted, as required, to the different departments —Commissariat, Medical, Engineer, Ordnance, Marine, and Land Transport—all of which shipped their own stores; but he had no control over the cargoes generally.

On the arrival of the ships in Abyssinia, each consignee had to get the stores which were consigned to him as best he could, and in the struggle for priority which ensued, and absence of all knowledge as to whereabouts in a ship particular stores were stowed, the confusion was very great indeed.

Was also Assistant Quartermaster-General of a Division in the Persian campaign of 1856–7, and there noticed a like confusion from the same cause.

Had, moreover, served as Assistant Quartermaster-General with Forces operating in India—(with Sir Hugh Rose's force in Central India, and Sir John Michel's force in Malwa, during the mutinies of 1857-8). Observed there the inconvenience of separating the Land Transport from the Supply Departments. It is often found that Transport drivers will not take orders except from the officers of their own department, and any useful co-operation or unity of action is almost impossible in consequence. The Com-

missariat Department in India furnishes all the Transport to the different departments, but does not control it when in departmental charge.

The only remedy for such a state of things would be to put the whole of the stores required by an army into the hands of one department, which should be responsible for their proper shipment, receipt, and custody. The officer in charge of this department should be to the stores just what the Quartermaster-General is to the troops,—*i.e.*, he should arrange for their disembarkation in the order required, and allot them store accommodation according to their relative importance.

This department should have under its charge all stores including munitions of war; but the administrative officer controlling the department should have executive professional assistants, drawn principally from the Artillery and Commissariat, with subordinate establishments, composed of warrant and non-commissioned officers, and enlisted men, who, being armed and drilled, could, on field service protect themselves and the stores under their care. Stores in charge of the Artillery should be limited to those in the 1st and 2nd Reserves.

The officer in charge of this department should also control, under the orders of the Commander-in-Chief, all the transport of the Army. Great waste is caused by departments indenting separately for transport, each magnifying the importance of its own stores; and the consequence is, as actually happened in Abyssinia, that many stores are sent to the front which are useless when they arrive, and only serve to encumber the march. This he had full opportunity of remarking, as he was in charge of the Quartermaster-General's Department, at Army Head Quarters, during the whole campaign in Abyssinia, and had the general control, under Lord Napier's orders, of the Land Transport Train, on the highlands of that country. *Major T. J. Hol*

10 A

In the case of a campagn in a country to which the Army has to be conveyed by sea, would detail the senior officer of the Control Department to be with the Commander-in-Chief of the Force, another officer of the department at the port of embarkation, and another at the port of debarkation. Under this arrangement believes that confusion would cease,—stores would be shipped in the order required, proper invoices sent, showing where, in each ship, all stores are to be found; and under the orders of the Commander-in-Chief of the Force, the Controller at Army Head-Quarters, with all the transport at his disposal, would order up stores to the front only in the order required.

Subordinate officers of the Control Department would, on the line of march, be *ex officio* Baggage Masters

---

Tuesday, 13th April, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

His Royal Highness the FIELD-MARSHAL COMMANDING-IN-CHIEF, examined.

H. R. H. the F.-M. Com.-in-Chief.

13 Apr. 1869.

Thought that that portion of the Transport Committee's Report which dealt with the question of Ordnance Stores, and their relation to the Control Department, was not complete.

Agreed with the line of separation drawn by the Committee between munitions of war and other stores, and with the proposal to place the former under the charge of a department of specially-trained professional officers, but thought that both sections of stores should be under the Controller-in-Chief.

Thought that there should be a Controller-in-Chief in the War Office, assisted by two officers: one charged with the administration of munitions of war, and the other with that of the food, forage, fuel, light, general miscellaneous stores, and transport.

A similar organization should prevail in garrison and in the field, under the General Officer Commanding, who whilst commanding the army is also the representative of the Secretary of State. He should have a Chief of the Staff for the personnel and military arrangements of the Army, and a Controller, under whom should be the two executive branches in charge of the supplies, transport, and munitions of war of the Army. The unity of administration beginning in the War Office and ending in the field would thus be preserved throughout.

Was strongly of opinion that it was not only advisable, but quite necessary, to organize a special and professional branch for the charge of munitions of war. It should be composed mainly of non-commissioned officers of Artillery, controlled and directed by combatant Artillery officers, who should be selected from the Advanced Class, and seconded in the regiment, but not in any other way divested of their military character. It would be the greatest advantage, both to the department and to the regiment, to keep up this interchange of officers between them. Civilian storekeepers were not sufficiently alive to the relative value of munitions of war; and in time of war, and equally in time of peace—which in this particular, above all others, must be a state of preparation for war—the whole safety and efficiency of the Army depended on the professional competency of the department in charge of them.

The great desideratum was that the department in charge of munitions of war should have all stores required by the Artillery in their keeping; but having secured that, there could be no difficulty whatever in, or objection to, the same department taking charge of other military stores which the Artillery used in common with other branches of the Service.

The Control Department should make all shipments, and its representative in the field or garrison should be the sole consignee for all stores; but in a campaign an officer or agent of the Ordnance Sub-department should accompany the ship, and look after the safe and proper stowage and unloading of the munitions of war. It should also, through the agency of its sub-department, have charge of all stores in depôts in the field, including the Field Arsenal, at which point they should be issued to the combatant branch for service.

On the question of the position and functions of the Director-General of Ordnance, and his relation, and that of the Controller-in-Chief, to the Manufacturing Departments, His Royal Highness considered that the Director-General of Ordnance should be the scientific Head of a Board composed of the Heads of the Manufacturing Departments, which should consider, from a strictly scientific point of view, all questions of improvements in manufacture, and any requiring the united action of the different departments. This scientific opinion should be limited to advice only, and

H. R. H. the F.-M. Com.-in-Chief.

13 Apr. 1869.

should be unbiassed by any financial considerations whatever. These should be supplied by the officer responsible for the administration of Army supplies,—the Controller-in-Chief. The unity of control over all expenditure on supplies would thus be maintained. The Director-General of Ordnance should not in any way interfere in the financial administration of the departments, nor relieve their Heads of any of the responsibility attaching to them, or in the details of the manufactures carried on in them; neither should he have power to order the trial of any experiments, but only to make recommendations to the Secretary of State. His function should in fact be very much that of scientific inspection of the articles manufactured, and scientific adviser of the Secretary of State in questions of manufacture, inventions, and patterns.

The Heads of the Manufacturing Departments should be subordinate to the Controller-in-Chief, as regards finance and administration, but their responsibility for details and efficiency of manufacture should not be interfered with in the smallest degree. The scientific control must be exercised by an Artillery officer of great experience who ought to be thoroughly conversant with all questions of manufacture. Admitted that there would be great difficulty in so defining his functions as not to interfere with the responsibility of the Heads of Departments, but thought it might be done.

Was strongly of opinion that Heads of Departments should not be allowed to compete with the public as inventors. Improvements in details of manufacture they should of course carry out, but they should be precluded from becoming inventors, or reporting upon the inventions of others.

Thought that the Heads of Departments should hold their appointments for five, or perhaps seven, years, with a power of re-appointment by the Secretary of State for a second term of service. It was a great advantage and encouragement to combatant officers of the Artillery to be able to look forward to and qualify themselves for these appointments; and it was an equal benefit to the regiment of Artillery to receive back officers who had obtained practical experience in manufacture, and who had not been too long withdrawn from combatant duties. It was essential that officers holding these appointments should be kept conversant with current military opinions and wants, and not be too long severed from their corps; but, on the other hand, their value as combatant officers would be much enhanced by their knowledge being extended beyond the mere military routine of drill and field evolutions.

Thought that the Director-General of Ordnance, being the Head of these departments, and also the Secretary of State's scientific adviser on all questions of inventions and new patterns, must be an officer of the Secretary of State; but admitted that the scientific opinion he would give in such matters would in fact be the military opinion, and that it would almost seem to follow that he might be considered more an officer of the Commander-in-Chief than of the Secretary of State. It was a matter more of convenience than of principle, and the difficulty he foresaw in detaching him from the Secretary of State was in dealing with inventions submitted by the public. If he remained a Secretary of State's officer, he would not necessarily have any connection with questions of stores.

Thought that the Commander-in-Chief should be thoroughly conversant, through his combatant officers, with all that is going on at out-stations, and with the state of the stores, both in reserve and in charge of the Artillery; and with this view he thought either that all demands from Artillery officers should be checked by the Deputy Adjutant-General, Royal Artillery, or that he should receive returns of expenditure of Artillery stores. His officers should also inspect all stores in reserve and in course of manufacture, the latter object being gained by Artillery officers being placed at the head of the Manufacturing Departments, and the Director-General of Ordnance acting as President of the proposed Board.

Approved highly of the abolition of the Ordnance Select Committee, which was, in a sense, interested in multiplying experiments, many of which were useless, even if successful, and very costly. We were, he considered, experimenting for the benefit of the world.

Approved of the establishment of the Council of Ordnance.

Thought that it would be undesirable to combine the duties of Director-General of Ordnance with those of Inspector-General of Artillery. The Inspector-General of Artillery was already employed in inspecting detached forts and outlying stations all over the country.

Thought that the appointment of Director of Works should be continued, and that he should be assisted by two subordinate officers: one for barracks, and the other for fortifications. At present a great feeling of jealousy existed in the corps, owing to the junior standing of the officers in charge of the department. It was a question of military feeling.

Wednesday, 14th April, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.
The Right Hon. J. STANSFELD, M.P.
Lieutenant-General Sir E. LUGARD, G.C.B.
W. G. ANDERSON, Esq.

Sir CHARLES TREVELYAN, K.C.B., examined.

Sir C. Trevelyan, K.C.B.

14 Apr. 1869.

There could be no doubt, he said, about the general soundness of the conclusions arrived at by Lord Strathnairn's Committee, but the question of the separation of munitions of war from other supplies was much the most difficult part of the subject, and the one most open to criticism and debate; but he had considered it carefully, and had made up his mind that it was a desirable measure to adopt.

As a general principle, and as far as was consistent with economical considerations, munitions of war should be kept separate from all other stores, both in the reserves at home and in the field; and a solid foundation should be laid for this organization in the War Office by placing the administration of warlike matériel under the Director-General of Ordnance.

Under a proper constitution of the War Office, the Secretary of State should be assisted by four responsible advisers:—

1. The Commander-in-Chief, for the personnel of the Army.
2. The Controller-in-Chief, for all supplies (other than munitions of war) and transport.
3. The Director-General of Ordnance, for munitions of war.
4. The Director of Works, for fortifications, barracks, &c.

The Director-General of Ordnance should be a substantive officer representing the functions of the old Board of Ordnance, so far as they regarded the supply and custody of warlike stores, which functions have been incorporated with the office of the Secretary of State. He should be the medium of communication with the Manufacturing Departments; and the reserves of warlike stores in the principal magazines in this country should be in the charge of his officers, and under his control. The administrative separation of India, and the contraction of our military responsibility in the Colonies, greatly facilitate this organization abroad, and also reduce to a minimum the inconvenience of double establishments.

The old arrangement, under which munitions of war were placed under a special department (that of the Master-General of the Ordnance), was a just one in principle. There is an essential difference in kind between such stores and all others, requiring an entirely separate experience for their purchase or manufacture, and manipulation. The officers of Control are quite competent to undertake the charge of all ordinary stores; but the improvement, purchase or manufacture, the storing and distribution of munitions of war require a distinct experience, and properly belong to scientific officers. The charge of these stores, Sir Charles Trevelyan insisted, constituted a separate specialty, and could only be dealt with satisfactorily by officers who, like the Artillery, had been specially educated for it. The entire Artillery service, both officers and men, is one long preparation for properly handling and disposing of this class of stores. The Artillery is essentially the "Ordnance Corps"; and that department of Military Administration ought, therefore, to be based upon this branch of the Army, in like manner as the establishment for controlling administrative services of every other description is based upon the Line and the Guards. If this is not done, the strong, highly-instructed corps of Artillery will not be in its proper position in the military system, nor will it be turned to full public account. The correctness of this view is confirmed by the fact that the present Store officers have to go through a course of Artillery instruction before they are competent to undertake such duties; but this is only a half-measure, which cannot be so efficacious as that which it professes to imitate.

Too great a dispersion of duties is undoubtedly a serious evil, but there is an opposite danger in carrying centralization too far. When consolidation goes beyond a certain point, it becomes unwieldy, unmanageable accumulation. If the Department of Control is entrusted with both duties,—that is, with the care of munitions of war, as well as with that of all other stores,—besides the superintendence of the transport and finance of the army, the field of action will become too vast and varied to have justice done to it by the same men. The strain upon them would be too great in time of war, and another break-down might be expected.

Munitions of war might be defined as "fighting stores,"—*i.e.*, cannon, small-arms, shot, shell, fuzes, rockets, torpedoes, small-arm ammunition, &c.; any stores, in short, actually used in action by combatants.

In war, such stores have always been placed directly under the officers and men of our Artillery; and in the Continental armies this organization is universally adopted. Considering the degree to which the theory and practice of military administration are studied on the Continent, this unanimity is very significant.

If munitions of war are placed under a separate charge from other stores, there must be two separate shipments of stores for an army in the field, which at first sight might appear objectionable; but, on the other hand, there are great practical advantages in shipping munitions of war separately from other stores. They should be shipped direct from the arsenals by professional officers and soldiers, who understand their nature and use, and the proper mode of stowing them on shipboard, and who are in communication with their comrades at the port of debarcation. Munitions of war should also be kept as much as possible apart from other stores. Great inconvenience was caused in the Russian war by mixed cargoes of munitions and general stores. The freight ships should, of course, be hired for the Director of Ordnance either by the Admiralty or the Department of Control, and there ought to be a naval officer of Control at the port of disembarkation to preserve order and superintend the arrangements connected with the coaling and watering of the transports, as pointed out in paragraph 19 of his Memorandum, written in May 1855, and printed at page 266 of the Report of the Committee on the Transport and Supply Departments.

No possible arrangement can obviate all objections, but, the principle being that fighting stores only are to be under the Director-General of Ordnance and his officers, and all others (including those which the Artillery use in common with other branches of the Service) under the Control Department, the practical difficulties would easily be got over. Both departments would keep stores required by the whole army—the Ordnance Department the fighting stores, the Control Department all the others.

The separation would be so clear that no confusion could possibly arise in the field from there being two supply departments, and officers would soon understand from which department each description of stores was to be drawn.

The 2nd and 3rd Reserves of Artillery stores in the field should be under the charge of the Commissaries of Ordnance.

The 1st Reserve of small-arm ammunition should be under the control of the Officers Commanding regiments, and be carried by pack animals, or on light cars specially adapted for being moved over rough ground. The 2nd Reserve of small-arm ammunition should be in charge of the Commissaries of Ordnance.

In the field, the Officer Commanding the Artillery should be the officer responsible to the General Officer Commanding for the efficiency of the Ordnance Branch. He is, and must be, the real adviser of the General in such matters, and it is only right that he should also have the responsibility. He should of course be assisted by a proper Staff of executive officers—Commissaries of Ordnance—as holders and issuers of the "fighting stores"; but on him would rest the responsibility of bringing up proper supplies, and of maintaining proper proportions of reserves in convenient depôts on the line of march.

The responsibility of the Controller is already so vast and multiform, that it is very inexpedient to add to it by allotting to him duties so foreign to those which necessarily belong to him, as the care and distribution of arms and ammunition would be, even if he was assisted by a corps of Ordnance Commissaries specially trained for those particular duties.

Sir Charles Trevelyan did not think there was any force in the objection that a combatant officer in the field should not be charged with administrative duties. The Officer Commanding the Artillery would be assisted in this part of his duty by a Principal Commissary of Ordnance. The argument, both as regards the extent of the duty and its special character, is in favour of placing the whole administration in the hands of the Artillery, who necessarily already have in their charge a large amount of such stores. In India none but military officers are employed in administrative and financial duties connected with the Army, and experience both in India and England shows that when such duties are given in charge to military officers, and they are trusted, and rewarded according to their merits, they are as vigilant and economical as any civilians can be. The notion which prevails in some quarters that military officers can only be expected to look to efficiency, while civilians must be relied on for economy, is a very mischievous one, because both military men and civilians are constantly placed in situations which require that both efficiency and economy should be attended to.

The principle of connecting transport with the department responsible for the supplies is a sound

Sir C. Trevelyan, K.C.B.

14 Apr. 1869.

one. It is very important that the whole of the transport should be controlled by one department—the Control Department. But, although the whole of the transport of the Army should be provided by the Control Department, and should be under its general superintendence, it would be assigned, in the requisite proportion, to the Artillery, as it is to Infantry and Cavalry regiments, and to the different administrative departments.

The Control Department should be subdivided into two sections: one for consumable stores,—*i.e.*, food, forage, fuel, and light; and the other for clothing, camp equipage, tools, and miscellaneous stores. There was formerly a Store Department of the Commissariat, very imperfectly developed indeed, but founded on a true principle, and this should now be fully worked out, so as to include all stores other than munitions of war.

The absence of pre-arrangement, and the consequent confusion in the Crimea, was so great that no just inference can be drawn from our experience there, beyond this, that suitable arrangements should be made which should not err either on the side of too great dispersion or of too great accumulation. The most notable instance of confusion in the Crimea related, not to ammunition, but to clothing, as described in Captain Gordon's letter, printed at page 289 of the Report of the Committee on the Transport and Supply Departments.

As a rule, there should be an officer of each of the two departments of Control and Ordnance in charge of its own stores; but at small stations, where dual establishments would be an unnecessary expense, there is no reason why one officer should not act in the double capacity, maintaining his separate accountability for each division of stores. The Commissariat has always acted abroad as agents for various Government Departments, and no difficulty or inconvenience had ever been experienced in consequence.

If the principle were once clearly and definitively laid down, that one special class of stores is under the control of the Director-General of Ordnance, and all the rest under that of the Controller-in-Chief, the present controversy would be closed. We should then hear no more of the impossibility of separation, and subordinate officers would direct their attention to removing difficulties instead of making them.

Thursday, 15th April, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

Earl of DALHOUSIE, G.C.B., K.T., examined.

Earl of Dalhousie, G.C.B., K.T.

15 Apr. 1869.

Was Secretary of State for War from 1855 to 1858. The divided authority and responsibility which he found existing at the time of the Crimean war, in the shipment and receipt of stores, was the cause of terrible confusion. He had therefore sent out Captain Gordon to be the sole consignee for all stores sent to the Crimea. They were all taken on charge by that officer, and classified and issued under his directions. The result had been most beneficial: order took the place of chaos.

In the War Office he thought that the Controller-in-Chief should be the Head of all the Supply Departments of the Army. In the field, the Storekeeper or Controller, whatever he might be called, should advance with the Army, and establish convenient depôts on the line of march. He should be on the Head-Quarter Staff of the General Officer Commanding, but should take his orders from the Chief of the Staff. He should also have a Commissariat Branch under him, the whole energies of which should be devoted to the feeding of the Army. It should on no account be mixed up with the Store Branch. It was the Duke of Wellington's strong opinion, and he quite concurred in it, that the feeding of the Army was quite enough to occupy the whole care and attention of one department.

Had no objection to the Commissariat Department providing the food for hospitals, which is now done by the Purveyor's Department; but all Hospital stores should be kept by the Store Branch.

Unity of administration in the supplies and transport for an army, with a proper subordinate division of duties, ought specially to be aimed at, both in the War Office, in garrisons, and in the field.

Thought that if a special branch is to be formed for the charge of munitions of war, a few Artillery officers might be usefully employed in it. They should be seconded, so that if not found to be qualified for the duty, they could be sent back to their regiment. Admitted that a probationary period of sufficient length would test an officer's fitness for permanent service in the department, and answer the same purpose, but nevertheless preferred the seconding arrangement.

In the field, the General Officer in Command should be assisted by a Chief of the Staff, who would control the whole of the Staff,—*i.e.*, the Adjutant-General, the Quartermaster-General, and the Controller. This officer would be the General's mouthpiece, and relieve him of all details. In garrison he would not be required.

On the question of the control over the Manufacturing Departments, he was strongly opposed to the appointment of a Head of the Arsenal. It was an unnecessary expense, created jealousies among the Heads of the departments, and, if he was to exercise any military command, placed the Arsenal in some degree under the Commander-in-Chief, which he thought most undesirable. Had no objection to their being put under the Controller-in-Chief, but certainly not under any local Head.

In his experience had never found that there was any want of harmonious working in consequence of the absence of such an officer. The details of manufacture in each department were so distinct that no concentration of responsibility was necessary.

Thought that the appointment of Superintendent should be held for five years, but that the Secretary of State should have the power of re-appointing any officer; and that in cases where it was for the interest of the public that he should do so, he should exercise it.

On the question of the proper position and functions of the Director-General of Ordnance, he thought that the erection and armament of fortresses were functions of the Secretary of State, and that he should be advised in such matters by the Director of Works and Director-General of Ordnance respectively. The

Commander-in-Chief's functions should be confined as much as possible to the discipline of the Army. Inventions and experiments should be considered and initiated by the Secretary of State, and not by the Commander-in-Chief; but the military opinion of the latter should invariably be invited on such questions.

The Director-General of Ordnance should be the Secretary of State's adviser in fixing the armament of fortresses, and the proportions of ammunition, &c., that should be kept in Artillery charge and in reserve; but all annual or other demands, within those proportions, should go direct from the field or garrison to the Control Department. The duties of the Deputy Adjutant-General of Artillery should then be confined to discipline questions.

Earl of Dalhousie, G.C.B., K.T.
15 Apr. 1869.

The Director-General of Ordnance should in fact be much what the old Director-General of Artillery was, though some of the functions of that officer might properly now belong more to the Controller-in-Chief than to the Director-General of Ordnance.

Friday, 16th April, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

Major-General the Right Hon. Sir HENRY KNIGHT STORKS, G.C.B., G.C.M.G., further examined.

Objected strongly to Artillery officers holding appointments in the Control Department on the footing of Staff appointments,—viz., for five years, but had no objection to their being employed if they were put on the same footing as seconded officers after a period of probation. There must, however, be no divided allegiance, and officers must make up their minds to lay aside their military status and accept any position to which they might be appointed in the Control Department, regardless of any question of military rank or precedence.

Would appoint as Commissaries officers and non-commissioned officers of Artillery, but would first of all absorb all the qualified Military Store officers.

Thought that if the appointments of Superintendents of Manufacturing Departments are to be upon the footing of Staff appointments, they should be held for five years only, without re-appointment; but preferred that they should be permanent appointments, and that the officers selected to fill them should resign their military commissions.

Maj.-Gen. Sir H. K. Storks, G.C.B., G.C.M.G.
16 Apr. 1869.

APPENDIX No. II.

Analysis of Evidence given between the 19th March, 1869, and the 27th July, 1869.*

Friday, 19th March, 1869

Present:

The Right Hon. Lord Northbrook.	Lieutenant-General Sir E. Lugard, G.C.B.
The Right Hon. J. Stansfeld, M.P.	W. G. Anderson, Esq.

William Brown, Esq., C.B., Accountant-General, examined.

W. Brown, Esq.

19 Mar. 1869.

Described the constitution of the Accountant-General's Department previous to its division in 1865, viz., that the Accountant-General, assisted by two Assistant Accountant-Generals, was responsible for the whole department, and possessed a complete knowledge of the state of the accounts, as well as of the individuals of the whole branch.

Thought that the reasons given by Mr. Anderson, in his evidence before the Public Accounts Committee, and those in the Report of Lord Hartington's Committee, were not sufficient to warrant the change made in 1865. Believed the true reason to have been that it was considered wrong in principle that the same officer should allow accounts in which he himself had authorized charges.

The change had brought no relief to him. In consequence of it, he now knows nothing of the examination of the accounts, nor whether the actual sums allowed in them are identical with those sanctioned by him or by regulation; and, on the other hand, the Chief Auditor does not know whether the record finally made in the Parliamentary account agrees with the sums allowed by him in the accounts.

Thought that no practical inconvenience arose from this state of things, as one man could never look into minute details, and each officer had perfect confidence in the other; but that such dependence on mutual confidence was not theoretically satisfactory.

The Chief Auditor allows no charges but those sanctioned by proper authority, or by some Royal Warrant, and does not consider appeals against disallowances in the accounts. The Accountant-General's functions commence at that point.

Admitted that a few papers now go through two branches which formerly were decided upon in one, but did not think that any double work resulted. Also that the separation had caused increased expense, in consequence of the larger number of superior clerks employed in the Audit Branch for superintendence, and to give a prospect of advancement to the juniors. No increase of expense had taken place in his branch, which was now, taking the average salaries, the cheaper of the two.

Stated that the practice o separating the examination of the accounts from the correspondence which arose out of them, and carrying on the work in separate rooms, prevailed before the division of the department, and was, in his opinion, the best way of conducting the work. Thought that no saving would be effected by amalgamating the work, and that the examining clerk was in no better position to give an opinion on any question than the clerk employed on the correspondence. Such an amalgamation had been tried some years ago in the War Office, but it was found that the business of examination was always considered of secondary importance, and that in any pressure of work the result had been great arrear in the examination of accounts.

Thought that no increased expense in establishments resulted from the constant references from room to room, but much practical benefit. Any increase on this head was due rather to the inconvenient arrangement of the rooms in the present office.

About three-fourths of his branch employed on correspondence, the remainder—rooms E, 2, 4, 8, and part of 10—being engaged on account duties proper. Chief Auditor's correspondence only related to disallowances in the accounts.

On the question of the power and functions of the Accountant-General, stated that he had discretionary power to sanction expenditure incurred under exceptional circumstances, not governed by, or not contrary to, Royal Warrant, and that the Chief Auditor allowed such charges in the accounts. Admitted that such discretionary power consisted in more or less liberally interpreting some Regulation or Warrant.

Saw no reason why the Accountant-General should not sanction non-effective charges, nor why questions of passage allowance should be dealt with in another branch of the office. Thought that administering to soldiers' effects was no part of an Accountant-General's duty, and that it should be transferred to the Solicitor.

Savings'-bank accounts he thought were regimental affairs, not imprest accounts; and therefore did not properly belong to Chief Auditor's duties.

Thought that no regulations, however well defined, would diminish correspondence.

* After this date the evidence was taken down *verbatim*.

H. W. S. Whiffin, Esq., Chief Auditor, examined.

H. W. S. Whiffin, Esq.
19 Mar. 1869.

Thought that the division of duties between himself and the Accountant-General had not been fully carried out, especially in the preparation of Manufacturing Department accounts, which remained with him on account of the difficulty experienced in drawing the line of separation between account and audit duties, in leaving the examination of savings'-bank accounts with the Accountant-General, and in the absence of any audit check over the payment of office salaries.

It was not the case that work was now divided as it was before the separation of departments. It was then not divided on any principle. Each Assistant Accountant-General took the work which he had been accustomed to. Mr. Milton took that formerly done in the War Office, and he took that of the Ordnance Department. Thought it was very difficult to separate account and audit duties on any intelligible principle, and that the attempt to do so had not proved so successful as was anticipated. Increased work and no better check had been the result.

Admitted that he had too many superior clerks, but it had been considered necessary at the time the separation was made to give men who had been on a common establishment the same prospects of promotion. Thought that this was wrong in principle, and that the public should pay its servants according to the nature and amount of work they were called upon to do, and not merely to give them certain prospects of promotion. The proportion of superior clerks was not, however, as good in his branch as it was in the Admiralty or Audit Office, nor was it better than in the Accountant-General's Department. The necessity for superior clerks would be avoided by amalgamating the duties of various rooms, and he had made changes in this direction.

Had effected reductions by the employment of soldier clerks in lieu of established clerks, whenever vacancies occurred among the latter. Thought the soldier clerks were more valuable than established clerks for certain duties, and gave more attendance. The average attendance of each established clerk in the year was 1,566 hours, of each temporary clerk 1,638 hours, and of each soldier clerk 2,376 hours.

On the question of amalgamating the correspondence with the examining rooms, agreed with the Accountant-General in thinking that examining work is more or less likely to give way to correspondence in times of pressure; and stated that if the amalgamation took place he would still tell off some clerks in each room for correspondence only.

Thought the whole work of the present Regimental Correspondence Rooms could be done by the present Examining Rooms, with a slight addition to the staff of each. The materials for their correspondence were, to a great extent, supplied by the Examining Branch.

On the question of his powers and functions, stated that, as a rule, he allowed charges sanctioned on the Accountant-General's authority; but considered that he had power to disallow them if he thought them contrary to Regulation. Wherever he had a doubt about admitting a charge in the accounts, he obtained the Accountant-General's concurrence, and either allowed or disallowed it without further sanction. Considered the power of the Assistant Under Secretary to be much the same as that of the Accountant-General, differing only in a larger exercise of discretion in interpreting Warrants, &c.

Thought that store accounts would not be better examined away from the Audit Branch, but had no objection to their being removed.

Audit of Naval gunners' accounts could not be transferred to the Admiralty, as long as the War Office supplied the stores.

Thought that the registry of pensions now done in A. should be transferred to him.

Doubted whether the Audit check upon pensions was sufficient, and whether he should not satisfy himself that the sum granted was in accordance with Regulation.

Thought that the correspondence as to passages should be conducted by the Quartermaster-General instead of by Subdivision B.

Could not give an estimate of the saving which would be effected by amalgamating the Accountant-General's and Chief Auditor's Branches; but by getting rid of inefficient clerks, and increasing the hours of attendance, thought that 10 per cent. might probably be reduced. Could not give a more approximate estimate till he had had six months' experience of the work.

Thought that six full hours' work should be insisted on, and that no newspapers or luncheon-room should be allowed.

Better regulations would not, he thought, have very much effect in lessening correspondence, without a simplification in rates of pay and allowances, and a comprehensive system of local authority.

On the question of the sort of establishment he would recommend, was anxious to have as much mechanical work as possible done by soldier clerks, and that the superior establishment should be divided into many classes, with no annual increments of salary. The increment system held out no inducement to extra exertion, but under the system of numerous classes every one would be working for a promotion which would not be too far distant to be disregarded. It was also impossible to fix precisely the financial effect of changes in an establishment where the increment system prevailed.

Saturday, 24th April, 1869.

Present:

The Right Hon. Lord Northbrook.
The Right Hon. J. Stansfeld, M.P.
Lieutenant-General Sir E. Lugard, G.C.B.
W. G. Anderson, Esq.

Major-General Balfour, C.B., examined.

Maj.-Gen. Balfour, C.B.
24 Apr. 1869.

When he and Sir H. Storks examined into the Accountant-General and Chief Auditor's offices, what struck them most was the ill-defined functions of the two officers. Both appeared to be doing very much the same work, which, in fact, could not be carried on at all without the closest intercourse between the two branches. This was the case more particularly in questions arising out of the administration of Vote 1 (Army Pay).

To exercise a proper control over expenditure, the functions of the controlling administrative officers should be clearly defined. The Accountant-General ought not to be an administrative officer, and his function should be that of advice and account check only.

Did not think the present audit,—or, as it should properly be called, examination,—was on a satisfactory footing. The total sums disallowed in a year amounted only to about 20,000*l.*, and of this sum only about 5,000*l.* was a real disallowance liable to be recovered. This, he thought, showed that the audit was inherently inefficient,—not from any want of zeal or efficiency on the part of the auditors, but from the

Maj.-Gen. Balfour, C.B.

24 Apr. 1869.

separation of this function of examination from the administrative branches, where alone any useful examination could be conducted, and any real saving effected.

This ought to be remedied by breaking up the present Audit Branch, and transferring the examination of accounts to the administrative branches. This would not cause any increase of expense, as the necessary clerical establishment would be transferred with it. He thought, on the contrary, that a large decrease of establishment might take place, owing to the simplification of work which would follow, and the absence of references from one branch to another.

Thought that a really useful and efficient audit—not examination—might be obtained by strengthening and extending the scope of the present appropriation audit.

Would transfer the administration of Vote 1 to some officer independent of the Accountant-General, who, however, would still exercise an account-check over the examination of the accounts of this and other departments of the War Office through the auxiliary ledgers kept in the book-keeping room.

The Accountant-General had, he thought, functions far too various and laborious to be properly exercised by any one man. He should be relieved from all unnecessary work, and a large part of the detail work now done in his office should be transferred to a Staff Paymaster out of the office.

The control over the administration of the various votes being thus given to the heads of the several departments in the War Office, he thought that the Secretary of State should have some means of knowing whether they kept strictly within the powers entrusted to them, and this he thought was provided for by the examination which all papers are subjected to when they are returned to the Registry for final custody. This, combined with the proposed strengthening of the appropriation audit, would be a sufficient security.

Wednesday, 5th May, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

G. LAWSON, Esq., examined.

G. Lawson, Esq.

5 May, 1869.

Is a Second Class Clerk in the Audit Department of the War Office, and Private Secretary to the Controller-in-Chief, and was formerly a Clerk in the Barrack Department.

Began by explaining the theory of the present constitution of the War Office to be, that the Secretary of State deputes to various officers directly responsible to him, the administration of the several Votes comprising the Army Estimates, who within the powers assigned to them by him, authorize the expenditure of their respective Votes.

There is a separate officer, the Accountant-General, who collates the Estimates, which are prepared in detail by the Administrative Branches; issues the money for all services in Army Votes; and finally compiles in the Parliamentary Account the approved expenditure. He also has referred to him, by the Heads of the Administrative Branches, all questions of increases of establishments and new expenditure not provided for in the Estimates; but the opinion he gives upon such questions is a statistical and not an administrative one. He also maintains a general financial check over all the Votes in the Army Estimates. In addition to these duties, he is an Administrative Officer as regards Vote 1—the Army Pay Vote—in which capacity, in consequence of this union of duties, he is not checked by any independent financial officer.

To another separate officer, the Chief Auditor, is entrusted the duty of examining the accounts, with the view of seeing that the accountants are acting in accordance with the regulations issued for their guidance by the Administrative Branches, and that proper vouchers for the payments are produced. His department is entirely cut off from the Administrative Branches, the Clerical Establishments not being interchangeable.

There is also an independent Parliamentary Appropriation Audit, which does not question the propriety of the charges in the accounts, or look to the sufficiency of the voucher, but merely sees that the monies expended by the Secretary of State are brought to account in accordance with the requirements of the Appropriation Act.

Thought that before any settlement of the War Office could be arrived at, which could be a satisfactory and *final* one, it was necessary to look closely into the principles on which the Administrative Branches, the Account Branch, and the Audit Branch were framed.

This enquiry is rendered easy by the existence of the Treasury Reports and Minutes which were laid before Parliament in 1856.

In the Treasury Committee's Report of 1840, the principles of Audit are most exhaustively stated. It shows that the system of leaving the great spending departments to audit their own accounts arose from the fact that within the Executive Department alone is to be found "the information upon which a correct "judgment of the propriety of the expense incurred" can be framed, while on the contrary an independent audit office could scarcely, under any circumstances, continue thoroughly acquainted with the practical details of the Service.

Under these considerations the Treasury Minute of 27th November, 1840, while providing for an independent appropriation Audit, and admitting the theoretical advantages in certain respects of an independent Audit, left the examination into the propriety of the expenditure with the department which was responsible for it.

A subsequent Treasury Minute of 2nd December, 1841, insisted upon the Appropriation Audit being extended to ordnance expenditure, and clearly laid down that no quasi-independent Audit within the Spending Department, or, to use it own words, "no audit of accounts of such expenditure which "is confined entirely to officers of the department, "whatever may be the relation in which officers "of the department stand towards each other," could be considered to possess the theoretical advantages of an independent Audit.

From this he argued that the present system of audit within the War Office possesses neither the advantages of an Independent Audit, nor those of a Departmental Audit.

The professional knowledge of the officers who administer the several votes is not utilized at the stage when the expenditure is brought under review through the accounts and vouchers, and the examining branch lacks the professional knowledge necessary to enable it to check any wasteful expenditure which may be going on. The examination is divorced from the administration, and is mechanical without being independent. This is especially the case in Store transactions. Under the Control system,

which contemplates local expenditure within defined limits on the responsibility of the Secretary of State's local representatives, the want of bringing the expenditure under the review of the Administrative Branch would, he thought, be especially experienced.

The want of this union of functions in the Administrative Branches is much felt, and the necessary consequence has been an extreme centralization of authority for expenditure by the Heads of Administrative Branches, and a system of pre-audit on their part, by demanding that every expenditure, however trifling, shall be submitted for their review and sanction previous to its being undertaken, causing delay in executing necessary services, and much unnecessary correspondence.

He thought that it would be admitted by anyone that the propriety of any charge could better be determined by the branch which administered it, than by any external branch, and considered that all the reasons which led to the examination being placed under the Secretary of State, applied to its being carried out by the Administrative Branches, who were practically acquainted with the details and causes of the expenditure.

The maintenance of an independent branch to see that the officers of the Department at out-stations obeyed the orders sent to them by the Administrative branches in the War Office could only, he believed, be defended by a feeling of mistrust in the Heads of the Administrative Branches, and a doubt whether they honestly carried out the powers and responsibilities confided to them by the Secretary of State.

Believed that the usefulness of the Administrative Branches was also greatly crippled by the present system. They directed the Votes for which they were responsible up to a certain stage, and gave orders for expenditure, often of a continuous character, but they never saw the charges made under their instructions, and had no proper means of reviewing the expenditure as it ran on. The accounts also were one of the best sources of information for the Administrative Branches, and he thought that they should, after being finally recorded by the Accountant-General, be retained in the branches which had occasion to consult them, instead of being, as was now the case, kept in another part of the Office. From the present practice mainly arose the multitude of minutes of enquiry from branch to branch.

He thought the remedy for this state of things was to replace the examination into the expenditure with the Administrative Branches which authorized it. To accomplish this it would be necessary to abolish the present Audit Branch, and to define clearly the functions of the Accountant-General.

In dealing with this officer, the first thing to be done was to remove from him the administration of Vote 1 —Army Pay—and place it under some independent authority, in the same position as the other Votes.

The detailed mode of dealing with the accounts would then be as follows :—

All accounts on receipt should be sent to the Accountant-General. They would be checked in his department for their arithmetical correctness, and the charges and vouchers classified—if it is decided that the accounts are to be sent to the War Office in an unclassified state—under the various votes and sub-heads of votes.

The vouchers would then be sent to the Administrative Branches and examined professionally. Any objection would be written on a form and attached to the voucher, and the whole returned to the Accountant-General, by whom a collected abstract of all the objections raised against each account would be made and transmitted to the Accountant, whose explanations would be dealt with in a similar manner. If any of the objections raised did not fall within the province of the Accountant, enquiry would be made by the Administrative Branch of the proper officer. The whole of this portion of the Accountant-General's work would be performed by a subordinate class of writers.

When the accounts were finally allowed, they would be incorporated into the Parliamentary Account by the Accountant-General as at present.

The Accountant-General would also exercise a general financial check over the whole expenditure of the office, by advice before any new expenditure was incurred, and by means of the accounts before they were finally allowed. He would also be the banker for the Department, and make all issues of money for every branch of the office.

What he chiefly insisted upon was the great simplicity and advantage to be derived from examining expenditure by subjects, instead of by the account in which it appeared.

As an instance of the evils of the present system, he cited the case of transport charges and travelling expenses, which are now provided in several votes, but the administration and examination of which, under his proposed plan, would be provided in one vote, and focussed in one branch. These are now dealt with in some shape or other by no less than 11 different rooms and departments in the War Office. This has almost necessarily led to such a mass of conflicting decisions that it is now hardly possible to say what the regulations are.

Under the proposed system, Heads of Administrative Branches would also be able to watch more closely the current expenditure of their votes, though he thought it would probably be necessary to do this still more promptly by periodical returns, furnished by the Local Controllers, of the expenditure authorised in their districts.

He also anticipated a great advantage in the reduction in establishment which must follow, in the saving of references from one branch to another, which now took up so much time unnecessarily.

As an example of the reduction which would result, he understood that by the amalgamation of the corresponding and examining duties of Vote 1 (which was the principle he advocated generally for all the Votes), Mr. Whiffin thought that the establishment at present occupied on one class of duties would, with very slight assistance, be sufficient to perform both. The same would apply more or less to all the other Votes.

The principle he recommended was no new one, but had been actually in force in the old War Office, and virtually in the Ordnance Office, but had been gradually, but undesignedly, departed from on the amalgamation of the departments after the Crimean War.

In reply to an objection that the Secretary of State would under this system have no guarantee that the Heads of Branches did not exceed the powers entrusted to them, he argued that the examination which all papers should undergo on their return to the Central Registry, a department common to, but independent of all of them, the Secretary of State had the means of knowing whether there had been any abuse of power on their part, and that even if he had not this check, the possible abuse by a Head of a Department of the power entrusted to him would in any case certainly be detected in a short time, and was not to be compared with the evils which might, and possibly do, arise from the passing of charges by officials without administrative knowledge, and necessarily not fully acquainted with the reasons for, and spirit of, the Warrants and Regulations which they were called upon to interpret.

Thought that the examination should be conducted by Clerks belonging to the Adminstrative Branches, and not by Clerks belonging to the Accountant-General's establishment attached for the purpose to the various branches.

The whole essence of his plan was, that the professional knowledge possessed by the Administrative Branches should be utilised in the examination and review of the charges made in the accounts.

In reply to questions, he further went on to show in detail how this scheme would readily fit in with an independent Audit Office, should the establishment of such a department for Army charges be at any time determined on.

G. Lawson, Esq.

5 May, 1869.

The Secretary of State, by means of his adminstrative branches, would professionally examine every charge as before explained, and would be directly responsible for its necessity.

The Audit Office would take up the duties of compiling, checking, and finally passing the charges, proposed above to be performed by the Accountant-General giving a certificate on the Parliamentary account that no charge was included in it which had not received the Secretary of State's examination.

Friday, 14th May, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

Major-General the Right Hon. Sir HENRY KNIGHT STORKS, G.C.B., G.C.M.G., examined.

Maj.-Gen. Sir H. K. Storks, G.C.B., G.C.M.G.

14 May, 1869.

Thought that there was no necessity for a Board of Officers composed of the Heads of the several departments in Woolwich Arsenal, for the management of the local business. He would arrange such matters in personal communication with the Heads of Departments.

Did not think that inspection of warlike stores should be a function of the Director-General of Ordnance. He should be the scientific adviser of the Secretary of State, and not an inspector. Commanding Officers of Artillery, in each district, should be responsible for such duties, and report to the General Officer Commanding on the spot, who would, in communication with the local Control Officer, take such action as might be necessary to meet any recommendations they might make. If questions were raised which could not be settled locally, the General Officer Commanding should forward, for the consideration of the Controller-in-Chief, any questions connected with the stores in reserve, and any question relative to stores in Artillery charge for that of the Commander-in-Chief. Any questions in these reports relating to defects in the patterns of service stores should be referred by the Controller-in-Chief, or Commander-in-Chief, to the Director-General of Ordnance, who would, after obtaining a report from the Head of the Manufacturing Department concerned, recommend a remedy to the Secretary of State. If the Director-General of Ordnance and the Head of the Manufacturing Department differed in opinion, the Secretary of State must decide between them.

Did not think it advisable to create a Board of Officers at each station to assist the General Officer Commanding in dealing with inspections, surveys of stores, revision of demands, &c. Had no objection to the General Officer Commanding forming such a Board to advise him, if he thought it necessary; but the whole responsibility must be on the shoulders of the General Officer himself. The duties of any such Board should be limited to stores issued for service, and they should not interfere in any way with the reserves under the superintendence of the Control Department.

Thought that the duties of the Deputy Adjutant-General, Royal Artillery, connected with armaments and proportions, should be transferred to the Director-General of Ordnance, and that the former officer should be responsible only for the *personnel* of the regiment.

Thursday, 20th May, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

H. W. S. WHIFFIN, Esq., examined.

H. W. S. Whiffin, Esq.

20 May, 1869

Had read a paper given to the Committee by Sir H. Storks containing three main proposals:—

1. The separation of the administration of Vote 1 from the Accountant-General, and the transfer of it to some independent officer.
2. The abolition of the pre-audit of all claims.
3. The dispersion of the present Audit Branch amongst the several administrative branches.

He did not see the necessity for the first of these proposals, as the expenditure under Vote 1 depended almost entirely on the numbers voted by Parliament, and the vote might be said to administer itself; but he admitted that the Accountant-General, as dealing with this vote, in some cases recommended and prepared new regulations relating to it.

He thought the second proposal a very dangerous one, as it would increase the balances in the hands of local Accountants, and give opportunities for fraud which did not at present exist. The present system of local examination, supplemented by a further examination in his office previous to payment, gave the public the greatest security against fraud.

He instanced the case of the Clothing Factory at Pimlico, where contractors' goods of the value of nearly 1,000,000*l.* a year were delivered, as one in which the public money would be liable to increased risk if all the payments were made by the local Accountant; but he admitted that it was not a necessary part of the proposal that such payments should be withdrawn from the Paymaster-General. It would, however, give that officer much increased labour if he had to open a credit for each local Accountant.

Also thought that local payments were often an inconvenience rather than a convenience to contractors, as an instance of which he cited the case of contractors' claims paid in one month for supplies delivered at Aldershot, 16,674*l.* of which, out of 17,390*l.*, were payable in London, Ipswich, and other places.

He did not agree to the third proposal, though he admitted the benefit of focussing the examination of accounts by subjects, and so far he proposed to carry it out; but he did not see the necessity for bringing together the examination of accounts and the administration of the votes. On the contrary, he thought

it was very objectionable in principle that the administrative branches should examine their own accounts. The function of Control should be exercised before the expenditure is incurred; it is too late when that expenditure is charged in the accounts.

The method of examination he proposed to adopt would secure an unity of interpretation of regulation in dealing with the same class of expenditure, and would furnish, in an accessible form, all the information that could be required by the administrative branches. If a closer union of the two functions was really desirable, he saw no objection, if it were considered necessary, to clerks from the administrative branches being temporarily attached to the rooms in which the several classes of expenditure were examined for the purpose of inspecting the vouchers. Also thought that it might be arranged that the books kept in the Book-keeping Room, subsidiary to the principal ledgers, might be kept in the several examining branches. This, he thought, the administrative branches would find extremely useful in showing them how the expenditure under their votes was progressing. This, however, would not relieve them from the necessity of keeping their own records of liabilities incurred. The accounts could not supply such information in time to be of any practical utility.

He did not think that the administrative branches felt any loss of responsibility from not watching their expenditure through all its stages up to its final allowance.

Did not find any disinclination on the part of the administrative branches to apply to him for information, but from their being unacquainted with what he could supply them they often got information from their local officers which was already in his office.

He denied the necessity for any professional knowledge in the examination of accounts; wherever it was necessary it was done locally, and the vouchers bore evidence in the shape of certificates that it had been brought to bear on them.

H. W. S. Whiffin, Esq.
20 May, 1869.

Among other objections to this proposal, he urged that in time of war or unusual pressure the examination of accounts by administrative branches would be neglected for other and more pressing work. This was proved by our experience in colonial wars, where our local Accountants, who are Commissariat Officers, have been withdrawn and employed on other duties of their department, producing much irregularity and delay in rendering the accounts.

It would also lead to increased clerical labour in collecting the objections into one abstract, and extracting the replies from the several Accountants; but this he admitted would apply, to a limited extent, to his own plan of examining by subjects instead of by accounts.

There would also be a difficulty in attaching the examination of the accounts of several miscellaneous votes, such as the Ordnance Survey, Military Prisons, &c., to the administrative branches.

Under the present system he was able so to arrange the examination of accounts as to economise, to the greatest extent, the clerical labour employed on them by transferring examiners from one subdivision to another as occasion required it; but this he thought it would be difficult, if not impossible, to do, if each administrative department had its own staff of clerks.

Thought that the examination of the Store accounts might perhaps be transferred to Woolwich for the convenience of the administrative branch, but the clerks employed upon it should be a portion of the establishment of his office.

Store and Cash accounts were required to verify each other, and some inconvenience would arise in the increased difficulty of comparison if the former were transferred to the Control Department.

Thought that much greater use might be made of the Store accounts than was the case at present, in bringing out useful statistics of expenditure.

Saturday, 29th May, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK.	Lieutenant-General Sir E. LUGARD, G.C.B.
The Right Hon. J. STANSFELD, M.P.	W. G. ANDERSON, Esq.

DOUGLAS GALTON, Esq., C.B., examined.

D. Galton, Esq., C.B.
29 May, 1869.

With reference to the question whether or not it was desirable to reunite the Accountant-General and Chief Auditor's Branches, considered that so long as the examination of accounts remains with the Secretary of State, it was immaterial in principle whether the functions now belonging to the Chief Auditor and Accountant-General converged in the Secretary of State or in some Chief Officer under him; but it was essential that individual clerks and heads of rooms employed on examination of accounts should not in their functions of Auditors check charges, which they might have admitted in the first instance, as representing the Accountant-General, nor have any function of making, or altering, or relaxing regulations.

It would be too close an union if both these functions were performed under the superintendence of the head of a sub-division, as the clerks upon whose recommendation a departure from regulation is authorised, should not finally allow the expenditure in the accounts. In fact it was essential that the superintending clerks should be different individuals. Has no objection for the purpose of educating the clerks, to make the third class interchangeable. The separation had caused a very healthy check to be exercised by each branch upon the other, and it also led to a better and more punctual examination of accounts. Under the old War Office both plans had been tried, and it had always been found in practice that accounts fell into arrear when examined by the branches which conducted the correspondence connected with them. The accounts have never been in so forward a state as they now are, which is a great boon to accountants. Why risk a change, as the arrangement has realised the best expectations of those who made it?

The Accountant-General's function—*quâ* Army Pay—is to advise upon new regulations and upon the interpretation of existing regulations, and to recommend alterations. That of the Chief Auditor is to disallow anything not strictly within regulation, or which has not been included in the Parliamentary Estimate, or else which has not been approved by some competent authority. The Chief Auditor should not be concerned in the making of regulations, or in preparing the Estimates; both should be entirely independent of him. He should exercise as little discretion as possible in making disallowances. The regulations should be made so clear that there should be no room for discretion in the Auditor. If a wrong or forced interpretation is put upon a regulation by a General Officer Commanding, or an Accountant, it should be disallowed by the Auditor, and, if appealed against, considered by the branches which advise upon regulations under the Accountant-General.

D. Galton, Esq., C.B.

29 May, 1869.

The Regulation Room does not make regulations. It puts them into proper language, issues them, and includes them in the proper section of the code, and points out inconsistencies.

He had always found when the branches were together, that it was the tendency of examining clerks, when they observed what they thought were hard cases in the accounts, to suggest relaxation and to make them the foundation for proposals for changes in the regulations, instead of leaving the initiation of complaints with the sufferers. Under the present arrangements they were not competent to do so. No period was more fruitful of unsystematised alterations of regulation than that between the creation of the present War Office and the separation of the Examining and Correspondence Branches.

The Accountant-General recently asked the Chief Auditor for the loan of a third class clerk, but was refused on the ground that all were fully occupied, and a first class clerk was offered for a short period; hence it is clear that if these functions are to converge in one officer, and if the examination of accounts is to be as efficiently done as it now is no saving in clerical establishment, in the Chief Auditor's Branch, could result from the suggested union of offices; but 26 clerks only out of 91 in the Accountant-General's Office were employed in correspondence on subjects connected with army accounts, consequently out of this number alone could any saving be effected by the fusion of branches; but as the duties now done must still be performed, the saving could not be great.

If there were at present too many first class clerks in the Audit Branch, it must be borne in mind that, although Lord Hartington's Committee had intended to have in that branch a larger proportion of the lower classes, the clerks had remonstrated against the hardship of having all prospect of promotion destroyed, and Lord de Grey had put the two branches on an equal footing, upon the ground that if the clerks were justly discontented, they would not work well. The Chief Auditor was himself responsible for urging the clerks' claims on that occasion. Lord Hartington's Committee was responsible for the present separation of the Audit Branch from that of the Accountant-General. It was then found that partly owing to the defective structural arrangement of the rooms occupied by the Accountant-General's clerks, he could not thoroughly supervise them without more assistance; and the work of examination of accounts was very much in arrear. In separating the branches the Committee were mainly governed by the principle of making the examination independent, and holding the Chief of the Examining Department solely responsible for examination; if the arrangements of the office had been more convenient, the separation of duties might have been made without the creation of a Chief Examiner; but then the two assistants to the Accountant-General must have been maintained, with somewhat altered duties. The result has justified the Committee, as the examination of accounts has never been in so satisfactory a state as it is now in; but individual clerks suffered hardship by the separation of establishments; if the establishments are now reunited other clerks will suffer, consequently, except for some paramount advantage, such changes should not be made. No such advantage has yet been shown.

Did not say that the actual division of work then made between the two branches might not with present experience be improved. It was tentatively adopted, and the intention was that it should be revised at the end of two years, but proposals for other changes of organisation in the office had postponed the revision.

In winter of 1866-67, he had examined the two departments in conjunction with the Accountant-General and Chief Auditor, and made recommendations which had been shelved for the same reason; he had not then recommended any decrease in the number of clerks, solely because he anticipated that more work would be thrown upon the Accountant-General's Branch by the record of establishments and by a record of the expenditure which he had proposed should be kept under the head of each colony, and by the collation of the periodical returns which were to be obtained from each foreign station, to show progress of expenditure during the year as compared with estimate.

He objected on principle to the plan proposed by Mr. Lawson; it was also open to many objections in detail from the practical inconvenience which would attend its working. It proposes that after the account has been sent home in an unclassified form, and classified by the Accountant-General, the vouchers shall be distributed for audit to the branches which have ordered the expenditure. It is wrong in principle to render the account in an unclassified form; besides, if the expenditure is to be watched by the local officers, it must be recorded at the station under the Vote to which it belongs; or else how is an officer to be held responsible for his estimate or expenditure? The separation of vouchers would necessitate a new registry. The account can never be the proper machinery to keep the Head of an Executive Department informed of the current proceedings of his officers; it cannot give information as to money available to spend; it only shows what has been spent down to some arrear period. The expenditure proceeds according to detailed estimates, or to regulation, or upon special authority from the Head of the Department in case of alterations; all deviations sanctioned locally by the General Officer should be reported; thus the Head of the spending department possesses information of all liabilities against the votes which he superintends. The account can never be the machinery for enforcing economy; the preparation of the annual estimate is the period for the detailed review of the proceedings and necessities of the spending departments; economy can only be obtained by requiring every detail to be then explained and justified. The account shows that the expenditure has taken place according to the approved estimate, or to regulation, or upon a special authority. It is the machinery which the Secretary of State possesses for ensuring that the Heads of the Executive Branches have properly exercised their responsibility, otherwise he would have no security against any sort of abuse on their part. If they examined their own accounts he could know nothing of their proceedings beyond what they chose to communicate to him.

JOHN MILTON, Esq., Assistant Accountant-General, examined.

John Milton, Esq.

29 May, 1869.

The Chairman having explained that two schemes had been suggested to the Committee, or rather that one scheme had suggested itself,—namely, the amalgamation of the present Account Branch with the Audit Branch,—and one had been submitted by Mr. Lawson on behalf of the Controller-in-Chief,—namely, the dispersion of the Account Branch amongst the branches administering the several votes or services,—

Mr. Milton stated that he thought there were many advantages attending Mr. Lawson's scheme, provided that the very great objections which it had in common with the other scheme were to be got over. The first scheme he considered to be attended with very great objections, as it was essential to the safety of the public interests that the correspondence, or financial control, now carried on in the Accountant-General's Branch, should be separated from the examination of the accounts; that the healthy antagonism between these two branches induced increased caution on the part of both in dealing with public expenditure; that the separation of the audit from the financial control, and its assignment to an officer of high rank, whose duties were confined wholly to audit, had been attended with the best possible results; that the audit of the accounts was never in so forward

and healthy a state as at present; and that all his experience had shown that in uniting the correspondence with the examination, the latter always fell into arrear, and was then got over in a hurried and unsatisfactory manner, with great danger to the public interests.

Mr. Milton went on to say that should it be decided, in spite of the experience of the past four years, in spite of the favour with which the separation had been received in Parliament, and in spite of the decided terms in which the Treasury had only recently insisted upon its being maintained, again to unite the correspondence with the examination, then he saw great advantage in carrying the principle still further, and putting the examination into the Administering Branches, who alone were directly interested in seeing that every penny of the sums granted them on their vote was spent to the utmost advantage, and who were best able to examine intelligently the expenditure on their own several votes.

He stated that he was averse to the employment of soldier clerks, or clerks of an inferior class of society, for the performance of any of the duties in the Accountant-General's Branch, as he considers the employment of such men highly disadvantageous: that though there might appear to be some small economy in employing such men on the lower or routine business, yet the loss to the regular clerks of the teaching afforded by the performance of those duties, and the danger of employing a lower class men in an important public office, in his opinion far outweighed the value of any such pecuniary saving.

He stated he did not think that the numbers of clerks in the Account Branch could be much reduced; that already the Accountant-General had effected, through not filling up vacancies as they occurred, a diminution of four clerks on his office establishment of 95, and no further reduction could safely be made. He considered that the new Control System would probably increase rather than diminish the work in the Account Branch, in consequence of the adoption of the system of unclassified accounts being rendered by the Controllers. As the Chief Auditor had recently stated that not above one clerk could be reduced on his side of the department, Mr. Milton does not believe that any reuniting of the two branches could enable the authorities safely to reduce the total numbers. Moreover the numbers had not been increased by the separation in 1865; and Lord Hartington's Committee had recorded their opinion, after receiving the evidence of the Accountant-General and of Mr. Whiffin, that the numbers in the united office could not be reduced. It was therefore clear that the expectation of making large reductions of numbers by reuniting the two branches was mere speculation without any good grounds, as the numbers before the separation were not in excess, and were not increased since the separation took place.

John Milton, Esq.

29 May, 1869.

He added that until the audit or examination of the Army accounts could be taken wholly out of the War Office, and be made a really independent audit, he does not consider that the correspondence or financial control, — authorising special expenditure beyond regulation and framing new regulations—and the examination of expenditure under regulation, or under such special authorisation beyond regulation, can ever be safely made to converge or meet in any one officer below the rank of the Assistant Under Secretary of State.

On being asked whether he could suggest any points of improvement in the manner of conducting the business of the Accountant-General's Branch, he said "No. Lord Hartington's Committee had in 1864 and 1865, fully investigated the manner in which business was transacted in the Account Branch before its separation. They only discovered two defects: 1st. That so large a number as 240 men were under the superintendence of only one officer; 2nd. That the correspondence and examination were not sufficiently separated and kept apart. They introduced improvements which completely removed both these defects; and it was those improvements that would be put an end to, if the scheme that had suggested itself to this Committee were adopted. He can therefore only regard such scheme as a step in the wrong direction."

Friday, 25th June, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK. | The Right Hon. J. STANSFELD, M.P.

W. G. ANDERSON, Esq.

R. H. KNOX, Esq., examined.

Since November 1863, with the exception of a portion of one year, had been entrusted in the Accountant-General's Branch with the preparation and compilation of the annual Parliamentary Estimates.

With the exception of the year just past, had received all his verbal instructions, as to the preparation of the Estimates, from the Assistant Under Secretary, who received his from the Secretary of State.

During the year just past, had received his instructions mainly from the Secretary of State himself, the Parliamentary Under Secretary, and the Permanent Under Secretary.

Explained briefly the functions discharged by his subdivision of the Accountant-General's Branch, both in reference to the check exercised in the preparation of the Estimates, and in regard to watching to some extent the progress of the expenditure.

In the old War Office the Estimates were not prepared in the Accountant-General's Branch, as it was found, by experience, that it was necessary that the person who worked out the basis of the Estimates, viz., the Regimental Establishments and Distribution of the Troops, was the only one who could satisfactorily watch the progress of the Estimates, so as to secure that it presented one homogeneous whole. This was thought to involve the consideration of questions which were administrative rather than account, and the work was always done in the Chief Clerk's Branch.

R. H. Knox, Esq.

25 June, 1869.

At that time, however, the financial questions of Check, Control, Audit, Appropriation, and Account, were not considered of so great importance as the various well-known Parliamentary Commissions and Committees have since made them, and the Estimates were, for the most part, then prepared without bearing these important points so fully in view. Further, when the great Department of the War Office was created, it consisted of several *quasi* independent Departments brought together, and the Accountant-General's Branch was the only one which had the means of taking one comprehensive view of all expenditure.

For these reasons, notwithstanding that some portion of the work is administrative, the duty of preparing the Estimates was transferred to the Ac-

R. H. Knox, Esq.

25 June, 1869.

countant-General, and was defined in the memorandum of 24th June, 1862, an extract from which is annexed (A.)

This transfer was made on the recommendation of a Treasury Committee, and approved by the Committee on Military Organization of 1860, to whose report the recommendation is appended.

The course adopted in the preparation of the Estimates is as follows:—

The Secretary of State determines the policy of the Estimate, *i.e.*, whether it shall show a reduction, or, to meet some emergency, an increase, or shall remain unaltered.

There is then submitted to him the Distribution of the Force at Home, and at the several Colonial Stations and in India. If any alteration therein has been contemplated, the Colonial Office, India Office, and Home Office, are consulted, and in the main unofficially.

When this distribution is fixed, which to a great extent affects the individual establishments of Regiments, then these establishments are tested financially in various ways, in order to arrive at the numbers of men and horses required, and approximately to work out the contemplated total of the Estimate. The Regimental Establishments are finally settled in communication with the Commander-in-Chief, in order that they may meet military demands as far as possible. Each individual Battalion has an establishment fixed for it for the year, and these lately have varied very much.

When the distribution and number of the force are agreed on, such details respecting them as are required by the several departments of the War Office for the preparation of their Estimates, are communicated to them, and it then becomes the duty of the Estimate Branch to see that all Estimates affected by these two points are prepared in accordance with the instructions issued by it.

Mr. Knox then read the circular instructions annexed (B), signed by Lord Longford, which were issued in 1866, and show the manner in which these details of the Estimate are worked up and checked.

The principle of this arrangement was to make the annual Estimate, which was approved for each station by the Head of the Executive Department, the authority for the Accountant-General or Chief Auditor for passing expenditure, whose duty it should be to point out to the Executive Department any charges made in the accounts which were not duly provided for in the Estimates; and that thus they might be in complete accord as to the progress of expenditure. Owing to the frequent changes both made and contemplated in the War Office since that time, and the uncertain condition of the position of Accountants, this has never fairly or systematically been carried out.

All the forms on which the Estimates are called for from out-stations are drawn out or approved by the Estimate Subdivision, in order that the details may work up to the financial requirements of the form of Estimate approved by the Treasury.

The estimate for the pay of the army, which is a simple though very laborious multiplication of the number of men and regiments into the rates of pay fixed by Warrant, is prepared in the Estimate room. No arrangement could be so convenient; and so long as it is not prepared in the Executive Department (which in this case would be the Horse Guards), it does not need any further check than as a calculation.

There is nothing incongruous in entrusting this work to that branch of the War Office necessarily most practised in the manipulation of these details, which is the Estimate Subdivision of the Accountant-General's Branch.

There is no necessary connection between this work and the administrative duty of fixing or altering from time to time the rates of pay and allowances of the Army and Civil Departments. Neither as a matter of convenience or principle does such a duty necessarily fall within the functions of the Accountant-General, now that the accounts are not examined by him. A branch might be formed to take up these duties, but it should be comprehensive, and should apply to the whole Army and Departments.

It is part of the duty of the Accountant-General to watch the fixed establishments of the Army. Since the granting of commissions to the officers of the various Executive Departments, this has to a great extent been transferred from him to the Gazette room, which Subdivision (as it is independent of the Departments making the appointments) is a sufficient check. This branch receives information as regards the numbers of the several Establishments, from the Accountant-General's Branch, and sees that no excess arises. The duty of watching the Establishments of such Departments as are partly civilian still remains with the Accountant-General. In order that a complete check may remain with the Accountant-General, he would suggest that the appointments proposed to be Gazetted be in some manner checked in the Accountant-General's branch.

It is the duty of the Estimate Subdivision to narrowly watch the number of officers of the principal Establishments proposed to be voted, and to see that no increase is made without the necessary authority, and that such reductions as may have been determined on have been carried out.

Estimates for stores and works were always dealt with by the Assistant Under Secretary, and their details never examined by the Accountant-General. All that the Estimate Subdivision required was the approval of the Assistant Under Secretary for the insertion or alteration of any item.

The Estimates for the Militia, and for other Reserve Forces, are very simple; although now much more than heretofore dependent on the numbers determined to be maintained for the Standing Army.

The establishments for all the reserve forces, except the Volunteers, are fixed, and after ascertaining by returns, and in consultation with the Inspector-General of Reserve Forces, the numbers below the fixed quota which it is advisable should be maintained, a deduction is made from the full charge for pay, and the other charges are adjusted in proportion. This has hitherto been done in the Estimate Subdivision.

So soon as the numbers and effective votes have been approved by Parliament, the Commander-in-Chief is informed officially of the Establishments to be maintained for the several Regiments, and is requested to take the necessary steps to maintain them, and the Controllers at the Foreign Stations are informed of the amounts which may be expended in each command abroad. The form of letter to the Controller is appended (C).

Hence arises the duty discharged by the Estimate Subdivision of watching the progress of recruiting, which is done by means of returns rendered monthly by the Horse Guards. This is a matter of great simplicity, with the exception of the recruiting for the Indian Depôts, the Establishments of which, since the adoption of the system of payment by India by means of a capitation rate, may be said to have been experimental; this question is now under the consideration of a Committee.

The main difficulty which exists in the way of accurately watching Army expenditure is the fact that so great a portion of it takes place abroad.

The mode in which this expenditure is restrained is laid down in the "Outline of Plan" issued in 1857. An extract is appended (D).

Mr. Knox had proposed, in order to make an advance towards a more complete knowledge of our expenditure, that throughout the Army Estimates the Colonial expenditure should be as far as possible separated from the Home expenditure; and that monthly abstracts of the amounts expended in each foreign command under the principal heads of the Estimates should be sent home by the Accountants; thus, by obtaining the earliest possible information from abroad, it would be an easy matter to ascertain the total expenditure, as that at home could in the main be readily ascertained.

A proposal had been lately made to abolish these

monthly returns of foreign expenditure, but had not finally been determined on.

The mode in which the expenditure for works is authorized, the frequent changes made, and the supplementary works sanctioned, make the financial control of the expenditure on works by means of the authorization sent to the Controller somewhat uncertain, and this is aggravated by the system of expenditure for unforeseen services.

He suggested that:—

1. In future no sum should be provided in Part I of Vote 14, to meet unforeseen services, but that (if any provision were made at all) a margin might be left in the items of Parts II. and III.

2. Every Officer Commanding on sanctioning any expenditure for an unforeseen service should meet the expense by suspending or postponing expenditure for other works pending the receipt of instructions from the Secretary of State, who would grant a supplementary credit, if necessary. Such a restriction would remove from the General Officer a power which he now possesses, greater than that of the Secretary of State himself, viz., that of sanctioning additional expenditure without at the same time meeting it by corresponding economy.

3. No works should be provided for under the title of Special Services, *e.g.*, gymnasia, gas fittings, commercial harbours, &c., but the larger works of more than 1,000*l.* should be shown distinctly as separate works in Part I., and the smaller under their proper stations in Parts II. and III., a supplementary statement might still contain the information now given, viz., the total expenditure for these services.

In watching the progress of expenditure, and in giving his opinion as to any proposals to redistribute the expenditure as provided in the Estimates, the Accountant-General is performing one of his main functions as financial officer of the department.

In order to form a clear idea of what this financial control is, it will be as well to consider what check or control is by law established over expenditure.

Parliamentary control is exercised:—

1. By narrowly criticising the details of the Estimates; and voting them on the understanding that an appropriation account under each separate item be rendered to the House of Commons.

2. This appropriation account is checked by an independent department, and is laid before Parliament with an explanation of all excesses.

3. These excesses the Secretary of State is unable on his own responsibility to sanction; and it is necessary that the authority of the Treasury be obtained; the Secretary of State at the same time pointing out from what savings he can temporarily defray the expenditure.

4. They are subsequently submitted to Parliament to be voted, and so far as the savings upon the total of the Estimates are sufficient to meet them they are applied for the purpose.

The Secretary of State has no power to increase any of the fixed Establishments of the Army, their rates of pay, allowances, or salaries, without the sanction of the Lords of the Treasury.

Unfortunately, the rule as to the necessity for Treasury sanction has been from time to time variously interpreted, and a clear and complete law on the subject, thoroughly understood by both departments, is much required. Hitherto reference to the Treasury has been frequently much over-done; and again, in cases affecting large expenditure, which by an effort we might have foreseen, it has been omitted.

It is the function of the Accountant-General to see, so far as the means at his disposal allow, that all these financial rules, and such as may be laid down by the Secretary of State himself as the limit of the powers of the executive officers below him, are complied with. He thus simply follows out the function performed by him, in the first place, in the preparation of the Estimates.

This check upon the proceedings of the various executive branches is not in any way expressive of distrust in them; and, as part of a great system, shows no more want of confidence in the heads of the executive departments than the necessity for voting supplies in detail, and the independent audit shows, in an invidious sense, a want of confidence in the Secretary of State.

R. H. Knox, Esq.
25 June, 1869.

Appendix A.

Preparation of the Estimates.

The Annual Estimates to be laid before Parliament will be prepared, under the directions of the Assistant Under Secretary of State, by the Accountant-General, who is empowered to call upon the Heads of Branches, Departments, or Establishments, to furnish such documents and statements as he may require.

He will prepare the estimate of the sum required for pay, allowances, and other charges, according to the number of the effective force to be maintained during the year, calculated at the rates fixed by Royal Warrants.

He will see that no new charge is inserted in the estimates, unless it has been approved of by competent authority.

He will see that the estimates are prepared for presentation to Parliament, in accordance with those which have been transmitted to and approved by the Treasury.

He will see that no alteration in the classification of services in the Army Estimates is made without the sanction of the Treasury.

He will prepare such information as may be required by the Select Committee of the House of Commons for the preparation of the Estimates of the charge of the Disembodied Militia of Great Britain and Ireland.

6448
716

Appendix B.

In order to establish as complete an understanding as possible between the Administrative and Account Branches in the preparation of the Annual Estimates for Establishments and other regulated expenditure, the Secretary of State has approved the following course of procedure:—

1st. In the month of September the Accountant-General will request the Heads of the several Departments to call for the Estimates for Establishments and Expenditure under regulation from the several out-stations *at Home*.

The Heads of Departments will inform the Accountant-General (Estimate Room), when they have done so, of the stations from which Estimates will be rendered.

2. The Heads of Departments will as early as possible fix the distribution of their Permanent Staff for the several stations for the coming financial year, in order that it may be communicated to the Accountant-General, as each Estimate is forwarded to be checked.

3. The several Estimates, when received by the Department from the out-stations will be sent to the Accountant-General (Estimate Room), to be checked with the authorized expenditure; this will be done forthwith, and they will then be returned to the Heads of Departments with any necessary observations.

4. The Estimates from Foreign Stations, when received by the Accountant-General from the Comptrollers, will be dealt with in a similar manner with the Home Estimates.

5. The several Departments will make those modifications which they may consider necessary on each separate Estimate, but, if changes requiring special authority are contemplated, they should be submitted in the ordinary course, being as usual, in the first place, referred to the Accountant-General.

6. Each Estimate as modified will be abstracted in the Departmental Branch on separate forms for Home and Foreign Service as required by the Estimates, and then immediately forwarded to the Accountant-General (Estimate Room). Every item to be included should be distinctly shown on each Estimate. Any question that it may be necessary to have settled will then be raised by the Estimate Room.

7. So soon as each *Abstract* is complete (the Foreign Services being separated from the Home), it will be forwarded to the Estimate Room, where it will be checked with the Station Estimates previously approved, and returned to the Heads of Departments to be submitted for final approval to the Under Secretary of State.

Longford.

Appendix C.

War Office,
Sir, *London,*_____1869.

I am directed by Mr. Secretary Cardwell to forward you the enclosed authority for the issue from the Treasury

R. H. Knox, Esq.
25 June, 1869.

Chest of sundry sums to defray the charge for Army services within the command for the year 1869-70, and at the same time to acquaint you that such authorization is based upon the intention of Her Majesty's Government to maintain in the command the number of troops detailed in the margin. Should it therefore at any time occur that this force is altered by the withdrawal or addition of any corps, I am to request that you will at once acquaint me of the financial effect so far as you can estimate it, pointing out in a detailed statement the alterations that will thus be involved in the amounts authorized under each vote.

I am,
Sir,
Your obedient Servant,

The Controller of Army Expenditure,

APPENDIX D.

EXTRACT from "Outline of Plan."

"The Controller may, in case of necessity, upon a representation from the heads of the executive branches, "authorize an alteration of the proportions assigned to the "sub heads *within the aggregate amount of each vote*, as "allotted to the station, but he will immediately report "every such alteration to the Secretary of State, together "with a full explanation of his reasons for authorizing it. "In the case of Engineer works the total estimate of each "particular work is not to be exceeded.

"The warrant of the Officer Commanding must be obtained by the Controller for any expenditure which is "*beyond the gross credit for any vote*, or which is not in "accordance with the established regulations, and the "whole of the circumstances must be immediately reported "in detail by the Controller for the information of the "Secretary of State."

Tuesday, 27th July, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK. | The Right Hon. J. STANSFELD, M.P.
W. G. ANDERSON, Esq.

Colonel W. F. DRUMMOND JERVOIS, C.B., R.E., examined.

Col. Jervois, C.B., R.E.
27 July, 1869.

Did not think the present Engineer Committee at Chatham was altogether a satisfactory body. The questions referred to it were too much left to be taken up and considered by either the President or some member of the Committee individually, and there was a want of some element in it to give regularity and unity to its proceedings, and to record and circulate among the officers of the corps much useful information in the shape of results of experiments.

He was also dissatisfied with the way in which Artillery experiments, which affect the construction of works of defence or attack, were sometimes carried on without reference to the Engineering side of the question.

As a remedy for both of these defects he proposed that there should be a paid member or Secretary to the Engineer Committee, who should be also an *ex officio* member of the Artillery Committee whenever experiments were carried on, or questions considered which in any way related to the duties of the Royal Engineers, or affected the construction of works of defence. This officer would make his own report to the Head of his Department in the War Office on any such experiment or question. Shoeburyness should be a common experimental ground for both, and each arm should report to the Head of its own Department. There should also be an interchange of such reports between the Artillery and Engineers.

Objected to placing the Engineer Committee under any officer who might be appointed as Director of scientific experiments generally.

Admitted that there were some advantages in a central record of experimental questions, in which the Engineer and Artillery bearings of a question would both be kept in view, but did not think it the best organization for securing the objects which ought to be kept in view.

A Director of Experiments, if an Engineer officer, would have to deal with inventions, &c., relating entirely to the Artillery Branch of the Service, and on the other hand, if he were an Artillery officer, would either not be sufficiently alive to the importance of Engineering questions, or if he were, would probably form an opinion upon them not based on practical experience.

The Engineer Department being charged with devising and constructing works of fortification, and in providing other means of defence, such as submarine mines, &c., &c., should have the means of carrying out experiments conducted by its own officers, and with such substances as it may be called upon to use in practice. For instance, to carry out mining operations effectively, it is essential that experiments with gunpowder, gun-cotton, and other explosive substances should be carried on at the Engineer School at Chatham. It was essential, he thought, to the harmonious working of an office that each Department should have its work clearly defined and kept distinct.

In the old Ordnance Select Committee, although it had an Engineer officer as one of its members, he was often not at all satisfied with the way in which mixed Artillery and Engineer questions were treated.

His objections to a central orgnization for experimental questions would be met if, instead of a Director of Experiments, a Board composed of the Director of Works, the Director-General of Ordnance, and the Naval Director-General of Ordnance, with a Secretary, under the presidency of an Under Secretary of State, was constituted.

He attached great importance to the presence of a Naval officer on any such Board.

APPENDIX No. III.

MINUTES OF EVIDENCE

TAKEN

BEFORE THE WAR OFFICE COMMITTEE.

Wednesday, 13th October, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK, *in the Chair.*

Lieut.-General Sir EDWARD LUGARD, G.C.B. | The Right Hon. JAMES STANSFELD, M.P.

Lieutenant-General WILLIAM FREDERICK FORSTER, K.H., examined.

Lieut.-Gen. W. F. Forster K.H.
13 Oct. 1869

1. (*Chairman.*) How long have you filled the position of Military Secretary?—Upwards of nine years.

2. We should like to go through this paper,* which gives an account of the business conducted in the Military Secretary's Department, as there may be a few points upon which we should wish to have some further explanation. What position does Colonel Johnson, Assistant Military Secretary, occupy with respect to you?—He is there to aid and assist in all the affairs connected with India and the Indian Army; he is not paid by the Imperial Government.

3. Does he assist you in respect of the other business of the Office?—Of course he gives his assistance whenever it is required; but he is there for the purpose which I have mentioned. A great number of references are required connected with the Indian Army, and he, having had very great experience, is very useful to myself in aiding and assisting in all military matters.

4. Will you look at the first page of the paper, and No. 2 of the detail of the duties of the "Confidential "Department." What sort of new subjects does the "initiatory action" refer to?—All those which are out of the ordinary routine of official correspondence, or which would entail any alteration in existing arrangements, in which latter case they would become new and alter in their character.

5. Going on to Nos. 3 and 4, the subheads *a*, *b*, and *d*, of No. 3, and subhead *b* of No. 4, all relate to questions of appointment and promotion?—Yes, in one sense, but distinct from the ordinary Army appointments and promotions, as detailed in the duties of the "Promotional Department," with the exception, however, of that part of 4 *b* relating to the "Establishment of the Army" and "the Interchange of "Regiments."

6. Can you tell us generally what records are kept with respect to those matters?—The system pursued is generally this, that the Commander-in-Chief selects individuals for a regiment, and he then communicates with the Secretary for War. If the Secretary for War concurs, the name of the officer is submitted to the Queen.

7. I did not mean to touch upon that part of the business, but to ask what records or books are kept with respect to these honours and promotions, as part of the Military Secretary's work?—Books, &c., in which recommendations and the names of all applicants for such appointments and rewards are noted; records also being kept of all matters appertaining thereto, so that when required every information may be forthcoming with as little delay as possible.

8. It is, in point of fact, the correspondence, and a list of the applicants?—Yes, with the addition specified in my last answer.

9. Under the subhead *c*, of No. 3, "matters of a pri-"vate nature, such as officers' grievances," are included; what kind of questions are those grievances?—The grievances more particularly referred to are the representations (often involving much correspondence) frequently made by officers who consider that their services have been overlooked, or that they have not been sufficiently rewarded, or when they may conceive that they have reason to complain. I may, moreover, add that the officers of the Army probably are not generally instructed as to the views of the Secretary of State for War; for instance, at the present moment, when a regiment returns from foreign service, it is put on the English Establishment. We will say that two Captains are reduced, and must

* See "Statement of Business conducted in the various Departments under H.R.H. the Field-Marshal Commanding-in-Chief," Appendix No. IV.

Lieut.-Gen. W. F. Forster, K.H.

13 Oct. 1869.

be transferred to other regiments, the senior Lieutenants of which may happen to have been absolutely longer in the Army than the very men put over their heads, thus creating a grievance to a Lieutenant of 14 or 16 years service, who has naturally looked forward to promotion.

10. Then the grievances are connected with promotion?—Not exactly; as explained in the first part of my last answer, as the grievances therein alluded to are dealt with separately, those referred to in the latter part forming a portion of the correspondence incidental to the "Promotional Department." Of course all grievances regarding discipline belong to the Adjutant-General.

11. Under No. 4, subhead *a*, "General Courts-Martial," what business connected with General Courts-Martial is done in the office of the Military Secretary?—The whole; the procedure being as follows:—So soon as the proceedings of the Court have been received from the Judge Advocate-General, they are submitted by the Military Secretary to the Commander-in-Chief, who, after careful investigation, issues such instructions thereon as he may consider the different cases require, with the view to the whole of the sentence, or a modification thereof being carried into effect. A submission embodying the charges, finding, sentence, &c., and the recommendation of the Commander-in-Chief is then made to Her Majesty for authority to give effect to the decision or otherwise of the General Court-Martial. Upon receipt of Her Majesty's approval, communications are made to the General Officers in whose commands the Courts-Martial have been held, and in the cases of penal servitude also to the Crown Office and War Office, or to the Chief Secretary and Lord Chief Justice in Ireland, as the case may require. The usual digests of the Courts-Martial are then transmitted to the Adjutant-General for his perusal, and the proceedings returned to the Judge Advocate-General, in whose custody they remain.

12. Under subhead *b*, of No. 4, "The Interchange of "Regiments (India and the Colonies)," what portion of that business is done in the office of the Military Secretary?—So soon as it has been decided to remove Regiments from one command to another, a letter is written to the War Office by the Military Secretary, with the view to the Secretary of State's concurrence being obtained thereto, upon the receipt of which a submission is made to the Queen, and upon its return to the Commander-in-Chief, with Her Majesty's approval, notifications are made to the several departments of the Army.

13. Is the work under Nos. 5, 6, and 7 heavy, that is to say, the work of "copying letters for the Com-"mander-in-Chief, the preparation of the lists for the "levées, and the preparation of the schedules of all "papers submitted to the Commander-in-Chief when "absent from London"?—Yes; it is certainly heavy, but it is only periodical. I have a levée every Tuesday; the Duke has one about every three weeks, or every month.

14. They are convened for the purpose of seeing officers who wish to represent their cases?—Yes; it is heavy work in this respect: sometimes a levée consists of 180 to 200 officers, and all their representations must be attended to and answered; those which cannot be answered *viva voce* on the spot entail a vast deal of correspondence.

15. Going on to the next branch, namely, the General Correspondence Branch, will you explain the first two subheads at the bottom of the page, first, "Passages or Allowances for Officers proceeding to "India and the Colonies," and secondly, "The liabi-"lity of Officers to pay for Passages of successors on "retirement or exchange, and the obtaining and dis-"posal of the sums required from them"?—There is a great deal of correspondence upon that point. When passages are required for officers proceeding to India, we correspond with the India Office; but for all other stations abroad application is made to the War Office.

16. (*Sir Edward Lugard.*) Does not the Quartermaster-General also apply for passages?—Yes; in some cases. I have prepared a Memorandum on the subject of passages, which I hand in;—

MEMORANDUM on the course adopted at the Horse Guards in providing passages for officers proceeding abroad.

1. When officers apply to exchange or retire from regiments stationed in the Colonies or India, steps are taken by the Military Secretary to call upon them to lodge, or to retain from the proceeds of their commissions, a sufficient sum to defray the expense of their successor's passage; and these sums remain in the hands of the agents until the successors have proceeded, when they are appropriated to defray the cost of their conveyance to their distination.

2. Officers are placed under orders to join their regiments, or the staff abroad, by the Adjutant-General, who applies to the Military Secretary for a passage, or an allowance in lieu thereof, in each case stating the succession in which the officer is proceeding, or the circumstances under which he came home, as recorded in the returns in his possession. This statement has, in some cases, to be supplemented by additional information obtained from the exchange or sale papers in the Military Secretary's Office, and when complete it is forwarded to the War Office, if the officer is proceeding to the Colonies; or to the India Office if going to India, except in cases where the Indian Government is not liable for the charge, when the War Office provides the allowance or passage, and the cost of it is recovered by the Military Secretary from the predecessor and credited to the public. A similar course is adopted in respect to Medical Staff Officers, for whose passages application is made by the Director-General of the Army Medical Department.

3. In those cases where the War Office sanctions the provision of a passage, a notification is made by that department to the Quartermaster-General, authorising application being made to the Admiralty for a passage, and the officer is instructed by him to embark accordingly. He reports the embarkation to the Adjutant-General. If the predecessor is liable, the Military Secretary is instructed by the War Office to recover and credit the cost of the passage to the public.

4. If an allowance in lieu of passage is granted, the War Office notifies the same to the Military Secretary, who informs the Adjutant-General by whom the officer is ordered to engage his passage, and produce a certificate that he has done so, to enable him to draw the allowance from the Accountant-General of the Navy.

5. The India Office, whether providing passages in Her Majesty's Indian troop-ships, or granting allowances, notifies the same to the Military Secretary, who informs the Quartermaster-General in the former, and the Adjutant-General in the latter case, that the officers may receive their orders accordingly.

6. In cases where officers are provided with passages in Her Majesty's ships, and whose predecessors are liable for the cost of them a messing contribution of 4*s.* a-day only is charged, and credited to the public, on a notification to that effect from the War Office. The same course is adopted in the case of officers proceeding in charge of drafts.

7. The Passage Warrant (2nd January, 1865) regulates the conditions upon which free passages are granted to officers, and when they are to be paid for by their predecessors. A fixed sum, more than sufficient to cover the expense, is in each case retained or recovered from those who are liable for this charge, and when the actual extent of their liability is ascertained, the cost to the public is credited to the War Office, and the balance refunded to them. Frequent appeals against these liabilities are made by officers, and they are always decided by the terms of the Passage Warrant, but in all doubtful or exceptional cases the decision of the Secretary of State for War is obtained by the Military Secretary.

Horse Guards, W. F. FORSTER.
20th October, 1869.

17. (*Chairman.*) What sort of "claims and repre-"sentations against officers" are dealt with by the Military Secretary?—Young gentlemen will be fast, and they will run into debt; tradesmen complain that officers have gone abroad on service without settling their debts, and sometimes discreditable proceedings are reported, which require investigation.

18 Do you correspond from the Military Secretary's Office with the officers upon the subject?—We send the communication to the Commanding Officer of the regiment, or to the General Officer of the district, according as is thought necessary.

19. Then the correspondence upon that subject takes place in the Military Secretary's Department?—Yes.

20. (*Sir Edward Lugard.*) And not in the Adjutant-General's Department?—I do not know what the Adjutant-General may do, but it is supposed to come to me. I suppose that it does so from the number of references which I receive.

21. (*Chairman.*) As to the "inspection of the Yeo-"manry Cavalry and Militia," what are your duties?—I am informed by the War Office when each regiment is to be called out for training, and I then call upon the Adjutant-General to select and order an officer to inspect the regiment, and I forward his name and his report upon the corps to the War Office when it is received. As to the next subject, namely, applicants for service in Commissariat and Store Departments, I think that is pretty nearly at an end.

22. That may be omitted?—It is much less than it used to be.

23. What have you to transact with respect to "claims to allowances for special or extra service"?—Representations are received that officers have been specially employed, or called upon to perform extra duties, or that their allowances are inadequate, and if the Field-Marshal Commanding-in-Chief considers them to have claims to special allowances or additional remuneration, he submits them for the approval of the Secretary of State for War.

24. With reference to the "registering the general "correspondence": is this a General Registry of the Military Secretary's Department?—No; only for the miscellaneous correspondence conducted in that branch, excluding that in the Confidential, Promotional, and Ordnance Branches. I can only quote this as the opinion of my predecessors, some of whom were very clever men, that a General Register for all matters was never considered practicable, and has therefore never been established.

25. Looking at this account of the business of the Commander in Chief's Office, there does not appear to be anything more confidential in one branch than in another?—There are a great many matters of a *confidential* nature, which it is most desirable should be known to as few persons as possible, and which I should look to the Head Clerk, or to some other confidential person in the department, to carry out.

26. With the exception of the confidential work, this register would, I presume, include all the Military Secretary's papers?—Yes; I cannot say that it admits of the name "register," but all I can say is, that we can refer to the correspondence.

27. But you have no difficulty in getting any papers which you want?—Not the slightest.

28. Going on to the "Promotional Department," which is the next on the list, No. 1 Room seems to perform what I may call the routine duties connected with promotion in working out the vacancies, and the length of service, and such like?—Yes; in all promotions and all exchanges there is a regular *précis* made out of the claims, and so forth, of the individuals. Sometimes the persons have not been examined, and they cannot be promoted; sometimes they have not served a sufficient length of time compared with others. The efficient performance of the work of this room, which embraces the entire system of appointment and promotion in the Army, requires great care and experience, and a thorough knowledge of the Royal Warrants and Regulations of the Service.

29. With respect to the charge of the "Reserve "Fund Account": what business is transacted in the Military Secretary's Department with regard to the Reserve Fund?—There are certain commissions, with regard to which, when sold, a portion of the money is not given to the individual. They allow, I believe, 100*l.* for each year abroad, and 50*l.* for each year at home. We will say that a man's commission as a Captain may be worth 1,800*l.*, that is the price of it; if he has only served, for instance, 12 years or 14 years, and wishes to retire, the Secretary for War allows him a certain sum of money, and the rest goes to the Reserve Fund.

30. Then the business of the Military Secretary's Department would be to take care that an officer does not get more than he really should get?—That we should do. The War Office decide what sum he is to get, but we keep a debtor and creditor account with the agents.

31. That is to say, with Messrs. Cox and Co.?—Yes.

32. You take care that that account is properly kept?—Yes; and it is all sent in to the War Office. *Lieut.-Gen. W.F. Forster, K.H.* 13 Oct. 1869.

33. As regards Room No. 2, what is the amount of the correspondence?—It is enormous.

34. This is the corresponding branch of No. 1?—In this room the letters connected with the general business of the Promotion Department (exclusive of correspondence relative to the admission of candidates to the Army, carried on in room No. 3) are prepared for my approval and signature.

35. With respect to the 4th subhead of the business transacted in this room, what questions come to you connected with the mess and band contributions?—An officer is appointed to one corps, and he does not join that corps; then, in consequence of his not having joined it, he alleges that there is sufficient reason for him to be relieved from the subscription. There are frequently more complicated cases connected with transfers and removals which have taken place for the good of the Service.

36. (*Sir Edward Lugard.*) Are not the mess and band funds under the Adjutant-General?—We have nothing to do with the mess and band fund: we always answer the letters, because we know what the rule is, that if a man does not join the regiment he cannot be called upon for any subscription whaever.

37. That you notify to the Adjutant-General?—The correspondence is in my department, but in many cases the Adjutant-General is referred to for his opinion and report.

38. (*Chairman.*) But the correspondence would be in your department?—Yes.

39. With respect to the 5th subhead, the "appoint-"ment, promotion, and retirement of Medical Officers, "and their transfer from one station to another," what is the practice?—All appointments, promotions, and retirements of Medical Officers are submitted to His Royal Highness by the Head of the Medical Department, but the correspondence necessary to carry out the decision is conducted in my department.

40. Respecting the change of station, what part of the business would be done in the Military Secretary's Department?—All changes of station of Medical Officers are submitted by the Director-General for His Royal Highness's approval, and I then convey the necessary orders to the Officers Commanding the stations concerned.

41. In respect of Room No. 3, the first and second heads, "Direct Commissions" and "Sandhurst," deal with the educational matters which come under the Council of Military Education?—The Council of Military Education has only to deal with these heads so far as the actual examination. I forward a list of the candidates to be examined, and after the examination the Council sent back two lists in each case: the successful and the unsuccessful. With regard to "Direct Commissions," the successful candidates are appointed to the Army in rotation according to the number of marks obtained; and with regard to "Sandhurst," the successful competitors are ordered to join the College in due course. All correspondence on these heads, as well as the general correspondence connected with the Royal Military College, is conducted in room No. 2.

42. I mean subsequently to the first ordering up of gentlemen for examination?—As I have just explained, the Council of Military Education only deal with the examination.

43. (*Sir Edward Lugard.*) And you communicate with the parents?—The lists of successful competitors are published in the newspapers, and I communicate with the parents of those who fail.

44. (*Chairman.*) In Room No. 3 there seems to be a great deal of noting in books; is that with reference to books kept in other rooms?—No; the books kept in this room are separate lists of officers of all ranks who are applicants for promotion of any kind, restoration to full pay, staff employment, good service pension, &c., and of non-commissioned officers who are recommended for promotion, &c. The lists of candidates for "Direct Commissions" and "Sandhurst" are also kept in this room.

45. Is it considered that the rooms are inconveniently

Lieut.-Gen. W. F. Forster, K.H.

13 Oct. 1869.

situated?—They are not convenient to me, because many of the clerks are obliged to be located in rooms on the ground floor on the opposite side of the archway. I think that there is no room in my branch which has more than six gentlemen in it, but of course the nearer the clerks are to you, and the nearer you are to your work, the quicker it is done.

46. There does not seem to be any distinct work in Room No. 4, than the work which we have been considering in the other rooms?—This room, in addition to the work done for other rooms, has the care and arrangements of papers connected with the gazettes, of the regimental purchase returns, and of records of officers' services.

47. Will you take the next division, namely, the Ordnance Department, at page 106; is it under you or under the Adjutant-General?—Under me. There is one expression here which I should be very glad to have corrected. There is an expression there with which I do not accord; it is in a paragraph inserted after the duties of this Branch: "The character and duties of the Military "Secretary's Department may be better understood by "explaining that although the Field-Marshal Com- "manding-in-Chief transacts a vast deal of the official "business devolving upon him as head of the Army, "yet His Royal Highness considers the Military Secre- "tary to be Chief of the Staff acting under His Royal "Highness's orders." Now I think that it is fair to observe that the Commander-in-Chief and the Military Secretary are one and the same; only that the Commander-in-Chief gives his orders to the Military Secretary, who conveys those orders to the other Departments. There is no such designation as Chief of the Staff at Head Quarters of the Army. It is another word for the Military Secretary, but with your permission I should like to erase it, because it has been put in by mistake.

48. (*Sir Edward Lugard.*) That was in your handwriting?—I dare say that it was; however, it may be rectified now. I should very much like to see the document. There is no such phrase as "Chief of the Staff" within knowledge, further than the fact that the Military Secretary performs various duties which would devolve upon a Chief of the Staff.

49. (*Chairman.*) Will you be kind enough to send us a paragraph which you think will express that better?—I believe that there has been a transposition in the paragraph

50. Will you turn to page 106, the Ordnance Branch. That Ordnance Branch, I presume, is part of the Military Secretary's Office?—Yes; all matters connected with the Deputy Adjutant-General of Engineers and of Artillery, and all matters connected with those branches of the Service, are submitted to the Military Secretary for the Duke's approval.

51. Do all the papers of the Deputy Adjutant-General of Artillery and of Engineers come to the Military Secretary's Office?—No; they are a different branch. Discipline goes to the Adjutant-General.

52. As respects the Ordnance Branch, the first two paragraphs refer to questions of the same character as the admission to examination for Sandhurst, and the business at Sandhurst?—Yes.

53. With regard to the next two paragraphs—"Appointments and Promotions in the Corps of Royal Artillery and Royal Engineers," and "Appointment of "Commanding Officers of Royal Artillery and Royal "Engineers," the work would be the same sort of work as is done with respect to the Army at large?—Exactly.

54. Going to the next paragraph, can you state what are the "requisitions from the Royal Engineer Establish- "ment at Chatham"?—They comprise all kinds of things, extra allowances, stores, and everything else. There are constant applications; they go through the Engineer branch, and then they are submitted to the Duke, and I submit them to the War Office. Nothing is done without the authority of the War Office.

55. A letter to the War Office is written in your department?—Yes.

56. Do the returns of drafts for India follow the same course as in the drafts for the Line?—Yes; in order that they may be prepared in the same form.

57. (*Sir Edward Lugard.*) Is not that done by the Quartermaster-General?—The Quartermaster-General applies for tonnage when he receives the strength of drafts.

58. (*Chairman.*) With reference generally to the business of the Military Secretary's Office: in going through the return there seem to be some matters of discipline, which should be for the Adjutant-General?—Generally speaking, if an officer, for instance, misconducts himself, it is referred to the Military Secretary to know what is to be done with him, whether he is to be brought to a Court-Martial, or whether the Commander-in-Chief will condone the offence. Then a communication is made to the Commanding Officer of the regiment, according as the matter is decided upon. If there be a Court-Martial it goes to the Adjutant-General, for it is necessary that the Military Secretary and the Adjutant-General should both know of it.

59. But the decision would be taken through the Military Secretary?—Yes.

60. In that case of a Court-Martial, would the finding of a General Court-Martial go to the Adjutant-General or not?—Only for his information, as I have already explained.

61. Subsequently to its going to the Judge Advocate would it go to the Adjutant-General?—No; it would come to the Military Secretary.

62. With respect to other Courts-Martial, would the finding go to the Military Secretary?—No; the finding of District and Garrison Courts-Martial do not come to him, but they go to the Judge Advocate.

63. Would you say that the proceedings of General Courts-Martial would more properly go to the Adjutant-General or to the Military Secretary?—If you ask me that question I cannot tell you why they do not go to the Adjutant-General, but it always has been so, and I do not know the reason why. From time immemorial it has been so.

64. There are other questions of the same class—such as claims and representations against officers; would your opinion upon those be the same?—No; those are pecuniary matters.

65. With regard to passages, and such like; do you think that those questions are properly questions for the Military Secretary to deal with?—I think so, because the Military Secretary often possesses information needful to decide whether the public (either the War Office or India Office) are liable for the cost of the passage to be provided.

66. (*Sir Edward Lugard.*) But could not the papers be passed to him to note?—He receives a statement of the case from the Adjutant-General, which he confirms or completes before the application for the passage is made by him.

67. That is instead of writing a letter to the Adjutant-General, and the Adjutant-General writing a letter to the Quartermaster-General?—We do that as little as possible. The Adjutant-General certainly does write to ask for these passages, but the way in which I have managed, whenever further information or inquiries are necessary, is merely to turn back the paper, and to refer to the Adjutant-General, where it is necessary to have his opinion. There are a great many cases in which the matter is done *vivâ voce*, and his opinion is taken.

68. (*Chairman.*) Do you correspond with the Adjutant-General by letter?—No; but they send me documents for my information.

69. (*Sir Edward Lugard.*) They send memoranda?—Yes.

70. (*Mr. Stansfeld.*) But is there not correspondence as well as the mere passing of memoranda?—No; the communications are generally *vivâ voce*.

71. Do you not inform them formally, in the shape of a letter?—They have nothing to do with my business; they are informed by the "Gazette" mostly of that which they want to know, and which is their authority for everything. I refer to all promotions and appointments; upon all appointments to the Staff, and so forth, I take the Duke's pleasure he having sent it to the

Secretary for War, and whe the answer comes, those appointments are communicated to the heads of departments.

72. Then it does not occur that you inform the Department of the Adjutant-General or the Quartermaster-General of the results of any communications of theirs which have passed through you either to His Royal Highness, or to the War Office?—Anything which it is necessary for them to know of course I communicate to them.

73. In the shape of a letter, or memorandum?—By memorandum.

74. I understand that as far as you can you avoid the formal and wasteful process of letter writing, and transact as much business as you can by reference papers, and by memoranda; but I imagine that there must be a certain amount of formal correspondence between your Department and the Department of the Adjutant-General?—It is all managed by reference papers and memoranda.

75. It is generally done by memoranda, rather than by formal correspondence?—Yes.

76. (*Chairman.*) Have you looked at the statement in this paper of the business of the Adjutant-General's Office?—No.

77. Will you have the kindness to look at it at page 108 of the return, because there would appear to be some duties done in the Adjutant-General's Department which are also done in the Military Secretary's Department; for example, applications for passages?—I think you will find that explained in the paper I have given in on this subject.

78. Again, on page 109, the "statement of Officers' services for promotion and retirement," &c., would appear to be part of the Military Secretary's business?—No; I am obliged to refer, because the Adjutant-General keeps the records of all officers' services, either abroad or at home.

79. Then, on page 110, there is "Courts-Martial, "Courts of Inquiry, and Questions connected with "the Mutiny Act and Articles of War"?—They are all ordered by the Adjutant-General; he has all the detail of them; he looks to the General Officer who commands the station.

80. Then, again, there are "Mess Regulations for "Officers and Men, and Questions and Disputes con-"nected with the Mess and Band Funds?"—Those are questions in dispute; my duty is only limited to officers who have been relieved from a payment. That would be all referred to the Adjutant-General as being part of the interior economy of the regiment.

81. Then again there is the "Inspection of Militia, "Yeomanry, and Pensioners, after Annual Training"?—I send the papers which I have received from the War Office to the Adjutant-General, for him to carry into effect the orders of the War Office.

82. With respect to the confidential reports of regiments, would those come to you?—No, they go to the Adjutant-General, and the Adjutant-General takes the Duke's pleasure upon them; and if there is anything with regard to officers not being recommended for promotion, or officers being reported upon as inefficient, further steps are taken.

83. Would those confidential reports be noted in the Military Secretray's Office?—No, I only get the extracts, but it is necessary for me to have them.

84. (*Mr. Stansfeld.*) Will you turn to page 102, No. 6, the Clerks' work with reference to the Commander-in-Chief's, and the Military Secretary's levées; can you say approximately what amount of clerks' time is taken up by that work?—I can tell you the process, which is this, that officers write to request that their names may be put upon the Duke's list; then there is a book, and their names are entered in that book, and when the Duke has held his levée, all these different subjects, and different individuals are considered.

85. How would their cases come upon record?—By the Duke stating in the margin what they said.

86. Can you give us an idea of the amount of clerks' time which that would take up?—I really do not know; it comes in the general business of the office; it is probably not a specific duty, but it is one of much importance, requiring considerable care and accuracy, and often involving circumstances of a private and confidential character.

87. If, for the sake of measuring it, you were to throw it into clerks' time, it would be a moderate portion of some clerk's time?—That is done entirely by the clerks. I could make enquiry, but I cannot give you an approximate idea. The Duke sometimes has 180 or 200 people, and it takes some time.

88. There would not be 180 cases to note would there?—Certainly; there is a list of the individuals; opposite their names is the case as represented to the Duke, and what he wishes to be done with it.

89. And the Duke's notes would be copied?—Yes, and His Royal Highness's remarks and instructions very frequently entail reports and much subsequent correspondence.

90. In Room 4, at page 106, the last paragraph is: "During each Session of Parliament, one or other of "these clerks is employed constantly in making out "returns for the House of Commons and the War "Office; and assistance has to be given to other rooms "during absence on leave, or pressure of work, in the "form of copying correspondence, writing, entering "and dispatching letters"?—A great number of returns are called for during the sitting of Parliament, and it is a very onerous part of our duty, it takes up a vast deal of time to compile them.

91. So that practically it employs, during the Session, one clerk constantly?—Yes; and he gets a great deal of aid besides.

92. Does the last paragraph refer to Room 4; does it mean that besides the duties enumerated as appertaining to the clerks in Room 4, they give assistance to other rooms during absence on leave?—Certainly, they make up the deficiency. For instance, two men in the same room may be entitled to their two months' leave, then we must make up the deficiency, or divide the work among other clerks.

93. And you look to Room 4 to make up that deficiency?—Yes.

94. One clerk in Room 4 will make out the returns for the House of Commons and the War Office, with of course assistance; he will have to refer to other rooms?—Yes, he has assistance if he requires it.

95. Is not that about as difficult work as you have?—It is only difficult so far as it requires care and attention and occupies a considerable amount of time.

96. Do you always appropriate the work to one clerk?—There may be several people who are equal to the business, and if one is absent the other takes it; there is not one special clerk for that specific duty, but it is work for one clerk.

97. Do you not find it advisable in Room 4 to appropriate generally one man to that kind of work?—Yes, but that man may be absent. There are always people who understand a particular branch better than others, and those are the people whom we specifically employ for those duties.

98. I am now speaking of Room 4, where those returns are practically drawn up. In Room 4 is there not one clerk who, generally speaking, would undertake that duty?—Yes, and if he happened to be absent the next man would do it.

99. There is an extra clerk, does he perform that duty?—Not necessarily; he is one of the two supernumeraries to the establishment of the office.

100. Is the same clerk generally employed in Room 4 in making out returns for the House of Commons and the War Office, and if so which clerk is it?—Not always the same clerk; but the one who happens at the time to be most available for the purpose, having regard to the requirements of the general business of the office.

101. (*Sir Edward Lugard.*) At page 120, in the work of the Deputy Adjutant-General of Engineers, he puts down "all correspondence to and from the Military "Secretary relating to Finance"?—He has more correspondence with me than I have with him, because he must submit all his papers to me in the shape of a memorandum, and upon that memorandum I act in transmitting the Duke's wishes to the Secretary for

Lieut.-Gen. W. F. Forster, K.H.

13 Oct. 1868.

War. Neither the Deputy Adjutant-General of Artillery, nor the Deputy Adjutant-General of Engineers can correspond directly with the Secretary of State for War.

102. Are not the Deputy Adjutant-General of Engineers, and the Deputy Adjutant-General of Artillery, under the Adjutant-General of the Army?—Certainly, as regards discipline and requisitions for ammunition and certain stores.

103. Then their departments are branches for corresponding with the Adjutant-General?—Yes, on the subjects alluded to in preceding answer.

104. It is actual correspondence?—Yes; I have no doubt they will be able to explain it.

105. (*Chairman.*) What relations exist between the Military Secretary, the Adjutant-General, and the Quartermaster-General?—The Military Secretary receives the documents from the Under Secretary for War, to be communicated to the Commander-in-Chief. He communicates by the documents such parts of that correspondence as are necessary, and refer to those two departments; and anything which they ought to know, with regard, for instance, to the Quartermaster-General, as respects the retaining of troops in certain colonies, there is not, I think, a great deal for the Adjutant-General to do, but there is more for the Quartermaster-General, emanating from the War Office. The Military Secretary ought to know, and does know, I hope, how the troops are disposed of, and how they are to be apportioned. If that goes to the Quartermaster-General from the War Office, the Quartermaster-General would have to report it to me; and if it is not done through one channel it must be through another. I must know it.

106. (*Sir Edward Lugard.*) Would he not take the orders of the Duke, and act upon them, and pass them on to the Military Secretary direct to note?—Such course would have to be pursued if the War Office communicated with the Quartermaster-General.

107. (*Chairman.*) Is the Military Secretary the channel of communication between the Field-Marshal Commanding-in-Chief, the Adjutant-General, and the Quartermaster-General?—Yes, upon all general subjects, but the Military Secretary has nothing to do with discipline, and other duties of the Adjutant-General, with whom such matters rest; and so with the quartering and movement of troops, it is a matter entirely in the hands of the Quartermaster-General, but it must be communicated to the Military Secretary.

108. Then the Military Secretary is the channel of communication in all matters, excepting discipline?—Yes; upon general questions, and with the exception also of the details laid down in the schedule of duties of the different departments.

109. (*Mr. Stansfeld.*) Although the phrase "Chief of the Staff" is not a recognized one, you consider it as indicating the nature of your functions and responsibilities?—Yes.

110. Are your functions and responsibilities precisely identical with those of a Chief of the Staff with proper subordinate assistance, or in what way do they differ?—First of all, we must define what the duties of the Chief of the Staff would be before I can make any comparison between my duties and his; but I conceive that the duties of the Chief of the Staff are performed by the Military Secretary under another name.

111. That is to say as far as it is possible to concentrate upon himself the performance of those duties?—Precisely.

112. Therefore, with that understanding, the Military Secretary fills the position of Chief of the Staff?—Yes, under another name. As far as my humble opinion goes, no one man could do what I conceive to be the duty of the Chief of the Staff at the headquarters of the British Army, namely, at the Horse Guards, that is to say, combining the duties of the Military Secretary, the Adjutant-General, and the Quartermaster-General.

113. (*Chairman.*) Have you any suggestions to make with regard to the organization of your department, either internally or with reference to its connection with other departments of the War Office and Horse Guards?—I do not think that it can be altered under existing circumstances. I think that it works very well. There is certainly an immense amount of labour.

114. By "existing circumstances" do you mean the division of the two departments of the War Office, and the Horse Guards, or to what circumstances do you allude?—I mean constituted as it is altogether. There is naturally a great deal of correspondence between the War Office and the Horse Guards.

115. Assuming a new building to be erected and the two departments to be under one roof, do you think that you might organize some method of proceeding which might diminish the amount of business?—There is no doubt that if the two departments were under the same roof much time would be saved.

116. The correspondence between the two departments would naturally cease altogether?—Not altogether, though much might be done by personal communication.

117. Has not the communication between the War Office and the Horse Guards been diminished very materially of late years; have not a greater number of minute papers been sent?—The work is of necessity very heavy.

(The Witness withdrew.)

Lieutenant-General Lord William Paulet, K.C.B., examined.

Lieut.-Gen. Lord W. Paulet, K.C.B.

13 Oct. 1869.

118. (*Chairman.*) How long have you been Adjutant-General?—Four years the 1st of last July.

119. Can you tell us the distinction between the business transacted in the Military Secretary's office and yours, as regards passages?—That is the most complicated part of my business, namely, the passage or passage allowances for Officers. It originates in my Department, and then it goes to the Military Secretary, and it goes on to the War Office or to the India Office, being dependent upon the Officer's case, and then it comes back to me again, or Quartermaster-General when a passage is to be found.

120. When an Officer makes an application for a passage he writes to the Adjutant-General?—Yes; of course I know whether an Officer is entitled to it, or whether his successor is entitled to it. There are many circumstances which one is obliged to look into before deciding whether an Officer is entitled to passage; it must originate in my Department.

121. (*Sir Edward Lugard.*) What objection would there be to your notifying to the War Office that such an Officer is entitled to a passage?—There would be no objection at all. I think that it might all be done in my own Department, or in one Department. I should say that mine is the Department in which it should be done, because it must be shown what an Officer is entitled to, which can only be done in my office. An Officer often retires from the Service, and then I must communicate with the Military Secretary, because he has to stop the money for his successor's passage.

122. That is supposing that an Officer has retired from the Service; but what is the case if he has not retired?—If he has not retired there is nothing to be done, but state his case and apply for his passage.

123. (*Chairman.*) With respect to the "statement of officers' services for promotion, retirement, &c.," what kind of record has to be made?—We keep the records, and furnish the Military Secretary with statements when required.

124. By a record of an officer's services do you mean that there is a record of the date when he first joins the Army, and of his promotion?—Yes; there is a record of his whole service.

125. Have you heavy work in respect of Parliamentary Returns?—Yes; all that falls upon me, and some of those returns are very intricate, although I dare say that when they are laid before Parliament they are not much looked at; they think little of the trouble and

research required to pick out the facts. Some of those returns are very difficult.

126. (*Mr. Stansfeld.*) Your Department would simply be concerned with the special returns, so far as they affected that Department?—Yes; that applies to almost all returns. The major part of the returns come to my office, as they relate to Army details.

127. In the account which we have here of the duties of the various clerks in the establishment of the Military Secretary, we find that one clerk during each Session of Parliament is constantly employed in Room 4 in making out returns for the House of Commons?—Most of the returns for Parliament, made out by me, are forwarded through the Military Secretary.

128. Would they be different returns, or would the clerk, practically speaking, come to you for the materials which would constitute the returns?—I do not know anything about the working of the Military Secretary's Department.

129. In the branch of the Military Secretary, one clerk is constantly employed for that purpose. Take the case of a Parliamentary Return, would your clerks make it up, and then would it pass through the hands of that clerk in the Military Department?—Not necessarily. Yes; if I had received the application from the Military Secretary, the return would be forwarded to him.

130. It goes direct from you?—Frequently; it is not only Parliamentary, but every Committee which sits, very often wants very heavy returns from us. The India Office require returns from us.

131. So far, therefore, as you know, your returns have been independent of those of which the clerk or the Military Secretary would take charge?—Yes, so far as my knowledge goes, excepting those already alluded to.

132. (*Chairman.*) What is the nature of the Register numbered 4 in the enumeration of the Registers kept in your Department?—We are obliged to keep in our office a record of every change, and to correct the Army List according to it. We have to give orders to officers in every branch of the Service, both at home and abroad, and we are obliged to watch closely every change and promotion.

133. It is merely the Army List corrected from day to day?—Yes; we have an interleaved Army List for that purpose.

134. Is the correction of the Army List done in your office?—Yes; we do it for the good of our own office, and for the statement of officers' cases.

135. Going on to page 110, we have just heard from the Military Secretary that the General Courts-Martial come to him?—They do; that has been so before I came to the office. I remonstrated when I first came to the office, but I was told that the reason of it was that the Military Secretary communicates with the Queen, or the Judge Advocate-General. In order that I may be kept *au courant* with the discipline of the Army I am obliged to request the Military Secretary to send to me the charge, the finding, and sentence of every man in the Army who is tried before a General Court-Martial; all other discipline is in my office; but the present practice has existed for a very long period.

136. The business of Inspection of Militia, Yeomanry, and Pensioners, seems to go through the office of the Military Secretary: do you see any advantage in that?—No.

137. With respect to "the grant of rewards for good "shooting, and good swordsmanship, and lance practice," is there any reason why those rewards should not be paid direct by the Regimental Paymaster?—I should think it much better that they should be so paid, if possible; but I have lately sent you some papers showing mistakes made in India by doing so.

138. The regulations are, I suppose, pretty clear about them?—Very clear. It is a part of our duty to overhaul them. The competitive examinations in sword exercise and lance exercise, and in musketry, are sent in to me. The musketry work is very heavy work in my office.

139. If that were done regimentally it would relieve you of some work?—We should have to pass the accounts to a certain degree; I suppose that it must come to me.

140. (*Sir Edward Lugard.*) Do you think that it could be done regimentally?—I do not see why it should not, if you would be content to run the risk.

141. (*Chairman.*) With respect to the sufficiency of musketry practice in the army for the purpose of training the men, you, as Adjutant-General, would naturally have any returns which you wanted?—Yes; but the question would be whether you would like to pass the accounts without having my surveillance over them, that is the only thing.

142. I see further on, "Matters connected with the "Contagious Diseases Prevention Acts," have you much correspondence upon that subject?—No, we have very little.

143. It is a correspondence which, I think, generally comes to the War Office?—It generally comes from the War Office. I used to have a little correspondence upon that subject when I commanded a district.

144. With regard to the next paragraph to that, namely, "Claims and Complaints against officers and "men, and generally every Question, however trivial, "that comes to the Horse Guards connected with the "Discipline of the Army and the Militia when em-"bodied," it appears that some of those claims go to the Military Secretary; for instance, questions of debt?—Yes, a very few.

145. Should not they go to the Adjutant-General as a question of discipline?—They come to us eventually, and then I forward them to the Commanding Officers of regiments. Some persons will send them to the Military Secretary, and some will send them to the Adjutant-General. I should rather think that the Adjutant-General was the person to dispose of them.

146. (*Sir Edward Lugard.*) They are all subjects of discipline?—They are.

147. With respect to the "confidential reports of regi-"ments," are those communicated to the Military Secretary to be noted?—No; they do not go to the Military Secretary at all, unless there is a peculiar case of an officer leaving.

148. The meaning of my question was this: supposing that a question arises as to the fitness of an officer for promotion, would that information be in the hands of the Military Secretary, or in the hands of the Adjutant-General?—It would be in the hands of the Adjutant-General, who would inform the Military Secretary. All the confidential reports are kept in my office, and I take them to the Duke for his inspection, and he gives them back again to me. They are chiefly with regard to the efficiency of a regiment, which of course must be in the hands of the Adjutant-General.

149. The "Mess Regulations for officers and men, "and questions and disputes connected with the mess "and band funds,' are all under you, are they not?—Yes.

150. And yet the Military Secretary records that he has to do with "Questions connected with the payment "of mess and band contributions and subscriptions." You have exactly the same duty?—Yes; there is a very stiff question now in a regiment which owes 3,000*l.* for mess. We generally settle those cases. There may be certain points about the case which concern the Military Secretary. We do not generally refer to the Military Secretary; we decide all cases which come to us, without reference to the Military Secretary.

151. Supposing that an officer had been posted to a regiment and had not joined, and had then been transferred to another regiment, and that his subscriptions to the first regiment were not paid, what would be done?—Then the Military Secretary generally refers to me for my opinion whether they ought to be paid or not.

152. Then are you the actual person to decide?—Yes. I do not know whether the Military Secretary refers to me in all cases. I know that he very often does so.

153. (*Chairman.*) The next point upon which I wish to ask you is with respect, generally speaking,

Lieut.-Gen. Lord W. Paulet, K.C.B.

13 Oct. 1869.

to the duties of the Clothing Division, at page 111 of the paper, whether you think that there is any unnecessary work done in that department; for example, whether the requisitions might not be made direct upon the War Office, without passing through the Adjutant-General's Office?—No; as the Duke holds the Adjutant-General responsible that all regiments are clothed and equipped, and so forth. I should be rather in the dark if it did not go through me. I also keep the War Office alive. I have a good deal to do in that way.

154. You check the War Office?—Yes; and I am obliged to keep them up to their work. When a regiment comes home, and the Duke goes down and sees it, he is very angry when they are incomplete. My own regiment was three years without knapsacks, and there is a regiment now which has been a year without having knapsacks complete. They were a very long time making them when the pattern had been fixed.

155. Putting the clothing out of the question for the moment, and taking page 111, "All correspondence "relating to arms," what kind of correspondence does that include; is it requisitions for arms?—Requisitions for arms. For instance, when regiments come home from India, there is a viewer from the India Office, and there is a viewer from the War Office, and we have to authorize the regiment being fresh equipped with arms.

156. What is the reason why that requisition could not go straight to the Controller. Certain arms have been condemned, and the regiment, therefore, being entitled to new arms, why should not the requisition be sent straight to the Controller for issue. The same observation will apply to ammunition, why should not the requisition be sent direct from the regiment to the Controller for supply, so that the business might be done locally without going through the Horse Guards at all, and without ever coming to the War Office?—The Adjutant-General is responsible that the regiment is properly equipped, and the question is whether it ought not to go through his hands. It always has done so, from time immemorial, and I think that it has always been so in most armies. I think that the details might certainly be carried out in the Control Department, as has recently been arranged with regard to ammunition.

157. The Adjutant-General might be satisfied by certain returns being sent to him as to the state of the ammunition?—A monthly return always gives him the state of the equipment of a regiment.

158. So that you would at once have information if anything was wrong?—Yes.

159. I am assuming that nothing would be altered without full consideration?—You often alter the number of arms to each regiment, when you alter the strength of the regiment; it has been altered twice since I have been in my present office. It is to save carrying the arms about, and it is a very good thing too; there used to be carried about so many spare arms. Our regiments change their strength, which makes a great deal of work. I think that the difference of strength of regiments imposes a very great deal of work, particularly as to my Department. The 15th Hussars are just going out; 90 men in that regiment would not re-engage; their first period of service will expire in 18 months, so that they could not go to India, and as they would not re-engage, I was obliged to discharge them, and to put 90 recruits in their place. You cannot do that with a Cavalry regiment until they are dismounted.

160. As far as I understand you you have no objection to any simplification of this business which would leave the Adjutant-General full information as to the arms, ammunition, and clothing of the troops?—No; he is held responsible to the Commander-in-Chief, and he has to account for that. I am quite an advocate for simplifying the business where it can be simplified.

161. General Edwards and the recruitin business are under you?—Yes.

162. As to the Discharge Division, would it not appear at first sight that the Discharge Division should be under the same department as the Recruiting?—No: there must be communication of course, but the Discharge Branch is a very heavy branch, and there is very heavy work done in it.

163. As to one branch of it, namely, "the examina- "tion of the claims of men entitled to pension," what degree of examination of those claims takes place in your department; are they only communicated to Chelsea, or are they looked into by your Department?—Yes; the service and good conduct badges men are entitled to are examined by us. The discharge documents, when complete, are sent on to Chelsea. All doubtful cases as to service, &c., are referred to us from Chelsea. Perhaps a man has been discharged, or there is a man who wants a deferred pension, or there is an old man who wants to be put upon the pension list, and there are many cases which they refer to us.

164. Do they ask you for your opinion?—Yes; in cases which have not been regularly sent by us to Chelsea.

165. It is merely information relative to the men?—Yes; by virtue of my office I am one of the Commissioners of Chelsea Hospital.

166. The examination of the claims would be really not done in your office at all; you would leave that to Chelsea Hospital?—Yes; and they merely come to my office for information.

167. At page 112, there is a statement as to the examination of claims of men entitled to permanent or deferred pensions according to Warrants. "Examina- "tion of claims of men entitled to permanent or deferred "pension, according to Warrants under which "enlisted, also claims to renewal of pension, or additional "good conduct badges?"—They examine our decision at the Board before they award a pension.

168. Are the claims examined in your department?—Yes; but they are not decided upon; they are decided upon by the Commissioners.

169. So that in point of fact they are examined twice over if they are examined by the clerks at Chelsea?—I suppose that they are; the Secretary always puts them before the Board.

170. Supposing that the Board was at the Horse Guards, and not at Chelsea, the one examination would do?—One examination checks the other, which is absolutely necessary.

171. Are the Deputy Adjutants-General of Artillery and of Engineers under you?—Yes; a great deal of their work is under me. Of course I do not go much into details, because they keep their own clerks, and their own clerks are separate from ours.

172. With respect to the discipline, does that come under you?—Yes.

173. What advantage is there in separating the discipline of those two corps from the discipline of the rest of the Army?—I do not myself see any advantage in it. I think that there is a disadvantage. I think that it would be better if they were amalgamated with the Army. In fact, when there is any serious case of discipline it comes to me,—either Regimental or common to the Army.

174. I suppose that mere regimental business would not come to you?—No regimental business is done in our office.

175. (*Sir Edward Lugard.*) The office of the Deputy Adjutant-General of Artillery, and of Engineers, is very anomalous, for it is in fact a regimental orderly room?—Yes, almost so.

176. (*Chairman.*) Would there be the same facility of joining that portion of the duty of those two offices to the general business of the Adjutant-General, which refers to the other points, namely, the arms, ammunition, clothing, and such like?—The armament is very different.

177. I am not speaking now of big guns, but of small arms?—That might of course be done the same as with the rest of the army; there is no doubt about it.

178. Do these officers correspond with you by letter?—No, not by letter; very seldom; they sometimes may write a memorandum; they come into my room in the same way as the other Officers of my Staff to consult me.

179. And they take your orders upon those points?—Yes.

180. (*Sir Edward Lugard.*) The Deputy Adjutant-General of Engineers puts down the "correspondence to "and from the Adjutant-General" relative to general questions affecting so and so?—He keeps, of course, a record of my decisions on all questions, and brings letters for my signature.

181. (*Chairman.*) With respect to "inventions and "experiments," what sort of opinion have you to give upon those from time to time. "Clothing Division" seems to be a very curious name to give as a heading because it includes other things?—These returns were got up in a hurry; it was done through the Military Secretary; we had very little time to prepare them. There is what we call the Clothing Branch. We are obliged to divide our work into four branches. We designate one the Clothing Branch, which is the main part of that branch, but we are obliged to give the gentlemen in that department a little more business, for instance, just now they have the medals. We put the work into four branches. The 1st class clerk manages the confidential reports.

182. What is the nature of the "Inventions and "Experiments"?—People are constantly bringing experiments and inventions to us, which we have to look up. For instance, a man brought clothing which was called shot-proof, and a great many of them have been looked into at the War Office before they come to us, but we are obliged to look into them before they go to the Duke, and sometimes the War Office refer them to us.

183. Naturally, anything relating to the arms of the Infantry and Cavalry would be referred to the Adjutant-General?—Yes; foreigners, and all sorts of people, come with experiments, which we have to examine and report upon.

184. (*Chairman.*) Do you ever have any questions referred to you for opinion, with regard to the discipline of Volunteers?—No.

185. Or of the Militia?—Yes, we have, with respect to the Militia.

186. If the Militia was out for training, would such questions come to you?—No; but only when the Militia was embodied, except at times as to the Non-commissioned and Permanent Staff. We have the inspection of the Militia Regiments, and also of the Yeomanry.

187. What position does the Adjutant-General hold with respect to the Military Secretary at the Horse Guards?—Do you mean as to his rank, or powers?

188. Would you, as Adjutant-General, receive your orders direct from the Field-Marshal Commanding-in-Chief?—Yes; that is the custom.

189. What relation do you conceive the Military Secretary to bear to the Adjutant-General?—I should say that the office of Military Secretary is entirely a distinct office from mine.

190. (*Sir Edward Lugard.*) Is not the Military Secretary on the Personal Staff of the Commander-in-Chief, and are not you on the Staff of the Army?—Yes.

191. Are you not responsible for the discipline of the Army, and not the Military Secretary?—Certainly.

192. (*Mr. Stansfeld.*) Does it not follow from your answer to the last question, that the Military Secretary is not, as a matter of organization, or necessarily, the channel of communication between the Commander-in-Chief and your Department?—He is not.

193. (*Chairman.*) References are now made, I believe, to the Adjutant-General, from the War Office, upon Minute Papers?—A great many.

194. Do you think that that is a convenient arrangement?—Yes; if the War Office do not see any objection to it, I see no objection.

195. It saves correspondence?—It saves correspondence.

196. Can the Adjutant-General correspond with any other department of the public service?—I believe that, properly speaking, he does not; but I do so sometimes.

197. (*Sir Edward Lugard.*) I believe that you sometimes correspond with the Home Office?—I sometimes correspond with the Home Office, and sometimes with the Admiralty; but it is not customary.

198. (*Mr. Stansfeld.*) Looking at the Military Secretary as being on the Personal Staff of the Commander-in-Chief, does his establishment at the Horse Guards, in its action, entirely correspond with that idea, or has it practically grown to be wider in its operations?—It has been the same since I have been at the Horse Guards. I do not interfere at all with the Military Secretary's office; and it has not been altered or increased since I have been at the Horse Guards.

199. If instead of looking to the position and functions of the Military Secretary, as compared with those of the Adjutant-General, we were to look to the Department of the Military Secretary, and to the duties actually assumed by the various branches of that Department, should we not find it concerned with something more than would strictly belong to the Chief of the Personal Staff of the Commander-in-Chief?—Yes, I think so; for instance, as I have said, in General Courts-Martial.

200. (*Chairman.*) Do you receive communications in writing from the Military Secretary?—Certainly.

201. In the shape of letters or memoranda?—In the shape of copies of letters from the War Office, which appertain to my Department.

202. (*Mr. Stansfeld.*) Those duties of the Military Secretary, which may be said to be rather departmental than appropriate to him, as being on the personal Staff of the Commander-in-Chief, would properly be otherwise performed if the Horse Guards and the War Office were under one roof?—Even as it is, if the War Office addressed to me what related to my Department, it might be done as the two offices are now.

203. (*Chairman.*) Is there any further suggestion which you would like to make?—The most circuitous route which these matters have to take is with respect to the passages or passage allowances. I think that that might be rectified, except that we have to deal with the India Office as well as with the War Office.

204. In what manner would you suggest that that business should be simplified?—I would let the Adjutant-General's Department manage the whole of it, by correspondence either with the India Office or with the War Office.

205. Do you think that the whole business of giving passages and claims for passages might be much simplified?—Yes.

206. Do you think that there is any dissatisfaction in the Army with regard to the manner in which that business is now carried on?—I do not think that there is any dissatisfaction, but I think that there is a great deal of unnecessary work.

207. Is there any other point which has occurred to you?—I think not.

208. (*Mr. Stansfeld.*) In your opinion, would it facilitate the conduct of the business in the Horse Guards, and in the War Office, if both were brought under one roof?—Yes; but I think that the two offices should be kept distinct, viz.: the Military from the Civil.

209. Could you indicate in what way you think that they should be kept distinct?—They always have been distinct. In fact I have never given the question much of a thought. I should not have the slightest objection to their being put under one roof; but I think that the question requires consideration.

210. Would not one probable result of the Horse Guards and the War Office occupying the same building be an economy in both?—I think that it would save time and facilitate correspondence, although I do not really think that my office could get on with more economy. The detail of my work is so peculiar that I do not think that we could do with less strength. I should be very glad if we could. If you put the two departments under one roof you will facilitate correspondence, and save a little labour.

211. My last question has rather reference to the relations of the various departments in the Horse Guards, and of the various departments in the War Office, and

Lieut.-Gen. Lord W. Paulet, K.C.B.

13 Oct. 1869.

to the relations and communications between the Horse Guards and the War Office?—I should think that it would facilitate business.

212. And would it not prevent some of the existing circumlocution?—Certainly.

(The Witness withdrew.)

Adjourned to to-morrow at 12 o'clock.

Thursday, 14th October, 1869.

PRESENT:

Right Hon. Lord NORTHBROOK, *in the Chair.*

Lieut.-Gen. Sir EDWARD LUGARD, G.C.B. | Rt. Hon. JAMES STANSFELD, M.P.

Major-General GAMBIER, C.B., examined.

Maj.-Gen. Gambier, C.B.

14 Oct. 1869.

213. (*Chairman.*) You are Deputy Adjutant-General of the Royal Artillery?—Yes.

214. How long have you held that office?—Five years last April.

215. When was the office first constituted?—It was constituted under the Board of Ordnance; when the Board was abolished Sir Hew Ross was made Adjutant-General of Artillery, until 1858, when the present office was constituted.

216. I see from the paper before us, at page 116, that there is a branch of the Deputy Adjutant-General's Office, at Woolwich; can you tell us, how many people are employed at that branch?—Ten clerks are employed under a Captain who is styled "Superintendent of Royal Artillery Records."

217. That is in addition to the numbers given on page 115?—Yes; but there being no room at the Horse Guards, they were sent to Woolwich.

218. Will you explain to us in what relation you stand to the other Departments at the Horse Guards, to the Military Secretary, in the first instance?—All subjects coming to the Military Secretary, connected with my Department, are submitted to me for report, and returned to Military Secretary for the information of His Royal Highness the Commander-in-Chief.

219. Can you classify the subjects?—All questions of pay and allowances, establishments of the regiment, promotion, appointments, and rewards, passages to foreign stations for officers; papers relating to same subjects are often sent partly to Military Secretary, partly to Adjutant-General.

220. And sometimes also, the papers go straight to you from the War Office, do they not?—Very seldom now, they used to do so, but I think that that has been stopped, except for purely Artillery details.

221. Then in point of fact the office of Military Secretary is more a Department of correspondence than anything else?—He sends to me for information; he gets details from me, and then forms his report for the information of the Commander-in-Chief. The same takes place with the Adjutant-General, and with the Quartermaster-General. They send all the subjects to me, connected with my Department, for my information. I consider my department to be a part of each of these offices.

222. Do they write letters to you?—They do occasionally.

223. Then you are not a branch of the Adjutant-General's Department?—Strictly speaking, it is a branch of the Adjutant-General's Department, but there are quite as many questions sent from the Military Secretary's and Quartermaster-General's Departments, and it is therefore a branch of each department, as well as of the War Office.

224. Are all orders relating to your department given either to the Adjutant-General, the Military Secretary, or the Quartermaster-General?—Yes.

225. (*Sir Edward Lugard.*) Under whom is the discipline of the Artillery?—Under the Adjutant-General. Points of discipline all come through him from different stations abroad, and from General Officers at home, which he sends on to me. If it is necessary I prepare an answer for his signature, if not, I send it myself.

226. (*Chairman.*) I suppose that the same remark would apply to questions connected with the movement of Artillery and the Quartermaster-General?—I supply the necessary information as to the movements of brigades annually, and details as to numbers, &c., when any Artillery is moved.

227. (*Sir Edward Lugard.*) In the case of individual passages for officers, what is done?—An application is made to Military Secretary, who forwards it to India Office or War Office, as the case may be.

228. Supposing that any officer wants a passage to join his battery, to whom does he apply?—He applies to me, and I send it to the Military Secretary.

229. (*Chairman.*) With respect to the Ordnance Branch of the Military Secretary's Department, have you any communication with it?—All communications on Artillery subjects pass through this branch, and they prepare letters for the War Office and other places from memoranda furnished by me.

230. (*Sir Edward Lugard.*) He gets a letter from the War Office?—Yes.

231. Does he send you a copy of it, or the original?—He sends me the original.

232. Then you prepare a memorandum?—Yes, a memorandum with the information which I can give. The Military Secretary takes this memorandum to the Commander-in-Chief, and takes his orders, and a letter is written in accordance, in the Military Secretary's Office.

233. (*Chairman.*) Is there a precise division of subjects which would come to you through the Military Secretary, or through the Adjutant-General?—All questions of pay, and reduction in the regiment, come through the Military Secretary; questions of discipline come through the Adjutant-General, but occasionally from the War Office letters come to the Military Secretary which ought to have gone to the Adjutant-General, and *vice versâ*.

234. (*Sir Edward Lugard.*) That shows that the subjects are not defined?—I think that they are defined, but it is a mere question of mistake with the clerks in the War Office.

235. (*Chairman.*) The subjects to which you have alluded are at page 106?—Yes; the applications for passages go to the Military Secretary; officers going with drafts, their names are sent to the Adjutant-General.

236. The application for a passage would relate to whether or not an officer was entitled to a free passage?—No application is made unless the officer is entitled to a free passage.

237. With respect to the accommodation on board

ship, is that a question for the Adjutant-General?—Yes; it is arranged between the Adjutant-General and the Quartermaster-General, and I furnish the former with the details of Artillery drafts to be sent out.

238. Would not applications for passages go through the Military Secretary?—Yes.

239. Do you correspond directly with the India Office in any case?—Yes; but only upon matters of detail; all important subjects go through the Military Secretary.

240. (*Sir Edward Lugard.*) How is the interior economy of the corps of Artillery conducted?—It is conducted by brigades; each brigade conducts its own interior economy, and any questions which arise with reference to it are transmitted to me direct, and then I submit them to the Commander-in-Chief.

241. Personally?—Yes.

242. (*Mr. Stansfeld.*) Do you submit those questions to the Commander-in-Chief as Commander-in-Chief?—Yes; sometimes there may be minor questions which I submit to him as Colonel of the Regiment, with reference to the bands, or subscriptions; but all questions of interior economy go to him as Commander-in-Chief.

243. (*Chairman.*) Can you state what portion of your business at the Horse Guards is regimental business, as distinct from business which, in the case of the Line, would go to the Adjutant-General?—The regimental business is the business from different brigades.

244. In the case of regiments of the Line, a great portion of the business which you conduct at the Horse Guards would be conducted regimentally?—Yes.

245. Would other questions, such as questions connected with discipline, all go to the Adjutant-General previously to their being decided?—Yes.

246. And Courts-Martial?—Yes.

247. Would he refer them to you?—He sends them to me to look over in any special case.

248. You would give your opinion upon them?—Sometimes he wishes me to give my opinion about them.

249. (*Sir Edward Lugard.*) Is the work which is laid down for Room 16, transacted by you or by the Adjutant-General?—All by me.

250. It does not go to the Adjutant-General?—No.

251. (*Chairman.*) Will you explain what would be the correspondence connected with the discipline?—Any correspondence from General Officers or Brigades with reference to the discipline of the regiment.

252. Who would give the answer?—The Adjutant-General, if the answer is to a General Officer, if not, by myself.

253. It would be written in the Adjutant-General's office?—No, in mine.

254. In point of fact, he would consult you as an Artillery Officer?—Yes.

255. (*Sir Edward Lugard.*) You would keep a copy of the original, and a copy of the answer?—I should keep the original papers and the copy of the reply.

256. As to the interior economy, do you say that you would go direct to the Commander-in-Chief, with such matters, or through the Adjutant-General?—After consultation with the Adjutant-General, I take them to His Royal Highness if of sufficient importance.

257. To whom do the confidential reports go?—The regimental reports come straight to me. The half-yearly confidential reports from the General Officers go to the Adjutant-General, who sends them to me, and they go to the Duke after I have looked at them. The Commanding Officers have to make a regimental confidential report every half year to me for my information.

258. (*Chairman.*) Is the recruiting for the Royal Artillery separate from that for the rest of the Army?—No; it is under the Adjutant-General's department.

259. Then what would be the correspondence as to the recruiting, in No. 16 Room?—All applications from Brigades for special authority to enlist men who are not exactly up to the standard; enlistment of boys as trumpeters, from Chelsea, or Hibernian Schools, or otherwise; returns of men enlisted by Brigades as headquarters recruits; removal of Recruiting parties.

260. What is the business as to "claims made for prize money, and correspondence thereon"?—That is entirely regimental: and I forward the claims to Chelsea or to the India Office.

261. Does not it go to Chelsea?—Yes, for the old Royal Artillery, but to the India Office for the late Indian Artilleries.

262. In No. 8 Room, excepting the confidential reports, the correspondence would be regimental?—Yes. There we correspond direct with the War Office upon those subjects which are regimental.

263. Do the different brigades send their demands to you, and do you send them on?—Yes.

264. What process goes on, are they checked?—Yes

265. Before they are sent to the War Office?—Yes.

266. Might not the demands be sent direct to the War Office?—Yes.

267. That would save trouble?—I think so.

268. With respect to the Store Branch, will you explain as to the business under No. 1, and whether it comes to the Deputy Adjutant-General of Artillery, in consequence of the abolition of the Office of Director-General of Artillery?—It comes to me in consequence of the abolition of the office of Director General of Artillery in 1858.

269. For example, suppose that it was proposed to introduce a new description of heavy ordnance, how would that paper come to you, and when you have got it, what would you do with it?—It would come to me from the Director-General of Ordnance, and I should submit it to the Commander-in-Chief, and then return it to Director-General with such observations as His Royal Highness may make, or desire me to make; at the present time it would come from the Controller-in-Chief, the position of Director-General not being, I believe, quite defined.

270. The precise point for which the reference is made is for the concurrence of the Commander-in-Chief in the change of pattern?—Yes, and for his observations upon it. In anything which is going to be introduced into the Service, the opinion of the Commander in-Chief is asked.

271. (*Mr. Stansfeld.*) To whom would the Commander-in Chief refer?—To me, upon any subject of artillery or armament.

272. (*Chairman.*) With respect to the new works with armaments, the arming of new works would go to the Fortification or Defence Committee?—The arming of new works is settled by the Defence Committee.

273. Then two Artillery officers would be consulted upon those questions, namely, the Director-General of Ordnance and the Deputy Adjutant-General of Royal Artillery?—Yes and the Inspector-General of Artillery, they being all on the Defence Committee.

274. Has the Inspector-General of Royal Artillery any connection with your branch?—He is in constant communication; he sees the interior economy of the regiments as he inspects them, and, though he communicates direct to the Adjutant-General, his reports are sent to me before they are submitted to the Commander-in-Chief. The Inspector-General of Artillery is in constant communication with me; there are various cases which he refers to me to have rectified, which he has noticed at his inspection.

275. (*Sir Edward Lugard.*) You have first an officer commanding a brigade of Artillery?—Yes.

276. Then you have the Artillery officer commanding the district?—There is only one such case, viz., at Portsmouth, where there are two brigades of Artillery serving in the same district.

277. Then the Inspector-General of Artillery inspects again.—Yes.

278. And the Major-General commanding the district?—Yes.

279. (*Chairman.*) Do you consider that any improvement can be made in the manner in which certain subjects connected with your branch of the Service are conducted: first, the armament of fortifications and their construction, works with reference to magazines, and other works affecting the working of the guns of the Artillery; and secondly, the consideration of the improvements in the material?—With reference to the

Maj.-Gen. Gambier, C.B.

14 Oct. 1869.

first part, I am decidedly of opinion that an officer of Artillery should be in the Department of the Director of Works, to have a voice in the direction of Artillery fire, construction of magazines, and stores generally for the armament of those works which are being planned and constructed.

280. Do you think that it would be advantageous in working out the changes that there should be a practical Artilleryman connected with an Engineer?—Yes.

281. Do you think that in that way certain alterations which have been made from time to time might have been avoided?—Yes; it is positively necessary now in the disposition of the magazines and Artillery stores, that an Artillery officer should have a voice in them.

282. (*Sir Edward Lugard.*) Has not the Director-General of Artillery a voice in it?—No; unless he is consulted.

283. (*Chairman.*) You would say that the consultation comes too late?—Yes.

284. And besides the consultation it requires some one to be a party to the details all through the work?—Yes. I do not mean with reference to the construction of the works, but simply that an Artillery Officer should be consulted for the purpose of drawing out details of magazines, Artillery stores, &c., and giving his views upon the direction of Artillery fire.

285. You mean that he should be consulted upon the plans of the works?—Yes, I am of opinion he should.

286 And of course he should be consulted as the plans proceed, with respect to the magazine accommodation?—Certainly.

287. (*Mr. Stansfeld.*) Would your object be met by placing in the Department of the Director of Works an Artillery officer of recognized competence; or do you think it necessary that some superior independent administrative officer should have a voice in those matters?—I think that there should be a superior practical Artillery officer, who would give his opinion upon the subject; or that there should be an interchange of views.

288. Do you wish that in the Department of the Director of Works they should be able to avail themselves of the special knowledge of some officer of Artillery, or that your Department should have a voice in the construction of those works?—I think it should come from the Director-General of Ordnance, and that from his Department there should be an officer of a certain rank to give his opinion, or that this officer of Artillery should be in communication with the Director-General of Artillery and the Commander-in-Chief.

289. Would you have him give his opinion to the Department of Works?—Yes; but I think that he should be in connection with the Director-General and the Commander-in-Chief, so as to inform them of what was going on, and then I think that you would have such an opinion respecting the works before they were made, so that they would not afterwards be interfered with.

290. You would have an officer in the Department of Works as representing the Director-General of Ordnance?—I would.

291. (*Sir Edward Lugard.*) If that were done it would then not require the matter to be referred to the Deputy Adjutant-General of Artillery?—I think that the Commander-in-Chief should be aware of what changes are going on in all works and armaments.

292. (*Chairman.*) With respect to new works, the Commander-in-Chief is the President of the Defence Committee?—Yes.

293. With respect to changes in material, what is your opinion?—Now that the Ordnance Select Committee is done away with, I do not believe that it has yet been settled how the changes shall be regulated. The way in which it was done before was by the Ordnance Select Committee. As their functions are taken away, and nothing has been given out who is to perform those functions, I do not see how I can answer the question.

294. Assuming the Director-General of Ordnance to be responsible for the business heretofore conducted by the Ordnance Select Committee, with respect to the change in matériel, do you conceive that the arrangement is satisfactory?—I do not think that it should be dependent upon the opinion of the Director-General of Ordnance as to all changes of matériel.

295. Those questions are referred to the Field-Marshal Commanding-in-Chief, as I understand?—They used to be.

296. They come to you?—They did.

297. What steps are taken upon those questions?—There are scarcely any questions now; it is not yet settled who is to take the place of the Ordnance Select Committee. Since the Ordnance Select Committee has ceased its functions, I can hardly recall any changes which have been made.

298. (*Sir Edward Lugard.*) Supposing that any proposal for a change came up from a practical officer, an officer serving in the batteries, it would come to you, would it not?—Yes.

299. What would you do then?—I should take it to the Commander-in Chief, through the Military Secretary, who would forward it to the Secretary of State for War.

300. With an opinion?—Yes; the Duke would give an opinion.

301. (*Mr. Stansfeld.*) And you would entirely lose sight of it?—It would come back with some answer.

302. It would be considered by the Director-General of Ordnance?—Yes.

303. If the answer upon a suggestion of that kind, based presumably upon the opinion of the Director-General of Ordnance, were not satisfactory to your Department, and to the Commander-in-Chief, what course would be adopted?—The Commander-in-Chief would speak personally to the Secretary for War, if he thought fit so to do.

304. (*Sir Edward Lugard.*) Do you invite officers to make proposals of changes?—If the officer of a battery proposes a change, or a new invention, I send it to officers of brigades in England, for the opinions of their best practical officers; but that would be a different subject from what the Chairman alludes to.

305. (*Chairman.*) Those questions I presume would be first considered at the School of Gunnery, Shoeburyness?—The Commandant of the School of Gunnery would most probably be called upon for an opinion of most such subjects.

306. (*Mr. Stansfeld.*) Assuming, for a moment, that in the War Office some new view should be taken upon a question of armament, as a matter of practice, in what way would the opinion of the Horse Guards be obtained upon that new view?—It would be submitted to me, and I should take it to the Commander-in-Chief for his views.

307. Then, as I understand you, there are two views which ought to be taken upon the question, namely, a view which is partly scientific and partly administrative, and the practical military view?—Yes.

308. You want a combination of those views, and those are the only views which you require?—Yes.

309. From the Horse Guards you want the military practical view?—You get the practical view from the Horse Guards.

310. Not the scientific view?—No.

311. And not the purely administrative view?—No.

312. (*Sir Edward Lugard.*) How do you separate the general and the regimental duties of the Artillery? Each brigade conducts its own regimental details in communication with me; the general details go through the General Officer of the District.

313. Still coming to you?—Still coming to me eventually.

314. (*Chairman.*) What is the advantage of the regimental details coming from each brigade to you and not being settled in each brigade?—There are numerous questions affecting other brigades and districts with which the Commanding Officer of a brigade is not competent to deal.

315. Why could not the brigade settle a good deal of

that business without its coming to you at all?—They only refer to me it they wish it.

316. Are any details sent to you which might be avoided?—I think not, with the exception of clothing and such things as the supply of oil and small stores to batteries; all which come through my office, to the War Office. I do not see the advantage of it, and I think that they should come direct to the War Office from brigades.

317. (*Sir Edward Lugard.*) And practice ammunition?—Yes.

318. (*Chairman.*) You would let the local officer settle those things without their coming to anybody?—Yes.

319. That would save a great deal of correspondence?—Yes.

320. (*Mr. Stansfeld.*) Would there still be left a great deal of work in your department?—Yes.

321. How would such work be done if your regiment were a regiment of the Line?—It is impossible to deal with the Royal Artillery in the same way as a regiment of the Line, the latter being a regiment within itself, which the Artillery, consisting of 31 brigades (each equal to a regiment), can never be made.

322. (*Chairman.*) There must be a regimental headquarters?—Yes.

323. Where was that work done in the time of the Board of Ordnance?—It was done under the Deputy Adjutant-General of Artillery, at Woolwich.

324. The Adjutant-General of Artillery at Woolwich then performed the same functions as you do now?—Yes; he was exactly, with reference to the Master-General of the Ordnance, what I am to the Commander-in-Chief.

325. Will you explain what No. III, in 45 room, is, namely, "Personal Equipment of the Royal Artillery. "Under this head is involved the examination of the "annual returns of small-arms and accoutrements of "the entire regiment"?—The returns and correspondence connected with small-arms and accoutrements pass through this branch, but I think they might go from brigades direct to the War Office.

326. (*Sir Edward Lugard.*) Each regiment has already a distinct account at the War Office?—I should say that it might be done. It comes through me to the War Office, and I do not see why it should com through me.

327. (*Chairman.*) The same remarks would apply to the Militia and the Volunteer business as to ammunition?—I think so.

328. As to No. 4 branch, the promotions in the Artillery go to the Military Secretary?—Yes.

329. Do you keep a record of every officer's service?—Yes.

330. Are records also kept by the Military Secretary?—No.

Maj.-Gen. Gambier, C.B.

14 Oct. 1869.

331. If the Field-Marshal Commanding-in Chief asked the Military Secretary for information upon that subject would he consult you?—Yes.

332. You would consult the books?—Yes; and all the information would be given.

333. Do you enter the confidential reports?—Yes; we keep them.

334. Then the Military Secretary would not make entries separate from yours?—No.

335. What is your opinion of the way in which your military clerks perform their work?—They perform it admirably.

336. Have you had any experience of civilian clerks?—No.

337. (*Sir Edward Lugard.*) Your clerks are actually serving, and you can send them back to the corps at any time when they mi conduct themselves?—Yes.

338. They have not left the Service?—No.

339. These clerks are all really Artillery soldiers, subject to the discipline of the corps, and at any moment a soldier clerk can be exchanged?—Yes.

340. (*Mr. Stansfeld.*) Do you know what is the pay of the soldier clerks?—The senior clerk receives 4*s.* a day besides his pay; the second receives 3*s.* a day besides his pay; the four clerks of the first-class, 2*s.*; the ten second-class clerks receive 1*s.* 6*d.* a day besides their pay, and the third and temporary clerks receive 1*s.* All these clerks have an allowance for clothing; the six senior clerks have 8*s.* 6*d.* a week each for lodging allowance, and the others have half that, namely, 4*s.* 3*d.*

341. What are their hours of work?—From 10 o'clock till 5. I very often keep them till 6 or 7 if they are wanted.

342. And all the clerical duties in your establishment are performed by them?—Yes.

343. Is there any portion of those clerical duties which you would call confidential in their nature?—The Superintending Officer is a confidential clerk, the same as the senior clerk is to the Military Secretary, and to the Adjutant-General; he keeps all confidential letters.

344. But he is a soldier clerk?—He is a Captain; and was a Non-commissioned Officer in the regiment, he is a most necessary man to have there. You must have an officer of that kind to superintend the rooms and keep order; the superintending officer is a most necessary man there. Although the clerks are excellent men they require supervision.

345. (*Sir Edward Lugard.*) Have you any further suggestions to offer relative to the duties in connection with the Director General of Ordnance?—No; excepting that there should be always communications between us.

346. (*Mr. Stansfeld.*) If I understand you that is so now?—Yes.

(The Witness withdrew.)

Colonel the Hon. H. Fane Keane, R.E., examined.

347. (*Chairman.*) How long have you been Deputy Adjutant-General of the Royal Engineers?—Four years.

348. (*Sir Edward Lugard.*) And you were Assistant before?—I was Assistant before for five years.

349. (*Chairman.*) When was the office of Deputy Adjutant-General of Royal Engineers established?—On the 1st of July, 1855.

350. That was on the abolition of the Board of Ordnance?—Yes.

351. The two offices of Deputy Adjutant-General of Royal Engineers and Deputy Adjutant-General of Royal Artillery are somewhat identical in their functions, are they not?—Yes.

352. Can you tell us generally what portion of the duty of your office is what may be called regimental, and what has to do with matters which are not regimental?—Am I to understand the question with reference to the regimental business of the Deputy Adjutant-General and his business with other branches.

Colonel the Hon. H. Fane Keane, R.E.

14 Oct. 1869.

353. What portion of your business would, supposing the case of a Regiment of the Line, be settled in the Regimental Orderly Room?—The organization of the corps makes a company the unit, which represents a regiment; it supplies returns, and the same references have to be made with regard to clothing and arms, and everything of that sort, as if it were an entire regiment. Although a small body of men, it requires a large amount of clerical labour to carry on its organization With reference to the discipline portion of it, the Deputy Adjutant-General is responsible to the Adjutant-General, and communicates with him upon all those points. With regard to other points there are many things which are consequent upon the special duty in the Engineers. With reference to the communications which are received from the War Office, all those communications do not come from the Adjutant-General, but the Deputy Adjutant-General

Colonel the Hon. H. Fane Keane, R.E.

14 Oct. 1869.

works through the Military Secretary on all those points.

354. Putting apart those questions which, in the case of regiments of the Line, would be referred to the Adjutant-General of the Army to settle, what remains in the business of the office which would otherwise be settled regimentally. For example, take in the first place demands for clothing and necessaries, and compensation claims and discharges, and all such details?—That I may perhaps describe in this way. The division of the two offices, that is to say of Assistant Adjutant-General and Deputy Adjutant-General, is as follows—the Deputy Adjutant-General works the whole of the correspondence with the officers. With regard to the supply of the troops, all the business with respect to that is carried on by the Assistant Adjutant-General; he refers all difficult matters to the Deputy Adjutant-General, but he works the detail of the regimental portion of it, which is included in what you have just described; everything of that sort goes to him: if he is not satisfied he refers to the Deputy Adjutant-General, who is responsible. The Officers' Division is under the Deputy Adjutant-General. The Assistant Adjutant-General comes in on the whole of pages 119, 120, 121, and 122, and that includes all returns under every heading which is enumerated. It is all under the Deputy Adjutant-General in his office, but the Assistant Adjutant-General has the working of the regimental details of it.

355. (*Mr. Stansfeld.*) Do I correctly understand that the branches which are under the Assistant Adjutant General have regard to regimental work, and that the divisions which are directly under the Deputy Adjutant-General are employed in work which is administrative?—Yes; but the whole is under the Deputy Adjutant-General.

356. May the work which is conducted in the Arms Branch, the Clothing Branch, the General Correspondence Branch, and the Returns Branch, be considered as regimental?—Yes; in anything which is done in the Military Department of the Office I hold the Assistant Adjutant-General responsible to me.

357. And the business in those branches is directly under him?—Yes; on the 15th of May, 1795, an Adjutant was appointed to act under the orders of the Chief Engineer, and assist him in the duties connected with the control and discipline of the Officers of Royal Engineers. To effect this he was placed on the Head-Quarter Staff of the Corps, and, to avoid delay in holding communication, had his office in the same building with the services of clerks borne on the establishment of the Chief Engineer's Office. Those duties were so important that it was considered requisite, on the 1st May, 1802, to raise the Adjutant to the position of Brigade Major. In this capacity he carried out the orders of the Chief Engineer and Master-General, notifying promotions, changes of station, keeping the officers' records, and conducting the whole of the military correspondence connected with them. I might in the meantime place before you a statement showing the increase in the corps from time to time, and the number of the men. In course of time the work and responsibility connected with these duties increased with the successive augmentations of the corps to such an extent that it was deemed advisable to give the officer performing them a superior position. The appointment of Brigade Major therefore ceased on the 1st April, 1846, and the officer holding it became an Assistant Adjutant General from that date. In addition to his former duties, relating solely to the officers, he now became, to a considerable extent, the medium of communication between the Brigade Major Commanding the Royal Sappers and Miners and the Inspector-General of Fortifications, and to exercise a controlling influence over that corps, as well as the Royal Engineers. The amalgamation of the Ordnance with the War Office, in May 1855, led eventually to a separation of the military and professional duties that had previously been performed by the Inspector-General of Fortifications, and the former were taken over by the Assistant Adjutant-General, whose responsibilities then assumed such a character that he was appointed Deputy Adjutant-General of the Corps, on the 1st July, 1855. On the 18th October, 1856, the Royal Sappers and Miners were incorporated with the Royal Engineers, and the Deputy Adjutant-General of the united corps received orders, in the same month, to remove his office from Pall Mall to the Horse Guards, to avoid delay and inconvenience in reporting to the Commander-in-Chief and the Adjutant-General. Owing, however, to the crowded state of the building he could not be accommodated there, and was provided with offices in Whitehall Yard, until early in 1859, when, in consequence of the inconvenience attending his personal and direct communication with the authorities at the Horse Guards; rooms were provided for his office, and he was ordered into that building. From the union of the two corps, and the assumption by the Deputy Adjutant-General of the military functions that had previously belonged to the Inspector-General of Fortifications, the position of the former, with respect to the Commander-in-Chief, became identical with that of the latter in relation to the Master-General of the Ordnance, with the Adjutant-General of the Forces, occupying as regards discipline, &c., an intervening position, analagous, in some degree, to that occupied by the Lieut.-General of the Ordnance. The arrangement, therefore, constituted the Deputy Adjutant-General the representative of the Commander-in-Chief, not only to the corps itself, but also to the great military and civil departments. In taking up the duties of this position, he had necessarily to assume all the responsibilities attached to it, so that, in reality, he alone is answerable to the higher authorities for the discipline and complete efficiency of the whole corps, including officers and men. It is an essential feature of his position that he should be in constant and personal communication, not only with the Commander-in-Chief and the Adjutant-General, but also with the War Office, and the Heads of other Departments.

358. (*Chairman.*) I understand that according to what you have just stated, the Deputy Adjutant-General of Engineers is responsible to the Adjutant-General of the Army?—Yes; upon all subjects, including discipline, arms, accoutrements, and Courts-Martial, and everything of that sort.

359. Speaking generally, do you conceive that any diminution of the work of your department might be effected by any business which now passes through your office going direct to the War Office, and being settled without the intervention of your department at the Horse Guards?—I do not see any of our business which could be so settled; it has been tried on one or two occasions, and it has been found not to conduce to a diminution of the work.

360. For example, if you look at page 118, there is the correspondence respecting "allowances for deten-"tion, forage, field, mess, passage, personal, retiring, "servants, &c., &c." Going on further, there is the "correspondence relating to appointments"; going on further, there is the "correspondence upon all questions "relating to pay"; going on further still, there are Returns from No. 1 to No. 8 on that page: do you think that none of this correspondence might be sent direct to the War Office?—I do not think it would be a saving. In the case of questions as to detention allowances, it is quite impossible that the War Office can give the least information as to the way in which officers are detained. A request for detention allowance has to pass through my office, and it is countersigned by me before payment; and that is a proof that that officer has been necessarily detained for so many days for the good of the Service. The same thing applies with regard to forage.

361. You are referring, I presume, to questions of detention at home?—Yes.

362. Do questions of detention allowance for officers abroad come to you for your opinion?—Only in the event of there being a dispute.

363. If so, what reason is there why a different course should be pursued at home and abroad?—It is all settled in the colony by the General Officer, who gives an order on the military chest, and I only hear

of it in the event of a dispute arising. Colonel Westmacott, for instance, has a correspondence with the War Office for field allowance, which is the same thing; he claimed a certain amount of field allowance, and he happened to claim more than he was entitled to. I could elucidate the thing by showing how that claim arose; he claimed as a Brevet Officer and as a full Colonel, whereas he should only have claimed as a Regimental Officer.

364. (*Sir Edward Lugard.*) What objection is there to he claim being paid locally by order of the General Officer of the district?—I do not see that the General Officer of a district at home would have any means of knowing why the officer was detained, whereas I know it. An officer comes down to the district and reports himself, say on the 4th of the month, the General Officer of the district cannot tell whether he ought to have been there on the 4th or on the 2nd.

365. (*Chairman.*) Would he not have to produce an order directing him to go to the place?—Yes; but that is accompanied by the travelling bill.

366. Would not that be passed by the auditor at the War Office?—I think not. I think that there would be difficulties in it.

367. With regard to forage, is there any reference as to forage in the case of an officer of the Engineers?—No; it would only be a reference to me.

368. With respect to passage allowances, is there anything peculiar to the Corps of Royal Engineers?—Yes; in the first instance an officer is put under orders for a particular place, and then I have to apply to the War Office through the Quartermaster-General for the officer's passage to be provided for him.

369. When he is placed under orders, does it come from the Adjutant-General?—I first of all select an officer available for the service, I then forward the name to the Director of Works to know whether he has any objection to so and so being appointed to that service; I get back a reply that there is no objection. I then place that officer under orders for the service, first giving him a certain amount of leave. I apply to the Military Secretary for a passage for him, who refers to the War Office, and the Quartermaster-General says "passage is provided for such and "such an officer on such a day." I also write to know whether he has a wife and family, and servants, and how many there is to be passage for; an answer comes to that enquiry, and I then get a passage in addition to the officer's passage, for so many persons belonging to him.

370. Would he communicate with the Quartermaster-General?—Yes.

371. What is the advantage of writing through the Quartermaster-General?—Simply because he is the medium for the carrying out the movement of troops.

372. A requisition, for example, from your department direct to any office having the control of passages would save correspondence?—Yes; if I communicated direct with any department. The Quartermaster-General is the department with whom I am now ordered to communicate.

373. Your duty would be to say that a passage should be provided for an officer?—Yes; all of which I must find out for communication to him.

374. (*Sir Edward Lugard.*) Then you do not communicate with the Military Secretary upon the subject?—Yes; it goes through him.

375. (*Chairman.*) What link in the chain would he form?—I do not communicate with regard to the passage; I communicate with His Royal Highness as to the appointment; to know if he has any military objection, which I do through the Military Secretary.

376. (*Sir Edward Lugard.*) Do not you at present take the orders of the Commander-in-Chief?—Yes; but I put it before him in an official shape through the Military Secretary, and if there is anything particular he always sends for me.

377. (*Chairman.*) With respect to the head at page 118, "extra pay, and servants' allowance "from all stations at home and abroad examined "prior to transmission to the War Office and agents," do you think that that examination is necessary?—There is no doubt about it. An Engineer Officer is allowed only 61 days' leave of absence in the year; they have to forward a return from all stations, notifying the officer's leave during the financial year. The extra pay and servants allowance is in triplicate, one copy being for the information of the agent, one for the War Office, and one for myself; and upon a comparison of those returns I am enabled to forward the Extra Pay Return, both to the War Office and to the agent, without any chance of its being found to be incorrect. That is most essential. It is curious how many mistakes of that sort occur.

378. In what form does the case come to you?—There is a return showing the number of officers who have had leave during the month, and that is certified by the Commanding Officer of the district; there would be constant references to the agents if a check of that sort were not kept.

379. I presume that the agent examines on the part of the officer?—Yes. There are always discrepancies in some shape or other, which the War Office detect, and the matter is forwarded to me for explanation, and it is by these returns that I am able to adjust the matter between the War Office and the agent.

380. Would not the officer be paid on the spot?—No; he always draws on the agent, we never get our pay from local sources.

381. In the case of an officer at Hong Kong, would his pay be included in the account of the regiment?—Yes; at a foreign station.

382. Do you get these returns from foreign stations?—Yes; from every station

383. How would these returns be utilized at the War Office, in the examination of an account from a foreign station; must not the examiner go through it again to see that the 61 days were not exceeded?—We are ordered to send a return to the War Office, and I do not know what they do with it; they make disallowances in the Agents' accounts, which are referred to the Deputy Adjutant-General by the Agents, to confirm or rectify.

384. (*Sir Edward Lugard.*) What questions are these—"All questions relating to pay"?—I may specify one which will exemplify them. A Lieutenant when he comes within a certain position on the list of Lieutenants gets an increased pay; I have to communicate that to the agent, and if the officer is in India, I have to communicate to the Commander-in-Chief in India, that Lieutenant So-and-so has become entitled to increased pay, and I forward a return to the Commander-in-Chief in India, which is the voucher for his receiving it. Extra pay is a serious element of correspondence, because in several cases the extra pay is supposed to meet certain allowances and travelling and we are in constant correspondence with the War Office, and the correspondence accumulating in that respect is something which no one would believe.

385. (*Mr. Stansfeld.*) That is your correspondence with the War Office?—Yes; putting forward an officer's claims and his opinion as being right or wrong.

386. (*Chairman.*) I suppose that you would simply transmit it to the War Office?—Yes; if I thought that the claim was a proper one.

387. You dispose of any claim which you think is not warranted or proper?—Yes; I forward a just claim through the Military Secretary.

388. (*Mr. Stansfeld.*) What is the meaning of the head "Estimates"?—An estimate is made in my office. We estimate for all those requirements. There is the regimental pay, and then there is the extra pay, in serving both at home and abroad, and then there is a servant's allowance for every officer; so that the War Office has the cost for the following year; and upon that the estimates of the Secretary of State are provided.

389. (*Sir Edward Lugard.*) There is no such estimate prepared by the Artillery?—I should think that there was. If not, the reason of it would be that they have nothing but the actual regimental pay to

Colonel the Hon. H. Fane Keane, R.E.

14 Oct. 1869.

trace, whereas we have the extra pay and servants' allowance.

390. The promotions, I suppose, go to the Military Secretary?—Yes; all promotions and retirements go to him.

391. The officers get an allowance in lieu of quarters, do they not?—Yes; officers have the privilege of taking quarters, and if they have them they are mulcted a certain portion according to rank. Then the returns have to be made locally to the Barrack-master, of the number of officers occupying public quarters; the return is made in order that the amount may be deducted from the pay.

392. (*Chairman.*) You keep a record of the service of an officer?—Yes; of everything which he has done upon home and foreign service; his service is put down with the honours which he may have received.

393. Are books of the same sort kept in the Military Secretary's Office?—Not for the officers of the Royal Engineers.

394. The Military Secretary refers to you when he wants to know as to the service of an officer in the Engineers?—Yes.

395. (*Sir Edward Lugard.*) When you submit anything to the Military Secretary, do you do it by letter or by memorandum?—By a memorandum.

396. That memorandum, I suppose, has to be copied?—If it is a case of reference from the Military Secretary to me, I give a memorandum furnishing all the details and information upon the subject, and upon that memorandum he frames his letter for the Secretary of State for War, with His Royal Highness's concurrence.

397. (*Mr. Stansfeld.*) How is your correspondence with the Adjutant-General and the Quartermaster-General carried on, is it by the same system?—Yes; in every such case I write a letter. I never communicate with a General Officer. In anything which is to be communicated to the General of the district, I always write a letter for the Adjutant-General to sign.

398. (*Chairman.*) The correspondence with the War Office would be by the Military Secretary?—Yes.

399. You would supply the information, and he would write the letter?—Yes.

400. In the same way the War Office would write to the Military Secretary, and the Military Secretary refer to you?—Yes.

401. Do you think that any saving of time could take place with respect to that correspondence by sending minute papers in the same way. War Office minute papers are sent straight to the Deputy Adjutant-General to dispose of?—Yes; that is done in many cases, particularly in the Clothing Branch, Arms, and Store Branch.

402. Do you think that that is a good way of doing business?—Yes; if the Deputy Adjutant-General has made application as to the disposal of clothing, the Clothing Branch in the War Office settle it, by accepting my proposal that it should be sold on the spot, and I merely put in my decision that my proposal has been accepted, and that settles the question.

403. Do you think that that might be done in any other kind of business?—I think that there might be instances in which it might be done.

404. Is the correspondence in that branch very heavy?—Yes; I have the daily average for a year, but it is not uniform. When we get heavy mails in from the Cape and other places the business is heavier. This paper (*producing the same*) would represent the amount of work done, and it shows that there are 120 or 130 letters in a day.

405. (*Sir Edward Lugard.*) With respect to page 120, there is "the correspondence to and from the "Adjutant-General"; do you write to the Adjutant-General?—I write in this way: if I have a Court-Martial which I am not positive about, I write a memorandum to request him to ask the opinion of the Judge Advocate-General upon a point on which I think there is any doubt. There are a great many things upon which I do not feel competent to give an opinion, and then I ask the Adjutant-General by a memorandum to provide me with it.

406. (*Mr. Stansfeld.*) In this return these are letters and not memoranda?—Yes; for last year.

407. During that year you received 323 letters direct from the War Office?—Yes.

408. (*Chairman.*) So that there would be actual letters?—Yes; there are questions of the transfer of Volunteers from the Artillery and other branches to the Engineers, and then I have to write for a descriptive return of the men.

409. (*Sir Edward Lugard.*) Could you not send in the letter, and a note at the back of it?—The return as to the men comes from the Commanding Officer to the Adjutant-General, and it is passed on to me.

410. Could not there be a note made on the letter?—Yes; it is noted for the information of the Deputy Adjutant-General, Royal Engineers.

411. (*Mr. Stansfeld.*) In what classes of cases would those War Office communications direct to you be received; on what subjects do they communicate directly with your Department?—A great many letters have been written lately on the subject of the supply of Stores, and on all occasions on the details of supplies of clothing.

412. For the information of the Control Department?—Yes; and the letters then would have been with the view of getting the stores which we have not been successful in getting.

413. Would that be more than the average of letters?—No; I should say that it would be under the average.

414. (*Chairman.*) A memorandum would often take as much time to write as a letter?—Yes.

415. What is the correspondence on page 120, "to "and from the Military Secretary relative to finance"?—All correspondence with regard to finance goes through the Military Secretary. Supposing that an officer changed his station, and that he had a just claim to forage, he would apply to me, and I should forward the letter to the Military Secretary, and ask him to forward it to the Secretary of State for War, with His Royal Highness's approval, first mentioning to His Royal Highness that I had done so. A great deal more correspondence of that sort arises with regard to our service than with respect to any other: for instance, the Royal Engineer Officers who were ordered to Prussia lately, a great many letters have passed, and we ought to have it clearly defined what allowances an officer is to receive before going on such duty. They all make a return. The correspondence, compared with other branches of the Service, is double.

416. (*Sir Edward Lugard.*) That arises, in a great measure, from the peculiar manner in which you are paid?—It would be subject to the extraneous occasions which constantly arise. We frequently have non-commissioned officers and soldiers sent to the business of the great manufacturing departments. We have correspondence in all those cases, because there is nothing in the Pay Warrant which meets the case of a non-commissioned officer detached on those special services.

417. (*Chairman.*) Assuming that there was a fixed regulation, the necessity of sending in these demands through you would be obviated altogether?—Yes. If the same thing were done to the non-commissioned officers as to the officers, when they had been holding the position of Clerks of Works, there would be no difficulty whatever; but as it is, I am now not able to get the men paid their passage money for months afterwards, owing to the difficulties in the Audit Branch, and that again involves correspondence, because the men cannot be kept out of their money. When they communicate to their Commanding Officer, the Commanding Officer communicates with me, and I communicate with the Military Secretary.

418. What becomes of their claim in the first instance; is it paid locally?—No, it is not; and if a question arises, sometimes months elapse before it is settled and the men receive their money.

419. (*Mr. Stansfeld.*) During which time the claim is not met?—Yes.

420. The ordinary pay of course would go on?—Yes. To a great extent you cannot help that state of things taking place; it is the military element

coming in and taking the place of the civil element. The Military Foreman of Works is placed in this position, because no arrangement has been made for those duties. A case in point occurred in the London district, and I have reason to believe that the question is being considered, but we have had no instructions about it.

421. (*Chairman.*) With respect to the two branches at page 119, namely, the Arms Branch and the Clothing Branch, speaking generally, what is the reason why the requisitions for arms and accoutrements might not be made straight by the different companies to the Controller, without going through the Horse Guards at all?—The Clothing Controller could not possibly be aware of the previous issues, with the return of last year showing the stores in hand, and he would not know what had become of the absent accoutrements.

422. (*Sir Edward Lugard.*) He would not issue until he did so; would not the Clothing Controller know the facts?—The Captain of the company could only know why the things were absent,—whether by desertion, loss, or damage.

423. Why could not the officer commanding the company, or detachment, make his application direct to the clothing authority?—If the whole of the arrangements were based upon there being a correspondence so conducted, I daresay that it might be carried out; but as it is at present, I do not think that it could be. There is an officer in this office who would at once answer very much better than I could do on that part of the subject; it, I think, would fail. We have been complimented as to the way in which we keep these returns of accoutrements and arms.

424. (*Chairman.*) Do you know what examination of the clothing demands takes place at the War Office? —No; I cannot tell what takes place in the War Office. I can tell you what took place when it was more under us than it is now. We have a demand which is always made two, and in some cases from distant stations three, years in advance, and the arrangements are made so that the new clothing arrives at the station about two months before the 1st of April, the date of issue. Any superabundance of clothing is carried on to the account which is returned every year, showing what is worth renewing, and also what is new, and from those returns the quantity can be increased and arranged for next year, and if there is any quantity issued which is too large, or too small, or which is moth-eaten, a correspondence arises as to what is to be done with it, the question is settled by reference to the Director of Clothing.

Colonel the Hon. H. Fane Keane, R.E.
14 Oct. 1869

425. Do you think that the thing is done twice over under the present arrangement?—I think not; in many instances it is done twice over because information supplied to the War Office is not made use of, for it refers to the special corps to give the information which it already possesses.

426. Do you think that any considerable amount of the returns from the corps are unnecessarily copied?—Yes, in the case of extra pay, I do not think that it is at all necessary that that return should be made in triplicate.

427. You probably think that there are other returns which may be dispensed with?—Yes, in certain cases, if they would only look at home for the information.

428. You have nothing to do with Barrack services? —No; that is entirely under the Director of Works.

(The Witness withdrew.)

Adjourned to to-morrow at 12 o'clock.

Friday, 15th October, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK, *in the Chair.*

Lieut.-General Sir EDWARD LUGARD, G.C.B. | The Right Hon. JAMES STANSFELD, M.P.

Major-General CLEMENT ALEXANDER EDWARDS, C.B., Inspector-General of Recruiting, examined.

429. (*Chairman.*) How long have you been Inspector-General of Recruiting?—Two years and three months.

430. Is your branch a division of the Adjutant-General's Department at the Horse Guards?—Strictly speaking it is under the Adjutant-General; that is to say, I take all papers and orders from him.

431. Looking through the general details of the business which you have sent in, it appears that your duties consist of everything connected with the raising of men for the Army, and discharging those recruits who are found to be ineligible?—With regard to discharge, I can only discharge a man before he is what we consider finally passed into the Service: that is, approved of by the commanding officer. There is one exception, however, to that, which is, that boys are allowed to be taken on probation for six months, and if they are found to be useless and bad, we give them what is called a protecting certificate, and send them away; I mean those who are not considered likely to turn out good soldiers.

432. You have also to deal with the re-engagement of soldiers?—Yes, with the whole of that; but the re-engagement is gradually becoming restricted entirely to men who are serving; that is to say, after the 1st of April, 1869, no man who has taken his discharge has any claim, or is allowed to be re-engaged unless the State apply for him. He should be warned of that when he takes his discharge. Neither can he re-enlist unless he does it under a feigned name.

Maj.-Gen. C. A. Edwards, C.B.
15 Oct. 1869.

433. As I understand you, he has no right to re-enlist, so as to derive any advantage from his previous service?—No; he can neither re-enlist nor re-engage.

434. Will you be kind enough to explain to the Committee what the branch of business is which is described as "Decisions of His Royal Highness the Field-Marshal "Commanding-in-Chief requested on proposed disallow-"ances"?—If the War Office propose a disallowance, it is very often submitted to His Royal Highness the Field-Marshal Commanding-in-Chief, for the purpose of ascertaining whether he sees any reasons for or against it, and there are sometimes particular circumstances connected with a case which induce His Royal Highness to recommend that the parties concerned should be allowed the money sometimes as a matter of favour, sometimes where evidently there has been some mistake, while in other cases he simply concurs in the proposal.

435. It is the expression of an opinion on the part

Maj.-Gen. C. A. Edwards, C.B.

15 Oct. 1869.

of His Royal Highness?—Yes; it is an opinion, and that is how it is worded.

436. With respect, in the first place, to the general business of your department, it would appear at first sight that the same office which is engaged in the recruiting and re-engagement of men, should also be concerned with the discharge of men. In your opinion, would it be convenient to concentrate the whole of the business connected with the recruiting, re-engaging, and discharging of men in the hands, or under the control of one officer?—I think it is evident that the whole question of supply should rest with one person; supply and reliefs should rest in the same office, because then you would be aware at a moment what amount of strength to put on, except in cases of transfers from indulgence, which is a matter of grace. I think that all questions relating to keeping up the strength ought to be dealt with in one office.

437. Could the grant of pensions to men after their discharge be dealt with in the same office, under the control of one man?—I see no difficulty in conducting the pension business in one branch, as that is after all a matter of Warrant in which it is laid down. There is a certain Warrant, according to the terms of which you must act in settling the amount of the pension. There are frequently pensions given beyond the Warrant as a matter of grace; such decisions could not rest with one individual.

438. I assume that a Board should be required to sit weekly to determine those cases, but that the office business should be conducted in the same division as the recruiting, re-engagement, and discharge business?—I think that is quite possible, certainly.

439. With respect to your correspondence with the War Office, is there, in your opinion, any unnecessary correspondence with the War Office in connection with the business you have to transact?—I think that there are many things that might be re-considered; for example, I think that the Inspector General of Recruiting might be put into closer proximity with the Under Secretary of State for War, with regard to all those questions, as you will observe, which arise as to foreigners, and men without parchment certificates, and a variety of other things of that kind, which are obliged to be referred to the War Office. I think that, if general rules were laid down for the Inspector-General, he might, without always submitting them to wishes to re-enlist, his parchment certificate having been burned at Hong-Kong, but the facts of the case being well known. That case must be submitted by His Royal Highness to the War Office for permission to allow this man to re-enlist, because he has no parchment certificate. In my opinion that is unnecessary.

440. Are all these small questions submitted to the War Office by you in a letter?—Generally speaking, I used to send them so, but I have very often lately enclosed them in a "minute paper," and I found that they did not object to it; stating, for example, "His Royal "Highness requests that this man, having lost his parch-"ment certificate, may be allowed to re-enlist."

441. The wording would be, I presume, a matter of form in that case; it would not go first to the Field-Marshal Commanding-in-Chief?—No; it would be impossible in every little case of that kind. I do not even submit such cases to the Adjutant-General; they are matters of detail. It is only the great questions that I take to the Adjutant-General. If I took every question of that kind to him he could not read all the papers over.

442. Everything, I suppose, cannot be submitted to the Field-Marshal Commanding-in-Chief?—All matters of very minute detail could not be submitted to him, nor could they be submitted to the Adjutant-General either.

443. Would more direct communication between yourself, as Inspector-General of Recruiting, and the War Office, and more general instructions given to you to authorise you to deal with certain classes of cases facilitate your business transactions?—Yes; that would decrease the correspondence very much, certainly.

444. Have you any observations to make with regard to returns?—The returns are very voluminous but information suddenly is so frequently required upon the subject of recruiting that perhaps if there have been many returns which have not been kept up you would not be able suddenly to obtain the information required. Parliamentary information might be required on some subject connected with recruiting, and then these returns are referred to.

445. Are you aware that those returns are now sent to three different branches of the War Office?—Yes; we send three of them, but they are a little diff rent in the War Office, do justice to both parties. For instance, at this very moment there is a question before the Under Secretary of State for War, as to a man who shape. They were all in force before I came into office, but they are for different purposes; some were for the trial of that experiment which we have in some measure lost sight of, I mean the question of recruiting by Pensioners, or by the Line, so that we have come to a kind of mixed arrangement now, and the question is no longer of any importance; but one of the returns was for that purpose. Another return, which was a very similar one, was sent to the Accountant-General's branch.

446. Are you aware that those returns produce sometimes different results?—I have been so informed, and the cause appears to be that one class of returns is based upon the weekly reports from recruiting districts, showing the number of recruits sent to regiments; these numbers have hitherto been materially affected by rejections of men at their destinations.

447. Would it, in your opinion, be an advantage if these returns were sent only to one branch?—Yes; and, if it were possible, I think that the whole system as to the returns might be revised.

448. That is a matter of detail that you could take up, I presume, at any time?—Yes; if we were directed to see what change we could effect in the returns

449. What pay and allowances do you receive?—I receive the pay and allowances of a Brigadier-General.

450. Do you consider that the pay and allowances which you receive are proportionate to the duties you perform?—No; because all expenses in London are so much greater than in the country, where other officers my rank are receiving pay as Brigadier-General; in fact, I consider that it is not worth an officer's while to remain in London for the sake of the post of Brigadier-General for five years.

451. Do you consider that the duties you have performed are fully equal to the duties of a Brigadier-General?—I should say that they have been more important, inasmuch as they have resulted in great financial as well as beneficial changes in the system of recruiting.

452. Do you receive pay and allowances equal to those of a Deputy Adjutant-General?—No; he receives the pay and allowances of a Major-General. I do not think I can make a comparison. I may state that since I have been in office I have effected a financial saving of between 6,000*l.* and 10,000*l.* a-year to the Government by changes which I have originated, be they good or bad; I say that they are good. I have certainly effected that saving to the Government by the simple system of doing away with the "conducting." I have saved between 4,000*l.* and 6,000*l.* a-year, and the men are no longer bandied about the country as they used to be after repeated medical examination.

453. Have you any suggestions to make to the Committee?—No; I think everything appears to be going on smoothly and well.

(The Witness withdrew.)

Sir WILLIAM T. POWER, K.C.B., examined.

454. (*Chairman.*) You are Commissary-General in Chief?—Yes.

455. You were a member of the Committee on Army Transport, presided over by Lord Strathnairn?—Yes; I was a member of that Committee.

456. Have you the report of that Committee before you?—Yes.

457. To what extent was it contemplated that the functions of the Quartermaster-General's Department with regard to transport should be altered by the introduction of the Control system?—The report of Lord Strathnairn's Committee lays down in various paragraphs, but particularly in Paragraphs 4 and 16, that the whole charge of transport, and all responsibility connected with the supply of transport should be with the Controller; that he should be the agent of the General Officer Commanding, for the charge and distribution of that transport, solely modified by any strategical considerations that the Quartermaster-General might consider necessary, so as to change the arrangements or extend them. But this is pretty clearly laid down, as regards transport, and it applies also to camp equipage, the quantity and description of both being determined in communication with the Quartermaster-General.

458. What meaning do you attach to the terms "strategical considerations"?—The nature of the country, of the climate, or of the operations, any of which might necessitate a change in the usual distribution of transport or of camp equipage; a reduction or an increase as the case might be. On a representation being made to that effect by the Quartermaster-General to the General Officer Commanding he would give any order that he thought necessary to carry out the object in view, in consultation with the Controller as to the means available, and with the Principal Medical Officers as to sanitary considerations. The available transport resources, the cover of the troops, their health, and other matters, besides mere strategical considerations, might have to be taken into consideration; all of which have been considered and agreed upon in communication with the Horse Guards.

459. What was the result of the correspondence? The result of the correspondence was, that it was settled by the circular which I have before me that transport requisitions should be addressed to the Controller. In Clause 58 of the Army Circular dated the 1st of May, 1869, it is laid down that "At stations "where the Control system is established, all requisi- "tions, returns, and correspondence relating to the above "services (land and inland-water transport) will be sent "direct to the Controller, who will obtain the approval "of the General Officer Commanding before complying "with requisitions in excess of the authorised transport "as sanctioned by regulation." And at Clause 111, "At stations where the Control system is established, "all demands from regiments, corps, or departments, "for stores which have heretofore been administered "by the Staff and Departments of the Army generally "will be sent direct to the Controller at the station, "which officer will be held responsible that no issues "are made in excess of regulation without his having, "in the first instance, obtained the special authority "of the General Officer Commanding." The sole exception to the issue of camp equipage by the Controller direct, and of his being the sole channel for communicating reports of such issues, grew out of the question of the strategical considerations; and by Clause 6 of Army Circular of June 1869, it is laid down, that "In "all cases when an increased allowance has been "ordered by General Officers, an immediate report will "be made by them to the Quartermaster-General, for "the information of H. R. H. the Commander-in- "Chief.

460. To what extent have the functions of the Quartermaster-General's Department and the Adjutant-General's Department been affected as to stores, by the introduction of the Control system?—Previously to the report of Lord Strathnairn's Committee, and to the regulations that were drawn up in consequence of it, all descriptions of stores, not Commissariat, were made upon requisitions by the troops, which were sent to the Quartermaster-General for every sort of stores not personal, and for all transport; and to the Adjutant-General for all arms, accoutrements, and personal equipment. These demands were checked by the Adjutant-General's or the Quartermaster-General's Department, and, when approved, were sent on to the Military Store Department, the Barrack Department, or other department as the case might be. A copy of such requisitions, if for issues beyond the regulated allowance, was sent by the Adjutant-General's or the Quartermaster-General's Departments to the Horse Guards. A report was also made by the Military Store Department, or other departmental officer, to the War Office. The troops, instead of obtaining their stores directly from an officer responsible to the War Office, made those requisitions through an independent department, not responsible for supplying or accounting for stores, and that department gave an order upon which the Stores were issued, and numerous references and correspondence took place between the troops, the Quartermaster-General or Adjutant-General, and the Store officers, before any disputed point could be settled, or any additional demand could be complied with. Whereas, under the present arrangements, the troops will make their requisitions direct upon the Control Department, and if the demands are within the quantities sanctioned by regulation, the Controller can at once make an issue direct to the troops, but if the demands are in excess of the regulation, the Controller will obtain the authority of the General Officer for granting or refusing the supply, and will report for the sanction of the Secretary of State for War in every case in which the authorised quantities are exceeded. The correspondence is thus reduced to a minimum, communications are made as direct as possible, and the officers who are solely responsible,—that is, the regimental officer for the demand, the Controller for the supply, and the General Officer Commanding for any authorization that may be necessary,—are solely consulted.

461. That system would, therefore, obviate the necessity for any correspondence between the Quartermaster-General's Department, or the Adjutant-General's Department, at the Horse Guards and the War Office, with respect to supplies to the Army?—It would entirely do away with it, render it completely unnecessary, unless in exceptional cases, and a very large amount of correspondence would be got rid of.

462. Is that system entirely in accordance with the recommendations of Lord Strathnairn's Committee?—The exception is the case that I have referred to with regard to camp equipment, when the issues are in excess of the regulation, or are not strictly in accordance with the regulation. Those cases are reported to the Quartermaster-General's Department at the Horse Guards.

463. Have you seen this memorandum which I will read. It is a circular memorandum to the Royal Engineers, and it is to the following effect: "Com- "manding Royal Engineers and Officers Commanding "troops, companies and detachments of the corps, are "informed that whenever any articles of arms, accout- "rements, or equipment, are either given into, or "received from the Control Department, a report of "the same, specifying the articles in detail, is to "be immediately forwarded to this office" (Deputy Adjutant-General's Office, Royal Engineers, Horse Guards). That would rather appear to be inconsistent with the principles which have been laid down?—It is quite unnecessary as regards stores generally; it is equally unnecessary, with reference to the clause referred to, as to the issue of camp equipment. It is a report made by officers, who are not responsible for the supply, to officers having no power to regulate, or to increase, or to affect the supply in any manner. It is, in fact, the function of the Secretary of State for

Sir W. T. Power, K.C.B

15 Oct. 1869.

Sir W. T. Power, K.C.B.

15 Oct. 1869.

War, and not of the Horse Guards; the question is purely one of supply.

464. The principle recognized by Lord Strathnairn's Committee was that of concentrating responsibility?—Yes, for all supply, in the officer whom the Secretary of State for War has appointed, and whom he holds accountable for supplying the Army, to make him solely subordinate to the General Officer Commanding, who is responsible for everything. The report of Lord Strathnairn's Committee makes the Controller, for the purpose of fixing his responsibility, the direct agent of the General Officer Commanding, and the agent also of the Secretary of State for War, communicating with the one to obtain his preliminary authority, and with the other to obtain his final sanction for anything unprovided for by regulation that may be authorized. He is also the adviser of the General Officer Commanding on all administrative questions relating to supply and finance; and he is held responsible for the advice he gives in that capacity.

465. The object being to confine the duties of the Military Staff to military questions and to place the responsibility as to supplies upon the Administrative Staff?—Yes: the two lines are very distinctly and carefully drawn by Lord Strathnairn's Committee,—viz., that the responsibility for administration and everything connected with transport, supply, and finance, shall be solely in the hands of the Controller. He is the sole agent of the Secretary of State for War and of the General Officer Commanding, so that communication shall be as direct as possible. The military business, on the other hand, is left, and it is carefully left, without being interfered with in the smallest way, to the military officers who are responsible to the Horse Guards and to the General Officer Commanding; there is no interference between them as to their respective duties and responsibilities.

466. How would that system, taking, for example, the department of the Quartermaster-General, in your opinion work in active service?—I think that it would work perfectly well.

467. In what respect are the functions of the Quartermaster-General's Department affected, as to appropriation and other barrack questions?—The Report of Lord Strathnairn's Committee divides all barrack duties between the Commanding Royal Engineer and the Controller, the Commanding Royal Engineer taking the construction, repairs, and the charge of buildings, and the assessment of barrack damages; the Controller taking fuel and light, barrack stores, and assessment for all damages to barrack stores; and as Financial Officer he has charge of and maintains a check upon the Lodging List, and upon appropriations which may affect that List. That recommendation of Lord Strathnairn's Committee has been substantially carried out by Clause 47 of the War Office Circular, dated 1st May, 1869. At paragraph 47, there is a trifling departure from the general rule; the correspondence which should be sent, either by the Commanding Royal Engineer, or the Controller, as agents for the business, direct to this office, is handed to the General Officer Commanding, who sends it himself.

468. What object was gained by the practice of sending requisitions for stores and for transport, through the Quartermaster-General and Adjutant-General for approval, before being passed on to the officers in charge of the stores or the transport?—None whatever that I can see; the reference to them was merely nominal, as those officers were not responsible to the Secretary of State for the quantity of stores issued, nor for the correctness of the issue, nor for promptness of supply. Delay was created by their intervention, and it served, in some instances, to cover the really accountable officer from his proper responsibility, as he could make an excuse if anything went wrong, that it was by order of the Quartermaster-General's or the Adjutant-General's Departments. And they, if referred to, would say that they were not accountable; that the stores were merely dealt with by them on paper, and that they were responsible only to the General Officer Commanding.

469. Has the Quartermaster-General or the Adjutant-General any authority to increase or diminish the issues that are required?—No; they have no such authority under the regulation, practically I believe they used the General's authority "by order," and the Store Officer was responsible for reporting the matter to the Secretary of State for War. That authority was given possibly without reference to the General, and very often correspondence ensued in consequence; in fact it made a double system in every operation, and a double establishment, one representing the Horse Guards without accountability, and the other representing the War Office. At almost every point, except the issue of Commissariat supplies, the Store Officer (the accountable officer), was doubled by a military officer.

470. In case of additional issues being authorized, how were they reported with a view to obtaining the sanction of the Secretary of State for War?—They were reported by the Store Officer to the Secretary of State for War, and in some instances they were also reported to the Horse Guards by the Staff Officer. A communication was made to the War Office by the Horse Guards on the subject, so that two sanctions were demanded from the Secretary of State for War, one by his own officer, for the issue he had made under a certain authority, and the other by the Horse Guards, communicated through the Quartermaster-General, or the Adjutant-General. The correspondence came through those two channels to this office; and the head of the department in this office would of course look at the case as represented by his own officer.

471. The changes you have described in the practical conduct of business, consequent upon the establishment of the Control Department, would appear to make necessary changes of a similar character in the Departments at Head-Quarters?—Undoubtedly; the duties performed by the executive branches of the Control Department abroad and at home, in garrison, and in camp, should be superintended and directed by a department in the War Office organised on similar principles. Independent supply branches and Heads of Supply Departments in the War Office should be abolished, and the Controller-in-Chief should be assisted by officers or subordinates experienced in the several branches of the Commissariat, Military Stores, Barrack, Hospital, and Transport Services which now form the Control Department. Such an establishment in the War Office, I consider absolutely indispensable to facilitate work and ensure responsibility, and it was so considered by Lord Strathnairn's Committee. This has been, in some measure, carried out by the Controller-in-Chief, with excellent results as regards the reduction in establishment and expense in that department of the War Office. When the organization of the Control Department is complete, and in full operation at home and abroad, the War Office will be relieved of a vast mass of correspondence, references, and of executive duties which belonged to the departments outside, and a reduction, at least as considerable as that made in the Control Department, may probably be accomplished in other branches of the War Office, with equal advantages in directness, simplicity, and efficiency in the conduct of the duties. In the Horse Guards no change has yet been made in consequence of the introduction of the Control system; and the several branches, viz., the Military Secretary, the Adjutant-General, and the Quartermaster General, continue on their old footing, although there must be a large reduction of business, in everything relating to the Supply, Transport, and Barrack duties of the Army. Probably it may, in the end, be found expedient to reorganise the Military Staff on a system similar to that which has been adopted for Control; doing away with separate Staff Departments and officers, and bringing the whole under one direction, a Military Controller as it were, having under him as many Staff Officers as may be required for the different branches of Military business. It would certainly be productive of simplicity and of much economy, and, I think, a General Officer might find it as convenient to have one agent and one channel for the conduct of his Military business, instead of numerous independent Military Departments; as it is

admitted to be to have a similar agency for his administrative business. This, however, is a matter beyond my competence, and I refer to it only as connected with the Control duties.

472. (*Mr. Stansfeld.*) That would be something like the Chief of the Staff acting as Military Controller?—Yes; it would also facilitate the Controller's business if such a change took place. Very naturally the old organization of the Staff does not very readily coalesce with the new organization of the Control Department, and there is a disposition in some places on the part of the Adjutant-General's and the Quartermaster-General's Departments, to maintain in some shape or other the power of Control which they have hitherto had. In Ireland, however, where Lord Strathnairn has given these principles the firmest support, we have not had the smallest difficulty upon any question with the Quartermaster-General's or the Adjutant General's Departments. The arrangement proposed by Lord Strathnairn's Committee was, that the Controller, as agent of the Secretary of State for War and the General Officer Commanding, should be the sole channel of communication for all correspondence on administrative subjects. The method of conducting the correspondence was agreed to by the Horse Guards, and it was promulgated in January 1869, in almost precisely the terms that Lord Strathnairn's Committee indicates that the correspondence should be carried on.

473. Will you be good enough to describe what change has taken place as to the requisitions made for transport?—Formerly all requisitions for transport not required for the Commissariat Service, were made upon the Quartermaster-General, and upon his approval the requisition was complied with, whether for the Ordnance or Store Department, the Barrack Department, the Baggage of Regiments, or Camp Equipment; in fact for all supplies to the Army which were not purely Commissariat. The Transport for Commissariat supplies were ordered without any reference to the Quartermaster-General, but all the other transport was furnished on requisitions addressed to him, and by him they were forwarded to the Commissariat to comply with. Under the Control system it is proposed that the same directness of responsibility shall exist in the supply of transport as of stores; that the requisitions shall be made direct upon the Controller, who will approve them in every case in which they accord with the regulations, but in every other case he will submit them for the sanction of the General Officer Commanding, reporting to the Secretary of State for War any cases of excess that may appear necessary. The sole exception that is made by the report of Lord Strathnairn's Committee with regard to the interference of another department in transport questions, is as to strategical considerations, and the nature of the country, which might require that the proportions or the description of the transport should be altered; for instance, from wheeled transport to animal transport, or railway, or water transport, as the case might be; but that would necessarily be a subject of consideration with the General Officer Commanding, as to military considerations, and with the Controller as regards the means. Any decision come to upon the report as to strategical considerations, or the nature of the country, would be communicated to the Controller, whose business it would then be to carry it out.

474. Looking at the whole of the evidence you have given with respect to the changes made in the conduct of the business of Transport and Supply, consequent upon the Control system, and looking at the detail of the duties of the Quartermaster-General's and Adjutant-General's Departments at the Horse Guards which we have received, will you point out what portion of those duties would be rendered unnecessary in consequence of the establishment of the Control system, taking first the Quartermaster-General's Department?—The first that I perceive in the paper you refer to is, "Correspondence for carrying out the embarkation of "troops for foreign service and inter-colonial reliefs." That would remain as it is, as the question of sea transport has yet to be considered. As to the disembarkation of troops, boats and everything will be found by the Control Department, but everything as to the sea and shipping will still continue on the same footing as at present. The next thing is "Arranging for the "passages of individual officers and others, and correspondence connected therewith"; that duty is done by the Quartermaster-General's Department and by the Passage Branch in this office with the Admiralty in England; abroad, where there are no Naval Agents in the majority of cases, that duty is conducted by the Commissariat, on the requisition of the Quartermaster-General's Department.

Sir W. T. Power, K.C.B.

15 Oct. 1869.

475. If the same principle were carried out at home, the Passage Branch would be a branch of the Control Department?—Undoubtedly.

476. (*Sir Edward Lugard.*) That is to say, the Adjutant-General would order an officer to proceed abroad, and upon receipt of that order he would obtain his passage from the Controller?—Yes, that is precisely what is done abroad. Abroad an order is given by the Adjutant-General for an officer to embark for England, and he would then, wherever there is no Naval Agent, walk with that order into the Commissariat Office, where an order for his passage would be given in a contract vessel, or a bargain made for his conveyance.

477. (*Chairman.*) The business that would not be absorbed by the Control Department would be the sea transport?—Yes; sea transport has not yet been provided for, but it is strongly recommended by high authority that it should be considered at the earliest opportunity.

478. Then, "Correspondence relating to camp "equipment, stores &c., and inventions, and to the issue "of money allowances to officers' and soldiers' families"?—All that business would, under the present arrangements, be done by the Control Department, except as to the report of increased allowances of camp equipment that I referred to before.

479. Then the business would be confined to receiving certain reports containing information?—Yes; but not as regards the supplies, or allowances.

480. Then, passing on to the second head, the Barrack Branch,—"Correspondence as to erection, alteration, hire, and appropriation of accommodation for "officers and men, &c.," how would that be done?—The whole of the business in that first paragraph appears to be the work of the War Office; the Horse Guards would make any representation they thought fit as to the extension of barrack buildings; but it would, if approved, be carried out under the directions of the Secretary of State for War,—as to the buildings, by the Commanding Royal Engineer, and by the Controller as to the supplies of furniture, and stores. The function of the Horse Guards would be in advising the Secretary of State for War as to the extension, increase, or alteration of buildings, as regards the wants and discipline of the troops.

481. Are you acquainted with the mode in which similar business is transacted abroad?—Yes; that is how it would be done abroad. The General Officer Commanding, if he carries out an extension of building accommodation that is necessary, before reference could be made home, would direct the Royal Engineer to make a plan and estimate of the building, and if he approved these he would issue a warrant to the Controller to supply the money, and to enter into contracts; and the whole business would be carried out in that way between those two officers, under the authority given by the General Officer Commanding, representing the Secretary of State for War and the Horse Guards combined.

482. Do you think that to a certain extent the same system might be carried out at home, the Secretary of State referring to the Field-Marshal Commanding-in Chief, whenever any military or strategical considerations were involved?—Undoubtedly; and it would be a great simplification of business. There would be more or less references to the War Office in the early part of the business before it settled down into its proper groove, but that is how it will necessarily be carried out when things are sufficiently advanced.

483. (*Mr. Stansfeld.*) If I understand you rightly,

Sir W. T. Power, K.C.B.

15 Oct. 1869.

under the new system the suggestions which might come from the Quartermaster-General's office with regard to barrack accommodation and estimates would be of a general nature rather than as to questions of detail?—Yes; the suggestions would be made by the Horse Guards or by General Officers Commanding, to the Secretary of State for War, accompanied by the reports of the Commanding Royal Engineer and the Controller. The Director of Works; and the Controller-in-Chief inside the War Office would come to a conclusion, for the information of the Secretary of State, as to the proper extent and cost of the proposed arrangement. Then the whole of the details would be carried out by their officers in direct communication with this office, instead of being, as at present, carried out in detail through the Quartermaster-General's Department.

484. In the Barrack Branch of the Quartermaster-General's office?—Yes; which branch, as a Barrack Branch, would cease to exist; the quartering would still be with the Quartermaster-General.

485. (*Chairman.*) Turning to the Adjutant-General's Department, will you refer to page 110 of the printed return; as I understand you, all correspondence relating to arms, ammunition, and similar supplies would cease between this office and the Adjutant-General's Department?—Yes, entirely, except in the same manner as the Quartermaster-General's Department would be the branch from which the Commander-in-Chief would communicate with the Secretary of State for War as to buildings; so, as regards any general change in the description or quantity of clothing to be supplied to the Army, the Adjutant-General's Department would be the branch to communicate any suggestions on those matters. But the details which are now gone through on every point, requisitions, references, and correspondence as to the mere supply of individual regiments or officers, would cease entirely in the Adjutant-General's office, and general questions only would be treated by them. At the present time every detail comes through that office, and it comes very often to this office in duplicate; as the Store Officers have also to communicate with this office direct.

486. The same remark probably would apply to the supplies mentioned further on in the return in the office of the Deputy Adjutant-General of Royal Artillery?—Yes, as to the supplies of ammunition, arms, and guns, and so forth for the Artillery, and the same for the Engineers.

487. At page 116 of the Return you will see as part of the business conducted in the Office of the Deputy Adjutant-General, R.A., "Equipment of Field Artillery," "Militia Artillery Service: all estimates and demands "for this service as far as concerns the supply of Ord- "nance and Artillery Equipment," and "Volunteer "Artillery Service?"—Yes; those like other stores are matters governed by regulation, or by decision of the Secretary of State for War, which apply generally. Special applications and requisitions founded on those regulations or decisions would be made direct to the Controller from a district wherever it was requisite, instead of going, as now, in detail to the Horse Guards.

488. Would the same reasoning apply to certain other duties, which you will see referred to at page 119 and the following pages, with respect to the Deputy Adjutant-General, Royal Engineers?—Yes; they each divide the work which can be done more directly at this office, or by the Control officers. All these matters are the subject of regulation or of special approval by the Secretary of State for War, generally of regulation. There is no reference whatever necessary. The application could be made direct to the Controller, who would order the issue and be responsible for it without reference to this office, or to the Horse Guards. It would only be in exceptional cases where the regulation could not be observed, in which a reference to this office for instructions, by the Controller, would be necessary.

489. (*Sir Edward Lugard.*) Are you aware of the circumstances under which the Corps of Royal Engineers is employed, and do you conceive that a requisition could be made from that corps in all cases?—I cannot see any possible difficulty in it, as they are always within some military district. If ordered to report themselves to the Commanding Royal Engineer, in the military district, any requisition for supply would be made through his authority to them. If they belonged to the Survey Department in London, the application would be made through the head of that department in London without reference to the Horse Guards, or the War Office, and would be complied with if within the regulation; if not, a reference must be made to the War Office for sanction, upon which the issue must be made; but in neither case can I conceive any direct action of the Horse Guards to be necessary. There are other corps which are even more scattered than the Royal Engineers, for example the Coast Brigade of Artillery, which is quartered in very small detachments all round the coasts of England and Ireland, and yet everything, including their clothing, their food, and their barrack supplies, can be furnished to them without any extraordinary machinery, or any great difficulty; in fact the difficulty begins when they are taken out of the ordinary category, and brought under another authority or system.

490. (*Chairman.*) Explanations as to any irregularity could be more easily obtained when an application is made locally than when it is made to Head-Quarters?—Undoubtedly.

491. Because it would appear that a reference must always be made to a district before the difficulty can be solved?—Yes; and the stores must generally be supplied in the district also.

492. As you have described it, the introduction of the Control system would appear to relieve the department of the Quartermaster-General at the Horse Guards of a considerable portion of its duties?—Of a very large portion of them. It would relieve it of the whole of the details connected with the supply of stores, camp equipage, transport, barrack questions, and many other items.

493. In the Adjutant-General's Department also a certain portion of the duties would be rendered unnecessary by the introduction of the Control system?—Yes; everything in fact connected with clothing, arms, ammunition, and the personal equipment of the men.

494. Practically the result would be that just as in a military district, or in the case of an army in the field, the responsibility for supplies is separated from the responsibility for all purely military matters, so in superintending the administration of the Army, the responsibility as to supplies would rest with the Controller-in-Chief, and the military branches would be left more free to deal with the purely military questions relating to the Army?—Undoubtedly, that should be the intention.

(The Witness withdrew.)

Commissary-General William Henry Drake, C.B., examined.

Com.-Gen. W. H. Drake, C.B.

15 Oct. 1869.

495. (*Chairman.*) You are now Controller for Great Britain?—Yes.

496. You were Controller in Ireland, were you not? Yes; for more than two years.

497. Will you be good enough to state to the Committee the circumstances under which you were first appointed?—Lord Strathnairn, in the course of the Fenian Insurrection, requested the Secretary of State to supply him with an officer in the position of Controller, as contemplated by the Preliminary Report of his Committee, and in consequence of that I was sent over to Ireland to act in that capacity.

498. Then, I presume, you are fully conversant with the circumstances connected with the introduction of

the Control system into Ireland?—Yes, entirely. I consider that I had the initiation of that system into Ireland.

499. Will you state to the Committee what has been the general result of the system up to the present time?—I am permitted by Lord Strathnairn to say that it has been most satisfactory. He permitted me to mention to His Royal Highness the Commander-in-Chief that it was most satisfactory; that during the time I had been there, there had been no single hitch, and he had not received one complaint.

500. Will you describe to the Committee the process which took place on your first arrival in Ireland, as to transport?—Lord Strathnairn having mentioned to me that he had found much difficulty in carrying on the arrangements for the numerous flying corps that were then in the field, wished me in the spirit of the recommendations of his Committee, to concentrate the duties of the various departments in myself, as to the Military Stores, the Purveyors, the Barrack Department, the Commissariat, and the duties of Quartermaster-General, in respect to inland transport. Of course I could only exercise control over the other departments under his authority. I had no power in my appointment to do so, nor had the officers any instructions to obey me, except upon such orders as I gave by Lord Strathnairn's directions. I did assume those functions, and I carried on the duties in the spirit that his Committee had recommended as to the Control system. The result has been, as will be best ascertained by reference to Lord Strathnairn's own report, that from the time of my arrival in Ireland as Controller, he was relieved from all the details of these Departments, and enabled to devote his attention to his more proper and important functions. He mentions that in in his letter to the Secretary of State for War transmitting the Report of his Committee.

501. Perhaps you had better read the letter?—Yes; and I think the letter will explain the matter.

"In illustration of the necessity and advantages of the "introduction of the system of Control which the Com- "mittee have recommended, I beg to state that the action "of the Military Departments under me, suddenly caused "by the recent Fenian insurrectionary movement in this "country, made me sensible of the want of a superior ad- "ministrative officer near me and always at hand, to act as "Controller, so as to ensure a prompt execution of my "orders, and an efficient and united working of the various "departments. The Store Department were issuing stores, "the Barrack and Purveyor's Departments were acting at "certain fixed stations, but none of them were capable of "expansion to meet the immediate wants of the troops in "the field. Under the influence of the bad effects of the "disunited working of these departments in an emergency; "of the inconvenience and loss of time caused by my having "to issue separate instructions to different departments "here, without calling to mind the opinion to which "the Committee had come on this very subject, I tele- "graphed to the War Office for a Controller, a striking "illustration of the necessity of such a functionary. My "request was immediately complied with, and Commissary- "General Drake, C.B., was sent to act here on the system "of the colonial and field mode of administration, the prin- "ciple recommended in paragraph 38 of the Report. The "arrangement met with the best results, and I was relieved "from much vexatious detail, and enabled to devote my "time to more important matters."

I think that will correspond with what I have stated to the Committee.

502. As far as I understand it, the effect of the introduction of the system of Control into Ireland relieved the Military Departments?—Yes, it did; and it relieved Lord Strathnairn from much vexatious detail; the detail of duties with which we were generally speaking more conversant than they were; it certainly had the effect of relieving them.

503. For example, the Quartermaster-General's Department had in some way, before you began so to act, the duty of dealing with stores, had it not?—Yes. Stores could not be issued without the authorization of the Quartermaster-General's Department. That department had nominal charge, but the charge rested with the various officers of the different departments, who had the actual charge.

504. Was the Quartermaster-General's Department responsible for the maintenance of a sufficient supply, either for issue or reserve?—Not in the least; each department was responsible for maintaining its own stores, not only as to the reserve, but also the actual supply required from day to day.

505. By each department you mean, I suppose, the Military Store Department, the Purveyor's, and the Commissariat?—Yes; and the Barrack Department.

506. What benefit resulted from the nominal charge of such stores being in the Quartermaster-General's Department?—I do not think that any benefit resulted from it. The system worked very well then, because it had got into a groove, and it worked well from the fact that everybody knew exactly what he had to do, just the same as may be said of the old mail coach system, which acted very well until railways were established.

507. As to the method of obtaining stores, will you be good enough to explain to the Committee, the difference between the process under the old system, and under the new?—A requisition for stores made by military officers, would have gone through seven or eight different hands at least, for references, before they could have been issued.

508. Will you shortly describe the process?—For instance, an officer commanding a regiment in a district, would make his requisition on the Quartermaster-General's Officer of that district, who would then be required to return it to the Military Store Officer, taking him as an example, to ascertain whether he had the stores in his custody, and he of course would have to furnish a written reply. It would then, after submission to the General commanding the district, be submitted to the Quartermaster-General's Department at Head-Quarters, for approval; taking it for granted that the Quartermaster-General had the authority from the General Officer Commanding to approve, he would first ascertain from the Military Store Officer at Head-Quarters, whether it was in conformity with the regulations, and having ascertained that, he would direct the issue. The approved requisition would be returned to the Quartermaster-General's Officer of the district, who would send it to the Officer Commanding the regiment from whom it emanated. The counterpart of the requisition would be sent by the Principal Store Officer at Head-Quarters, to the Military Store Officer of the district, to comply with the requisition, he being in fact the officer truly and solely accountable for the stores.

509. How many stages would it have to pass through?—About eight different stages.

510. Will you now describe the present system?—The system which is now in force is, that an Officer Commanding a regiment sends his requisition in duplicate to the Controller of the district, and he, ascertaining that it is in conformity with the regulations, would at once approve it, and send one copy to the Officer Commanding the regiment, and the other copy to the Control Store Officer, upon which to make the issue.

511. So that a considerable number of processes would be saved by that system?—There would be only two in place of eight.

512. Is that a fair illustration of what practically went on under the old system?—Yes; I think it is a fair illustration of what was almost invariably the case as to the mode of obtaining military stores.

513. Do you find, in respect to the combination of several departments, that great advantage has been derived by making one officer responsible for the whole of the supplies?—In Ireland we found that it worked very well, and I think that great advantages resulted; but it is a new system at present, it has not yet got into its full swing; the benefit that will be derived from it is not yet fully developed. In England it has scarcely commenced.

514. Did you receive every assistance from Lord Strathnairn and the Military Officers in Dublin?—I received the very greatest support from Lord Strathnairn, and I had the most cordial co-operation of the Quarter-

Com. Gen. W. H. Drake, C.B.

15 Oct. 1869.

master-General's and the Adjutant-General's Officers in Ireland, and I may say from all officers.

515. The introduction of that system would, I presume, have relieved the Quartermaster-General's and the Adjutant-General's Departments of some considerable portion of their work?—The Adjutant-General's Department to a small extent, but the Quartermaster-General's Department, I imagine, to a very large extent.

516. Taking the Adjutant-General's Department, requisitions for arms and ammunition would, I presume, be made direct instead of going through his office?—They were made direct in lieu of going through the Adjutant-General's office.

517. And as to the Quartermaster-General's office, would the same remark apply as to the movement of troops?—No; as to the movement of troops it had not been carried out when I left Ireland—it was coming into operation—in consequence of the Military Train being as yet in rather an anomalous position, that duty had not been transferred to me.

518. Is it proposed that ultimately that branch of the Service shall be under the Controller?—Certainly; as far as we could we performed the Land Transport, but that was rather infringing upon the military position of the Quartermaster-General, which I was very careful to avoid.

519. What part of the work of the Quartermaster-General's Department, in Dublin, would have been diminished by the introduction of the Control System?—The whole of his supervision in respect of stores and camp equipage, and eventually of transport will be.

520. No papers respecting those matters went through his department at all?—None necessarily; if they did it was an error.

521. Is it your opinion that the General Officer Commanding would, in future, obtain as full and complete information as to stores under the new system, as he did under the former one?—He will obtain not only fuller, but more accurate information; as he will obtain the information from the officer responsible for the stores, their maintenance, and quality. And not only that, but in many cases where it is a question of importance as to the value of stores, he will obtain all that information from the Controller, because it is his duty to know this. It was not so with the Quartermaster-General; he had no knowledge of the quality or the value of the stores, he only required to have certain stores at his disposal when he required them.

522. When you were in Ireland, had you placed under you munitions of war as well as other stores?—All stores in Ireland.

523. Did you find any practical inconvenience from having munitions of war as well as other stores placed under you?—Not any; certainly not, having competent officers to carry on the detail.

524. Who were those competent officers?—They came from the former Military Store Department.

525. (*Sir Edward Lugard.*) They were men who had gone through a course of instruction in the Laboratory at Woolwich, were they not?—I am not sure that they had done that, but they were old experienced officers. There was Mr. Bake, who was Superintendent of Stores. I had him as my more immediate assistant in Dublin, and he was a most competent officer.

526. (*Chairman.*) With regard to Barrack services, were the arrangements for taking up Barrack services by the Control Department made when you were in Ireland?—They were made, I may say, by Sir William Power, Colonel Martindale, the late Superintendent of the Barrack Department, and myself. The introduction of that system was consequent upon a report which we drew up for the information of the Secretary of State for War.

527. Has the introduction of that system relieved the Quartermaster-General's Department from a great amount of work?—Yes; the work that was originally performed by that department, is now partly done by the Royal Engineers, and the remainder by the Control Department. The Quartermaster-General is entirely relieved from all duties in connexion with barracks.

(The Witness withdrew.)

Adjourned till to-morrow at 12 o'clock.

Saturday, 16th October, 1869.

PRESENT:

The Right Honourable Lord NORTHBROOK, *in the Chair.*

Lieutenant-General Sir EDWARD LUGARD, G.C.B.

WILLIAM HENRY WHITE, Esq., examined.

W. H. White, Esq.

16 Oct. 1869.

528. (*Chairman.*) You are a First-Class Clerk in the War Office?—Yes.

529. In charge of the Correspondence Room which deals with questions of accounts of the Royal Engineers?—Yes; and financial questions as to pay and allowances generally.

530. Have you seen a Return of the business which is transacted in the office of the Deputy Adjutant-General of Royal Engineers at the Horse Guards?—Yes.

531. Have you considered whether it is necessary that all questions relating to expense, which are now passed through the office of the Deputy Adjutant-General, should pass through that office, or whether in some cases at least they might not come direct to the War Office?—I have prepared a memorandum upon that subject, which I will now hand in.

[The same was handed in, and is as follows.]

"MEMORANDUM.

"The office of Brigade Major of the Royal Sappers and "Miners, at Woolwich, was formerly for all purposes the "orderly room of the Corps.

"The designation of the Corps was altered to Royal "Engineers, and the office moved in 1856 to Chatham, and "shortly afterwards to the Horse Guards; the Brigade Major "being made an Assistant to the Deputy Adjutant-General, "Royal Engineers.

"Although it may perhaps be necessary for military "purposes that there should be one orderly room for the "whole Corps of Royal Engineers, it does not appear to be "necessary that all the correspondence under every head "detailed in the statement of duties performed in that "Office should be there dealt with, or reach the War Office "through that channel.

"The origin of the practice of making the Deputy "Adjutant-General of the Royal Engineers the channel of "official communication on financial questions, is no doubt "to be traced to the corresponding practice in the Royal

"Artillery (as laid down in article 44, page 184, and article "43, page 53, of the Artillery Finance Regulations of 1850); "but by an Artillery General Regimental Order of 16th "July, 1855, it was directed that 'questions connected "with small matters of finance,' should be addressed in "future 'to the Secretary at War direct, by Commanding "Officers of districts, battalions, &c.'

"It would, therefore, be consistent to apply a like rule "to the Royal Engineers, and I am not aware that any "hindrance to the public service would result from its "being carried out.

"The Royal Engineers have three Paymasters, to each of "whom is assigned the payment of one third of the Corps. "It is incumbent upon the officers who fill these appoint- "ments to be acquainted with the regulations of the Service, "and they are competent to advise upon or adjust the "generality of questions relating to pay and allowances, "which do not call for a departure from established regu- "lations. The War Office Registry of Correspondence "shows that, as a matter of fact, the Engineer Paymasters "do communicate direct with the War Office in the "generality of cases, and that the number of cases under "some of the leading heads of Pay, Allowances, and Claims "which reach the War Office from the Deputy Adjutant- "General Royal Engineers is exceedingly small.

"As regards the examination by the Deputy Adjutant- "General Royal Engineers, of the returns upon which "claims of Officers of the Corps to extra pay are allowed, "the certificate of that Officer is not given or required for "the regular station returns; the certificate of the District "Commanding Royal Engineer, in conjunction with other "sources of information existing in the War Office, being a "sufficient check upon the accuracy of the claims.

"The Deputy Adjutant-General moreover reported on "18th October, 1865, his inability to certify such returns, "and stated that he 'can only take the certificate of the Com- "'manding Royal Engineer at the station, that the Officers "'under his command are actually present and doing duty,' "so that much value cannot attach to the examination of "such documents at the Horse Guards, before they are "dealt with at the War Office.

W. H. White, Esq.

16 Oct. 1869.

"With regard to the cases of Officers of the Corps—

"1. On leave;

"2. 'Under Orders' or on passage;

"3. On special duty;

"the certificate of the Deputy Adjutant-General has "hitherto been required, owing chiefly to the absence "of other sources of information upon which the examina- "tion of the claims could be founded. I am not aware, "however, of any reason why such information should not "exist in the War Office for the Royal Engineers, as for "other branches of the Service.

"An official correspondence which occurred in the year "1867, may be quoted on this subject. Twenty-five "returns of Officers 'under orders' were then, in con- "sequence of a difference of opinion as to the interpreta- "tion of a regulation, sent back to the Deputy Adjutant- "General for correction, involving the disallowance of 207 "days Officers' extra pay and servants' allowance, which "would otherwise have been passed, had the certificates of "the Deputy Adjutant-General, as they originally stood, "been accepted without question."

532. From this memorandum I gather that in your opinion in many cases the claims might come direct to the War Office, and if necessary the opinion of the military authorities might be obtained in cases which appeared to require further elucidation?—Quite so; that is my opinion.

(The Witness withdrew.)

CORNELIUS J. BORROW, Esq., examined.

533. (*Chairman.*) You are a First-Class Clerk in the War Office?—I am.

534. In charge of the Promotion Branch?—Yes.

535. (*Sir Edward Lugard.*) Have you seen the printed list of the duties of the Military Secretary's Department at the Horse Guards?—Yes.

536. In looking through the duties in the Promotion Department, have you seen any that could be performed at the War Office instead of coming through the Military Secretary?—The first that occurs to me is the article about the Reserve Fund; and inasmuch as we keep the account in this office, I do not see the object of keeping a duplicate at the Horse Guards.

537. You think that the agents should keep one account, and that the other should be kept by the War Office?—Yes.

538. You would send direct orders to the agent to pay certain amounts to officers?—Yes; as the Horse Guards have sent them previously.

539. What check have you upon the promotions and appointments that come in the Submission Papers?—They are examined by the Army List to see whether the officers are correctly described in the papers, and also whether they are entitled to promotion by length of service, and to see that the establishment is not exceeded.

540. I mean the regimental promotions?—We have the names of all the officers in the Annual Army List, and we see that they are correctly described.

541. Do you find that check necessary?—Yes; we find errors very frequently in the descriptions?

C. J. Borrow, Esq.

16 Oct. 1869.

542. Therefore a check is necessary?—Quite so.

543. From what do the errors chiefly arise?—From not describing the officers properly; they are principally clerical errors.

544. Do you keep "a book showing the amount "which is available for retired and full-pay"?—Yes.

545. And for "grants of good-service pensions"?—Yes.

546. Do you keep "a book showing the name and "date of decease of every officer who dies whilst on "half-pay"?—Yes.

547. With regard to the correspondence relating to the appointment and promotion of medical officers, what is your opinion?—I think that that is capable of improvement.

548. (*Chairman.*) Do you think that the process might be simplified?—Yes; I think that the paper might come as a Minute from the Director-General for the approval of the Secretary of State, to be returned to the Medical Department for the Military Secretary to insert in the Memorandum Papers.

549. Is there any other portion of the business that you think might be simplified?—Yes; the reference to this office of the retirments of officers by the sale of their Commissions, when they are clearly entitled to full price by the Regulations

(The Witness withdrew.)

Adjourned to Friday next at half-past 12 o'clock.

Friday, 22nd October, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK, *in the Chair*.

Lieutenant-General Sir EDWARD LUGARD, G.C.B. | The Right Hon. JAMES STANSFELD, M.P.

WILLIAM GEORGE ANDERSON, Esq.

Lieutenant-General Sir J. HOPE GRANT, G.C.B., examined.

Lieut.-Gen. Sir J. Hope Grant, G.C.B.

22 Oct. 1869.

550. (*Chairman.*) You are Quartermaster-General of the Army?—Yes.

551. How long have you been Quartermaster-General?—Four years next month.

552. We find on looking at the return of the business done in the offices of the Military Secretary and the Adjutant-General, that certain business is done in those offices with respect to the movement of troops and the passages of officers. Can you explain to the Committee how the division takes place, and how the correspondence relating to those matters is carried on?—Everything relating to the movement of troops goes through the Quartermaster-General's Department.

553. And as to individual officers as well?—Yes, it does in almost every case; for example, if an officer is going with drafts of men, the Adjutant-General names him to the Quartermaster-General, who finds his passage for him.

554. How does the business come from the Military Secretary's Office to you?—I will explain to the Committee: very little passes through his hands, the only cases are those of proposals for foreign reliefs, or inter-colonial movements, for the Secretary of State for War's concurrence and the Queen's sanction: they go through the Military Secretary, but that is principally on account of the Queen's approval having to be obtained.

555. In that case the Military Secretary is merely the channel of communication?—Yes; and therefore it certainly gives me more letters to write; but I do not see how that can be avoided, because the Queen's approval has to be obtained. The Military Secretary also requires to have the earliest information of a relief in reference to the appointment of officers. There are also the letters and questions affecting the reduction or augmentation of garrisons abroad, and the distribution of troops at foreign stations. Those cases are sent to the Military Secretary in consequence of regiments being ordered home and companies reduced, and therefore he has to be informed of that in consequence of the reductions taking place: that is a matter which we could hardly avoid sending to him.

556. Does it not go to the Adjutant-General also?—It of course goes to the Adjutant-General and the Military Secretary sends it to him.

557. Are there any other matters that you refer to the Military Secretary?—Yes, if I have any remarks on a proposed new Warrant or question affecting Finance.

558. (*Sir Edward Lugard.*) Would it not be sufficient if you notified to the Military Secretary that such and such a regiment was to come home?—If you mean in cases of foreign reliefs, then the Queen's authority has to be obtained: that is the reason for sending it to him.

559. What are the steps that you take, when a relief is to be carried out?—I select regiments; I submit them to the Commander-in-Chief for approval.

560. I suppose you would take the orders of His Royal Highness the Commander-in-Chief?—Yes, I take the orders myself, but forward them through the Military Secretary. I go to the Commander-in-Chief and get his order that a regiment is to be brought home, and then I go back to my own office and write to the Military Secretary to say that I have obtained His Royal Highness's concurrence, and then the Military Secretary forwards it on to the Secretary of State for War.

561. (*Chairman.*) You write to the Military Secretary?—Yes.

562. And he writes to the Secretary of State for War?—Yes; but then there are a great number of points which I do not refer at all to the Military Secretary; I write to the War Office direct.

563. What objection is there to your communicating directly with the War Office?—Only that the Queen's sanction has to be obtained, and what I have previously stated.

564. (*Sir Edward Lugard.*) The first step is to obtain the concurrence of the Secretary of State for War?—Yes.

565. Could you not send the decision of His Royal Highness, or the recommendation of His Royal Highness direct to the Secretary of State for War, and when the concurrence of the Secretary of State for War was obtained could you not pass it on to the Military Secretary?—Of course I could do it.

566. Can you mention any other business that is sent to the Military Secretary?—As a general rule, previous to the introduction of any new principle into the Army, in which the Quartermaster-General is concerned (such as the Control system or the employment of soldiers in trades), he corresponds with the War Office through the Military Secretary, upon the proposed regulations. After the establishment of a new system he corresponds direct with the War Office upon the details.

567. It would rather seem as if the Military Secretary was in some way superior to the Quartermaster-General, would it not?—My idea is that the Military Secretary is the mouthpiece of the Duke of Cambridge—his amanuensis—to save His Royal Highness trouble. I do not think that he is superior in any way.

568. If it be the case that the Quartermaster-General takes his instructions from His Royal Highness the Field-Marshal Commanding-in-Chief directly, what advantage is there in a letter passing through the Military Secretary?—I do not know, except that it would not do for me to write to the Queen.

569. That would really confine the Military Secretary's duty mainly to matters connected with promotions and appointments?—A great deal of that. Then there is another point that I wish to refer to. Recently there has been a good deal of correspondence with the War Office, through the Military Secretary, upon the selection of Officers of the Indian Army to go through a course of instruction in Army signalling and telegraphy at Chatham, and that I think need not go through the Military Secretary.

570. Is that the business of the Quartemaster-General?—Yes; signalling and telegraphy.

571. What is the reason why that is not part of the duty of the Adjutant-General?—Except that it is in a measure connnected with the movement of troops.

572. In other cases, if officers were sent anywhere, the channel of communication would be the Adjutant-General, say, for instruction in the School of Musketry?—Yes; for instruction of that description.

573. Is there any particular reason why that matter should not be dealt with in the same way?—Instruction in musketry is a matter of discipline; signalling and telegraphy are connected with field movements.

574. (*Sir Edward Lugard.*) Does not the system of instruction in telegraphy lie with the Royal En-

gineers?—Yes; but the classes are arranged by the Quartermaster-General.

575. Then what connexion has the Quartermaster-General with that?—I do not know of any other reason than what I have given, that it has something to do with the movement of the troops.

576. Not more than musketry has?—No.

577. (*Chairman.*) Is there any other point to which you wish to refer?—Nothing more with respect to what I have to do with the Military Secretary. There are other things that I can mention with regard to writing direct to you. The improvement, alteration, and increase of barracks, the use of them by the militia, volunteers, or civilians, I send direct to the Under Secretary.

578. With respect to barracks, do you mean barracks at home and abroad?—Yes; both at home and abroad.

579. Do the returns with respect to the barracks come through you from abroad as well as at home?—Yes.

580. Is the same course taken as to that correspondence, from the foreign stations and home stations?—As to increase of barracks, that would be sent by the General Officer Commanding from abroad, and in the colonies, to the War Office.

581. Would it be sent to the Horse Guards?—In some cases. Then there is another point: the provision of rifle ranges, exercising grounds, gymnasia, gardens, and other facilities for recreation; the employment of soldiers in trades, and the management of regimental canteens.

582. As to the provision of rifle ranges, exercising grounds, gymnasia, and so on, what takes place in the Quartermaster-General's Department upon that; is it merely a channel of communication, or is any opinion given?—The Officer Commanding the Division writes to recommend a particular spot of ground, which recommendation he forwards through the Quartermaster-General, who takes the opinion of the Commander-in-Chief.

583. Is there any reason why the Officer Commanding should not send direct to the War Office?—I think that the Commander-in-Chief requires to know whether it is suitable to the requirements and convenience of the men. I mean where the exercising ground is.

584. Would not the General Commanding the District be a sufficient authority and competent judge?—In that case you would do away with the power of the Commander-in-Chief altogether.

585. Is the same course followed abroad, for instance, at Gibraltar. If there is a question about a piece of ground there, would that be referred to the Commander-in-Chief?—I think not; it would come direct to the War Office.

586. That being so, what reason is there why the same course should not be followed, both at home and abroad?—I do not think that it would be a very proper thing, because the Commander-in-Chief goes and inspects all these places himself, and when he has seen a piece of ground and approves of it as being well adapted for the purpose, he recommends it or not, as the case may be.

587. Might not the opinion of the Officer Commanding-in-Chief be taken whenever it was required, by referring the papers from the War Office for an opinion?—I think it is better to go first to the Commander-in-Chief and let him recommend it to the War Office.

588. Does every barrack detail come up to you?—Yes.

589. What number of questions might there be upon that subject?—I do not know.

590. Is the business very considerable?—Yes, it is.

591. Is that a matter with regard to which the Field-Marshal Commanding-in-Chief would decide every point?—Yes; he always makes a point of doing it, everything is shown to him.

592. Does that entail an enormous amount of work?—It creates more work of course.

593. Then with regard to questions relating to the supply of forage, fuel, and light?—Those are all sent under the Control System, direct to the War Office.

594. Do the requisitions for forage come to you, or are the questions merely referred to the War Office for an opinion?—There is occasionally an application made for more forage for horses, which comes to me.

595. For instance, would a requisition from an Officer Commanding a Cavalry regiment come to you?—Not since the Control System has been established.

596. The Controller being in point of fact the officer of the General Officer Commanding?—Yes.

597. Might other questions of the same class,—such as fuel,—with a view to facilitating the transaction of business be more dealt with locally than as they are at present?—I think that fuel and light might be attended to by the General Officer on the spot, and the Controller, very well. Then there are queries arising out of applications made by officers for field and detention allowances, and requisitions for ration allowances for soldier's families when separated from the troops.

598. Those come straight to the War Office, do they not?—They are first referred to me, and I send them to the War Office. When sent direct to War Office, they refer to me for an opinion.

599. The claim would come straight to the War Office, would it not?—Claims by Officers for field and detention allowance go direct to War Office; but if for a soldier's family it comes to me. Then there are references for stations to which clothing should be sent. Information for replies to questions in Parliament. The Quartermaster-General sends to the War Office. Then notices of proposed Home Movements, and an Annual Statement of Troops to move by sea, at home and abroad, during the year, to enable the Admiralty to prepare their Transport Estimates.

600. Is that sent to the War Office?—Yes; direct.

601. Are you able to state what the annual cost is of the transport of troops at home and abroad?—I am not. After the Secretary of State for War's concurrence, and the Queen's sanction has been obtained by the Military Secretary for a Foreign Relief, or Intercolonial Movement, the Quartermaster-General corresponds direct with the War Office, notifying the shipping arrangements, and he answers direct to the War Office all queries in respect to the movements. Then, also, the Quartermaster-General corresponds direct with the War Office upon passages of individual officers, or non-commissioned officers, private soldiers, pensioners, and soldier's wives. All that is done by direct communication with the War Office.

602. With regard to the correspondence relating to passages, do you think there is any way of simplifying the mode in which that is dealt with?—I question whether it would be done shorter in any other way. I do not see how it could be done.

603. You send a letter, do you not, to the War Office, asking that a passage may be ordered for an officer? What is the correspondence necessary for that purpose with the War Office?—No; this is done by the Military Secretary, and I receive an authority to arrange a passage for the Officer.

604. Will you be kind enough to look at the Memorandum showing the course pursued at the Horse Guards, in providing passages for officers proceeding abroad, and supply the Committee with a Memorandum stating whether you think any simplification might be introduced into the system?—The present system works very well; I cannot suggest any other.

605. Do you correspond with the Adjutant-General by letter?—Occasionally.

606. Do you also correspond with the Deputy Adjutant-General by letter?—Yes; occasionally.

607. And with the Deputy Adjutant-General Royal Engineers too?—Yes; very seldom, but occasionally I do.

608. Can you furnish the Committee with a Memorandum, as to the manner in which estimates for the movement of troops are prepared, and the manner in which care is taken that they should not be exceeded during the year?—I have nothing to do with preparing estimates, except to propose the movements that I consider necessary to the Commander-inChief; neither do I keep any check on the expenditure.

Lieut.-Gen. Sir J. Hope Grant, G.C.B.

22 Oct. 1867.

609. Have you a register of letters here?—Yes. (*Producing the same.*)

610. Do you think that there should be a general register of all letters received at the Horse Guards, or a separate one for each department?—I do not see how one general register of all letters could very well be kept, because there would be so much time occupied before the letters could be carried into the offices. I think that each department should have a register, but that it should be exactly the same in each department, that is to say in the same form; for example, this is the book (*pointing to the same*) which I use for my own register. In the Adjutant-General's Department, I believe, it is different, and in the Military Secretary's Office, I presume, it is different. In this book the letters are all numbered, but, I rather think, in one of the offices they are lettered. It strikes me that the numbering is the best; at all events, in my mind, they ought all to be similar. This column (*pointing to the book*) shows, as you see, the number of a letter, then this column shows the purport of the letter, and this shows what becomes of it. Therefore at any moment I can find any letter that I am called upon to refer to.

611. Are all the letters entered in this Register every day before they are dealt with?—Yes; the first thing is that the letters are all opened and registered by an officer of the department, and then the way in which the business is done is this:—Deputy Quartermaster-General comes in the morning, and he looks over the letters and the Register; then I send for every letter of importance.

612. (*Mr. Stansfeld.*) The letters are filed in your own office?—Yes; according to their references as well as by their numbers, and therefore I can obtain any letter at once that I wish to refer to.

613. (*Chairman.*) If you had a general register of all letters received at the Horse Guards, you would still have to keep that book?—I think so. At the same time, if all the letters were given to one person, one person could not look them all over; there would be two or three gentlemen required to look over the letters, and it would therefore be long before they could be distributed. Our letters require at least an hour to look over, then the Adjutant-General's letters may require two hours, and the Military Secretary's letters two or three hours; all that work could not be done by one person.

614. Do you believe that when the Control system is carried into effect in Great Britain, as it has already been in Ireland, the business of your department will be diminished?—It will be very much diminished.

615. And business will be transacted more on the spot than it is now?—Yes; much more so.

616. That would refer, I believe, mainly to the Barrack Branch?—Yes; the Barrack Branch goes almost out of my hands now to the Engineers; but my idea is that the real way to make the business much less would be to combine the two offices, that is to say, to have them within one house, putting the Secretary of State for War in one half of the building, and the Horse Guards in the other. The business would then be done twice as quickly as it is now, and ten times more easily done. I mean as to letters written; for example, when I had any question I would refer immediately to Sir Edward Lugard, or to Sir Henry Storks, or to you, without having any letter-writing at all. In the same way the Commander-in-Chief would be able to go at once to the Secretary of State for War, and the Secretary of State for War would come to the Commander-in-Chief if there was anything of importance to consider, which would save letter-writing.

617. (*Mr. Stansfeld.*) Do you think it possible, unless the War Office and the Horse Guards are placed under the same roof, to conduct the relations of the two economically and without circumlocution?—I do not think it could be, as far as I see at present; certainly not so quickly as if they were joined.

618. Do you think in that case the increased economy and rapidity of inter-communication would be very considerable?—Very considerable.

619. (*Chairman.*) Have you considered the possibility of placing the military business, which is now transacted at the Horse Guards, under one head, instead of as at present under the Adjutant-General and the Quartermaster-General, with a third, the Military Secretary, who appears, on some points, to have a concurrent authority?—I have thought a great deal about it latterly, and at first I was very much in favour of it. I am still in favour of it, but I may at the same time say, that I give my opinion with great diffidence, because I have been but a short time in the department. Since I have been thinking of it, my idea is that to get a man well fitted for the post would be a very difficult thing. There are a great many branches of the department to be carried out. First, there is all that the Military Secretary has to do, all that the Adjutant-General has to do, also the Adjutant-General of Artillery, which is a branch in itself, the Adjutant-General of Engineers, and my department. It strikes me, although of course it might be done, that it would require a clever man, and he ought to be a young man. He would have a great deal of hard work to do, and I do not think that men of that high rank, whom the Commander-in-Chief would like to have about him, would be inclined to undertake it.

620. My question was intended to apply to all business, with the exception of promotions and appointments, which might be dealt with in a separate office?—You could not do with one Chief of the Staff; you must have an assistant, because the Chief of the Staff may be ill, or at a certain time of the year he may require leave.

621. Assuming that there was one officer, whatever he might be called, Adjutant-General, or Chief of the Staff, at the head, he would have under him, in the same way as you now have a Deputy Quartermaster-General; officers in the same position as the Deputy Quartermaster-General, the Deputy Adjutant-General, and Inspector-General of Recruiting. Might not one of those officers, the senior, perform the duty of the Chief, in his absence, in the same way as your duty is performed, and the Adjutant-General's duty is performed, in his or your absence?—No; he would require to be acquainted with all the departments equally well as the Chief of the Staff, and he could not do that if he paid proper attention to his own business.

622. Would not the same objection apply to your own department; for instance, your officers have certain duties to perform, and when you are away they attend to your duty?—Supposing the Adjutant-General is away, the Commander-in-Chief sends for his deputy, not for me.

623. And that deputy would be performing a duty in a branch of the Adjutant-General's Department?—Yes.

624. He would have, to a certain extent, duties to perform in the absence of the Adjutant-General, which were not his ordinary duties?—Almost his ordinary duties. The Deputy Adjutant-General is supposed to be acquainted with everything connected with the department he is in. If the Chief of the Staff were away, and Heads of Offices referred to by the Commander-in-Chief, the old system would be reverted to. I should think it would take away from the simplicity of it. If the Chief of the Staff is not present there must be, I think, an assistant to do his duty and carry it on in one way, and not to have to change back to another system again in case of temporary absence.

625. (*Mr. Stansfeld.*) I do not understand you to give that opinion as an objection to the scheme, if it were proposed to have a Chief of the Staff, of which upon the whole you approve?—I do not give it as an objection, but I think you ought to make the Staff more complete by having an assistant.

626. Have you at all considered how you would divide the different duties, if there was one head?—I would have three classes of assistants, calling them by whatever name you please.

627. Would you divide the duties under three heads, Movement, Discipline, Recruiting, &c.?—Yes.

628. And have a branch for each?—Yes. Then I would have them interchangeable.

629. You would put the Staff Officers through all the branches, if you could?—Decidedly.

630. (*Sir Edward Lugard.*) It would be a General Staff?—Yes.

631. (*Chairman.*) Do you find at the present time any difficulty in defining the duties and the business which should be allotted to the Quartermaster-General and the Adjutant-General respectively?—Not in general, but occasionally there are questions that come up, for example, questions that amount partly to discipline and partly to movement, one belongs to the Adjutant-General and one belongs to me, therefore I am obliged to send to the Adjutant-General a copy or he has to send to me a copy of the same question.

632. Is the intelligence Department or the Topographical Department under you?—No; except in connection with the movement of troops in the field.

633. If there was going to be a campaign, and it became necessary to collect information respecting the nature of the country and so on, the department for the performance of that duty would, I suppose, be represented at present by the Topographical Department?—Yes; I presume it would.

634. Would not that department naturally come under the Quartermaster-General?—Yes.

635. (*Sir Edward Lugard.*) Why should regimental canteens and everything connected with them be under the Quartermaster-General; they were under the Adjutant-General in India?—They were.

636. What connection is there between the Quartermaster-General and the canteens, there is no movement of troops connected with them?—No; they may just as well be under the Adjutant-General or the Quartermaster-General.

637. Or the Controller?—No. They should be under military control.

638. (*Chairman.*) The distribution of the business I believe, has continued the same for many years?—Yes, it has, for many years.

639. Are there any further observations you would wish to state?—No; I have nothing more to state.

Lieut.-Gen. Sir J. Hope Grant, G.C.B.

22 Oct. 1869.

(The Witness withdrew.)

Major-General George Balfour, C.B., examined.

640. (*Chairman.*) You are Assistant to the Controller-in-Chief?—Yes.

641. And you have been employed in organizing the Control business?—Yes; as far as relates to the Store Branch.

642. Can you tell us what has been done in consequence of the introduction of the Control system, in the way of simplification of certain classes of business? I will ask you the question with reference to each class in order: first, with reference to the Equipment of the Army; I mean by that term furnishing Regiments with small-arms, accoutrements, and ammunition, and furnishing Field Artillery with ammunition and equipment?—Theoretically the whole of the supplies for the troops within the United Kingdom,—namely, arms, accoutrements, ammunition, guns, carriages, and projectiles, have hitherto been required to be subjected to the Commander-in-Chief, the requisitions for these supplies being sent through one or the other branch of the Horse Guards. The various reports required for passing on these various demands have necessarily occasioned a great multiplication of work, not only with the regiments and batteries where the requisitions originated, but also in the Brigade Offices, and in the Division Offices, and finally in the Head-Quarters of the Army itself, where a duplication of vouchers for almost every requisition was found to exist. The requisitions on being received at the Horse Guards were then passed on to the War Office, and there again they were subjected to examination, to check, and in fact to all those measures which are necessary to be applied to demands of this nature, in order to enable the Secretary of State to ascertain that the demands were in accordance with regulation, that the stores were not demanded until such time as they were absolutely required, either to complete the equipment of the troops or to replace deficiencies, and then to ascertain whether those deficiencies had arisen properly or not. This is an extent of complication which can be best judged of by seeing the actual nature of the transactions involved. Now, inasmuch as all these equipments of the troops,—that is to say, the number of arms belonging to a regiment, and the number of guns belonging to a battery, the quantity of ammunition for each man, and the number of rounds for each gun,—are fixed by regulation, and no authority subordinate to the Secretary of State has any power to exceed the quantities fixed by Regulation except in cases of emergency, it appeared to the Controller-in-Chief that it was very easy indeed to simplify and reduce the work which the old system necessarily occasioned. Changes have therefore been gradually going on for some months past, so as to allow of all requisitions in each Control District being made out in duplicate, instead of in quintuplicate, as frequently occurred before; besides which numerous letters were written on the transmission of the requisitions. The duplicate requisitions are now prepared by the regiment or battery requiring the supplies, and are sent in to the Controller of the district, for his examination and check. The Controller of the district is authorised to act upon his own judgment in deciding upon the demands, and after he has decided upon them, he is authorized to pass both requisitions, showing on the face of both the extent of the supplies which he has authorised. One copy is transmitted by the Controller to the Store Officer as his authority to supply the articles to the regiment or battery; and the second is sent up to the War Office, by the same post by which the one copy is transmitted to the Store Officer. The object of sending up one requisition to the War Office, is simply to supply a supposed deficiency in the knowledge of the Controllers, many of whom are as yet but little acquainted with the extent of the supplies to the Army, and can only acquire that knowledge by experience and practice. A review of these requisitions will be made in the War Office, and suggestions will from time to time be made to the Controller, as to the propriety of his proceedings in respect of passing supplies. I am sanguine that in time we shall be able to do away with the transmission of even one copy to the War Office; for I think that when the accounts of the issues by the Store Officer are received in the War Office, and are subjected to audit, we shall then be able to detect whether any errors have been committed in issuing supplies to the Army, contrary to Regulation or without due regard to the necessity of the case. I may mention that the position of the Commander-in-Chief in respect of the supplies to the Army is in close connection with this Control system. The theory was, that he derived a knowledge of the state of the equipments of his regiments and of his batteries, by means of the requisitions passing through the Head-Quarters' Office at the Horse Guards. The advantage of the change will be this, that the Commander-in-Chief will be able to act in some degree as a check upon the delays connected with supplies to the Army, or at all events he will be able (which is still better) to bring to the notice of the Secretary of State, any negligence, or omissions, which may take place, in respect of the Control Department failing to supply the Army with those equipments which are necessary for their efficiency. It will therefore be essentially necessary that the Commander-in-Chief should ascertain, through the General Officers of Divisions, and through the Commanding Officers of Regiments, that the arms, accoutrements, and equipments of their batteries are complete. A certificate issued month by month upon the monthly returns of these corps, would enable the Commander-in-Chief to ascertain whether any deficiencies exist, or not; but it should be particularly insisted upon, that no representation of deficiency of any kind shall ever

Maj.-Gen. George Balfour, C.B.

22 Oct. 1869.

Maj.-Gen. George Balfour, C.B.

22 Oct. 1869.

be permitted to reach the Head-Quarters of the Army, or be brought to the notice of the Secretary of State, without being accompanied by distinct and clear statements that application has been made in due time for all these deficiencies to be made good. In the same manner, with regard to the inspections of regiments by Officers of Divisions, as the queries which are put to the General Officers by the Head-Quarters of the Army, include many questions connected with the arms, accoutrements, and equipments of the regiments, and are very minute indeed in their nature, it is also essential that any reports connected with deficiencies, shall be accompanied by full information as to the measures taken to supply them. I think that these simple measures would enable the Commander-in-Chief to obtain all that information which, as the Executive Officer of the Secretary of State, it is right and proper for him to possess, in order that he may be at all times prepared to answer for the efficiency of the troops under his command.

643. As I understand you, the effect with respect to all that business is the diminution of a considerable quantity of correspondence, both with the Head-Quarters of Regiments and at the Horse Guards?—Certainly. These changes ought to lead to a vast degree of simplification of business, and, I may safely say, also great rapidity in supplying the troops with the necessary stores which they require.

644. And at the same time, as I understand the plan, there would be full information in the hands of the Field-Marshal Commanding-in-Chief, with respect to the state of the supplies of the Army from time to time?—There would be full information transmitted both through his own officers, and through independent channels, so as to make known to him any negligence or failures to furnish supplies. By means of another arrangement made with the Controller-in-Chief, a check has been established and is gradually increasing, in respect of the supplies of stores delivered from store depôts to Commanding Officers. These officers will in future be held personally responsible if they receive any supplies of any kind, from the store depôts, without a careful and exact examination being made of their state. The Secretary of State and the Commander-in-Chief will thus have a double security against improper stores being retained in store depôts, and against corps taking charge of stores which are not perfectly efficient. The Controller-in-Chief has also further measures in view with regard to fixing individual responsibility, to a far greater extent than has ever yet existed in the practice of the Service.

645. With respect to armaments, what changes have taken place in the business subsequently to the introduction of the Control system?—The question as to armaments is not yet in such a satisfactory state as the Controller-in-Chief desires. There is a greater complication in connection with questions as to armaments, than there is with regard to regiments and batteries. By the arrangements which were made in 1859, the Commander-in-Chief was personally charged with many of the duties connected with armaments, which formerly devolved upon the Director-General of Artillery. The simplification which might have been effected in the armaments, has not therefore yet been carried out to the extent which the Controller-in-Chief intends. It is in progress, but it will still take some time before these vast supplies of guns, carriages, and projectiles, can be brought under the same easy control, as the arms and accoutrements.

646. Do demands for guns, carriages, and ammunition for fortifications, come now straight to the Control Department, or do they go through the Horse Guards?—Demands for Armaments still go through the Horse Guards.

647. Are they checked at the Horse Guards?—They are supposed to be checked at the Horse Guards, because there is a large establishment appointed for that purpose. They are also supposed to be checked in the War Office by the Director-General of Ordnance; but he has never had an establishment sufficient to enable him to perform that duty.

648. Are they not also checked in the Control Department?—Yes; and that is where the principal check has been exercised, under the orders of the Controller-in-Chief.

649. When established proportions are fixed for armaments of this nature, is there any advantage in the demands going through the Horse Guards?—None whatever; on the contrary, when once the armaments of a fortress, the proportion of projectiles, and the total projectiles for the armament are absolutely fixed, and when you have all these supplies regularly put down in Tables, which can be easily done, there is no necessity whatever for any one of these demands being sent to the Horse Guards.

650. With whom does the responsibility rest of keeping up these supplies?—At the present moment it is very difficult to say who is the person responsible. There are so many persons mixed up with the questions, that the responsibility is very divided, so that it is not easy to say that any particular person is responsible.

651. Who, in your opinion, should be responsible?—The armaments of a fortress are as easily fixed as the arms of a regiment. No doubt the armaments of a fortress are more numerous and more complicated, but there is no more difficulty in fixing the armaments of of a fortress, than in fixing the armaments of a ship. Every ship has its armament fixed, and its proportion of stores, and everything is laid down in the particular Table as clearly as the arms of a regiment; and the stores for a ship, even a 120 gun ship, are as easily supplied by the out-station depôts, as the arms and accoutrements of a regiment. When once the amount of any particular armament is fixed, it will be the duty partly of the Commanding Officer of Artillery, and partly of the Control Officer to see that the armament for that fortress is maintained in perfect efficiency. The Commander-in-Chief again will have the same opportunity of seeing to the efficiency of a mounted armament, as of the soldiers under his command.

652. That opportunity would be given by periodical returns?—By periodical returns and reports. The same certificate which ought to be given by the Commanding Officer of a regiment, or of a battery, would of course be given with regard to the armament of a fortress.

653. Therefore, what I understand you to recommend, is a clear fixing of the responsibility in the Control Department for keeping up the established proportions for armaments, and a diminution of the business by having the demands made direct to the local Controllers?—Precisely so.

654. What has taken place with respect to Barrack, Hospital, and Prison Stores?—A great change has taken place in respect to these supplies. You are aware that the Barrack officers and the Purveying officers were formed into separate departments, each class being responsible to separate heads in its office. The practice has been for each of those branches to accumulate vast stores, and stores of every sort, under the designation of Barrack and Hospital Stores. Now those officers of the barracks and hospitals, namely, Barrackmasters and Purveyors, are Executive officers, and use the stores in charge of the troops and for hospitals, and the Controller-in-Chief considered that it was most objectionable that the vast stocks of stores which were accumulated should be in the hands of executive officers, who were likewise using them for the service of the men in barracks and the patients in hospitals. Moreover, this arrangement entailed the necessity of employing men as Barrackmasters and Purveyors of a higher class, and necessarily more expensive than would be requisite if purely executive officers were entrusted with the duty of looking after the stores in actual use. The Controller-in-Chief has therefore decided on dividing the two classes of stores; those in use being supplied from the stores which you require to keep in reserve. The arrangements made are as follows. That as few stores as possible are to be left in charge of the executive officers, they are to have no stores under the character of reserves, in the sense of meeting unknown wants of the troops or of patients. They must have a few stores

in charge for the purpose of meeting the ordinary exchanges, such as a change of sheets, and certain other things of that kind, but as a rule all stores not in use are to be removed from the charge of these executive officers. The Controller of the District, however, is bound to issue whatever stores may be absolutely required for the use of the troops in barracks and hospitals, acting upon simple vouchers, which are subject to the scrutiny of the Controller-in-Chief. The Controller-in-Chief has also ordered, as a check upon the use of stores for men in barracks and in hospitals, that all unserviceable stores shall be handed over to the officer in charge of the reserve stock. This officer thus exercises a very important check over the improper use of stores in barracks or hospitals, and he can therefore bring to the notice of the Controller-in-Chief any improper practice with regard to those stores. In like manner the Controller-in-Chief has ordered that no stores shall be taken over from the reserve stock by the executive officers of barracks and hospitals, without being carefully examined, and their thorough efficiency fully recognised. A very excellent check is thus established both over stores taken away, and stores given back. He has also, I understand, decided as a tentative measure, upon applying this principle to the organization of the Control Department in this office, entrusting to me the control over all the Barrack and Hospital stores in reserve, and the duty of making arrangements for laying in the stores required to replenish the stocks which are expended from the reserves, and to Sir William Power the duty of looking after the stores which are actually in use in barracks and in hospitals.

655. Looking generally at the explanations which you have given us as to the alterations in the mode of transacting these different descriptions of business, in consequence of the introduction of the Control system, a considerable portion of the business of the Quartermaster-General's Department, at the Horse Guards, would be transferred to the Control Department?—A very large portion of the Quartermaster-General's Department especially.

656. And in the Adjutant-General's Department all the portion of the correspondence, at page 111, relating to arms, ammunition, accoutrements, and necessaries, would become unnecessary?—A large proportion of it would be unnecessary. *Maj.-Gen. George Balfour, C.B.* 22 Oct. 1867.

657. And again, at page 116 of the Return, when such a system as you have indicated has been perfected with respect to armaments, the whole of the Store Branch of the Deputy Adjutant-General of Royal Artillery might be dispensed with?—Certainly.

658. The same observation would apply to a considerable portion of the work of the Deputy Adjutant-General of Royal Engineers, would it not?—The correspondence as to arms and accoutrements would entirely cease as regards this officer. I may also say that the three other Returns named in the list are very much mixed up with the Director of Works; you have there again a complication.

659. The correspondence which takes place with the Deputy Adjutant General of Royal Engineers in his position as a member of the Staff of the Army might be dispensed with?—Yes.

660. Do you think that the demands might be sent locally from the Royal Engineers?—Certainly; each company of Engineers is just as much a separate body, as each battery of the Artillery.

661. So that it would not be necessary to have demands from the head-quarters of the corps of Engineers, but ordinary demands might be sent locally from the companies of Royal Engineers to the Controller?—Yes; but we consider the Captain of a company of Royal Engineers in the same light as a Captain Commanding a battery. The Officer Commanding a company of Engineers, or the Officer Commanding a battery of Artillery, who signs the requisition. All these Officers are Accounting Officers to the War Office, and can therefore make requisitions, sign them and send them in; but they must comply with the necessary formalities, and must obtain the countersignature of the Commanding Officer of the Division.

(The Witness withdrew.)

Adjourned to Tuesday next at 12 o'clock.

Tuesday, 26th October, 1869.

PRESENT:

The Right Honourable Lord NORTHBROOK, *in the Chair.*

Lieutenant-General Sir EDWARD LUGARD, G.C.B.

GEORGE DALHOUSIE RAMSAY, Esq., examined.

662. (*Chairman.*) You are Director of Clothing?—Yes.

663. How long have you filled that office?—I have been Director of Clothing since the year 1863, but was also in charge of the Clothing Branch since 1857, while holding the office of Assistant Director of Stores.

664. You were originally in the office of the Secretary at War?—Yes.

665. What matters connected with clothing come to you from the Department of the Adjutant-General at the Horse Guards?—All questions relating to patterns, all requisitions for extra clothing for the Infantry of the Line, and all complaints respecting the non-supply of articles to the Cavalry and the Infantry, come to us through the Horse Guards.

666. With regard to patterns; are changes of patterns originated at the Horse Guards?—The pattern is chosen at the Horse Guards, and the course formerly adopted was for the Commander-in-Chief first to obtain, indirectly, the Queen's pleasure, and then to send the pattern to the Secretary of State. If the Secretary of State saw no objection to the pattern a Warrant was then submitted to the Queen, for sealing the pattern, but if the Secretary of State saw reason to object to the pattern he then advised the Crown not to adopt it. That course has been altered, and now the Commander-in-Chief as a rule, applies to the Secretary of State in the first instance, to know whether he has any objection, before he takes the Queen's pleasure indirectly. *G. D. Ramsay, Esq.* 26 Oct. 1869.

667. The practice then is that suggestions for the alterations of patterns should not originate in the Clothing Department at all?—No; we do originate them sometimes, but the proper quarter for their origination is the Adjutant-General.

668. Does not it seem a more reasonable thing that alterations should be originated by those who are

G. D. Ramsay, Esq.

26 Oct. 1869.

practically concerned in supplying clothing?—I have been always of that opinion; but no pattern should be adopted without the concurrence of the military authorities.

669. If the alteration originated with the Clothing Department might it not be sent to the military authorities for their opinion?—Yes; the Adjutant-General frequently sends patterns here, which we refer to Pimlico for the practical opinion of the officers there, and when their opinion is against the pattern, the Adjutant General abandons it.

670. With respect to correspondence in reference to extra issues, and to complaints of delay in issue, do you see any advantage in that correspondence passing through the Adjutant-General's Department?—None at all. At present when a delay takes place in the delivery of clothing to a regiment, the Horse Guards write to us, upon which we get an explanation, and write back an answer to the Horse Guards, and then the Horse Guards write an answer to the regiment; whereas, if the regiment were to apply direct here, we should then urge the delivery of the things, and there would be no correspondence through the Adjutant General at all.

671. If that course were adopted, what means would the Field-Marshal Commanding-in-Chief have of knowing that the Army was properly clothed?—The means he would have would be by adding a paragraph to the Monthly Return, showing that the regiment was complete in its clothing and its equipment, or in what articles it was deficient, and what requisitions remained uncomplied with.

672. What reports have you on clothing?—We have annual reports upon the wear of the clothing.

673. What becomes of those reports?—They are filed here and scheduled, and an abstract is made of them at the end of the year.

674. Does the Adjutant-General receive copies of those reports?—Yes; they are sent in duplicate to him, and he keeps one copy and sends one here.

675. They come through him?—Yes; they are only filed here. The Adjutant-General does not file them. Whenever we receive a report complaining of the wear of clothing, our practice is to refer the report to the Inspector of Clothing for any explanation, and then any defects which there might be in the manufacture would be remedied in the next issue.

676. (*Sir Edward Lugard.*) Is not there already in the Monthly Return a paragraph showing any deficiencies in the supply of clothing to the regiment?—Yes. "Other remarks which may be necessary in "explanation of this Return, or of the general state of "the regiment, and what requisitions for clothing, "arms, appointments, necessaries, &c., remain un-"complied with." That was put in at my suggestion two or three years ago.

677. (*Chairman.*) So that the Adjutant-General would see from the Monthly Returns if any requisitions for clothing had remained uncomplied with?—He would see that directly.

678. (*Sir Edward Lugard.*) You said that all complaints from the Cavalry and the Infantry came through the Adjutant-General. Through whom do complaints from the Artillery come?—Through the Deputy Adjutant-General of Artillery. The correspondence with the Deputy Adjutant-Generals of Artillery and Engineers is distinct from that with the Adjutant-General of the Army. They write their own letters, and we write to them direct.

679. (*Chairman.*) Then in the case of the Artillery and the Engineers. Do ordinary demands come through the Deputy Adjutant-General of Artillery and the Deputy Adjutant-General of Engineers, as the case may be?—All demands come through those officers.

680. Do you know whether those demands are made in duplicate?—I think so, because our demands all come in duplicate.

681. What reason is there for that course being adopted in the case of the Artillery and the Engineers?—The reason why that course has been adopted in the case of those two branches of the Service, is because, on the formation of the Clothing Department, in 1855, there was no brigade organization, so that the correspondence had to be conducted with Officers in Command of Batteries, and it was considered that it would be more convenient that the Deputy Adjutant-General should have the correspondence with all those companies, instead of the correspondence going through the War Office, because the War Office would then have only one person to correspond with; but there is no reason now why requisitions, from batteries, should not come straight to the War Office and be examined by clerks in the Clothing Branch.

682. At present then the examination of those requisitions, in the case of the Artillery and in the case of the Engineers, is made twice over?—Yes; all requisitions are again examined in the Clothing Branch.

683. As I understand you, you see no reason why the demands from the Artillery and the Engineers should not come straight from the batteries or companies?—No reason, except perhaps Colonel Keane may explain to you that the transfers in the Engineers are very considerable. That is a matter of record, and there is no reason why it should not be watched, and it might as well be watched in one office as the other.

684. At page 119 of the Return giving the duties performed at the Horse Guards, I find under the head "Clothing Branch, Deputy Adjutant-General Royal "Engineers," a great many duties detailed, could those duties be easily performed by the War Office?—"Demands for clothing, boots, &c.: to examine each, "compare against strength of company, stock on hand, "&c., also to provide for transfer proposed." That could all be done here. "Demands for necessaries and sea "kits. These are examined the same as for clothing." That could be done here. "Clothing lists: to obtain "from companies, see that they are properly completed, "and retain for the examination of the Compensation "Pay List." That is merely a matter of finance. "Compensation claims: to examine every separate "figure with clothing lists and records of service, to "authorize the amounts to be passed by paymasters, "accountants, &c. These are very heavy. Every "man at warm stations has two separate claims in "each year, and the clothing lists are marked for each "individual claim." All the claims for compensation are now examined for the Army by the Audit Branch. The auditor who examines the pay lists for the Line sends to me to see that they are right, "Great coats "and cloaks: to examine all boards on, arrange the "exchange with War Office, and give orders to "companies and detachments." That is a work clearly done twice over, because we never take upon credit the examination of the Clothing Branch of the Deputy Adjutant-General of Engineers, we always go carefully through it again. "Leather leggings are "dealt with in the same manner as great coats." That is a small matter of detail. "Companies and detach-"ments for abroad: to make all arrangements for "clothing of, according to climate, &c., and to give "instructions for future guidance of companies." That is all laid down in the Royal Warrant. "Patterns "and material: all correspondence relative to both, "with War Office and companies." That is part of the general correspondence, "Indian transfers: to fur-"nish War Office with deiailed statements of articles of "clothing in wear by men." Those could be furnished just as well direct from the companies. "Annual "accounts of clothing: to collect and forward to War "Office, and to keep duplicates for reference on receipt "of subsequent requisitions." Those now go to the Chief Auditor. "Annual accounts of necessaries are "dealt with in the same manner as those for clothing." They go to the Chief Auditor. "Annual estimates: "to furnish to War Office for future supplies." The annual estimates we always make ourselves *de novo*; we treat the returns of the Deputy Adjutant-Generals as nil. We had a return from the Deputy Adjutant-General of Artillery, in which the estimate of requirements was just double that which we made out by our returns.

685. So, in fact, in your opinion, a good deal of work is done twice over by this system?—A great

deal of work is done twice over under the present system.

686. Do compensation claims go to the Horse Guards?—They only go the Horse Guards from the Artillery and Engineers.

687. You regard the Deputy Adjutant-General of Royal Artillery and the Deputy Adjutant-General of Royal Engineers as standing in the same position as the Commanding Officer of a regiment?—Exactly so.

688. Could not the brigades of Royal Artillery be treated as regiments of Infantry?—Certainly they could.

689. That would get rid of some unnessary correspondence in respect to demands from the Royal Artillery?—It would; but it is to be borne in mind that under the brigade organization it is very seldom that the whole brigade is together, and therefore the requisitions for clothing ought to come from the batteries, instead of through the Head-Quarters.

690. You would rather deal with batteries than with brigades?—Yes, I think it would be much better to deal with the batteries.

691. Practically, at present those requisitions go from the battery to the brigade, from the brigade to the Deputy Adjutant General of Royal Artillery, and from the Deputy Adjutant-General of Royal Artillery to you?—Yes; a number of demands from each battery come to the Brigade Office, and then the Brigade Office sends them under cover to the Deputy Adjutant-General of Artillery.

692. All that requires time and care?—Yes, it requires clerks to arrange and to register.

693. If the battery were to send its demand straight to the War Office all that would be obviated?—All that would be obviated. At the same time we should have a little correspondence here with regard to transfers, but that could be easily arranged; we could conduct that correspondence with the Head-Quarters of the brigade.

G. D. Ramsay, Esq.

26 Oct. 1869.

694. What are the functions of the Assistant Adjutant-General as regards clothing?—Under the present arrangement, when supplies are sent to a regiment the Assistant Adjutant-General attends at Pimlico, and seals a sample which accompanies each supply, and upon the arrival of the supply at the Head-Quarters of the regiment a Regimental Board is held, and the articles are compared with the sample sealed by the Assistant Adjutant-General.

695. What advantage is there in his sealing the sample, instead of the officer at Pimlico sealing it?—That I could never understand; we have adverted to this subject in our Report on Contracts. Then the Assistant Adjutant-General also takes charge of all questions relating to clothing, and not only clothing, but arms and accoutrements, and performs the duties which were formerly discharged by Sir Thomas Troubridge. He is also in many instances simply the channel through which correspondence takes place between the Army and the Supply Branches.

696. In fact, to some extent, it appears that there are two people doing the same work?—Yes; to a certain extent.

697. Which of the two is the person responsible?—According to the instructions signed by Sir George Lewis, dated 20th March, 1863, the Director of Clothing is responsible for the efficient and punctual supply of all articles of clothing and necessaries required for the Army both in peace and war.

(The Witness withdrew.)

Major-General the Right Hon. Sir Henry Storks, G.C.B., G.C.M.G., examined.

698. (*Chairman.*) Have you seen or heard the evidence that has been given with respect to the operation of the Control Department, by Sir William Power, by General Balfour, by Mr. Drake, Controller for Great Britain, and by Mr. Ramsay, Director of Clothing?—Yes. I have read the evidence of the first three, and heard that of Mr. Ramsay.

699. Do you agree generally with the tenour of the evidence they have given?—Certainly.

700. The Control system was recommended by a Committee, of which Lord Strathnairn was President?—Yes.

701. Having been first introduced in Ireland, it has now been introduced in Great Britain?—Yes; and at every foreign station.

702. Do you agree with the evidence given by those officers whom we have examined, that the effect of the introduction of that system has been to define responsibility very much, and to relieve certain of the Military Departments, especially the Quartermaster-General's Department, from a great deal of business which they had previously to perform?—Yes; I do. Everything connected with the important military functions of the Quartermaster-General is left untouched; but he is relieved of certain duties connected with stores, for which he was not responsible. One of the great objects of the Control Department has been to define responsibility, and to look to one officer for the discharge of certain duties.

703. You have seen the Return which we have received of the business transacted in the Commander-in-Chief's Office?—I have.

704. Do you think that the duties of the Quartermaster-General's Department, of the Adjutant-General's Department, and of the Departments of the Deputy Adjutant-General of Artillery and Deputy Adjutant-General of Engineers, have been diminished by the introduction of the Control System?—Yes; certainly, and I think they might be still more diminished.

Maj.-Gen. the Right Hon. Sir H. Storks, G.C.B. G.C.M.G.

26 Oct. 1869.

705. The principle of the whole system, as far as we understand it, is that responsibility with respect to supplies should be under one head, and responsibility with respect to discipline and purely military matters under another?—Yes.

706. Both those responsibilities concentrating in the General Commanding the forces in each particular district?—Yes. The particular object of the Control System is to make the Officer Commanding the responsible person, he having under him one officer responsible for all purely military duties, and another responsible for everything connected with supplies.

707. Would you pursue the same principle as regards the military departments, and place them all under one head rather than two?—Certainly. I should wish to see one Staff Officer at the head of all military departments, with any number of Staff Officers under him that might be thought necessary, who would of course discharge the duties of the different departments.

708. You have had great opportunities of seing the practical working of the present system in different parts of the world?—I have.

709. You have no doubt seen occasions in which the duties of the Quartermaster-General and of the Adjutant-General have not been sufficiently defined?—Yes. I think very often, the one department not knowing what the other department was doing.

710. That would be obviated by having one man at the head of the whole?—Yes.

711. Who would be able to subdivide the duties under him, and allot those duties to particular officers, each officer being responsible to him for each subdivision?—Yes; and which officers might be exchanged as occasion required.

(The Witness withdrew.)

Thursday, 2nd December, 1869.

PRESENT :

The Right Hon. Lord NORTHBROOK, *in the Chair.*

The Right Hon. JAMES STANSFELD, M.P. | Lieut.-General Sir EDWARD LUGARD, G.C.B.

Colonel W. F. D. JERVOIS, C.B., R.E., examined.

Col. W. F. D. Jervois, C.B., R.E.

2 Dec., 1869.

712. (*Chairman.*) How long have you been in connection with the Central Administration of the Army?—I came to the War Office in April 1856.

713. That was shortly after the Board of Ordnance was done away with?—The Board of Ordnance was abolished in June 1855.

714. Can you tell us the changes which have taken place in regard to the general superintendence of the Royal Engineers since that time; first telling us in what state it was under the Board of Ordnance?—Under the Board of Ordnance there was an Inspector-General of Fortifications, who had charge of the Corps of Engineers as a military body, and carried on all the works, both fortification and barrack, through the agency of the officers, assisted by a Civil Department of Clerks of Works and Clerks. The men formed a separate corps, designated Royal Sappers and Miners, and were officered from the Royal Engineers. The Inspector-General of Fortifications had, at the time when I entered the corps in 1839, a Staff Officer at Head-Quarters, who was styled Brigade-Major, and who conducted the business of the office under him, and arranged all the details of appointments and reliefs of the officers of the corps. In the office there were also two officers who, at the time of which I speak, had no particular designation; subsequently they were respectively styled 1st and 2nd Assistant Inspectors-General of Fortifications, one for fortification and the other for barrack works. To assist the Inspector-General in the military duties of the Corps of Sappers and Miners, there were at Woolwich, which was the Head-Quarters of the Corps, a Brigade-Major and an Adjutant. The officers whom I have specified comprised the Head-Quarter Staff. Subsequently, in 1846, as the Corps increased in numbers, and as the duties increased, the Brigade-Major at Head-Quarters was made Assistant Adjutant-General; and later, in 1855, he was made Deputy Adjutant-General. In like manner the Brigade-Major of Royal Sappers and Miners became Assistant Adjutant-General of Royal Engineers, when the two corps were amalgamated. This organization existed for some short time after the Board of Ordnance was abolished, when, owing to the abolition of the office of Master-General of Ordnance, and to the military command of the corps being placed in the hands of the Commander-in-Chief, the Deputy Adjutant-General was removed to the Horse Guards. Subsequently, in 1858, all military control of the corps was taken away from the Inspector-General of Fortifications. The cause of this was a case in which two recommendations relative to an appointment came before the Secretary of State: one from the Horse Guards (after consultation with the Inspector-General of Fortifications), recommending a certain officer for appointment as Commanding Royal Engineer; the other from the Inspector-General of Fortifications expressing dissent; the Inspector-General having first been advised by the Deputy Adjutant-General of Royal Engineers at the Horse Guards, and subsequently advised differently by the Deputy Inspector-General of Fortifications in the War Office.

715. What has been the system which has been adopted since the time when the military command was taken away?—So far as the conduct of works is concerned, the system has not altered.

716. Has there always been a Director-General of Works at the War Office?—Yes; but I should explain that in 1862 another alteration was made. The Inspector-General of Fortifications was then styled Inspector-General of Engineers and Director of Works; and certain of the civil duties with which he was charged, under Order in Council of 1855, were given to an officer of Royal Engineers, who was styled "Superintendent of the Barrack Department." As Inspector-General of Engineers he was looked upon as a Military Officer, and as Director of Works he was looked upon as an officer serving under the Secretary of State for War. At that time it was arranged that, whenever appointments of officers were to be made to districts, the Commanding Engineer's appointments should be previously proposed to the Inspector-General of Engineers by the Deputy Adjutant-General of Royal Engineers before they were submitted to the Commander-in-Chief, and of course before they came to the Secretary of State for War, so as to avoid the complication which had previously arisen between the two Staff Branches.

717. Was that the position which was filled by Sir John Burgoyne?—He was the first officer who held the position of Inspector-General of Engineers and Director of Works.

718. Is that the position which is now filled by Sir William Gordon?—No; Sir William Gordon at present only holds the position of Inspector-General of Engineers.

719. So that at the present time there is no officer holding the position of Director of Works?—Just so.

720. Do you think that the system under which the superintendence of the execution of works by the Royal Engineers has been divided from the military command of the corps, has worked altogether satisfactorily?—I wish to answer that question irrespective of what is usually termed the dual-government of the Army, and also irrespective of any exceptional circumstances as regards works or individuals. The organization of the Engineers should, I think, be what it was formerly, before the abolition of the Board of Ordnance; that is to say, an Inspector-General of Fortifications with military Staff Officers under him, and other officers to assist in the direction of works. There must, I think, always be some complication from the fact that the officers carrying on works under the orders of the Secretary of State for War, through the Director of Works as his organ, are subject to another authority, and look to that authority for praise or blame. They look, in short, to that military authority as their main head.

721. If an Officer of the Royal Engineers of high rank was, so to speak, at the head of the combined department, he would be able to give due consideration to the fitness of officers for different positions in the corps?—No doubt.

722. Whether for military or for civil employment?—Yes.

723. You, I think, have been in charge from the first of the works of fortification?—Yes.

724. Can you tell us how long those works are likely to be before they can be completed?—Speaking generally, I should say two or three years.

725. Do they at present form the larger part of the works of fortification which are now being carried on?—Yes, of fortifications at home; we have also large works, of which I have had the conduct from the commencement, at Bermuda, Canada, Halifax, and other places. At Halifax the works are coming to a close.

726. But those works are not under the Loan?—They are not.

727. Have you not had almost a distinct office for those Loan works?—Practically I have directed them from the commencement, first, as Secretary to the Commission, on whose Report they were undertaken, and subsequently as the Executive in this Office.

728. Would there be any difficulty in separating the works under the Loan from the rest of the works of fortification?—I think that an arrangement might be made by which such a division could be managed.

729. The accounts are necessarily quite distinct?—The accounts are quite distinct; it would require an adjustment of the staff both at head-quarters and at the stations. Officers should be specially told off for superintending those works. The number of works which are now in active progress is much reduced; many of them are very nearly completed.

730. Can you tell us the way in which the bills for the construction of works are checked, both locally and here?—A bill for any large work at a station is made up by the Contractor from measurements taken by surveyors, the quantities are then priced at the contract rates, and the bill is certified by the War Department Surveyor, by officers superintending the work, and by the Commanding Engineer; it is then sent by the Commanding Royal Engineer direct to the Chief Auditor's Branch in this office.

731. Do you know what process it there undergoes?—It is examined as to the correctness of the rates, and as to its being according to the contract.

732. Does it come to your branch at all for revision, or do you see it?—Only in certain cases, at my special request, in order to avoid the possibility of a different interpretation being put at different places, upon the same article in the terms of a contract or specification, or as to a rate to be paid for a particular item of the work. In those cases the claims are referred to my branch to examine the rates, but in no other cases are they referred to us. My opinion is, that all bills whatsoever for works should be referred to us; because, although the auditor's examination may be very useful with the object of seeing that the prices are according to the contract, and with respect to the conditions of the contract generally being observed in the bill, the Auditor is no judge as to whether the material or nature of work charged for in the bill has been authorized. It is possible that a dishonest person might have to deal with a work, and if so unauthorized material might be charged for, and the Auditor-General would be no judge whether or no that were the case.

733. Do you mean that, supposing the War Department surveyor and the contractor were in collusion, a fraud might be committed, which the Chief Auditor could not detect?—Yes, he would have no means of doing it, unless the amount of the bill caused an excess upon the estimate, and then, of course, he would object to pay it, but any how he would not know the cause of the excess.

734. The comparison of the amount of the bill with the estimate would be in a subsequent stage?—Quite so; I am merely supposing that it had come to a stage when, say 5,000*l.* was allowed for the work in the estimate, and the expenditure was 6,000*l.*; then of course he would ask for an explanation.

735. Would not that be subsequently to the bill having been paid?—He would not pay the bill under such circumstances.

736. Would he compare the effect of the bill upon the estimate before the bill was paid?—Yes, so far as the total amount was concerned. If 5,000*l.* was voted in the Schedule of the Fortification Act, or for a work in the ordinary estimates, he would not feel himself justified in paying 6,000*l.*; he would ask for the authority. I referred just now to a case of a different character from that to which you are now alluding. I was before speaking of bills which would be within the limits of the estimate. In those bills I do not mean to say, nor do I believe, that frauds are perpetrated; but I say that it is perfectly possible that they might be perpetrated so far as any professional check is concerned.

737. In point of fact the Examining Department would not have the professional knowledge to enable them to check any such fraud?—No; all bills for works ought to be referred to the Engineer Branch in this office to examine.

738. (*Mr. Stansfeld.*) In fact it comes to this, that bills ought to be examined by persons who are acquainted with the subject matter to which they refer, and not simply by accountants?—Yes; and the bill ought to be so drawn out as, where possible, to be easily compared with the estimate on which the authority is based. Respecting accounts, without proposing any detailed mode of doing it, I think that the Engineer Department should either keep its own accounts, or that the accounts which are kept by that Department should be kept in concert with the Engineer Branch. Sometimes work may be booked against an item to which it is not properly chargeable owing to some want of knowledge of the services in the Works Vote.

739. (*Chairman.*) You mean that, in your opinion, you should be consulted with respect to what is technically called the appropriation of the different sums expended?—Yes; we keep accounts for our own satisfaction, and we sometimes find that there is a difference between us and the Accountant-General, and that it takes a long time to find out how the difference has arisen.

740. (*Mr. Stansfeld.*) What staff have you for keeping your accounts?—I have a certain number of clerks, one of whom keeps the records of liabilities and estimates, another clerk keeps the records of the Loan. It is not their sole business, but they do it as part of their duty.

741. When you say that you also keep accounts, do you mean that you keep precisely the same accounts as are kept in the Accountant General's Department, with that little difference?—We keep an account of all sums authorized on account of works.

742. You keep a cash-book and a ledger?—No, a liability book; the accounts are kept in the Account Branch, but we should, I think, be a party to them; it seems to me to be better to have some arrangement by which we should keep our own accounts, subject of course to audit. In fact the Chief Auditor would seem to be able to do all that is necessary outside our department; but, as I said before, I am not proposing any detailed mode of doing it.

743. (*Chairman.*) You are of opinion that the appropriation of the Works Vote should be kept in the Works Department, but checked by the Chief Auditor, on behalf of the Secretary of State?—Yes.

744. (*Mr. Stansfeld.*) What difficulty do you find in obtaining access to the accounts which are kept in the Accountant-General's Department, so as to permit you to compare your accounts?—There is no difficulty; as a general rule I find the Account Branch ready to show them to us; but that is after the account is posted. I think a voucher should be referred to us before it is posted, to know whether it is a right proceeding.

745. Then your view would be thoroughly met if a claim, or an imprest account, were referred to you for approval before it was posted by the Accountant-General, and especially if it were noted when it came to you with the heads under which it was charged?—Yes; always excepting the delay and inconvenience in a large office like this in readily obtaining the required information from a distant part of the building. We should keep our own books, so as to be able to obtain our information readily.

746. But the information which you would want so readily as that, would surely not be the information for which it would be necessary to go to your complete account of cash payments. Would not that require something like a rough liabilities account?—Suppose a case brought before you, we will say, of some proposed extra work upon a contract, you want to know when you take up the paper how you stand on the vote; I now

Col. W. F. D. Jervois, C.B., R.E.

8 Dec., 1869.

put the question on a slip of paper to Mr. So and So, "How do we stand on such and such an item?" the answer to which I get back directly.

747. (*Sir Edward Lugard.*) Would you see your liabilities; would the gentlemen to whom you refer know the outstanding liabilities; he could tell you what had been paid?—Yes; and, so far as the books were concerned, he would know the liabilities; there might, however, be some liability in the mind of the Director, which he would not know; we have the means of knowing our liabilities better than the Account Branch. The Accountant General, in fact, cannot know them.

748. (*Mr. Stansfeld.*) Therefore, the questions which on the point of administration you might find it necessary to put to your accountant, could only be answered by a man keeping the liabilities account, and they are not such as a man keeping an account of the amount paid would be able to answer.—Yes.

749. And that account need only be a rough liabilities account?—An account of the amounts actually paid away, plus the further outstanding liabilities.

750. The totals?—Yes.

751. (*Sir Edward Lugard.*) You have said that it would require a re-adjustment of the Superintending Officers of the Royal Engineers, if the Loan works were separated from the rest of the works. You have an officer of Royal Engineers superintending the Loan works at Portsmouth?—Yes; the Commanding Royal Engineer of the district.

752. Has he any other duties irrespective of the Loan works?—The Commanding Engineer has the general charge of the whole of the works, whether under the Loan or the Annual Estimates, both Fortification and Barrack.

753. Is he paid out of the Loan work's fund?—No.

754. Then the Loan work does not pay for the Superintending Officer?—It only pays for what is beyond the ordinary establishment. For instance, if an officer employed upon Loan works had charge pay, that charge pay would be charged to the Loan, or if you engaged a temporary assistant (such as a Foreman of Works or a Clerk of Works), as we have done specially for some of the Loan works, the ordinary establishment would not provide such superintendence, and the pay would be charged to the Loan.

755. You do not mean to say that if there were no Loan works going on at Portsmouth, you would have the staff of Engineers there which you have now?—There would be some reduction no doubt. The Engineer Officers at Portsmouth and other stations, however, form part of the Corps of Engineers, whose pay is charged to Vote 1 just the same as that of any other military officers.

756. Then the Loan gets the benefit of it?—The principle I just mentioned has been adopted from the commencement. The item of "contingencies" which is included in the Schedule of the Fortification Act only provides, so far as extra staff is concerned, for such additional assistance as I have referred to.

757. (*Chairman.*) You have, I think, under you a considerable staff which is not included in Vote 18 of the Estimates, but which is provided for under Vote 14?—Yes; a few years ago the whole of the staff at Head-Quarters, including the Engineer Officers conducting the business of the fortification and barrack works, was part of the establishment in the War Office, but now the clerks in the Works Branch all belong to the Civil Branch of the Engineer Department to which I referred in detailing the general organization of the Engineers.

758. As far as I gather from the Estimates, five officers of the Royal Engineers are specially employed?—Yes.

759. Can you tell us in what departments those five officers are employed?—There are two in the Barrack Branch and three in the Fortification Branch; a Subaltern, namely, Lieutenant Ommaney, is also engaged in the Barrack Branch about Lock Hospitals.

760. Besides those officers there are, as I see from the Appendix to Vote 14, Surveyors, Deputy and Assistant Surveyors, Acting Surveyors, and Clerks of Works?—Yes.

761. The total expense comes to between 11,000*l.* and 12,000*l.*?—Yes.

762. Are those men employed in doing the detailed work of plans, and so on, in the office?—The Surveyor is generally employed in examining details of estimates and details of plans. What you have stated is generally his duty; one Clerk of Works and one Clerk under him being employed in matters relating to stores required for works.

763. I see that there is a Clerk of the Works inspecting stores?—Yes; he is specially employed upon that duty.

764. For example, what kind of stores does he inspect?—All the materials required for works at foreign stations which cannot be obtained from the Store Department.

765. Is he sent down to different places to make an inspection?—Colonel Murray will tell you better than I can how he is employed; he is a very useful man.

766. Besides those persons you have I believe Engineer Officers employed for the Loan works, and who are paid from the Loan fund?—Yes; they are specially employed Practically, however, I have not so distinctly divided the duties as not to employ a Loan officer on another work, or an officer of Vote 14 on Loan business; but their pay is charged in fair proportions to the Loan and to Vote 14 respectively.

767. Have you no clerks under you who form part of the general establishment?—None on the War Office Establishment.

768. The Estimates of Fortifications are framed in considerable detail, I see, by looking at the Vote?—Yes.

769. What financial check is there to prevent in the course of the financial year your exceeding your Vote for any item in fortifications. I am not now speaking of the Loan, but of Vote 14?—In the first place we take care at head-quarters not to order a work during the year which should entail expenditure beyond the amount voted, and if an officer at a station does his duty in compliance with the orders which he receives, and found that we had ordered more work during the year than can be paid for out of the vote at his disposal, he would apply for the difference.

770. Have you power to authorize him to expend more money than is voted by Parliament for any particular item, for example, take any item in the Fortification Estimates in this year, reconstructing a part of the Sea Wall at Eastbourne?—There is no such power beyond the limit of 200*l.*, that being the amount which the Secretary of State can authorize without Treasury sanction.

771. Supposing that you find that it is necessary for the public service that an authorized work should not go on, and that you think that it is advisable to expend money upon another work, what course do you pursue?—We ask the Under Secretary of State to move the Secretary of State, to apply to the Treasury that the surplus on one item shall be applied to the requirements on another item, where the sum is deficient.

772. So that under the regulations under which your department is conducted, you are strictly limited to expenditure within estimates?—Yes, within the limit I just mentioned.

773. And if you have a proposal to make for altering the disposal of the estimates, you must apply to a superior authority?—Yes.

774. (*Mr. Stansfeld.*) In making your application to the Secretary of State, you suggest to him that it is a case for Treasury sanction?—Yes; for instance, if we had a Vote of 200,000*l.* for a work at one place, and a Vote of 200,000*l.* for a work at another place, and if we had 50,000*l.* voted in the year for each of those works, and if we found as we got on that we could spend only 30 000*l.* for one work, but could spend 70,000*l.* for the other, it would be within the power

of the Treasury (Parliament having sanctioned the total estimate), to apply more money to the one work and less to the other.

775. (*Chairman.*) Is the letting and management of the War Department lands under you?—Yes; it is in my department.

776. There have been some questions raised respecting the managemeat of the War Department lands?—I have been for some years asking for an extension of the arrangement which has been found to work satisfactorily at Devonport, namely, having the assistance of a local agent to advise on what you may call professional questions relating to the letting of lands, and that this system should be applied to other large stations where we have acquired considerable tracts of property. The proposal was approved by Sir John Pakington, when he was Secretary of State, but as yet it has not been acted upon. There is a proposal which has been last made by Sir Henry Storks, that the charge of lands should not be in the hands of the Engineer Department; but I do not see any reason assigned for making any such change of organization.

777. Do you yourself know practically how the lands, for example at Portsmouth, which have been pretty much discussed here, have been managed, for instance, whether sufficient advantage has been taken to get a proper rent for all the property which has been bought by the Government for fortifications?—As regards all the lands on which works are not being carried on, I believe we receive the full rent which can be obtained for them. The letting of the farms was put out to competition, and the leases for them are the result of that competition. I am now particularly alluding to the lands at Gosport. The lands on which work has been lately carried on have not, on account of that circumstance, as yet realized the full value which we shall ultimately obtain for them.

778. When you began to make any of those forts, who decided how much land should be put in the hands of the contractor?—I did.

779. Do you think that you got the full value of the land which you gave to the contractor?—I do not think that we put into his hand anything which was not absolutely necessary for carrying on the work.

780. Then you did not require the report of the Commanding Officer at Portsmouth?—I generally decided it on the report of the local officer; but I always looked to see whether or no he proposed too much.

781. Who do you consider to be the local officer?—The Commanding Engineer. There is also at Portsmouth a special officer, who was appointed by the Board of Ordnance, for the management of what was called the Hilsea Estate, and before the abolition of the Board of Ordnance he used to manage the property under the direction of the Board of Ordnance and the Respective Officers.

782. Was he consulted?—He would not be consulted on such a case as I have been referring to, because he would not be a judge of what amount of land it would be necessary to give over to the contractor for carrying on his works.

783. I see that in the précis of papers, with regard to letting War Department land, which has been prepared in your department, it is suggested that Captain Downman should be removed, and that somebody else should be appointed. Have you any reason to suppose that he has done his work improperly?—My proposal was not to remove Captain Downman, but to call in, when desirable, the aid of a land surveyor.

784. What kind of man should you propose?—I should propose to employ a man such as an owner of landed property would employ for advising on the letting and tillage of his farms.

785. A local man?—Yes, a land agent; a land agent who is employed by private parties in Devonshire and Cornwall is employed in that district by the War Office also.

786. What particular reason is there for the Commanding Engineer having anything to do with the letting of the War Office property, why should he have more to do with it than, for instance, the Commanding Officer of Artillery?—The consideration of questions relating to lands is more connected with the duties of the Engineer than with those of any other branch of the Military Departments. In France, the Military Engineers have charge of what is called the "*domaine militaire*," and I believe that this is generally the practice in the War Departments of other nations. The lands were originally acquired for defence purposes. For instance take the lands which have been acquired under the Loan Act; propositions were made by the several Commanding Engineers, after certain forts had been decided upon, for acquiring lands within certain boundaries,—portions to be absolutely acquired where forts were to be built, or where we might have to work upon the land for roads or other works in connection with the fortifications: the remainder to be dealt with for the purpose of preventing buildings, or other obstructions which would interfere with the fire of the works, being erected thereon. Those plans, with the boundaries, as reduced in this office, and after communication with the Commanding Royal Engineers, were ultimately, on my recommendation, adopted. It seems then that the Commanding Engineer, having laid down the boundaries, and having prepared the plans, and being cognizant of the object for which the lands and clearance rights were acquired, as well as of the conditions under which they should be let, would be the natural person to refer to in any question relating to the lands, and, on the whole, I consider that, taking into consideration his general capabilities, and the fact of the land being required for purposes of works, he is the departmental officer best qualified to judge whether or no anything done upon the land would interfere with those purposes. He is the natural person to have charge of the business, and if he did not have charge of it, I think that you would get into some very complicated and expensive arrangement; you would require references and a large staff, which are avoided by the matter being in the Engineer charge.

787. Admitting the precautions which are necessary in letting lands in order to prevent buildings being erected too near fortifications, and so forth, upon which the Commanding Officer of Engineers would be required to express an opinion, what special knowledge has he of landed property which would enable him to decide upon the amount of rent to be obtained, and the terms of the engagement?—I cannot say that he has necessarily any special knowledge relating to lands, but he is usually a man of general intelligence, and such a person as a large land-owner would like to have as the steward of his property. The consideration of questions relative to engineering, architectural work, drainage, &c., is calculated to qualify a man for charge of this kind of business. As a matter of fact, I know of two officers, Captains of Engineers, who, without any special qualifications relating to the charge of lands, were only the other day asked by a man of large property to undertake the management of his estates. An officer of Engineers, who has lately retired, has been selected, and is now engaged at a large salary to take charge of a large estate in this country.

788. No doubt any officer of Royal Engineers would be competent to do that, but are not the Commanding Officers of Engineers constantly changing?—It is to supply that defect that I want to employ land agents in conjunction with them, to advise on certain points.

789. If you have an agent, do you propose that he shall be under the Commanding Officer of Engineers, or not?—He would be what I may call a professional adviser with regard to the conditions in letting and the mode of farming lands, and he would come to the Commanding Engineer for his concurrence in his proposals; the Commanding Engineer seems to me to be a good check upon the agent.

790. Upon whose responsibility would the letting be; which of those two men would be responsible?—

Col. W. F. D. Jervois, C.B., R.E.
2 Dec., 1869.

Col. W. F. D. Jervois, C.B., R.E.

2 Dec., 1869

The Commanding Royal Engineer would be responsible, but all proposed lettings exceeding 50*l.* a-year would be let by public tender, and reported to and approved by this office.

791. To whom do they go in this office?—They go to the Director of Contracts and the Director of Works; the Director of Contracts accepts.

792. Who is the person who would be considered responsible in this Office?—The Director of Works would be responsible.

793. Do you think that you have now sufficient power to make the best of this large property?—I think not now, because I have not the assistance which I have asked for.

794. You want more professional assistance?—Yes; I am perfectly certain that it is impossible to have any arrangement for the charge and letting of lands which would be conducted with such economy, and with such little correspondence and work, as that which now exists, supplemented when necessary by local agents.

795. What does the Director of Contracts do?—I will assume a case. We have a farm to let; the lease is out; and we think it desirable to call for tenders for a new lease. Supposing we get a report from our agent that a certain rent should be obtained for the farm, we put it out to competition, and tenders are received; those tenders are sent to the Director of Contracts, and he, if he wanted any further information on the subject, would refer to us for that additional information. But supposing that the tender were equal to, or above, the amount estimated, and he saw that the rent offered was in excess of, or equal to that amount, he would very likely accept the highest tender without reference to us, the estimate of the rental having previously come from our agent through the Commanding Engineer.

796. With respect to the question of the suggested removal of Captain Downman, was it because you thought him not fit for the business at Portsmouth?—The suggestion for the removal of Captain Downman did not come from me. It owes its origin to a request made by Captain Downman on 18th June, 1863, to be allowed the assistance of a surveyor in preparing a Report called for by the Commanding Royal Engineer in reference to re-valuing and re-letting the War Department lands at Portsmouth. Captain Downman is not a professional land agent.

797. Might he not be equally qualified as an Engineer Officer to carry on that business; is there anything against him personally?—As to the first point, I think not; but as to the second, there is nothing whatever against Captain Downman personally, excepting that he is not a man calculated to advise the Department on professional matters relating to the letting of lands.

798. Has the Commanding Engineer at Portsmouth made a representation to that effect?—A representation was made by the Commanding Royal Engineer, that Captain Downman required assistance to enable him to report as to re-letting the lands at Portsmouth, and acting on my own judgment and a knowledge of Captain Downman's antecedents, I recommended that assistance should be given by calling in a professional Land Agent to advise on the subject.

799. Was he an officer in the Army?—Yes.

800. You think that an officer in the Army is not fit to exercise those functions?—I think that many officers in the Army might be very good men as stewards of property, but we want at Portsmouth the assistance of a professional adviser such as I have mentioned as existing at Devonport.

801. What does a man want to know in order to deal with landed property of that class. In the first place, I suppose he requires to know the average rent of land in the neighbourhood?—Yes; and the special circumstances relating to the land, whether it is good land, what is the best mode of farming it, or whether it is superior or inferior to other land. There may be also special considerations with regard to it, as, for instance, with respect to the mode in which the farms should be divided, so that the property may be let in parcels, which would give the best return.

802. In fact, there is the need of a general knowledge of the business which is acquired by anybody who has to manage landed property?—Yes; I may add that all the archives and plans relating to lands are in the War Office and Engineer offices, and I think that you would introduce a very complicated state of things if you were to try to separate those plans, and put them into the hands of some other department. The deeds and plans of lands are, in most cases, the titles to the property on which forts and barracks are built, and I am perfectly certain that if the War Department lands were transferred to the Office of Woods as has been proposed, a very large additional expenditure in appointing Crown agents would be incurred, because there are Engineer Officers at every military station to conduct this business, whenever it is required to be done, and if they did not conduct it, special men would be required to perform the duty.

803. Will you tell us in what stage of the plans for fortification works the Officers of the Royal Artillery are consulted?—When a general design is proposed it is laid before the Defence Committee, of which the Inspector-General of Artillery, the Deputy Adjutant-General of Artillery, and the Director of Ordnance are members.

804. Is that the stage in the consideration of the plan in which you get the benefit of the assistance of Artillery Officers?—The assistance of Artillery Officers is also obtained by conference with them on the general questions relating to the space which the guns should be apart, the mode in which they should be supplied with ammunition, and all the details with reference to the artillery stores and magazines.

805. (*Sir Edward Lugard.*) You used the words "conference with them," whom do you mean by "them"?—The Artillery authorities, viz., the Director of Ordnance, the Inspector-General of Artillery, and the Deputy Adjutant-General of Artillery, of whom all have now a voice in the matter.

806. Have they been consulted?—If you will read these papers (referring to papers on the table) you will find that they have been. I laid before General St. George, General Taylor, General Gambier, and General Lefroy proposals on the matters to which I refer, and they concurred generally in all the proposals which I submitted to them; General St. George, the President of the Committee, signed a memorandum to that effect. Previously, when Colonel Bingham was Deputy Adjutant-General of Artillery, the distance at which guns should be apart, and the question of the size of casemates was discussed with the Artillery; I had a model put up in Woolwich Arsenal, and I asked the Deputy Adjutant-General of Artillery to criticise it; he acceded to my request. When the Artillery Officers have given their general concurrence in these details, it is for the Engineers to apply them.

807. (*Chairman.*) Is there anything else connected with your department upon which you wish to make any observations?—As regards the general employment of Engineer Officers, it seems to me that greater advantage might be taken by the Government Departments generally of their services, and that more are employed on the small details in barrack work than is advisable. As our Military Foremen of Works become more experienced, and we have more of them, I think that men of that class might be much more largely employed on these work under the supervision of officers having large districts. If this were done, a good many officers would be set free for other work, and it would be found both economical and advantageous for the public service, and for the benefit of the Corps, and of the officers themselves, if they were employed by the Board of Works, by the Commissioners of Woods, by the Board of Trade, and by all the departments of the public service. The effect of this would be to turn to account brains which are in many cases now lying unexercised on small and trivial duties which could be performed by men of much less capability.

808. (*Sir Edward Lugard.*) They are at present employed in such a way, are they not?—Yes; but I would propose to employ them to a much larger extent.

809. (*Mr. Stansfeld.*) You are speaking of the officers of the Corps?—Yes; wherever you find that an Engineer Officer is employed either at home or abroad upon any public work, and has responsibility thrown upon him, and exercises his brain, as a rule, he does his business most satisfactorily; and the reason why we sometimes hear of complaints about Engineers at stations is that they can scarcely take an interest in some of the duties which they have to perform.

810. (*Chairman.*) I believe that Mr. Cardwell has appointed a Committee upon that subject?—He has.

811. (*Sir Edward Lugard.*) You have said that you consider that the Inspector-General of Engineers should command the corps, with an Adjutant-General under him?—Yes.

812. He would be Director of Works also?—I would not call him Director of Works; I would revert to the old name of Inspector General of Fortifications, or, if you please, Director-General of Military Works. The term "Director of Works" is not a suitable one for a General Officer of a Military Corps; it is more the designation of a man who is engaged on some purely civil work.

813. (*Chairman.*) The position would be this, that certain works would be given to the Corps of Engineers to perform, and that they would be performed under the direction of the head of that Department?—Yes. Before leaving I would allude to another point, namely, that whilst the votes for works would be dealt with by the Engineer Department, organized as formerly, it probably would be a good arrangement to have in connection with the Military Department of the office, that is under the Military Under Secretary of State, an officer who should deal generally with matters relating to defence. His business would comprise the consideration of many matters besides works. You may get from the Engineer, looking at a matter only as an Engineer, proposals for works which might require to be considered from a naval point of view. Questions arise also with respect to the strength and description of garrisons required for fortresses. To my mind the mode in which such questions are now dealt with is not on any well-founded basis. I do not know how the strength and composition of the garrison at Gibraltar is arrived at, how the strength of the garrison at Malta is arrived at, or how the strength of the garrison at Bermuda is arrived at; more might be required at one, and less at another. All these matters; garrisons, forts, guns, magazines, floating batteries, torpedoes, and other defensive arrangements should be considered as parts of a whole. Take for instance the small case of determining the garrison of Singapore; to my mind the garrison of Singapore was determined without reference to the object, or at all events, to one of the objects for which it is there maintained. There are certain works and guns which are supposed to be for the defence of the harbour, but the garrison was determined without reference to the consideration whether those works and guns are necessary for the defence of the harbour, or whether they would be used for that purpose, supposing the place were attacked. It is, I know, stated that the garrison of Singapore was only settled with respect to the amount which the colony was to be called upon to pay. I believe, however, the fact to be that the garrison was settled first, and the sum which the colony was asked to pay was estimated upon the strength and nature of garrison thus determined upon. A question may often arise whether by the construction of certain works you might not do with a smaller garrison, and so cause much less expense to the public; that question should be considered by some one who is conversant and capable of dealing with matters relating to the expense of that force and the expense of the works, and of considering it in all its bearings. One function of such an officer might be that of Secretary to a Council of War which would consist of the Heads, both Political and Military, of the War Department and Admiralty; this Council would decide on questions of national defence in which the united action of several branches of the War Office and Admiralty is necessary. I believe that considerable reduction of expenditure would result from such an arrangement, if properly carried out.

Col. W. F. D. Jervois, C.B., R.E.
2 Dec., 1869.

(The Witness withdrew.)

Adjourned to to-morrow at 11 o'clock.

Friday, 3rd December, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK, *in the Chair.*

The Right Hon. JAMES STANSFELD, M.P. | Lieut.-General Sir EDWARD LUGARD, G.C.B.

Major-General Sir LINTORN SIMMONS, K.C.B., examined.

814. (*Chairman.*) You are a Major-General of the Royal Engineers?—Yes.

815. What was the last employment which you had in connection with the Corps?—Director of the Royal Engineer Establishment at Chatham.

816. We should like to have your opinion with regard to the general government, as I may call it, of the Corps of Royal Engineers, namely, whether you think that the alterations which have been made since the Board of Ordnance was abolished are satifactory for the government of the corps, and for the superintendence and execution of works by the corps?—I think that the government of the corps under an Inspector-General of Fortifications, as it was carried on in the time of the existence of the Board of Ordnance, was much more satisfactory as regards the manner in which the duties were generally done than it is now; and also it was certainly much more satisfactory to the corps itself. Having one recognized chief to whom officers at out-stations could appeal in case of questions arising, and differences of opinion as to works, was certainly a very great advantage to the corps and the public, because questions were always sure to receive consideration from an officer of high rank and of large experience, to whose opinion the officers generally would bow with satisfaction. At present the duties of the corps being divided under what used to be the deputies to the head of the corps, there is not that uniformity in the works which is desirable, and from the position of those officers, they being junior to many of those who have charge of stations, it produces a very uncomfortable feeling with the officers at out-stations, and a reluctance to bring their opinions forward for consideration.

817. Would that difficulty and reluctance be removed if an officer of higher rank was at the head, through whom orders would be given?—Certainly; and to whom they could appeal in case of differences

Major-Gen. Sir Lintorn Simmons, K.C.B.
3 Dec., 1968.

Major-Gen. Sir Linton Simmons, K.C.B.

3 Dec., 1869.

of opinion; without doubt it would have that effect.

818. You mean that the superintendence of the execution of the works should be under the same superior officer as the distribution of officers?—Yes; that all the Engineer duties, whether it be the construction of barracks, or the construction of works, or the disposal of the officers should be under the control of the head of the corps, and I believe that it would be attended with very great economy in the execution of the works, and that the Government would get a very much larger amount of work out of the officers if the whole duty were thrown upon one officer, and the execution of their duties determined in such way as he thought best to carry out the work which might be required of them. I include with the officers the men. Of course the discipline would remain with the Adjutant-General of the Army.

819. The men of the Royal Engineers are employed in twos and threes?—A great deal too much so, and I do not think that it is a very profitable way of employing them; I think that they would be much better employed in companies, there is much greater difficulty in keeping men at their work in twos and threes

820. Are not non-commissioned officers of the corps employed now a great deal?—They are employed very largely as Foremen of Works.

821. As men to watch the works?—Yes.

822. Have you seen the operation of that system?—Yes; and it answers very well.

823. Do you think that they are a class of men who can be trusted to watch the execution of works under the contractors?—Yes; when I went to Chatham in 1865, we established a school for the instruction of non-commissioned officers, with the idea of bringing them up as Foremen of Works, and the results of that school have been most satisfactory, the men have acquired an amount of knowledge in a very few months which enables them to hold the position which was formerly held by Civil Foremen of Works, and they are capable of making drawings and estimates for military works, and by that means they save the officers in the execution of their duties from going into petty details which do not require the highly educated men which the officers of Engineers are.

824. (*Sir Edward Lugard.*) Under the organization which you propose, where would you have the regimental orderly room of the corps?—I would place it at the Head-Quarters of the corps, in the same way as in every regiment. I do not see why there should be any difference in their organization in that respect, from the general organization of the Army. If there was a head for the corps, I do not see why that officer should not have entire charge under the Military Head of the Army, and also the entire execution of the works which have been decided upon by the Secretary of State for War. Under the present system you have every guarantee that money, the expenditure of which has been authorized by the Secretary of State for War, is not applied to any item to which it has not been destined. You have the certificate of the Engineer Officer that the money has been expended as appropriated by the Secretary of State for War; and there are orders existing by which he cannot exceed the estimate without the authority of the Secretary of State for War; and therefore having these guarantees, it matters very little whether the work is carried on immediately under the Secretary of State for War, or immediately under the Military Chief of the Army. An objection might be taken to this proposition, namely, that the Secretary of State for War in such a case would not have the estimates presented to him in such a manner that he would be able to judge as to the necessity of the works; but if the history of the Estimates, as framed by the Engineer Department, were considered, I think it would be seen that the Secretary of State for War would have every necessary guarantee. As the estimates are framed now they originate with the Heads of Departments, and the Commanding Officers of all regiments at all stations. Every year, at a certain period, a circular is sent to every Commanding Officer, and to every Head of a Department at all stations, asking him what services he thinks necessary in the next year's estimates. When their replies have been received they are sent to the General Officer Commanding the District, who sends them to the Commanding Engineer; he then makes his observations upon these demands, and passes them back to the General Officer, who makes his observations, and from him they go to the Commander-in-Chief, who makes his observations; each of them, as a general rule, striking out a very large number of proposals which have been made by the Commanding Officers, or making their recommendations as to the mode in which these services should be performed, whether by re-appropriation or by new buildings. These demands having been so cut down, are then referred again to the Commanding Engineer, who frames an approximate estimate, the whole being then sent to the Secretary of State for War, who decides what works shall be done. I think that with that system, even though the Head of the Corps might be under the Head of the Army, the Secretary of State for War would have every guarantee to enable him to exercise his discretion as to the works which were brought before him in each year, and that he would have the same security as he has now in determining whether these works should be done or not. The Engineer Officer has no power of originating works; he is only held responsible as to the sufficiency of his estimates and for providing in the estimates what he thinks necessary for keeping the works and public buildings in a state of efficient repair.

825. (*Chairman.*) Practically he would have precisely the same power of reviewing the estimates as he has now before they go to Parliament?—Yes, and I think that the initiative of proposing works should rest, as now, with the Commanding Officers of Corps, and the Heads of Departments in the various Districts; they are most likely to know what is required in the first instance, others can judge of the necessity of their proposals afterwards.

826. You are now speaking entirely of barrack works?—Principally, but the same remark applies to all buildings under the War Department.

827. But not absolutely to fortifications?—No; fortifications are generally determined by military considerations, and before they are proposed they have been the subject of correspondence, either through the General Commanding the District, or if they are new works altogether, they are sanctioned by the War Office and Horse Guards.

828. With respect to the financial check, is it not the case that at present no excess is allowed upon any item without the approval of the Secretary of State for War, or the Treasury?—That is the case now, and it has always been the case.

829. That of course brings a very complete and minute check upon the expenditure of the estimates after they have been voted?—Yes; the Engineer Officer cannot exceed the authorized amount upon each individual item by one sixpence; and those items are so set out in detail that the most perfect check is exercised upon the Engineer Officer; he cannot even expend the saving upon one item upon the deficiency on another item without authority.

830. Do you know the opinion of the Officers of the Corps on the subject of the existing arrangements?—I may say that from communication with my brother officers, I find that they feel very much indeed, and have for some time felt very much indeed, the want of a professional Head to their corps, and it is the cause of very great dissatisfaction to them that they have no recognized Chief to the Corps.

831. (*Sir Edward Lugard.*) According to your organization you would have a Head of the Corps who would be the Military Head of the Corps, and the Director of Works at the same time?—Yes.

832. And the department which is now, in this office, called the Works' Department, should be in your opinion placed under him?—Yes.

833. And it is your opinion that he should carry out those duties at his head-quarters?—Yes.

834. (*Chairman.*) Is there not at present, from the distribution of the men of the corps being under the Deputy Adjutant-General at the Horse-Guards, and separate from the organization for the execution of works, some possibility that the corps may not be utilized to the greatest advantage?—Yes; I think that there is a considerable probability of the corps not being utilized to the greatest advantage. If the corps were placed under its own head, who should be held responsible for the execution of works, that officer would know where to employ the men of the corps, as well as the officers, to the greatest advantage; and would have the power of posting companies of Engineers and officers of Engineers to the stations where they could be most profitably employed on works; so that by handing over to him the whole constructive power of the corps of Engineers, I think that the Government would get the greatest benefit out of it.

835. I presume that in a time of peace the Sappers are of no particular use excepting to be employed in works?—They are of no use whatever excepting to be employed in works.

836. And their training in works is just the training which would be useful to them in time of war?—Yes; it is most necessary that they should be so employed to train them for a time of war. If in time of peace you do not keep their hands in, I think that you had better abolish them altogether; but as the Engineers are useful in war, I think that the system adopted by the Duke of Wellington in 1821 as Master-General of the Ordnance of that day, is a good one; he adopted very wise measures in order to keep the men practised at such work, so that in time of war they should not be strange to it; because the works which have to be executed in time of war are to a very large extent analagous to those which should be executed in peace time. For instance if an army starts from a base of operations, the first thing is to house the troops, and to place the storehouses in a proper state and to use the resources of the town from which they must start, to the greatest possible advantage. Immediately that such work has to be done, the Engineers are called upon very largely to adapt buildings for special purposes, and such work has always been done by them. Then, as the army moves, this operation is repeated whenever there is a halt of any duration. Therefore these works are very analagous to what we have to do in time of war. The habit of employing men in peace time and supervising them is exceedingly useful to enable officers to execute any other works which they are called upon to execute. At present while the large works of fortification are going on, which may last a few years longer, officers get information from them, but if there should be a long time of peace there will be an absence of these large works; and, therefore, unless you employ them in all the constructive works of the War Department, I think that you would have difficulty in finding officers who were up to their work when required in war.

837. And the difficulty of employing them will be greater when the fortifications are completed?—Certainly; and, therefore, I think that it behoves you to throw as much as possible all constructive works into their hands. You must keep them up; they are highly educated men, and they have gone through a practical course of education at Chatham; there is no better school in the whole country, whether civil or military, for such an education, and it would be very much to be regretted if officers upon whose eduction so much time, trouble, and money had been expended, were not kept up to their work after completing it.

838. (*Mr. Stansfeld.*) Can you tell us at all, in what proportion barrack works, with ordinary maintenance and repair, are performed by the hands of the men themselves, and what proportion is done by civilians employed under the Department of Engineers?—I cannot tell what proportion of the whole of the barrack works is done by civilians, and what is done by sappers; but all the sappers of the corps are employed on works, except those who are recruits, or who are under instruction, and the work which they produce is very economical to the Government as compared with civil labour, because as their work is done for their working pay which is far less than the wages of the civilian labourer or artizan, the difference is a saving which helps to defray their pay as soldiers.

839. Then at the present time your sappers are fully employed?—I believe that they are.

840. But do you attribute that to the fact of our great fortification works being still on hand?—Not only are our sappers fully employed, but there is a great demand for them at all stations, and there is sufficient work, independently of the fortification work, to occupy the corps, in fact you could increase the corps very largely and still employ all the men usefully.

841. Then the lack of employment is rather for officers than for men?—Yes

842. (*Chairman.*) To sum up your opinion upon this question of organization, the Inspector General of Fortifications, as you would propose to have him, would be exactly in the same position as the Inspector-General of Fortifications was under the Board of Ordnance?—Yes.

843. And the determination as to what was to be put in the estimates would be made by the Secretary of State for War?—Yes, the estimates being submitted by the Inspector-General of Fortifications for consideration.

844. Have you given attention to the mode in which the alterations in the appropriation of barracks should be considered?—Yes, I have been employed very largely in re-appropriating barracks.

845 You were at Aldershot?—Yes, for five years, and during the time that I was there the whole of the camps were re-appropriated.

846. Will you state what the term "re-appropriation" means?—When a barrack is first built it is constructed for certain accommodation; in consequence of changes which occur in the organization of the Army, or in the demands for space on sanitary grounds, or from some other causes, it is frequently found that buildings which have been originally constructed for one purpose are no longer wanted for that purpose, but may be applied for some other purpose, and in that way it constantly becomes necessary to revise the appropriation of barracks and of public buildings. While I was at Aldershot the whole of the camps were re-appropriated, in consequence of their having been constructed in time of war, when battalions were of very different strength from what they now are; the accommodation also was not such as is now given to troops; there was not the same amount of cubic feet of space, and there was a lack of accommodation for married people, and therefore it became necessary to consider what number of troops could be put in the camp, giving them as far as possible, the accommodation recognized as necessary at the present day. In consequence of that, the whole of the camp was re-appropriated. The manner in which it was done was that a Committee was named of which I being senior officer, happened to be President; it consisted of the Commanding Engineer, the Assistant Quartermaster-General, and the Barrackmaster; we met weekly, and all questions of re-appropriation were referred to us, and with very little correspondence and with very few reports, the whole of the work was carried on to the entire satisfaction of the wants of the troops, and to the satisfaction of the Secretary of State for War; the machinery was very simple, and the work was carried on with the greatest facility. After the camp had been entirely re-appropriated many questions arose from time to time, especially with reference to married men's quarters, upon applications from the Commanding Officers of Regiments to the General Officer Commanding; these were at once referred to this Committee, whose reports were invariably approved by the Secretary of State for War.

847. That Committee would consider first the wants of the troops as represented by the Assistant Quartermaster-General; next the alteration of construction

Major-Gen. Sir Linton Simmons, K.C.B.

3 Dec., 1869.

represented by the Commmanding Officer of Engineers, and thirdly, any financial considerations as to fuel and light, and so on, as represented by the Barrackmaster?—Yes.

848. Under the present system I presume that it would be simply necessary, in order to carry out the same system, to have a Control Officer upon the Board instead of the Barrackmaster?—Yes; the submission would first be made to the General, and he would refer it to the Board. I think that there is a great advantage in having a submission made to the General direct, because it ensures its having been well considered by the Officers who make the application. The General himself used to stop the propositions if he considered them improper.

849. A General Officer would, in point of fact, represent the whole Army administration upon the spot?—Yes, and he takes into consideration that for which he is particularly responsible, namely, the military question, and the necessity of particular troops being in particular situations.

850. When you were at Aldershot was there a Barrack Department in the War Office?—Yes.

851. Then when the re-appropriations were discussed they came to the Barrack Department in this office, I presume?—I had nothing to do with that; our reports were sent to the General who made his observations upon them, and passed them on to the Horse Guards, and from the Horse Guards they came to the War Office, and received the sanction of the Secretary of State. In England where the facilities of the post are so great I think that it is very desirable that all re-appropriations should be referred to the Secretary of State.

852. They involve considerations of expense in one way or another?—Yes, and not only that, but there is a tendency at stations to accommodate individuals which is corrected by a reference to the Secretary of State. Abroad, where the course of post is long, responsibility must be thrown upon the General Officer Commanding, who to a certain extent takes the position as regards the Army, of the Secretary of State for War within certain limits; but at home where the course of post is so easy, I think that it would be wise to keep the administration of barracks, especially as regards alterations and appropriations, in the hands of the Secretary of State for War, because, otherwise I think that there is great probability of your being run into great expenses.

853. Have you ever been at a station where you had much War Office property to manage?—Yes.

854. Have you any opinion as to whether the management of that property is well carried on now, or have you any suggestions to make about it?—I think that the duty is generally satisfactorily done by the Engineer Department, as custodians of the War Department property, but I think that it might be advisable to throw a little more responsibility upon the Commanding Engineer, and that he should be held responsible that the War Department property, which was not actually in the occupation of the War Department should be turned to the best account in the way of rents, and things of that sort.

855. In what way is his responsibility fettered at present?—Formerly the Commanding Engineer had not charge of the renting of the property; it rested with the War Office directly, and I think that it would be advisable if more power were given to him as the local agent of the War Department; in fact, if he were put into the position of the agent of a large landed proprietor, as regards property.

856. Is it not a disadvantage that the person filling the office of land agent should be constantly changing at stations?—I think not where an office is organized as the War Department is, because there are subordinate officers who carry on the traditions so as to prevent any great changes, and with that organization the introduction of new blood is often a good thing. A new man seeing a thing in a new light might perhaps turn the property to a better account.

857. Whom do you mean by the "Subordinate Officers"?—The officers under the Commanding Engineer. At all stations there is a Commanding Engineer, and officers under him who assist him in the management of the property. A change of a Commanding Engineer would be like a new land agent coming into a well-organized office, in which the traditions were well established.

858. Would not the subordinate officers be also changing?—They do not all change at one time.

859. (*Mr. Stansfeld.*) Do you think that it would be easy to alter the arrangements under which War Office property is managed with a view to profit; are there any practical drawbacks under the present arrangement?—I have not been at any station myself where there is any very large amount of property let or applied to making a return to the War Department, but my impression is from the small quantity with which I have had to do, that it would be better in the hands of the Commanding Engineer, or some local person, who knew the locality well, than in the hands of those who consulted other persons, and that it would be turned to better account.

860. (*Sir Edward Lugard.*) Do not you consider that it would be well to have as the local agent a land agent conversant with the value of land in the different localities?—I think that the Commanding Engineers are quite capable of taking up the duty of local agents, and I think also, with regard to the purchase of property, that the Commanding Engineer might be used where necessary, to a far greater extent than he is now.

861. Would he understand the relative value of different hands in the neighbourhood?—A man very soon makes himself acquainted with that sort of thing if his attention is devoted to it: and with the officers whom he has under him, he can make himself acquainted with such matters quite as well as a gentleman running down from London, though he is a land agent.

862. (*Mr. Stansfeld.*) You probably also would suggest that he should be at liberty to consult a local agent?—Quite so in case of need on a large question, and even in stations where there is a very large amount of property, it might be advisable to give him a regular land bailiff to assist him. I think that local supervision is a very wholesome mode of keeping property in good order, and the Commanding Engineer is also able to look after buildings upon the properties, there being in very many cases buildings which have to be kept up principally by tenants.

863. (*Chairman.*) There is another point which has been brought before us in the course of our inquiry into the organization of the War Department, namely, the way in which the experiments which have to be conducted in connection with the duties of the Royal Engineers should be carried on. There is, I believe, some Committee of that kind at Chatham. Have you any suggestions to make as regards that work?—I was President of that Committee at Chatham for three years, and during the time that I was there I felt very largely the need of some professional head of the Corps to whom references could by the Committee be made upon professional points. With experiments of course there must be expenditure, and it was a very great difficulty to get money granted for the experiments which were ordered, and I attributed it entirely to the want of a head of the Corps, who could present the estimates to the Secretary of State in a proper light and under a due sense of responsibility, and could explain to him the necessity of the expenditure, of course taking care that the estimates did not exceed what was reasonably required for the purpose of deciding the value of the invention, or the value of the articles which were to be experimented upon. I felt this very much indeed, from having tried myself to introduce two or three very important things into the service. I might especially mention the Submarine Defences, such as mines and torpedoes; the difficulty and the delays in getting these experiments which are of the utmost importance to the country were so great that it almost broke the Committee down, and me with it This observation applies to

several other things of the same character. If there had been a head of the corps, who could have submitted the importance of the subject to the Secretary of State, these difficulties would have been removed, and the country would have had the advantage of these Sub-marine Defences at an earlier date; in fact they are delayed, I believe, at the present time from the same cause. I only mention that as one case, but there were several others which, except by continually writing letters, I should never have got adopted into the service, amongst others an electric telegraph equipment for the field. If the Committee would look at the correspondence upon these subjects they would see that what was written was perfectly astounding. I myself believe that one letter would have quite sufficed for each, if it had been placed before the Secretary of State in the proper way, by a responsible person of such position and weight, as the head of a large and scientific corps ought to be. I have not the slightest doubt of it.

864. You think that the fact of having a head of the corps would get rid of those difficulties?—Yes.

865. I presume that there would be no difficulty in having an estimate every year of the experiments to be carried on at Chatham?—There is no difficulty whatever, except occasionally when there might be a new invention of very great importance upon which the Secretary of State might wish the opinion of the Committee, and which might only have been brought to his notice after the estimates had been prepared, but that is quite an exceptional case. In 99 cases out of 100 the estimates for experiments might be framed in the same way as other estimates. Of course a greater latitude must be given in the framing of estimates for experimental purposes, because sometimes experiments do not turn out as you expect them, but still a fair approximation to the cost of experiments might be made in each year.

866. The expenditure on these experiments is not very large?—No.

867. 3,000*l.* or 4,000*l.* would go a very long way?—Yes.

868. Have you ever considered the question of the relation between the Royal Artillery and the Royal Engineers in planning fortifications, for example, how the professional knowledge of the Royal Artillery in respect to the working of guns, and the position of guns, and so on, can be fully utilized in forming plans and carrying out fortifications?—Yes; I have considered that point, and I think that the Commanding Engineer and the Commanding Artillery Officer at stations where works of that character are going on should be placed in communication with each other, and that then an additional security for the works being suitable to their purpose would also be ensured by their being consulted by the heads of the respective corps in London before the plans were approved. I believe myself that the Artillery are just as much without a head as the Engineers are, there is no recognized professional chief of the Artillery, and no one to whom an Artillery Officer can bring his opinions to be considered in a proper professional manner.

869. Supposing that there was an officer of Artillery corresponding to the Inspector-General of Fortifications, who was at the head of the Artillery Corps, a security for the proper consideration of Artillery requirements would be obtained by communication between those two officers?—Certainly, and they would secure a harmony between their respective officers at the out-stations.

870. I do not gather that you would put an Artillery Officer under the Inspector-General of Fortifications, so as to make him a party to works of fortification?—Not at all; but I would let the plans be submitted to the professional Head of the Artillery Corps; the Heads of the two Corps should be consulted as to the requirements of the two services; men in those positions would very soon come to a decision as to what would best suit the requirements of the service.

871. Would such an examination as that be superior to the consideration of plans by a Committee?—Yes, as a general rule, because as individuals they would be held responsible for their examination and the advice they might give.

872. More detail would be gone into?—Yes, and more thoroughly, because the officers at the head of the two branches of the service, in case of their not having sufficient information before them, would refer to their subordinate officers at the out-stations for any additional information which they might require, and having all the officers of their respective services at their disposal, could when necessary call in and command the assistance of the best men in their regiments, on special matters under consideration.

873. Do you think that it is advisable that the Committee at Chatham should be in possession of all the recent experiments with respect to Artillery?—I should not say that it was necessary that they should be in possession of all the experiments, but they should be in possession of such experiments as have a bearing upon the construction of works; and for that purpose, I think, that it would be very desirable that, where the Artillery questions under consideration might have reference to the execution of works, an Engineer Officer should be joined to the Artillery Committee, who were considering them, and *vice versâ*, that where any question before the Engineer Committee might have reference to an Artillery question, an officer from the Artillery Committee should be attached to that Committee for the consideration of the question, and that in this way you would get a complete interchange of information, and the two Committees would not be working against each other.

874. Chatham and Woolwich are so near each other that this question might be very easily arranged?—Yes; such experiments chiefly take place at Shoeburyness, but Shoeburyness is quite accessible to Chatham.

875. Have you any opinion to offer as to the improvement of the organization of the Committee at Chatham?—During the time that I was at Chatham all the officers were overworked; they were worked under very high pressure, and one of the difficulties in working the officers was that the duty of Secretary was thrown upon an officer who had other duties to attend to, and he had more than he could satisfactorily carry out. I think that it would be very desirable if an officer could be appointed to take charge of the experimental branch, of course under the Commandant, of the School of Engineers.

876. (*Mr. Stansfeld.*) Would you recommend that he should be a subaltern?—A Captain. I would also add that as regards the communication of Artillery knowledge to Engineer Officers, I think that there is a very great loss to the country in the manner in which the Engineer duties are carried on at Shoeburyness. I have seen a great deal of the way in which those duties are performed, and I think that there is no better school in which to make engineers for field purposes than Shoeburyness. There is no such school in the world, where they see so much of Artillery practice, and the effect of shot against different materials. The duties respecting the construction of targets, and all the works for experiment, are now performed under an officer who resides at Woolwich, by a Clerk of the Works. The consequence is, that the knowledge which is to be derived from all that firing and in all that practice is entirely lost to the Engineer Corps, excepting such officers as go there at their own expense, and go to some trouble to study the subject. But if all those shields and works were constructed by an Engineer Officer, under his immediate superintendence, I think that a very short experience of that school would put into the head of such a man an amount of knowledge which would be exceedingly useful to the country, both in time of peace and in time of war. I think that it is a great pity that the whole of the experience which that Clerk of the Works has obtained there, during several years, will be entirely lost in time of war. Another thing is that, although a very excellent man in his way, he has not

Major-Gen. Sir Lintorn Simmons, K.C.B.

3 Dec., 1869.

that high education which an Engineer Officer has, nor the same interest and desire to bring forward improvements which an Engineer Officer has. I should be very glad to see two or three young Officers of Engineers appointed to carry on those works. The Corps, and the country, are losing an amount of experience there which would be invaluable in time of war. I think that the same observation applies to the way in which our duties are carried on in London. The way in which the best civil engineers are made is, that the young engineers work at plans and designs in the offices of the more experienced engineers, by which they get knowledge and experience which is useful. Instead of that, for years past, the experience of Engineer Officers has been accumulated in London, in the War Office; a number of civilians who have not had anything like the education which those officers have had, have derived a benefit from that experience, from an examination of all the designs coming to the office in London from all parts of the world, and after a few years they get an amount of experience which is useful in criticising other designs, but that experience is lost to the constructive corps. That applies to the Barrack as much as to the Fortification Branch. I think that you are not making the best use of the corps in not employing them in examining designs which are sent from out-stations, and in making out the details for the works of fortification.

877. You would substitute Engineer Officers for civil surveyors?—Yes.

878. (*Sir Edward Lugard.*) You have said that you think that an Engineer Officer should be at Shoeburyness. Is not Colonel Inglis specially appointed for that duty?—Colonel Inglis had that duty, but it is now performed by Major Scratchley, who resides at Woolwich, and has under him a Clerk of the Works for the execution of the works.

879. (*Chairman.*) Major Scratchley does everything at Woolwich; he cannot really be at both places?—No; he has an executive man at Shoeburyness, who is a Clerk of the Works.

880. Would you also have Engineer Officers at the Head-Quarters to make the drawings of plans?—Certainly. I think that, if you have a large body of officers, all of whom are taught to draw, and whose attention has been specially directed to fortifications, great advantage would arise from having the actual drawing of the plans done by the junior officers of the corps, and that they would not only acquire knowledge by so doing, but from having their special attention directed to the subject, they would often propose improvements of great value. I may say that in carrying out works by young Engineer Officers I have always received from them the greatest assistance and benefit, and have received from them suggestions of the greatest value, which have been carried out in those works, and you would get the same advantage if you had the drawings made and the works examined by Engineer Officers under supervision in London.

(The Witness withdrew).

Adjourned to to-morrow at 11 o'clock.

Saturday, 4th December, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK, *in the Chair.*

The Right Hon. JAMES STANSFELD, M.P.
Lieut.-General Sir EDWARD LUGARD, G.C.B.
WILLIAM GEORGE ANDERSON, Esq.

Colonel MURRAY, examined.

Col. Murray.

4 Dec., 1869.

881. (*Chairman.*) You are Deputy Director of Works for Barracks in this office?—Yes.

882. How long have you been in that position?—Two years.

883. Do you think that the present organization of superintendence of the Corps of Royal Engineers, as it has been changed from the time when the Board of Ordnance existed is satisfactory?—I do not.

884. In what respect do you think that it is not altogether satisfactory?—I think that the corps ought to have one head, which now it has not—there is no one officer to whom the corps can look up as their distinct head, both for military duties and for works.

885. Would you then place the superintendence of all works executed by the Royal Engineers, and also the distribution of officers and men of the corps, under one officer of Royal Engineers, who should be the head of both parts of the business?—I would.

886. If such a system was established, what check would the Secretary of State have with respect to the Barrack Estimates, and the expenditure upon Barrack works?—The same check as he has now. That officer would be responsible to the Secretary of State for the expenditure upon those works. The principle is the same as it is now.

887. Will you explain what check now exists with respect to taking care that you, for example, in administering the estimate for Barracks, do not go beyond the Votes of Parliament without the sanction of a superior authority?—The principal check has been the Account Branch, and that the Account Branch will not pass any payments which are not covered by proper authority.

888. For example, suppose that you find, as you must do occasionally, in working out the Annual Estimates, that you have to spend more money than you calculated for upon one item, and less upon another?—If the excess exceeds 200*l.* I must apply to the Secretary of State for War before the excess is authorised.

889. Any check of that kind, as I understand you, might be equally well applied supposing that the superintendence of the execution of the works of the corps was placed in the hands of the head of the corps, as it is now?—It would be precisely the same, there would not be any change from what is the case now.

890. There have been, I think, some complications with respect to the introduction of the system of Control with regard to the appropriation of Barracks?—Yes.

891. Are you satisfied with Circular 47 of this year, with respect to the consideration of local proposals for re-appropriation?—I am not.

892. It is paragraph 47 of clause 47 of the Army Circular in 1869?—Yes.

893. Will you look at it, and state exactly the points in which it is not, in your opinion, satisfactory?—I first object to a detailed estimate being furnished to the Board, on account of the extreme labour which is involved in preparing all these detailed estimates. It is unnecessary in the first instance, because it is very probable that funds may not be

forthcoming to carry out the proposals of the Board, and that detailed estimate takes up a great deal of time, and interrupts the business of the Commanding Engineer. An approximate estimate would be sufficient in the first instance. In some cases the estimate is exceedingly heavy, it amounts to thousands of pounds. The next thing to which I object is, that the Commanding Engineer is not asked for any opinion, but is simply asked for a detailed estimate.

894. (*Sir Edward Lugard.*) Is he not on the Board?—No; it may so happen that the Engineer member is a young subaltern, and I have seen a great many appropriations forwarded which have not been under his consideration. He is simply asked for a detailed estimate, he is not asked for his opinion, it is the Controller who is asked for his observations, and he submits them to this office. My idea is, that these re-appropriations (involving as they do a consideration of constructive and architectural principles, and ventilation; and the adaptability of one room for one particular purpose, that room being frequently proposed to be altered for another purpose) require a professional officer to advise upon and to examine them carefully, before any other consideration is involved. I do not propose that the Controller should not be consulted, because, as the matter stands now, it affects the lodging list, but I think that his opinion should be taken at the end, so as to know whether he has any objections with regard to the lodging, or fuel, or light, or anything else.

895. (*Chairman.*) Under that circular does the origination of questions of re-appropriation depend upon the General Officer Commanding the District?—No; the next paragraph states that any officer commanding troops may bring the matter to the notice of the General Officer; any Officer Commanding a regiment may do so.

896. Does the circular lay down that no Board shall be held until the General Officer approves of the proposal?—Yes.

897. So that the responsibility would rest with the General Officer Commanding the district whether there was a *primâ facie* case to have the matter inquired into, or not?—As I look at this clause I do not think that the General Officer has any option, I think that the General Officer is bound to order a Board; I refer to clauses 47 and 48.

898 Then, as I understand you, the main objection which you have to paragraph 47, putting aside the question as to a detailed estimate, is that the Commanding Royal Engineer has no opportunity of giving his opinion independently, and in addition to the opinion of the Engineer Officer, who is a member of the Board?—Yes: there is another objection which I have. I agreed to the constitution of the Board when this clause was drawn out, but I have since heard complaints that it is very often very inconvenient, especially in the London District, to assemble these Boards. A Board is a very useful consultative body if you are going through your barracks, but there are a great many trifling re-appropriations which also fall under its operation. Very often an officer has to be sent from a distance, for instance, to Hounslow or Hampton Court; an officer, who is a member of this Board, must be sent.

899. You think that some provision should be made for dealing with minor appropriations without the assembling of a Board?—Yes, in small cases.

900. Then you would retain the action of the Board for important appropriations?—As far as I am concerned, I prefer one officer to a Board, on the whole, as a general principle, I would rather have the responsibility fixed upon a single officer, and that those proposed re appropriations should be referred to the Commanding Engineer for report, instead of a Board. This Board is a new thing.

901. Was not there a Board for re-appropriations under the Board of Ordnance?—No; no doubt in large cases a Board is very useful. This regulation always compels you to assemble a Board.

902. As I understand you the plan which you would propose would be, that in the case of minor re-appropriations they should be referred for the report, and the estimate, where necessary, of the Commanding Engineer, and that an officer of the Control Department should also give his opinion upon the subject, and that the proposal should then be sent up to the Secretary of State by the Officer Commanding the District with his observations?—Yes.

903. And that in the case of larger and more important re-appropriations a Board might be assembled of which the Commanding Engineer should be a member?—It might be optional with the General to assemble a Board.

904 Have you any other suggestions to offer with respect to the arrangements which are made under that circular?—I think that all claims for lodging allowance ought to be passed by the Controller and paid by his Paymaster, on a certificate from the Commanding Royal Engineer that there are no quarters or barracks available for the officers or men, and with the approval of the General Commanding the District. That paragraph 43 has, I believe, since the issue of this circular, been modified to this extent, namely, that when any officer now joins at a station he applies at once and direct to the Commanding Engineer for quarters, and he gets a certificate from the Commanding Engineer that no quarters are available for him if such is the case; if there are quarters available for him the Commanding Engineer puts him into them, but when there are no quarters available he goes to the Controller with the certificate of the Commanding Engineer that there are no quarters available, and then the Controller examines his Monthly Construction and Occupation Return, which is made out in the Commanding Engineer's Office, and which is furnished to him by the Commanding Engineer, and then obtains the approval of the General Officer Commanding the District. I believe that the effect of this course is that the lodging is allowed as under the old regulations; the Barrackmaster, who had charge of the buildings, and who allotted the quarters, also allotted the lodging money, and I think that practically the effect of that amendment on Clause 47 is to make the Commanding Engineer in reality, though perhaps not nominally, responsible for the lodging allowance, because none can be issued until the Commanding Engineer has given his certificate that there are no quarters available for occupation.

905. Will you explain what was the connection between the Engineer Department and the Barrack Department before the Control system was established, by whom were the documents made out?—By the Barrackmaster.

906. Under the old system where did the Royal Engineers come in?—They had a somewhat general charge over the whole of the buildings, and they were bound to bring to notice any irregularities, or any misappropriation, which took place, and they inspected the barracks quarterly for the purpose of examining and seeing what repairs were necessary to them, but they only examined them so far as fair wear repairs were concerned; they had nothing to do with the assessment of barrack damages or the execution of them.

907. Had the Royal Engineer Department anything to do with lodging allowances?—Nothing.

908. What change was introduced with respect to the duties of the Royal Engineers by the establishment of the Control system?—The immediate charge of the buildings, which formerly devolved on the Barrackmaster, was transferred to the Commanding Royal Engineer, and he now hands over the buildings to the troops for occupation, and takes them over from the troops when they go out. That duty was always formerly done by the Barrackmaster.

909. Then your objection to the present system is that only a part of the duties of the old Barrack Department has been handed over to the Royal Engineers, instead of the whole?—Exactly so.

910. Would not your objection be met if the whole

Murray, *C.I.*, 4 Dec., 1869.

of the business of the Barrackmaster were handed over to the Control Department, leaving the duties of the Royal Engineers the same as before, with respect to barracks?—Yes; it might be so.

911. Coming from the local consideration of these questions, when they come to this office you would feel the same objection to the system which now exists?—Yes; that plan would of course avoid a certain amount of conflict which there is now, but at the same time it would separate, which was always found to be a great evil formerly, the responsibility of housing the troops between two departments, because the officer who is at the head of the Royal Engineers, either the Director of Works or the Inspector General, has the preparation and the advising of the Secretary of State with regard to what buildings are necessary, or what alterations in existing buildings are necessary for the proper accommodation of the troops, and he cannot look at that question in the proper light, and view it in all its branches, unless he is also the officer who is responsible for issuing lodging-money, and for hiring buildings instead of building them. If that was done it would not altogether avoid the conflict. I had one year's experience of the old system in this office, when there was a Superintendent of the Barrack Department, and it was with the greatest difficulty that I could carry on my work with him.

912. You mean that when you come to consider the estimates of the money to be spent in housing the troops during the year, whether that money is for building or for altering barracks, or hiring buildings in which the troops should be quartered, or for lodging allowances of any sort, the right organization would be to have one department to deal with the whole?—Yes; as far as the housing of the troops is concerned. I say that one department is the only department which can properly place those subjects before the Secretary of State for War for his consideration. Immediately before the Control system the Superintendent of the Barrack Department had the re-appropriation of the Barracks. I have a paper now in my room in which he submitted a re-appropriation at Gibraltar to the Secretary of State for War, Lord de Grey, who approved of it; there was no estimate given, the paper was never sent to the Director of Works before the Secretary of State approved of it. Nobody who looked at that paper would have had any idea that a shilling of expense was involved in it. I do not say that the decision of the Secretary of State was a wrong one, but I am quite sure that he did not know what he was doing. The expense comes to between 40,000*l.* and 50,000*l.*

913. It would appear that upon that question sufficient care was not taken to obtain an estimate of the cost of the proposal before the paper was submitted to the Secretary of State?—I entirely attribute that to the functions being divided between two departments, if it had been under one department it could not have occurred. I should never think of submitting such a thing to the Secretary of State for War without giving an estimate of the cost.

914. It would appear upon first sight that the estimate of the cost would be the most natural thing to obtain, whoever proposed the matter?—Just so.

915. Why is it your opinion that the question of cost must be overlooked, supposing that the question of re-appropriation was submitted to the Secretary of State for War by one department rather than by another, assuming that it is laid down as a principle that no such question should be submitted without an estimate of the cost?—I do not understand, if that is done, who is to be responsible that that arrangement is a good one.

916. I am now simply talking of the cost of the arrangement?—The question of cost need not be necessarily overlooked because it is in another department.

917. You have been referring principally at present to the actual cost of the alterations in the structure of a barrack?—Yes.

918. Are there not other financial considerations connected with the alterations, such as the questions of fuel and light, and the number of people which a barrack will contain, and that, if it is not economically appropriated, there must be an increase of lodging allowance?—Yes; it is intimately mixed up with the lodging allowance. I do not think that it affects the fuel and light much. Without putting exaggerated cases, in ordinary cases a regiment would get the same fuel and light. Of course they must have more fuel and light when you double the cubic space given to a man.

919. But it mainly affects the lodging allowance?—Yes.

920. So that in point of fact there are two classes of economical considerations involved in the matter, one the cost of alterations, and the other the effect of the alterations upon the lodging list?—Yes.

921. (*Sir Edward Lugard.*) The whole control of the Barrack Department was vested in the Works Department some years ago?—Yes; the entire control of all the barrack business was so vested by an Order in Council, which has never been revoked; and the Superintendent of the Barrack Department was an officer working under the Inspector-General, and he was taken away from him, and it was made a separate branch, although that Order in Council was never altered or revoked. It is dated the 6th June, 1865.

922. (*Chairman.*) Do you know what the practice of the Board of Ordnance was with respect to barracks?—Yes; the Board kept the whole business in their hands. The Inspector-General of Fortifications was the adviser of the Board, but he had no responsibility except to execute the works.

923. He was the head of the Corps of Royal Engineers?—Yes.

924. Under that system the Board of Ordnance settled everything with respect to the Works?—Yes.

925. And the Inspector-General of Fortifications executed the works?—Yes, they always took his advice upon buildings, and then he executed the work if the Board approved of it, but he never executed any work without the approval of the Board.

926. Would not that system be somewhat analogous to a system under which the Secretary of State, having decided what should be done after taking the advice of the Inspector-General of Fortifications, supposing that there was such an officer at the head of the Corps of Royal Engineers, should then confide the execution of the works to him, so that the functions of the Corps of Royal Engineers should be confined to the execution of works, and they should have nothing to say to the expediency of having barracks and so forth?—Then who would be responsible to the Secretary of State with respect to the estimates?

927. I presume that the estimates for work would be framed by the Inspector-General of Fortifications?—Yes; that is if the Secretary of State took the place of the Board of Ordnance.

928. I suppose that in these matters the great thing is in the first place to establish a complete and strict division of duties?—Yes, that would be very desirable.

929. And in the second place I presume that from the constitution of the Corps of Royal Engineers it would be objectionable that Engineers should receive orders in any way from Control Officers?—Yes.

930. The orders should either come from the Inspector-General of Fortifications, if there was such an officer, or from the General Officer Commanding the District?—Yes.

931. Are you satisfied with the present system for the examination of the accounts for works which come up from the Districts?—I am not.

932. Will you explain why?—I think that there ought to be a professional examination of all the Engineer accounts, under the supervision of the officer who is responsible for the execution of the works; that is to say, under the supervision of the Director of Works.

933. You mean that in accounts of that kind it requires some professional knowledge of the subject to examine them accurately?—It does; and I think that that might be productive of a great deal of benefit. In

every bill there are a great many prices which cannot be checked except by a professional man; they are not in the Schedule, they are what we call star prices.

934. Supposing that in a bill items of that kind occur, what happens then?—They are passed without a word. I have heard of a bill with an item in it like this, "13 chimneys taken down, re built, and re-set, 3*l.* 10*s.* each." That cannot be checked by anybody but a professional man, and that is what we call a star price.

935. However able and accurate the Examiner of Accounts may be he cannot have professional knowledge to enable him to check such an item as that?—No.

936. Are not those accounts in the first instance checked in the district?—They are.

937 If you had the examination of them here would you go into minute detail, or not?—No, I do not think think that it is necessary to check all the additions and multiplications again. The staff which would be required to do it would be very large, and my own impression is that it does not pay. I know that the accounts are twice gone over in the districts before they come up here. There are undoubtedly a few trifling errors, and that must always be so, but I would examine them so as to see that there are no gross errors; and I would confine the examination to a professional examination, particularly as to seeing that the prices were fair prices.

938. By a "professional examination," do you mean the examination of an account of that kind by a man who is conversant with working out estimates of building?—Yes; in fact we should have them examined under the superintendence of our Surveyor's Department, who examine the estimates. The estimates are framed at the stations, but the details of the estimates are examined by our Surveyor's Department here, and he should have the examination of the Bills.

939. Would a man of that class at once be able to put his finger upon anything which was exceptional?—Yes; and if he could not understand it he would call for explanation upon any such item.

940. There is another point connected with the relations between the Works Department and the Account Department. Are there any difficulties with respect to the appropriation of expenditure to the different items, or votes?—Very great difficulties indeed it is never returned right.

941. Will you explain how that arises?—In our Branch we ought to keep a ledger, and to post all our own bills in order that they may come right because they require to be posted by people who understand the nature of the work. I do not exactly mean by a professional man, not by a Clerk of the Works or a Surveyor, but by an Engineer Clerk who is conversant with the subject. The Engineer Clerks understand the posting of our accounts.

942. What is precisely the meaning attached to the word "posting"?—When our bills go to the Chief Auditor's they do not always know to what account a bill is to be posted, and that is the reason why mistakes are made in the accounts which are laid before Parliament of the expenditure upon Vote 14, they never agree with mine—not within thousands.

943. Then should not the bill be returned to your department, in order to say to what item in the Vote it should be posted?—That is specified on the bill, but they frequently neglect it, and it gets wrongly posted. When I was at Aldershot, Parliament frequently called for Returns of the expense of the Camp, and the Returns were made from Aldershot, and they never agreed within 30,000*l.* of the accounts here. Posting our accounts is a very complicated thing.

944. Can you give us any instances of differences between what you consider to be the correct accounts and the accounts as they are kept in the Book-keeping Department of the office?—Yes; I can give two instances, one of them, of which I have personal knowledge, was at Aldershot during the years 1857, 1858, and 1859. The accounts rendered from the station, of the expenditure on the camps, could not be made to agree with the accounts kept by the Accountant-General without very great difficulty, and frequent comparison. There was another instance which I have heard of at the Herbert Hospital, where there was a great discrepancy between the Engineer account of the total expenditure, and the total expenditure kept by the Accountant-General, and it was subsequently found on examination that a large sum of money, which had been expended upon another service at the same station, had been wrongly posted to the Herbert Hospital by the Accountant-General.

945. How do you propose to remedy this state of things?—First of all by a professional examination of all our own accounts, and then subsequently opening a ledger ourselves, and posting them ourselves, before we pass them into the Audit Branch.

946. Then those accounts, as examined professionally and posted by you, would be subsequently subject to audit in the Audit Department, and would end by being included in the Parliamentary Accounts in the Book-keeping Department of the office?—Yes.

947. (*Mr. Anderson.*) Do you think that the accounts, if kept in the manner which you describe, could be made the ground work of the Parliamentary Account, instead of keeping them in duplicate in the Book-keeping Branch?—I am quite sure that they could. From what I have seen here I feel certain that much more accurate accounts would be rendered than are rendered now. I am satisfied that they are wrongly posted.

948. (*Chairman.*) What you mean I understand to be this, that whereas the accounts which are kept in the Book-keeping Department will tally as to totals with the accounts which you keep, they are differently classified, and you believe that they are improperly classified in the Book-keeping Department?—Yes.

949. And that arises from a necessary want of professional knowledge?—It does.

(The Witness withdrew.)

Adjourned.

Friday, 17th December, 1869.

PRESENT:

The Right Hon. LORD NORTHBROOK, *in the Chair.*

The Right Hon. JAMES STANSFELD, M.P. | Lieut.-Gen. Sir EDWARD LUGARD, G.C.B.

Colonel JOHN M. ADYE, C.B., examined.

Col. John M. Adye, C.B.

17 Dec., 1869.

950. (*Chairman.*) What position do you now occupy in the Service?—I am in command of the Depôt Brigade at Woolwich.

951. What other positions have you occupied in the Royal Artillery?—I was Assistant Adjutant-General to the Royal Artillery throughout the Crimean War and the Indian Mutiny, and I was Deputy Adjutant-General to the Royal Artillery in India at the time of the amalgamation of the Indian Regiments, so that I have had a certain amount of experience in that Department.

952. I think that you have seen the evidence which has been given before our Committee by Major-General Gambier?—Yes; I have read it.

953. We should like to know your views as to the organization of the Administrative Government of the Royal Artillery, in this Office and in the Horse Guards, since the abolition of the Board of Ordnance?—The administration of the Artillery has always been conducted by two Chiefs of Departments, the one for the *personnel*, the other for the *matériel*. Until within the last few years these two officers were under the Master-General, but now one is under the Horse Guards and one under the War Office. The Deputy Adjutant-General, who had the *personnel*, has always been the leading Staff Officer. His duties are very arduous and responsible, as he has to regulate the *personnel* of a great corps, which is complicated in the variety of its details, and which is necessarily scattered in units of batteries of various kinds all over the world. Thus in January 1869 the regiment consisted of 210 batteries (exclusive of depôts), of which 72 were at home, 91 in India, and 47 in the Colonies. These, although nominally arranged in brigades, are in reality detached by batteries at 29 stations at home, 51 in India, and 21 in the Colonies—making 101 stations. The number and nature of batteries at each station vary, some having only one, others two, three, four, five, and some eight batteries. The Horse Artillery, the Field, Garrison, Heavy, and Mountain Batteries, all of which differ in their details, are moved about and are stationed, either separately or together, as the exigencies of the Service require. Each of these batteries requires that the details of its *personnel*, that is to say of its officers, non-commissioned officers, artificers, gunners, and all the details of its equipment, should be carefully attended to, as otherwise it falls into inefficiency. Some of the minor details are arranged by the Commanding Officers on the spot, or by the Officers Commanding Brigades, but in reality, owing to the detached nature of the Service, to the variety of the details, and to the sudden demands caused by war or sickness the whole require vigilant central supervision, which is the duty of the Deputy Adjutant-General. Then again, since the amalgamation, not only have the duties of the corps and of the Deputy Adjutant-General considerably increased, but the regiment now consists of about 1,600 officers, and as the amalgamation is recent and incomplete, the interests of the officers are involved and sometimes conflicting. Infantry and Cavalry Regiments are comparatively simple in their details, and their becoming weak in numbers does not render the remaining part ineffective. They move about also in compact bodies. The Artillery organization is exactly the reverse, that is to say, it is complex and varied; the unit is the battery both in peace and war, and if incomplete in any of its parts it is rendered more or less inefficient.

954. (*Mr. Stansfeld.*) Do you mean when a battery is incomplete?—Yes; if it falls short of gunners, or of men, or of horses, the whole thing becomes comparatively inefficient.

955. You take a battery as the unit for the purpose of that remark?—Yes. The scattered nature of our empire all over the world adds to all these difficulties, and consequently the Artillery arrangements must be made to fit this state of things; that is to say, it is a vast corps of scattered units, and it requires vigilant and experienced central authority, not to command it, but to see that it is maintained in efficiency in all its details; and if the Government were to remove this central authority the whole would rapidly fall into confusion.

956. Your distinction there is between command and administration?—Yes; the command devolves upon the officer on the spot, but the central administration alone has the power of providing for the wants of each battery. An effort was made ten years since to organize the corps into brigades of eight batteries each, that is, to endeavour to concentrate the organization into larger units, but it did not altogether succeed, because, as I have explained it was not suited to the nature of the Artillery duties of our scattered empire. Out of 80 stations abroad there are only two where a brigade is stationed entire, viz., Gibraltar and Malta. It is however difficult to change a system when once established, even if it is defective, and therefore great caution is necessary before the brigade system could be re-organized.

There are other important duties connected with the office of the Deputy Adjutant-General of the Royal Artillery. As he has all the details of the corps in his hand, so also he knows personally the qualities and capabilities of the great body of the officers, and consequently is able to select and recommend officers for all regimental appointments, and for regimental commands, &c. The duties of the Deputy Adjutant-General of the Royal Artillery are in no way connected with Woolwich, except that there is more Artillery there than in other districts; but in my opinion it is very undesirable that his office should be there. He should be in close and constant communication with the highest military authority. He is more free of personal and local influences by his office being away from Woolwich.

The duties of the Deputy Adjutant-General are not connected with discipline. The Artillery in this respect are identical with the Cavalry and Infantry; that is to say, they are under the Adjutant-General, and the General Officers of Districts. The term "Deputy Adjutant General" is in my opinion a misnomer, it should be "Chief of the Artillery Staff." In the same way the Deputy Adjutant-General has nothing to do with movements. These depend upon military requirements, and are regulated by the Quartermaster-General. The clothing and recruiting of the Artillery in my opinion should also be regulated by the departments who perform these duties for the Army generally.

From a consideration of the duties of the Deputy Adjutant-General of the Royal Artillery as carried on at the Horse Guards of late years, it appears to me that he partially performs the duties of the Adjutant-General's and Quartermaster-General's Departments, and of the Recruiting and Clothing Departments, all of which is unnecessary; and that

many of his legitimate duties are carried out by the Military Secretary, who can only obtain the required information second hand, that is to say, from the Deputy Adjutant-General himself. I believe that correspondence and time would be saved by a simpler arrangement, and that the duties would be performed more satisfactorily, and I am quite sure that the office work could be reduced. That completes what I have to say with regard to the Deputy Adjutant-General.

I will now say a few words with respect to the Director-General of Ordnance. The duties of the other Administrative Officer of the Royal Artillery, that is to say, the Director-General, are entirely of a different character; his duties lie altogether with *matériel*, and in the present days of great changes, rapid improvements, and vast expenditure, they are especially responsible and difficult. He is the medium by which all changes of material of war are brought forward and matured, and he should be responsible for the efficiency of all armaments, siege, garrison, and field, together with the ammunition and stores. In my opinion his duties divide themselves into four main branches:—

1. He should be the adviser of all changes of pattern;
2. He should have charge of all the manufacturing departments;
3. He should be Head of the Store Department;
4. He should have charge of all armaments in use and in reserve.

The abolition of the Ordnance Select Committee a year ago, has for the time thrown the first duty into abeyance, but as some such machinery is indispensable, I presume that its re-organization is only a matter of time. In my opinion the heads of the manufactories should be members of the Select Committee, assisted by one or two others, and for any special subjects special members might be called in. The manufacturing departments and the charge of the reserve stores are now transferred to the Control Department, but I fear that in time of war the concentration of war *matériel* and commissariat duties under one head will lead to confusion. On this point I would refer to the evidence of the late Duke of Wellington before the Select Committee of 1837, at pages 37 and 38. The duties connected with the *matériel* of war, and with the Commissariat, are in all armies held to be specially different from each other. The fourth duty of the Director-General of Ordnance, which he had formerly, was connected with the armaments, but a great change was made a few years ago. The duties connected with the armaments were partially transferred, in 1859, to the Deputy Adjutant-General, and in my opinion this was a mistake. The latter has already ample duties to perform as regards the *personnel*, besides which the Director-General of Ordnance being the official adviser of all changes in war *matériel*, and being, even under present arrangements, to a certain extent connected with the manufactories, is thus able to regulate the armaments, having more direct and fuller information than the Deputy Adjutant-General, in that it is his particular Branch. The War Office Circular of the 13th February, 1867, shows that there is considerable confusion, and that the Deputy Adjutant-General and the Director-General of Ordnance are performing the same duties twice over, increasing correspondence, and doubling establishments. I have the Circular here; it shows that the Deputy Adjutant-General prepares Returns of armaments which are checked by his equal, namely the Director-General of Ordnance, and in fact they are writing backwards and forwards with regard to armaments and stores. It is a double way of doing the duty, and it appears to me to be a very bad one.

I have endeavoured to state, as concisely as I could, what are, and have been, for many years the special duties of the two great administrative branches of the Artillery arm of the Service. Whatever changes may be contemplated, it is essential that the performance of these duties shall be adequately provided for, and that the officers holding them shall be experienced men, and also that they shall be in close and confidential communication with the Army authorities. I would observe in conclusion, that until the abolition of the office of Master General of Ordnance both these Departments were under one head, who was always a military man of the highest rank, who was usually in Parliament, and who changed with the Ministry.

957. (*Chairman.*) With respect to the two divisions into which you have separated the Artillery questions, the first part consists mainly in the *personnel* of the corps?—Yes.

958. I presume that it would be for the officer who was at the Head of that Branch to recommend to the General Commanding-in-Chief the distribution of officers of the corps?—Yes; he posts them and transfers them, as promotions or sickness or exigencies require. The detached state of the regiment requires vigilance in the central authority as to all details.

959. Are those duties performed with respect to men as well as officers?—Yes, they refer to everything connected with the regiment, which now consists of nearly 1,600 officers, and 30,000 men.

960. That business is now conducted a great deal at the Horse Guards?—Yes.

961. Do you think that any of that business, which is now transacted at the Horse Guards, could be conducted at the Head-Quarters of the different brigades or batteries?—No; from the detached nature of the batteries it is impossible. An attempt has been made to divide the regiment into brigades, but if you observe the number of stations at which the batteries are, and the great distances they are apart, you will see that the Colonel of a brigade is often a thousand miles away from his own batteries, and in a different country, and under a different General, therefore practically, it is attempting an organization which you cannot carry out. The regiment is necessarily composed of detached portions, and therefore in my opinion you require a well defined central authority.

962. Could not a battery in some case be considered as the unit?—Yes, in minor particulars, it is so; but an officer commanding a battery at a distant station has no power of supplying his own wants, and therefore he must go to one source, which is home. A battery commands itself, but it cannot administrate itself.

963. In the questions which I now ask you I exclude any questions respecting the clothing or equipment; the officer, I presume, could apply for that?—Yes, he should apply to the department of the Army which transacts that particular business.

964. Is there any other duty which you have not touched upon, which would form a part of that portion of the administration of the Artillery?—No; I think that the duties which I would take away from the Adjutant-General of Artillery, are everything connected with Discipline, Movements, Recruiting, Clothing, and Armaments. All those in my opinion belong to other branches of the Staff.

965. (*Mr. Stansfeld.*) Those duties at present are allocated to him more or less?—Partially. He has to keep a large establishment to perform them, but they belong to others.

966. (*Sir Edward Lugard.*) With regard to discipline, how did you find the duties of the office at the India Head-Quarters performed when you joined?—I found the state of affairs there very much what it is here, namely, that the Adjutant-General was doing part of my work. I may mention that I went up at a moment of great confusion in Indian matters, that is to say, during the amalgamation of the three Indian Regiments, which was a very difficult and critical time. The Adjutant-General was doing part of my work, the Military Secretary was doing other parts, and the discipline of the Artillery was supposed to fall to me. I pointed out to the Commander-in-Chief, first Lord Straithnairn, and afterwards Sir William Mansfield, who both coincided with me, that the duties of the discipline of an Army were as a rule with the Adjutant-General, and that I did not claim to have anything specially to do with the disci-

Col. John M. Adye, C.B.

17 *Dec.*, 1869.

pline of the Artillery. For instance, there were one or two officers of the Royal Artillery who were about to be tried by a General Court-Martial and there were other cases of want of discipline. Those cases never came to me. I do not say that I did not know of them, but officially I had no cognizance of them; they were taken up by the Adjutant-General to the Commander-in-Chief of the Army, and in my opinion that was the simple way of working. If the Adjutant-General at any time wished to ask me a question upon matters connected with the discipline of the Artillery, I always waited upon him and gave him information. In the same way the Quartermaster-General, when he was about to make movements in the Artillery, sent to ask me whether I thought that his proposed movements were convenient, but I did not pretend that it was my particular business, except that I was a part of the Army Staff, and therefore gave my opinion upon any question connected with it.

967. Did this course effect any reduction in the office which you found there?—Yes; after the confusion had settled down a little, and after the difficulties were got over, I enquired into the condition of my office, and in the course of a few months cut down three of the clerks. The questions which I took up to the Commander-in-Chief were simply questions of the regimental *personnel* of a great corps of a hundred batteries, scattered all over India, and I was responsible to him that they were carried out correctly.

968. (*Chairman.*) Did your business pass through the Military Secretary?—No; I had no communication with the Military Secretary. It was at one time supposed that I ought to have, but I pointed out that our duties were not connected.

969. (*Mr. Stansfeld.*) What are the legitimate duties of the Deputy Adjutant-General of Artillery, which are now in your opinion performed by the Military Secretary, at Head-Quarters?—In my opinion the Deputy Adjutant-General of Artillery, knowing the whole of the officers, or having the means of ascertaining the characters and acquirements and abilities of the officers, is the person to recommend direct to the Commander-in-Chief all officers for appointments, whether for Adjutancies, Horse Artillery, Commands of Districts, or Commands in the Field. When in India, I, as a matter of course, took up those matters to the Commander-in-Chief, and received his orders upon them. If I had sent them to the Military Secretary, the Commander-in-Chief would have received the information second hand. It is impossible for him to know the details of the *personnel* of the different batteries.

970. (*Chairman.*) With respect to the other portion of the duties connected with the Artillery, including the four heads which you have mentioned, namely, the changes of pattern, the superintendence of manufacturing departments, the custody of the reserve stores, and the custody of the armaments in use, you have stated that you are afraid that any system under which the charge of munitions of war was placed under the same direction as the charge of the commissariat stores, would break down?—Yes.

971. Do you include in that observation the central administration; for example, a central administration, under an officer, who might be called the Controller-in-Chief at the Head, and who should have under him two distinct branches, one of which should include munitions of war and miscellaneous stores, and the other what are technically called commissariat stores. Do you think that such an organization as that, having at the head of the Store Branch, as I may call it, an officer conversant with the munitions of war, is open to the objection which you make?—No; because you have exactly made the distinction which I think ought to be made, namely, that you keep the *matériel* of war and the commissariat separate, but you do not carry that out in the foreign stations. For instance, at Gibraltar and Malta you have one officer doing both duties, which seems unadvisable. But in the War Office you have very carefully separated the two duties, and therefore I think that you have done what is right in the central administration. But I would point out that you have at present in the War Office two Artillery Officers performing duties which might be carried out by one, namely, General Balfour and General Lefroy; they are between them performing most of the duties of the Director-General of Ordnance.

972. Confining ourselves for the moment to the central administration, and going a step further, it would be clear that under a system such as you have mentioned, and to which your remark just now applied, the superintendence of the manufacturing departments, and the custody of the reserve stores, would be in the hands of the officer whom I have indicated, at the Head of the Store Branch of the Control Department?—Yes.

973. Would you also put under the same officer the consideration of all changes of pattern for the Artillery, and if so, how far?—Yes. From the beginning to the end the Secretary of State should look to him for everything connected with the *matériel* of war—its conception, its manufacture, its charge, and its use. Those appear to me to be the duties of this Branch of the Artillery administration, namely, of the Director-General of Ordnance.

974. In the case of changes of pattern, what power would you confide to that officer to give orders for carrying out those experiments which are necessary to test the practical value of changes of pattern. Explaining myself briefly, I mean that there would be two classes of experiments, the one being an experiment which consists in seeing whether a thing can be made in manufacture, and the other being an experiment to see whether a thing is, or is not, suitable to the actual service which is wanted to be performed, and which must be carried out by the officers in active service. Would you give that officer the power to control experiments of such a kind?—Certainly; and I would hold him responsible for everything connected with all changes, and to advise how they are to be carried out, and to say whether they are good or not. Of course if a change in the *matériel* of war requires some time to replace what is in the hands of the troops, he must be in communication with other authorities as to how the replacement should be made. I am of course quite aware that there are difficulties at present when you separate the two duties of the Royal Artillery. When you had the Master General there was no difficulty at all, because he had the power of spending the money and authorizing it, and he brought forward his Estimates in Parliament through the Clerk of the Ordnance.

975. You do not see how the question of changes of pattern and experiments of that kind can be separated from the Officer at the Head of the Store Branch of the Artillery Service?—I do not say that it is impossible, but I think that what I suggest is the simplest way of doing it.

976. Namely, that he should be responsible for experiments?—Yes.

977. To come to the Fourth Branch, namely, the armaments in use; do you think that that branch could be put into the hands of this officer?—The armaments in use are in the hands of the troops, and whether in the Artillery, Infantry, or Cavalry, they are responsible for their care to the Commander-in-Chief; but in questions of replacement, &c., they would report to the Director-General, as was the case under the old system.

978. And you think that that system would work in practice?—Yes; of course there are difficulties owing to the Artillery being now under two heads. In the evidence of the Duke of Richmond's Commission of 1837, you will see a great deal of evidence upon that subject.

979. Would you place the responsibility of the maintenance in proper order of all the guns or stores in the hands of the Garrison Artillery in the Officers in Command?—Certainly; so soon as they receive armaments they are responsible to the Military Head of the Army for their efficiency.

980. And the inspection and the responsibility of

seeing that the officers performed their duty would rest with the Military Branch of the Administration of the Army?—Yes.

981. (*Mr. Stansfeld.*) But it would probably follow that some system of inspection of armaments should start from the Artillery Department of the Horse Guards?—Yes. All officers in charge of armaments, siege, garrison, or field, are responsible to the Chief Military Authority for their efficiency and that they take care of them.

982. Would not that responsibility be through the Artillery Department?—Yes.

983. And not through the Department of the Adjutant-General, who is responsible for the general discipline of the Army?—No, it would be through the Artillery Department of the Horse Guards. The Adjutant-General of Artillery, even in the days of the Master-General, exercised that power.

984. (*Sir Edward Lugard.*) If, on inspection of a corps, or on inspection of returns, the Head of the Army had fault to find with the armament not being efficient, he would call upon the Officer Commanding that battery to know why he had not applied to the proper authority for an efficient armament to be substituted for a non-effective one?—Certainly.

985. As I understand you, it will rest with the Chief Military Authority to keep the Officers in Command of batteries up to the mark, to ascertain that they have everything efficient, and in case of their being inefficient, to call upon them for an explanation why they have not sent in requisitions to the Supply Department?—Certainly; and not only that, but if he found that the Supply Department had not supplied things which were demanded, or required, he would point out that the Supply Department was not doing its duty.

986. (*Chairman.*) He would represent that to the Secretary of State?—Yes.

987. Then, in point of fact, the fourth head, which you specify, of the second division of the duties connected with the Royal Artillery, would be more correctly expressed as the receipt of demands from Garrison Artillery?—It is far more than that. For instance, the question of arming a great fortress like Gibraltar, which has been re-armed two or three times within my experience; or the important question of sending out armaments upon the threat of war to any particular colony or country, are questions for the Director-General of Ordnance to bring to the notice of the Secretary of State and the Head of the Army, the Chief Military Authority.

988. Is there not something to be considered besides the ordinary management of Garrison Artillery in fortresses now complete and armed; is there not also the consideration of the armament of new fortresses in connection with new works carried on by the Royal Engineers, and the constant modifications of those armaments, to be carried out by communication between the Officers of the Royal Engineers and the Royal Artillery?—Certainly; those are the higher duties of the Director-General of Ordnance.

989. Do you think that those duties are best placed in the hands of the person who is at the head of the munitions of war in the Control Department, or that they would be better given to an officer of high rank in the Royal Artillery, who would be separate from the Control Department? The munitions of war and the armaments should both be under an Artillery Officer, that is, the Director-General of Ordnance.

990. Would it be a good arrangement, in your opinion, to give to an officer of high rank in the Royal Artillery the duty of inspecting the Garrison Artillery, and of considering in communication with the officer of Royal Engineers the questions of the armament of fortifications, and the revision of the armament of fortifications, and placing under him also the business which you describe as appertaining to the Deputy Adjutant-General of the Royal Artillery, leaving the ordinary questions of supply and stores to another officer under the Supply Department?—This is a new view to me; it might answer, but I cannot say that I think it would be a very simple arrangement, or a very efficient one, because the Deputy Adjutant-General's duties, being chiefly connected with the *personnel*, he is not officially acquainted with the armaments from the commencement; that is to say, if he is cut off from the Store Department he does not know what guns are in reserve, he does not know what guns are being made, he is not the adviser as to the changes of pattern: in short, his duties lie in another branch of the Artillery administration. The officer acquainted with the changes of pattern and of manufacture, is able to advise the Secretary of State upon the whole question; and I cannot see any thing simpler than to arrange the duties of the Director-General of Ordnance, as I have proposed. I think that as soon as you separate them, you get into confusion.

991. You mean that the officer at the head of the munitions of war, under the Control Department, would have a much greater knowledge of what was going on with regard to guns, and so on, and therefore could better advise upon that subject?—The Director-General of Ordnance, as proposed by me, would know all the gradations through which they go, and therefore would be thoroughly up to the matter, which the Deputy Adjutant-General is not. In 1859, the administration of the armaments was handed over to the Deputy Adjutant-General of the Royal Artillery, and this has led to confusion, and the duties are now partially done twice over, as the following quotations, from the War Department Circular of February 1867, will show:—"The Deputy "Adjutant-General of the Royal Artillery, who "is responsible under the Commander-in-Chief for the "preservation in a state of efficiency of all the guns and "ordnance stores in charge of the Officers of the Royal "Artillery at home and abroad, and for putting forward, "in proper time, the necessary requisitions for the "maintenance of the proper proportions of such stores, "and of the Artillery Reserves, will forward all such "requisitions, and all other Artillery demands for war-"like stores, to the Director of Ordnance" (he forwards them to his co-equal as it were), "who, after examining "them, will submit them with his remarks for the con-"sideration and orders of the Secretary of State." That is to say, an officer under the Commander-in-Chief, at the Horse Guards, reports to an officer under the Secretary of State, who checks him, the one not being under the other. Then the Circular of 1867 goes on to state—"The Deputy Adjutant-General of the Royal "Artillery will refer all questions relating to this sub-"ject to the Director of Ordnance, who, after consulting "the Director of Works, will return the papers to the "Deputy Adjutant-General for the consideration of the "Commander-in-Chief." So that an officer under the Commander-in-Chief sends to the Director of Ordnance his opinion on the armaments, who consults the Director of Works, and who then sends it back for the consideration of the Commander-in-Chief. You, therefore, see what a confused system we are getting into. Then it is stated in the Circular "When a new "or an altered work is in a sufficiently advanced "state for its armament to be considered, the Secretary "of State will request the Commander-in-Chief to "direct the General Officer commanding at the station "to call upon the Officer commanding Royal Artillery, "and the Commanding Royal Engineer, to submit the "necessary requisitions, which, after being considered "by the Commander-in-Chief, will be forwarded by "the Deputy Adjutant-General of the Royal Artillery "to the Director of Ordnance, for the approval of the "Secretary of State." It is making the Commander-in-Chief, and the Deputy Adjutant-General of Artillery, subordinate to the Director of Ordnance; they consider a question, and then it goes to the Director of Ordnance. It is repeated again in the Circular, as follows—"The Deputy Adjutant-General of the Royal Artillery "will submit to the Commander-in-Chief a detailed "estimate of all stores required to meet the wants of "the Royal Artillery at home and abroad, for the "ensuing financial year, in such time as will enable "it to be forwarded not later than the 1st November "in each year, for the consideration of the Secretary

Col. John M. Adye, C.B.

17 Dec., 1869.

"of State. The Director of Ordnance will be charged "with the duty of examining and revising this esti- "mate, and of advising the Secretary of State "upon it."

992. Where would you bring in the opinion of the General Officer Commanding-in-Chief, who would be the military adviser of the Secretary of State in respect of such questions as those of armaments?—In my opinion the Commander-in-Chief should meet the Director of Works, or the Director-General of Fortifications, and the Director-General of Ordnance; they would wait upon him, when necessary, with detailed plans of all ordnance and armaments, and would take his orders as to it under the Secretary of State. If you had officers for these duties, namely, a Director-General of Ordnance, and a Director-General of Fortifications, they would meet, say once a week, under the Chief Military Authority, and they would advise him, and would advise the Secretary of State. I think that you should determine on all great questions of that kind in Councils, as was done in the days of the Board of Ordnance. I do not think that the Chief Military Authority should be ignored in any of these arrangements.

993. But you would not propose that the suggestions which were made by the officer at the head of the munitions of war branch should be referred to the Deputy Adjutant-General of the Royal Artillery?—No; the two would doubtless consult together, but if war threatened, the Deputy Adjutant-General of the Royal Artillery would be immediately commun cated with on questions of *personnel*, as to men and horses, and everything of that description. The Director-General of Ordnance immediately would turn his attention to the armaments of the Army, and would advise as to those armaments in the Councils of which I spoke.

994. You think that the real distinction is between the *personnel* and the *matéri l*?—Yes; I think that you will find that it has always been so in our regiment until 1859, and from that period we have begun to drift into confusion. The Master-General of Ordnance was a Military Minister of War for the greatest part of the Administration of the Army; he had the command of two important branches, the Artillery and Engineers; and in other respects he had the fortifications, the armaments, the barracks, and the stores, and other departments of the Army were in his hands.

995. Do you think that the officer at the Head of the Munitions of War Branch of the Control Department could also be charged with the miscellaneous stores of the Army; the difficulty is to divide the miscellaneous stores in such a way as to separate them from the munitions of war proper?—That is a question of detail which requires settlement between the Head of the Commissariat, if I may call him so, and the Director-General of Ordnance. I cannot give any decided opinion upon the matter. I think that it would be a very good plan to find out what is done in the French Ministry of War in that respect. The details of certain general stores have been very much discussed, but I do not think that it is so difficult to divide them as people imagine. I think that it is an easy matter to look over the stores and to divide them between the two departments, but I am quite sure that any officer will tell you that you should not mix up the two Departments together, that is, the Commissariat and the Ordnance, although there are certain stores which lie between the two; there is harness, and there are a variety of things of that sort which belong to both, but I cannot see the difficulty of adjusting those details. I should myself like to know what the French do in these matters.

996. Under the sketch which you have given of the plan upon which you think that the business should be conducted, where would you place the Inspector-General of Artillery; would you keep up such an officer?—The Inspector-General of Artillery has no administrative duties to perform. There are four Inspectors-General of Artillery, for instance, in India, who report in the same way as the one at home. But the question is, when you have very large and extensive armaments, as you now have all over England, whether it is not advisable to have an officer whose special duties are to inspect them, and report upon them—it is a question partly of economy. I was going to say that it ought to be done without him, but where you have very large and extensive armaments, and have incurred enormous expense, I think that under such circumstances the duties of an Inspector-General become very useful, although we never had one in former days.

997. Who used to perform that business; was it the Officer Commanding the Royal Artillery in the District?—The Officer Commanding the Royal Artillery in the District was of course held responsible by those above him that his armaments were in proper order, but nobody came to inspect his particular armaments except occasionally; that is a new feature, and I think that it has arisen from the feeling that these armaments are so large and expensive that it is a matter of economy, but the Inspector-General of Artillery has no administrative duties of any kind. He makes his inspection and writes his Reports, and there his duty ends.

998. (*Mr Stansfeld.*) Those Reports in your opinion should go through the Artillery Officer at the Head of the Artillery Department to the Commander-in-Chief?—It is difficult to say where they should go, because the Inspector-General inspects the *personnel* and the *matériel*, at each station he visits.

999. (*Sir Edward Lugard.*) There would be no harm in their going to the Commander-in-Chief to be sent on to the Head of the *Matériel* Department?—I think that they ought to be communicated to the Commander-in-Chief and sent on. In fact, in India, when as Deputy Adjutant General I received these Reports I laid them before the Commander-in Chief, to show him the general condition of the batteries throughout India; then I sifted them, and any complaint as to barracks was sent to that department in India. Complaints of harness or guns, were sent to the Director-General of Ordnance. I made use of all these Reports, collating the different information under different heads, and sending it off to the different departments. In the same way, in regard to clothing in India, if it had not arrived or was bad, I always sent down, at the request of the Commander-in-Chief, to the Clothing Department. In India, owing to the great confusion, and the differences of system and of equipment in all the Regiments of Artillery, these Reports, when the Inspectors-General were first appointed, were extremely useful and brought to notice many differences in system in drill, equipment, and discipline, and they received great attention, because they were important in carrying out a great change; but now I hear they are going to dispense with three out of four of the Inspectors-General. The period of their chief usefulness may have in some measure passed away.

(The Witness withdrew).

WOOLWICH,
22*nd December*, 1869.

ADDITIONAL MEMORANDUM ON ADMINISTRATION OF MATÉRIEL OF WAR.

In former days, under the Master-General of the Ordnance, the duties connected with the Administration of the Armaments, and of *Matériel* of War, were conducted by the Director-General of Artillery, the Deputy Adjutant-General performing those connected with the *personnel* of the Artillery. 17th Report of Military Commission of 1810, pages 147, 148, 204, and 205.

The simplicity and efficiency of the system were testified to by the late Duke of Wellington, Lord Hardinge, Sir James Kempt, and Sir Hussey Vivian, who had all been Master-Generals.

The Director-General of Artillery was head of the Field Train, and President of the Ordnance Select Committee, of which the heads of the manufactories were members. He regulated the amount and proportions of the armaments, garrison, siege and field, at home and abroad, both those in use and those kept ready for war, and he received periodical returns from Officers Commanding Royal Artillery of the armaments in their charge. Committee of 1828, pages 113, 114, 123, 124. Committee of 1833, pages 2 and 4. Committee of 1849, pages 696, 697, App. 17th Report of Military Commission of 1810, page 205.

Col. John M. Adye, C.B.

As President of the Ordnance Select Committee he was kept *au courant*, and was in fact the ruling spirit of all changes in *matériel:* and as the heads of the manufactories were constantly associated with him, and as the Commanding Officers of Artillery made all reports on *matériel* to him, and sent him their demands for guns, ammunition, and stores, he was thus well informed of the progress and condition of all existing armaments and *matériel*.

Armed thus with full information and also with executive power, he was in a position not only to advise but to carry out the orders of the Master-General. It must also be borne in mind that the Board of Ordnance supplied arms and *matériel* not only for the Artillery but for the other branches of the Army and for the Navy.

In May 1855, the Civil Administrative Departments of the Army, including those of the Ordnance, were concentrated in the War Department under a Secretary of State.

The *personnel* of the Artillery, under the Deputy Adjutant-General, was transferred to the Horse Guards.

The office of the Director-General of Artillery was retained in the first instance under the War Department; but in 1859 the most important of his duties, that is, those connected with the armaments, siege, garrison and field at home and abroad, were transferred to the Deputy Adjutant-General, Royal Artillery, at the Horse Guards.

In 1861, a Director of Ordnance was appointed at the War Office with some of the former duties of the Director-General of Artillery. The Select Committee was placed under him, and the general control of the manufactories was transferred to his department. The Field Train Department however was taken from him, and became absorbed in that of the Director of Stores. Thus, although he was still the adviser as to changes of pattern, and had authority over manufacture, his power over the armaments and the reserves was taken from him, one having gone to the Deputy Adjutant-General, the other to the Store Department. He had, so to speak, still the knowledge wherewith to regulate matériel of war, but he had no longer the executive power. Within the last year his authority has been still further reduced, the Ordnance Select Committee having been dissolved, and the manufactories transferred to the Control.

It will be observed that the Deputy Adjutant-General of Royal Artillery, in addition to his former duties of the *personnel* (and which are now far greater than of old), has had a very important portion of the duties of the former Director-General of Artillery handed over to him; but a short consideration will show that he must perform the latter under disadvantageous circumstances, and with diminished knowledge and power as compared to the Director-General of Artillery.

As he has no official connection with the Ordnance Select Committee who inaugurate changes, or with the heads of the manufactories who make the *matériel*, or with the Store Department which has charge of it, and as he also is not acquainted with the amount of reserves which the Secretary of State may have ordered, so he has great responsibility thrown upon him without adequate knowledge; that is, he has to advise as to armaments, their proportions and changes, without having full official knowledge of the progress and condition of *matériel* of war. Instructions of Director of Ordnance, 8th July, 1861, paragraphs 5 and 14.

Not only that, but he has no executive power; his duties are limited to recommendation, and his proposals and demands for fresh armaments and stores are now forwarded to the Director of Ordnance, and to the Store Department, for revision and for consideration before any action is taken on them. The duties formerly performed by one officer are now divided amongst three. Confusion, correspondence, and want of unity of action are the probable results. Instructions of Director of Ordnance, 8th July, 1861, paragraphs 7, 8, and 14. Instructions of Director of Ordnance, February 1867. Committee of 1860, pages 81, 82.

It will at once be seen how far the original simplicity of the Board of Ordnance has been departed from, and how completely the responsibility, knowledge, and executive power are diffused amongst various departments which are independent of each other. Committee of 1860, pages 115, 116.

The solution of the present difficulty apparently would be to resuscitate and augment the old office of Director-General of Artillery, giving him authority over the Select Committee (which should be re-constituted), over the Manufactories, the Storekeeper's Department, and the Armaments. An arrangement of this nature seems all the more necessary now when the science of artillery is daily progressing; when the armaments, both naval and military, are increasing in magnitude and in cost, and when the artillery arm, generally, holds a more prominent position than it did even in former days. It would also appear essential to draw a clear line of distinction between the administration of "*Munitions de Guerre*" and "*Munitions de Bouche*." Committee of 1860, page 132. Committee of 1837, pages 37 and 38. Lord Strathnairn's Committee of 1866, pages xxx, xxxi, paragraphs 102, 103; also pages 23, 173, and 201.

I would observe, in conclusion, that in a military point of view the Officers Commanding the Royal Artillery in districts at home and abroad would still be held responsible to the highest military authority, as they ever have been, for the due care and efficiency of the armaments committed to their charge. Any changes in armaments or in *matériel* of war proposed by the Director of Ordnance would also of course be submitted to the Commander-in-Chief before being acted on. Committee of 1860, page 294.

JOHN ADYE, *Col. R.A.*

Captain G. C. DOWNMAN, examined.

Capt. G. C. Downman.

17 Dec., 1869.

1000. (*Chairman.*) You are the Superintendent of the War Department property in the Portsmouth District?—Yes.

1001. Do you think that the present arrangements for the management of the War Department property are satisfactory?—I do not. I think that the property which is not publicly occupied, ought to be in the hands of the Superintendent of the property entirely as a private agent. I do not see that as regards the property which is for the public benefit it is necessary for the Engineer Department to have anything to do with it. The Commanding Royal Engineers occasionally change, and the Division Officers of Engineers constantly change. I do not mean to say that they are entirely ignorant of farm rents, but still I do not think that they can have attained the knowledge which a person, who is there year after year, and who is there for that sole occupation, and nothing else, has. I think that there would be a far greater rental to the public by such a course being adopted. Ever since I have been at Portsmouth I have tried to get more responsibility.

1002. Do you think that there are an unnecessary number of persons consulted with reference to the property?—Yes; I am sure of it.

1003. How is the business now conducted?—The Commanding Engineer is the custodian of the property, the Second in Command has a voice in the matter, and the Chief Clerk who has been there for years, and is of great assistance in supplying information with regard to it, to the Commanding Engineer; each Division Officer is consulted upon the subject.

1004. Who are the Division Officers?—They are the Division Officers of Royal Engineers; there are certain divisions of the property.

1005. Then the Commanding Royal Engineer, the Second in Command, the Chief Clerk, and the Division Officers are consulted, is anybody else consulted?—The local agents are very often employed, and, as I think, unnecessarily. Unless I should have been censured for having let the property badly, or anything of that kind, it is a sort of slur upon myself; I am not allowed to do the work. If I was unfit for the position I should have thought that I should have been censured, but I never have been so, and I defy it to be stated that the land has been badly let, or under let by me since I have held the appointment.

1006. Besides the persons whom you have named, there is the Solicitor to the War Office?—Yes, he is occasionally consulted; perhaps more upon legal questions, but still he has a voice in the matter.

1007. Occasionally London agents are consulted, are they not?—Yes; sometimes the property is put in the hands of London agents, and not of myself.

1008. You think that there should be one local agent for the property who should be in charge on the spot, and who should refer to some one authority at Head-Quarters?—I think so as regards the property which is let for the public benefit.

1009. Of course consulting the Military Authorities upon any matter connected, in any way, with military works or questions?—Of course.

1010. Do you think that the proper value has been received by the public for the lands which are the property of the War Office in the neighbourhood of Portsmouth?—No; not by a very great deal.

Capt. G. C. Downman.

17 Dec., 1869.

1011. Take, for instance, the case of the forts which have been constructed on the Gosport side; have you a plan of the land which was purchased for those forts?—Yes. [The Witness produced a plan.]

1012. This is a plan of the land which has been purchased by the Government for the fortifications and the defences of Portsmouth on the Gosport side?—Yes.

1013. When was that land bought?—In 1856 and 1857.

1014. What happened at first with respect to the property?—There were various ideas on the subject, and the one which occurred in 1858, was, that the whole of this property should be laid down in grass and form an immense park, or drill ground; and for two years, in consequence of this arrangement, I may say that almost the whole rental of the property was lost. It was then let upon the terms that for the first four years it was to be farmed in the customary manner, and afterwards laid down for grass, and left in permanent pasture at the end of the seven years.

1015. Were the terms of that agreement carried out for the whole of the seven years?—No; at the end of the fourth year, the intention of laying it down for grass was given up, and the parties were allowed to farm it at the same rent for the remainder of the period, with one exception.

1016. What was the rent which was obtained under those conditions, for the seven years?—644*l.* 11*s.* 2*d.* at first, but afterwards increased to 877*l.* 7*s.* by fields in the hands of the Contractor being no longer required for the forts. It was let in three farms, and it only realised that amount.

1017. What was the rent which was obtained for it subsequently?—It is now let at 1,510*l.*

1018. Could it have been let at a larger sum at first?—It could have been let upon equally good terms as the present.

1019. So that there has been a loss of between 800*l.* and 900*l.* per annum?—Yes; and besides that, in the first two years the land, being unoccupied, deteriorated in value, and the tithes had to be paid, and the place all went to rack and ruin. I shot over it, and it was up to my head in self-sown corn and weeds, &c.

1020. That was for the first two years?—Yes, and then it was let on this printed form as to the pasture (producing a form).

1021. What are the fields which are coloured yellow upon this plan?—The land taken up for the forts in the commencement.

1022. Can you point out any instances in which more land than was required for carrying out the works was taken up for the forts?—Yes, I have a Report here in which I have called attention to that point. This Report is addressed to the Commanding Officer of Royal Engineers and it is dated 17th October, 1862, the property having been purchased in 1857:—"Sir,—I beg leave to draw your attention to Field "No. 153, in the parish of Rowner, purchased by the "War Department on the 9th March, 1857, containing "24 acres 3 roods 11 perches. This field was taken "up for site of Grange Fort, but only about four or "five acres have ever been used for that purpose. A "Clerk of Works kept five or six cows upon it for a "very long period, and cultivated a small portion of it. "Mr. Hurle, foreman to Mr. Piper, who rents some of "the land adjoining the forts, now grazes it, as I "noticed some 30 head of cattle in it the other day. "No rent has ever been received for it, and the "Department have paid the tithes and taxes upon it "through me." In reply to that communication the Commanding Officer of Royal Engineers said this:—"This Report is not quite correct as to facts. Captain "Downman requested to put himself in communication with Captain Tyler, with a view to have the "fields let." I believe that I was wrong in the number of cows, or something of that kind; but I am quite certain that it was a very trifling thing.

1023. Are there any other fields coloured yellow upon this plan, for which the Government received no rent for the same time, or approaching to the same time?—A great many were taken up for the forts, but I never drew attention to the matter; it was a sort of thing which I was rather delicate in interfering in. I was under the Commanding Royal Engineer, and if an unnecessary quantity of land had been taken up I should have considered it presumption on my part to have alluded to it.

1024. Who received any profit which was derived during that time from the cultivation or other use of these lands?—They were entirely idle for two years; the land had been in a perfect state of cultivation, but of course being left idle for a year or two there was self-sown corn in September, and weeds of every description. In the second year, in about a week, I sold 189*l.* worth of self sown corn and weeds, which was turned into hay and straw.

1025. Is this property now under your management?—Yes, all the rents are now received by me.

1026. Do you consider that it is now let at a fair rent?—Yes.

1027. What has become of the land coloured yellow upon this plan?—Everthing is let that can be let upon that property.

1028. So that at the present moment, in your opinion, the Government receive the full value of that property?—Yes

1029. In the case of purchase, have you had notice of the purchase of land in the neighbourhood of Portsmouth, and to take possession on the part of the Government?—No; hardly in any instance. With two exceptions, I have never received one single acre of land which has been handed over to me on purchase. The Division Officers of the Royal Engineers let it, as I consider, very much under its value. I can give cases of that kind.

1030. Have any cases occurred in which delay in letting property has taken place in consequence of that arrangement?—Yes; there was the case of Bay House, which was purchased from Lord Ashburton or the Misses Baring. It was purchased under the Defence Act of 1860, and it was not handed over to me till the 22nd of October, 1862, and during that time it was in the hands of Messrs. Smith and Oakley, of Waterloo Place, London, and their bill amounted to 73*l.*; they asked an exorbitant rent for it; being perhaps guided by the immense amount of money paid for it. Some friends of mine intended taking it, but they thought the amount of rent asked too much. In October 1862, Captain Peel applied to me to let him a part of the land, and I told him that I had nothing to do with it. A letter was written to Messrs. Smith and Co., and the letter was forwarded to me, and I had a report upon it. My letter is as follows, addressed to the Commanding Engineer:—"Sir,—The property "alluded to in Mr. Peel's letter (as purchased from "Lord Ashburton), like other extensive purchases "made within the last two years, has never been "handed over to me in any way, that in question was "directed, I believe, to be let by an agent in London, "and I should have thought that similar instructions "ought to have been given to me. I have, as stated "in Mr. Peel's letter, received applications to rent this "and other War Department property, which, although "the claims for tithes and taxes are made through "me, is otherwise completely out of my charge, the "system of public tender departed from, and the property left in an unoccupied state. Mr. Peel's statement concerning the land in his occupation is correct, "but I am unable to report further, from the circumstances before stated." After I wrote that letter with regard to this property, I wrote to Mr. Owen, the Government Surveyor. I said:—"*Bay House and land, late Misses Baring's*—Dear Sir, I "conclude you purchased this property for the War "Department, if so, would you kindly inform me who "took possession of the same on completion of the "purchase." His reply to me was:—"Dear Sir,—"This property was put into the hands of Messrs. "Daniel Smith Son, and Oakley, 10, Waterloo "Place, to let for the War Department, and I suppose "they have the possession. I think Mr. William Leam "holds part of the land, but I am not certain. The

"final negotiation to purchase was made by Mr. Hunt, "of Parliament Street, London, but I don't think he "would know more than I do about the possession." There was no inventory taken at the time when the property was given over, of the fixtures, or anything, and this was a very good house indeed. No local agents were instructed to let it.

1031. Have you a plan of the property which was bought for the Portsdown Hill Forts?—Yes [producing the same]; the red line is the boundary of the Government property.

1032. Was this property handed over to you when it was first bought?—No; not an acre of it. The only portion which was handed over to me was that purchased from Sir Francis Austin [pointing out the same], and he was to reside upon it as long as he lived. After his death I was directed to take possession of it.

1033. Only one small portion was handed over to you?—Yes.

1034. Has this property now been handed over to you?—Yes; and I receive all the rents and everything connected with it. But previous to its being handed over to me, I had to pay all the tithes upon it, that is to say upon what was taken up for the forts. Almost the first knowledge which I had of the land having been purchased, was a tithe collector coming to me for the tithes. The whole of that land [pointing to the plan] was taken possession of by the Division Officer.

1035. I see that a portion of this plan is coloured yellow, what does that mean?—That is the land taken up for the forts.

1036. What is the acreage of that land?—The total amount is 188 acres for Fort Purbrook; but I cannot give the acreage of the others.

1037. Do you know how much property was bought of Mr. Thistlethwaite near Fort Southwick?—No; 764 acres were re-let to him after the deductions for the forts Nelson, Southwick, and Widley.

1038. At what rate per acre was it let?—13*s.* 8*d.*

1039. Do you know what the rent of the property bought from Mr Thistlethwaite was?—No.

1040. When the case of his compensation was brought into court what was the valuation of that land?—26*s.* or 27*s.* per acre.

1041. And it was let for 13*s.* 8*d.*?—Yes.

1042. You, probably, in the management of this property, have referred to the rateable value assessed by the Assessment Committee?—I have, and as is known by every one the rateable value is considerably lower than the actual rent.

1043. What is the rateable value given by the Assessment Committee for that land?—It averages very nearly 1*l.* per acre.

1044. And it was let for 13*s.* 8*d.*?—Yes.

1045. Then, I think, there was the case of some property of Mr. Deverell?—Yes.

1046. What does that property let at?—In the first instance there were 86 acres let, in three holdings; one to Mr. Deverell, one to a Mr. Dunning, and one to a Mr. Duke. Mr. Deverell's land was let by the Division Officer of Royal Engineers; Mr. Duke's land was let by the Superintendent, namely, myself; and Mr. Dunning's land was let by public tender through me. The total acreage was 86 acres and 21 perches, for which we received 104*l.* 16*s.* 4*d.* It was consolidated in one rental to Mr. Deverell, and with the addition of 17 acres and 1 rood was let to him for 96*l.* 2*s.* per annum, showing a loss of 8*l.* 14*s.* 4*d.* per annum with the additional 17 acres.

1047. By whom was that land let?—It was let by War Office order, according to Mr. Smith's valuation.

1048. Mr. Smith is a Surveyor at Portsmouth?—Yes.

1049. Do you think that you could have got more money for it, if you had had to let that land?—I think so; the proof is that upon Mr. Deverell's holding we were receiving more for a less number of acres. I do not know but, I must say, that if I had represented the matter to Mr. Thistlethwaite, through his agent, after it being declared to the jury that the land was worth 27*s.* an acre, and the rateable value nearly 1*l.*, I do not see how they could have objected to have paid a larger sum than 13*s.* 8*d.*, more particularly as the lands in Boarhunt and Southwick parishes are *tithe free*. An enormous sum was given for the land, and I consider that after that it ought to be turned to the best advantage for the public.

1050. Is there any other property connected with those Portsdown Hill Forts which, in your opinion, has been let below its value?—Not since Michaelmas 1864, in everything.

1051. Is there any land the rent of which you have been able to raise?—Yes; the land purchased from Mr. Osborne.

1052. At how much was that land let in the first instance?—At 25*s.* an acre for three years. It was let by the Division Officer from Michaelmas 1861. It was let through the Superintendent to Mr. Leggatt, at 32*s.* per acre, from Michaelmas 1864.

1053. Then you think that in that case the rent originally obtained was too little?—A great deal; there was no difficulty in my obtaining 32*s*; that was the rent paid by Mr. Leggatt for the other private land of Mr. Osborne's adjoining, which had excellent farm buildings upon it, and he gave me 32*s.* for Government land which had no homestead upon it.

1054. It came into Mr. Osborne's farm?—Yes; we only purchased a part of it.

1055. Were all these pieces which are coloured yellow upon this plan given over to the Contractor for the Works?—Yes, and in some cases a portion of the land coloured yellow was let to the Contractor, and in others no rent was received.

1056. Had you to pay the tithes upon it?—Yes, upon the whole, publicly occupied; the Defence Act compels all taxes to be paid hereafter, so that it does not matter whether a fort is built, or whether the land remains as purchased.

1057. Can you tell the acreage of the land handed over to the Contractor?—I can tell it in most cases. In two cases where the Contractor built these forts land was let to him which was rated at pretty nearly 1*l.* an acre, and he paid 5*s.* These are Fort Nelson, Fort Southwick, and Fort Widley, 32 acres 1 rood and 1 perch, were let at 8*l.* 1*s.*, and another portion of 12 acres 2 roods and 22 perches was let for three guineas.

1058. Have you here a plan of the land which was given to the Contractor for Fort Purbrook and outside Fort Purbrook?—Yes.

1059. Is that land now in the hands of the Contractor?—The Contractors plant is upon it, and is to be sold in a few days, but the land is not in my hands, except so far as regards paying the tithes and taxes upon it. I presume that it is in the hands of the Contractor still.

1060. Is there any other observation which you wish to make respecting the management of the land on Portsdown Hill?—I think that there is nothing more in particular. On consideration, as the terms under which this property is held requires two years' notice to be given prior to resumption, I think steps should be taken with a view to an increase of rent for the future.

1061. The War Department has a certain number of houses which have been purchased with the lands?—Yes.

1062. Can you give a statement of the annual rent received for those houses?—The rent, small as it is, does not go through me, they only realize the regulated lodging money.

1063. What do you mean by the regulated lodging money?—The amount which is stopped from the pay of the Division Officers of Royal Engineers.

1064. These houses are occupied by Officers of the Royal Engineers, who are employed upon the works, and who pay no rent?—Yes.

1065. But they pay only in the regulated stoppage from their pay?—Yes, by their agents. I have nothing to do with it.

Capt. G. C. Downman.

17 Dec., 1869.

1066. Does that stoppage cover the value of this property?—No; I consider that it does nothing like it. I can mention three houses which would certainly realize 60*l*, 70*l*., and 80*l*. a year if let; one of them is let now, one was put in repair the other day, and has been advertised lately, it is not let yet, but last year I could have let it with eight acres of land for 100*l*. a-year. One house is let for 80*l*. a-year, being a house with 6 acres 3 roods and 2 perches of land, there is a lodge, and gardener's cottage.

1067. Is there any land belonging to these houses?—No, not for the officers; there is nothing but the house and garden, and there is a gardener's cottage in each of these cases.

1068. Have you had any representations made to you with respect to the rent received for the War Department property being inadequate?—Yes I have, from the War Office.

1069. When was that?—It was in February 1864. I reported on the letter.

1070. What was your Report?—It is addressed to the Commanding Royal Engineer, and is as follows:—"Sir,—I beg leave to return the accompanying state-"ment of rental, &c., of War Department property, "and to inform you that the rental for 1864-5, "5,057*l*. 12*s*. 7*d*., included all the property that I was "aware of being let up to the date of my furnishing "that Return. I would remark that the occupa-"tion of several good houses, &c., by the Officers "of Engineers at the several forts, together with their "staff, the rent of which would amount to a consider-"able sum (if let), but which at present only realizes "the regulated lodging allowance, which is, I believe, "stopped from those officers' pay. And further, to "account for the small rental, the occupation of pro-"perty on Portsdown Hill is at present in an un-"satisfactory state, more particularly that purchased "from Mr. Thistlethwayte, the greater portion of which "has never been handed over to me in any way, and "several lettings, as follows, let at far too low a rent. "These are the chief reasons I think for the small rent "received for the large extent of property purchased." The rentals which I have enumerated are those of which I have told you.

1071. What steps were taken upon the receipt of that letter?—It was not long after that that the land was let to Mr. Thistlethwayte, it being valued by Mr. Smith, who is a very competent person, and I cannot understand why it was let at so small a rent. I cannot conceive why what we have purchased should be let at 13*s*. 8*d*. an acre.

1072. Then this land was let upon Mr. Smith's valuation?—Yes, since 1864; but before that it was under all sorts of arrangements. Some of the leases were allowed to run out, and some of the land was idle.

1073. Is the reputation of Mr. Smith, as a valuer, high at Portsmouth?—Very.

1074. Then how do you account for the low valuation?—I do not know how to account for it. Mr. Smith is the best valuer, I should think, who could be obtained in Portsmouth.

1075. Are there any other observations which you wish to make respecting the War Office property at Portsmouth?—No, I am not aware of any. There has been a sale or two lately, upon which I was not consulted in any way, and I do not know what the last one has realized. Some property was sold to the Local Board, I believe, for 350*l*., for which Mr. Emanuel said that he would have given 1,000*l*., but I imagine that that was a sale for the benefit of the Local Board. Another property has been sold for the site of a Roman Catholic Chapel, but I was not consulted upon it in any way whatever.

1076. Then what you say generally is, that if you had been consulted when property was going to be let, and if you had been consulted more especially in the first letting of the property after it was purchased, you would have been able to realize a larger income for the Government than was obtained?—Yes; I am paid by percentage, and of course it is to my interest to get every sixpence that I can get for the property. There is no such interest in the case of the Division Officers, although they would not let it under what they supposed to be its value.

1077. How long have you been connected with the War Office in your present position?—For 14 years next May.

1078. Can you give us an approximation of the number of Officers of Royal Engineers who have had to deal with the property during that time?—I think that there have been six Commanding Royal Engineers, and as to the Division Officers there have been an immense number.

1079. Are the Division Officers constantly changing?—Yes; and the Commanding Royal Engineer occasionally.

1080. You think that it would be a better plan to have one person cognizant of the position, and so on, of the property, and responsible for it to some one at this office?—I certainly think so.

1081. And you believe also that in many cases references have been made, and therefore expenses have been incurred, by the War Office, which are unnecessary?—Yes; I have two or three cases here which would prove it, which have occurred within the last few months.

1082. Will you mention one or two of those cases?—The first was a case of a farm where the sea overflowed and damaged the man's crops, and if you will allow me I will read to you a letter which I wrote upon the matter. Writing to the Commanding Royal Engineer, on the 22nd July, 1869, I said:—"Sir,—Reporting as "requested, upon the accompanying letters herewith "returned, I have the honour to inform you that I "yesterday went over the land let to Mr. Hunt, adjoin-"ing Lumps Fort, and inspected the damage done to "the crops from the sea having overflowed the bank, "which, although very great I cannot admit is to the "extent estimated, namely, that of 108*l*., by the "tenant, who would not be likely to undervalue the "damage done, or that of 147*l*. by Lieutenant Bogle, "who has been misinformed respecting the acreage of "this rental, which was originally 32 acres 2 roods "32 perches, but is now only 21 acres 1 rood 7 perches. "The item of 40*l*. for four acres of wheat is a very "liberal estimate, as a load of wheat per acre is a very "good crop, and 10*l*. per load is full market price, but "the cutting, harvesting, threshing, &c., Mr. Hunt will "not be at the expense of, and furthermore where the "wheat and other crops have been damaged the land "has been ploughed up and re-sown or planted, in "most cases with mangold-wurtzel, potatoes, and other "crops, which, had the original crop stood, could not "have been done. Mr. Hunt also sold the sand, and "shingle washed upon the land; I am therefore of "opinion that if Mr. Hunt was paid the sum of 65*l*., "it would be a fair compensation for the loss sustained. "I would also suggest its being considered whether a "sea-bank or other defence could not be made to pre-"vent future damage, which might eventually not only "damage the land belonging to the War Department, "but would spread over the land adjoining, and which "would probably cause claims for very heavy compen-"sation, being nearly all garden ground." After I wrote that letter, Mr. Smith was employed to value the damage, without my being aware of it, until I afterwards heard of it; and in the War Office Memorandum of the 19th November, 1869, it is said—"The Com-"manding Royal Engineer is authorized to direct the "Superintendent of War Department property, to "endeavour to settle the claim in question for 65*l*. as "suggested in his (Superintendent's) letter of the 22nd "July, and to report the result to this office." I obtained a receipt from the tenant, and Mr. Smith when he was employed without my being consulted, stated that the tenant's demand of 108*l*. was under the damage.

1083. In that case three people were employed?—Yes; and after all I was told to endeavour to settle the matter for the 65*l*. as I had stated in the first instance, which I did. There were Mr. Smith's expenses, which were unnecessary. Of course it does not

hold me up particularly, when another person is brought in to value. If I had shown myself incompetent in other cases they might have said—"It "is of no use asking Captain Downman, because he "will give a wrong estimate," but I have never been censured in any way for having made a bad valuation, or for having let the land under its value. There was another case of a public-house, close to me, which had been let on lease for a great many years at 30*l.* a year, the tenant was anxious to get a renewal of the lease, and she made an offer of 90*l.* a year to the Government for it; I said that I thought that 100*l.* would be obtained by putting it up to public competition. This I suppose was not considered satisfactory, and Mr Smith was again employed. Mr. Smith was again consulted, and he declared the offer of 90*l.* to be a very full and ample rent.

1084. You gave your report, and the matter was afterwards referred to Mr. Smith?—Yes; that is what I complain of, and that it is an unnecessary expense incurred, as if I am fit for my duty, I should be allowed to do it without calling in other people.

1085. There was a case with regard to the King's Rooms, at Southsea, upon which we have had a great deal of discussion of late; were you consulted on that case?—No.

Capt. C. C. Downman.

17 Dec., 1860.

1086. What you say is, that if the Government had an agent at Portsmouth they would obtain a greater rental?—I am the Superintendent or Agent, and had I been allowed greater latitude and responsibility, a much larger rental would have been obtained.

1087. He, I presume, should have the power to call in a professional valuer in case of difficulty?—Yes. But if I felt myself in any difficulty, rather than show my ignorance, I should have consulted the best valuer at my own expense; and although I complain of the apparent errors of Mr. Smith, I should have probably called him in to my assistance, as he is considered to be the best opinion in Portsmouth. Yet I cannot account for the valuations of Mr. Smith which I have given to you.

1088. Supposing that you expect that a tenant is going to abscond, have you power to distrain for rent, or otherwise?—No. nor has the Commanding Engineer, until the case is reported to London.

1089. Consequently the man would have time to escape?—Of course.

(The Witness withdrew.)

Adjourned.

Thursday, 23rd December, 1869.

PRESENT:

The Right Hon. Lord NORTHBROOK, *in the Chair.*

Lieut.-General Sir EDWARD LUGARD, G.C.B.

General Sir CHARLES YORKE, G.C.B., examined.

1090. (*Chairman.*) For what period were you Military Secretary to the Commander-in-Chief?—From April 1854 until the 1st of July, 1860. That was during the time that Lord Hardinge and the Duke of Cambridge were Commanders-in-Chief.

1091. Have you seen the evidence which we have received respecting the duties of the Military Secretary?—I have; Sir Edward Lugard was kind enough to send it to me.

1092. We quite understand the duties of the Military Secretary as regards promotions and appointments. We should be very glad to have your opinion with respect to the other portions of his duties, if you will be kind enough to tell us what you consider to be the duties of the Military Secretary independent of promotions and appointments?—With regard to communications with the departments he is, in fact, the Secretary of the Commander-in-Chief; he is his mouthpiece. In the directions which the Commander-in-Chief wishes to give to the departments, either to the Quarter-master-General's Department, or to the Adjutant-General's Department, or to the War Office, he gives his directions to the Military Secretary, and the Military Secretary communicates them. There are certain portions of routine business which go through at once. I concur in what is stated in the evidence of General Forster, the Military Secretary. The duty was carried on in the same way when I was in that office.

1093. Turning to the questions put to General Forster, at the end of his evidence, from No. 107 to No. 109, have you any remarks to make?—He says that he receives the documents from the Under Secretary for War to be communicated to the Commander-in-Chief. With regard to that, it is a communication from the Secretary of State to the Commander-in-Chief, and it gets into the hands of the Military Secretary in that way—it is addressed to the Military Secretary, but it is for the information of the Commander-in-Chief.

1094. That portion of the business of the Military Secretary with respect to the communications has arisen in consequence of the officers being in two buildings?—I think that even if they were in one building a great deal of the same business would be done, because it is desirable to have a record of it in writing. If they were in one building it might be done orally, but I think that you will agree with me that it is very desirable to have a written record on many questions.

Gen. Sir C. Yorke, G.C.B.

23 Dec., 1869.

1095. Are you aware of the manner in which business is transacted in this office; for example, by Minute Papers in dealing with certain departments of the Secretary of State?—I am generally, but not personally, acquainted with it.

1096. No letters pass between the officers here and the Secretary of State?—A great deal of that sort of work might be done. There is very little letter writing between them, but there are memoranda which are sometimes almost as long as a letter.

1097. At Question 111, Mr. Stansfeld asked General Forster, "Although the phrase 'Chief of the Staff' is "not a recognized one, you consider it as indicating "the nature of your functions and responsibilities," to which he answered, "Yes." Do you agree with him upon that point?—I think that there is a distinction in that. As I should understand the Chief of the Staff, he is the superior authority, above the heads of the several departments with whom he communicates, whereas the Military Secretary only carries out the order of his chief.

1098. You would not say that the Military Secretary had authority to give orders to the Adjutant-General?—No.

1099. In that respect you would not consider that he was the Chief of the Staff?—No; the business of the Chief of the Staff is really done by the Duke himself. Of course, there must be departments, and I think that it is much better that he should give his orders to the Adjutant-General and the Quarter-

Gen. Sir C. Yorke, G.C.B.

23 Dec., 1869

master-General, than that they should be given by him through a third person. I mean all verbal communications.

1100. So that in that sense the General Commanding-in-Chief occupies the position of the Chief of the Staff?—Yes, that is, that he himself gives the orders to the several departments that, if there were a Chief of the Staff, would be given by that officer.

1101. (*Sir Edward Lugard.*) In the absence, either from severe illness or otherwise, of the Commander-in-Chief, who gives the order?—That has never happened since I have been there. Many years ago, beyond the memory of most of us, I believe that the Duke of Wellington resigned the Command of the Army, and a new Commander-in-Chief was appointed. I do not exactly know how the business was then done.

1102. In case of the serious illness or lengthened absence of the Commander-in-Chief, how would the duties be performed?—I should say that if the Commander-in-Chief was quite incapacitated from attending to the business, the department would receive their instructions from the Secretary of State, as would formerly have been the case with the Secretary at War.

1103. (*Chairman.*) On looking through the details of business which we have received from the Horse Guards, there are several points in connection with the business of the Military Secretary, which at first sight appear to us to refer to other departments. Can you give us any information upon those points. One division of those subjects relates to duties which appear to be connected with the discipline of the Army, and the first of them is the question of General Courts-Martial. Can you tell us what the Military Secretary, when you were in that office, had to do with General Courts-Martial?—When the sentence of a General Court-Martial came from the Judge Advocate-General it came to the Commander-in-Chief, and it was for his own particular consideration. It was for him, after a careful perusal of the proceedings, to see whether there were any circumstances which would induce him to recommend that either the sentence should be fully carried out, or that a modification of it should be made. The Judge Advocate-General previously signified to the Queen that the proceedings in point of law were legal, and the question would arise as to discipline, and as to whether there were any circumstances inducing the Commander-in-Chief to think that there might be any modification of the sentence, or whether it should be carried out entirely. When that was done, the Military Secretary, by order of the Commander-in-Chief, drew out a submission to the Queen, stating the charge, the finding, and the sentence, and His Royal Highness's recommendation as to what should be done with it, either that it should be carried out, or that there should be a modification of it. When it was returned from the Queen, a notification would be made either to the General Officer Commanding the District, or in the event of penal servitude, it had, I think, to go to the different Departments of the Government, to the Crown Office, and of course to the Secretary of State, and in Ireland to the Chief Secretary and the Chief Justice, and they gave orders as to penal servitude. A copy of the finding and the sentence was transmitted to the Adjutant-General, and the proceedings were finally sent to the Judge Advocate General to remain in his custody.

1104. Was the duty of the Military Secretary, with respect to that business, entirely ministerial, or was it in any way consultative, as to whether the sentence should be modified or not?—It was entirely ministerial; the matter was entirely with the Commander-in-Chief.

1105. (*Sir Edward Lugard.*) Then the office of the Military Secretary is really the Commander-in-Chief's Office?—Yes; I should call it the Commander-in-Chief's Office, and I should say that the Military Secretary is what the title designates, namely the Secretary for all the business belonging to the Commander-in-Chief.

1106. (*Chairman.*) Another description of business which at first sight appears to be connected with the business of the Adjutant-General, is the business of certain claims and representations against officers?—It depends a great deal upon what it is. If a young man has been going fast, the probability is that the people who complain of him write direct to the Commander-in-Chief, and it would then be a question whether it should go to the Adjutant-General or to the Military Secretary.

1107. Did the Military Secretary deal with those cases?—If he was desired to do so he probably referred to the Commanding Officer of the Regiment for an explanation. Some of those matters, which are matters of discipline, would go to the Adjutant-General. Those are cases which are dealt with by the Commander-in-Chief according to the circumstances of the case itself. That is not a very important part of the matter. Tradesmen would be sure to write to the Commander-in-Chief.

1108. There are also questions relating to the inspection of the Yeomanry and the Militia, and the applications of Military Officers for appointment in the Commissariat and Store Department?—When there is a regiment to be inspected you write to the Commander-in-Chief to say that a day is fixed, and to desire that an officer may be appointed to make an inspection and report. The directions are then given by the Commander-in-Chief through the Adjutant-General, and the report of the Inspecting Officer is sent to the Secretary of State.

1109. In that case the Military Secretary would be simply the channel of communication?—Yes.

1110. With respect to the communications between the Military Secretary and the Deputy-Adjutants-General of the Royal Artillery and the Royal Engineers, when you were Military Secretary was the communication direct between the Deputy Adjutants-General and the Commander-in-Chief, or was it through the Military Secretary with respect to the appointment of officers to those corps?—It was through the Military Secretary.

1111. The Military Secretary himself would scarcely have a knowledge of those two corps?—Certainly not. The Artillery is almost an army in itself; there are 30 or 31 brigades.

1112. So that practically the recommendation must come from some one having a knowledge of the details of the corps?—Yes.

1113. With respect to the business which appeared to belong to the Quartermaster-General, that was business relating to the interchange of regiments in India and the Colonies?—That matter is first of all settled between the Quartermaster-General and the Commander-in-Chief, and when the Commander-in-Chief has determined what regiment is to be sent abroad, or to be relieved, the Quartermaster-General sends a memorandum of it to the Military Secretary, who, by order of the Commander-in-Chief, writes a letter to the Secretary of State for War. I should say that that must be done by the Military Secretary. It is almost a private communication between him and the Secretary of State for War, until the sanction of the Secretary of State is obtained for the disposition of the regiment. That having been done, a submission is drawn out by the Military Secretary, to the Queen, for her sanction, and this having been obtained, Her Majesty's sanction is communicated to the Quartermaster-General, who immediately makes the necessary arrangements.

1114. In that case the Military Secretary is also a channel of communication?—Yes; he is the channel of communication from the Commander-in-Chief.

1115. Generally, am I right in saying that you would ascribe the business of the Military Secretary, independent of the portion relating to patronage in appointments and promotions, as being the channel of communication with other departments?—Yes, it is purely ministerial. In reading over the evidence I see that there is a little difference between the Military Secretary and Lord William Paulet, with respect to passages. I concur with the Military Secretary upon that subject, because in the first place a great part of the information would, in many cases, be in his department. That

matter is not entirely with the Adjutant-General, and the decision very often depends upon the papers with respect to promotion on the exchange papers, and therefore it must come to the Military Secretary. Therefore having the original information from the Adjutant-General, it is very much better that when the matter is thus completed it should go on at once to the War Office without going back to him.

1116. You mean that the Military Secretary must be consulted upon the point whether an officer is to pay his passage or not, as he is the only person who knows the circumstances?—Yes.

1117. Supposing that it was thought desirable to transfer to the General Officer Commanding-in Chief business which is now transacted in other branches of the War Office, especially the heavy business relating to the organization and discipline of the Volunteer Forces, do you think that the General Officer Commanding-in-Chief would be able to perform those duties without the assistance of some officer who would relieve him of some of the details connected with his office?—I have not thought very much about that matter, but on the first blush of the thing I should say that General Lindsay would be under the Commander-in-Chief, instead of under the Secretary of State for War.

1118. (*Sir Edward Lugard.*) But that would increase the duties of the Commander-in-Chief?—Yes; but I should say that General Lindsay would carry on the business under the orders of the Commander-in-Chief.

1119. (*Chairman.*) You do not see the necessity for the General Officer Commanding-in Chief having any assistance in consequence of that arrangement?—There might be some more clerks employed, but until the arrangement was drawn out in some little detail, one would be hardly able to judge of it.

1120. Do you consider that when you were Military Secretary, the arrangements respecting the Royal Artillery and the Royal Engineers were satisfactory?—I have no reason to think the contrary; the discipline was in the Adjutant-General's Office, and all the other questions excepting that, came to the Commander in-Chief through the Military Secretary.

1121. The discipline was entirely under the Adjutant-General?—It was.

1122. (*Sir Edward Lugard.*) When you were Military Secretary had you not as much work as it was possible for you to perform?—Yes, I think that I had.

1123. Then supposing that fresh work was added to the duties of the Commander-in-Chief, what would be the result?—Then there must be an Assistant Military Secretary; there must be further assistance.

1124. (*Chairman.*) Do any further observations occur to you upon reading the evidence?—With respect to requisitions there is one object, namely, to keep the Commander-in-Chief well informed of what is going on, and how the deficiencies or demands have arisen, and if that was not the case he must have Reports from the regiments, or from the General Officers of regiments, with respect to the requisitions which were being made, and how they could be complied with. I understand that a great deal of that business is transferred to the Control Department; but still I think that it would be absolutely necessary that the Commander-in-Chief should be informed of these things, so as to judge of how deficiencies should be supplied and how they had arisen. But if that was not thought necessary, with a view to the issue, still he ought to have the information, because it shows whether or not any neglect is going on in the regiment or in the batteries. I think that you cannot pass him over altogether in those things.

Gen. Sir C. Yorke, G.C.B.
23 Dec., 1869.

1125. What has been suggested is, that the periodical returns received by the General Officer in Command from the troops give a very considerable amount of information of that kind, and that it might be laid down that if any requisition was not complied with, or was not properly complied with, the attention of the General Officer Commanding-in-Chief should be called to it, who could draw the attention of the Secretary of State to the matter?—I think that it is as well that he should have the earliest information, and that he should have such information before it would come to him at the end of the month in the Monthly Return.

1126. Would that point be met by a regulation that in case of improper supplies being furnished a report should be made to him at once by the General Officer Commanding?—Yes, in the case of any considerable supplies.

1127. Then you would say that all requisitions for supplies should go through the Office of the Commander-in-Chief?—I think that it should be stated that those demands had been made, and that if they had not been complied with it should also be stated, and that then the Commander-in-Chief should make a report to the Secretary of State.

1128. (*Sir Edward Lugard.*) According to the late system, requisitions made through the Quartermaster-General came on here with the recommendation of the Commander-in-Chief, and were negatived by the Secretary of State?—Yes, there was a difference of opinion.

1129. Therefore it is of very little advantage?—There is an advantage in knowing the facts.

1130. (*Chairman.*) Are you alluding to ordinary supplies, or extraordinary supplies?—Any arms or things coming from abroad

1131. Are not those things supplied under strict regulations?—Yes; but I think it desirable that the Commander-in-Chief should know the details of the matter; the information is then at hand in his office, and he can refer to it at any time when it is required. I think that there is an advantage in that, his attention may be called to any particular point, and he can get the information at once from one of the departments under his own control.

1132. Assuming that the offices were combined, might he not equally get that information from the Supply Department of the War Office?—Probably it would not be so easily got as by just sending to the next room. I think that it would be a very good thing if all the offices could be brought under one roof, on that account, and for many other reasons.

1133. (*Sir Edward Lugard.*) In case the offices were all under one roof, do you think that there might be a reduction of the work?—I do not think that there would probably be a great reduction of the work, but you will be able to judge of that point.

(The Witness withdrew.)

Major-General John Henry Lefroy, examined.

1134. (*Chairman.*) Will you be kind enough to refer to the analysis of the evidence which you gave us on the 17th of March last?—I have it.

1135. Since that time, you have had some further experience in the duties of the Director-General of Ordnance, under the Control system which has been established more fully, do you consider that the present organization is satisfactory?—I consider that the present organization is extremely unsatisfactory. The want of definite boundaries and limits of responsibility is very embarrassing, the interference of branches which ostensibly have nothing to do with technical questions, breaks down all definite responsibility. The removal of the Heads of the Manufacturing Departments from being under the direct authority of the Director of Ordnance creates difficulties on both sides in the communication which is rendered necessary by the nature of their duties. The want of communication between the Director of Ordnance and the Controller of Stores at Woolwich Arsenal leads to an immense amount of circuitous communication, and to confusion from subjects being stopped short of the proper quarter

Major-Gen. J. H. Lefroy.
23 Dec., 1869.

Major-Gen. J. H. Lefroy.

23 Dec., 1869.

in which they should be considered, or the main enquiry lost sight of in discussing some collateral question started by the way. It has led also very generally to delay, and the breaking of links in chains of communication which ought to be continuous.

1136. Have you considered what remedy could be best applied to the difficulties which you have stated?—I remain of the opinion which I expressed to the Committee when I was last examined, which is embodied in the paper which I then submitted to the Committee, namely, that the Director of Ordnance should be the Head of the Manufacturing Departments, or rather should be the Head of the Ordnance Branch, which should include the Manufacturing Departments; and in which should be conducted all correspondence relating to the *matériel* of war, whether with the Admiralty, the India Office, or any great department. The division at the present time of correspondence upon strictly analogous subjects between what was formerly the Store Branch, and is now a sub-division of the Control, and the Ordnance Branch, is productive of nothing but confusion, and is, in my opinion, a purely illogical system.

1137. Assuming that it has been decided that the provision of munitions of war should form a part of the Control Department, would the suggestion which you have made take the form of placing the Director of Ordnance at the Head of the Munitions of War Branch of the Control Department?—It would. I have drawn a species of graphical scheme which I think will enable the Committee to see at a glance the general nature of the arrangements which appear to me to be systematic and logical. In that scheme I should place under the Controller-in-Chief two divisions, namely, one Supply, and the other Ordnance. Under the Supply Division I have put transport, provisions, forage, fuel, clothing, accoutrements, cash account, pay, hospitals, purveyors, depôts and magazines, and the veterinary departments. These constitute seven divisions which I suppose to communicate with the Controller-in-Chief through the head of a Supply Department. The next, or Ordnance Branch, I propose to consist of two main divisions, namely, a division of Artillery and a division of Warlike Stores. Under the division of Artillery I propose to place armaments, proportions, patterns both for land and sea service, inventions, experiments, correspondence with the Horse Guards and the India Office, and the preparation of parliamentary papers and returns of a technical character. Under the Store division, I propose to place the departments of manufacture, Admiralty supplies reserves and stores in the usual sense, and the preparation of estimates, and Contracts. I think that if there were some such allocation of duties as this it would be found that every gentleman in the office would know his place, and would know to whom he was responsible and what he had to do, which he does not know now. There would be friendly intercourse and mutual assistance, instead of rivalry and jealousy.

1138. Under the plan which you propose, the duty of the Deputy Adjutant-General of the Royal Artillery would, I apprehend, be confined entirely to the *personnel* of the corps?—It would. I have always been strongly of opinion that that is the proper direction of the duties of the Adjutant-General of Artillery, as it was considered to be until the offices of Adjutant-General of Artillery and Director General of Artillery were, first, under a financial pressure, united in the person of Sir Alexander Dickson, about 30 years ago. Even that arrangement lasted but a few years, and the functions were separated again from his death to 1859.

1139. Then the broad division which you would make, would be that of the *personnel* and the *matériel* of the Artillery Service?—Yes.

1140. On the one hand the Deputy Adjutant-General of Artillery would have nothing to do with the *matériel*, and on the other hand the Controller in-Chief and the Director of Ordnance would have nothing to do with the *personnel*?—Yes; that is my opinion. The Adjutant-General of Artillery may advise and carry out the most vital changes in the organization of that branch of the service, such for example as the introduction of the brigade system was, in 1859, without any official communication with the Director-General. I claim for the Director-General a similar independence in his own line, reserving of course to each the privilege of friendly consultation about matters in which either may value the advice and experience of the other.

1141. Do you think that the arrangement under which, as at present, the business of the Director-General of Ordnance comes to the Parliamentary Under Secretary, and the business of the Supply Branch of the Munitions of War goes to the Controller-in-Chief, is one which answers?—I think that from the nature of the duties of the Director-General of Ordnance, he must necessarily be in direct communication with both those officers. Although it is as a rule desirable to have but one channel, yet there are matters immediately connected with supply which are not the business of the Parliamentary Under Secretary of State, and there are many semi-public questions relating to claims, inventions, and matters of that description, which are the business of the Parliamentary Under Secretary of State, and not of the Controller.

1142. Supposing that the Controller-in-Chief was a Parliamentary Officer, he would then be able to combine the two?—In that case he would combine the two.

1143. By your former answer I presume that in your opinion there are important questions which are ordinarily discussed in Parliament, and upon which Parliamentary considerations are involved to a very considerable extent?—Quite so.

1144. And upon which, perhaps, a permanent officer cannot give quite so good an opinion as a person who is connected with the Government of the day?—Yes; and he is in direct communication with the Secretary of State, who is the mouth-piece upon those matters.

1145. According to your plan, as I understand you, you would clearly place all questions relating to the armament of new works, and all questions relating to the proportion of guns and stores to be kept in garrisons, to be dealt with by the Director of Ordnance, and not by the Deputy Adjutant-General of the Royal Artillery?—Yes; the Director of Ordnance should be the sole responsible source of advice upon those subjects, having every means of obtaining advice himself from every quarter which can give it. He should be in communication with the Director of Works, and have access to the Commander-in-Chief himself.

1146. Have you read the evidence which was given before us the other day by Colonel Adye?—I have.

1147. The view which he expresses is altogether in accordance with the view which you have now expressed to us?—Yes; I agree entirely with him.

1148. He draws the same distinction, as you have drawn, between the *personnel* and the *matériel* of the Artillery Service?—Quite so; it is a broad and permanent distinction. They require different men, and a different kind of training to deal with them.

1149. Coming to the question, how the opinion of the General Officer Commanding-in-Chief is to be taken upon great questions relating to armament and fortifications, and the proportion of munitions of war which are in the hands of the Royal Artillery, do you concur with Colonel Adye in thinking that it should be by personal communication with the Director of Ordnance, and whoever is at the head of the Royal Engineer Department?—Yes; I think that the Director of Ordnance should have the same access to the Commander-in-Chief upon those subjects, as the Adjutant-General of Artillery has.

1150. So that there should not be the question of referring the opinion of the Director of Ordnance to the criticism of another officer at the Horse Guards; but the Director of Ordnance should have an opportunity of advising or consulting the General Officer Commanding-in-Chief upon the subject?—That is my opinion. He should himself personally ascertain the views of the Commander-in-Chief; explain if necessary his own; remove, if possible, objections, and either bring his submissions to the Secretary of State into harmony with the views of the Commander-in-Chief, or at least

place a clear issue before him, without the appearance of controversy with so high an authority.

1151. And whether or not that should be done by personal communication upon ordinary matters, or upon important matters by a meeting with the Head of the Engineer Department, would be a question of detail for consideration?—Quite so; the more that is done by meetings, provided that a record is kept of them, the better. Perhaps I may be allowed to say that *viva voce* discussions might, in my opinion, be employed generally more than it is; would remove many misunderstandings and shorten discussions on paper. As regards works, a more direct and responsible voice of the Artillery in the arrangement of details affecting the efficiency of that arm is loudly called for.

1152. Have you any observations to make respecting the operation of the Council, or Committee of Ordnance, which was established about a year ago by the Secretary of State for War?—I think that the Council has on the whole worked extremely well, and that it has given a great weight and authority to the decisions which have been come to. The difficulties which I foresee, are in the Council being led into technical details, which it is not exactly constituted to consider, which difficulties would be avoided by the employment of professional Committees, or Commissions, to clear up the matters of fact, or matters of professional opinion before they came to be considered by the Council. I think that the distinction which is common on the Continent between Committees which are consultative bodies, and Commissions which are executive or experimental bodies, is a very good one; and that very often, if a body of officers were constituted as a Commission,—that is to say to examine and report upon certain matters of fact, not to base any suggestion upon them at all, but merely to submit them, and if those matters of fact were then considered by a Committee,—it would facilitate matters. The difficulty with Committees which are assembled for a specific enquiry is, that not being acquainted with what has gone before, they very often open up a great deal more ground than was intended, and are led by their own professional zeal and activity to raise questions which were not intended to be referred to. I would define specifically the duties of Commissions, and would draw a distinction between the discharge of those duties and the subsequent consideration of the subjects.

1153. Will you give an illustration of a case, which in your opinion might with advantage be referred to the kind of body which you call a Commission?—The enquiry at Dartmoor as to which was best, shrapnel shells or segment shells, is an instance of the specific duty of a Commission, but the Committee went into wide questions as to the constitution of Field Artillery generally,—whether we should have howitzer batteries, whether we should retain common shells, and so on,—which was not a part of the question referred to them, although very naturally connected with it. I give this as an illustration, without at all imputing to that Committee that they exceeded their duty.

1154. (*Sir Edward Lugard.*) Could not your plan be carried out by the Council appointing a Sub-Committee?—I think that Sub-Committees of the Council, with officers associated for particular purposes, would often be very advantageous.

1155. And to report the facts?—Yes.

1156. (*Chairman.*) Speaking generally with regard to the Council, you approve of the elasticity of its organization, under which the Secretary of State for War names different officers, according as he may consider desirable, to discuss different subjects?—I approve of it very much, and I think that it has worked extremely well.

1157. And you would supplement that by special enquiries for the purpose of ascertaining facts which should then be considered by the Council?—Yes; and which would afford an opportunity of bringing, not only professional knowledge but professional feeling, into direct bearing upon questions, and thus satisfying the Service.

Major-Gen. J. H. Lefroy.

23Dec., 1869.

1158. You mean, I apprehend by that answer, that when you came to appoint officers to ascertain facts, you would associate on that Commission officers in active service in the different arms to which the question related?—Yes.

1159. Have you any observations to make, or suggestions to offer, respecting the way in which business connected with experiments has been transacted since the abolition of the Ordnance Select Committee?—I think that it would have been advantageous, by saving delay, which is often most inconvenient, if the concession had been made which I have repeatedly pressed for,—viz., that the Director-General of Ordnance should have a certain power of incurring expense without being obliged to get authority for everything. It has so happened that the number of experimental inquiries this year has been very much less than usual, and several which we expected to have had have been from one cause or another postponed. But I think that the number of Committees which have been at different times engaged has been rather inconvenient, and might easily be much more so, and that we might have different Committees coming to discordant conclusions, and that therefore a permanent nucleus, such as the Committee of Inventions was intended to be, but it has never come into operation is still desirable.

1160. With respect to the first point which you have mentioned in your last answer, namely, the discretion to be vested in the Director of Ordnance with regard to inventions and experiments, the question would be solved at once supposing that the Director of Ordnance was as you propose in your scheme, one of the Officers of the Supply Department?—Quite so.

1161. That would be so, because he would be responsible for the Experimental Vote, and would be authorized to deal with that vote within the limits of the money voted by Parliament?—Yes.

1162. And he would be responsible that his estimate was not exceeded?—Yes, and he should also be responsible that no serious undertaking was entered upon without the entire approval and knowledge of the Secretary of State for War. The delay of a few days or weeks is seldom important in these larger questions; but there are smaller ones, relating to current business, often very urgent in character, where it is obstructive and detrimental; and I hold it to be of the first importance that the Director of Ordnance should be in a position to act with promptitude, where promptitude is necessary.

1163. That responsibility would be in the first instance to the Controller-in-Chief, under whom the whole of the Supply Votes are placed?—Exactly so.

1164. With regard to the second part of your answer respecting the proposed Committee of Inventions, how would you constitute that Committee if you had now to form a Committee of that sort?—I think that the Department of the Director of Ordnance should be a little expanded in the shape of Staff, not by having more individuals but by giving those individuals a more definite position. From the want of anything else to call himself, Colonel Wray always signs himself "Staff of Director of Ordnance," but the Director of Ordnance has no Staff. Now it would be more regular if he were called Assistant Director of Ordnance, and therefore I should constitute the Department with a Deputy as it is at present, and with one or more Assistants, and perhaps Deputy Assistants, whose functions would be in direct analogy with those of all other departments. I would make the Officer who is styled Secretary, a Deputy Assistant; in fact I think that the more organic resemblance there is in the Staff, so far as it is filled up by military men, between those branches which serve under the War Office and those which serve under the Horse Guards the better it will be. This being arranged, and the Artillery Officers, civilly employed in departments, being under the authority of the Director of Ordnance, he would have no difficulty in constituting committees, with such assistance as he might from time to time obtain through the Adjutant-

Major-Gen. J. H. Lefroy.

23 Dec., 1869.

General, from the Garrison of Woolwich, the School of Gunnery, the Instructional body, and other quarters.

1165. You are now alluding to those officers who are under you at Woolwich?—Yes.

1166. Supposing that the plan which you have sketched out was carried into effect, those officers would form a portion of the Control Department (speaking generally), and therefore might not they be also put into communication with Captain Gordon, the Controller, at Woolwich, and assist him in certain portions of his duties, such as checking the demands from the Royal Artillery, and the like?—I think that they might do so with great advantage.

1167. In fact, under such a plan as that, the present division between the departments would cease, and they would be in a position of co-operation instead of in a position of *quasi* hostility?—Exactly so; the gentlemen themselves live and work together in perfect harmony, so far as personal communication is concerned, but their official relations are most ingeniously contrived to set them by the ears.

(The Witness withdrew.)

WILLIAM HENRY WHITE, Esq., examined.

William H. White, Esq.

23 Dec., 1869.

1168. (*Chairman.*) You are a first class clerk in the Department of the Accountant-General?—Yes.

1169. And you are at the head of one of the Correspondence Branches of that Department?—Yes.

1170. What is the extent of the duties under you?—I have the superintendence of correspondence on all questions of pay and allowances, and questions relating to the accounts of the Household Troops, Artillery, Engineers, and the Cavalry regiments, Colonial corps, and miscellaneous questions.

1171. I think that in the memorandum which you wrote, in July 1867, upon the Report of Lord Strathnairn's Committee, you expressed the following opinion, "At the time of the separation of the "Audit from the Account Branch of the War Office "in 1865, I ventured to express an opinion that "although a rearrangement of the duties of audit "was much needed, an absolute separation of estab- "lishment from that of the Accountant-General was "neither necessary nor advisable, considering the "intimate relation of the work of the two branches, "and the advantage to be derived from an inter- "change of duties among the clerks employed in "them, and I only refer to this now because of the "prominence which is given by the Committee to the "organization of the War Department in France, in "which, as already noticed, the departmental audit of "all military expenditure is assigned to the Accountant- "General. In any reorganization of our own establish- "ments, may it not then be worth while to consider "whether in a departure from the French system in this "respect any real improvement has been effected"?—Yes.

1172. Has your opinion been modified since the time when you made that recommendation?—Not at all.

1173. You think then that the division of the old department of the Accountant-General into two separate departments was a mistake?—Yes, in the way in which it was carried out.

1174. Will you explain, without reference at all to existing establishments, if you had to organize a Finance Branch of the War Office, what in your opinion that organization should consist of?—I should be inclined to distribute the work under three heads, and to have three sub-branches of the Finance Branch.

1175. Will you explain, generally speaking, the business which you would put under each of the three branches?—Yes; I have not seen any reason to alter the proposal which I sketched out in March 1868, viz., to make three sub-divisions of the Finance Branch, the first being called "Control," including the general Control of Finance (and embracing all the relations between the Finance Branch and the Control Branch), Parliamentary Estimates, Questions of Appeal, and in addition, the Administration of Vote 1 (Pay and Allowances), exclusive of Questions of Account. The second to include Cash Issues and Duties of Account, Record of Accounts and Correspondence on Questions of Account, and the Supervision of the Duties of Accountants. The third to comprise Audit and Examination of Claims and Accounts. The subdivision of duties among these three Sections of the Finance Branch is shown more in detail in the memorandum now handed in.

WAR OFFICE.

THE suggested Division of the Duties of the Finance Branch among three Sub-Branches may be illustrated by the following sketch of a re-distribution of all the Duties now assigned to the Account and Audit Branches, with such additional Duties now performed elsewhere as should naturally be included in the functions of the Finance Branch of the War Office.

A.

CONTROL OF FINANCE.—PAY AND ALLOWANCES.

The Duties of this Branch would comprise:—

1. Giving opinions upon all questions of Army Expenditure requiring to be referred to the Finance Branch.
2. Review of extraordinary and unauthorized Expenditure.
3. The Supervision and Direction of all Regulations bearing upon Finance (either in communication with a separate Regulation Branch, as at present established, or otherwise).
4. The preparation of the Parliamentary Estimates, and consideration of questions arising upon the allotment of Expenditure under the items, as voted.
5. A Record of the Establishments of the Army (for all Services and Departments) including the Reserve Forces.
6. Administration of Effective and Non-Effective Pay and Allowances of Staff, Regiments, and Departments of the Army, and Record of Services of Officers of the Civil Departments.*
7. Ditto, ditto, Reserve Forces.
8. Appeals from Audit Decisions not involving questions of Account.

B.

CASH AND ACCOUNT.

The Duties of this Branch would comprise:—

1. Issues of Public Money to Army Accountants and Claimants.
2. Supervision of Army Accountants.
3. Record of Accounts (Bookkeeping).
4. Compiling Annual Accounts and Balance Sheet of Army Services for Parliament (Cash and Stores), and of Manufacturing Departments.
5. Adjustment of Accounts for Military Services between Imperial and Indian Governments.
6. Supervision of Repayments for all Army Services.
7. Administration of the Estates and Issue of Effects of deceased Officers and Soldiers, and Examination and Issue of Remittances.†
8. Supervision of Revenues of War Department Property, and Rates and Taxes thereon ‡
9. Appeals from Audit Decisions involving only questions of Account.

* In the re-organization of the work of the War Office and Horse Guards, it is presumed that the Military Branch dealing with questions of Service, Promotion, Commissions, and Gazette, would not, as at present, regulate the issue of Non-Effective Pay, which would then attach to the Pay Branch. A similar course would follow in regard to Pensions, &c.

† The Correspondence connected with enquiries after living soldiers has been hitherto dealt with in the Subdivision of the War Office dealing with effects of deceased men, for convenience of reference to Muster Rolls, &c.; if possible, it should be transferred to a Military Office (that of the Adjutant-General, in which all Recruiting Records are kept).

‡ There is no present arrangement for a Central Supervision of Financial matters connected with War Department Property within the Finance Branch.

C.

AUDIT.

The Duties of this Branch would comprise :—

1. Audit and Allowance of Cash and Store Accounts, and Correspondence on Audit questions connected therewith, as follows :—

Accounts rendered by { Paymasters, Acting Paymasters, Agents, Control Officers, Staff Officers of Pensioners, and others } for Corps of Regular Army, Reserve Forces, Departments, and Establishments.

Pay and Allowances of General Staff.

Paymaster-General's Accounts for Army Services .... { Retired and Half-Pay Pensions, Superannuations, Rewards, &c.

Military Prisons.

Ordnance Survey.

Store Accounts of H.M.'s Ships.

2. Audit of Claims { For Supplies of Contractors. Travelling and Personal Claims .... } Of Officers and others.

3. Audit of Claims made on the War Office by other Departments (Cash and Store).

4. Local Audit of Accounts of Manufacturing Dapartments.

5. Audit of Accounts of Military Savings Banks, Charitable Funds, and Reserve Fund.

W. H. W.
Dec. 1869.

1176. Taking the first head, when you use the words "Control of Finance," you refer to the higher financial questions?—Yes; any questions referred to the Financial Officer for opinion.

1177. The Head of the Department would select the best men he could find in the department to assist him upon those questions?—Yes.

1178. Your first branch would be comparatively a small one, consisting of men of higher intelligence and knowledge of the department?—Yes.

1179. Why do you put estimates in that department?—Because I think that the preparation of the Parliamentary Estimates is the most important financial work in which the office is concerned, and that everything leads up to it.

1180. Then would you say, that the Estimates would be under the Accountant General, but need not necessarily be in the same branch of his Department as the Book-keeping?—Yes.

1181. Practically, at present, Mr. Knox who has the preparation of the Estimates is not in the Book-keeping Branch of the Department?—No.

1182. Estimates might be separated from Book-keeping, although under the same Department?—Yes.

1183. What is the precise meaning of giving a more definite position to the Accountant-General, what alteration would there be?—It seems to me that at present the Accountant-General holds only a subordinate position, and is not, as his designation would imply, the Chief Financial Officer. Whether the designation of "Accountant-General" should attach to the Chief Financial Officer is not, however, a matter of importance.

1184. Then do you mean, that whatever officer was put at the head of all three branches should be responsible for the conduct of the business, and should report directly, say, to the Parliamentary Under Secretary of State?—Yes. It would be a question whether, in addition to a general supervision of the three Sections of the Branch, he could personally retain the immediate charge of the Control Section, in which case he would have two assistants to carry out the business of the other two Sections.

1185. The other departments would be more of detail?—Yes, to some extent; but their duties would require very careful supervison.

1186. And whether they were divided into two, or three, would be a matter of detail?—Yes.

William H. White, Esq.

23 Dec., 1869.

1187. Will you explain what you mean by the relations between the Finance Branch and the Control Service?—It has seemed to me lately to be important to bring the Finance Branch into its proper relation to the Control Service, since it has apparently been settled that the Control Service is not to be totally independent of the Finance Branch of the War Office. I imagine therefore that, as laid down in the Treasury Correspondence upon the Control scheme, all questions involving expenditure are in some way or other to be sifted by the Finance Branch.

1188. I presume that you mean not the ordinary expenditure comprised under the Estimate for the year, but anything which involves increased expenditure, which in your view should be discussed in the Financial Department before it is decided?—Yes.

1189. You would not propose to fetter the discretion of the Control Department, with respect to expenditure coming within the Annual Estimates?—No; except that we know that the Estimates are very elastic in distribution and subdivision, and until expenditure comes under review in detail, it is not always possible to determine its proper relation to the Estimates.

1190. Do you think that a question, whether an excess occurring under one subhead of the Estimates should be met by a saving under another should be reported upon by the Financial Department?—Yes.

1191. Those are the matters on which you would bring the Finance Branch to bear upon the Supply Departments?—Yes.

1192. To go to a question of detail, as to your present duties, you now conduct the detail of the correspondence of the accounts as to certain regiments and corps?—Yes.

1193. You do not conduct the examination of those accounts?—No.

1194. That is done by the Chief Auditor?—Yes.

1195. Do you think that the present arrangements in that respect are satisfactory?—I think that the separation of business is satisfactory, but I do not think that the separation of the Branches is satisfactory. I do not think that it would be practicable to put the correspondence and the examination under one supervision. I am sure that I myself could not look after all the accounts upon which I correspond, and I do not know that any arrangement which you could make could accomplish it; the detail would take up more time than it would be possible to give to it. It would involve a subdivision of the examination of accounts of the same class among so many small rooms that a different course of action and discrepancies of practice would often ensue. That was the system in the old War Office for a long time, but when there was any pressure of current work it always broke down; the accounts had to be separated, and sent to another room to be audited apart from the correspondence. It has since been found advisable to maintain the separation of the audit work from the correspondence.

1196. On the general principle of the examination which now takes place in the War Office, do you approve of the system under which the examination of accounts is arbitrarily divided according to regiments or other similar arbitrary divisions, and by which the examiner has to go through the whole of the accounts, whatever the nature of the claim may be, or do you think that some better system of examination might be introduced. Take, for example, claims for travelling expenses—those claims are now dealt with in respect to the particular account of which they form a part; do you think that that plan is a good one, or do you think that the account should be so dealt with that claims of the same nature should be examined in one branch?—If I was initiating a system of work for the Office I should say that there should be a classification of work by subjects to a far greater extent than at present.

1197. That mode of proceeding would make rather a considerable change in the examination of accounts as

William H. White, Esq.

23 Dec., 1869.

now carried on at the War Office. Would you not have to begin by classifying vouchers?—I imagine that to a great extent that system will be necessary in carrying out the Control scheme, as the Cash accounts for that service are rendered unclassified.

1198. Do you see any insuperable difficulty in carrying out a system of examining more according to subjects than has hitherto been the case?—No: except that I think that it would be inconvenient to distribute to any extent the examination of items in regimental accounts which are at present rendered in a classified form.

1199. The travelling claims included in the regimental accounts are not very numerous, are they?—Yes; there are many claims connected with a regiment on the move (such as marching money to officers and men, charges for conveyance of baggage, &c.), which are included in the Pay List without being sent to the War Office for previous audit.

1200. If you had not allowed those claims previously they would be included in the accounts?—Yes; as question of audit they would be dealt with in the Audit Section. Under present arrangements, it is a pure matter of uncertainty whether a claim of that nature comes to the War Office in such a manner as to be pre-audited by the Accountant-General, or to be audited by the Auditor proper.

1201. The effect of that is that you may have differing decisions upon the same subjects?—Yes, that is possible, but the Audit Branch refer to the Account Branch any question of doubt in applying the Regulations.

1202. Carrying out a little further the plan which you propose, and supposing for illustration that you had a branch to deal with all travelling claims, would you have the correspondence as to those travelling claims carried on in the same branch, or would you have a separate branch for it?—I think that the mere allowance might be done as it is at present, in the same branch, leaving the correspondence upon appeals to be separately dealt with.

1203. Supposing that you had a separate branch to deal with passages, and all travelling claims under the Accountant-General's Department, would you propose that that branch should correspond upon such matters?—I think that there should be another branch to correspond respecting those claims.

1204. If a letter was written asking that such and such a claim might be allowed, do you think that it should go to the branch for examining travelling claims?—Yes.

1205. Would that branch write the answer to that letter?—Yes; if the claim was within the regulations.

1206. And if it was not within the regulations it would be referred to some superior authority?—Yes; if the Audit Branch are in doubt upon any item in an account, the question is taken up as a matter of correspondence within the Account Branch, and the decision is then acted upon in the Audit Branch.

1207. How would the correspondence be carried on?—I have not had the opportunity of considering the scheme sufficiently in detail to answer the question fully; there would doubtless be many difficulties to be encountered in bringing the scheme into working order, but they might, I think, be overcome.

1208. The principle would be that you would classify the matter more as regards subjects than is now the case?—Yes; I do not see the necessity for the division of duties upon the same subject which now takes place.

1209. A good deal of the Accountant-General's work consists in the administration of Vote 1 of the Army Estimates, does it not?—Yes.

1210. In what branch would you put that matter?—I should put it under No. 1 so far as regards any general question or questions not involving mere questions of account which would come under No. 2, or of a mere question of audit, which would come under No. 3.

1211. By the word "administration," I rather referred to questions connected with establishments?—My notion is that the senior section would control all questions of establishment.

1212. I suppose that that branch would deal with existing establishments, and would deal with proposed increases to establishments?—Yes; and that I think is one reason why you could not put the Parliamentary Estimates into any other but the First Division, because it embraces the most important questions coming under the notice of the Finance Branch.

1213. To the same branch I see that you would give questions of appeal?—Yes; some limit should be laid down as to appeals; but I think that if an appeal is persevered in, it should be in some measure dealt with independently of the branch which conveys the decision appealed against.

1214. For example, supposing that the appeal had to do with a claim which had been examined under the third branch, you would let the opinion upon that appeal be given to the Accountant-General by the first branch?—Yes.

1215. You would have the appeal go from branch No. 3 to branch No. 1, who would give their opinion upon it?—Yes; the branch conveying the original decision might be asked for an opinion whether the first view of the case was altered by any additional facts or explanations brought forward in appeal, and the case might then go on to the senior branch. I think that that would give more weight to appeals.

1216. Would the examination of claims by subjects lead to a more accurate result as regards classification of expenditure than is now the case?—Yes, I think it would.

(The Witness withdrew.)

JOHN MACLEAN, Esq., examined.

J. Maclean, Esq.

23 Dec., 1869.

1217. (*Chairman.*) What position do you hold in the War Office?—I am the First Clerk in the First Section of the Department of the Chief Auditor, and the Deputy of the Chief Auditor when he is absent.

1218. What particular Branch of the War Office is now under you?—No particular Branch. I am employed in assisting the Chief Auditor.

1219. Are you conversant generally with the duties of the Chief Auditor's Department?—I think so.

1220. Do you consider that the present division of the Finance Department of the War Office into two, is a good one or not?—I think that upon the whole it is not good. I think that it increases work considerably.

1221. Will you point out the way in which you think that it increases work?—I think that I can do so best by giving an illustration. Some years ago I had charge of the Foreign Branch of the Office so far as related to accounts, and the consideration of questions of finance. When the principle was adopted of making a division as between the discussion of finance subjects and the accounts, the correspondence, as it was called, was removed from my Branch. The new Branch was placed under Mr. Hood's direction, who was drafted from my branch, with two or three other gentlemen, who had been employed upon the duty in question, and the first thing that Mr. Hood did, I think, was to ask for three additional gentlemen to assist in the performance of the duties, and they were allowed.

1222. Then you think that the separation of the correspondence from the examination of the Foreign Accounts, has obliged more gentlemen to be employed in the duties?—Yes; when they were performed by the same gentlemen, the gentlemen had all the information at their fingers' ends, but when they were removed to another Branch, continued references had to be made, and that very often led to additional correspondence and additional labour. The mere manual part of the work was increased without reference to subsequent events.

1223. Does that observation apply equally to the examination of the Home Accounts?—Yes, it applies generally; it applies to all accounts, in my opinion. There is now a considerable transit of papers as respects the Accountant-General's Regimental Branches, upon matters which we might settle without any difficulty if we had the power. These questions are external to the regulations. There is, for example, a question as to whether a man is to have 2*d.* a-day more, or 2*d.* a day less, and some little discretion has to be exercised which we have not the power to exercise; the question goes to the Accountant-General, and he decides it, or submits for decision, but we might as well deal with it.

1224. From your statement the difficulty appears to have arisen from the separation of the correspondence from the examination?—Yes; those were the duties which were divided when the separation between the Accountant-General's Office and the Chief Auditor's took place.

1225. According to your view of the matter, the person who superintends the branch which examines the accounts is the person who knows most of the regulations under which those accounts are examined?—He ought to know as much as any one else.

1226. Are references constantly made to the examining rooms from the corresponding rooms?—Yes; daily and hourly.

1227. Does that occasion delay?—Yes: and it occasions correspondence, and the transit of papers, which is rather a heavy part of the work.

1228. From your knowledge of the Chief Auditor's Department, do you think that the same gentleman could direct the correspondence as to what is going on under his superintendence, as well as superintending the examination of the accounts?—In most cases he could; but if any difficulty arose to meet it, I would have the branches divided into two or three and if there seemed to be a large correspondence relating to that section of the business, I would have four or five branches if necessary, but generally I should say that the Head of the Audit Subdivision could consider both the correspondence and the accounts.

1229. Do you think that the present system of examining claims of different kinds, in accordance with the account in which they come, is satisfactory, or do you think that any improvement could be made?—I think that very many of the simple claims could be paid locally, and charged in the accounts, and subjected to post-audit. I think it is desirable that travelling claims should all come here for examination, because questions arising out of travelling claims are very intricate, and various decisions upon them would lead to very great difficulty. I would submit those claims to the same mind.

1230. Which is the department in this office that now deals with travelling claims?—No. 18.

1231. Is that previously to charge or afterwards?—Previously.

1232. If an appeal came upon a travelling claim, would it go to the same room?—Yes; and it would be minuted according to the facts. It would afterwards go to the Accountant-General.

1233. To what room would it go?—It would depend upon the class of officer who made the claim.

1234. Do you think that the arrangement under which claims similar in character go to different rooms is a good one?—I do not. I think that all travelling claims should be in the same hands, and be governed by the same mind.

1235. Would you apply the same answer to claims of other descriptions; for instance, take the suggestion which you made just now, that bills should be paid locally, how would you deal with them?—They are very simple,—they are for the purchase of articles on the spot, or wages, or stores for the Army. I think that all claims, say under 10*l.*, might be paid locally, but if the amount was a large one, say 500*l.* or 1,000*l.*, I think that it might be sent up here in the first instance for examination and payment. I think it very undesirable that local Accountants should have large sums of money in their hands to meet claims of that kind.

1236. Take the case of bills which were paid locally, or examined by the War Office before payment, how would you deal with the examination of those bills; would you deal with them in the room to which the account related?—I should deal with them according to the nature of the account.

1237. For instance, you would examine in one place a bill for munitions of war, and you would examine a bill for something else by a different person?—No; I think that it would be better that they should be examined by one person. When an account is rendered the *person* who has rendered it has finished with it, and the same is the case with a *Department*.

1238. For example, take the bill of a contractor for the supply of cloth at Pimlico. I presume that that bill would come to you with the signature of the examining officer at Pimlico that the cloth was according to pattern?—Yes; what we should require with regard to a claim of that kind would be a certificate that the stores had been received at the station and brought upon charge, that they were of the proper quality, and fit for the service; and reference would be made to the authority for the purchase of the stores. The Contractor would make his claim, and we should here have the means of examining it.

1239. You do not think that it would be necessary to send that bill for examination in the Control Department of this office?—No; I do not see that the Control Department would advance the matter one iota, because we must go through it afterwards. All that we want to ascertain is, that the stores have been authorized to be supplied, and are fit for the Service. In case of any extra purchase a special sanction is given. In the case of stores supplied under the Annual Estimates, such as forage, or things of that kind, the Vote and the Estimate should be quoted; and it should be shown that the stores have been purchased under some distinct authority.

1240. Then the only point upon which the Control Department could be an advantage would be to see whether the articles supplied were authorized by the annual Estimates?—Yes; in passing a claim, say for bread and meat or other stores, we should see when we passed the claim that we got the value of the money, and we should never lose sight of that supply until we saw that it had been properly disposed of for the public service; we should see that the issues had been made upon authority and according to regulation, and the officers having charge of the stores would be answerable for those stores.

1241. Is that the present practice?—Yes.

1242. (*Sir Edward Lugard.*) You have said that you consider that all travelling claims should come up here for pre-audit?—Yes.

1243. (*Chairman.*) Did your observation respecting all travelling claims being sent for examination before payment apply to claims from abroad?—No; it applied to Home Stations. Formerly, travelling claims of the Commissariat Department were paid at once and sent home for examination, because it was thought that officers ought not to be kept out of the money which they had spent for the public service; so that they were paid previously to audit, and that audit was applied to them as quickly as possible. Three or four years ago, it was ruled that those claims should not be sent home, but charged in the accounts and be subjected to audit with other vouchers. The foreign regimental claims in that case would come in the Pay List.

1244. Is not the effect a great many more rooms deal with the same class of claims?—Yes; but the Foreign claims are very different from the Home claims; there is not so much intricacy in the Foreign claims as in the Home claims.

1245. Have you had much experience with regard to the classification of accounts?—Yes.

1246. At present the accounts come from the Control Officer unclassified?—Yes.

1247. And they are classified in your Department?—Yes.

J. Maclean. Esq.

21 Dec. 1869.

1248. How long has that been going on?—For two or three years.

1249. Do you find much difficulty in doing that?—No; it is simply a question of labour and time, which I take it is all lost. I think that the accounts can be classified by the Accountant, as easily as he can render them in an unclassified form. Abroad, he must of necessity classify his payments, because a certain sum is authorized for each vote and sub-head of service which must not be exceeded. Having a certain sum to pay, he may do it in such a manner as that the account is classified. There is no additional labour at all in the classification. If the vouchers were all thrown together promiscuously and they have to be classified at the end of the month or quarter, when the account has to be rendered, it would, manifestly, cause additional labour. I think all accounts should be classified, and it must be done locally if the "Vote Charge Rook" has to be kept. In order to keep that Book Accountants must classify their payments, and we may as well have the advantage of it.

(The Witness withdrew.)

RALPH THOMPSON, Esq., examined.

R. Thompson, Esq.

23 Dec., 1869.

1250. (*Chairman.*) You are in charge of the Registry at the War Office?—Yes.

1251. You received instructions, I believe, some short time ago from the Secretary of State for War, to go to the Horse Guards with the view of arranging the establishment of a Registry at the Horse Guards, which should form part of the General Registry of the War Office?—I did.

1252. Have you had an opportunity of seeing the extent and nature of the correspondence which is carried on at the Horse Guards?—Yes. I have been carefully through all the letters received in one day in each Department.

1253. Can you give us an idea of the extent of the correspondence at the Horse Guards?—About 600 letters a-day are received in all the Military Departments there, and a few more than that number come in the shape of returns.

1254. What is the extent of the correspondence in the War Office?—About 800 to 1,000 letters a-day are registered; more are received, but they are either not of sufficient importance to be registered or are periodical returns which need no registration.

1255. What proportion of the correspondence at the Horse Guards is inter-departmental?—About one-sixth of it,

1256. Do you mean between the Horse Guards and the War Office, or between the Departments at the Horse Guards?—Between the Horse Guards and the War Office, and between the Departments at the Horse Guards.

1257. Do you think that it is possible to incorporate the correspondence at the Horse Guards with that at the War Office?—Yes, I see no difficulty in it.

1258. What result would follow from such an incorporation?—First of all that portion of the correspondence which you have described as "inter-departmental" would cease. The original papers would be sent from branch to branch with questions put, and those questions would be answered on the papers themselves. There would be a still further saving arising out of such a concentration of records, as the duplicate reports which are sometimes sent to different Departments of the Horse Guards upon the same service would become unnecessary. For instance, if a letter is written from a regiment to the War Office on a supply subject a duplicate of that letter is sent to the Horse Guards; and duplicates of letters on important subjects from General Officers commanding abroad to the Secretary of State are also sent to the Commander-in-Chief.

1259. Do you mean that if a letter is sent from an Officer Commanding a Regiment, to the War Office, about supplies, a copy of it is sent to the Horse Guards?—Yes.

1260. In point of fact all store letters come in duplicate?—Yes.

1261. And, therefore, the saving of business which was anticipated by the establishment of the Control System is not carried out?—I can hardly say how far that has come into operation. The Equipment Warrant is not yet issued, and a good deal of the regimental supply business comes to this office and to the Horse Guards, which will be done locally.

1262. If there was one Registry there would be no difficulty in all branches referring to it?—Not the least.

1263. Can you give an idea whether any reduction in the number of clerks employed in the two departments—Horse Guards and War Office—would be effected by the establishment of a common Registry for the War Office and the Horse Guards?—I cannot give a numerical estimate, but the reduction would be very considerable.

1264. The work which is created at the Horse Guards is also created at the War Office in writing the letters?—Yes.

1265. All of which would be avoided if no letters passed between the Departments?—Just so.

1266. If the correspondence was in one Registry, would it enable the Secretary of State to have more general knowledge than he now possesses of important matters coming to the Military Branch of War Office?—Certainly.

1267. You have, I think, for some little time kept in your Department a record of important correspondence as it has arrived, which has gone either to the Secretary of State, or the Under Secretary, or the proper Department?—Yes.

1268. Would there be any difficulty in having a written record of all the important correspondence which arrives every morning for the information of the Secretary of State, and the principal Heads of Departments?—None whatever.

1269. In that case, on the one hand the General Officer Commanding-in-Chief would know anything which arrived connected with the other Departments, and the other Departments would know anything which arrived connected with the Military Department?—Yes.

1270. And, therefore, no news of importance could arrive without the Secretary of State being acquainted with it?—No.

(The Witness withdrew.)

Adjourned.

Monday, January 10th, 1870.

PRESENT:

The Right Hon. Lord NORTHBROOK *in the Chair.*
Lieut.-General Sir EDWARD LUGARD, G.C.B.
The Right Hon. JAMES STANSFELD, M.P.
WILLIAM GEORGE ANDERSON, Esq.

His Royal Highness the FIELD-MARSHAL COMMANDING-IN-CHIEF, examined.

H. R. H. the F.-M. Com.-in-Chief.
10 Jan. 1870.

1271. (*Chairman.*) Your Royal Highness is Field-Marshal Commanding-in-Chief?—I am.

1272. Since what time?—Since 1856.

1273. Your Royal Highness has seen the evidence which we have taken?—I believe that I have read every word of it.

1274. The business which is transacted by your Royal Highness relates to the Command of the Forces, the Discipline of the Forces, and to Appointments and Promotions?—Yes.

1275. Your Royal Highness also exercises the function of Chief Military Adviser to the Secretary of State for War?—Yes.

1276. I need scarcely ask your Royal Highness whether you agree with the opinion of the Committee of the House of Commons upon Military Organization, over which Sir James Graham presided in 1860, and also with that expressed by Sir Charles Yorke, by the Adjutant-General, the Quartermaster-General, and the Military Secretary, who were examined before us,—that it would facilitate the transaction of business if the War Office and the Horse Guards were under the same roof?—I think that it would do so very considerably. In fact it was so up to the time when the office of Master-General and the Board of Ordnance were done away with. The Secretary at War at that time, and the Commander-in-Chief, were under one roof. When the office of Master-General of the Ordnance was done away with, of course it was impossible to find room for the whole of the two Departments combined, and the Secretary at War went to the buildings occupied by the Ordnance Office in Pall Mall, and took up his residence there. That was before I came to the Horse Guards, but that was the way in which the change took place. I think that so long as the two offices cannot be under the same roof it would not be desirable to merge the Horse Guards and the War Office, as it is essential that there should be a distinct command on the part of the Horse Guards, which can only be arranged satisfactorily in an enlargement of the present Horse Guards or in a new building. I think that it would be very desirable to arrange that the Military Command should be on one side of the present Horse Guards, whilst the Secretary of State's Office, with the Financial Departments, should be on the other, with a general communication connecting the two offices, each having a separate entrance.

1277. It appears from the evidence which we have received, that the different departments of the Horse Guards correspond with each other. Does your Royal Highness think that that system could be altered?—Yes; I think that it would be better to modify the present system in this respect. For the purpose of ensuring that every department should know what was going on, it has been customary to let each department concerned have a copy of whatever letter or paper has been written upon any particular subject; but I think it very possible, and perhaps desirable, and certainly it would reduce correspondence, if there was only one paper kept, whether in a registry office or in the branch of the office more immediately connected with the subject to which a reference could be made at all times from the other branches.

1278. It also appears from the evidence that very considerable correspondence takes place between the Horse Guards and the War Office?—Yes.

1279. Does your Royal Highness think that any alteration might be made in that respect?—There is no doubt about it. I see no reason why you could not do so at once, because whether a communication goes from here to the War Office in the shape of a minute, or in the shape of a letter, is quite immaterial. I think that that is not a question of locality. I think that you might effect that alteration at once, even under present circumstances.

1280. Could a system of registry be adopted which would make it possible to communicate by means of minutes?—I am sure that it could. Mr. Thompson, I believe, has investigated the subject, and a Committee have gone into the question, and a report has been drawn up by Colonel Egerton and other gentlemen who met Mr. Thompson. I think that there would be no difficulty in the matter. It is premised that the registration should be a general one for the War Office and for the Horse Guards. I think that the same system of registry should exist, but that it would be just as well to have a registry for the military branch by itself, which could be done, and I think that you would have the whole system worked better in this manner, because there are many papers which we have which would not be required by the financial authorities, and *vice versâ*. I think that it would simplify business if you kept the papers separate, but at the same time I think that one general registry could be kept if it was wished. There is one point upon which I should desire to make an observation; I should be very sorry if there was any change in the system of working my office, in which the work is done from the top downwards, whilst in the War Office the business is worked upwards. I should not like to see that system adopted here. Here all papers go to the Heads of Departments, and any information which is wanted is obtained from the subordinates. In the War Office, as far as I understand the system, the papers go to some sub-department and are worked upwards, and I think that it is a much better plan to work from upwards down than from downwards up.

(*Sir Edward Lugard.*) We have broken through that system a great deal.

(*The Duke of Cambridge.*) Supposing that there is a paper of the Adjutant-General, he asks for information upon it from any gentleman in his office, but if such paper went first to a subordinate officer, opinions would be given upon it from below; whereas I think that the opinions should come from above, and that the department below should only be expected to afford information which is almost mechanical, and which cannot be obtained without great loss of time by an individual in a high position, but which can readily be acquired by a subordinate. All those points which require information are thus collected, before a decision is arrived at. That is my view of the mode in which business should be done.

1281. (*Chairman.*) Then I am to understand you Royal Highness that these arrangements are now contemplated?—The arrangements, I believe, are contemplated by the Secretary of State, and as far as I am concerned I am perfectly satisfied with them. I think that they are very good arrangements.

1282. And when completed your Royal Highness would give orders to the Heads of the Military Departments without any correspondence passing?—Certainly; there is no difficulty about it; we could do it at any moment; in fact we have done it at present. There is a certain amount of business, however, the Com-

H. R. H. the F.-M. Com.-in-Chief.

10 Jan. 187

mander-in-Chief's confidential business, which could not be registered.

1283. In the same way, when any matter arises upon which the Secretary of State wishes to receive your Royal Highness's advice as his chief military adviser, that advice would be communicated in the way of a minute instead of a letter?—Quite so; it is just as easy to do it in one way as the other.

1284. Did your Royal Highness agree with the recommendations of Lord Strathnairn's Committee, as to the consolidation of the Transport and Supply Departments of the Army into one Department, which is now called the Control Department?—I agree with it to the extent of the new Control Department being the great department of stores and supplies; but if it is to take military functions, which hitherto have been performed to a great extent by the Quartermaster-General's Department, I dissent from it. When this question was first discussed in the House of Lords I made some observations upon it, and I said that I entirely approved of the principle, provided that it was kept within due bounds, that is to say Store and Supply; but that I was afraid that it might lead to infringing upon Military duties, and that if that was the case I should very much regret the contemplated change. Lord Longford was then, I think, Under Secretary, and he, in reply, said that that would be most carefully guarded against. I dare say that it was intended that it should be so, but my impression is that the Control Department is trenching very much more upon the military branches than is desirable; and the result is that the Commander-in-Chief is now kept in ignorance of many subjects which he ought to be cognizant of, and which he did know of before. The reason why this occurs can be easily explained. Nothing can happen in this department which is not known to the Secretary of State, because everything is connected with finance, which must therefore have the concurrence of the War Office, whereas things may constantly be sent to, and decided by, the War Office, of which the Commander-in-Chief knows nothing. The tendency now is that things shall go direct to the War Office. There is the evidence of Sir William Power; he distinctly said that all these things need not be known to the Commander-in-Chief. I take the greatest possible exception to that view, because I look upon the Commander-in-Chief as the person who is responsible, and as the person who is to look after the interests of the soldier; whereas, of course, the Secretary of State looks after the financial portion of all these questions, and exercises a general superintendence over the whole. The Control Officer has nothing to do with the Commander-in-Chief; he gives no information of any sort or kind to the Commander-in-Chief, whereas, of course, he gives every information to the Secretary of State, which is quite right; but if he does so, the Commander-in-Chief ought to know it too. As business has hitherto been conducted, I have been fully informed of everything that was going on. Supposing that a General Officer in a particular district takes one view of a question that may arise, and that another officer in another district takes another view, they are sent to the War Office, and the Commander-in-Chief does not know what is going on; he cannot, therefore, say to the Secretary of State, "You had "better not agree to what this General Officer and this "Controller says, and you had better agree to what "that General Officer says"; if he does not know what is going on he cannot give any advice at all, therefore he can only be called in when difficulties arise. I think that ought not to be so, and that such a state of things would be avoided if the Commander-in-Chief knew what was going on, which I am afraid he does not always do now. I am now talking of barrack arrangements connected with Control questions and things of that sort.

1285. As I understand your Royal Highness, the observations which you have made would refer, not to the ordinary requisitions for supplies, but to any exceptional or peculiar requisitions?—Yes. As to the re-appropriation of barracks, for instance, it is said that it is sufficient to have the decision of the local authority, but the Commander-in-Chief would not know what was going on at Portsmouth, or Dover, or Aldershot, in that case, not having been consulted, and he might find that all sorts of things had taken place upon authority of which he had never heard anything, and which perhaps he would not advise the Secretary of State to agree to or sanction; there is no check upon that now whatever.

1286. Am I right in dividing the business into two parts; first the ordinary requisitions for supplies under regulation; and, secondly, exceptional requisitions?—Yes.

1287. Am I right in assuming that there is no objection that ordinary requisitions for supplies should go direct to the Control Officers?—I have no objection to it, provided that whenever there is any deviation from supplies being granted, a communication should come to me in some shape, showing that there has been some neglect in a particular quarter, and then I am able to come forward and state, "You had better "take care that those supplies are granted at once, "because they ought to have been granted long ago."

1288. The Monthly Returns would give your Royal Highness this information?—Yes.

1289. And if, in addition to that, in case of supplies being improperly furnished, or of delay, a communication was to be addressed to the General Officer Commanding-in-Chief as well as to the Control Department, it would give your Royal Highness immediate information?—As far as the Supply Department goes I think that there is no doubt about it. Supposing that a regiment requires clothing, and that clothing is not granted, or that there is some delay, or that something goes wrong so that it is not sent as it should be, and that a demand is again made for it to the Control Department, a duplicate should come to the Horse Guards, or an intimation should come to the Adjutant-General that such and such things have not been supplied, and that therefore it is necessary to make some remonstrance, and the remonstrance made to the Horse Guards would of course be immediately noted to the War Office.

1290. (*Mr. Stansfeld.*) Am I correct in inferring that it is now quite in your Royal Highness's power, as Commander-in-Chief, to issue regulations or instructions to the Generals in command at various stations to communicate in those cases with the Horse Guards?—The last regulations to which Lord Northbrook has alluded, as I understand, were put forward to meet the very case which I am discussing, but formerly all the supplies used to be demanded through the Horse Guards. Then if there were any delay or irregularity in supplying (which constantly happened), we knew it, and a letter was written by my orders to say that it was very irregular that such and such a regiment had not had its supplies, though it had been waiting for them for two or three months. That was a very great check upon the Supply Department, and they had to give a reason why the supply had not been furnished. Now, unless there is some regulation, such as we are discussing, that check entirely disappears, and there might be the greatest delay, and yet we should have no power of being of use to the troops.

1291. But there is no practical difficulty in issuing instructions by which your Royal Highness shall receive information at the proper time?—There is no difficulty if such a regulation be issued.

1292. (*Chairman.*) We have received evidence respecting the present system of the re-appropriation of barracks, which shows that it is not now in a satisfactory state. We shall be glad to have precisely from your Royal Highness what part of the business your Royal Highness thinks should pass through the Horse Guards. I presume that every small detail need not so pass?—Not every small detail, but I think that no re-appropriation of barracks should be made without its being known to the Commander-in-Chief, because I I think that it would be of great use to the Secretary of State. I think that it is the joint action of the two which would be so valuable. I think that the combination of the two would really produce more economy than if you left

H. R. H. the F.-M. Com.-in-Chief.

10 Jan. 1870.

it all on one side. I think that it is very desirable that the Control Officer should be directed to have the most unreserved intercourse with the Officers of the Staff as well as with the General. I think that the Officers of the Staff and the Control Officer should be encouraged to come and see the General together, and then he would hear what both sides had to say, and the General would get at the bottom of what was wanted. Whereas, if he sees the Control Officer by himself, and he takes a very decided line, and if he then sees the Adjutant-General, or the Quartermaster-General, and they take a decided line in a different sense, it is very perplexing to the General Officer, and he hardly knows how to act. I think that this intercourse would tend to the greatest harmony, whereas at present I do not believe this to be the mode of conducting business, and it results that the departments do not act together as harmoniously as they ought to do.

1293. Is there any regulation which prevents the General Officer seeing the Control Officer and his Military Staff together?—No; but the tendency is to keep the Military and Control Departments too much separated.

1294. Does your Royal Highness mean simply that there should be communications between the Controller, the Military Staff, and the General; or does your Royal Highness think that the Controller should be put under the Military Staff?—I would let them all be on an equality, but I want them to have mutual intercourse, and that is now not carried on, as I think it ought to be. I do not know why it is, but I have understood that it was because such a wish was expressed. There is no regulation to that effect. General Officers, I believe, generally see their Controllers alone, and not with the other Officers of their Staff.

1295. To go back to barrack re-appropriations, your Royal Highness's view would be that, as the re-appropriation of barracks involves re-distribution to some extent, and military organization of the troops, military opinion upon them is essential?—Yes, I think so. It is said that the General is to be responsible for everything; but the General has so many things to attend to, that the advantage of having the Military Staff to assist him is absolutely necessary, and encouragement should therefore be given to his having this assistance from his Staff Officers.

1296. Besides the military point of view, which is essential when you come to deal with any large question of re-appropriating barracks, there would also be two different financial views, one the expense of the alterations, &c., to the building, and the other the effect of the re-appropriation upon certain services, such as fuel, light, and the lodging list?—Certainly. I think that that is quite the right view.

1297. Would it be correct that, in respect to the local consideration of re-appropriations, a Control Officer sould be in the place of the Barrackmaster on the Board?—Just so.

1298. It is hardly necessary to ask your Royal Highness, after your observations upon the Control system, whether you agree in the opinion that the establishment of this system has had the effect of giving great additional power to the Horse Guards?—I think that it may have had the effect of giving a great deal of power to the local officers, but certainly not to the Horse Guards. The Commander-in-Chief, from the variety of subjects which, under the new system, he does not know, cannot be of as much use as formerly to the Secretary of State; and as it is essential that the Controller-in-Chief should know everything that is going on in connection with his office, so as to advise the Secretary of State, I think that it is just as essential that the Commander-in-Chief should know what is going on as regards the military portion of the question, and should be able to assist the Secretary of State in those questions when they arise from day to day.

1299. Are there any other observations which your Royal Highness would like to make with respect to the Control Department?—I think that Sir William Power says that although the Sea Transport has not yet been taken out of the hands of the Quartermaster-General, it should be taken out of the hands of the Quartermaster-General. I think that that is a great mistake, and I do not see the object of such a change. I think that the Control Department should have to furnish the Transport; but what I am afraid of in war is, that if the Control Department takes all these functions upon it which have been hitherto undertaken by the Quartermaster-General's Department, it will have so much to do that it must break down, and therefore I think that it is a very dangerous thing to throw upon it more than it has now got. I think that if you give it more than the Store Supply, and the Transport Supply, the Control Officers must break down under the extent of their charge.

1300. What division of business would your Royal Highness suggest?—I think that the fitting of transport ships, and so on, should all be with the Quartermaster-General. It is so important a duty that we have a special Transport Board to perform it. Admiral Mends is at the head of this Board, with an officer of the Quartermaster-General's Department to assist him. Those two together make all the arrangements for the sea passage of troops, and I am quite convinced that the Control Officer would not perform the duty so efficiently for the comfort of the troops as it would be done by a military officer

1301. At present the sea transport is carried out by the Admiralty, and not by the War Office?—Yes; but there is a Quartermaster-General's officer to assist in the duty. I would leave all that with the Quartermaster-General and the Admiralty combined.

1302. We have received evidence that business which comes from General Officers Commanding abroad, and business which comes from General Officers commanding Districts at home, is transacted in a different way. Can your Royal Highness explain in what that difference consists?—Certain powers are generally granted to General Officers stationed abroad, which it is not necessary, or expedient, to give to General Officers stationed at home. The system is, that there are a good many questions from abroad which go direct to the Secretary of State, whereas at home they pass through the Commander-in Chief. Now, there is an obvious reason why that should be so. The Commander-in-Chief is in a double position at home. Just as Sir William Mansfield, for instance, commands the troops in India, so the Commander-in-Chief commands the troops at home, as well as being the Commander in-Chief of the Army. If every district General at home had the same direct intercourse with the Secretary of State as the General Officers have serving abroad, the Commander-in-Chief would be kept in ignorance of what was going on in the Home Districts: and as troops were moved from one district to another every day, great inconvenience would result from not knowing what was going on in the several districts; therefore it is necessary that everything should go to the Commander-in-Chief at home from all the districts, including Ireland, for Ireland is no longer to be a separate command. Ireland in the same way will have to report to the Commander-in-Chief's Office, otherwise you would have to continue the Commander-in-Chief in Ireland, independent of the Commander-in-Chief in England. If the Commander-in-Chief is to conduct the actual command of the troops at home, he must know everything that is going on at the home stations; and therefore it is essential that the Commander-in-Chief should be looked upon in a double capacity in that respect, as Commander-in-Chief of the Army, and as commanding the troops at home.

1303. In the case of Ireland, at the present time, the same business which would come to the Horse Guards in England would go to Lord Strathnairn?—Yes; at present there are districts in Ireland; everything is reported to Dublin, and from Dublin it comes over to the Secretary of State. From Portsmouth, and Plymouth, and other districts in Great Britain, it would come to me, and from me it goes to

H. R. H. the F.-M. Com.-in-Chief.

10 Jan. 187 .

the Secretary of State; and when you do away with the Commander-in-Chief in Ireland—which I believe is intended—the Irish districts ought to report to me in the same manner upon all military subjects.

1304. Does your Royal Highness concur in the proposal that England should be divided into districts, and that the Reserve Forces for the purposes of inspection and training, should be placed more under the General Officers commanding Districts?—I have no objection to that arrangement. When the reserve forces are in a disembodied state, the dealings of the Lords-Lieutenant would be with the Secretary of State. I presume that the authority of the Commander-in-Chief would only come into operation when the reserve forces are under training as military bodies.

1305. The question of the Reserve Forces has lately taken a position of some importance. Your Royal Highness is of course aware that the strength of the Reserve Forces is now very large in comparison with the Regular Forces; it is more than 300,000, whereas the Regular Forces in Great Britain are hardly 100,000?—Yes.

1306. Does your Royal Highness think that the opinion of the Officer Commanding-in-Chief, as the chief military adviser of the Secretary of State, should be given upon such questions?—Yes; but of course retaining the position of some officer, who would be especially responsible for those Forces; an Inspector-General, in fact, as at present.

1307. Is the Topographical Department under your Royal Highness at present?—No.

1308. Have you any observations to make upon that Department?—I have always thought that it ought to be under the Commander-in-Chief. Sir Henry James, who has charge at present, has the Survey Department at Southampton, whilst the Topographical Department is in London; the Topographical Department is at Spring Gardens, though it is under Sir Henry James, who is a most efficient officer, but stationed at Southampton.

1309. With respect to the business of the Military Secretary, does your Royal Highness agree with the description of the office, given by Sir Charles Yorke, in answer to question 1092?—Yes; I think that a considerable amount of confusion has arisen from the term "Military Secretary" being the only term used in all this evidence. I have no doubt that it was never contemplated that an erroneous impression should be given on that subject, because it is quite understood in my office; but it is not correct to say the "Military Secretary's Office." If you substitute "the Commander-in-Chief's Office" for "the Military Secretary's," a great deal of this confusion will disappear. The Military Secretary has a double office; he is a personal officer of the Commander-in-Chief, but he has specific duties, such as the Promotions, and the Patronage of the Army, under his more immediate jurisdiction, and therefore he is acknowledged as a public officer, though at the same time he is the Chef de Bureau of the Commander-in-Chief. His office is the Commander-in-Chief's Office, and the clerks in his office are the Commander-in-Chief's Clerks, and that is the reason why a great deal of business goes to the Military Secretary, with which he would otherwise have nothing to do. The Military Secretary merely collects the business for the Commander-in-Chief, just as the Private Secretary at the War Office does for the Secretary of State. I imagine that a great deal of the business there goes to the Private Secretary, and is by him laid before the Secretary of State, and that is the reason why many things go to the Military Secretary which otherwise he would have nothing to do with; but it is sent to him for the information of the Commander-in-Chief, and the Military Secretary merely opens the letters, and reads the correspondence and prepares the business for the Commander-in-Chief, and when the Commander-in Chief comes he lays it before him, and therefore he acts merely as the Chef de Bureau of the Commander-in-Chief; while at the same time he has specific duties to perform as Military Secretary. I think that great confusion has arisen in this evidence on that ground, and that the matter has not been sufficiently defined by the witnesses who have given evidence, and who, whilst themselves thoroughly understanding the relative business of the various branches, have looked upon him merely as the Military Secretary, whereas he really ought to be considered as the Chief Officer of the Commander-in-Chief.

1310. Then we should be right in considering that, excepting as regards appointments and promotions, the duties of the Military Secretary are purely ministerial?—Yes.

1311. He does not interfere with the functions of the Adjutant-General, or with those of the other departments of the Horse Guards?—Certainly not; it is the Commander-in-Chief who does that, and the Military Secretary is merely the amanuensis of the Commander-in-Chief, who takes his orders from the Commander-in-Chief; no orders are given upon any subject except by the Commander-in-Chief. Even the Adjutant General can give no order without the sanction of the Commander-in-Chief. The Adjutant-General is the only man who issues the orders to the Army, but it is under the authority of the Commander-in-Chief. On that point I might turn to the evidence of Lord William Paulet, which will elucidate what I mean. He says, in answer to Question No. 135, that he takes great exception to the General Courts-Martial coming to the Military Secretary. They come to the Commander-in-Chief; they are actually directed to the Commander-in-Chief. A General Court-Martial is only known to the Judge Advocate-General, to whom it goes, and who submits to Her Majesty, who takes the advice of the Judge-Advocate as to the legal question. Then the Judge-Advocate sends all General Courts-Martial direct to the Commander-in-Chief, and the Military Secretary merely opens the communication as a letter coming to the Commander-in Chief, and he gives it to the Commander-in-Chief. Upon that, if there is any point of discipline which the Commander-in-Chief thinks requires elucidation, he sends to the Adjutant-General, and asks for his opinion upon the point. The Commander-in-Chief then advises Her Majesty whether or not to carry out the sentence which has been pronounced legal by the Judge-Advocate; and after that process is gone through the Adjutant-General is informed that there has been a General Court-Martial, and that such is the finding, and that such is the sentence. Upon that, various letters have to be written, signed by myself, to the Judges and Secretaries of State, to carry out penal servitude, and that produces a large amount of business in my office, but it is the personal business of the Commander-in-Chief, and is therefore in the Commander-in-Chief's office. That business must necessarily be undertaken by the Commander-in-Chief. I sign all those letters myself.

1312. In respect to any case of discipline which arises, and which your Royal Highness has to consider, the Adjutant-General, and not the Military Secretary, would be your natural adviser?—That would entirely depend upon myself. If the matter was any question affecting the discipline of the Army I should of course consult the Adjutant-General; but I may consult anybody that I like; I may go to the Legal Officer and consult him; it is only to enable me to form my opinion. Supposing that I have a difficult question to decide upon, I may ask any person who is conversant with such a subject to advise me upon it; but it is a duty which rests entirely with myself. The Military Secretary merely opens the letter.

1313. The legal point would be for the Judge-Advocate-General?—Yes; we have no difficulty in that way. The Judge-Advocate gives his opinion upon the legal point, and therefore when it comes to me I know whether the sentence is a legal sentence or not. It is then only a question of military policy whether the sentence should be carried out or not, and that depends upon me, and when it comes to me I say, "This is "right, and must be carried out," or I say, "You had "better remit a portion of the sentence"; or I say, "This will not do, it will have a bad effect upon the

"Army, and therefore I advise Her Majesty to show "leniency." In that way my advice is asked for and in no other; and therefore there is no necessity to consult anybody, but it frequently occurs that it may be expedient to take further opinion, in which case I should send for the Adjutant-General and consult with him, but he is not an acknowledged person, and nobody is acknowledged in the matter but myself. As the business is rather heavy I sometimes ask the Military Secretary to assist me in going through the work, but the responsibility rests entirely with myself, and if there is anything peculiar which I have to consider, I either judge of it myself or send for the Adjutant-General. That is the way in which the thing is dealt with, and I think most fairly. On questions connected with the Militia or Volunteers, the Commander-in-Chief is asked by the Secretary of State to appoint an officer to inspect either Militia or Volunteers, and the letter comes to the Military Secretary, but is in fact a letter to the Commander-in-Chief, and the Commander-in-Chief gives his orders, and the Adjutant-General carries them out. That again is not the Military Secretary's business, but it is the business of the Commander-in-Chief. When you examine what has been stated I think that you will see that there has been some confusion as to the duties of the Military Secretary. In order to facilitate matters, I believe that of late in certain matters of routine there has been a direct intercourse between the Adjutant-General and the Quartermaster-General and the War Office, but there is no acknowledged intercourse excepting between the Under Secretaries and the Commander-in-Chief, through his Military Secretary, because nobody gives orders except the Commander in-Chief, and consequently all business must pass through my office to be laid before me for my decision. The Commander-in-Chief gives his orders to his subordinates. That is, therefore, the reason why they have not been allowed to correspond with the War Office, and I think that it is right. It is impossible to command an army without being conversant with the smaller details. Look at the dispatches of the Duke of Wellington. When the most important questions were going on he would write a long despatch upon what appeared to be a small matter of detail, showing how essential it was to look into these small details, and it is impossible for the Commander-in-Chief to be kept *au courant*, and to be of real use unless he knows everything, and he can only know everything by its coming to his office. I am anxious to explain this very clearly, for I think that the matter should be thoroughly understood.

1314. Then are we to understand your Royal Highness to object to any communication going from the Horse Guards, unless your Royal Highness has seen it?—Yes; excepting upon small matters of routine, such as clothing, if they are by regulation, but if there is the slightest deviation from regulation, even to a button, or if there is a change of pattern, it must come to me first, or otherwise I cannot be responsible. Up to this time I have been responsible for everything, but if one part of this office is to act independently of the other, I shall not know what is going on, and then I cannot be responsible.

1315. We have it in evidence that at the present time the Adjutant-General, the Quartermaster-General, the Deputy Adjutant-General of the Royal Artillery, and the Deputy Adjutant-General of the Royal Engineers, correspond with and send papers to the War Office?—Yes; but only on routine business; I have no objection to that because I believe that it simplifies business, and therefore I have willingly agreed to the arrangement, but all the main points must come to my office, or it is utterly impossible that I can know what is going on.

1316. Should I be putting the matter correctly if I said that in your Royal Highness's position, as being the Head of the Military Branch of the office, any matter of importance dealt with in any of the sub-departments into which that branch is divided would naturally come to you before it was decided?—Yes.

1317. But matters of detail would not do so?—Not ordinary matters of detail, but anything special would have to be first submitted to me.

H. R. H. the F.-M. Com.-in-Chief.

10 Jan. 1870.

1318. And as a matter of convenience in the office, those papers of importance which have to come to your Royal Highness, come to the Military Secretary somewhat in the same way as papers come to the Private Secretary of the Secretary of State—Yes.

1319. But you do not put the Military Secretary in any way into the position of doing that business?—No.

1320. The business is divided into departments?—Yes.

1321. With which the Military Secretary has no concern?—Just so; it merely passes through his hand as my penman, or my mouth-piece, if it is done verbally, but it is generally done by note.

1322. (*Mr. Stansfeld.*) I understand your Royal Highness to say that business connected with other departments than that of the Military Secretary, and communications from other departments in the Horse Guards to the War Office, would not necessarily come to your knowledge as Commander-in-Chief?—Not if they acted independently.

1323. What I fail to understand is this; is not the whole of the Horse Guards a department, and an office of the Commander-in-Chief, and in what respect would not your Royal Highness be as much informed of business transacted in the Adjutant-General's Department, as in the Military Secretary's Department?—Because I think that if you have but one office, namely, the Commander-in-Chief's, to which everything goes, there can be no doubt that everything comes to the Commander-in-Chief. If you let these different offices, though they are completely under the Commander-in-Chief, act independently, it is quite possible that some details might be overlooked under the pressure of business, and might not come before me at all. Nothing goes out of my office of any sort or kind which has not been seen by me, but as there is a great deal of executive duty, and as there are a great many orders for the transfer of men, for instance, and a good many other routine details which are under my authority, but which are conducted by these departments, I am afraid that at times of pressure subjects might not be brought to my notice if there was much direct intercourse between those offices and any other office outside this building. Upon all the questions of clothing, we have an officer in this office who manages the minute details of clothing, the furnishing of clothing, and the passing of clothing, between this office and Pall Mall; those are ordinary routine matters which go directly, and I do not object to it so long as nothing is originated without my sanction. But if a great latitude were given in that direction, I think that you would find a great many things creeping in which would be unknown to the Commander-in-Chief, and which are now known to him. There is another arrangement by which a great deal of time is saved. The Military Secretary prepares all the business for the Commander-in-Chief; questions arise partly belonging to the Quartermaster-General, and partly belonging to the Adjutant-General. When I come to the office the subject is laid before me, and I see the Adjutant-General and the Quartermaster-General personally upon the subject as they are questions affecting them. The Military Secretary does not interfere at all further than preparing the work for me. I am now speaking of business in which joint action is necessary, and in these cases the Chef de Bureau of the Commander-in-Chief lays the papers before him. Upon any question of pure discipline, or equipment, or drill and organization, the Adjutant-General sees me, invariably. I see the Adjutant-General every day, and I see the Quartermaster-General every day, and I see the Deputy Adjutant-General of Engineers, and the Deputy Adjutant-General of Artillery every day; and yet there are certain questions which go to my office from them in order to prepare the work for me when I come down. Lord William Paulet, in his evidence, also refers to the issue of passages to officers. In consequence of

H. R. H. the F.-M. Com.-in-Chief.

10 Jan. 1870.

the evidence given upon that point, I thought it judicious to see whether we could simplify that matter, and there was a meeting of the three departments at the Horse Guards to go into that point, and I think that a gentleman came over from the War Office to see what he thought of it, and they all agreed that it was impossible to simplify the matter more than we do now, and for this reason: an officer is ordered out; that officer may have exchanged, or he may have been promoted; that is a question entirely with the Military Secretary, the Adjutant-General knows nothing of these details, and the circumstances under which they took place. Unless the Adjutant-General consults with the Military Secretary he may be recommending an officer for a passage to which he is not entitled, because the question of being entitled to a passage, or not, depends upon a variety of contingencies which may have arisen since that officer has come home. For instance, in an exchange, he would not be entitled to a passage. The Adjutant-General only says that A, B, or C, is to go out; he cannot speak decidedly as to who is to defray the passage without referring to the Military Secretary. If it is a simple case it is easily arranged, but if it is not (which nine cases out of ten are not), there are a variety of financial questions arising which can only be settled between the various officers at the head of departments. Therefore, though it seems to be a simple thing to say that A, B, or C, is to go to Japan, or China, it is not so simple to decide upon how the passage is to be defrayed as this depends upon the concomitant circumstances.

1324. (*Chairman.*) With respect to the general business of the Adjutant-General, we have received very little evidence, and in point of fact very few questions have come before us with respect to the general business of the office; but one question has come before us, namely, whether the business of Recruiting and Discharge should be combined under one office. What is your Royal Highness's opinion on that point?—I think that Discharge is so completely a matter for the Adjutant-General to deal with, that I think a change is undesirable. You would not save anything by a transfer of those duties, and I think you had better leave them with the Adjutant-General. No man can be discharged without some questions arising as to his conduct, or the establishment of the Army, or something of that sort; and I am quite certain that constant reference would always have to be made to the Adjutant-General, and I think that that business had better be left with him.

1325. The Recruiting Division is now under the Adjutant-General?—Yes. It is directly under him, but as a branch, and the Discharge is a part of the Adjutant-General's business.

1326. We have considered the Recruiting as one of the sub-divisions.—Yes; but at the same time all questions connected with Discharge must go to the Adjutant-General. I think that you will find it better to leave the present arrangement as it is. You would not save any money by the change, because you must have another officer to assist in the duty, which is very heavy—there would have to be an assistant to the Recruiting Officer.

1327. Supposing that the questions relating to the Reserve Forces were brought more under the cognizance of your Royal Highness, would you propose that the Reserve Forces should form part of the Adjutant-General's division?—I should think it better to be under the Adjutant-General; but if there is any objection to that, I should not have the slightest objection to its being directly under me. I think that the right course would be that it should be under the Adjutant-General, but if there is any feeling about it, that it is not thought advisable for it to be too military, let it be put under me, and I will take charge of it, and let the Inspector-General report to me.

1328. But it would naturally be a sub-division of the Adjutant-General's Division?—I think so.

1329. With respect to the Quartermaster-General, we have had evidence from Sir Hope Grant that the duties have been very greatly diminished in consequence of the introduction of the Control Department?—Yes.

1330. What suggestion would your Royal Highness make for the future organization of the department?—I think that the Quartermaster-General should have the movement and distribution of troops, including superintending the fitting and equipment of transports, also the superintendence of embarkation and disembarkation, likewise Sea Transport, including passages or allowances in lieu for officers. I think that he should also have questions connected with barracks, barrack damages, and supply. Now, there are many questions connected with barracks which must come to the Commander-in-Chief, and those would all be under the Quartermaster-General. I think that he should likewise have the employment of soldiers in trades—army telegraphy and signalling, regimental canteens and accounts, cooking and routes, and the Topographical Department. That is what I would give to the Quartermaster-General, and I think that he would have plenty to do.

1331. Do you think that that would be sufficient work for an officer of such rank as the Quartermaster-General?—Yes. I think that the Quartermaster-General is a far more important officer than the Adjutant-General in time of war, and if you do not keep up the office of Quartermaster-General in peace, you cannot suddenly create the department on the breaking out of war. The duties I have enumerated are, in my opinion, his legitimate functions.

1332. (*Mr. Stansfeld.*) Do those functions at present appertain to the Quartermaster-General?—Yes for the most part, though not the Topographical Department, nor the Passages or Allowances in lieu for Officers. I think that he has not those at present, but I think that these are his legitimate duties.

1333. (*Chairman.*) I presume that your Royal Highness does not include the Embarkation or Disembarkation; that would be for the Officers of the district?—That duty would most certainly be carried out under the Quartermaster-General's Department. Every irregularity, or everything connected with that duty would be reported to the Quartermaster-General, as it is now.

1334. With respect to allowances for passages, would not that be purely for the War Office?—I think that you must have some Military Officer consulted, and I think that the Quartermaster-General is the proper Military Officer to be consulted upon that subject; I think that questions constantly arise where an Officer would have to be consulted, and I think that the Quartermaster-General would be the proper Officer.

1335. It would be a consultative business, and not a finance business?—Yes, but he would be the Officer who would give his opinion.

1336. In the same way as respects Barracks, he would give an opinion?—All questions relating to Barracks would be laid by the Quartermaster-General before the Commander-in-Chief.

1337. That would be consultative, and not administrative?—I think that the Commander-in-Chief and his Quartermaster-General have been cut off a great deal too much from all this business. Formerly nothing could be done without our knowledge, but now change may be made in barracks without my knowing anything about it, which I think is wrong, and I think that all these details ought to come to me. Supposing that a barrack is to be re-appropriated, the Commander-in-Chief ought to be a party to the new arrangement before the Secretary of State gives his fiat, and these details ought to come to me through the Quartermaster-General of the Army.

(His Royal Highness delivered in the following Paper.)

H. R. H. the F.-M. Com.-in-Chief.

10 Jan. 1870.

1338. (*Mr. Stansfeld.*) With reference to a former answer of your Royal Highness, ought I to understand you as being of opinion that the Quartermaster-General should in any sense organize the Transport which the Control Department should supply, or do you rather mean that there should be free inter-communication and concert between the Control Department and the Quartermaster-General's Department?—I think that there should be the freest intercourse between the two Departments, so that all details connected with the comfort and security of the troops in transport, whether by land or sea, should be thoroughly considered from a military as well as from a financial point of view. Then, as regards the equipment of the troop-ships, I think that it should entirely rest with the Quartermaster-General and the Navy.

1339. (*Chairman.*) The movement of troops is now under the Quartermaster-General's Department?—Entirely.

1340. We asked Sir Hope Grant with regard to the estimates of the expense of the movement of troops, and he said that it was not his duty to prepare an estimate, or to keep a check upon the expenditure upon the movement of troops. Can your Royal Highness give us any information upon that point?—He must be somewhat in error there, because all that is arranged beforehand; it is stated what the probable estimate will be. It is a very difficult thing to estimate, because contingencies arise from year to year which cannot be foreseen when the estimate is made; but if nothing exceptional takes place a general estimate is prepared for the War Office after my conferring with the Quartermaster-General, and that is accepted as the estimate for the year. Then, if any exceptional circumstances arise, such as the movement of troops to Ireland, or any part of the United Kingdom, or abroad, which could not have been anticipated, such services cannot be kept within any fixed estimate, because those are contingencies which must arise, and which neither the Secretary of State nor the Commander in Chief can foresee. But putting exceptional cases on one side, the movement of troops is kept within the estimate as laid down at the commencement of the financial year.

1341. Who would keep the account in that case, and see whether there was any excess beyond the estimate?—The War Office can check every movement. Although I decide what troops are to move, every movement of troops goes to the Secretary of State, and he can stop any movement if he chooses.

1342. Under the old system, if I remember rightly, the Duke of Wellington said that the Commander-in-Chief could not move a corporal's guard from London to Windsor without going to the civil department for authority?—That is so now, and there is a perfect check on the part of the Secretary of State. No man can be moved without a route, and that is a heavy part of the duties of the Quartermaster-General's Department. The routes are very heavy. One or two men are sent as an escort, and that requires a route, so that it is not merely the routes for regiments, but for small parties, which requires much labour and arrangement.

1343. (*Mr. Stansfeld.*) Is the employment of soldiers in trades now under the Quartermaster-General?—Yes.

1344. (*Chairman.*) The Royal Artillery and Royal Engineers were put under the General Officer Commanding-in-Chief, at the abolition of the Board of Ordnance in 1855?—Yes.

1345. Has your Royal Highness read the evidence which was given by General Lefroy and Colonel Adye upon the subject of the business of the Deputy Adjutant-General of the Royal Artillery?—I have.

1346. Does your Royal Highness agree generally with Colonel Adye's evidence with respect to the business of the Royal Artillery?—Not altogether, but to a certain extent I do.

1347. I may perhaps state the general idea which I have of the effect of Colonel Adye's evidence, namely, that a clear separation should be made between the business relating to the *personnel* and the *matériel* of the Artillery, and that the administration of the interior economy of the regiment and the distribution of the officers should be conducted by the Deputy Adjutant-General, as at present, including under that head the superintendence of the charge of all arms and ammunition and guns, both large and small, in the hands of the Artillery, and that the remainder of the business, namely, all the business connected with *matériel*, should be conducted by another officer who might be called Director of Ordnance, and who should be at the head of that branch of the office of the Controller-in-Chief which would comprise under it stores and munitions of war?—I quite agree with the last part of the question. I have given evidence that it is absolutely essential that there should be a division of the Control Department, and that the *matériel* of war should be put under Artillery Officers, and that in my opinion it would be much better that this branch of warlike stores should be under the Director of Ordnance, and that he should have the charge of all the materials of war.

1348. I would add to my question that I understand Colonel Adye to propose that the discipline of the corps should distinctly form a part of the duty of the Adjutant-General of the Army, and should not be in a separate office?—From that I utterly dissent. Although the Royal Artillery is divided into batteries, it is a force of nearly 30,000 men, and I do not think that the Adjutant-General could carry it on so efficiently as it is now carried on, if it was put entirely into his hands. I think that the Deputy Adjutant-General should, as at present superintend the discipline of the whole regiment of Artillery. The Adjutant-General of the Army is usually responsible for discipline, the Deputy Adjutant-General of Artillery being a branch under him specially responsible for the discipline of the Artillery, just as the Recruiting Branch is under a separate officer, so likewise the Artillery Branch is under a separate officer for discipline, and if this system were changed, I do not see how the Deputy Adjutant-General could advise the Commander-in-Chief, as he does at present, on Artillery details, because it is only by having this general superintendance of the corps that he can know the character of every officer of the corps as he ought to do, and upon which he can give advice to the Commander-in-Chief as to the *personnel* of the regiment. If he does not know everything which is going on he cannot give advice to the Commander-in-Chief as to the *personnel* of the regiment, and therefore I think that it would be most unfortunate if that system were changed. Then again, as regards the efficiency of the regiment itself, by making it, as at present, a special branch of the Adjutant-General's Department of the Army, you can carry out most readily any changes which may be required, whether it be with a view to an increase or a decrease, or whether it be the movement of batteries, or the transfer of men or horses. All that can be done so long as the Deputy Adjutant-General carries out these details, and it could not be done with equal facility if the business were thrown generally into the duties of the Adjutant-General. It is exactly the same with the Engineers.

1349. Your Royal Highness differs entirely from Colonel Adye in his answer to question 964. He says: "I think that the duties which I would take away from "the Adjutant General of Artillery, are everything "connected with discipline, movements, recruiting, "clothing, and armaments. All those, in my opinion, "belong to other branches of the Staff"?—I would observe upon this that the Deputy Adjutant-General of Artillery is responsible for the discipline of his branch to the Adjutant-General; the Adjutant-General carries out the discipline of the Army generally, including the Artillery and Engineers, but it is conducted through the Deputy Adjutants-General of Artillery and Engineers as regards these two corps, and this simplifies work. The movement of troops in the same way is conducted by the Quartermaster-General, but the Quatermaster-General is largely assisted by the Deputy Adjutant-General of Artillery in carrying out the arrangements for a corps of 30,000 men scattered throughout the world. The recruiting is now con-

ducted by the Adjutant-General, and the clothing is conducted under the authority of the Adjutant-General, although no doubt the special requirements of their respective corps are taken notice of by the Deputies Adjutant-General of the two corps. The armaments, I think, ought to remain as they are now. Therefore, I dissent from Colonel Adye in that respect.

1350. Colonel Adye, as appears from his evidence, and General Lefroy also, would place the giving of advice upon the subject of arming new works, or any change with regard to the *matériel* of the Artillery, in the hands of the Director-General of Ordnance, and not in the hands of the Deputy Adjutant-General of Artillery. Does your Royal Highness agree with that?—Not fully. To a great extent, no doubt, the Director-General of Ordnance must see to it, but where there are two Heads, two able and superior officers of Artillery can be brought together for advice. I think that their joint opinions are valuable after discussion. I think that those discussions are good, and that good results arise from them. I think it better to leave it in that way, because the Deputy Adjutant-General of Artillery having the *personnel* under his charge, can be of assistance to the Director-General of Ordnance. There is a great deal which requires a combination of views and of thought, and I think that this is obtained if you allow those two officers to meet and to interchange their thoughts. The matter ultimately goes for decision to the Secretary of State, with the concurrence of the Commander-in-Chief, and in the practical working there has never been any hitch in consequence of that interchage of thought. I think that all armaments in possession of the troops, or in charge of the Officers of Artillery, ought to be under the Commander-in-Chief, and therefore to that extent ought to be under the Deputy Adjutant-General of Artillery, but everything which is not *personnel* ought to be under the Director-General of Ordnance, and I think that his time would be fully occupied in performing these responsible duties.

1351. Then your Royal Highness agrees that the Director-General of Ordnance should be the person who should be responsible for the opinion with respect to armaments?—Yes; but I think that the concurrence of the Commander-in-Chief should always be obtained.

1352. And you think that a communication should be made to the General Commanding-in-Chief in respect of all changes of armaments for his opinion?—Yes.

1353. But that opinion, according to the ideas of Colonel Adye and General Lefroy, should be the direct opinion of the General Commanding-in-Chief, and not be taken through the Deputy Adjutant-General of Royal Artillery?—The Commander-in-Chief would never give an opinion unless he was certain of what he was about, and if he was not certain of what he was about, he would consult whatever officer he thought proper to consult, and would probably consult the Deputy Adjutant-General of Royal Artillery, who knows the regiment from one end to the other, and most probably would be able to give the best opinion on such subjects.

1354. Would it not be possible for the Director-General of Ordnance to be in communication with your Royal Highness?—So he is now, but when you give a very grave opinion with regard to questions of great importance, I think that it is valuable to have the opinion of two or three men. The real fact is, that in all those questions there are many considerations which must be taken into account. We know that there are partisans—a certain set of men advocate one system, and another set of men another. Now I like to hear what all parties have to say, and after having heard them I form my own opinion, and therefore I like to have two or three opinions before I arrive at my own conclusions. I am responsible for my opinion, and am willing to be responsible for it; but I should not like to be tied down only to take the opinion of the Director-General of Ordnance, and I do not think that the Secretary of State would desire that I should be. Nine times out of ten I should be guided by him, but occasionally I might not.

1355. My question was of course not intended to imply that your Royal Highness should be prevented from taking the opinion of any one, upon any matter; but merely that the recommendations of the Director-General of Ordnance upon questions of armament, and so forth, should not be referred to your Royal Highness for opinion through the Deputy Adjutant-General of Royal Artillery?—They are not referred, they are sent to me for my opinion, and so clearly is this the case, that I always express my opinion in my own handwriting. There has never been an opinion given upon an ordnance question which has been laid before the Commander-in-Chief, where that opinion has not been given in my own handwriting. Difficult questions at times arise on which the Commander-in-Chief must have a variety of papers before him, and the Deputy Adjutant-General has to prepare these. But you will not find one single decision which has not been given in my own handwriting.

1356. Has your Royal Highness any objection to questions relating to the alteration of armaments generally, or the armaments of new fortresses, going direct to your Royal Highness instead of through the Deputy Adjutant-General?—I have no objection to it, though I prefer the present arrangement, but I wish to have it clearly understood that the armaments of fortresses, that is to say those armaments which are in position, must be under the Deputy Adjutant-General, because they are under the Commander-in-Chief, and because the officers in charge are Military Officers under the Commander-in-Chief, and not Departmental Officers. I think that that is extremely important, and as far as I understand Colonel Adye I differ from him.

1357. Your Royal Highness would agree, upon this point, with the following paragraph in Colonel Adye's Memorandum: "that in a military point of view the "Officers Commanding the Royal Artillery in districts "at home and abroad, would still be held respon-"sible to the highest military authority as they ever "have been, for the due care and efficiency of the "armaments committed to their charge"?—Certainly.

1358. He goes on to say, "Any changes in arma-"ments or in *matériel* of war proposed by the Director "of Ordnance would also, of course, be submitted to "the Commander-in-Chief before being acted upon"?—Yes, that is exactly what I mean. On looking over the evidence of Colonel Adye, I see that there are certain points which appear to be different from others. I do not know what he really meant to convey, but I think that he and I do not differ much after all, though in one or two points it appears so. The line of demarkation is that everything in position, in fortresses or in possession of the troops in field batteries, is in charge of the Officers of Artillery, and therefore is in charge of the Commander-in-Chief, and consequently is under the Deputy Adjutant-General of Artillery, and that everything which is in store is under the Director of Ordnance.

1359. (*Mr. Stansfeld.*) Your Royal Highness has put in this sketch of the organization of the Horse Guards?—Yes.

1360. I observe that the Deputy Adjutant-General of Artillery is placed under the Department of the Adjutant-General. If I understand your Royal Highness's evidence, it seems that he has other functions, and functions in respect of which he should in no case be considered as the Deputy to advise the Adjutant-General?—Certainly he is, in a great sense, a personal Officer to the Commander-in-Chief; he is an assistant to the Commander-in-Chief upon all subjects connected with the *personnel* of the Royal Artillery.

1361. He is a sort of Chief of the Artillery Staff?—He is the principal Staff Officer of Artillery.

1362. (*Chairman.*) With respect to the management of the Regimental business of the Royal Artillery, does your Royal Highness think that it is better managed at the Horse Guards than it would be elsewhere, at Woolwich, for example?—Yes, for this reason, that it

H. R. H. the F.-M. Comr.-in-Chief.

an. 1870.

must be worked at a central office. The duty of the Deputy Adjutant-General of Artillery is to have the *personnel* under his cognizance, and to give advice to the Commander-in-Chief upon all those subjects. He is the person who ought to be most conversant with all the requirements of the Corps, and as such he is the best person to manage the Central Regimental Office. If the office were at Woolwich, the inconvenience of his going backwards and forwards would be such that he could not be at the call of the Commander in-Chief when required, and therefore, in my opinion, it is impossible to move the office from its present position without the most serious inconvenience. Therefore, though it may be considered a Regimental Office it is essential for the purpose of the efficiency of the Corps, and for the facility of carrying out the detail duties, that the Regimental Office should be combined with the Deputy Adjutant-General's, who is at the Horse Guards.

1363. (*Mr. Stansfeld.*) Does your Royal Highness think that any good purpose would be served by severing the regimental from the administrative business of the Deputy Adjutant-General, and conducting the regimental business elsewhere than at the Horse Guards, and under some other officer?—No; I think that it would be greatly adding to business rather than diminishing it, and that the present system is so simple that we have the greatest facilities in carrying out any order which may be issued in the course of the day, which could not be done if the two offices were not combined as they are now.

1364. (*Chairman.*) I see that in this scheme of your Royal Highness's, there is an Inspector-General of Royal Artillery for the inspection of the Regiment and Armaments, is that new?—Yes; the Inspector-General has at present only the inspection of the regiment, but not of armaments. I think it very important that he should have the inspection of armaments.

1365. I presume that in your Royal Highness's opinion those Reports should be sent to the Secretary of State?—Yes.

1366. With respect to the office and duties of the Deputy Adjutant-General of Royal Engineers, your Royal Highness probably remembers that in the Report of the Committee of the House of Commons on military organization which was presided over by Sir James Graham, it is mentioned that distinguished Officers of the Royal Engineers disapproved of the arrangement which was made in 1855, with respect to the Royal Engineers on the abolition of the Board of Ordnance, and that Mr. Sidney Herbert admitted "that the late "transfer of the Military Command of the Engineers to "the Horse Guards had not hitherto worked to his satis-"faction; that harmonious action was wanting; that "the corps was under two masters; and that the pre-"dictions of 1837, so far as the Engineers were con-"cerned, had in some measure been verified." We have taken the evidence of Major General Sir Lintorn Simmons, of Colonel Jervois, and of Colonel Murray, who give opinions at the present time very much to the same effect as that which I have just read. What is your Royal Highness's opinion upon that subject?—My opinion differs from theirs to some extent, and agrees with theirs in another respect. I think that it is absolutely essential that thereshould be an Inspector-General of Fortifications. I think that the old term of "In-"spector-General of Fortifications" is a very good one. Whilst you have that Departmental Professional Chief, you ought not to sever the military status of the corps from the Commander-in-Chief, and therefore ought not to place the Inspector-General of Fortifications in any other position than as the Inspector of the regiment, and as the originator and adviser upon works; but in my opinion he ought not to be the Officer who should Command the Regiment, as it is put forward in some of the evidence, because if you did so you would entirely cut off the regiment from the Commander-in-Chief, and there would be no connection between the Commander-in-Chief and the Royal Engineers if you carried out that scheme for having a special head of the Corps of Engineers. There is no doubt that the corps should have a scientific head, and that scientific head should be the Inspector-General of Fortifications, and he would be that scientific head if he was placed, as I think that he ought to be, at the head of the Works Department in the War Office, and if he was also the Inspector-General of the corps, at the same time leaving the Deputy Adjutant-General to work the regiment under the direct authority of the Commander-in-Chief.

1367. Then would the Deputy Adjutant-General be under the Inspector-General of Fortifications?—No; he would be under the Commander-in Chief.

1368. Then that is a point on which your Royal Highness differs from the witnesses whom I have named?—Yes; because the Commander-in Chief must always have an Engineer Officer at his disposal, who can carry out his orders, or give him any information connected with the Corps, which he constantly requires from day to day.

1369. I did not take the evidence of Sir Lintorn Simmons to mean, that the command of the Corps was in any way suggested to be taken away from your Royal Highness, but simply that the command should be exercised through the Inspector-General of Fortifications?—That is where I differ. I say that I cannot exercise the command in that way, because he is not at my disposal. I must have an officer at my disposal here, namely, the Deputy Adjutant-General. I am quite willing to confer with the Inspector-General of Fortifications upon every scientific question connected with the Corps, but the actual conduct of the discipline and management of that Corps should be exercised as it is now, and as it was conducted long before I came to the Horse Guards, because there was always an Adjutant-General, or an Assistant Adjutant-General of the Engineers at the then Ordnance Office, and he was always distinct from the other officers who carried on the Works, It is impossible to do without an officer of that sort, and that officer was transferred to the Horse Guards when the *personnel* of that Corps was transferred to my Office.

1370. Then your Royal Highness would not agree in the opinion which was given by Sir Lintorn Simmons respecting the great advisability of putting the distribution of the men and Officers of the Corps in the hands of the officer who is responsible for the Works?—No; because the whole of that is now under the Secretary of State. The distribution of the Officers and men of the Royal Engineers does not depend upon me at all. An indent is made upon me for officers and men by the Secretary of State, and I do not settle, without previous communication, where the Companies of Engineers are to be stationed; that is entirely settled according to the requirements of the Secretary of State, and therefore everything that General Simmons wishes, as expressed in his evidence, is already done. He is in error in this respect

1371. Will your Royal Highness explain how the distribution of the Corps of Royal Engineers is now carried out?—The distribution of the Corps of Royal Engineers is carried out under instructions from the Secretary of State; and whenever the Secretary of State requires either Engineer Officers, or Companies of Sappers at particular stations, the business of the Commander-in-Chief is to find them, and to send them, and to locate them, in accordance with the demands and requirements of the Service by the Secretary of State.

1372. In what precise business does the other portion of the command of the Corps of Royal Engineers consist?—Discipline and military efficiency. I put that under the Adjutant General.

1373. The discipline of the Corps goes to the Adjutant-General?—Yes, exactly as it does in the Artillery, but the Corps being much scattered, with a great many officers, all over the world, with companies here and there, it gives a very great deal more work than if they were all in one body: when you have them all over the world, it requires an officer to know the necessities and the requirements of the Corps, and to assist the Adjutant-General in carrying on the discipline.

1374. If the whole of the employment of the Corps

of Royal Engineers is, speaking generally, upon arrangements made by the Secretary of State, would it be part of the plan which your Royal Highness recommends that the Inspector-General of Fortifications should be the person to give advice to your Royal Highness as to the distribution of officers?—I have no objection whatever to his giving his opinion to me as to any point where he requires officers, and, of course, they would be furnished. Companies of Sappers as well as individual officers are always furnished if we have them, but frequently we have not been able to find them.

1375. Then am I to understand your Royal Highness that it would not be the business of the Deputy Adjutant-General of Royal Engineers, but of the Inspector General of Fortifications, to suggest the distribution of officers under that plan?—The Inspector-General of Fortifications was, till the office was suspended, the person who made his requirements known to us as to what officers he wanted in different districts, and upon that the officers were distributed; and in the ordinary course of service, the rest of the officers were posted to all districts requiring them, because as the barracks are under Engineer charge, every district must have a certain number of officers to do the duty, and therefore we, perhaps, distributed officers without any positive demand being made upon us, but it is thoroughly understood that the officers and men are to be posted where required, and this rule has been invariably adhered to.

1376. Under the plan which your Royal Highness suggests, namely, that there should be a head over the Corps of Engineers, that is to say an Inspector-General of Fortifications, the advice to your Royal Highness with respect to everything relating to the corps would be from him, and not from the Deputy Adjutant-General?—Yes; that is very much the case now. One of the most difficult things to manage in the Corps of Royal Engineers is the roster, for this reason, that you are obliged to consider the special requirements of the service. Whilst we take selected officers for every great work in the interest of the public service, we must prevent doing injustice to the individual officers, and hence the necessity for keeping a roster. We always consult the Inspector-General as to the selection of an officer for a particular service, and he always selects his officers subject to a knowledge of what the roster is, and of the injustice which might result if that roster were departed from.

1377. According to that plan the discipline of the Royal Engineers would go to the Adjutant-General, and everything else connected with the Royal Engineers, and connected with the officers and men, would be under your Royal Highness, but the person to advise your Royal Highness upon those matters would be the Inspector-General of Fortifications?—That is very much what it is now: I do not see what difference there is. I have no objection to see the Inspector-General of Fortifications on the same footing as the Director-General of Ordnance. Then the details of the regiment are carried on in exactly a similar manner by two deputies who are at my call. When there was an Inspector-General no officer was appointed without his opinion being taken upon such appointment before it came to me.

1378. Do you think that there should be an officer who should be at the head of this corps, and who should have the function of giving advice to the Secretary of State with respect to the conduct of all those works, and who at the same time should advise your Royal Highness with respect to the distribution of the troops, both officers and men?—He could not advise me upon anything military, because I should not require it. I would say to the Deputy Adjutant-General, "Such being the requirements, how many "officers shall we want here and there," and so on. If we want to have officers specially selected we never select any officer without going to the Inspector-General of Fortifications, but it would be an absurdity to do so with every Lieutenant. If an object was to be gained I should be quite ready to change the present system, but I do not see the object to be gained. We distribute the corps upon a regular system, and when a change is made that change is not made by me, but it is made at the instance and on the demads and requirements of the Secretary of State or any other department of the State, and I think that it is perfectly simple and perfectly correct. I do not see how any Inspector-General could work it differently from the mode in which it is now done, except that it is worked by the Commander-in-Chief with his subordinate officer as a Military Officer, instead of its being done by the Inspector-General, whose hands are quite full if he attends to his special and most important duties.

H. R. H. the F.-M. Com.-in-Chief.

10 Jan. 1870.

1379. Then am I to understand that your Royal Highness objects to the appointment of an Inspector-General of Engineers as your Royal Highness's subordinate Officer with respect to the distribution of the officers and men of the corps?—I think that it is better that he should not be a subordinate officer, but that he should be considered a distinct functionary, and that he should only be asked to give his opinion upon the employment of officers when it is of any consequence. We give so many officers to each station, and these are apportioned according to a roster. It would be an endless trouble to do so on any other system, except in the case of duties which are of importance. A great part of the distribution must be a matter of routine.

1380. A proposal has been made to us in the course of our enquiry, that there should be a superior Staff Officer at the Horse Guards, in order to save your Royal Highness from the details of certain portions of the business. I should like to ask what your Royal Highness's opinion is upon that point?—I think that he would only be the fifth wheel to the coach. I do not see how he would be of the least use in the world. If I did not see all Departmental Officers myself, I should not know how the work under them was being conducted, I should not be satisfied that my instructions on the orders given by me were either understood by them or properly carried out, and therefore I think that it would be a great detriment to a department which is conducted as this Department is, without delay or difficulty, to introduce so unnecessary a change. I can myself answer for the facility with which the Department has been conducted in very trying times, for I was here when the reduction of the Army took place after the Crimean War, which was a very difficult operation; then again on the large increase of the Army for the Indian Mutiny, which was a very great occasion; nothing went wrong, and it was done without any trouble. I think that if you selected an officer to be the Chief of the Staff, you would only add an additional link in the chain of responsibility; he would only do my work over again, and after all I should be obliged to see Departmental Officers for my own satisfaction

1381. Has your Royal Highness considered a question which has been raised several times, namely, the advantage of consolidating the Staff of the Army locally, so that a General Officer should have to deal with a Controller as to supplies, and a Chief of the Staff with regard to military matters?—In time of peace I think that there would be no advantage in it, but in time of War it might be necessary, and I would never refuse to a General in Command the power to make such an arrangement. I think that it may be essential at times, because the duties in the field are very heavy. A General Officer in Command who must be in constant communication with the authorities at home would have his hands so full that he could not attend to many details, and details to which he ought to attend, and therefore if he required the assistance of an officer who was made the Chief of the Staff there could be no objection to it. But as regards questions of detail I think that the Commander in-Chief of the Army ought to know everything, and in order to do so his Chief of the Staff would only be in the way.

1382. If it were deemed advisable to adopt that plan in the case of an army in the field, what is the reason which, in your Royal Highness's opinion, makes it not applicable to the Horse Guards?—Because I

H.R.H. the F.-M. Com.-in-Chief.

10 Jan. 1870.

think that the Commander-in-Chief must know the minutest details in order to keep him responsible for the efficiency of the Army, and as he must know the minute details he cannot delegate that duty to another Officer. That is the only object in having a Chief of the Staff, namely, that he should take upon himself in time of war details which are too numerous and too complicated for one Officer to undertake; but in time of peace I think that these duties would be best performed by the Commander-in-Chief himself.

1383. Under the circumstances of your Royal Highness being absent or unable to attend, who would perform your duties?—They would be performed in exactly the same manner as the Secretaries of State, or the high Governmental Officers have all their business sent down to them. I have never been away for more than about a month at a time, and then I have always had constant communication. If any emergency arose, it would be met just in the same way as at the War Office, the Under-Secretary of State, in the absence of the Secretary of State, would take the business upon himself as well as he could. The officer in charge at the Horse Guards would telegraph for his instructions to the Commander-in-Chief, unless the Adjutant-General were called upon to issue immediate orders upon the requisition of the Government; if he could wait for instructions, he would telegraph for instructions from me, which I would give him. Where the patronage of the Army, and everything connected with its extended duties is involved, all entrusted to one individual, I do not think that it can be left to the accident of another officer undertaking such large duties and responsibilities for the Commander-in-Chief: I think that it would be a duty which you would not be able to delegate to another officer, however eminent he might be.

1384. Has your Royal Highness any observations to make upon any portion of the subject, independently of the questions which have been put to you?—There are portions of the evidence connected with the working of the Control System which I cannot concur in. I think it is frequently stated in the evidence that certain subjects need not be made known to the Commander-in-Chief. I contend that everything connected with the supplies, and equipment and housing, of the troops should be known to the Commander-in-Chief, and any regulation which prevents his obtaining the fullest knowledge on all these points, I hold to be objectionable. In fact, care should be taken that the introduction of the Control system should in no respect prevent the Commander-in-Chief from having at all times the fullest information on all such subjects as have hitherto been communicated to him from all stations and corps.

(Adjourned.)

Saturday, February 12th, 1870.

PRESENT:

The Right. Hon. Lord NORTHBROOK, *in the Chair.*
Lieut.-General Sir EDWARD LUGARD, G.C.B.
The Right Hon. JAMES STANSFELD, M.P.
WILLIAM GEORGE ANDERSON, Esq.

Major-General The Right Hon. Sir HENRY KNIGHT STORKS, G.C.B., G.C.M.G., examined.

Maj.-Gen. Sir H. K. Storks, G.C.B.

12 Feb. 1870.

1385. (*Chairman*). His Royal Highness the Field-Marshal Commanding-in-Chief has expressed his opinion that there ought to be an unreserved intercourse between Controllers and the Officers of the Military Staff of a General in Command. Do you agree with that opinion?—Certainly. I cannot conceive that the Public Service can be properly conducted on any other conditions.

1386. In answer to Question 1295, His Royal Highness has informed us that he understands that a wish has been expressed contrary to such intercourse. Have you ever expressed such a wish?—Never; on the contrary, both by word of mouth and in writing, I have impressed upon Control Officers the importance of maintaining cordial and intimate relations with the officers of the General Staff.

1387. Can you tell us what the present practice is in regard to such intercourse?—As I understand, the present practice is for Control Officers to act in obedience to the instructions I have given them. Mr. Drake, lately Controller in Ireland, Mr. Robertson, at Portsmouth, Mr. Maturin, in Ireland, Mr. Watt, at Gibraltar, and Mr. Robinson, at Aldershot, have all assured me that they maintain constant and cordial intercourse with officers of the General Staff as regards their public duties, and I hold in my hand a letter from Colonel Martindale, the Controller in Canada, dated 7th January last, in which he says:—"I have "laid it down as a fixed rule to maintain the most "friendly relations with all, and I hope by steady con-"sideration and consulting them and with them, *i.e.*, "the officers of the General Staff, in all practicable "occasions to maintain cordial relations."

APPENDIX No. IV.

STATEMENT

OF BUSINESS CONDUCTED IN THE VARIOUS DEPARTMENTS UNDER H.R.H. THE FIELD-MARSHAL COMMANDING-IN-CHIEF.

COMMANDER-IN-CHIEF'S OFFICE.

THE Commander-in-Chief's Office consists of the CONFIDENTIAL DEPARTMENT, GENERAL CORRESPONDENCE BRANCH, and APPOINTMENT AND PROMOTION DEPARTMENT; and the duties may be briefly stated as follows:—

CONFIDENTIAL DEPARTMENT.

Persons Employed.

First Assistant to the Military Secretary.
1 First Class Clerk.
1 Second Class Clerk.
3 Third Class Clerks.
1 Clerk and Telegraphist.

Nature of Duties.

1. The First Assistant to the Military Secretary has not only the charge of the Confidential Department, but also has the entire control and supervision of the whole establishment, and internal economy of the office; and is responsible (to the Military Secretary) for the proper conduct of all correspondence, records, &c., appertaining thereto,—involving constant reference to, and attendance upon the Military Secretary during each day.

2. Initiatory action with respect to all new subjects.

3. Correspondence, reports, précis, records, &c., relative to—

   a. Honours, rewards, and brevet promotions for service in the field, including Order of the Bath, medals, annuities, &c., &c.

   b. Appointments to the Corps of Gentlemen at Arms, and Yeomen of the Guard (officers and men).

   c. All matters which are considered of a private nature, such as officers' grievances, &c., &c.

   d. Appointments to commands at home and abroad.

4. Submissions to the Queen, and all correspondence relating to—

   a. General Courts-Martial.

   b. Establishment of the Army, the interchange of regiments (India and the Colonies), and the appointments of general officers to the colonelcies of regiments.

5. The copying, &c., of letters, memoranda, and confidential papers by the Commander-in-Chief.

6. Preparation of the Lists, &c., for the Commander-in-Chief and Military Secretary's Levées, and certain work consequent thereon.

7. Preparation of the schedules of all papers submitted to the Commander-in-Chief, when absent from London.

8. Custody and arrangement of the correspondence of the department, including private and confidential papers, memoranda, &c.

GENERAL CORRESPONDENCE BRANCH.

Persons Employed.

1 First Class Clerk.
2 Second Class Clerks.
3 Third Class Clerks.

Nature of Duties.

Passages or allowances for officers proceeding to India and the Colonies.

The liability of officers to pay for passages of successors on retirement or exchange, and the obtaining and disposal of the sums required from them.

Claims and representations against officers by tradesmen or others.

Inspection of Yeomanry Cavalry and Militia.

Applicants for service in Commissariat and Store Departments.

Claims to allowances for special or extra service.

Correspondence regarding Army Schools, Libraries, &c.

Transfer of correspondence, record kept of letters erroneously addressed to this Department and transferred to those to which the subjects belong.

Docketing and registering the general correspondence retained in the Department, searching for and collecting former papers, &c., keeping a journal of special subjects, indexing letter books, &c.

Entry of letters relating to all the above subjects, and also to numerous general question affecting the Army, its distribution and relief in the Colonies and India; to applications to commissions, appointments, and promotion, the yeomen of the guard, and gentlemen-at-arms, aides-de-camp, mess and band subscriptions, Indian Army amalgamation, grants of annuities and medals, &c., &c.

PROMOTIONAL DEPARTMENT.

Persons Employed.

Second Assistant to Military Secretary.
1 First Class Clerk.
2 Second Class Clerks.
7 Third Class Clerks.
2 Supernumerary Clerks.

The Second Assistant is responsible to the Military Secretary for all appointments to, and promotions in the Army, excepting brevet for service in the field.

The duties of the Department under his immediate control may be best described by the accompanying memoranda of the work performed in each room, in accordance with instructions issued daily by him, after receiving orders from the Military Secretary, on whom he is in constant attendance.

MEMORANDUM OF THE DUTIES DISCHARGED IN NO. 1 ROOM.

1 First Class Clerk.
1 Second ,,
1 Third ,,

And occasional assistance under a pressure of business.

Reporting all vacancies in the Army, whether caused by deaths, or retirements, or resignations, with a view to the selection of officers for promotion in the succession, and appointment of gentlemen to first commissions.

Calling upon such officer to lodge with the regimental agent the regulated sum for promotion.

Preparing the papers of all promotions and appointments in the Army which are afterwards copied in Room 4, and transmitted for the concurrence of the Secretary of State for War, and for submission to Her Majesty.

Calculating the qualifying service of Lieutenant-Colonels previous to promotion to rank of Colonel, under rules regulating advancement after 5 or 8 years' service, which requires great accuracy as the calulations of the mixed periods of service are required to be made in days and fractions of days.

Checking the statements of qualifying service for rank of Colonel sent from India Office.

Carrying out the arrangements under which the reduction and gradual absorption of the supernumerary officers of the Army is to be effected.

The charge of the Reserve Fund Account, including the issue of instructions to the regimental agents regarding each payment.

Correcting daily an Annual Army List.

Tracing services of officers, which is required daily.

Keeping a book in which the dates of the various commissions of all general and field officers are recorded.

Keeping a book which shows the amount available for "retired full-pay," how created and disposed of.

Similar book for the grants of good service pensions.

Keeping a book showing the promotion by Brevet in the Army consequent on the death of a General Officer.

Keeping a book containing a resistry of all applications for the rank of Colonel.

Keeping a book containing the names of officers who have passed throught the Staff College, with the confidential report on each officer.

Keeping a book in which the entry of all applications from officers who wish leave the service, and records of deaths are entered showing the various details in each case, and custody of the papers until the result is published in the London Gazette.

Keeping a book showing the name and date of decease of every officer who dies whilst on half-pay.

Making index and arranging for binding all submissions to Her Majesty relating to staff, establishments, rewards, &c.

Giving instructions with regard to the necessary letters being written in Room 4 on the publication of each "Gazette."

Furnishing reports on the cases of officers admitted probationers for the Indian Staff Corps.

Précis making for the information of His Royal Highness.

17*th April*, 1869.

ROOM No. 2.

1 Second Class Clerk.
1 Third Class Clerk.
1 Supernumerary Clerk.

In this room the letters connected with the general business of the Promotion Department are prepared for the Military Secretary's approval and signature. The correspondence embraces the following subjects:—

1. Cases of candidates for commissions who have passed their examinations and are waiting for admission to the Army.
2. Applications for promotion and retirement either on half pay or by sale.

   Applications for Staff employment (not including Divisional or Brigade Commands), good service pensions, restoration to full-pay, &c.
4. Questions connected with the payment of mess and band contributions and subscriptions.
5. Appointment, promotion, and retirement of medical officers, and their transfer from one station to another.
6. Notifications of appointments on the Staff, and the examination of officers nominated for Personal Staff appointments.

In addition to the above, there is a considerable amount of miscellaneous correspondence which cannot be classified under the foregoing heads.

All letters connected with appointments and promotions by purchase, retirements, and matters connected with the purchase system, as well as the examination of subaltern officers for promotion, are entered in this room, where any copies that may be required in relation therewith are likewise made.

Assistance is also rendered to these rooms when necessary.

ROOM No. 3.

3 Third Class Clerks.

The duty of the clerks who sit in this room, is to conduct the business relating to the following subjects:

1. Direct Commissions.
2. Royal Military College, Sandhurst.
3. Applications for Advancement in the Army.

1. *Direct Commissions.*

Note all gentlemen for first appointments in the Army, including the correspondence thereby entailed. Order candidates up for examination and notify the failures. Conduct all the correspondence with the Council of Military Education upon the subject of examinations. After an examination, mark and place the names of successful candidates in Selection Book; keep all the papers of candidates after they have notified their wish to be examined; and answer all applications for re-admission to the Army and for commissions without puchase. Issuing of necessary instructions for the examination abroad of candidates for direct commissions, as also the medical examination of gentlemen who have taken their degree and are desirous of entering the Service.

2. *Sandhurst.*

Note all gentlemen for admission to the Royal Military College. Order candidates up for examination, and notify the failures; conduct all correspondence with the Council of Military Education on this subject; fix the subscriptions of successful candidates, notifying the same to them, to the War Office, and to the College. Note candidates for Queen's cadetships, conduct all correspondence arising out of the same with the War Office, Council of Military Education, and College. Note and order up for examination gentlemen noted for Indian cadetships, and conduct correspondence on this subject with the India Office, War Office, Council of Military Education, and College. Note University candidates for admission to College; fix their contributions and conduct all correspondence arising out of the same with the Council of Military Education, War Office, and College. Note applicants for Queen's scholarships of £40 per annum, conduct correspondence on this point with War Office. Conduct all correspondence connected with the appointments of professors, masters, and instructors at the Staff and Cadet Colleges. Summon members to Boards of Commissioners, prepare papers for them, take minutes of meeting, and conduct correspondence arising out of the same. Conduct all correspondence connected with the administration of the college. Keep the register books and all papers connected with the matters above set forth.

Most of this business, together with the pecuniary affairs of the college, was formerly performed by the Secretary to the Commissioners, which appointment was abolished in 1863.

3. *Noting.*

Note all officers for general and unattached promotion, both by purchase and without purchase (in duplicate), in each case with detailed statement of the Field and Regimental Service. Note half-pay officers for full-pay and to retire by sale; officers for transfer to other regiments, &c., for employment in depôt battalions, recruiting districts, and on the Staff; officers for good service pensions, non-commissioned officers for commissions. Keep all the applications respecting the above appointments. Correct all the above (67) books and lists by every Gazette and also by Army Lists. Record the names of all officers who have been refused any of the above appointments. Make préces of officers' cases, and assist in drawing up Parliamentary and other returns.

Horse Guards,
19*th April*, 1869.

Room No. 4.

2 Third Class Clerks.
1 Supernumerary Clerk.

Collecting, arranging, docketing, and putting away for future reference, all papers relating to the appointment, promotion, removal, exchange, and retirement of officers.

Taking charge of all papers relating to the above, producing them for reference when required, and putting them away afterwards.

Examining, checking, and taking charge of the "Annual Service Returns" *of every officer* in the Army. Writing all letters on this subject.

Recording in a book for reference the names of all officers desirous of purchasing promotion, as notified by returns from every regiment, and by letters from the various Army agents. Writing all letters connected with this subject.

Recording in a book for reference the names of all officers who have been examined for promotion. Writing any letters that may be required connected therewith.

Writing out *fair* the memoranda papers for submission to Her Majesty.

Writing numerous letters and notes connected with appointments and retirements in each Gazette.

Writing out *fair*, submissions to Her Majesty connected with the general staff, rewards, &c., &c., copies of many of which are also required.

Correcting from Gazettes books for reference, relating to the exchange and retirement of officers

Preparing, on the appearance of each Gazette, a list for the Adjutant-General, giving the names and addresses, and other particulars, of all the gentlemen appointed to first commissions in the Army.

Furnishing the General Officer Commanding in Ireland, on the appearance of each Gazette, with a list of notifications relating to the Army under his command.

During each session of Parliament one or other of these clerks is employed constantly in making out Returns for the House of Commons and the War Office, and assistance has to be given to other rooms during absence on leave, or pressure of work, in the form of copying correspondence, writing, entering, and dispatching letters.

HORSE GUARDS,
19*th April*, 1869.

ORDNANCE BRANCH.

Persons Employed.

1 First Class Clerk.
1 Second Class Clerk.

Applications to be allowed to compete for admission to the Royal Military Academy; correspondence with the Council of Military Education, in regard to the half-yearly examination of such candidates; contributions of cadets when admitted, and correspondence with the War Office and Royal Military Academy, &c., thereon.

Submissions and recommendations from the Lieutenant-Governor of the Academy regarding the studies, discipline, and conduct of the gentlemen cadets, and correspondence with the Council of Military Education or War Office thereon; and also regarding the appointment of professors and instructors, their pay and emoluments, &c.

Appointments and promotions in the corps of Royal Artillery and Royal Engineers, and retirements on full-pay and otherwise; distinguished service rewards, and submissions to the Queen consequent thereon.

Appointment of Commanding Officers of Royal Artillery and Royal Engineers at home and abroad, and correspondence regarding officers employed under the War Office or other Departments, and on special duties.

Certain requisitions from the Royal Engineer Establishment, Chatham; appointments to, and changes in that department requiring the sanction of the Field-Marshal Commanding-in-Chief and the Secretary of State for War.

Report of examination of officers for the advanced class of Royal Artillery, and consequent correspondence with the Council of Military Education.

Applications for passages to India and other foreign stations.

Returns of drafts for India for the Secretary of State for India in Council.

General subjects connected with the re-organization of, or calling for increased expenditure in the Artillery or Engineers requiring the approval of the Commander-in-Chief, and finally of the Secretary of State for War.

Demands for the service of non-commissioned officers and men on special duties at home and abroad, requiring the concurrence of the Secretary of State for War.

A register of all correspondence passing through this Department.

The character and duties of the Military Secretary's Department may be better understood by explaining that although the Field-Marshal Commanding-in-Chief transacts a vast deal of the official business devolving upon him as Head of the Army, yet His Royal Highness considers the Military Secretary to be the medium of communication in carrying out the instructions from the Secretaries of State, after receiving His Royal Highness's orders thereon.*

19*th April*, 1869.

W. F. FORSTER,
Military Secretary.

* This paragraph originally stood as follows:—The character and duties of the Military Secretary's Department may be better understood by explaining that although the Field-Marshal Commanding-in-Chief transacts a vast deal of the official business devolving upon him as Head of the Army, yet His Royal Highness considers the Military Secretary to be *Chief of the Staff acting under* His Royal Highness's orders.

QUARTERMASTER-GENERAL'S OFFICE.

STATEMENT showing the Divisions of the Quartermaster-General's Office, and the duties performed in each Division.

HORSE GUARDS, 17*th April*, 1869.

Branch.	Division and its Duties.	Clerks.
MOVEMENT BRANCH.	Correspondence for carrying out the embarkation of troops for foreign service, and intercolonial reliefs; and arranging with Admiralty and India Office necessary tonnage; also all matters in respect to the disembarkation of troops arriving from abroad and to the proper accommodation, provisioning, &c., of troops on board ship. Arranging for the passages of individual officers and others, and correspondence connected therewith. Arrangements and issue of orders for the movement of troops at home, and embarkation and disembarkation of troops coastwise. Keeping records of the services of regiments, and preparation of schemes for the movement of the Army, at home and abroad. Correspondence relating to camp equipment, stores, and inventions, and to the issue of money allowances to officers' and soldiers' families. Keeping papers belonging to Movement Branch and index book of same. Furnishing annually a statement of proposed movement of troops for the preparation of the Transport Estimates for the year ensuing.	Chief Clerk. 3 Second Class Clerks. 3 Third ,, 1 Temporary Clerk.
BARRACK BRANCH.	Correspondence as to erection, alteration, hire and appropriation of accommodation for officers and men. Annual statements of services proposed for barrack and fortification estimates, hospital accommodation, billiard rooms, gymnasia, canteens, recreation rooms, gas, rifle ranges, and targets, exercising and recreation grounds, lodging-money, fuel and light, barrack damages, sanitary questions, water supply, and barrack inventions, employment of soldiers in trades, and repair of damages and incidentals by soldiers. Army telegraphy and signalling, regimental canteen accounts, training and distribution of serjeant cooks, cooking reports, and examination of and correspondence on these subjects. Index book for ready reference to papers kept in Barrack Branch.	1 First Class Clerk. 1 Second ,, 3 Third ,,
ROUUTE BRANCH.	Preparation of routes for small parties of soldiers and for individuals, also for the removal of deserters and correspondence arising therefrom. Preparation of office accounts, including claims for officers' lodging and forage allowances, also of periodical returns and estimates.	1 First Class Clerk. 1 Third ,,

H. H. CLIFFORD,
D. Q. M. G.

ADJUTANT-GENERAL'S OFFICE.

Adjutant-General to the Forces..	Lieutenant-General the Lord WILLIAM PAULET, K.C.B.
Deputy Adjutant-General to the Forces	Colonel EGERTON.
Chief Clerk	Edward HOUNDLE, Esq.

The Business of the office is distributed among Five Divisions, viz. :—

1. General Business and Statistical Division.
2. Discipline Division.
3. Clothing Division.
4. Discharge Division.
5. Recruiting Division.

Each of them, under a military officer, is, as far as circumstances permit, composed of one First-Class Clerk, two Clerks of the Second Class, and Junior Clerks.

The Confidential Reports, in the first instance, come especially before the Deputy Adjutant-General preparatory to their being submitted to the Field-Marshal Commanding-in-Chief by the Adjutant-General.

The General Detail of Business is as follows :—

GENERAL BUSINESS AND STATISTICAL DIVISION.

Under the orders of Colonel EGERTON.

The Business of this Division proceeds under the general supervision of the Chief Clerk, and the responsibility of the interior concerns of the entire department, including the Ordnance Branches, under the Adjutant-General's personal orders and directions, rests with him.

Class.	Names.	Date of First Appointment to the Office.	Business.
2nd	W. H. Torode.	25 Jan. 1854.	Orders to regiments and drafts when about to embark.
2nd	E. C. Syms.	18 Dec. 1854.	
2nd	G. E. Bewley.	23 Mar. 1855.	Interchanges between service and depôt companies.
2nd	Robert King.	1 July 1857.	Applications for individual passages. This involves a statement of the officer's case, to ascertain whether he is entitled to a free passage, and by whom such passage has to be provided.
3rd	F. G. Sills.	17 April 1860.	
3rd	H. P. Hopkins.	3 Oct. 1861.	
3rd	W. L. Lewis.	2 April 1863.	Orders to officers on subjects not included in the business of other divisions.
Temporary.	H. C. Sutleffe.	1 Oct. 1866.	
Supplemental.	F. O. Leggett.	27 April 1868.	Posting of officers to battalions of regiments having more than one battalion, and of officers and serjeants to the staff of depôt battalions.
Supplemental.	B. G. Fitz Patrick.	20 Oct. 1868.	
Supplemental.	C. Vere.	10 Sept. 1869.	Orders to Army Chaplains and Surgeons, and correspondence relative to the provision of medical attendance for corps, &c.
			Examining into circumstances of claims of officers for travelling expenses, to meet enquiries from the War Office.
			Officers proceeding abroad.
			Notifying staff appointments, and preparation of staff returns, including the *monthly* return of general and staff officers in Great Britain.

ADJUTANT-GENERAL'S OFFICE—*continued.*

GENERAL BUSINESS AND STATISTICAL DIVISION—*continued.*

Correcting the staff portion of the Monthly Army List.

Volunteering, and transfers of bodies of men.

Orders on reduction, &c., of the Army.

Preparation and issue of the Horse Guards' General Orders, and the Departmental correspondence relating to the Army Circulars.

Furnishing, on application, statements of officers' services, as follows:—

In the case of a General Officer (having no Field Service) who is a candidate for appointment to a regiment.

In the case of a Lieutenant-Colonel claiming the rank of Colonel. (The periods of regimental duty, or of command of mixed forces, the dates of embarkation and disembarkation, and all periods of leave of absence on medical certificate and on private affairs, are stated.)

In the case of an officer applying to retire by the sale of his commission, his actual foreign service, exclusive of leave of absence, is stated.

In the case of a regimental officer being proposed for the Staff, the Adjutant-General states whether he can be spared from his regimental duties.

Grants of leave of absence to officers, including the preparation of returns of officers absent without leave, and of officers late of the Indian Army granted leave of absence.

Issue of official books.

Preparation of the periodical returns of the Army, viz.:—effectives, establishment, distribution, casualties, increase and decrease, courts-martial, and crimes and punishments.

Preparation of special returns required by Parliament, Committees, War Office, Commander-in-Chief, and public departments.

Maintenance of the following registers:—

1. History of regiments.
2. Special return book.
3. General order book.
4. Correction on the issue of the Gazettes, &c., of an office army list, for the statement of officers' cases.
5. Leave of absence to officers.
6. Staff officers (dates of appointment and removal).
7. Embarkations (dates of, and numbers embarked).
8. Reports of arrival (for statement of cases).
9. Transmission of documents through the office.
10. Entry books of the division.

DISCIPLINE DIVISION.

Under the Orders of Colonel WHITMORE, Assistant Adjutant-General to the Forces.

Name of Branch.	Class.	Establishment of Clerks & Names.	Date of Appointment.	Business.
DISCIPLINE BRANCH.		1 First Class		The following are the several subjects which become matter of correspondence in this branch.
		2 Second Class		* Duties of honour over the person of the Sovereign, members of the Royal Family, and foreigners of distinction.
		3 Third Class or Supplemental		* Parades, state ceremonies, and reviews of regimental troops in London and elsewhere.
	1st	E. G. Syms	1 Aug., 1834	Courts-martial, courts of enquiry, and questions connected with the Mutiny Act and Articles of War.
	2nd	H. S. Gore	13 Mar., 1854	Examination of officers for promotion, and appointment to the staff.
	2nd	S. L. Griffiths	10 Mar., 1854	Formation of classes for the Staff College, and matters relating to the Royal Military College.
	3rd	H. F. Gladwin	12 Mar., 1863	* Army school and library system, posting and training of Army schoolmasters, and everything connected with their discipline.
	3rd	E. Collins	28 Nov.,1863	* The musketry system of the Army, and the assembly of class of officers and men for instruction at Hythe, four of which are made up annually.
	3rd	J. H. R. Triscott	11 Jan., 1866	* Military arrangements connected with the meeting of the National Rifle Association at Wimbledon, and the competition for the Army prize.
				* Military gymnasia, and military school of music.
				Examination and submission of cases of soldiers recommended for restoration of forfeited service.
				Questions connected with the performance of divine service to the troops.
				Mess regulations for officers and men, and questions and disputes connected with the mess and band funds.
				References on matters concerning the regimental registers of soldiers services.
				* Inspection of Militia, Yeomanry, and Pensioners, after annual training.
				* Transfer to reserve forces of non-commissioned officers permitted to complete their time therein after stated periods of service in the Line.
				* Attaching officers of Militiaand Volunteers to the Regular Army for drill, and providing additional instructors for the former during training.
				* The grant of rewards for good shooting and good swordsmanship and lance practice.
				* The special confidential reports furnished *annually* by General Officers Commanding at home and abroad for the information of the Field-Marshal Commanding-in-Chief.
				Matters connected with the Contagious Diseases Prevention Acts.
				Claims and complaints against officers and men, and generally every question, however trivial, that comes to the Horse Guards connected with the discipline of the Army, and of the Militia when embodied.
				The senior clerk of this branch has also charge of what are called the *special papers* of the office, much of the correspondence connected with which goes on in the branch, and he also acts as private secretary and confidential clerk to the Adjutant-General.

N.B.—On the subjects marked * the Senior Clerk of the Branch takes his orders direct from the Adjutant-General; on the others, he reports to the Assistant Adjutant-General.

CLOTHING DIVISION.

Under the orders of Colonel HERBERT, C.B., Assistant Adjutant-General to the Forces.

Establishment of Clerks.	Duties.
1 First Class. 2 Second Class. 2 Third Class. 1 Temporary. *First Class.* G. F. Howes. Date of appointment, 1st January, 1832. *Second Class.* J. M. Jopling. Date of appointment, 15th January, 1848. John Calvert. Date of appointment, 17th August 1855. *Third Class.* W. T. Whitehead. Date of appointment, 29th November, 1864. Walter Wilkinson. Date of appointment, 1st April, 1859. *Temporary.* Richard Stainforth. Appointed 11th Sept., 1867. And two Soldier Clerks, temporarily employed on business connected with Medals.	Owing to there not being a sufficient number of First Class Clerks for each Division, the Clerk who acts under the Deputy Adjutant-General in carrying on the Confidential Report Business has been necessarily allotted to be the Senior Clerk of this Division. He has a general superintendence of the business, which meets the necessities of the case, as the other experienced Clerks are competent to act under the direction of Colonel Herbert in the following subjects, viz.:— All correspondence relating to— Arms, Ammunition, Accoutrements, Clothing, Necessaries, Saddlery and Horse Appointments, Drill, Inventions, Experiments, &c., Honors and Distinctions of Regiments, Officers' Uniform, and Dress Regulations. Armourer Serjeants, Artificers, Master Tailors, Horses and Riding Departments, Commissariat, Purveyors, Veterinary, The Army Hospital Corps, Military Store Staff Corps, Commissariat Staff Corps, Serjeant Cooks, Staff Clerks, Military Mounted Police, Good Conduct Medals, Victoria Cross, Medals for Distinguished Conduct, War Medals, Lost Medals, And the Entry of the Books of the Division.

DISCHARGE DIVISION.

Under the orders of Lieut.-Colonel STEWART, Deputy-Assistant Adjutant-General to the Forces

	Class.	Clerk.	Date of First Appointment to the Office.
DISCHARGE.	1st	T. B. Strong.	1 September, 1840.
——	2nd	A. H. Tanner.	1 June, 1855.
Major R. C. Stewart.	2nd	H. C. Hampshire.	27 October, 1857.
	3rd	M. N. Oakes.	29 May, 1863.
	Temporary	W. W. Cutler.	6 May, 1867.
		And one Soldier Clerk.	

GENERAL DETAIL OF BUSINESS.

Discharge of soldiers under various warrants and examination of records, and correspondence relating thereto. Completion of soldiers' services to the date of final discharge from the Army, and confirmation of their discharge documents.

Examination of claims of men entitled to permanent or deferred pension, according to warrants under which enlisted; also claims to renewal of pension, or additional good conduct badges.

Correspondence with reference to the registration of soldiers for discharge, their services, &c.

Preparation of periodical lists for the War Office of men discharged.

Promotion of Non-Commissioned Officers.

Transfer of soldiers from one regiment to another.

RECRUITING DIVISION.

Under the orders of Major-General EDWARDS, C.B., Inspector-General of Recruiting.

Class.	Clerk.	Date of First Appointment to the Office.	General Detail of Business.
1st	Charles Bruce.	28 Aug. 1830.	Providing recruits, for supplying deficiencies in all branches of the Service.
2nd	Henry Howes.	7 July 1845.	Enlistment of boys from Royal Military Asylum, Royal Hibernian Military School, Caledonian Asylum, Patriotic Fund School, Union Workhouses and Industrial Schools, foreigners, bandmasters, and men for corps of armourers.
2nd	George R. Cook.	1 July 1849.	
3rd	Henry Newland.	1 July 1861.	
Temporary.	Peter Gaskell.	5 Aug. 1867.	Detaching, removing, and relieving line serjeants on recruiting service.
Supplemental.	W. J. Macleod.	28 April 1868.	Registry of pensioned serjeants for employment on recruiting staff, and their appointment to districts.
			Discipline and removal, if necessary, of paid recruiters.

Recruiting Division—*continued.*

General Detail of Business—*continued.*

Appointment, registry, and control of civilian medical practitioners authorized to examine recruits throughout the United Kingdom.

Release (with protecting certificate) of Recruits reported ineligible, from recruiting districts or regiments and depôts, for various causes, and of boys found, on probation ineligible.

Notification to Recruiting districts of changes of quarters of regiments.

Re-enlistment of special cases.

Disallowance of expenses in cases of culpable inattention.

Searching of records or communicating with Recruiting districts, relative to supposed enlistments.

Notifying to Recruiting districts changes in stations of staff officers of pensioners.

Notifications to Recruiting districts of appointments of inspecting field officers, adjutants, staff surgeons, and superintending officers.

Leave of absence to all officers employed on the recruiting service.

Re-engagement of soldiers while serving, as regards transfer from one regiment to another.

Alterations in schedule of age, standard, and levy money of recruits, and all other regulations for conducting the recruiting service.

Correspondence with War Office is necessary regarding the following subjects:—

Leave of absence to Recruiting district paymasters.

Enlistment of foreigners.

All changes as to age and standard of recruits.

Appeals from subdivision officers against disallowances.

Decisions of His Royal Highness the Field-Marshal Commanding-in-Chief requested on proposed disallowances.

Approval of appointment of paid pensioner recruiters.

Cases of fraudulent enlistment of militia men, and re-enlistment of reserve forces men.

Applications of men to serve in the reserve forces.

Recruiting for colonial corps (general questions).

Cases of re-engagement or re-enlistment of men where there is a deviation from the Royal Warrant.

Alterations in routes chosen for recruits.

All financial questions involving any outlay or departure from rule.

All changes in system of recruiting the Army.

Correction of re-engagement schedules, or re-engagement of soldiers anew.

The following Returns are also prepared in this Division:—

Weekly.

Of recruits enlisted in the various Recruiting districts, and at head-quarters and depôts of regiments, showing the number raised for general service, re-engaged after first term of service, discharged, &c.

Monthly.

Of recruits enlisted in subdivisions of Recruiting districts, and at head-quarters of regiments and depôts, with abstract of numbers raised by parties of the line, pensioners, &c.

RECRUITING DIVISION—*continued.*

GENERAL DETAIL OF BUSINESS—*continued.*

Of state of the army, giving establishment, number of effectives, rank and file, increase and decrease since last month, number of recruits joined, and showing in what districts the regiments are recruiting. (Printed by War Office, and distributed).

Of state of the army, as above, with regiments in India given separately, showing number of parties out, with number of recruits raised in Recruiting districts and at head-quarters, &c.

Quarterly.

Of men raised in recruiting districts by line parties, pensioners, and at head-quarters and depôts of regiments (War Office). Checked and corrected to agree with the monthly returns mentioned above.

Showing the regiments opened to recruiting in various districts, and to what parties—whether line, pensioners, &c. (To Inspecting Field Officers).

Annually.

Of men raised for cavalry, artillery, engineers, military train, and infantry, separately, in recruiting districts, by line and pensioners, and at head-quarters of regiments and depôts, of general service men raised for each arm of the service, of men re-engaged after discharge, and how disposed of.

MEMORANDUM.

The business, circumstances of extended business from time to time, and changes in the Establishment, of the Adjutant-General's office, are set forth in the Book of Duties, dated 1st April, 1868.

(Signed) W PAULET,
A. G.

DEPUTY ADJUTANT-GENERAL, ROYAL ARTILLERY.

MILITARY SECRETARY,

With reference to War Office letter of the 16th instant, calling for a distribution of the business at Horse Guards, and the detail of the work allotted to each room in the several departments, the Deputy Adjutant-General, Royal Artillery, has the honour to report that the Establishment and duties of his office are as under, viz.:—

Establishment.

1 Deputy Adjutant-General.
1 Assistant Adjutant-General.
1 Deputy-Assistant Adjutant-General.
1 Superintending Officer.
1 Quartermaster and Commissary of Stores.
6 First Class
10 Second Class
1 Third Class
3 Temporary
} Soldier Clerks.

Duties.

The Duties of the Office are divided into four branches, each under an officer, as follows:—

No. 1 BRANCH, under the Assistant Adjutant-General, with—

1 First Class
3 Second Class
} Clerks.

No. 2 BRANCH, under the Deputy-Assistant Adjutant-General with—

1 First Class
1 Second Class
1 Temporary
} Clerks.

No. 5 BRANCH, under the Quartermaster and Commissary of Stores, with—

2 First Class
1 Second Class
2 Temporary
} Clerks.

No. 4 BRANCH, under the Superintending Officer, with—

2 First Class
5 Second Class
1 Third Class
} Clerks.

The detail of each Branch is as follows:—

No. 1 BRANCH. Colonel Middleton, C.B., Assistant Adjutant-General, R.A.

No. 16 ROOM.

Correspondence connected with discipline, interior economy, removals of batteries or men, drafts for foreign stations, preparation of all Indian drafts, restoration of forfeited service, claims to reckon former service and all miscellaneous correspondence, transfer of men from one brigade to another, or to and from other regiments, drill instructors for volunteer corps, annual inspections of volunteer corps, recruiting, formation of classes of non-commissioned officers and men for instruction in the Royal Arsenal, Woolwich, and at Shoeburyness; selection of non-commissioned officers and men for medals and gratuities and annuities, and distribution of the medals; all correspondence regarding medals; transmission of rolls of men entitled to war medals, and distribution of them when received, also replacement of lost medals and correspondence thereon; claims for prize-money and all correspondence thereon.

No. 2 BRANCH. Captain Traill, Deputy-Assistant Adjutant-General, R.A.

No. 8 ROOM.

General correspondence respecting clothing and regimental necessaries clothing accounts, annual; kit accounts; annual compensation claims; compensation claims of men discharged; demands for clothing; demands for necessaries; demands for sea-kit necessaries.

Purchase, transfer, and sale of horses.

Correspondence connected with the Confidential Reports and Returns (General Officers and Regimental) from all districts at home and abroad.

B.

Enquiries after soldiers, serving or discharged; enquiries after deserters, and correspondence relative to their disposal; discharges of all nature at home and abroad; preparation and forwarding discharge documents to the Royal Commissioners at Chelsea.

Examination of all casualty Returns from which records and attestations are checked; custody and completion of the records of all brigades on foreign service.

N.B.—The duties detailed under letter "B" are actually conducted at Woolwich, in a branch of the Deputy Adjutant-General's Office, where all records and discharge documents are kept.

No. 3, The Store Branch. Quartermaster and Commissary of Stores John Cochran, R.A.

No. 45 Room.

I.—*Armament of Fortresses at Home and Abroad, and Equipment of Siege Trains.*

Under this heading is included the correspondence and the completion of Returns and Demands arising out of questions of introduction of new matériel; the arming of new works, or the revision of existing armaments, and equipment of the siege train; and since the duties of the late Director-General of Artillery were partly transferred to the Horse Guards, the great number of changes in war matériel, and the extended introduction of rifled ordnance, has considerably increased those duties.

II.—*Equipment of Field Artillery.*

Under this head the duties performed are the preparation of details in connection with the maintenance of Field Artillery Reserves, the equipment and maintenance of Horse and Field Artillery Batteries, the examination of the estimates and demands for this service, and the carrying out of the correspondence in connection therewith.

III.—*Personal Equipment of the Royal Artillery.*

Under this head is involved the examination of the annual returns of small-arms and accoutrements of the entire regiment, and as they are (except in the Depôt and Coast Brigades) prepared separately by batteries, each having a distinct account at the War Office, the work entailed is greater than would at first appear, and includes a great deal of correspondence during the year.

IV.—*For Militia Artillery Service.*

All estimates and demands for this service, as far as concerns the supply of ordnance and artillery equipment, are examined here, and the correspondence connected with them between artillery districts, the Horse Guards and War Office, conducted.

V.—*For Volunteer Artillery Service.*

The same services for the Volunteers as in IV. for the Militia Artillery, which have been very considerable during the organization and armament of the force, but now that the several corps have been equipped, the duties are not so great; but, nevertheless, the repair of batteries, provision and replacement of stores from time to time, cause correspondence involving considerable clerical labour.

VI.—*Miscellaneous.*

Demands for regulation books, printing, repairs to the office and furniture, are prepared here; and the distribution to the Regiment of printed books, army circulars, army general orders, and regimental orders made

No. 4 Branch. Captain J. T. Cole, R.A.

No. 26 Room.

General superintendence of the clerks and duties of the office.

Confidential correspondence.

Correspondence relating to officers on—

Promotion and retirement.
Appointments, exchanges, and removals.
Successions to vacancies for Military Secretary.
Courses of instruction.
Debts and misconduct.

Correspondence relating to appointments, promotions, and removals of master gunners.

Transfers of men to and from coast brigade.

Preparation of regimental orders and of draft letters, reports, &c., on all important subjects in the general work of the office.

No. 24 Room.

Preparation of estimates, and correspondence relating thereto.

Compilation of returns of officers, men, and horses, periodical and special.

No. 16 Room.

Officers' records and succession books.

Reports of embarkation and disembarkation, and of removal of brigades and batteries.

Courts-martial and punishment returns.

Returns of boys educated at Chelsea and Dublin.

Annual increase and decrease returns.

Room No. 7.

General Registry.

All letters received in the office are first entered in the General Register Books according to the departments or stations from which they emanate, they are then handed over to the branches of the office to which they belong, and are entered in the day books. The officer at the head of each branch then takes the orders of the Deputy Adjutant-General as to the mode of dealing with each letter, and the necessary communications are thereupon written for signature.

All letters when signed are handed to the Registry for dispatch, the action taken upon each being first entered in the Register Book.

The copies of these letters are retained by the branches until the subject is finally disposed of, when they are handed to the Registry for deposit and future reference.

A general index to all the register books is kept, by which any subject can be traced, and the papers relating to it produced with the greatest facility.

The number of letters received during the last year is as follows :—

Source from which received.	Total per Month.	Total per Annum.
From the various Public Departments	422*	5,057*
	1,266	*15,171*
From Home Stations and miscellaneous sources ..	610*	7,326*
	1,830	*21,978*
From India and Colonies	130*	1,562*
	390	*4,686*
	1,162*	13,945*
	3,486	*41,835*

Of the above figures, those followed by an asterisk (*) merely represent the letters *received* in the office. The italic figures determine the estimated total numbers received into and sent out of the office: omitting periodical returns and routine papers.

DEPUTY ADJUTANT-GENERAL, ROYAL ENGINEERS.

SUMMARY OF WORK performed in the Office of the Deputy Adjutant-General of Royal Engineers.

HORSE GUARDS,
19*th April* 1869.

OFFICERS' DIVISION.

Clerks { Serjeant-Major J. Waugh.
„ W. Kellangher.
„ J. Batters.

The Division carries out the correspondence and all the general work connected with the eight Imperial and seven Indian Battalions of Officers, under the following heads:—

Heads.	Detail.
Allowances	Detention. Forage. Field. Mess. Passage. Personal. Retiring. Servants, &c. &c.
Applications	Of any nature.
Claims	Of any nature.
Committees	Employment of Officers upon.
Commissions	Appointments to the Corps. Retirements. Resignations.
Changes of Stations of Officers	All Orders and Questions relating to.
Exchanges	Officers exchanging with each other.
Estimates	Command pay. Extra pay. Servants' allowance, and other estimates required to be furnished.
Leave of Absence	All orders and questions relating to.
Medical Boards	All questions relating to.
Pay	All questions relating to.
Promotions	Regimental and brevet.
Passages	All questions relating to, for officers.
Quarters, Fuel, and Light	All questions relating to, for officers.
Reports	Special and various.
Returns	1. Extra pay and servants' allowance, from all stations at home and abroad examined prior to transmission to War Office and agents. 2. Confidential reports on Lieutenants. 3. State of horses and horse appointments of officers in Receipt of forage. 4. Increased pay to Lieutenants. 5. Officers on leave from India. 6. Officers doing duty at the Depôt. 7. General Staff. 8. Monthly distribution and any other that may be required, respecting the officers.
Records of Service	These are carefully kept up for the whole of the officers of the corps.
Miscellaneous	Cannot well be detailed.

NON-COMMISSIONED OFFICERS' AND MEN'S DIVISION.

This Division carries out the correspondence, and all work connected with 43 Service, Survey, Depôt, and Skeleton Companies in India, together with that relating to the two Troops and Depôt of Royal Engineer Train, and is subdivided into the following Branches:—

Arms Branch.

Clerk—Serjeant John Warner.

Heads.	Detail.
Arms and Accoutrements of the Corps	Examination of Annual Reports and Boards of Survey; keeping up of arms, ledger, transmission of reports, &c., to War Office, and corresponding with officers concerned; attending to correspondence from all stations, and requisitions for arms, &c., from Home stations: each company renders a separate account.
Arms and Accoutrements of Supernumerary Non-Commissioned Officers (25 stations at Home and Abroad)	Examining Annual Reports, and keeping an account of the arms and accoutrements at each station; attending to the Requisitions and correspondence.
Stores and Equipment at the Chatham Establishment, Royal Engineer Train and Camps of Instruction ..	Examining and submitting Annual Estimates and Accounts; attending to requisitions and correspondence.
Telegraph, Photograph, Signalling, and Torpedo Stores..	Attending to correspondence from War Office and Chatham Establishment respecting signalling and telegraph stores, estimates and arrangements at all stations at home and abroad.
Inventions and Experiments ..	Attending to correspondence from War Office and Chatham relative to inventions submitted to, and experiments made by Royal Engineer Committee.

Clothing Branch.

Clerk—Serjeant-Major A. Andrews.

Heads.	Detail.
Demands for Clothing, Boots, &c.	To examine each; compare against strength of company stock on hand, &c.; also to provide for transfer proposed; subsequently to transmit papers to War Office.
Demands for Necessaries and Sea Kits	These are examined the same as for clothing, and transmitted to War Office.
Clothing Lists	To obtain from companies, see that they are properly completed, and retain for the examination of the Compensation Pay List.
Compensation Claims	To examine every separate figure with clothing lists and records of service. To authorize the amounts to be passed by paymasters, accountants, &c. These are very heavy. Every man at warm stations has two separate claims in each year, and the clothing lists are marked for each individual claim.
Great Coats and Cloaks	To examine all boards on; arrange the exchange with War Office, and give orders to companies and detachments.
Leather Leggings	Are dealt with in the same manner as great coats.
Companies and Detachments for Abroad	To make all arrangements for clothing of, according to climate, &c., and to give instructions for future guidance of companies.
Patterns and Material	All correspondence relative to both, with War Office and companies.
Indian Transfers	To furnish War Office with detailed statements of articles of clothing in wear by men.
Annual Accounts of Clothing ..	To collect and forward to War Office and to keep duplicates for reference on receipt of subsequent requisitions.
Annual Accounts of Necessaries.. ..	Are dealt with in the same manner as those for clothing.
Annual Boards	To deal with all complaints and suggestions connected with clothing.
Annual Estimates..	To furnish to War Office for future supplies.
Miscellaneous	Cannot well be detailed.

General Correspondence Branch.

Clerks { Serjeant John Bull (Home).
„ John G. Bilton (Foreign).

Heads.	Detail.
War Office (Home and Abroad)..	All correspondence relating to the appointment, promotion, and movement of military foremen of works, staff-clerks, volunteer instructors, and all supernumerary staff, non-commissioned officers, and all general questions, such as pay and allowances, disallowances, rewards for good shooting, works, &c., and all other subjects, other than those relating to officers, arms, clothing, and records.
Horse Guards (Home and Abroad)	Correspondence to and from the Adjutant-General relative to general questions affecting the companies of the corps, and preparation of letters connected therewith requiring that officer's signature. Correspondence to and from the Quartermaster-General relative to movement of troops being carried out after the necessary sanction has been obtained. Application for routes, &c. All correspondence to and from the Military Secretary relative to finance, &c.
Home Companies..	All correspondence relating to companies and detachments, and directing all movements of the men composing the same, the appointment, examination, and movement of non-commissioned officers employed as temporary military foremen of works, clerks, &c. Preparing lists of men for instruction, and keeping records of those instructed in special schools. Correspondence relating to recruiting for the corps, and forwarding authorities for the special enlistment of men and boys. Transfer of men from other corps. Boards relating to working pay of men, and correspondence relating thereto. Applications for permission to marry. Regimental boards of examination of non-commissioned officers for promotion, and correspondence in connection therewith.
Foreign Companies (Abroad) ..	All correspondence relating to the companies and detachments of the corps serving abroad, and the carrying out of all movements of the men composing the same, after the necessary sanction has been obtained. The appointment, &c., of military foremen of works, staff-clerks, and all supernumerary staff, non-commissioned officers. Boards relating to working pay, the mustering of miners as artificers, and the examination of non-commissioned officers for promotion, and fitness for special instruction at Chatham, and all general questions such as invaliding, prizes for good shooting, prize money, marriages, transfers, &c., and all subjects other than those relating to officers, arms, clothing, and records.
Confidential Reports and Inspection Returns	General. The custody and correspondence in connection with all complaints preferred at and the irregularities, &c., commented upon by the Inspecting-General Officer, excepting those relating to clothing and arms. The necessary arrangements, &c., for submission of the same to His Royal Highness the Field-Marshal Commanding-in-Chief. Commanding Royal Engineers. Ditto ditto.
India Office	All correspondence to and from, relative to the selection for and employment of men of the corps in India and Persia, together with all matters relating to their invaliding, remand for misconduct, and return to ordinary duty.
General Letter Book Issued ..	Keeping up index, and entering all letters and memoranda written in the Home, Foreign, War Office, and Returns Branch, including those connected with India Office, &c., &c.

Returns Branch.

Clerks { Serjeant-Major J. L. Stewart,
„ John Bingham.

Heads.	Detail.
Annual	Rendering to Commandant of the Royal Military Asylum at Chelsea, and Royal Hibernian Military School, annual return of boys who have been educated in those schools, Compiling from company returns for Adjutant-General the annual return of increase and decrease, courts-martial ages, &c.
	Preparation of returns for compiling the annual estimates; list of supernumeraries; distribution of corps and survey companies.
Quarterly	Return of discharges to War Office.
	Increase and decrease return of recruits.
Monthly	Compiling from company returns which have to be prepared with the latest information, and corrected in accordance therewith, 3 monthly states of corps, 2 monthly returns of corps.
	Return of number of men serving in Great Britain, and monthly returns of men embarked for India.
Weekly	Return of recruits.
	Return of discharges.
Promotions and Transfers ..	Submitting to the Assistant Adjutant-General, Royal Engineers, for approval, monthly, the promotions to fill vacancies of non-commissioned officers; preparing a rough draft of the promotions and transfers; issuing general orders of promotions and returns of transfers to the several Commanding Royal Engineers at home and abroad; recording the same in the register of promotions and transfers; keeping a general seniority list of the non-commissioned officers of the whole corps, and also a seniority list for each promotion division.
Removal of Companies, &c. ..	Preparation of memoranda submitting for approval of His Royal Highness the Field-Marshal Commanding-in Chief through the Quartermaster-General the changes proposed in the stations of companies and detachments at home and abroad, as also reinforcements for companies abroad.
Discharges and Parchment Certificates	Preparing the parchment certificates for confirmation, and returning them to the station from which they are received.
	The discharge boards are entered and sent to Chelsea and War Office.
Miscellaneous	Marching in and out reports of companies and detachments are received in duplicate; one is guarded, and the other is sent to the station the company or detachment has proceeded to, or quitted.
	Preparing drafts and writing letters on correspondence relating to promotions, returns, &c.

Record Branch.

Clerks { Serjeant G. Bolton, Serjeant J. H. Helps,
„ W. Hunter, „ N. Murray,
„ C. Adkin, „ C. Eastmead.

Heads.	Detail.
Correspondence	Registry of letters received, composing and writing replies to, guarding and indexing letters received, copying letters issued, and indexing same.
Compilation of Records	Examination of casualty returns.
	Entry of casualties in records.
	Checking good conduct pay.
	Correspondence relative to errors in returns of variations of service; compiling general index to records.
Courts-Martial	Examination of proceedings of.
	Registry of Receipt of.
	Checking entry in records of.
	Correspondence relative to.

RECORD BRANCH—*continued.*

Heads.	Detail.
Courts of Enquiry on Deserters..	Examination of proceedings of. Registry of receipt of. Entering in records.
Marriages..	Registry of. Indexing same. Entering in records.
Baptisms	Registry of. Indexing same.
Discharges	Returns relative to. Examination of applications for. Granting authorities for. Correspondence relative to. Notification to Paymaster of men who have been allowed to purchase.
Re-engagements	Preparation of returns for. Guarding receipts for. Declaration on. Registry of same. Transmission to Paymaster of. Comparison of records of men who wish to re-engage. Quarterly return of men re-engaged.
Keeping up regimental defaulters' book, &c.	Examination of regimental offence returns. Guarding and indexing same. Compilation of general index to. Correspondence relative to.
Returns	Registry of returns of variations of service and regimental offences. Compilation of annual return of punishments. Preparation of weekly pay-lists for clerks. Making out muster rolls and pay-lists for clerks (monthly). Making out officers' allowances (monthly and quarterly). Special returns as called for.
Miscellaneous, &c.	Entering attestations of recruits in rough description book. Preparation of records of recruits. Preparation of defaulter sheets for ditto. Preparation of deserters' reports for War Office. Record of deserters. Noting arrival of men at Depôt. Noting departure of men from Depôt. Recording receipt of documents of non-effective men; arranging same for custody. Issue of War Office circulars. Issue of Horse Guards ditto. Issue of Corps Circulars and Orders. Preparing weekly demands for stationery, &c. Drawing and issuing pay to clerks. Examination of attestations of men for discharge. Examination of proceedings of Discharge Boards. Preparation of revised records for companies (when requisite). Quarterly examination of records, with attestations in custody of Paymaster. Transmission of attestations of recruits to Paymaster. Checking good conduct pay. Vouchers for Paymasters. Registration of men embarking for foreign service.

HORSE GUARDS,
12*th April*, 1869.

H. FANE KEANE, *Col.*,
D. A. G., R. E.

APPENDIX No. V.

LORD HARTINGTON,

WITH regard to the question of the transfer of the Store accounts to the Chief Auditor, I submit that it would be as reasonable to expect a Military Store Officer in charge of a station to know what Stores he had on hand, or to maintain them in proper proportions without ledgers, as to suppose that the Director of Stores could maintain a proper supervision over the Stores and Store proportions at all the Store Stations at home and abroad, if the Store Ledgers of those stations were removed from his custody. 7969 1160

It may be said that the information required could as readily be obtained by reference to the Chief Auditor, but we know from experience that practically we cannot obtain information so readily or so immediately from other branches as we can from our own, or, in other words, acting on the principle of "if you want a thing well done, do it yourself."

The Ledger Subdivision is an integral part of the Store Branch of this Office, and the constant reference to the ledgers by the members of the several subdivisions could not be carried out if the Ledger Subdivision was taken from the charge of the Director of Stores.

Besides, the practice of examining the Store Ledgers to see what Stores are on the spot, or can be withdrawn from other stations, before giving orders for their purchase or manufacture at the Tower, or Woolwich, cases frequently arise in which reference has to be made, at a moment's notice, to the Store Ledgers and other records in the Ledger Room, and to employ the greater part of the Staff in preparing lists, and to compile from them and the Store records in the other subdivisions statements of Stores on hand at various stations and on their way thither, so as to enable the Secretary of State to decide on the quantities and descriptions of supplies to be sent out, or held in readiness; and it must be clear that the unity of action, so essential to prevent confusion and discredit, can only be obtained by undivided responsibility, which would not be the case were the Store Ledgers removed from the custody of the Director of Stores.

Should it be thought that balance-sheets would answer for the Director of Stores, in lieu of ledgers, I would observe that these would not only involve an amount of time and labour in their preparation, but, when compiled, would by no means afford the information which the ledgers now do. They would merely show the Stores on hand at certain dates, but they would not enable the Director of Stores to tell what quantities of Stores sent from this country, or from one station to another, had arrived, or were on their way. These particulars can only be obtained from the ledgers, and it is obvious that in times of emergency, it is of the highest importance that the Director of Stores should have the most accurate data in his possession to enable him to afford the Secretary of State full and correct returns of the Stores at the various depôts at home and abroad.

I speak from long experience, and beg to refer the Secretary of State to the many instances in which I have been called upon, at a moment's notice, to furnish full information as to the state of the Stores at various stations; and, but a few days ago, I was summoned, with the other Heads of Departments, at 2 P.M., to meet Sir E. Lugard at 4 P.M., to consider what Stores should be sent to Jamaica. Lists were at once prepared, as before described, and I was in a position to submit what should be sent, which met the Secretary of State's approval the next morning, and the equipments were ordered, and despatched from the Tower and Woolwich in time for shipment by the West India mail-steamer at Southampton four or five days afterwards.

If, therefore, the means which now exist for the immediate furnishing of returns and other information be taken away from the Director of Stores, I foresee that it will be virtually impossible to carry on the Store duties either with efficiency or despatch, and errors and delays will very likely arise when accuracy and promptitude are of vital importance.

I submit that these are important considerations, and the breaking up of such a well-organized system must involve a heavy responsibility, and I trust may not be entertained.

The question, you are aware, was fully discussed before your Committee with the gentlemen from the Treasury, and evidence obtained from the Heads of my Subdivisions, as well as from Mr. Tatum and myself, who all pointed out their several objections.

With regard to the introduction of Military Store Officers into this Office, in lieu of the Clerks at present employed, your Committee also examined Captain Gordon, Mr. Tatum, and myself on this point, and it was clearly shown and, as I understood, admitted, that it would be most prejudicial to the good of the Service, as it would militate against the efficiency of the Military Store Officers themselves, who would thus be removed from acquiring that practical and intimate knowledge of Stores which can only be obtained by actual contact with them at their respective out-stations.

To render this Office thoroughly efficient, the gentlemen must be permanently attached to it, as the traditions and regulations governing the several transactions must be thoroughly known, or we should have no fixed principles to work upon, and so be in constant confusion.

Military Store Officers must take their tour of service by roster, and even at Woolwich and the Tower, the movable system is found to be attended with great inconvenience from the above cause.

Moreover, the Secretary of State would lose that complete control and supervision which he now possesses over the stores at the several Military Store Stations by the annual surveys and quinquennial remains held by the gentlemen of this Office at all Home Stations, and which could not be held by Military Store Officers over the Departments in charge of their brother officers. Abroad the surveys and remains are taken under the direction of the Officer Commanding, who appoints an officer for

the purpose; but as a remain-taking is a very complicated service, it is found that this duty is not performed with the same accuracy as at Home.

There would be no economy in the substitution, as Military Store Officers, class for class, have a higher rate of pay, including allowances, than the clerks of this Office.

Many other reasons could be assigned, but I should only be going over the ground so thoroughly and fully considered by your Committee, in showing that there must be an Administrative as well as an Executive Department of the Store Branch, and that the same officers could not perform both functions with benefit to the public service.

J. Crawford Caffin, *Director of Stores.*
5/12/65.

7969
1160

It is an acknowledged principle in the administration of all Executive Departments that all expenditure should be audited by some authority independent of the Executive Department.

Stores are so easily convertible into money that their expenditure should be as accurately audited as that of money itself.

The Cash and Store Accounts of the several Departments are so dependent one on the other that, as the Cash portion is at present audited by the Chief Auditor, the Store portion should also be entrusted to him.

Commissariat, Barrack, and Purveyors stores are audited by the Chief Auditor, who is an authority independent of the Department which administers the expenditure.

The Director of Stores has delegated to him by the Secretary of State a certain control over the money voted by Parliament for the purchase of general stores. He similarly has control over the manner in which those stores are expended; and at the present time, when the audit of his Store Accounts is under his own control, he can authorise the issue of any stores to anyone he chooses, or the writing off of any losses or deficiencies which may have occurred.

This is a power which in no properly-organised administration should be left in the hands of any public officer. It is not intended to suggest that it would be possible that, under the present Director of Stores, any act of a questionable nature could occur; but in large Departments, when a system has been in force for many years, laxity might creep in, and if at a future time any losses were proved to have occurred from malversation, very great blame would attach to the Secretary of State, if it were shown that the first principles of administration had been neglected, in the organization of so important a Department as that of Stores. Moreover, in the event of malversation or undue condemnation of stores, the circumstances should be represented to the Secretary of State, or to the Under Secretary, by an independent officer, and not by the officer at the head of the Department.

Upon these grounds it is urged that the audit of Store accounts should be transferred to the Chief Auditor.

The following are additional arguments which bear upon the question:—

It is desirable that the Heads of the Executive Departments should be relieved from the details connected with the audit of the accounts, so that their undivided attention may be devoted to questions appertaining to their professional duties.

In time of war, the pressure upon the Executive Departments in their administrative capacity, is so great that the audit of the accounts, being considered of but secondary importance, is retarded at the very period that it should be most prompt; and by entrusting the audit to an officer who is solely responsible to the Secretary of State for all the accounts rendered to this Department, any such inconvenience would be obviated.

By entrusting the audit of all accounts to the Chief Auditor, the experience that is obtained in the audit of one set of accounts can be applied to others.

By having the audit of all accounts concentrated in one branch, the services of the examiners and computers become available for the accounts generally, and in the event of any unusual pressure on any class of accounts, the Chief Auditor can appropriate his establishment to meet it.

53
Cape.
1498

It is further to be observed that the Chief Auditor, in auditing the Military Store Accounts, should be guided by the rules laid down when the audit of the Commissariat Store Accounts was transferred from the Commissariat Department to the Accountant-General. These rules are briefly as follow:—

1. The communications from the Chief Auditor to the Military Store Officers should be strictly limited to explanations and enforcement of existing and defined regulations.

2. The opinion of the Director of Stores should be obtained before any attempt is made to enforce a disputed disallowance on a Military Store Officer.

3. Under no circumstances should a reprimand be communicated from the Chief Auditor's Branch.

4. Whenever the Regulations of the Service fail to guide the examiners in deciding upon the correctness of an issue or a charge, a reference to the Director of Stores should be made, to enable the Chief Auditor properly to submit the point in doubt to the authorities for decision.

D. Galton.

REPORTS of a Committee appointed to inquire into the Arrangements in Force for the Conduct of Business in the Army Departments.

Presented to both Houses of Parliament by Command of Her Majesty.

LONDON:
PRINTED BY HARRISON AND SONS.

INDEX

TO

REPORTS, MINUTES OF EVIDENCE, AND APPENDIX

OF THE

COMMITTEE

ON

THE ARRANGEMENTS IN FORCE

FOR THE

CONDUCT OF BUSINESS IN THE ARMY DEPARTMENTS.

For Abstract of the Committee's Reports, *see* pages 26–28.

List of Witnesses examined, with references to the Abstracts of their Evidence given in the Index.

INDEX.

[NOTE.—A Summary of the Observations and Recommendations of the Committee on each subject inquired into is given under each of the subject headings in the Index. The figures not preceded by "*p*" refer to the numbered questions in the evidence printed *verbatim* (Appendix No. III).]

A.

ABYSSINIA.

Stores consigned to two departments with advantage —*Milward, p.* 4.

Confusion caused by stores being consigned to different departments—*Hozier, p.* 6; *Holland, p.* 6.

ADYE, Colonel J. M., C.B. (*Analysis of his Evidence*). *Appendix III, pp.* 70–75.

Commands Depôt Brigade—950. Other positions held by witness in the Artillery—951. Administrative Government of the Artillery; Deputy Adjutant-General responsible for personnel, and Director-General of Ordnance for matériel—953, 994. The Battery is the Artillery unit—953–955, 962. Organization of Artillery necessitates a central administration—955, 956. Duties which should be assigned to Deputy Adjutant-General, Royal Artillery—956, 958, 960. Duties now performed by Deputy Adjutant-General Royal Artillery, which properly belong to Adjutant-General—956, 964. Ditto, Quartermaster-General—956, 964. Ditto, Military Secretary—956, 969. Deputy Adjutant-General Royal Artillery should not be at Woolwich. Necessity for direct communication with Commander-in-Chief—956. Functions of Commander-in-Chief in relation to armaments—980, 992. Commander-in-Chief should be advised by Director-General of Ordnance and Inspector-General of Fortifications—992. Indian experience of witness with reference to the respective duties of Deputy Adjutant-General Royal Artillery, and the other members of the Staff—966–968, 999. Does not think that any of the business now done at Horse Guards could be transacted in the Brigades or Batteries—961–963. Duties which should be assigned to Director-General of Ordnance—956–994. Confusion now existing between duties of Deputy Adjutant-General Royal Artillery and Director-General of Ordnance; work done twice over—956, 991. Responsibility for carrying out experiments—974–976. Responsibility for maintenance of armaments—977–980, 987–989. Inspection of Armaments—980–986, 990, 996–999. Danger of placing Munitions of War and Commissariat Supplies under one Department—956, 970. As these duties are separately administered at the War Office, so also should they be at out-stations—971. The duties of the officer at the head of munitions of war in the Control Department, and those of the Director-General of Ordnance in many respects similar; the two appointments should be fused—971, 989. Questions of charge of miscellaneous stores should be settled by the respective Heads of the Ordnance and Commissariat Branches of the Control Department—995.

Memorandum on Administration of Matériel of War—pp. 74, 75:—History of the administrative system of the Royal Artillery, and account of the respective duties assigned at various times to the Director-General and Deputy Adjutant-General. At the present time, many of the duties which, under the Board of Ordnance, were assigned to the Director-General of Ordnance, are performed by the Deputy Adjutant-General. But the latter officer, having no connection with the Ordnance Committee, the Heads of the Manufacturing Departments, or the portion of the Control Department in charge of matériel of war, has not adequate official knowledge to enable him to advise on questions of armaments, &c. Besides this he has no executive power; he can only recommend. Col. Adye proposes, as a remedy, that the old office of Director-General of Artillery should be revived; that he should have under him the Select Committee, the Manufacturing Departments, the Munitions of War, and the Armaments. A clear distinction should be drawn between the administration of warlike stores and consumable supplies—*pp.* 74, 75.

ALBRECHT, Archduke, Commander-in-Chief of Austro-Hungarian Forces.

Opinion of evils of over-centralization—*Report*, xiii.

ACCOUNTANT-GENERAL'S DEPARTMENT.

1. *General Nature of Duties.*
2. *Details of Work.*
3. *Question of reuniting Audit and Account Duties.*
4. *Administration of Vote* 1.
5. *Establishment.*
6. *Soldier Clerks.*

1. *General Nature of Duties.*

Duties of Accountant-General should be limited to advice and account check—*Balfour, p.* 13.

Function of Accountant-General to see all financial checks properly carried out—*Knox, p.* 21. Also to watch fixed establishments except those of commissioned officers —*ib., p.* 20.

Accountant-General should be chief Financial Officer, and report direct to Parliamentary Under Secretary. He would require two assistants—*White*, 1183, 1184, 1186.

Duties of Financial Control and Examination of Expenditure could not safely be united in any officer under the rank of Assistant Under Secretary, unless there were an audit independent of the War Office—*Milton, p.* 19.

Enumeration of general duties proposed to be assigned to the reorganized department—*Report*, iv. Concurrent financial control should continue to be exercised by the department—*ib.* iv. Reasons for placing department directly under Financial Secretary—*ib.* iii.

2. *Details of Work.*

Modifications which would be rendered necessary by the proposed transfer of the examination of departmental accounts to Administrative Branches of War Office—*Lawson, p.* 15.

Scheme for reorganizing the department under three branches: (1) Control of Finance; (2) Cash and Account; (3) Audit—*White*, 1175–1215.

Claims similar in character should not go to different rooms for examination—*Maclean*, 1234, 1237.

The work should be classified by subjects much more than at present—*Lawson, p.* 15; *Whiffin, p.* 17; *White*, 1196–1198, 1208. Examination of claims by subjects would lead to accuracy in classifying expenditure—*White*, 1216.

Claims under 10*l.* might be paid locally; large amounts should be sanctioned by War Office—*Maclean*, 1229, 1235.

Abolition of pre-audit dangerous. Payments on account of Clothing Factory at Pimlico referred to in illustration—*Whiffin, p.* 16.

Appointment of officers should be checked from the establishment point of view by Account Branch—*Knox, p.* 20.

Questions of Engineer Pay and Allowances which pass through, or are referred to, Deputy Adjutant-General Royal Engineers—*Keane*, 359–389. Reasons why such questions go to him—*ib.* 416, 417. Many of these questions might come direct to War Office—*White*, 530–532.

Part of detail work of Accountant-General should be transferred to a Staff Paymaster—*Balfour, p.* 14.

Registry of Pensions should be transferred to Audit Branch—*Whiffin, p.* 13.

No reason why Accountant-General should not sanction non-effective charges and deal with passage allowance questions. Administration of soldiers' effects should be transferred to solicitor. Examination of Savings Bank

ACCOUNTANT-GENERAL'S DEPARTMENT—*cont.*

2. *Details of Work*—cont.

Account does not properly belong to Chief Auditor's duties—*Brown, p.* 12.

Evils of present mode of dealing with travelling claims—*Lawson, p.* 15.

At home, travelling claims must come to War Office for pre-audit. They should all be submitted to one person—*Maclean*, 1229–1233, 1242–1244.

Authorization of travelling allowances and correspondence on appeals should be dealt with in separate branches—*White*, 1202–1207. Travelling claims are frequently included in the accounts without being sent to War Office for pre-audit—*ib.* 1199–1201.

Difficulties in the correct appropriation by the Book-keeping Room of expenditure on works—*Murray*, 940–949. If the accounts for works were examined and posted in Works Department they would be examined by Chief Auditor, and could be made the basis of the Parliamentary account—*ib.* 946, 947.

Accountant-General's Department to continue to record expenditure—*Report*, iv. To advise on reappropriations of money voted, excesses on votes, pay or allowances in excess of regulations, regulations involving finance—*ib.* iv. To have final compilation of Parliamentary Estimates—*ib.* iv. Accountant-General to sign letters to Treasury in absence of Financial Secretary—*ib.* v. Certificate of Accountant-General to Appropriation Account—*ib.* iv.

3.—*Question of reuniting Audit and Account Duties.*

Reasons which induced Lord Hartington's Committee to propose separation of Audit and Account Branches—*Galton, p.* 18.

Constitution of department previous to division in 1865 described—*Brown, p.* 12.

Distribution of work not based on any principle—*Whiffin, p.* 13.

Respective functions of Chief Auditor and Accountant-General—*Lawson, p.* 14; *Brown, p.* 12; *Whiffin, p.* 13; *Galton, p.* 17. Actual division of work between Audit and Account Branches might be improved. Alterations were proposed by witness in 1866–7—*Galton, p.* 18.

Objections to amalgamation of Audit and Account Branches—*Milton, p.* 18.

Amalgamation of Audit and Account Branches should not be carried out without some paramount advantage—*Galton, p.* 18.

Maintenance of separate establishments for Audit and Account Branches is a mistake, although the duties of the two branches are properly kept distinct—*White*, 1171–1173, 1195.

Attempted separation of audit and account duties has not been successful—*Whiffin, p.* 13; *Maclean*, 1220.

Division of audit and account duties not theoretically satisfactory; it involves increased expenditure, but does not cause double work—*Brown, p.* 12.

Probable saving from amalgamation of Account and Audit Branches—*Whiffin, p.* 13.

Very little (if any) saving would be effected by reuniting Audit and Account Branches—*Galton, p.* 18; *Milton, p.* 19.

Chief Auditor's correspondence relates solely to disallowances. The system of carrying on correspondence and examination of accounts in one room has been tried and found not to answer—*Brown, p.* 12.

When examination and correspondence were conducted in the same room, former was neglected. It is immaterial whether Audit and Account Branches are under one or under separate heads, but it is essential that the same clerks should not be employed on account and audit duties. Clerks employed on audit work should have no power of recommending a departure from regulations—*Galton, p.* 17.

Examination of accounts and correspondence on financial questions should be dealt with in separate rooms—*Brown, p.* 12.

Should be kept separate to a certain extent—*Whiffin, p.* 13.

Present system of keeping examination separate from correspondence should be maintained. The accounts had never been in so forward a state as now—*Galton, p.* 17; *Milton, p.* 18.

Illustrations of the ill-effect of separating correspondence for examination of accounts—*Maclean*, 1221–1228.

Account and Audit Branches should be reunited—*Reports*, iii. and xxi. Reasons which led to separation

ACCOUNTANT-GENERAL'S DEPARTMENT—*cont.*

3. *Question of reuniting Audit and Account Duties*—cont.

—*ib.* xxii. Examination of accounts and correspondence on claims and charges should be brought together—*ib.* xxii.

4.—*Administration of Vote* 1.

Administration of vote for Army pay should be placed under independent authority—*Balfour, p.* 14; *Lawson, p.* 15.

Administration of this vote under witness's scheme for reorganizing the department—*White*, 1209, 1210.

Accountant-General is an administrative officer as regards the vote for the pay of the army—*Lawson, p.* 14.

No necessity for transferring administration of vote for army pay from Accountant-General to an independent officer—*Whiffin, p.* 16.

The functions of Accountant-General and Chief Auditor are badly defined, especially in regard to the administration of Vote 1—*Balfour, p.* 13.

There is no connection between estimate duty and that of regulating pay and allowances—*Knox, p.* 20.

5.—*Establishment.*

Clerical establishment of Chief Auditor's Branch entirely distinct from that of Administrative Department—*Lawson, p.* 14.

There are too many superior clerks in Audit Branch—*Whiffin, p.* 13.

Reasons for the large number of first-class clerks in Audit Branch. Chief Auditor himself urged the necessity for this excess—*Galton, p.* 18.

Established clerks should be divided into many classes. Annual increments of salary should be abolished—*—Whiffin, p.* 13.

Superintending clerks for audit and account duties should be different individuals. Third-class of Audit and Account Branches might be interchangeable—*Galton, p.* 17.

About three-fourths of Account Branch employed in correspondence—*Brown, p.* 12.

Work of present regimental correspondence rooms might be done by examining rooms, with a slight addition to staff—*Whiffin, p.* 13.

Transfer of examination of store accounts to Administrative Departments would cause a large decrease of establishment—*Balfour, p.* 14.

Amalgamation of Account and Audit Branches would make a large reduction of establishment possible.—*Reports*, xxiii.

6.—*Soldier Clerks.*

Objections to employment of soldier clerks or writers in Accountant-General's Branch—*Milton, p.* 19.

Soldier clerks should be employed for mechanical work—*Whiffin, p.* 13.

Employment of Military clerks—*Report*, xxii.

ACCOUNTS, DEPARTMENTAL.

Advantages of having the accounts examined by the branch which authorizes the expenditure. Objections met. Details of proposed system of examination—*Lawson, p.* 15.

The examination should be transferred to the Administrative Branches—*Balfour, p.* 14.

Advantages and disadvantages of examination by Administrative Departments—*Milton, p.* 18.

Cause of delays under present system of semi-independent audit—*Lawson, p.* 15. Present system has neither theoretical advantages of independent audit, nor practical advantages of departmental audit—*ib. p.* 14.

Insufficiency of present system of examination of accounts shown by the small sum disallowed—*Balfour, p.* 13.

Accounts for works should be professionally examined, and posted in Works Department—*Murray*, 931–939, 945. They would be subsequently audited by Audit Branch, and might be made the groundwork of the Parliamentary account—*ib.* 946, 947.

Description of the way in which bills for works are checked locally—*Jervois*, 730. Examination of bills for works in Chief Auditor's Branch. They are only referred to Works Branch in special cases—*ib.* 731, 732. All bills for works should be examined in Works Branch—*ib.* 732, 737. If War Department Surveyor and the Contractor were in collusion, Chief Auditor would not discover fraud unless the estimates were exceeded—*ib.* 733–736.

Mode of examining bills for supplies. Examination by Control Department of War Office unnecessary—*Maclean*, 1238–1241. At present, accounts from Contro

ACCOUNTS, DEPARTMENTAL—*cont.*

Department are rendered unclassified. The classification could be more economically done by accountant than at War Office—*ib.* 1245–1249.

Objections to examination of accounts by Administrative Departments—*Milton, p.* 18; *Galton, p.* 18.

The accounts cannot be the machinery for enforcing economy. They are the machinery for ascertaining that heads of departments do not exceed their powers. This check would be lost if departments examine their own accounts—*Galton, p.* 18.

No objection to the examination of store accounts being removed from Chief Auditor's Branch—*Whiffin, p.* 13. Examination of accounts by Administrative Branches objectionable in principle. No necessity for professional knowledge. In war time examination of accounts would always fall into arrear if it rested with Administrative Branches—*ib.* 17.

Examination in Administrative Branches should be performed by clerks belonging to those branches—*Lawson, p.* 15.

Clerks from Administrative Branches might be temporarily attached to examining rooms for the purpose of examining vouchers—*Whiffin, p.* 17. Naval gunners' accounts could not be transferred to Admiralty—*ib. p.* 13.

Examination in Administrative Branches would readily fit in with independent Audit Office—*Lawson, p.* 15. Treasury Minutes quoted to show the reason for allowing spending departments to examine their own accounts. Treasury insist upon independent appropriation audit—*ib. p.* 14.

Transfer of examination of accounts to Administrative Departments would cause a large decrease of establishment—*Balfour, p.* 14.

Minute by Mr. Douglas Galton recommending the transfer of the examination of store accounts to Chief Auditor—*Appendix* No. V, *p.* 124. Memo. by Admiral Caffin on the proposal to transfer store accounts to Chief Auditor—*ib. pp.* 123, 124.

Store accounts should be made available for statistical purposes—*Whiffin, p.* 17.

Present system of audit described—*Report*, xx. Arguments for placing it under Chief Auditor shown to be founded on misconception of functions of Control Department—*ib.* xix. Control Department should examine store accounts—*ib.* xx. Relief from disallowances would require concurrence of Financial Secretary—*ib.* xxi.

ADJUTANT-GENERAL.

1. *Discipline Duties.*
2. *Recruiting Branch.*
3. *Duties in connection with Supplies.*
4. *Reserve Forces.*
5. *Artillery and Engineer Business.*
6. *Miscellaneous.*

1.—*Discipline Duties.*

Some matters of discipline are dealt with partly by Military Secretary and partly by Adjutant-General—*Forster*, 58, 59. Respective duties of Adjutant-General and Military Secretary in reference to courts-martial—*ib.* 11, 58–63; *Paulet*, 135; *Duke of Cambridge*, 1313.

Questions connected with Mutiny Act and Articles of War—*Forster*, 79. Respective duties of Adjutant-General and Military Secretary in reference to confidential reports on regiments—*ib.* 82, 83; *Paulet*, 147, 148. Ditto mess and band funds—*Forster* 35–38, 80; *Paulet*, 149–152.

Claims and complaints against officers and men should be addressed to Adjutant-General—*Paulet*, 144–146.

2. *Recruiting Branch.*

General nature of business—*Edwards*, 431–433. All questions relating to recruiting, non-payment, discharge and pension, should be dealt with in one office—*ib.* 436–438.

Recruiting and Discharge subdivisions should be kept distinct—*Paulet*, 162; *Duke of Cambridge*, 1324–1326.

Submission to Commander-in-Chief of appeals against disallowances made by War Office—*Edwards*, 434, 435. Matters of detail are not submitted to Adjutant-General or Commander-in-Chief—*ib.* 441, 442. Communications to War Office on minor questions are made by minute paper—*ib.* 440. Proposal for reducing correspondence with War Office by granting increased powers to Inspector-General of Recruiting—*ib.* 439, 443. System of recruiting returns should be revised, and the returns sent only to one branch of War Office—*ib.* 444–448. Pay

and allowances of Inspector-General of Recruiting—*ib.* 449, 450, 452.

3. *Duties in connection with Supplies.*

Reasons why requisitions for stores and clothing pass through Adjutant-General's Office—*Paulet*, 153, 156.

Adjutant-General's work connected with supplies is rendered unnecessary by introduction of Control system—*Power*, 460, 493; *Balfour*, 657.

Under Control system the Adjutant-General will only be consulted on general questions affecting supplies—*Power*, 485.

Functions of Assistant Adjutant-General for Clothing—*Ramsay*, 694. To a certain extent they are identical with those of Director of Clothing, who is really the responsible officer—*ib.* 695–697.

4. *Reserve Forces.*

Discipline of Militia and Yeomanry—*Paulet*, 185, 186. Adjutant-General is not consulted in regard to discipline of Volunteers—*ib.* 184.

Respective Duties of Adjutant-General and Military Secretary in reference to Inspection of Reserve Forces—*Forster*, 21, 81.

No advantage in business connected with Inspection of Reserve Forces going through Military Secretary—*Paulet*, 136.

If Reserve Forces were put under Commander-in-Chief they would naturally form a subdivision of Adjutant-General's business—*Duke of Cambridge*, 1327, 1328.

5. *Artillery and Engineer Business.*

Correspondence of Deputy Adjutants-General Royal Artillery and Royal Engineers with War Office on discipline or store subjects passes through Adjutant-General's Office—*Forster*, 101–104.

Detail of Artillery business passing through Adjutant-General's Office—*Gambier*, 221, 223–226, 233, 235–237, 245–248.

Duties now performed by Deputy Adjutant-General Royal Artillery which should be performed by Adjutant-General—*Adye*, 956, 964.

Relations of Deputy Adjutant-General Royal Engineers to Adjutant-General—*Paulet*, 171; *Keane*, 353, 357, 358.

6. *Miscellaneous.*

Duties in reference to passages—*Forster*, 15, 16, 65–67, 77; *Paulet*, 119–122, 203–206.

Statement of officers' services for promotion is Adjutant-General's business—*Forster*, 78; *Paulet*, 123, 124.

A copy of Army List is kept corrected in manuscript up to date—*Paulet*, 132–134.

Examination of claims of men to pensions—*Paulet*, 163–170. Contagious Diseases Prevention Act—*ib.* 142, 143. Inventions and experiments—*ib.* 181–183. Preparation of Returns for Parliament—*ib.* 125–131. Rewards for good shooting, swordmanship, and lance practice might be settled regimentally—*ib.* 137–141.

Statement of distribution of work in Adjutant-General's Office—*Appendix* No. IV, *pp.* 108–114.

Proposed re-arrangement of business of Adjutant-General's Department—*Report*, xiii. Adjutant-General to be Staff Officer next in rank and position to Officer Commanding-in-Chief—*ib.* xviii. He should have the business connected with General Courts-Martial—*ib.* xiv. Also that connected with Reserve Forces—*ib.* xiii. Quartermaster-General's Office should be combined with Adjutant-General's Department—*ib.* xvi.

ADMINISTRATION, MILITARY.—GENERAL QUESTIONS.

Reasons why questions from general officers commanding abroad come direct to Secretary of State, whilst those from districts at home pass through Horse Guards—*Duke of Cambridge*, 1302.

No objection to employment of military officers on administrative duties—*Trevelyan, p.* 9.

Military administration should be settled and tested in time of peace—*Report*, vi. Constitutional questions have not been considered by Committee—*ib.* ix. Extent of departments as compared with those of foreign countries—*ib.* ix. The administration is at present organized upon a system of want of trust—*ib.* ix. Existing organization unsatisfactory—*ib.* x. All departments should be subordinate to Secretary of State—*ib.* x. Secretary of State responsible both for

ADMINISTRATION, MILITARY.—GENERAL QUESTIONS—*cont.*

efficiency and economy—*ib.* x. Responsibility to be placed upon heads of departments—*ib.* xxiii. Business of the army should be distributed into three Departments: (1) Military; (2) Control; (3) Financial—*ib.* x. High Officers of State should not be troubled with details—*ib.* xvii. Free interchange of opinions between Military, Supply, and Finance Departments—*ib.* xii. Opinion of Military Department on matters of supply and finance only necessary on important questions—*ib.* xiv. Too much of detail business of the army comes to Horse Guards—*ib.* xii. Evils of over-centralization. Opinions of Archduke Albrecht of Austria quoted on this point—*ib.* xiii. All departments at headquarters should be under one roof—*ib.* x, xviii.

ALLOWANCES, EXAMINATION OF CLAIMS FOR.

Executive officers should not examine claims and charges for allowances—*Report*, xx.

AMMUNITION. *See* STORES.

APPOINTMENTS.

Business of Military Secretary's Office in connection with direct commissions and Sandhurst—*Forster*, 41–43. Records kept by Military Secretary—*ib.* 6-8. Business of Military Secretary's Office in reference to appointments in Commissariat and Store Departments—*ib.* 21, 22.

APPROPRIATION.

Nature of Parliamentary appropriation audit explained—*Lawson, p.* 14.

Certificate of Accountant-General to Appropriation Account—*Report*, iv.

The scope of the present appropriation audit should be extended—*Balfour, p.* 14.

Difficulties in the correct appropriation by the book-keeping room of the Accountant-General's Branch of expenditure on works—*Murray*, 940-949.

Works Department should be consulted by Accountant-General's Branch in regard to works vote—*Jervois*, 738, 739.

Secretary of State cannot alter appropriation of money without Treasury sanction—*Report*, iv. Questions regarding re-appropriation should be referred for concurrence of Financial Secretary—*ib.* xxi. Accountant-General's Department should advise—*ib.* iv.

ARMAMENTS. (*See* also STORES, 2; *Warlike Stores.*)

Questions are now decided by Field-Marshal Commanding-in-Chief on advice of Deputy Adjutant-General Royal Artillery. The duties of the latter officer in reference to armaments should be transferred to Director-General of Ordnance—*Lefroy, p.* 2.

Commander-in-Chief should be advised by Director-General of Ordnance and Inspector-General of Fortifications—*Adye*, 980, 992.

Armaments should be under Secretary of State, who should be advised by Director-General of Ordnance and Director of Works—*Dalhousie, p.* 10.

Commander-in-Chief should be kept informed as to efficiency of armaments by means of periodical reports—*Balfour*, 651, 652.

All armaments in position and all equipment in the hands of the troops in field batteries, must be under Deputy Adjutant-General; everything in store should be under Director of Ordnance—*Duke of Cambridge*, 1356, 1358.

Responsibility for maintenance of armaments—*Adye*, 977-980, 987-989. The office of Director-General of Artillery should be revived, and he should be responsible for armaments—*ib. Memo. p.* 75.

Business of Deputy Adjutant-General Royal Artillery relating to armament of fortresses—*Gambier*, 268–273.

Demands for armaments still go through Horse Guards—*Balfour*, 646. They are supposed to be checked at Horse Guards and also in Ordnance Branch of War Office, but principal check is exercised in Control Department—*ib.* 647, 648. Little progress has been made in simplifying business connected with armaments. The responsibility is very divided—*ib.* 645, 650. Commanding Officer of Artillery and Controller ought to be primarily responsible for efficiency of each particular fortress—*ib.* 651, 653. When there are fixed proportions, there is no advantage in demands coming through Horse Guards—*ib.* 649.

Inspection of armaments—*Adye*, 980–986, 990, 996–999.

ARMAMENTS—*cont.*

Inspector-General of Artillery should inspect armaments as well as men—*Duke of Cambridge*, 1364.

Armaments as well as regiment to be inspected by Inspector-General of Artillery—*Report*, xv.

ARTILLERY, ROYAL.

Was put under Commander-in-Chief in 1855—*Duke of Cambridge*, 1344.

Organization of the Artillery necessitates a central administration—*Adye*, 955, 956. The battery is the Artillery unit—*ib.* 953–955, 962. History of the Artillery administrative system—*ib. Memo., pp.* 74, 75. The office of Director-General of Artillery should be revived, the manufacturing departments, the select committee, munitions of war and armaments being put under him—*ib. Memo., p.* 75.

Business connected with personnel should be separated from that of matériel—*Duke of Cambridge*, 1347. The discipline of the Artillery should *not* be dealt with by Adjutant-General in the same way as that of other corps—*ib.* 1348, 1349. The recruiting and clothing are conducted under the authority of the Adjutant-General—*ib.* 1349. Movement of Artillery is carried out by Quartermaster-General, assisted by Deputy Adjutant-General Royal Artillery—*ib.* 1349. Inspector-General should inspect armaments as well as men. His reports should be sent to Secretary of State—*ib.* 1364, 1365.

Duties of Inspector-General of Artillery, and relations of Deputy Adjutant-General Royal Artillery to that officer—*Gambier*, 274–278.

Commanding Officers should have absolute control over transport of Ordnance Stores in the Field—*Lefroy, p.* 1.

Artillery should have charge of 1st and 2nd Field Reserves—*Storks, p.* 1.

Command of Artillery should be vested in Officer Commanding-in-Chief. Discipline should be dealt with in same way as that of other Branches. A "Principal Staff Officer of Artillery" should be retained in Adjutant-General's Office to advise Commander-in-Chief in reference to the personnel of the corps. Distinction for administrative purposes between personnel and matériel. Functions of Inspector-General of Artillery under the re-organized Military Department—*Report*, xv.

AUDIT BRANCH AND AUDIT DUTIES. *See* ACCOUNTANT-GENERAL'S DEPARTMENT, ACCOUNTS, DEPARTMENTAL; and APPROPRIATION.

B.

BAGGAGE-MASTERS.

Subordinates of Control Department should be *ex officio* Baggage-Masters on the line of march—*Holland, p.* 7.

BALFOUR, Major-General, C.B. (*Analysis of his Evidence.*) (*First Examination.*) *Appendix No. I, p.* 5.

Is opposed to separation of munitions of war from other stores. A classification of stores is necessary, but unity of control is just as essential. Approves of present Regulations for inspection of warlike stores abroad, and would extend them to home stations; the Commanding Officer of Artillery should, however, be the responsible Officer, and the Inspector of Warlike Stores his assistant. The Commissaries of Stores should keep all Artillery reserves. The Commissaries under the Control Department should be divided into two divisions; one for consumable supplies, transport, and clothing; the other for warlike and general stores. Both divisions should be under one local control and under the Controller-in-Chief. Did not consider it necessary that a Controller should have a personal knowledge of all the details of his Department. Liked Indian system of employing Artillery Officers as Commissaries of Ordnance. Thought that Store Officers who had been instructed at the Arsenal were as competent as the Artillery to take charge of combustible stores. In the field all supplies should be consigned to one officer; Third Reserve of Artillery Stores should not be placed in the hands of Artillery Officers. All transport must be under one Department, but transport for First and Second Artillery Reserves should be permanently allotted to the Artillery. The Field Reserves of small-arm ammunition should be under Commissaries; the Artillery should have nothing to do with its transport. Director-General of Ordnance should not be a Secretary of State's officer. One officer should

Balfour, Major-General (*First Examination*)—*cont.*

perform the combined duties of Director-General of Ordnance and Inspector-General of Artillery. The powers of the Deputy Adjutant-General Royal Artillery should be limited to the personnel of the Artillery—*p.* 5.

(*Second Examination*). *Appendix II, pp.* 13, 14.

Ill-defined functions of Accountant-General and Chief Auditor, especially in regard to administration of Vote I. The duty of Accountant-General should be limited to advice and account check. Inefficiency of the present system of examination of accounts shown by the small sum disallowed—*p.* 13. The examination should be transferred to the Administrative Branches. This change would cause a large decrease of establishment. The scope of the present appropriation audit should be extended. The Administration of Vote I should be transferred to an officer independent of Accountant-General. Part of the detail work of Accountant-General should be transferred to a Staff Paymaster. The check over the proceedings of the various Heads of Departments would be exercised by the examination of papers returned to Registry for custody, and by the Appropriation Audit—*p.* 14.

(*Third Examination.*) *Appendix No. III, pp.* 51–53.

Is assisting the Controller-in-Chief in organizing the Store Branch of the Control Department—640, 641. *Simplifications which have been effected in the mode of authorizing the supply of the equipment of the Army;* Requisitions no longer pass through Horse Guards. They are prepared in duplicate instead of in quintuplicate. Hopes that he will be able to dispense with the duplicate when Controllers thoroughly know their work—642. Diminution of correspondence thus effected—643. The Commander-in-Chief is kept fully informed, through his own officers, of the state of the equipments—642, 644. When reports of deficiencies in the equipments are made to the Horse Guards or to the Secretary of State, it should be shown that the troops applied for the equipments in due time—642. A check has been established as regards stores in the hands of regiments, by holding Commanding Officers responsible that they do not receive any supplies without careful examination of their state —644. Little progress has been made in the simplification of business connected with armaments—645. Demands for armaments still go through Horse Guards—646. They are supposed to be checked there, and also in the Ordnance Branch of the War Office—647. The principal check is exercised in the Control Department —648. When there are fixed proportions, there is no advantage in the demands coming through Horse Guards 649. Responsibility for keeping up armaments very divided at present—650. The Commanding Officer of Artillery and the Controller ought to be primarily responsible for the efficiency of each particular fortress—651–653. Commander-in-Chief has the same means for ascertaining the efficiency of mounted armaments as of the equipment of soldiers. He would receive periodical returns and reports—651, 652. *Improvements introduced in reference to the Control of Barrack, Hospital, and Prison Stores*:—The vast accumulation of stores in the hands of executive officers have been dispersed. No reserves, except such as are necessary for immediate wants, are left in charge of executive officers; the reserves are maintained in general depôts. Unserviceable articles are handed over to the officer in charge of the general depôts. It is proposed that a similar distinction be made in the War Office between the responsibility for stores in use and those in reserve, the former being entrusted to Sir W. Power, and the latter to General Balfour—654. A considerable portion of the business of the Quartermaster-General's Department has been taken over by the Control Department—655. A large proportion of the Adjutant-General's correspondence on the subject of ammunition equipment and necessaries has been done away with—657. The Store Branch of the office of the Deputy Adjutant-General Royal Artillery might be abolished—657. The correspondence of the Deputy Adjutant-General of Royal Engineers as a member of the Staff of the Army may be dispensed with—658, 659. Engineer demands can be dealt with locally—660, 661.

Band and Mess Funds.

Questions dealt with by Adjutant-General and Military Secretary respectively—*Forster*, 35–38, 80; *Paulet*, 149–152.

Barracks.

Local consideration of re-appropriations—*Duke of Cambridge*, 1295–1297. No re-appropriation of barracks should be made without its being known to Commander-in-Chief—*ib.* 1292.

Arrangements with regard to Control Department taking over Barrack Services in Ireland—*Drake*, 526, 527.

Effect of Control system upon functions of Quartermaster-General in reference to Barrack questions—*Power*, 468. Barrack questions are now settled between Controller and Commanding Royal Engineer in direct communication with War Office—*ib.* 468–483. The foreign system might be carried out at home—*ib.* 480, 481. Function of Horse Guards in regard to barracks under Control system—*ib.* 480.

Quartermaster-General corresponds direct with War Office on improvement, increase, and use of Barracks. Questions as to increase of Barracks abroad would be generally sent to War Office by General Officer Commanding—*Grant*, 580, 581. At home every detail comes to Quartermaster-General's Office. The questions are decided by the Duke of Cambridge himself.—*ib.* 588–592.

Deputy Adjutant-General Royal Engineers has nothing to do with barracks—*Keane*, 428.

Claims for lodging-money should be passed by Controllers on certificate of Commanding Royal Engineer—*Murray*, 904. Connection between Engineer Department and Barrack Department before Control system was established—*ib.* 905, 906. Changes with regard to duties of Royal Engineers introduced by Control System —*ib.* 908. Objections to new system—*ib.* 891–898, 909. These objections might be met by handing over the whole of the business of the Barrackmasters to the Control Department—*ib.* 910. It is essential that one Department in War Office be responsible for alterations, erecting or hiring new buildings, and issuing lodging money—*ib.* 911, 912. System proposed by witness—*ib.* 902, 903. Difficulty of controlling expenditure for alterations when the appropriations were under Superintendent of Barrack Department—*ib.* 912, 917. Barrack Department was formerly under Works Department—*ib.* 921. Board of Ordnance kept Barrack questions in its own hands. Inspector-General of Fortifications only executed the works on the orders of the Board—*ib.* 922-925. Revival of Ordnance system—*ib.* 926–930.

Mode of considering alterations in appropriations—*Simmons*, 844–850. In England re-appropriation questions should be referred to War Office—*ib.* 851, 852.

Boards of Respective Officers. *See* Stores.

Borrow, Cornelius J. (*Analysis of his Evidence.*) *Appendix III, p.* 47.

Is a first-class Clerk in the War Office, and in charge of the Promotion Branch—533, 534. Keeps an account of the Reserve Fund; there seems to be no object in keeping a duplicate at the Horse Guards—536, 537. Orders to the Agent to make payments from the fund should be sent by the War Office, not by the Horse Guards—538. Check exercised by the Promotion Branch upon the promotions and appointments included in the Submission Papers from the Horse Guards—539–543. Keeps a book, showing the amount available for retired and full pay—544; and for grants of good service pensions—545. Keeps a book for record of the decease of officers dying whilst on half-pay—546. Proposes simplification of business relating to promotion and appointment of Medical Officers—547, 548. Ditto sale of Commissions by officers entitled to full price under regulations—549.

Brown, William, Esq., C.B., Accountant-General. (*Analysis of his Evidence.*) *Appendix No. II, p.* 12.

Described the constitution of the Accountant-General's Department previous to its division in 1865. Thought that the reasons given for the change were insufficent. The present system of divided responsibility was unsatisfactory, at all events in theory. The Chief Auditor only allows charges sanctioned by Royal Warrant or some other proper authority. The Accountant-General considers appeals against disallowances in the accounts. The division of the Department did not cause double work, but it involved increased expense. Approved of the practice of carrying on the examination of the accounts, and the correspondence which arose out of them, in separate rooms. The references thus occasioned did not lead to increased expense for establishment. The amalgamation had been tried some years ago, and was not found to answer. About three-fourths of the Account Branch employed in correspondence.

Brown, William, Esq., C.B., Accountant-General—*cont.*

Chief Auditor's correspondence related solely to disallowances. Accountant-General authorized exceptional expenditure, but this really amounted only to more or less liberally interpreting Warrants or Regulations. Saw no reason why Accountant-General should not sanction non-effective charges, and deal with questions of passage allowance. Thought that the administration of soldiers' effects should be transferred to the Solicitor. Examination of savings bank accounts did not properly belong to Chief Auditor's duties. Good regulations would not diminish correspondence—*p.* 12.

C.

Cambridge, His Royal Highness the Duke of, Field-Marshal Commanding-in-Chief. (*Analysis of his Evidence.*)

(*First Examination.*) *Appendix No. I, pp.* 7 *and* 8.

Agreed with the separation proposed by Lord Strathnairn's Committee between munitions of war and other stores, but considered that both sections of stores should be under Controller-in-Chief. In the War Office the Controller-in-Chief should be assisted by two officers, one for the administration of munitions of war, and the other for every other kind of supply, including Transport. The organization in the field and in garrison should be similar. The branch of the Control Department for munitions of war should be composed mainly of non-commissioned officers of Artillery, directed by Artillery officers, who should be seconded, but not in any other way divested of their military character. Civilian Storekeepers, were not sufficiently alive to the relative value of munitions of war. The Branch of the Control Department having charge of warlike stores might also take charge of other military stores used by the Artillery, in common with other branches of the Service. The Control Department should make all shipments, and its representative in the field or in garrison should be the sole consignee for all stores. It should likewise have charge of all stores in depôts in the field, including the Field Arsenal. Director-General of Ordnance should be the scientific head of a Board composed of the heads of the Manufacturing Departments. The Board should consider only strictly scientific questions; financial questions involved should be dealt with by the Controller-in-Chief —*p.* 7. The Heads of the Manufacturing Departments should be subordinate to the Controller-in-Chief as regards finance and administration, but their individual responsibility for details of manufacture should not be interfered with. Heads of Departments should not receive rewards as inventors. Their appointments should be for five or seven years; the Secretary of State having power of reappointment for a second term. It would be convenient that the Director-General of Ordnance should be an officer of the Secretary of State. The scientific opinion of the Director-General would, however, in fact, be the military opinion, and he ought, perhaps, strictly speaking, to be a Commander-in-Chief's officer. The Commander-in-Chief should be thoroughly conversant with the state of the stores, both in reserve and in Artillery charge. With this view, either the Deputy Adjutant-General, Royal Artillery, should check all Artillery demands, or he should receive returns of expenditure of Artillery stores. Artillery officers should also inspect all warlike stores in reserve and in course of manufacture. His Royal Highness approved of the abolition of the Ordnance Select Committee, and of the establishment of the Council of Ordnance. It would be undesirable to combine the duties of Director-General of Ordnance and Inspector-General of Artillery. The appointment of Director of Works should be continued —*p.* 8.

(*Second Examination.*) *Appendix No. III, pp.* 89–100.

Has been Officer Commanding-in-Chief since 1856—1271, 1272. General nature of duties—1274, 1275. It would facilitate business if War Office and Horse Guards were under one roof; but the two offices must be quite distinct—1276. Correspondence between Departments at Horse Guards and between Horse Guards and War Office. Establishment of a central registry and communication by means of minutes—1277–1283. Would not like to see War Office system of working papers upwards introduced at Horse Guards—1280. Commander-in-Chief's confidential business could not be registered—1282. Objects to Control Department assuming military functions hitherto performed by Quartermaster-

Cambridge, His Royal Highness the Duke of—*cont.*

(*Second Examination*)—cont.

General's Department—1284. Necessity for the Commander-in-Chief's being duly informed as to the demands and issues of supplies—1284–1291. Thinks that no reappropriation of Barracks should be made without its being known to Commander-in-Chief—1292. Local consideration of reappropriations—1295–1297. Importance of unreserved intercourse between the Staff and the Controller—1292–1294. Establishment of Control system may have given additional power to local officers, but not to Horse Guards—1298. Sea Transport should be left with Quartermaster-General and Admiralty, and should not be handed over to Control Department—1299 –1301, 1338, Danger of Control Department breaking down in time of war if more duties are given to it than it already has—1299. Reasons why questions from General Officers Commanding come direct to Secretary of State, whilst those from districts at home pass through Horse Guards—1302. Position of Commander-in-Chief in Ireland—1303. Question of placing Reserve Forces more under General Officers Commanding Districts—1304, 1305. Officer Commanding-in-Chief should advise Secretary of State on questions relating to Reserve Forces; but there should also be an Inspector-General specially responsible—1306. Topographical Department should be under Commander-in-Chief—1307, 1308. Although Military Secretary is a personal officer of Commander-in Chief, he is also a public officer by virtue of his duties in connexion with promotions and patronage. Confusion which has arisen from applying the term "Military Secretary's Office" to what ought to be called Commander-in-Chief's Office—1309. Military Secretary does not interfere with functions of other Departments at Horse Guards; no orders are issued from Horse Guards on any subject except under the authority of Commander-in-Chief. General Courts-Martial go to Military Secretary as Private Secretary of Commander-in-Chief—1311. Adjutant-General has no *right* to be consulted on matters of discipline connected with General Courts-Martial. Questions relating to inspection of Militia and Volunteers, though addressed to Military Secretary, are intended for Commander-in-Chief. Adjutant-General and Quartermaster-General correspond direct with War Office on matters of routine, but the Commander-in-Chief himself conducts all other correspondence by means of his Military Secretary. Importance of the Commander of an army being conversant with smaller details—1312, 1313. Objects to any communication, except upon small matters of routine, going from Horse Guards without being seen by him—1314. Military Secretary merely prepares business for Commander-in-Chief, who himself sees Adjutant-General, Quartermaster-General, and Deputy Adjutant-General Royal Artillery and Royal Engineers daily—1316–1323. Impossibility of simplifying the present system of dealing with passage of officers —1323. Recruiting and discharge subdivisions of Adjutant-General's Department should be kept distinct, as at present—1324–1326. If the Reserve Forces were put under the Commander-in-Chief, they would naturally form a subdivision of the Adjutant-General's business; but if there were any objection to this, the Inspector-General might report direct to His Royal Highness— 1327, 1328. Diminished work of Quartermaster-General's Department consequent upon introduction of Control system—1329. Future organization of the Department —1330. Importance of Quartermaster-General in time of war—1331. Functions at present appertaining to Quartermaster-General—1332. Duties in relation to embarkations, passage allowances, and barracks—1333– 1337. Scheme handed in by His Royal Highness for future distribution of business at Horse Guards—*p.* 95. Importance of concert between Control Department and Quartermaster-General's Department in regard to transport—1338. Movement of troops is now under Quartermaster-General's Department—1339. Annual estimate of cost of movement of troops is prepared by Quartermaster-General—1340. Check exercised by War Office over movement of troops—1341, 1342. Employment of soldiers in trades is now under Quartermaster-General—1343. Royal Artillery and Royal Engineers were put under Officer Commanding-in-Chief in 1855— 1344. Agrees with Colonel Adye as regards separating the business of the personnel from that of the matériel of the Artillery, The matériel should be put under Artillery officers under the Director of Ordnance—1347. Dissents from Colonel Adye's view that the discipline of the Artillery should be dealt with by Adjutant-General in the same way as that of other corps—1348, 1349. Movement of Artillery is carried out by Quartermaster-General, assisted by Deputy Adjutant-General Royal

CAMBRIDGE, His Royal Highness the Duke of—*cont.*

(*Second Examination*)—cont.

Artillery. The recruiting and clothing are conducted under the authority of Adjutant-General—1349. Thinks that the opinion of Deputy Adjutant-General Royal Artillery, as well as that of Director-General of Ordnance, should be given on questions of matériel, but would not object to their being referred to the Commander-in-Chief direct, instead of through Deputy Adjutant-General Royal Artillery—1350–1355. All armaments in position, and all equipment in the hands of the troops in field batteries, must be under Deputy Adjutant-General: everything in store should be under Director of Ordnance —1356–1358. Deputy Adjutant-General Royal Artillery is principal Staff Officer of Artillery, and a personal officer of Commander-in-Chief, not merely a Deputy to the Adjutant-General—1360, 1361. Thinks that the regimental business of the Artillery is better managed at Horse Guards than at Woolwich—1362. No good purpose would be served by severing regimental from administrative business of Deputy Adjutant-General—1363. Inspector-General of Royal Artillery should inspect armaments as well as men—1364. Reports of Inspector-General should be sent to Secretary of State—1365. Thinks it essential that there should be an Inspector-General of Fortifications as scientific head of the Engineer Department, but that he should not command the corps—1366–1368. The command of the corps should be exercised by the Commander-in-Chief through Deputy Adjutant-General Royal Engineers—1369. Relative functions of Inspector-General of Fortifications and Deputy Adjutant-General in reference to the distribution of officers and men—1370–79. Facility with which the Horse Guards as at present constituted has been conducted even in times of emergency—1380. Thinks the appointment of a Chief of the Staff at the Horse Guards superfluous. It is necessary that the Commander-in-Chief should be acquainted with the minutest details—1380–1382. In time of war it might be necessary for the General in Command to appoint a Chief of the Staff—1381. Performance of duties of Commander-in-Chief in his absence—1383. Necessity for the Commander-in-Chief being kept fully informed of everything connected with supply and housing of troops—1384.

Concurred in extension of Committee's inquiry to the Horse Guards—*Report*, ix.

CAMP EQUIPAGE. *See* STORES, *Requisitions, &c.*

CANTEENS.

There is no reason why they should be under Quartermaster-General—*Grant*, 635, 636. They should not be under Controller—*ib.* 637.

CHAPLAIN-GENERAL.

To be attached to Military Department—*Report*, xvi.

CHIEF OF THE STAFF. *See* STAFF, GENERAL.

CLERKS, MILITARY. *See* DEPUTY ADJUTANT-GENERAL ROYAL ARTILLERY AND ACCOUNTANT-GENERAL'S DEPARTMENT.

CLOTHING.

Business which comes to Clothing Department of War Office from Adjutant-General's Office—*Ramsay*, 665.

Reasons why requisitions pass through Adjutant-General's Office—*Paulet*, 153, 154.

Commander-in-Chief is kept informed of the state of the clothing of a regiment by means of the Monthly Return—*Ramsay*, 671, 676, 677. Annual reports of the wear of clothing are sent to Adjutant-General—*ib.* 672–675. Complaints of delay and applications for extra issues should come direct to War Office—*ib.* 670. Functions of Assistant Adjutant-General for Clothing—*ib.* 694. To a certain extent the work of Director of Clothing and Assistant Adjutant-General for Clothing are identical—*ib.* 696. Director of Clothing is responsible officer—*ib.* 697. No advantage in samples of clothing sent to regiments, being sealed by Assistant Adjutant-General—*ib.* 695. All demands from Artillery and Engineers come through Deputy Adjutants-General of those corps, and are examined at Horse Guards as well as at War Office. There is no reason why they should not come direct to War Office—*ib.* 679–683, 688–691.

The Artillery and Engineer business connected with Clothing might be amalgamated with general business of Adjutant-General—*Paulet*, 176, 177.

Arrangement by which Engineer Clothing requisitions are examined in office of Deputy Adjutant-General Royal Engineers does not cause double work—*Keane*, 424, 425.

CLOTHING—*cont.*

Requisition for Clothing for Royal Engineers might be dealt with locally, but there would be great difficulties—*ib.* 421–423.

Only Artillery and Engineer Clothing compensation claims come through Horse Guards—*Ramsay*, 686, 687. Complaints from Artillery and Engineers come through the Deputy Adjutants-General of those corps—*ib.* 678. Duties of Horse Guards and War Office respectively in regard to patterns—*ib.* 666–669.

COMMANDER-IN-CHIEF.

General nature of duties—*Duke of Cambridge*, 1274, 1275.

They should be confined as much as possible to discipline—*Dalhousie*, *p.* 11.

He is himself Chief of the Staff—*Yorke*, 1100. Performance of his duties in his absence—*ib.* 1101, 1102; *Duke of Cambridge*, 1383. He sees Adjutant-General, Quartermaster-General, and Deputy Adjutant-General Royal Artillery and Royal Engineers daily—*ib.* 1323.

Witness thinks it better that Commander-in-Chief should communicate his verbal orders direct to Adjutant-General and Quartermaster-General—*Yorke*, 1099.

Personal communication with Deputy Adjutant-General Royal Engineers—*Keane*, 357, 375, 376.

Ditto with Quartermaster-General in reference to reliefs—*Grant*, 560.

When witness was at Horse Guards communications between Deputy Adjutant-General Royal Artillery, and Deputy Adjutant-General Royal Engineers, and Commander-in-Chief, went through Military Secretary—*Yorke*, 1110-1112.

Commander-in-Chief should be kept fully acquainted with the state of the stores both in reserve and in the hands of the troops—*Duke of Cambridge*, *p.* 8. Necessity for his being acquainted with the minutest detail—*ib.* 1380, 1382, 1384.

Importance of his being early informed as to deficiencies in supplies. The monthly returns would not be sufficient—*Yorke*, 1124, 1125; *Duke of Cambridge*, 1284–1291.

He should be kept informed as to the efficiency of armaments by means of periodical returns and reports—*Balfour*, 651, 652. Under Control system he is kept fully informed of the state of equipments—*ib.* 642, 644.

He is kept informed of the state of the clothing of a regiment by means of the monthly return—*Ramsay*, 671, 676, 677.

No communication (except upon matters of routine) should go from Horse Guards without been seen by Commander-in-Chief—*Duke of Cambridge*, 1314. No reappropriation of barracks should be made without it being known to Commander-in-Chief—*ib.* 1292.

Commander-in-Chief was, until recently, officer in command of London District—*Report*, xiii. He still commands the troops at home, independently of his being Commander-in-Chief of the Army—*ib.* xiii. Present and former functions of Commander-in-Chief compared —*ib.* xvii. He should be Secretary of State's principal military adviser—*ib.* xi. His position as regards the troops at home should be assimilated to his position in reference to troops at foreign stations—*ib.* xiii. He should retain the patronage of the Army, and should therefore not be connected with the political administration of the day—*ib.* xi. Performance of his duties in his absence should devolve upon Adjutant-General—*ib.* xvii.

COMMITTEES.

1. *Committees on Administration.*
2. *Artillery Committees.*
3. *Engineer Committee.*

---

1. *Committees on Administration.*

Committee on Military Organization (Sir James Graham's) referred to—*Report*, xvi, xvii, xviii, xxi, xxxiii, liii. Lord Strathnairn's Committee's proposal to give charge of munitions of war to Ordnance Department—*ib.* vi. Committee on Organization of War Office (1864) referred to in connection with examination of claims—*ib.* xx. Treasury Committee, 1860, opinion quoted in reference to separation of Audit and Account Branches—*ib.* xxii. Ditto in reference to responsibility of heads of departments—*ib.* xxiii.

2. *Artillery Committees.*

Ordnance Select Committee, abolition of concurred in by Commander-in-Chief—*Duke of Cambridge*, *p.* 8.

COMMITTEES—*cont.*

2. *Artillery Committees*—cont.

Council of Ordnance has worked well, but sub-committees should have been appointed to settle matters of fact—*Lefroy*, 1152-1158.

Council of Ordnance, constitution and functions of—*Report, p.* xviii.

3. *Engineer Committee.*

Defects in constitution of. Objections to placing it under a Director of Experiments. Proposal that there should be a paid member of Engineer Committee, who should be an *ex officio* member of Artillery Committee —*Jervois, p.* 22.

An Engineer subaltern should be appointed to take charge of experiments under the Committee—*Simmons*, 875, 876. Difficulty in obtaining money for experiments. Importance of experiments on questions of submarine defences—*ib.* 863, 864. No difficulty in estimating probable cost of experiments every year—*ib.* 865.

See also EXPERIMENTS.

CONSUMABLE SUPPLIES.

Administration of, should not be separated from that of General Stores—*Dalhousie, p.* 10 ; *Power p.* 3.

Under Control system, questions relating to supply of forage go direct from the troops to War Office—*Grant*, 593. Occasionally an application for extra forage comes to Quartermaster-General—*ib.* 594. Ordinary supplies are authorized locally—*ib.* 595, 596.

Under Control system, questions relating to supply of fuel and light go direct from the troops to War Office —*Grant*, 593. Questions might be settled locally by General Officer and Controller—*ib.* 597. Fuel and light questions are not much affected by reappropriation of barracks—*Murray*, 918.

Questions of ration allowances to soldiers' families come to War Office through Quartermaster-General—*Grant*, 599.

CONTAGIOUS DISEASES PREVENTION ACT.

Adjutant-General's business connected with this Act is very small—*Paulet*, 142, 143.

CONTRACTS, DIRECTOR OF. *See* CONTROL DEPARTMENT.

CONTROL DEPARTMENT.

1. *General Organization.*
2. *War Office Organization.*
3. *Relations with General Staff.*
4. *Personnel (except at War Office).*
5. *Working of Control System in Ireland.*

---

1. *General Organization.*

Main principles of Control system—*Storks*, 705, 706. The system was recommended by Lord Strathnairn's Committee, and has been introduced both at home and abroad—*ib.* 700, 701.

The Control system as now in force is in accordance with the recommendations of Lord Strathnairn's Committee, except that issues of camp equipage in excess of authorized proportions are reported to Quartermaster-General—*Power*, 462.

Combination of Supply Department works well in Ireland ; in England it has hardly commenced—*Drake*, 513. The information of the General Officer on matters of Supply will be more complete under the Control than under the old system—*ib.* 521.

The establishment of the Control system may have given additional power to local officers, but not to Horse Guards—*Duke of Cambridge*, 1298.

The Controller is the direct agent both of the Secretary of State and the General Officer Commanding—*Power*, 465.

Not necessary that Controller should have personal knowledge of all details of his department—*Balfour, p.* 5.

Danger of Department breaking down in time of war if more duties are given to it—*Duke of Cambridge*, 1299.

Reasons for adopting the name "Control"—*Power, p.* 4.

There should be one section for consumable supplies and general stores, and another for warlike stores and transport—*Hozier, p.* 5.

There should be one department for ordnance and general stores, and another for consumable supplies, but both should be under one Controller—*Gordon, p.* 2.

There should be one section for consumable stores, and another for clothing and miscellaneous stores—*Trevelyan p.* 10.

Scheme for rearrangement of Control duties, supposing

CONTROL DEPARTMENT—*cont.*

1. *General Organization*—cont.

that the provision of munitions of war be assigned Control Department—*Lefroy*, 1137, 1145.

There should be one section of the department for warlike stores, and another for all other stores and transport. The first section should consist chiefly of Artillery non-commissioned officers—*Duke of Cambridge, p.* 7.

Hospital stores should be under Store Branch of Control Department, not under Commissariat Branch—*Dalhousie, p.* 10.

Reserves of warlike stores should be kept by Commissaries of Stores—*Balfour, p.* 5.

Stores in Field Arsenal should be in charge of Control Department—*Duke of Cambridge, p.* 7.

Control Department is a checking, not a spending department—*Report*, xix. Chief of the department not checked under the existing system of audit—*ib.* xix. Department to be divided into a Supply Division and a Store Division—*ib.* vii, xviii. Custody and issue of stores in garrison and in the field up to 3rd Reserve should be given to Control Department—*ib.* vii. Also the whole of the business connected with transport—*ib.* xiv. Chief of Control Department is responsible for supply of every description of equipment to the Army—*ib.* xii. Regulations of Pay Sub-department have been approved by Treasury—*ib.* xix.

2. *War Office Organization.*

Controller-in-Chief should be assisted by two officers, one for munitions of war, and the other for other stores and transport—*Duke of Cambridge, p.* 7.

There should be two separate departments, (1) for Ordnance Stores, and (2) for all other Stores. Both should report to one Under Secretary of State—*Milward, p.* 4.

It is proposed to separate the administration of stores in use from those in reserves, and to entrust the former to Sir W. Power and the latter to General Balfour—*Balfour*, 654.

The appointment of the officer at the head of munitions of war should be amalgamated with that of Director-General of Ordnance—*Adye*, 971, 989. Munitions of war and consumable supplies should be separately administered in the War Office as well as at out-stations —*ib.* 956–970, 971 ; *Memo., p.* 75.

Changes already effected in the War Office for the purpose of bringing Head-Quarters Department into accord with Control system. No such changes have yet been made at Horse Guards—*Power*, 471. If foreign system of transport is carried out at home, Passage Branch should be part of Control Department—*ib.* 475.

Chief of Department should be eligible for seat in Parliament—*Report*, xi. Manufacturing Departments should be under him—*ib.* viii. Experiments connected with manufacture may be dealt with on his responsibility —*ib.* xviii. Control Department should be divided into two sections—*ib.* vii. Store section should be under an officer professionally acquainted with munitions of war—*ib.* vii. There should be a branch to deal with personnel of the War Department—*ib.* xix. Director of Contracts to be subordinate to Chief of Control Department. Organization of this Branch must be separately dealt with—*ib.* xli.

3. *Relations with General Staff.*

Under Control system the Military Staff is confined to military questions, the responsibility for supplies and transport resting entirely with Control Department—*Power*, 464, 465, 494. This division of duties would work well on active service—*ib.* 466.

Importance of unreserved intercourse between the Staff and Controllers—*Duke of Cambridge*, 1292–1294 ; *Storks*, 1385–1387.

Objects to Control Department assuming military functions hitherto performed by Quartermaster-General's Department—*Duke of Cambridge*, 1284.

Necessity for free communication between Controllers and Staff of the Army—*Report*, xxi.

4. *Personnel (except at War Office).*

Controllers should be on the Staff, but should take their orders from Chief of the Staff—*Dalhousie, p.* 10.

Military Store officers should be absorbed before Artillery officers and soldiers are appointed Commissaries—*Storks, p.* 11.

Superior appointments should be held by combatant officers in the same way as Staff appointments.—*Hozier, p.* 5.

CONTROL DEPARTMENT—*cont.*

4. *Personnel (except at War Office)*—cont.

Objected to Artillery officers hold appointments in the department on the footing of Staff appointments—*Storks, p.* 11. If Artillery officers are employed they should be seconded—*Duke of Cambridge, p.* 7; *Dalhousie, p.* 10; *Storks p.* 11.

Artillery officers should only be employed as Acting Controllers of Ordnance Stores—*Milward, p.* 4.

Approved of employment of Artillery officers as Commissaries of Stores; but Store officers who had been instructed at Woolwich were equally competent to take charge of combustible stores—*Balfour, p.* 5.

Employment of Artillery officers—*Gordon, p.* 2.

Commissaries should be divided into two divisions: one for consumable supplies, transport, and clothing, and the other for munitions of war and general stores—*Balfour, p.* 5.

Appointments of commissaries should be filled by non-commissioned officers—*Hozier, p.* 6; *Holland, p.* 7.

Subordinate officers of Control Department should be *ex officio* Baggage-Masters in the line of march—*Holland, p.* 7.

Employment of Artillery officers in store section of Control Department—*Report, p.* viii.

5. *Working of Control System in Ireland.*

General result of introduction of Control system—*Drake*, 499–502. Before appointment of Controller for Ireland, Quartermaster-General's Department had nominal charge of stores and authorized issues, but the actual responsibility was with the executive department—*ib.* 503-505. No benefit resulted from interference of Quartermaster-General's Department—*ib.* 506. Combination of Supply Departments works well—*ib.* 513. Relief afforded to Adjutant-General's and Quartermaster-General's Departments in Ireland by introduction of Control system—*ib.* 515, 516, 519, 520. Position of Control Department in regard to Land Transport—*ib.* 517, 518. Arrangements with regard to Control Department taking over barrack services—*ib.* 526, 527.

There has been no difficulty in working Control system under existing Staff organization—*Power*, 472; *Drake*, 514.

CORRESPONDENCE.

Extent of correspondence at Horse Guards and War Office compared—*Thompson*, 1252–1254. Reports of the important correspondence which arrives every morning might be prepared for Secretary of State and principal heads of departments—1267–1270.

Reasons why questions from General Officers Commanding abroad come direct to Secretary of State, whilst those from districts at home pass through Horse Guards—*Duke of Cambridge*, 1302.

The saving which should be effected by Control system is not yet fully realized—*Thompson*, 1261. Duplicates are sent to Horse Guards of letters on store subjects addressed by regiments to War Office—*ib.* 1259, 1260.

Good regulations would not much diminish correspondence—*Brown, p.* 12; *Whiffin, p.* 13.

Correspondence on matters of supply and finance need not pass through Horse Guards—*Report*, xiv.

COURTS-MARTIAL.

Duties of Military Secretary and Adjutant-General respectively—*Forster*, 11, 58-63; *Paulet*, 135.

Business connected with general courts-martial is dealt with in Military Secretary's office—*Forster*, 11, 60, 61, 63; *Duke of Cambridge*, 1311.

Adjutant-General had protested against this arrangement—*Paulet*, 135.

Adjutant-General has no *right* to be consulted on matters of discipline connected with general courts-martial—*Duke of Cambridge*, 1313.

General courts-martial should be dealt with in Adjutant-General's Department—*Report*, xiv.

CRIMEA.

Most notable confusion related to clothing, not ammunition—*Trevelyan, p.* 10.

Confusion in regard to stores was remedied by sending out Captain Gordon as sole consignee—*Dalhousie, p.* 10.

Confusion would have been prevented if Regulations of 1833 for Ordnance Commissaries in the Field had been observed—*Gordon, p.* 2.

Inconvenience from mixing cargoes of munitions and general stores—*Trevelyan, p.* 9.

D.

DALHOUSIE, The Earl of, G.C.B., K.T. (*Analysis of his Evidence.*) *Appendix No. I, pp.* 10 *and* 11.

Was Secretary of State for War from 1855 to 1858. The confusion in the shipment and receipt of stores in the Crimea was remedied by sending out Captain Gordon as sole consignee. Controller-in-Chief should be Head of all the Supply Departments. The Controller should be on the staff of the General Officer Commanding, but should take his orders from the Chief of the Staff. The Commissariat Branch of the Control Department should on no account be mixed up with the Store Branch. Commissariat might provide food for hospitals, but hospital stores should be kept by the Store Branch. If a special branch of the Control Department be formed for warlike stores, a few Artillery officers might be employed in it, but they should be seconded. In the field, the General Officer Commanding should be assisted by a Chief of the Staff, who would control the Adjutant-General, the Quartermaster-General, and the Controller. Witness strongly opposed the appointment of a local Head of the Arsenal, though he had no objection to the Manufacturing Departments being put under the Controller-in-Chief. Appointments as Superintendents in the Manufacturing Departments should be held for five years, with power to the Secretary of State to re-appoint in special cases. The erection and armament of fortresses are functions of the Secretary of State: he should be advised in such matters by the Director of Works and Director-General of Ordnance —*p.* 10. The Commander-in-Chief's functions should be confined as much as possible to the discipline of the Army. Inventions and experiments should be considered and initiated by the Secretary of State, but the military opinion of the Commander-in-Chief should be invited. The Director-General of Ordnance should be the adviser of the Secretary of State in fixing armament of fortresses and the proportions of ammunition, &c., in Artillery charge or in reserve. All demands within the fixed proportions should go direct from the Army to the Control Department. The duties of the Deputy Adjutant-General Royal Artillery should be confined to discipline questions—*p.* 11.

DEPUTY ADJUTANT-GENERAL ROYAL ARTILLERY.

1. *Position and General Duties.*
2. *Military and Regimental Business.*
3. *Duties relating to Armaments, Supplies, Passages, &c.*
4. *Communication with Horse Guards and War Office.*
5. *Office details.*

1. *Position and General Duties.*

He is under Adjutant-General, but has separate office—*Paulet*, 171; *Gambier*, 223.

Is a personal officer of Commander in-Chief, not merely a deputy to the Adjutant-General—*Duke of Cambridge*, 1360, 1361.

His powers should be limited to personnel—*Balfour*, 5; *Adye*, 953, 994; *Lefroy*, 1138-1140, 1146-1148.

His duties should be confined to discipline questions—*Dalhousie, p.* 11; *Storks, p.* 16.

His opinion, as well as that of Director-General of Ordnance, should be given on questions of matériel—*Duke of Cambridge*, 1350-1355.

Duties now performed by him which properly belong to Adjutant-General—*Adye*, 956, 964. Ditto to Military Secretary—*ib.* 956, 969. Ditto to Quartermaster-General —*ib.* 956, 964. Confusion between duties of Director-General of Ordnance and Deputy Adjutant-General Royal Artillery; work done twice over—*ib.* 956, 991. Duties which should be assigned to Deputy Adjutant-General Royal Artillery—*ib.* 956, 958, 960.

Indian experience of witness in reference to the respective duties of Deputy Adjutant-General Royal Artillery and other Members of the Staff—*Adye*, 966-968, 999.

Office constituted under Board of Ordnance—*Gambier*, 215.

Line organization inapplicable to artillery; there must be a head-quarter for the whole corps—*Adye*, 955, 956; *Gambier*, 321, 322.

No unnecessary details are now referred to Deputy Adjutant-General Royal Artillery, except when on matters relating to stores—*Gambier*, 316-319.

Witness does not think that any of the business now done at Horse Guards could be transacted in the brigades or batteries—*Adye*, 961-963. Deputy Adjutant-General Royal Artillery should not be at Woolwich.

DEPUTY ADJUTANT-GENERAL ROYAL ARTILLERY—*cont.*

1. *Position and General Duties*—cont.

Necessity for direct communication with Commander-in-Chief—*ib.* 956.

Duties have diminished since introduction of Control system, and might be further reduced—*Storks*, 704.

2. *Military and Regimental business.*

Duties in relation to purely regimental business—*Gambier*, 240-244, 256, 262, 312-315. Under Board of Ordnance artillery regimental work was done at Woolwich—*ib.* 323, 324.

The discipline of the artillery should not be separated from that of the rest of the army—*Paulet*, 173.

No good purpose would be served by severing regimental from administrative business—*Duke of Cambridge*, 1362, 1363.

Keeps records of artillery officers' services—*Gambier*, 329-332. Business connected with prize money—*ib.* 260, 261. Business connected with recruiting—*ib.* 258, 259. Confidential Reports (regimental)—*ib.* 257, 262, 333, 334. Mode of dealing with discipline questions—*ib.* 225, 245-255. Branch of office at Woolwich under Superintendent of Artillery Records—*ib.* 216, 217.

3. *Duties relating to Armaments, Supplies, Passages, &c.*

Business relating to armament of fortresses—*Gambier*, 268-273.

It should be transferred to Director-General of Ordnance—*Lefroy*, *p.* 2; *Storks*, *p.* 16.

Artillery business connected with arms, ammunition, clothing, &c., might be amalgamated with general business of the Adjutant-Generals—*Paulet*, 176, 177.

Demands from Brigades now sent to D.A.G.R.A. might go direct to War Office—*Gambier*, 262–267.

D.A.G.R.A. should check demands or receive returns of expenditure of stores—*Duke of Cambridge*, *p.* 5.

Under Control system, D.A.G.R.A. need not be referred to in regard to ordinary issues of supplies—*Power*, 487.

Duties of D.A.G.R.A. and Director-General of Ordnance in relation to changes in matériel—*Gambier*, 293–311.

Detail of clothing business which passes unnecessarily through office of D.A.G.R.A.—*Ramsay*, 679–691.

4. *Communication with Horse Guards and War Office.*

Artillery business passing through Military Secretary's Office—*Gambier*, 218, 219, 221, 227–239, 328–334.

Papers for Commander-in-Chief on other than discipline questions go to Ordnance Branch of Military Secretary's Office. Discipline papers go to Adjutant-General's Office—*Forster*, 50, 51.

Artillery business passing through Adjutant-General's Office—*Gambier*, 221, 223–226, 233, 235–237, 245–248. Ditto, Quartermaster-General's Office—*ib.* 221, 226.

Correspondence with War Office passes through Military Secretary's Office if it relates to finance; through Adjutant-General's Office if it relates to discipline or stores—*Forster*, 101–104.

Relation to Inspector-General of Artillery—*Gambier*, 274–278. Communication with Director-General of Ordnance and Controller-in-Chif—*ib.* 269, 345, 346. Mode of conducting business relating to passages—*ib.* 227, 228.

5. *Office Details.*

Distribution of business—*Appendix* No. IV., *pp.* 115-117.

The Store Branch of the office might be abolished—*Balfour*, 657.

Clerical duties of a confidential nature are performed by Superintending Officer—*Gambier*, 344. Employment of military clerks works well—*ib.* 335. The clerks are artillery soldiers, and can be exchanged at any moment—*ib.* 339, 342. Their pay and allowances—*ib.* 341. Hours of work—*ib.* 341. Supervision—*ib.* 344.

DEPUTY ADJUTANT-GENERAL ROYAL ENGINEERS.

1. *General and Military Duties.*
2. *Duties relating to Supplies, Works, &c.*
3. *Duties relating to Finance.*
4. *Relation to other Departments at Horse Guards and to War Office.*

1. *General and Military Duties.*

Office established in 1855—*Keane*, 349, 350. Origin of the appointment—*ib.* 357. None of the business could be settled at the War Office without going to him—*ib.* 359.

DEPUTY ADJUTANT-GENERAL ROYAL ENGINEERS—*cont.*

1. *General and Military Duties*—cont.

Statement of distribution of office business—*Appendix* No. IV, *pp.* 118–122.

Duties of Deputy and Assistant Adjutants-General—*Keane*, 354, 355.

The regimental orderly-room should be at the headquarters of the corps—*Simmons*, 824.

Mode of dealing with passage questions—*Keane*, 368–375. Discipline questions—*ib.* 353, 358.

Discipline of the Engineers should not be separate from that of the rest of the Army—*Paulet*, 173.

Duties in relation to purely regimental business—*Keane*, 352–358.

Relative functions of Inspector-General of Fortifications and Deputy Adjutant-General in reference to distribution of officers and men—*Duke of Cambridge*, 1370–1379.

Disadvantages of the distribution of the corps being under Deputy Adjutant-General Royal Engineers—*Simmons*, 834. It should be under an officer holding combined appointments of Head of the Corps and Chief of the Engineer Department—*ib.* 818.

2. *Duties relating to Supplies, Works, &c.*

Duties have diminished since introduction of Control system, and might be further reduced—*Storks*, 704.

D. A. G. R. E. need not in future be referred to in regard to ordinary issues of supplies—*Power*, 488, 489. The report of issues to Royal Engineers, directed by a memorandum from office of D. A.-G. R. E. to be made to Horse Guards, are unnecessary—*ib.* 463.

Correspondence of D. A. G. R. E., as a member of the Staff of the Army, may be dispensed with—*Balfour*, 658, 659. Engineer demands can be dealt with locally—*ib.* 660, 661.

Clothing business which passes unnecessarily through office of D. A. G. R. A.—*Ramsay*, 679–691.

D. A. G. R. E. has nothing to do with barrack services—*Keane*, 428. Correspondence with regard to stores and clothing very heavy—*ib.* 404.

The Engineer business connected with equipment and clothing might be amalgamated with general business of the Adjutant-General—*Paulet*, 176, 177.

Relation of D. A. G. R. E. to Director of Works—*Keane*, 669.

3. *Duties Relating to Finance.*

Financial questions which might come direct to War Office—*White*, 530–532.

Origin of the practice of sending such questions through D. A. G. R. E.—*Appendix* No. III, *p.* 46; *Memo.*, *White*. Examination of extra pay returns at Horse Guards superfluous—*ib.*

Reasons why it is necessary for financial questions to go to D. A. G. R. E.—*Keane*, 416, 417. Detail of business in connection with questions of pay and allowances—*ib.* 359–389.

4. *Relation to other Departments at Horse Guards to War Office.*

Mode of communicating with other departments at Horse Guards and with War Office—*Keane*, 395–414. Personal communication with Commander-in-Chief—*ib.* 357, 375, 376.

Papers for Commander-in-Chief on other than discipline questions go to Ordnance Branch of Military Secretary's office; Discipline papers go to Adjutant-General—*Forster*, 50, 51.

Relations to Adjutant-General—*Paulet*, 171; *Keane*, 353, 357, 358.

Relation to Military Secretary—*Keane*, 353, 369–376, 390. Promotion questions go to Military Secretary Deputy Adjutant-General Royal Engineers keeps record of officers services—*ib.* 392–394. Relation of, to Quartermaster-General—*ib.* 369–373. Communication with War Office—*ib.* 353, 357.

Correspondence with War Office passes through Military Secretary's office if it relates to finance, through Adjutant General's office if it relates to discipline or stores—*Forster*, 101–104.

Future position of Deputy Adjutant-General Royal Engineers—*Report*, *p.* xvi.

DISCHARGES.

Discharge division of Adjutant-General's office should not be under same department as Recruiting business—*Paulet*, 162.

Downman, Captain G. C. (*Analysis of his Evidence.*) *Appendix III, pp.* 75–79.

Is Superintendent of War Department property in the Portsmouth District—1000. Thinks that the property not publicly occupied should be in the hands of the Superintendent, and that the Engineer Department should have nothing to do with it—1001, 1080. Persons unnecessarily consulted in reference to the property—1002–1007, 1081–1084. The Superintendent should be in direct communication with the War Office—1008. He should consult the military authorities on any matter connected with military questions—1009. Thinks that proper rents have not been received for War Department property near Portsmouth—1010. Case of the land purchased for forts on the Gosport side—1011–1020. Instances of more land being taken up for forts than was required for carrying out the works—1022–1028. Purchases of land near Portsmouth are hardly ever notified to witness; the Division Officers of Royal Engineers take possession on the part of the Government—1029, 1034. Delay in letting property owing to that arrangement—1030. Management of property bought for the Portsdown Hill Forts—1031–1060. Houses purchased with the lands, and now occupied by Engineer officers employed upon the works—1061–1067. The stoppage for quarters deducted from the pay of these officers does not nearly cover the value of the rent of these houses—1066. Complaints from the War Office of the inadequacy of the rents received from the Portsmouth property—1068, 1069. Steps taken—1070–1074. Witness not consulted as to sales of property in his district, or in regard to the King's Rooms at Southsea—1075–1085. Larger income might have been derived for the War Department property if witness had been consulted in reference to first lettings, &c.—1076, 1086. It is his interest to obtain as high rents as possible, as he is paid by percentage—1076. Has held his present position 14 years—1077. Engineer officers in the district are being constantly changed—1078, 1079. Superintendent or agent for War Department property should have power to call in professional valuer in cases of difficulty—1087. Neither Commanding Royal Engineer nor Superintendent have power to distrain for rent—1088, 1089.

Position of Captain Downman, as Superintendent of War Department property at Portsmouth—*Jervois*, 781–783, 796–799.

Drake, Commissary-General W. H., C.B. (*Analysis of his Evidence.*) *Appendix III, pp.* 44 *to* 46.

Is Controller for Great Britain—495. Was Controller in Ireland for more than two years—496. Circumstances under which he was first appointed—497. General result of the introduction of the Control system in Ireland—499–502. Proceedings in regard to Transport on first arrival of witness in Ireland—500. Before he began to act, the Quartermaster-General's Department had nominal charge of stores, and authorized issues—503. The charge and responsibility was, however, with the various executive Departments—504, 505. No benefit resulted from the interference of the Quartermaster-General's Department—506. Described the old method of obtaining stores, under which requisitions had to pass through seven or eight different hands—507–509. Present system under which they go direct to the Controller, who immediately orders his Commissary to issue—510–512. The combination of Supply Departments worked well in Ireland; in England it has hardly commenced—513. Met with cordial co-operation of Military Staff in Ireland—514. Relief afforded to the Adjutant-General's and Quartermaster-General's Departments in Ireland—515, 516, 519, 520. The intended alterations as to movement of troops had not been carried out in Ireland owing to the anomalous position of the Military Train—517. Land Transport was performed by Control Department as far as it could be done without interfering with Quartermaster-General's military position—518. Thinks that the information of the General on matters of supply will be fuller and more accurate under the Control than under the old system—521. Had charge of munitions of war in Ireland—522. Found no special difficulty in connection with this class of stores, as he had competent officers to carry out details—523–525. The arrangements with regard to the Control Department taking over Barrack services were carried out while witness was in Ireland—526. The Quartermaster-General is now entirely relieved of all duties connected with barracks; the work is done partly by the Engineer Department and partly by the Control Department—527.

E.

Education, Military, Director-General of.

To be under Military Department—*Report, p.* xvi.

Edwards, Major-General C. A., C.B., Inspector-General of Recruiting. (*Analysis of his Evidence.*) *Appendix III, pp.* 39 *and* 40.

Has been Inspector-General of Recruiting two years and three months—429. The Recruiting Branch is a division of the Adjutant-General's Department—430. General nature of the business—431–433. Submission to Commander-in-Chief of appeals against disallowances made by War Office—434, 435. Thinks that all questions relating to recruiting, re-engagement, and discharge, should be dealt with in one office—436. The granting of pensions might be dealt with in the same office—437, 438. Thinks that correspondence with War Office might properly be diminished by allowing the Inspector-General of Recruiting to settle certain minor questions, such as re-enlistment of men without parchment certificates—439, 443. Instead of letters being written about these small questions, they have recently been forwarded to the War Office in a minute paper—440. Matters of detail are not submitted either to Commander-in-Chief or Adjutant-General—441, 442. System of recruiting returns should be revised, and the returns sent only to one Branch of the War Office—444–448. Inspector-General of Recruiting receives pay and allowances of a Brigadier-General—449, 452. Does not consider that these rates are proportionate to the duties of the post—450. Importance of the duties of Inspector-General of Recruiting. Witness has saved between 4,000*l.* and 6,000*l.* a year by doing away with conducting—451, 452.

Effects, Soldiers'.

Administration of, should be transferred from Accountant-General to Solicitor—*Brown, p.* 12.

Engineer Committee. *See* Committees.

Engineer Establishment.

Requisitions from, pass through Military Secretary's office—*Forster*, 54, 55.

Engineer Department.

1. *Chief of the Department and Head of the Corps.*
2. *Fortifications.*
3. *Control and Record of Expenditure.*
4. *Officers and others employed in the Department.*

1. *Chief of the Department and Head of the Corps.*

Changes in the general superintendence of the Corps since 1855—*Jervois*, 713–717. There is now no Director of Works—*ib.* 718, 719.

Dissatisfaction in the Corps at its being without a head, and at the two branches of the department at the War Office being under junior officers—*Duke of Cambridge, p.* 8; *Simmons*, 816, 830.

Appointment of Director of Works should be revived, but he should not command the Corps—*Duke of Cambridge, p.* 8, 1366–1368.

Board of Ordnance organization should be reverted to—*Simmons*, 816, 842; *Jervois*, 720, 811. Superintendence of Works should be under the head of the Corps—*Simmons*, 818, 831, 832.

Control over expenditure would not be affected if both works and corps were under one head—*Murray*, 886–889.

Superintendence of works and distribution of the corps should be under one officer—*Simmons*, 818, 834; *Murray*, 883–885.

Such an officer would be able to select officers for either civil or military duties of the corps—*Jervois*, 721, 722.

He should carry out both works and corps duties at his head-quarters—*Simmons*, 833.

He should be called Inspector-General of Fortifications—*Jervois*, 812; *Simmons*, 818, 834.

System of check over expenditure on works is so perfect that there would be no danger if the Head of the Engineer Department were under Commander-in-Chief instead of Secretary of State—*Simmons*, 824, 843.

Inspector-General of Fortifications should not command the corps. The command should be exercised by Commander-in-Chief through Deputy Adjutant-General, Royal Engineers—*Duke of Cambridge*, 1369.

1. *Chief of the Department and Head of the Corps*—cont.

The Director of Works should be, conjointly with Director-General of Ordnance, adviser of Secretary of State in the erection and armament of fortresses—*Dalhousie, p.* 10.

Office of Inspector-General of Fortifications should be revived. He should direct distribution of the corps as well as superintend the works—*Report*, xvi.

2. *Fortifications.*

i. Generally.

Consultation of Director of Ordnance, Inspector-General of Artillery, and Deputy Adjutant-General of Artillery—*Jervois*, 804-806.

On question of relation between Artillery and Engineers in planning fortifications, witness thinks that Commanding Royal Engineers and Commanding Officers Artillery should be put in communication—*Simmons*, 868. Professional Head of the Artillery and Inspector-General of Fortifications should both be consulted as to requirements of the Artillery and Engineer services—*ib.* 868, 869. This would be preferable to consulting a Committee, *ib.* 871.

There should be an Artillery Officer in the Engineer Department to advice on the construction of fortifications—*Gambier*, 279-289. He should be under Director-General of Ordnance, but should communicate with Commander-in-Chief through Deputy Adjutant-General, Royal Artillery, *ib.* 228-290.

Would not put an officer of Artillery under Inspector-General of Fortifications for the purpose of giving advice on artillery questions affecting fortifications—*Simmons*, 870.

The number of fortification works in active progress has been much reduced—*Jervois*, 729.

New works are settled by Defence Committee—*Gambier*, 272, 273, 292.

ii. Under the Loan.

Works will be completed in about two or three years—*Jervois*, 724. They form the larger part of fortifications now being erected at home. Works abroad not under loan—*ib.* 725, 726. Witness has been in charge of loan works from the first—*ib.* 723, 727. Superintendence of loan works might be separated from that of the rest of the works. The accounts are quite distinct—*ib.* 728, 729. Commanding Royal Engineer at Portsmouth has charge of works under the loan as well as those provided for in the estimates. He is not paid out of the loan—*ib.* 752-756. Employment of officers in the Works Department of War Office on loan business—*ib.* 766.

Special arrangement should be made for superintending works under fortification loan—*Report*, xvi.

3. *Control and Record of Expenditure.*

No works are ordered which would entail expenditure beyond the sum voted for each particular work—*Jervois*, 769. Secretary of State has power to sanction special expenditure not exceeding 200*l.* on works without obtaining Treasury sanction—*ib.* 770. A liability account of sums authorized for works is kept in the Works Department—*ib.* 739-742. For administrative purposes, reference is made to that account, not to the complete record kept by Accountant-General—*ib.* 748-750. Inconvenience of referring to the latter—*ib.* 745. Works Department should keep its own accounts, or should be consulted by Accountant-General's Branch with regard to appropriation of expenditure—*ib.* 738, 739, 743.

Uncertainty in controlling expenditure for special services. Suggested remedies—*Knox, p.* 21.

(For audit of accounts and examination of Engineer bills *see* ACCOUNTS, DEPARTMENTAL.)

Financial control over expenditure on works not weakened under the arrangements proposed by Committee—*Report*, xvi.

4. *Officers and others employed in the Department.*

Services of Engineer Officers should be made more generally available for other departments of the public service—*Jervois*, 807-809.

The employment of non-commissioned officers as foremen of works answers well—*Simmons*, 820, 823.

Engineer Officers and others specially employed at War Office—*Jervois*, 758-760. Duties of surveyors and clerks

5. *Officers and others employed in the Department*—cont.

of works so employed—*ib.* 762-765. Total expense, *ib.* 761.

Engineer Officers should be employed in the Works Branch of the War Office in the place of civilian surveyors—*Simmons*, 876, 877, 880.

Clerks in Works Department of War Office are part of the Royal Engineer Department—*Jervois*, 757. No War Office clerks are employed—*ib.* 767.

ENGINEERS, ROYAL.

Put under Commander-in-Chief in 1835—*Duke of Cambridge*, 1344. The command of the Corps should not be exercised by Inspector-General of Fortifications, but by Commander-in-Chief through Deputy Adjutant-General Royal Engineers—*ib.* 1369.

The regimental orderly room should be at the headquarters of the corps—*Simmons*, 824. The men are employed too much in twos and threes—*ib.* 819. The labour of the sappers of the corps is economical—*ib.* 838. There is no lack of work for the men in time of peace; the want is rather for the officers—*ib.* 839-841. Employment of officers in Works Department of War Office and in constructing works for Artillery experiments—*ib.* 876-880. Importance of employing the corps on works in time of peace, in order that they may be trained for war—*ib.* 835-837.

Committee has been appointed on employment of Engineer Officers—*Jervois*, 810.

Command of Royal Engineers should be vested in Officer Commanding-in-Chief. Discipline should be dealt with in same way as that of other branches—*Report*, xv.

See also ENGINEER DEPARTMENT.

ESTABLISHMENTS.

It is the duty of Accountant-General to watch fixed establishments, except those of commissioned officers. The latter are controlled by the Gazette Room—*Knox, p.* 20. Commander-in-Chief is each year requested to maintain establishments as fixed by Parliament—*ib.* 20.

Proposed alterations in establishments should be reported on by Accountant-General—*Report*, iv. Establishments cannot be altered without Treasury sanction—*ib.* iv.

ESTIMATES, PARLIAMENTARY.

Preparation of estimates has been entrusted to Mr Knox since November 1863. The estimate room is part of the Account Branch—*Knox, p.* 19. Details of mode of preparing Parliamentary estimates—*ib.* 20, 21. They were formerly prepared in Chief Clerk's Branch. Reasons for their transfer to Accountant-General's Department—*ib.* 19, 20. Preparation of estimates for the Reserve Forces *ib.* 20. Estimate of pay of the army is prepared in estimate room. There is no connection between that duty, and that of fixing pay and allowances—*ib.* 20. The amounts proposed to be voted for stores and works, have of late years been a matter of policy. The estimates for these services have not been checked by Account Branch—*ib.* 20.

Detailed review of proceedings of spending departments should be taken when estimates are prepared—*Galton, p.* 18.

Controllers at foreign stations are each year informed by the Accountant-General of the amounts to be expended in each Command—*Knox, p.* 20. Commander-in-Chief is requested to maintain establishments as fixed—*ib.* 20. Preparation of departmental estimates—*ib.* 20, 21 (*Appendix* B.).

Reasons for placing estimates in the "Control of Finance" Branch of the proposed Finance Department—*White*, 1179-1182, 1212.

Construction of estimates—*Report*, iv. Final financial review will still be necessary—*ib.* iv. Financial Secretary should be charged with this duty—*ib.* xxi. Financial Secretary should assist Secretary of State in communicating with Departments in respect to estimates—*ib.* xxi. Final compilation of estimates should continue to be done by Accountant-General—*ib.* iv. Accountant-General's Department to advise on reappropriations and excesses on votes—*ib.* iv. Cause of reductions in estimates for 1869-70—*ib.* iv. Reductions should be worked out by Administrative Departments—*ib.* iv.

EXPERIMENTS.

Nature of Adjutant-General's business in connection with experiments—*Paulet*, 181-183.

EXPERIMENTS—*cont.*

Experiments should be initiated and considered by Secretary of State, but Commander-in-Chief should be consulted—*Dalhousie, p.* 11.

Experimental business of Director-General of Ordnance should be transferred to Horse Guards—*Power, p.* 4.

Experiments should be initiated in Commander-in-Chief's Department—*Gordon, p.* 2.

Director-General of Ordnance should have power to incur expense for experiments—*Lefroy*, 1159.

Responsibility for carrying out experiments—*Adye*, 974–976.

Propositions for experiments should be reported on financially by Controller of Ordnance—*Power, p.* 4.

Experimental questions should be referred to Controller-in-Chief for financial consideration—*Gordon, p.* 2.

Questions relating to experiments should not be referred to Controller-in-Chief—*Lefroy, p.* 1.

Mixed Artillery and Engineer experiments not properly carried out by Ordnance Select Committee with reference to Engineering considerations—*Jervois, p.* 22.

An Engineer officer should be added to Artillery Committee when questions which might have reference to works are under consideration—*Simmons*, 873.

Engineer experiments might be conducted under a Board, composed of Director of Works, Director-General of Ordnance, and Naval Director-General of Ordnance—*Jervois, p.* 22. Engineer Department should have means of carrying out Engineering experiments by means of its own officers—*ib. p.* 22.

Although Council of Ordnance works well, it is desirable to appoint sub-committees to settle matters of fact—*Lefroy*, 1152-1158. Number of committees on experimental inquiries too large. Director-General of Ordnance should have a Staff to form a permanent nucleus for such committees—*ib.* 1159, 1164.

Abolition of Ordnance Select Committee concurred in by Commander-in-Chief—*Duke of Cambridge, p.* 8.

Large expenditure on experiments is due to want of Civil control—*Gordon, p.* 2.

Targets, and works for Artillery experiments, should be constructed under the direction of Engineer officers—*Simmons*, 876, 878, 879.

Experiments relating to munitions of war should be placed under Chief of Control Department—*Report*, xviii.

F.

FINANCIAL CONTROL.

Enumeration of the checks established by law over expenditure—*Knox, p.* 21. Treasury sanction necessary for any increase to fixed establishment, pay or allowances—*ib. p.* 21.

Also, for transferring a surplus on one item of a vote to another—*Jervois*, 771-774. No works are ordered which would entail expenditure beyond the sum voted by Parliament for each particular work—*ib.* 769. Secretary of State has power to sanction special expenditure not exceeding £200 on works without obtaining Treasury sanction—*ib.* 770.

Uncertainty in controlling expenditure on works for unforeseen and special services. Suggested remedies—*Knox, p.* 21. Function of Accountant-General to see that all financial checks are properly maintained.—*ib. p.* 21.

Duties of Financial Control and Examination of Expenditure could not safely be united in any officer under the rank of Assistant Under Secretary, unless there were an Audit independent of the War Office—*Milton, p.* 19.

Control to be exercised by proposed Finance Branch in regard to Control Services—*White*, 1187-1191.

The check over the proceedings of Heads of Departments in the War Office is exercised by the examination of papers finally returned to Registry and by the Appropriation Audit—*Balfour, p.* 14; *Lawson, p.* 15.

No want of confidence in heads of Administrative Departments is implied by system of financial control—*Knox, p.* 21.

The accounts are the machinery for ascertaining that heads of departments do not exceed their powers—*Galton, p.* 18. They cannot be the machinery for enforcing economy—*ib. p.* 18.

The examination of papers in the Registry of the War Office should show whether Heads of Departments exceed their powers. The examination of the accounts can only be efficiently performed in the Administrative Departments—*Lawson, p.* 15.

FINANCIAL CONTROL—*cont.*

Establishment of officers should be checked by Account Branch. At present it is done by Gazette Room—*Knox, p.* 20. Establishment of men is watched by Estimate Sub-division of Accountant-General's Department by the aid of monthly recruiting returns—*ib. p.* 20. Commander-in-Chief is each year requested to maintain establishments as fixed by Parliament—*ib. p.* 20. Mode in which expenditure abroad is controlled. Monthly returns of foreign expenditure are rendered to Estimate Sub-division—*ib. p.* 20. *See* also *p.* 21, extract from "OUTLINE OF PLAN."

Traditional conception of Financial Control—*Report*, iii. Relation of Financial Control to Administrative policy—*ib.* iii. Secretary of State is primarily responsible for Financial Control, but it should be exercised by Financial Secretary—*ib.* iii. Two branches of Financial Control—(1) Financial Initiative and Review, (2) Concurrent Criticism and Control—*ib.* iii. Concurrent financial control should continue to be exercised by Accountant-General's Department—*ib.* iv. Certificate of Accountant-General to Appropriation Account—*ib.* iv. Best mode of securing financial control over expenditure of stores—*ib.* xx. Chief of Control Department is not checked under existing system of Audit—*ib.* xix. Control over expenditure on works not weakened under the arrangements proposed by Committee—*ib.* xvi. Claims and charges for allowances should not be examined by executive officers—*ib.* xx. Regulations involving expenditure should not be made until expenditure has been authorized by Parliament—*ib.* v.

FINANCIAL DEPARTMENT. *See* FINANCIAL SECRETARY AND ACCOUNTANT-GENERAL'S DEPARTMENT.

FINANCIAL SECRETARY.

Creation of appointment recommended—*Report*, iii. He should be a Parliamentary officer—*ib.* iii, xi, xxi. Should exercise the function of Financial Control—*ib.* iii. Regulations involving expenditure not authorized by Parliament should be referred to him before going to Secretary of State—*ib.* v. He should sign letters to Treasury—*ib.* v. Duties recapitulated—*ib.* xxi. Financial Department should be under direction of Financial Secretary—*ib.* iii, xxi.

FORAGE. *See* CONSUMABLE SUPPLIES.

FORSTER, Lieut.-General W. F. (K. H.), Military Secretary. (*Analysis of his Evidence.*) *Appendix No. III, pp.* 23–28.

Has been Military Secretary upwards of nine years—1. Position and duties of Assistant Military Secretary—2, 3. *Duties of Confidential Department of Military Secretary's Office:*—General nature of duties—4, 5. Records kept with respect to honours and appointments—6–8. "Officers' grievances"—9, 10. Nature of business connected with General Courts-Martial—11, 60–63. Ditto Interchange of regiments—12. Copying letters—13. Commander-in-Chief's and Military Secretary's levées—13, 14; 84–89. Amount of really confidential work—25. *Duties of General Correspondence Branch:*—Correspondence connected with Passages—15, 16. Functions of Military Secretary, Adjutant-General, and Quartermaster-General respectively in regard to passages for officers going abroad—16. [Memorandum handed in by witness], 65–67, 77. Claims and representations against officers—17–20, 64. Inspection of Yeomanry Cavalry and Militia—21, 81. Applications for appointments in Commissariat and Store Departments—21–22. Claims to allowances for special or extra service—23. General Registry of Correspondence—24–27. *Duties of Promotional Branch:*—Promotions and Exchanges—28. Statement of officers' services for promotion is Adjutant-General's business—78. Reserve Fund Account—29–32. Mess and Band Funds; questions dealt with by Adjutant-General and Military Secretary respectively—35–38, 80. Appointment, promotion, &c., of Medical Officers—39, 40. "Direct Commissions" and "Sandhurst"—41–43. Council of Military Education only deals with examination—42. Inconvenient situation of rooms—45. Work done in Room No. 4. Parliamentary returns, &c.—46, 90–100. *Duties of Ordnance Branch:*—Papers from the Deputy Adjutants-General of Engineers and of Artillery, intended for the Commander-in-Chief, come to Ordnance Branch, unless they relate to discipline or stores, in which case they go to Adjutant-General's office—50, 51, 101–104. Ordnance Branch has the same duties in relation to Artillery and En-

FORSTER, Lieutenant-General W. F.—*cont.*

gineers that the other two branches of the Military Secretary's office have to the rest of the Army—52, 53. Requisitions from Royal Engineer Establishment—54, 55. Returns of drafts for India follow same course as in the Line—56. Quartermaster-General applies for tonnage—57. *Business of the Military Secretary's Office generally*:—Military Secretary and Commander-in-Chief are one. The former is not really "Chief of the Staff," but he performs certain duties which would devolve upon such an officer—47–49; 109–112. Some matters of discipline, such as misconduct of officers, are dealt with partly by Military Secretary, partly by Adjutant-General—58, 59. Duties of Military Secretary and Adjutant-General respectively, with reference to Courts-Martial—11, 58–63. Claims and representations against officers—17–20, 64. Reasons why the Military Secretary, as well as the Adjutant-General, should deal with passages of officers—65 (see also 16, 66, 67 and 77). The mode of communicating with the Adjutant-General's office is by memorandum, not by letter—67–76. Questions connected with Mutiny Act and Articles of War are dealt with by Adjutant-General—79. Questions in regard to Mess and Band Funds dealt with by Military Secretary—80. Action of Adjutant-General and Military Secretary respectively, in reference to Inspection of Militia, Yeomanry, and Pensioners—21, 81. Ditto in reference to confidential reports on regiments—82, 83. Employment of clerks on returns for Parliament and the War Office—90–100. Correspondence from Deputy Adjutants-General R.A. and R.E. Relations between Military Secretary, Adjutant-General, and Quartermaster-General explained—105–108. Witness does not believe that one officer could perform the combined duties of Military Secretary, Adjutant-General, and Quartermaster-General—112. Thinks that the present system works well—113. Correspondence between Horse Guards and War Office very large. It would not altogether cease if all departments were amalgamated—114–117.

FUEL AND LIGHT. *See* CONSUMABLE SUPPLIES.

G.

GALTON, DOUGLAS, Esq., C.B., Assistant Under Secretary of State. (*Analysis of his Evidence.*) *Appendix No II, pp.* 17 *and* 18.

It is immaterial in principle whether Account and Audit Branches are under one or two Heads. The essential point is that the individual clerks employed in examination of accounts should not check charges which they had themselves authorized; and that those who perform audit duties should have no power of recommending a departure from regulations. Superintending clerks for audit and authorization of expenditure should be different individuals. Third Class of the Audit and Account Branches might be interchangeable. When the examination and correspondence were conducted in one room, it had always been found that the former fell into arrear. The accounts had never been in so forward a state as now. The present system should, therefore, be maintained. Definition of the respective functions of the Accountant-General and Chief Auditor as now carried out in practice—*p.* 17. Functions of the Regulation Branch. The saving in establishment by reuniting the Account and Audit branches must be very small, if any. Reason for large number of first-class clerks in the Audit Branch. Reasons which induced Lord Hartington's Committee to recommend the creation of the appointment of Chief Auditor with a separate establishment of clerks. That separation was a hardship to individuals: an amalgamation would cause similar hardship to others, and should not be carried out without some paramount advantage. The actual division of work between the Account and Audit Branches might now, perhaps, be improved. He (Mr. Galton) had proposed changes in 1866–7, but they were postponed in consequence of other projected changes in the organization of the office. Objections to the proposed examination of accounts by the Administrative Departments. The accounts cannot be the machinery for enforcing economy. The detailed review of the proceedings of the spending departments should be taken when the Estimates are prepared. The accounts are the machinery for ascertaining that the Heads of Departments do not exceed their powers. This check would be lost if the Departments examined their own accounts—*p.* 18.

GAMBIER, Major-General, C.B., Deputy Adjutant-General, Royal Artillery. (*Analysis of his Evidence*). *Appendix No. III, pp.* 32–35.

Has been Deputy Adjutant-General, R.A., over five years—214. Office constituted under the Board of Ordnance—215. Branch of the office at Woolwich, under Superintendent of Royal Artillery Records—216, 217. Artillery business passing through Military Secretary's office—218, 219, 221, 227–239, 328–334. Ditto Adjutant-General's office—221, 223–226, 233, 235–237, 245–248. Ditto Quartermaster-General's office—221, 226. Communication with War Office—220, 229, 262. Ditto India Office—227, 239. Office of Deputy Adjutant-General Royal Artillery is, strictly speaking, a branch of Adjutant-General's Department—223. Mode of conducting business relating to passages—227, 228. Duties of Deputy Adjutant-General Royal Artillery in relation to the purely regimental business of the Corps—240–244, 256, 262, 312–315. All orders to Deputy Adjutant-General Royal Artillery are given by the Adjutant-General, the Military Secretary, or the Quartermaster-General—224. Personal communication of Deputy Adjutant-General Royal Artillery with the Commander-in-Chief—240-242, 256, 257. Mode of dealing with discipline questions—225, 245, 255. Confidential Reports (regimental)—257, 262, 333, 334. Recruiting for Royal Artillery—258, 259. Correspondence relating to Prize Money—260, 261. Demands for Brigades, now sent to Deputy Adjutant-General Royal Artillery, might go direct to War Office—262–267. Business relating to armament of fortresses—268–273. New works are settled by Defence Committee, of which the Commander-in-Chief is President—272, 273, 292. Communication with Director-General of Ordnance and Controller-in-Chief—269, 345, 346. Relation to Inspector-General of Artillery, and duties of the latter officer—274–278. Witness thinks that there should be an Artillery officer in the Director of Works' Department to advise on the construction of fortifications—279–289. This officer should be under the Director-General of Ordnance, but should be in communication with the Commander-in-Chief through Deputy Adjutant-General Royal Artillery — 288–290. Does not think that questions relating to changes in matériel should depend upon the opinion of the Director-General of Ordnance—294. It is not yet settled who is to be responsible for the duties hitherto performed by the Ordnance Select Committee—297. Mode of dealing with changes in matériel proposed by officers serving in the batteries—299–305. Witness does not think that unnecessary matters of detail are now referred to him, except supply of clothing, small stores, and practice ammunition—316–319. These latter should go direct to War Office—316. Line organization inapplicable to Artillery; there must be a head-quarters for the whole corps—321, 322. Under the Board of Ordnance the Artillery Regimental work was done at Woolwich—323, 324. Returns and correspondence relating to personal equipment of Artillery might go from Brigades direct to War Office—325, 326. Ditto Militia and Volunteer ammunition—327. Promotions go to Military Secretary—328. Records of officers' services are kept by Deputy Adjutant-General Royal Artillery, not by Military Secretary—329, 330. If the Commander-in-Chief required information with regard to an officer's services, it would be afforded by Deputy Adjutant-General Royal Artillery through the Military Secretary—331, 332. Confidential Reports are kept by Deputy Adjutant-General Royal Artillery, not by Military Secretary—333, 334. Employment of Military clerks in office of Deputy Adjutant-General Royal Artillery works well—335. All the clerks in the office are Artillery soldiers, and can be exchanged at any moment—339–342. Pay and allowances of these clerks—340. Hours of work — 341. Supervision — 344. Clerical duties of a confidential nature are performed by Superintending Officer—344.

GORDON, Captain HENRY WILLIAM, C.B., Principal Superintendent of Stores, Woolwich. (*Analysis of his Evidence.*) *Appendix No. I, pp.* 2 *and* 3.

Is now of opinion that there should be one Department for the custody of forage, food, fuel and light, and another for Ordnance and General Stores; but that they should both be under one Controller. There should be only one Transport Train. Witness strongly opposes separation of Ordnance Stores from General Stores. Employment of Artillery Officers in Control Department. Stores should be divided into sections, and each section put in charge of a Commissary. Ordnance Stores should be inspected by Commanding Officer of Artillery; Inspectors of Warlike Stores being made their subordinates. "Re-

Gordon, Captain Henry William, C.B.—*cont.*

gulations of 1833 for Ordnance Commissaries in the Field" should have been observed in the Crimea. Witness is in favour of "Boards of Respective Officers." Artillery demands should be checked by the Board. Heads of Departments at Woolwich should form a Board. Experimental questions should be referred to Controller-in-Chief for financial consideration. Experiments should be initiated by the Commander-in-Chief's Department. Large expenditure on experimental services due to want of Civil control. Evils of independent Departments dealing with stores exemplified in the Crimea, and in the expedition to Canada at the time of the "Trent" affair —*p.* 2. Economy resulting from concentration under Controller-in-Chief. Assimilation of patterns and extension of system of local purchase abroad advocated—*p.* 3.

Grant, Lieut.-General Sir J. Hope, G.C.B., Quartermaster-General. (*Analysis of his Evidence.*) *Appendix III, pp.* 48–51.

Has been Quartermaster-General nearly four years—551. All business relating to movement of Troops goes through the Quartermaster-General's Department—552. This applies, with few exceptions, to individual officers also—553. Questions relating to foreign reliefs and inter-colonial movements come to Quartermaster-General through Military Secretary's office—554. Reasons for this—555. Questions relating to reduction and augmentation of garrisons and distribution of troops abroad also come through Military Secretary—555. Military Secretary communicates the changes to Adjutant-General—556. Quartermaster-General refers questions affecting finance to Military Secretary—557. Steps taken by Quartermaster-General to obtain sanction for a relief to be carried out—558–564. He takes his instructions direct from the Commander-in-Chief—560. This business might be settled by the Quartermaster-General himself sending the recommendation of the Commander-in-Chief to the War Office, and afterwards communicating the Secretary of State's decision to the Military Secretary—565. Questions involving any new principle in the Army are sent by the Quartermaster-General to the War Office through the Military Secretary. When the new principle is approved he corresponds direct with the War Office on points of detail—566. Military Secretary is not inferior to Quartermaster-General; he is the amanuensis of the Commander-in-Chief—567. There is no advantage in passing letters through the Military Secretary, except that Quartermaster-General could not himself submit questions to the Queen—568. Questions of selecting Indian Officers for instruction in signalling and telegraphy need not go through Military Secretary—569. Reason why these questions do not go to Adjutant-General—570–573, 575, 576. The system of instruction lies with the Royal Engineers, but the classes are arranged by the Quartermaster-General—574. Quartermaster-General corresponds direct with the War Office on improvement, increase, and use of Barracks—577–579. Questions as to increase of Barracks abroad would be sent direct to the War Office by General Officers Commanding; in some cases they would be sent to the Horse Guards. Other business transacted directly between Quartermaster-General and War Office—580, 581. Action of Quartermaster-General's Department upon questions of rifle ranges, gymnasium, &c.—582. Objections to such questions at home stations being addressed by General Officers direct to the War Office—583, 584, 585, 587. Such questions from foreign stations, however, come direct to the War Office—585. At home, every barrack detail comes to Quartermaster-General's office. The questions (which are very numerous) are decided by the Duke of Cambridge himself—588–592. Questions relating to the supply of forage, fuel, and light, go direct from the Districts or Commands to the War Office, under the Control system—593. Occasionally an application for extra forage comes to Quartermaster-General—594. Requisition for ordinary supplies of forage would be authorised locally by the Controller—595, 596. Questions of fuel and light might be settled locally by General Officer and Controller—597. Questions of ration allowances to soldiers' families come to Quartermaster-General. Questions of Field and Detention Allowances go direct to War Office, but are sometimes referred to Quartermaster-General—597–599. Notices of proposed Home movements. The Annual Statement of troops to move by sea is prepared and sent to the War Office to enable Admiralty to prepare Transport Estimates—599, 600. When the forage reliefs or inter-colonial movements have been settled, Quartermaster-General corresponds direct with War Office about

Grant, Lieut.-General Sir J. Hope, G.C.B., Quartermaster-General—*cont.*

shipping arrangements. He also corresponds direct with War Office upon passage for individual officers, soldiers, or others—601. Does not think that present system of business in reference to passages could be simplified—602, 604. Military Secretary, not Quartermaster-General, applies to War Office for passage to be ordered for an officer—603. Corresponds occasionally by letter with Adjutant-General and Deputy-Adjutant General of Royal Artillery and Royal Engineers—605–607. Has nothing to do with estimates of expenditure for movement of troops—601, 608. System of registering letters used in Quartermaster-General's office—609–612. If a general register of letters for all departments at the Horse Guards were kept, the Quartermaster-General's independent register would still have to be maintained—613. Time occupied in registering letters of various departments at the Horse Guards—613. Introduction of Control system into Great Britain will diminish business of Quartermaster-General's office, particularly the Barrack branch of it—614–616. Thinks that business would be greatly facilitated by bringing Horse Guards and War Office under one roof—616–618. Is in favour of amalgamating the Departments at the Horse Guards, but thinks there would be difficulty in finding an officer of high rank able to perform the combined duties of the present Chief of those Departments —619. The officer at the head of the amalgamated Department would require an assistant, who must not be one of the heads of the sub-departments, and it would be essential that he should be acquainted with the business of the whole office—620–625. Would assign the duties of the amalgamated office to three branches: Movement, Discipline, and Recruiting—627, 628. The Staff Officers in these branches should be interchangeable—628, 629. Difficulties in defining the respective duties of Quartermaster-General and Adjutant-General occur occasionally—631. The Topographical Department is not under Quartermaster-General, except in the field—632. In the case of a campaign, it would be the duty of Topographical Department to collect information respecting nature of country, &c—633. Topographical Department should be under Quartermaster-General—634. There is no reason why regimental canteens should be under Quartermaster-General rather than Adjutant-General—635, 636. They were under the Adjutant-General in India—635. They should not be under the Controller—637. Distribution of business at Horse Guards has been the same for many years—638.

H.

Holland, Major Trevenen J., C.B. (*Analysis of his Evidence.*) *Appendix No. I, pp.* 6 *and* 7.

Is Assistant Quartermaster-General of the Bombay Army, and superintended the embarkation at Bombay of the Force for Abyssinia. Confusion in the Abyssinian and also in the Persian Expedition, owing to stores being consigned to different Departments. Witness had seen in the field in India the inconvenience of separating the Land Transport from the Supply Departments—6. One Department ought to be responsible for the shipment, receipt, and custody of all stores, including munitions of war; the head of one Department should arrange for their disembarkation and distribution. The Administrative Officers of this Department should have executive professional assistants drawn from the Artillery and Commissariat; the subordinate establishment should consist of enlisted men, armed for the protection of themselves and the stores under their charge. Stores in Artillery charge should be limited to those of 1st and 2nd Reserves. Personal experience of witness in the Abyssinian Campaign as showing the necessity of placing the Transport under the Supply (*i.e.* Control) Department. In case of an expedition by sea, the senior officer of the Control Department should be with the Commander-in-Chief of the Force, another officer of the Department at the port of embarkation, and another at the port of debarkation. Subordinate officers of the Control Department would, on the line of march, be *ex officio* Baggage Masters—*p.* 7.

Horse Guards. *See* Military Department.

Hozier, Captain. (*Analysis of his Evidence.*) *Appendix No. I, pp. 5 and 6.*

There should be but one Department for supply, custody, and transport: unity of organization should be maintained up to the Field Arsenal. The Department should, however, be divided into two sections, one for consumable supplies and general stores, and the other for warlike stores and transport. There should be in the War Office two officers immediately responsible to the Secretary of State; one for personnel, the other for matériel. The superior appointments in the Control Department should be held by combatant officers in the same way as appointments on the General Staff of the Army—*p. 5.* The appointments of Commissaries should be filled by non-commissioned officers. Combustible Stores should be entirely under the charge of non-commissioned officers of Artillery. Every one employed in the field should be a trained soldier. In witness's opinion the Army is unprepared for war, owing to the absence of proper Equipment Regulations. Defects in the present Regulations for Stores for an army in the field. In Prussia munitions of war are consigned to the Artillery, which has its own transport and depôts; evil results of this arrangement. When sea transport is in question it is essential that there should be only one consignee at the base of operations. Regimental transport should be under immediate charge of regiments, though liable to be withdrawn at any moment by the Controller. Confusion in Abyssinia owing to stores being shipped to different Departments—*p. 6.*

Inspectors of Warlike Stores. *See* Stores.

Inventions.

Nature of Adjutant-General's business in connection with—*Paulet*, 181–183.

Inventions should be considered by Secretary of State, but Commander-in-Chief should be consulted as to military bearing—*Dalhousie, p.* 11. Heads of Departments should not be allowed to compete with the public as inventors—*Duke of Cambridge, p.* 8.

Ireland.

Position of Commander-in-Chief in Ireland—*Duke of Cambridge*, 1303.

Working of Control Department in Ireland. *See* Control Department.

J.

Jervois, Colonel W. F. D., R.E., C.B. (*Analysis of his Evidence.*)

(*First Examination.*) *Appendix No. II, p.* 22.

Defects in the constitution of the Engineer Committee at Chatham. Disapproved of the way in which Artillery experiments were carried out without reference to Engineering considerations. Proposed as a remedy that there should be a paid member of the Engineer Committee, who should be also *ex officio* a member of the Artillery Committee. Objections to placing the Engineer Committee under a Director of Experiments generally. The Engineer Department should have the means of carrying out experiments in its own particular scientific department by means of its own officers. Was not satisfied with the way in which mixed Artillery and Engineer questions were treated by the Ordnance Select Committee. Would not object to all experiments being conducted under a Board composed of Director of Works, Director-General of Ordnance, and Naval Director-General of Ordnance—*p.* 22.

(*Second Examination.*) *Appendix No. III, pp.* 56–61.

Has been employed at War Office since April 1856—712. Detail of changes which have taken place in the general superintendence of the Royal Engineers since the abolition of the Board of Ordnance in 1855—713–716. Sir John Burgoyne was the first officer who held

Jervois, Colonel W. F. D.—*cont.*

the position of Inspector-General of Engineers and Director of Works—717. Sir William Gordon is only Inspector-General of Engineers: there is now no Director of Works—718, 719. Witness thinks the organization of the Engineers which existed before the abolition of the Board of Ordnance should be reverted to, and that the Inspector-General of Engineers should command the corps, with an Adjutant-General under him—720, 811. An Engineer officer of high rank, or in command of the corps, and at the same time head of the department, would be able to select officers for either the civil or military duties of the corps—721, 722. Witness has been in charge from the first of the works for fortification under the Loan—723, 727. Those works will be completed in about two or three years—724. They form the larger part of the fortifications now being erected at home. There are also large works at Bermuda, Canada, Halifax, &c., but they are not under the Loan—725, 726. It would be possible to separate the superintendence of the works under the Loan from the rest of the works of fortifications—728. The accounts are quite distinct—729. The number of works in active progress has been much reduced—729. Description of the way in which bills for works are checked locally—730. Examination of the bills in the Chief Auditor's Branch of the War Office—731. They are only referred to the Works Branch in special cases—732. In witness's opinion all bills for works should be examined in the Works Branch—732, 737. If the War Department Surveyor and the Contractor were in collusion, Chief Auditor would have no means of discovering fraud unless the estimates were exceeded—733–736. Thinks that the Works Department should keep its own accounts, or that it should be consulted by the Accountant-General's Branch with regard to the appropriation of the expenditure—738, 739. In the former case the Chief Auditor would check the amount kept by the Works Department—743. At present a liabilities account or record of sums authorized for works is kept in the Works Department—739–742. Inconvenience of having to refer to the complete record of expenditure kept by the Accountant-General—745. The references for administrative purposes would, however, be to the liabilities account, not that kept by Accountant-General—748–750. At Portsmouth the Commanding Royal Engineer has charge of all the works, both those under the loan and those provided for in the Estimates—752. He is not paid out of the loan—753. That fund is only charged with expenses beyond the ordinary establishment—754, 756. The clerks in the Works Department of the War Office are now part of the Royal Engineer Department, and are provided for in Vote 14—757. No War Office clerks are employed—767. Engineer Officers and others specially employed in the Department—758–760. Duties of Surveyors and Clerks of Works so employed—762–765. Total expense 761. Employment of officers on loan business—766. No works are ordered which would entail expenditure beyond the sum voted by Parliament for such particular work—769. Secretary of State has power to sanction special expenditure not exceeding 200*l.* without obtaining Treasury sanction—770. Sanction of Treasury is necessary for transferring surplus on one item to another, but total sums voted by Parliament must not be exceeded—771–774. Letting and management of War Department lands are under Works Department—775. Proposal to appoint local agents to advise professionally on the letting of land—776, 784, 785, 788, 789. Such an agent is already employed at Devonport—785, 776. Position of Captain Downman, Superintendent of War Department property in the Portsmouth district—781–783, 796–799. Reasons why Commanding Royal Engineer should have charge of War Department lands—786, 787. Responsibility for letting rests with Commanding Royal Engineer—790. Functions of Director of Contracts and Director of Works in regard to contracts for letting—790–795. Witness thinks that the transfer of the charge of lands to the Office of Woods would cause additional expenditure—802. Consultation of Director of Ordnance, Inspector-General of Artillery and Deputy Adjutant-General of Artillery, on Artillery questions involved in the construction of fortifications—804–806. Suggests that, as Engineer officers are relieved of details of Engineer work by the more extensive employment of Military Foremen of Works, their professional attainments should be made more generally available for other departments of the public service—807–809. Mr. Cardwell has appointed a Committee on that subject—810. Would revert to the old name of Inspector-General of Fortifications for the officer holding the combined appointments of head of the Corps of Royal En-

Jervois, Colonel W. F. D.—*cont.*

gineers and Chief of the Engineer Department—812. Suggests that there should be an officer under the Military Under Secretary of State to deal with general questions relating to defence. He might be secretary to a council for deciding questions of national defence—813.

K.

Keane, Colonel the Right Hon. H. Fane, Deputy Adjutant-General, Royol Engineers. (*Analysis of his Evidence.*) *Appendix No. III, pp.* 35–39.

Has been Deputy Adjutant-General, Royal Engineers, four years, and was Assistant Adjutant-General, Royal Engineers, five years—347, 348. Office of Deputy Adjutant-General Royal Engineers was established in 1855, on the abolition of the Board of Ordnance—349, 350. Offices of Deputy Adjutant-General Royal Engineers and Deputy Adjutant-General Royal Artillery are analogous—351. Relations of Deputy Adjutant-General Royal Engineers to Adjutant-General—353, 357, 358. To Quartermaster-General—369–373. To Military Secretary—353, 369–376, 390. To Director of Works—369. Mode of conducting business relating to passages—368–375. Duties of Deputy Adjutant-General Royal Engineers in relation to the purely regimental business of the Corps—352–358. Mode of dealing with discipline questions — 353–358. Personal communication with Commander-in-Chief—375, 376. Communication with War Office—353. Duties assigned to Deputy Adjutant-General Royal Engineers and Assistant Adjutant-General Royal Engineers, respectively—354, 355. Origin of the appointment of Deputy Adjutant-General Royal Engineers—357. Deputy Adjutant-General Royal Engineers is primarily responsible to the Adjutant-General, but it is necessary that he should communicate personally with the Commander-in-Chief, the War Office, and Heads of other Departments—357, 358. Witness does not consider that any of the business of his department could be settled by the War Office without passing through him—359. Claims for Detention Allowance must be countersigned by him, in proof that the officer was detained for the good of the Service—360. This applies at home only; he sees foreign claims in cases of dispute only—361, 362. Reasons for this distinction—363. Difficulty in settling such claims locally at home 364–366. Forage allowance—360, 367. Examination of claims to Extra Pay and Servants' Allowance—377–387. Questions relating to Pay—384. Estimates for Pay, Extra Pay, and Servant Allowance, are prepared in the office of Deputy Adjutant-General Royal Engineers—388. Reason why such estimates are not prepared by Deputy Adjutant-General Royal Artillery —389. Promotion questions go to Military Secretary —390. Questions relating to quarters—391. Deputy Adjutant-General Royal Engineers, not Military Secretary, keeps record of officers' services; Military Secretary refers to him—392–394. *Mode of communicating with other Departments at the Horse Guards and with the War Office*—395–414. Deputy Adjutant-General Royal Engineers never communicates direct with General Officers Commanding; he writes letters for the Adjutant-General to sign—397. Thinks that the business with the War Office might be carried on by means of minute papers—401–403. This is already done in many cases—401. Correspondence with regard to Stores and Clothing is very heavy — 404. Correspondence with Adjutant-General—405, 406. Correspondence with War Office—407–414. Correspondence with Military Secretary relative to Finance—415–420. The necessity for such questions coming to Deputy Adjutant-General Royal Engineers, arises from the incompleteness of regulations in financial matters—416, 417. Cases of Military Foremen of Works—420. Regulations for Arms, Accoutrements, and Clothing might perhaps be dealt with locally by the Control Department, if the present system were entirely changed, but the witness thinks that there would be great difficulties—421–423. Examination of demands for clothing and system of supply—424. Does not think that present arrangement causes double work —425. Thinks that certain returns might be dispensed with. Deputy Adjutant-General Royal Engineers has nothing to do with Barrack Services—428.

Knox, R. H., Esq. (*Analysis of his Evidence.*) *Appendix No. II, pp.* 19–22.

Had, since November 1863, been intrusted with the preparation of the Parliamentary Estimates, under the immediate instructions of the Secretary of State and the Under Secretaries. The Subdivision of which he is Head, is part of the Account Branch. In the old War Office the Estimates were prepared in the Chief Clerk's Branch—*p.* 19. Reasons which determined the transfer of this duty to the Account Branch, notwithstanding that some of the work is administrative. Memorandum of 22nd June, 1862, defining the duties (extract given *Appendix* A, *p.* 21). The witness then explained the course adopted in the preparation of the Parliamentary Estimates, and handed in the circular instructions issued in 1866, in reference to the preparation of the Departmental Estimates which form the basis of the Parliamentary Estimates. (See *Appendix* B, *p.* 21.) The estimate of the pay of the Army is not prepared in any administrative department, but in the Estimate Subdivision. There is no connexion between this duty and that of fixing or allowing pay and allowances. A Branch might be formed for the latter duty, but it should comprise both Army and Departments. It is the duty of the Accountant-General to watch the fixed establishments of the Army, but at present this does not apply to Commissioned Officers, the check being actually exercised in their case by the Gazette room. Suggested that appointments proposed to be Gazetted should be checked by Account Branch. The amounts proposed to be voted for Stores and Works have of late years been a matter of policy; the estimates for these services were inserted under the immediate direction of the Assistant Under Secretary, and were never examined by the Accountant-General. Estimates for the Reserve Forces. When the numbers and money for the regular forces provided for in the Estimates have been voted by Parliament, the Commander-in-Chief is requested officially to maintain the establishment as fixed; and the Controllers at Foreign Stations are informed of the amounts to be expended in each command. (Form of letter handed in, see *Appendix* C, p. 21.) The establishment of men is watched by the Estimate Subdivision, by means of monthly recruiting returns. Mode in which the expenditure abroad is controlled. (Extract from "Outline of Plan" handed in, see *p.* 22.) Monthly returns of foreign expenditure are rendered to the Estimate Subdivision—*p.* 20. Uncertainty in controlling expenditure on Works for unforeseen and special services. Suggested remedies for this. Enumeration of the checks established by law over expenditure. Treasury sanction necessary for any increase to fixed establishment, pay or allowances. Function of Accountant-General to see that all the financial checks are properly carried out. No want of confidence in Heads of Administrative Departments is implied by the system of financial control—*p.* 21.

L.

Lands, War Department.

Property in Portsmouth district not publicly occupied should be in hands of Superintendent of War Department Lands. Engineer Department should have nothing to do with it—*Downman*, 1001–1080. Persons unnecessarily consulted in reference to Portsmouth property—*ib.* 1002–1007, 1081–1084. Superintendent of Portsmouth district should be in direct communication with War Office—*ib.* 1008. He should consult the military authorities in any matter connected with military questions—*ib.* 1009. Case of land purchased at Gosport—1011–1020. Instances of more land being taken up for forts than was required for carrying out the works—*ib.* 1022–1028. Purchases of land near Portsmouth not notified to witness. The Division Officers of Royal Engineers take possession on the part of Government—*ib.* 1029, 1034. Delay in letting property owing to that arrangement—*ib.* 1030. Management of property bought for the Portsdown Hill Forts—*ib.* 1031-1060. Houses purchased with lands and occupied by Engineer officers employed upon the works. The stoppage for quarters does not nearly cover the value of the rent of these houses—*ib.* 1061–1067. Complaints from War Office of inadequacy of rents for the Portsmouth property—*ib.* 1068, 1069. Steps taken —*ib.* 1070-1074. Witness is not consulted as to sales of property in his district—*ib.* 1075, 1085. Larger income might have been derived from Portsmouth property if witness had been consulted in reference to first lettings, &c.—*ib.* 1076, 1086. Proper rents have not been received for War Department property near Portsmouth—*ib.* 1080. Agent for War Department property should have power to call in a professional valuer in cases of difficulty—*ib.* 1087. Neither Commanding

LANDS, WAR DEPARTMENT—*cont.*

Royal Engineer nor Superintendent of War Department property has power to distrain—*ib.* 1088, 1089.

Letting and management of lands are under Works Department—*Jervois*, 775. Proposal to appoint local agents to advise on the letting of land—*ib.* 776, 784, 785, 788, 789. Position of Captain Downman, Superintendent, of War Department property at Portsmouth—*ib.* 781-783, 796-799. Local agent for advising on letting of land is already employed at Devonport—*ib.* 785-786. Reasons why Commanding Royal Engineers should have charge of War Department lands—*ib.* 786, 787. Functions of Director of Contracts and Director of Works in regard to contracts for letting—*ib.* 790-795. Responsibility for letting rests with Commanding Royal Engineers—*ib.* 790. The transfer of the charge of lands to the Office of Woods would cause additional expenditure—*ib.* 802.

No ill effects result from the Commanding Royal Engineers being frequently changed—*Simmons*, 857, 858. Greater power should be given to Commanding Royal Engineers as local agent of War Department—*ib.* 855, 859, 860. Commanding Royal Engineers should have power to consult a local agent—*ib.* 862.

LAWSON, GEORGE, Esq. (*Analysis of his Evidence.*) *Appendix No. II, pp.* 14–16.

Is a clerk in the Audit Branch of the War Office, and Private Secretary to the Controller-in-Chief. Theory of the present constitution of the War Office. The Accountant-General exercises a general financial check over the whole of the votes in the Army Estimates, but is himself an administrative officer of the vote for the Pay of the Army. Functions of the Chief Auditor explained. The Clerical Establishment of the Audit Branch is distinct from that of the Administrative Departments of the War Office. Nature of the Parliamentary Appropriation Audit. Various Treasury minutes quoted to show the reason for allowing the spending departments to examine their own accounts. The Treasury insists upon an independent appropriation audit. The present system at the War Office has neither the theoretical advantages of an independent audit, nor the practical advantages of a departmental audit—*p.* 14. The delays that arise owing to every petty expenditure having to be specially sanctioned (or pre-audited) by the Heads of Departments, are really attributable to this system of semi-independent audit. The witness then enumerated the advantages of having the accounts examined from a professional point of view by the branch which authorizes the expenditure, and explained that it would be necessary to abolish the present Audit Branch, and define the functions of the Accountant-General. The administration of Vote I. (Army Pay) should be placed under an independent authority. Witness next detailed the mode in which the accounts would be examined, and showed the portions of the work to be performed by the Account and Administrative Branches respectively. Cases of travelling expenses quoted, as showing the evils of the present system. Reductions in establishment which would result from the proposed system. The objection that the Secretary of State would have no guarantee that Heads of Departmentments did not exceed their powers, could be met by directing that all papers be examined from that point of view in the Central Registry before being put away. The examination of the accounts in the Administrative Branches should be performed by clerks belonging to those branches, and not by clerks from the Accountant-General's establishment attached to the Administrative Branches. The proposed system would, in witness's opinion, readily fit in with an independent Audit office —*p.* 15.

LEFROY, Major-General J. H., R.A., Director-General of Ordnance. (*Analysis of his Evidence.*)

(*First Examination.*) *Appendix No. I, pp.* 1 *and* 2.

Ordnance Stores should be in charge of Commissaries of Ordnance under the command of the Artillery; they should have separate store accommodation and separate transport. Danger of conflict of opinion between Officer Commanding the Artillery and the Controller in the Field. The former Officer should have absolute control over the transport of Ordnance Stores in the Field. Ordnance Stores might be under charge of Commissaries of Control Department if those Officers were placed under the Commanding Officers of Artillery. Mere inspection of such stores by Artillery not sufficient. Would not object to stores common to

LEFROY, Major-General J. H.—*cont.*

Artillery and other arms of the Service being kept by Control Department. Is in favour of "Boards of Respective Officers" in time of peace. Control of Manufacturing Department should not be taken away from Director-General of Ordnance. Questions relating to experiments and patterns should not be referred to Controller-in-Chief; any financial information required either from Supply or Manufacturing Departments at Woolwich, should be obtained by Director-General of Ordnance, and submitted by him to Secretary of State—*p.* 1. This would not apply to great questions. Duties of Deputy Adjutant-General Royal Artillery, in reference to armaments, should be transferred to Director-General of Ordnance. Such questions are now decided by Field-Marshal Commanding-in-Chief, on the advice of Deputy Adjutant-General, Royal Artillery. Director-General of Ordnance examines Artillery demands, but such examination is simply formal. When proportions are fixed, demands mightgo direct to Control Department, but should not be questioned by Controller-in-Chief if within the fixed proportion—*p.* 2.

(*Second Examination.*) *Appendix No. III, pp.* 81–84.

Unsatisfactory position of the Director-General of Ordnance under the Control system as at present administered—1135. Proposes as a remedy that Director-General shall be made solely responsible for everything connected with manufacture and supply of matériel of war—1136. Scheme for re-arrangement of Control duties, supposing it to be decided that the provision of munitions of war shall be assigned to Control Department—1137–1145. Duties of Deputy Adjutant-General Royal Artillery should be confined to personnel; the Ordnance Branch should deal with all questions of matériel—1138–1140, 1146–1148. The Head of the Ordnance Branch should be in direct communication with the Parliamentary Under Secretary as well as with the Controller-in-Chief—1141, 1143, 1144. Unless the Controller-in-Chief were in Parliament—1142. The Head of the Ordnance Branch should communicate with Director of Works, and have access to Commander-in-Chief—1145, 1149–1151. Thinks that new Council of Ordnance has worked well, but that professional committees should be appointed to settle matters of fact —1152, 1156–1158. Nature of inquiries which might be settled by such Committees—1153. The Committees might be Sub-committees of the Council, with officers associated for particular purposes—1154, 1155. Director of Ordnance should have power to incur expense for inventions and experiments—1159. If the Head of the Ordnance were an officer of the Control Department he would have the necessary control over the experimental vote—1160–1163. Thinks that the number of Committees on experimental enquiries is too large, and there should be a permanent nucleus for them in the shape of a Staff of the Director of Ordnance—1159–1164. If the Ordnance were under the Controller-in-Chief these officers would be available for duty under the Controller at Woolwich for checking demands, &c.—1166.

LEVEES.

Commander-in-Chief's and Military Secretary's, clerical work in connection with—*Forster*, 13, 14, 84–89.

LODGING ALLOWANCE.

Claims should be passed by Controllers on certificate of Commanding Royal Engineer—*Murray*, 904. Before the introduction of the Control system the Engineer Department had nothing to do with lodging allowance —*ib.* 907. One department in the War Office should be responsible for issuing lodging money, and for erecting, hiring, or altering buildings—*ib.* 911, 912.

M.

MACLEAN, JOHN, Esq. (*Analysis of his Evidence.*) *Appendix No. III, pp.* 86–88.

Is a First-Class Clerk in the War Office, and employed in assisting the Chief Auditor—1217, 1218. Thinks that the present division of the Finance Branch increases work—1220. Illustrations of the effect of separating correspondence from examination of accounts—1221–1228. Thinks that many simple claims, now sanctioned by Accountant-General, might be paid locally—1229. Mode of dealing with Travelling Claims at home. These claims must come to War Office for pre-audit. They should all be submitted to one person—1229–1233, 1242–1244. Claims similar in character should not go

MACLEAN, JOHN, Esq.—*cont.*

to different rooms for examination—1234, 1237. Claims under £10 might be paid locally. Large amounts should be sanctioned by War Office—1235. Mode of examining bills for supplies. Examination by Control Department of War Office unnecessary—1238–1241. At present accounts from Control Department are rendered unclassified. Thinks the classification can be more economically done by the Accountant than at the War Office—1245–1249.

MANUFACTURING DEPARTMENTS.

Heads of Departments should be subordinate to Controller-in-Chief as regards finance and administration, but should be individually responsible for details of manufacture—*Duke of Cambridge, p.* 8.

Control of these Departments should not be taken away from Director-General of Ordnance—*Lefroy, p.* 1, *Trevelyan, p.* 9.

The office of Director-General of Artillery should be revived, and the departments be put under him—*Adye, Memo., p.* 75.

No necessity for board of Heads of Departments for management of local business—*Storks, p.* 16.

Witness is opposed to appointment of local board, but has no objection to the Department being under Controller-in-Chief—*Dalhousie, p.* 10.

Heads of Manufacturing Departments should hold their appointments for five or seven years—*Duke of Cambridge, p.* 8.

Appointments should be for five years, with power to Secretary of State to re-appoint—*Dalhousie, p.* 10.

If appointments are held as Staff appointments, there should be no power of re-appointment—*Storks, p.* 11.

Heads of Departments should form a board for consideration of scientific questions, under presidency of Director-General of Ordnance—*Gordon, p.* 2; *Duke of Cambridge, p.* 7.

Heads of Departments should not be allowed to compete with the public as inventors—*Duke of Cambridge, p.* 8.

Responsibility as regards manufacture should rest with Heads of Manufacturing Departments—*Report*, viii. No advantage to be gained by having a local head. The departments should be under Chief of Control Department—*ib.* viii. Authority of Director-General of Ordnance, as local head of Manufacturing Departments not defined—*ib.* viii. Review of accounts of Manufacturing Departments by Financial Secretary—*ib.* xxi.

MEDICAL OFFICERS.

Business of Military Secretary's Office in connection with appointment, promotion, and change of station—*Forster*, 39, 40. Suggested simplification of business relating to promotion and appointment—*Borrow*, 547, 548.

Director-General of Army Medical Department to be attached to Military Department—*Report*, xvi.

MESS AND BAND FUNDS.

Respective duties of Adjutant-General and Military Secretary—*Forster*, 35–38, 80; *Paulet*, 149–152.

MILITARY DEPARTMENT.

1. *Existing Organization.*
2. *Communication between Horse Guards and War Office.*
3. *Communication between Departments at Horse Guards.*
4. *Reorganization and Amalgamation with War Office.*
5. *Registry of Correspondence.*

---

1. *Existing Organization.*

Distribution of business has been the same for many years—*Grant*, 638.

No changes have yet been made at Horse Guards to bring Head-Quarter Departments into accord with Control system—*Power*, 471.

Present organization works well—*Forster*, 113.

Facility with which Horse Guards as at present constituted has been conducted even in times of emergency—*Duke of Cambridge*, 1380.

Relations between Military Secretary, Adjutant-General, and Quartermaster-General explained—*Forster*, 105–108.

MILITARY DEPARTMENT—*cont.*

1. *Existing Organization*—cont.

Relative positions and duties of Adjutant-General and Military Secretary—*Paulet*, 187–202.

No orders are issued for Horse Guards except under the authority of Commander-in-Chief—*Duke of Cambridge*, 1311.

Difficulties in defining respective duties of Quartermaster-General and Adjutant-General occur occasionally—*Grant*, 631.

Reasons why questions from General Officers Commanding abroad come direct to Secretary of State, whilst those from districts at home pass through Horse Guards—*Duke of Cambridge*, 1302.

Confusion of authority and unnecessary work at Horse Guards—*Report*, xii. Chief defects in present mode of transacting business—*ib.* xii. Distribution of business between Adjutant-General, Quartermaster-General, and Military Secretary not clearly defined—*ib.* xii.

2. *Communication between Horse Guards and War Office.*

Correspondence between Horse Guards and War Office very large. It would not cease if all departments were amalgamated—*Forster*, 114–117; *Yorke*, 1094–1096.

It might be carried on by means of minutes—*Duke of Cambridge*, 1279.

Unless in exceptional correspondence there will in future be no correspondence between War Office and Horse Guards in reference to supplies—*Power*, 461.

Results of incorporating War Office and Horse Guards correspondence—*Thompson*, 1257, 1258, 1264, 1265.

Questions involving new principles are sent by Quartermaster-General to the War Office through Military Secretary. Quartermaster-General sends other questions direct to War Office—*Grant*, 566. Quartermaster-General corresponds direct with War Office on Barrack questions—*ib.* 577–579. There is no advantage in the Quartermaster-General's letters passing through Military Secretary—*ib.* 568.

Adjutant-General and Quartermaster-General correspond direct with War Office on matters of routine, but Commander-in-Chief himself conducts all other correspondence by means of Military Secretary—*Duke of Cambridge*, 1313.

Correspondence of Adjutant-General's Office with War Office and other Departments—*Paulet*, 193–197.

Military Secretary writes letters to War Office in reference to requisitions from Royal Engineer Establishment—*Forster*, 54, 55.

Communications to War Office from Recruiting Branch of Adjutant-General's Office on minor questions are made by minute papers—*Edwards*, 440. Proposal for reducing correspondence between Recruiting Branch of Adjutant-General's Office and War Office by giving increased powers to Inspector-General of Recruiting—*ib.* 439–443.

Communication of Deputy Adjutant-General Royal Engineers with War Office—*Keane*, 353, 357, 407–414. It might be carried on entirely by minute papers—*ib.* 401–403.

Communication of Deputy Adjutant-General Royal Artillery with War Office—*Gambier*, 220–229, 262.

Correspondence from Deputy Adjutant-General Royal Artillery and Royal Engineers to War Office passes through Military Secretary's Office if it relates to finance; through Adjutant-General's Office if it relates to discipline or stores—*Forster*, 101–104.

3. *Communication between Departments at Horse Guards.*

Amount of inter-departmental correspondence—*Thompson*, 1255, 1256.

Military Secretary and Adjutant-General communicate by memorandum, not by letter—*Forster*, 67–76.

Quartermaster-General corresponds occasionally by letter with Adjutant-General, Deputy Adjutant-General Royal Artillery, and Deputy Adjutant-General Royal Engineers—*Grant*, 605–607.

Deputy Adjutant-General Royal Engineer's mode of communicating with other departments at Horse Guards—*Keane*, 395–414.

All orders to Deputy Adjutant-General Royal Artillery are given by Adjutant-General, Military Secretary or Quartermaster-General—*Gambier*, 224. Personal communication of Deputy Adjutant-General Royal Artillery with Commander-in-Chief—*ib.* 240-242, 256, 257.

When witness was at Horse Guards communications between Deputy Adjutant-General Royal Artillery and

MILITARY DEPARTMENT—*cont.*

3. *Correspondence between Departments at Horse Guards*—cont.

Deputy Adjutant-General Royal Engineers, and Commander-in-Chief went through Military Secretary—*Yorke*, 1110-1112.

Mode of transacting business between Adjutant-General and Deputy Adjutants-General Royal Artillery and Royal Engineers—*Paulet*, 178-180; *Keane*, 405, 406.

Deputy Adjutant-General Royal Engineers communicates with General Officers Commanding through Adjutant-General—*Keane*, 397. Correspondence of Deputy Adjutant-General Royal Engineers with Military Secretary on financial subjects—*ib.* 415-420.

4. *Reorganization and Amalgamation with War Office.*

It would facilitate business if War Office and Horse Guards were under one roof—*Grant*, 616-618; *Duke of Cambridge*, 1276.

There would not be a great reduction of work—*Yorke*, 1133.

It would lead to economy—*Paulet*, 208-212. If Horse Guards and War Office are under one roof, the two offices (Military and Civil) should be kept distinct—*ib.* 208; *Duke of Cambridge*, 1276.

One Officer could not perform combined duties of Military Secretary, Adjutant-General, and Quartermaster-General—*Forster*, 112.

Scheme handed in by the Duke of Cambridge for future distribution of business at Horse Guards—*Page* 95.

Appointment of Chief of the Staff at the Horse Guards superfluous—*Duke of Cambridge*, 1380.

The amalgamated office should be divided into three branches: Movement, Discipline, and Recruiting. The Officers in those branches should be interchangeable—*Grant*, 627-629. If the departments were amalgamated the Chief Officer would require a special assistant acquainted with the business of the whole office—*ib.* 620-625.

Horse Guards and War Office should be under one roof—*Report*, x. and xviii. Offices of Adjutant-General and Quartermaster-General should be combined—*ib.* xvi. Military Department to be under Officer Commanding-in-Chief, and to include all business belonging to organization, discipline, and distribution of the Forces—*ib.* xi. Proposed distribution of business in Military Departments—*ib.* xiii. Topographical Department to be placed under Military Department—*ib.* xvi. Ditto Director-General of Military Education—*ib.* xvi. Ditto Director-General Army Medical Department—*ib.* xvi. Ditto Chaplain-General—*ib.* xvi. Reductions to be effected at Horse Guards—*ib.* xxiii.

5. *Registry of Correspondence.*

Military Secretary's General Registry of Correspondence—*Forster*, 24–27.

System of registering letters used in Quartermaster-General's Office—*Grant*, 609–612. It would still have to be maintained if a central registry for Horse Guards were established—*ib.* 613. Time occupied in registering letters of various departments at Horse Guards—*ib.* 613.

Establishment of a central registry for Horse Guards and War Office, and communication by means of minutes—*Thompson*, 1251; *Duke of Cambridge*, 1277-1283.

Commander-in-Chief's confidential business could not be registered—*Duke of Cambridge*, 1282.

Reduction in number of clerks which would result from having one registry—*Thompson*, 1263. There would be no difficulty in all branches referring to a common registry—*ib.* 1262. Secretary of State would have more general knowledge of important matters coming to Military Branch—*ib.* 1266.

No general registry of letters at Horse Guards—*Report* xii. Common registry to be established, which will form part of War Office Registry—*ib.* xii.

MILITARY SECRETARY.

1. *Position and General Duties.*
2. *Relation to Adjutant-General.*
3. *Relation to Quartermaster General.*
4. *Relation to Artillery and Engineers.*
5. *Appointments and Promotions.*
6. *Office details.*

---

1. *Position and General Duties.*

Military Secretary is a personal officer of Commander-in-Chief, but also a public officer in connection with

MILITARY SECRETARY—*cont.*

1. *Position and General Duties*—cont.

patronage and promotion—*Duke of Cambridge*, 1309. He merely prepares business for Commander-in-Chief—*ib.* 1318, 1319; *Yorke*, 1005.

Is not really Chief of the Staff, but performs certain duties which would devolve upon such an officer—*Forster*, 47-49, 109-112; *Yorke*, 1097. Position in relation to Adjutant-General and Quartermaster-General—*Forster*, 108.

He does not interfere with other departments at Horse Guards—*Duke of Cambridge*, 1311.

Cannot give orders to Adjutant-General—*Yorke*, 1098.

Is not superior to Quartermaster-General; he is the amanuensis of Commander-in-Chief—*Grant*, 567.

Is the channel of communication between Commander-in-Chief and the military departments—*Yorke*, 1108, 1109, 1113-1115.

Communications addressed by War Office to Military Secretary are really for Commander-in-Chief—*Yorke*, 1093. Duties not connected with promotions and appointments—*ib.* 1092. When witness was Military Secretary the business was as much as it was possible for him to perform—*ib.* 1122.

2. *Relation to Adjutant-General's Duties.*

Matters of discipline are dealt with partly by Military Secretary and partly by Adjutant-General—*Forster*, 58, 59. Action of Military Secretary in regard to Courts-Martial is purely ministerial—*Forster*, 11, 58-63; *Yorke*, 1103, 1104; *Paulet*, 135; *Duke of Cambridge*, 1311. Confidential reports on regiments—*Forster*, 82, 83. Mess and Band Funds—*Forster*, 35-38, 80; *Paulet*, 149-152. Claims and representations against officers—*Forster*, 17-20, 64; *Paulet*, 144-146; *Yorke*, 1106, 1107. Inspection of reserve forces—*Forster*, 21, 81; *Duke of Cambridge*, 1313.

No advantage in business connected with inspection of Reserve Forces going through Military Secretary—*Paulet*, 136.

3. *Relation to Quartermaster-General's Duties.*

Duties of Military Secretary in connection with passages—*Forster*, 15, 16, 65-67, 77; *Grant*, 603; *Paulet*, 119-122.

Witness thinks it necessary that certain questions of passages should go to Military Secretary—*Yorke*, 1115, 1116.

Military Secretary communicates foreign reliefs and inter-colonial movements to Quartermaster-General—*Grant*, 554. Also reduction and augmentation of garrison and distribution of troops abroad—*ib.* 555.

There is no advantage in Quartermaster-General's letters passing through Military Secretary—*Grant* 568.

4. *Relation to Artillery and Engineers.*

Detail of Artillery business passing through Military Secretary's office—*Gambier*, 218, 219, 221, 227-239, 328-334.

Relation of Deputy Adjutant-General Royal Engineers to Military Secretary—*Keane*, 353, 369-376, 390.

Correspondence of Deputy Adjutant-General Royal Artillery and Royal Engineers with War Office on financial subjects passes through Military Secretary's office—*Forster*, 101-104. Business connected with Artillery and Engineer drafts for India—*ib.* 56, 57.

Duties now performed by Deputy Adjutant-General Royal Artillery which properly belong to Military Secretary—*Adye*, 956, 969.

5. *Appointments and Promotions.*

Records kept with reference to honours and appointments—*Forster*, 6–8. Direct commissions and Sandhurst—*ib.*, 41-43. Reserve Fund Account—*ib.* 29-32. Promotion and exchanges—*ib.* 28. Appointments in Commissariat and Store Department—*ib.* 21, 22.

6. *Office Details.*

Statement of distribution of office business—*Appendix* No. IV., *pages* 101-106.

Position and duties of Assistant Military Secretary—*Forster*, 2, 3.

An Assistant Military Secretary, and probably additional clerks, would be necessary if Reserve Forces were transferred to Commander-in-Chief—*Yorke*, 1117-1119, 1123.

Duties of Confidential Department—*Forster*, 4-14. Amount of really confidential work—*ib.* 25. Duties of Promotional Branch—*ib.* 28-46. Duties of Ordnance Branch—*ib.* 47-54. Records kept with reference to

MILITARY SECRETARY—*cont.*

6. *Office Details*—cont.

honours and appointments—*ib.* 6-8. Business in connection with Parliamentary returns, &c.—*ib.* 46, 90-100. General registry of correspondence—*ib.* 24-27. Duties of General Correspondence Branch—*ib.* 15-27 Clerical work in connection with Commander-in-Chief's and Military Secretary's levees—*ib.* 13, 14, 84-89. Business in connection with claims to allowances for special or extra services—*ib.* 23.

Confusion which has arisen from applying the term "Military Secretary's Office" to what ought to be called "Commander-in-Chief's Office"——*Duke of Cambridge*, 1309; *Yorke*, 1005.

Military Secretary's public duties should be confined to promotions and appointments—*Report*, xiv, xv.

MILTON, JOHN, Esq., Assistant Accountant-General. (*Analysis of his Evidence.*) *Appendix No. II, pp.* 18 *and* 19.

Thought that the amalgamation of the Account and Audit Branches would be very objectionable, as it was essential that the account and audit duties should be entirely separate. Objections to, and advantages of the examination of accounts being performed by the spending departments. The present separation of the Audit and Account duties had worked well—*p.* 18. The examination of the accounts had never been in such a forward state. Objected to the employment of soldier clerks or writers in the Accountant-General's Branch. Doubted whether any reduction of establishment would be effected by reuniting the Account and Audit Branches. Did not think that the duties of Financial Control and examination of expenditure could safely be united in any officer under the rank of Assistant Under Secretary of State until the audit (properly so called) of Army Accounts could be made entirely independent of the War Office. Could suggest no improvement in the present mode of conducting the business of the Accountant-General's Branch—*p.* 19.

MILWARD, Colonel T. W., C.B., Deputy Director-General of Ordnance. (*Analysis of his Evidence.*) *Appendix No. I, p.* 4.

The division of stores for an army both in peace and war should be (1) Munitions of War; (2) all other Stores. In the field the supply of ammunition is of supreme importance: if all stores were under one Department, there would be danger of preference being given to less important supplies. In the War Office there should be two Departments, one for Ordnance Stores, and the other for all other Stores. Both these Departments should report to one Under Secretary of State. The home reserves of Ordnance Stores and other stores should be distinct. In the field, stores of every kind might be consigned to the Controller, and divided at the base of operations. The Controller should arrange for the whole transport of the army, and be indented upon by the Artillery for its wants: any disputes to be settled by the Chief of the Staff. Ordnance Commissaries need not have charge of those stores which the Artillery use in common with other branches of the Service. In peace, Commissaries of Ordnance might be under Controllers, and at small stations one officer might do both the Ordnance and the General Supply duties. Witness would revive the "Board of Respective Officers" for times of peace, and would have all demands for Ordnance Stores to pass that Board. He would have the Ordnance Stores inspected by Inspectors of Warlike Stores, who should be directly under the Commanding Officers of Artillery. The system of Boards of Respective Officers should be adopted at the War Office, and through every stage of Supply up to the Grand Depôt in the field. Commissaries of Ordnance should be eligible for promotion to Controllers. Artillery Officers should only be Acting Controllers of Ordnance Stores. If it were decided to separate consumable supplies from other stores, General Stores should be kept under Ordnance Commissaries. In Abyssinia stores were consigned to two Departments with advantage—*p.* 4.

MOVEMENT OF TROOPS. *See* QUARTERMASTER-GENERAL.

MUNITIONS OF WAR. *See* STORES.

MURRAY, Colonel. (*Analysis of his Evidence.*) *Appendix III, pp.* 66–69.

Has been Deputy Director of Works for Barracks two years—881, 882. Thinks that the superintendence of works and the distribution of officers and men of Royal Engineers should be under one officer—883–885. The Secretary of State's control over expenditure upon Barrack works would not be affected by such a change—886–889. Objections to system of appropriation of Barracks as introduced under the Control scheme—891–898, 909, 910. System proposed by witness—902, 903. Thinks that claims for lodging allowance should be passed by Controller on certificate of Commanding Royal Engineer—904. Connection between Engineer Department and Barrack Department before Control system was established—905, 906. Changes with regard to duties of Royal Engineers introduced by Control system—908. As regards War Office, thinks it essential that one Department should be responsible for alterations of existing buildings, erecting or hiring new buildings, and issuing lodging-money—911, 912. Difficulty of controlling expenditure for alterations when the appropriations were under the Superintendent of Barrack Department—912–917. Fuel and light questions not much affected by re-appropriations—918. The Barrack Department was formerly under the Works Department—921. The Board of Ordnance kept Barrack questions in its own hands; the Inspector-General of Fortifications had no responsibility except to execute the works on the orders of the Board—922–925. Analogous system under Secretary of State for War, if the office of Inspector-General of Fortifications were revived—926–930. Thinks that accounts for works should be professionally examined and posted under supervision of Director of Works—931–939, 945. They would be subsequently audited by Audit Branch, and could be made the groundwork of the Parliamentary Account instead of a duplicate being kept in the book-keeping room of the Accountant-General's Branch—946, 947. Difficulties in the correct appropriation, by the Book-keeping Room, of expenditure on works to the different items or votes—940, 941. Instances of great discrepancies between Engineer accounts of expenditure and the accounts kept by the Accountant-General and laid before Parliament—942. The totals of the accounts agree, but they are differently classified—948, 949.

MUTINY ACT.

Questions connected with, are dealt with by Adjutant-General—*Foster*, 79.

N.

NON-EFFECTIVE CHARGES.

Examination in Adjutant-General's Office of claims of men to pensions—*Paulet*, 163-170.

The granting of pensions should be dealt with in same office as recruiting discharge, &c.—*Edwards*, 436-438.

Accountant-General should sanction non-effective charges—*Brown, p.* 12.

Audit check over non-effective charges insufficient—*Whiffin, p.* 13.

O.

ORDNANCE, CONTROLLER OF.

Appointment proposed by Sir W. Power—*Power,—p.* 304.

ORDNANCE, COUNCIL OF.

Has worked well; but professional committees or sub-committees should settle matters of fact for the Council—*Lefroy*, 1152-1158.

Constitution and functions—*Report* xviii.

ORDNANCE DEPARTMENT (PROPOSED). *See* STORES.

ORDNANCE, DIRECTOR-GENERAL OF.

Confusion now existing between duties of Director-General of Ordnance and Deputy Adjutant-General Royal Artillery; work done twice over—*Adye*, 956, 991. Duties which should be assigned to the former. *ib.* 956-994. He is responsible for matériel of artillery, and Deputy Adjutant-General Royal Artillery, for personnel—*ib.* 953, 994. The appointment of Director-General of Ordnance, and that of the officer at the head of munitions of war in the Control Department should be fused—*ib.* 971, 989.

Should also be Inspector-General of Artillery, and should not be a Secretary of State's officer—*Balfour p.* 5.

ORDNANCE, DIRECTOR-GENERAL OF—*cont.*

Ought to be a Commander-in-Chief's officer—*Duke of Cambridge, p* 8. Duties of Director-General of Ordnance and Inspector-General of Artillery should not be combined—*ib. p.* 8. The opinion of Deputy Adjutant-General Royal Artillery, as well as that of Director-General of Ordnance should be given on questions of matériel, but they might be referred by Director-General direct to Commander-in-Chief, *ib.* 1350-1355. Director-General should be scientific head of a board composed of the heads of manufacturing departments, *ib. p.* 7.

Should be, with Director of Works, adviser of Secretary of State in the matter of erecting and arming fortresses—*Dalhousie, p.* 10. Should also advise as to proportions in Artillery charge and in reserve—*ib. p.* 11.

Duties of Deputy Adjutant-General Royal Artillery and Director-General of Ordnance in regard to changes in matériel—*Gambier*, 293–311. Communications of Deputy Adjutant-General Royal Artillery with Director-General of Ordnance—*ib.* 269, 345, 346.

Unsatisfactory position of Director-General of Ordnance under the Control system — *Lefroy*, 1135. He examines Artillery demands, but the examination is simply formal—*ib. p.* 2. Should be made solely responsible for manufacture and supply of matériel of war—*ib.* 1136. Should be financial as well as professional adviser of Secretary of State on Ordnance questions—*ib. p.* 2. Should have power to incur expense for experiments and inventions—1159. If the Head of the Ordnance were an officer of the Control Department he would have the necessary control of the Experimental Vote—*ib.* 1160–1163. Should communicate with Director of Works, and have access to Commander-in-Chief *ib.* 1145, 1149-1151. Should be in direct communication with Parliamentary Under Secretary as well as with Controller-in-Chief—*ib.* 1141, 1143, 1144; unless Controller-in-Chief were in Parliament—*ib.* 1142. Control of Manufacturing Department should not be taken away from Director-General of Ordnance—*ib. p.* 1. He should have a staff to form a permanent nucleus for committees on experimental questions—*ib.* 1159, 1164.

Should be scientific adviser of Secretary of State, and should have nothing to do with inspection of warlike stores—*Storks, p.* 16. Questions relating to armaments and proportions of warlike stores should be dealt with by him, not by Deputy Adjutant-General Royal Artillery —*ib. p.* 16.

Should be medium of communication with Manufacturing Department, and have control of reserves of warlike stores—*Trevelyan, p.* 9.

Should be a purely consultative officer—*Report*, xix.

ORDNANCE, MASTER-GENERAL AND BOARD OF.

Duties formerly assigned to them—*Report*, xv.—Master General described by Duke of Wellington as Military Adviser of the Administration—*ib.* xvii.

ORDNANCE SELECT COMMITTEE.—*See* EXPERIMENTS.

P.

PASSAGES. *See* TRANSPORT.

PAYMENTS, LOCAL.

The system of local payment contemplated by Control system render necessary an examination of Departmental accounts in the Administrative Branches—*Lawson, p.* 15.

Often are an inconvenience to contractors—*Whiffin, p.* 16.

PAULET, Lieutenant-General Lord WILLIAM, K.C.B., Adjutant-General. (*Analysis of his Evidence*). *Appendix No. III, pp.* 28–32.

Has been Adjutant-General more than four years—118. Respective duties of Adjutant-General and Military Secretary in reference to passages — 119–122. Thinks that this duty might be done entirely in his own office—121. And that this business might be much simplified—203–206. Keeps records of officers' services, and furnishes Military Secretary with statements—123, 124. Preparation of Parliamentary Returns —125–131. A copy of the Army List for office use is corrected after each Gazette—132–134. Business connected with General Courts-Martial is under Military Secretary. Witness had remonstrated against this arrangement—135. Sees no advantage in the business o the inspection of Reserve Forces going through

PAULET, Lieut.-General Lord WILLIAM, K.C.B.—*cont.*

Military Secretary's office—136. Rewards for good shooting, swordsmanship, and lance practice might be settled regimentally, if War Office does not object—137–141. Adjutant-General's correspondence in regard to "Contagious Diseases Prevention Act" is small—142, 143. All claims and complaints against officers and men should be addressed to the Adjutant-General, as they affect discipline—144–146. Confidential Reports of regiments are kept by Adjutant-General, who gives the Military Secretary any information contained in them that he may require—147, 148. Action of Adjutant-General and Military Secretary respectively on questions connected with Mess and Band Funds—149–152. Requisitions for arms, equipment, and clothing pass through Adjutant-General's office, because he is responsible that the regiments are properly equipped and clothed. Thinks, however, that they might be dealt with locally by the Control Department, provided the Adjutant-General is kept duly informed of the state of the equipment through the medium of the monthly returns—153–160. The Recruiting business is under the Adjutant-General —161. The Discharge Division should not be under the same Department as the Recruiting—162. Examination of claims of men entitled to pension by Adjutant-General and Commissioners of Chelsea Hospital respectively—163–170. The Deputy Adjutants-General of Artillery and Engineers are under the Adjutant-General, but have their own separate offices—171. Thinks it a disadvantage to keep the discipline of the Artillery and Engineers separate from that of the rest of the Army—173. The Artillery and Engineer business connected with arms, ammunition, clothing, &c., might also be amalgamated with the general business of the Adjutant-General—176, 177. Mode of transacting business between Adjutant-General and the Deputy Adjutants-General of Artillery and Engineers—178–180. Nature of Adjutant-General's work in reference to inventions and experiments—181–183. Adjutant-General is not consulted in regard to discipline of Volunteers—184. Questions relating to discipline of Militia and Yeomanry —185, 186. Relative positions and duties of Adjutant-General and Military Secretary—187–202. Correspondence of Adjutant-General's office with War Office and other Public Departments—193–197. Thinks that economy would result from bringing War Office and Horse Guards under one roof, but that the offices (Military and Civil) should be kept distinct—208–212.

PENSIONS. *See* NON-EFFECTIVE CHARGES.

POWER, Sir W. TYRONE, K.C.B., Commissary-General-in-Chief. (*Analysis of his Evidence.*)

(*First Examination.*) *Appendix No. I, pp.* 3 *and* 4.

Ordnance Commissaries should be under a Controller of Ordnance at the War Office, and not under Officers of Artillery. Ordnance Stores should be divided from all other stores. Administration of consumable supplies should not be separated from that of General Stores. Admits that it might be desirable to have unity of control at the War Office, and that both Commissaries of Ordnance and Commissaries of Supply should be under Controller-in-Chief. Commissaries of Supply and Commissaries of Ordnance should not be interchangeable, but the Control Officers might be selected from both. In the Reserve Depôts at home Ordnance Stores should be separated from others. Both Ordnance and General Stores should be consigned to the Controller, but the Controller should have no control over Ordnance Commissaries. Local questions connected with Ordnance should be settled by a Board. Inspectors of Warlike Stores should be abolished. Ordnance Commissaries should have technical knowledge, and should be agents of the Secretary of State—3. Thought it absolutely necessary that all transport should be under the Controller; there would be no difficulty in arranging for transport of Ordnance Stores. The Artillery has its own transport for the 1st and 2nd Reserves. The experimental business of the Director-General of Ordnance should be transferred to the Horse Guards. Propositions for experiments should be reported on financially by the Controller of Ordnance. Reasons for adopting the name "Control" Department—4.

(*Second Examination.*) *Appendix No. III, pp.* 41–44.

Lord Strathnairn's Committee proposed that, subject to strategical considerations, the Controller should be solely responsible for transport and camp equipage—457. Definition of what was intended by strategical considerations—458. The arrangements under which requisitions

Power, Sir William—*cont.*

for transport and supplies go direct from the troops to the Control Department were brought into operation by clauses 58 and 111, Army Circulars, 1869 — 459. The functions of the Adjutant-General's and Quartermaster-General's Departments, as regards requisitions for stores, have ceased, and unless in exceptional cases there will be no correspondence between the Horse Guards and the War Office on the subject of supplies—460, 461. The system now in force, except in regard to camp equipment, is entirely in accordance with the recommendations of Lord Strathnairn's Committee—462. The reports of issues to the Royal Engineers, directed by a circular memorandum from the office of the Deputy Adjutant-General Royal Engineers, to be made to the Horse Guards, are unnecessary — 463. The principle of the new system is to confine the Military Staff to military questions, and to place the entire responsibility for supply and transport in the hands of the Control Department. The Controller is the direct agent both of the Secretary of State and the General Officer Commanding—464, 465. Thinks that the system would work perfectly well in active service—466. Effect of the system upon the functions of the Quartermaster-General as regards barrack questions. No object was gained by sending requisitions for stores and transport through the Quartermaster-General or Adjutant-General—468. Those officers had no authority to increase or diminish the issues, but practically they used the authority of the General, and the Store Officer was responsible for reporting the matter to the War Office. Sometimes there was a report to the Horse Guards also—469, 470. Changes already effected in the War Office for the purpose of bringing the Head-Quarter Departments into accord with the Control system. No change has as yet been made at the Horse Guards. Would suggest that the separate Military Departments be abolished, and all put under one Staff Officer—471. The appointment of a Chief of the Staff would facilitate the Controller's business. The old organization of the Staff does not readily coalesce with the Control arrangements. In Ireland, however, there have been no difficulties. Change which has taken place in regard to transport; the duties of Quartermaster-General in this respect will now solely relate to strategical considerations—473. *Modifications which the Control system will necessitate in the details of work in the offices of the Quartermaster-General and Adjutant-General at the Horse Guards;* Sea Transport still remains in the hands of the Quartermaster-General, and the Passage Branch of the War Office—474. If the Foreign system were carried out at home, the Passage Branch could be part of the Control Department—475. The question of Sea Transport should be considered at the earliest opportunity—477. Correspondence relating to stores (except increased allowance of camp equipment), the issue of allowances to officers' and soldiers' families, &c., will all be dealt with by Control Department—478, 479. In regard to barrack questions, the function of the Horse Guards would be confined to advising as to the increase or alteration of buildings with reference to the wants and discipline of the troops—480. Mode in which this business is transacted abroad—481. The Foreign system might be carried out at home—482. The suggestions from the Quartermaster-General's Office with regard to barrack questions would be of a general nature; the details would be carried out by the Control and Royal Engineer Departments in direct communication with the War Office—483. The Barrack Branch of the Quartermaster-General's Office would cease to exist; the quartering would still remain—484. The Adjutant-General's Department would only be consulted with reference to general questions affecting supplies. All the detailed references now made would cease—485. This would apply equally to the questions of stores now dealt with by the Deputy Adjutants-General of Royal Artillery and Royal Engineers—486–489. There would be more difficulty in supplying the Royal Engineers on local requisitions than there is in the case of the Coast Brigade of Artillery—489. Irregularities can be more easily explained and remedied locally than by referring to Head-Quarters—490, 491. The introduction of the Control system relieves the office of the Quartermaster-General of a very large portion of its duties—492. In the Adjutant-General's office the work connected with clothing, arms, ammunition, and accoutrements, is rendered unnecessary—493. The responsibility for supplies will thus rest with Controller-in-Chief, and the Military Departments will be free to deal with purely military questions—494.

Prize Money.

Business of Deputy Adjutant-General Royal Artillery in connection with—*Gambier*, 260, 261.

Prizes for Good Shooting, Swordsmanship, and Lance Practice.

Might be settled regimentally—*Paulet*, 137-141.

Promotion Branch of War Office. *See* War Office.

Promotions.

Military Secretary's business in connection with—*Forster*, 29–32; *Paulet*, 123, 124.

Statement of Officers' services for promotion are furnished by Adjutant-General to Military Secretary—*Paulet*, 123, 124; *Forster*, 78.

Records of Artillery Officers' services are kept by Deputy-Adjuant General Royal Artillery — *Gambier*, 329–332.

An account of the Reserve Fund is kept in Promotion Branch of War Office; there is no object in keeping a duplicate at Horse Guards—*Borrow*, 436, 437. Orders to Agent to make payments from fund should be sent by War Office, not by Horse Guards—*ib.* 538. Suggested simplification of business relating to Promotion and Appointment of Medical Officers.—*ib.* 547, 548.

Prussia.

Munitions of War are consigned to the Artillery, which has its own transport and depôts—*Hozier, p.* 6.

Separation of charge of munitions of war from general stores does not work satisfactorily—*Report, p.* vii.

Q.

Quartermaster-General.

1. *Barracks.*
2. *Movement of Troops and Passages.*
3. *Artillery and Engineer Business.*
4. *General and Miscellaneous.*

1. *Barracks.*

At home every barrack detail comes to Quartermaster-General's Office, and is decided upon by the Duke of Cambridge himself—*Grant*, 588–592.

Under Control system the Quartermaster-General will only deal with general questions having relation to wants and discipline of the troops—*Power*, 480, 483.

Corresponds direct with War Office on barrack questions—*Grant*, 577–579.

If the Control system, as regards barracks, were fully carried out, Barrack Branch of Quartermaster-General's Office would cease to exist. The quartering of troops would still be with Quartermaster-General—*Power*, 484. Effects of Control system upon functions of Quartermaster-General, in reference to barrack questions—*ib.* 468.

2. *Movement of Troops, and Passages for Officers.*

All business relating to movement of troops goes through Quartermaster-General's Department—*Duke of Cambridge*, 1339; *Grant*, 552. This applies, with few exceptions, to individual officers also—*ib.* 553. Movement of Artillery is carried out by Quartermaster-General, assisted by Deputy Adjutant-General Royal Artillery—*Duke of Cambridge*—1349. Check exercised by War Office over movement of troops—*ib.* 1341, 1342.

Quartermaster-General has nothing to do with estimates of expenditure for movement of troops—*Grant*, 601, 608. Estimate of expenditure is prepared by Quartermaster-General — *Duke of Cambridge*, 1340. Notices of proposed home movements, and statements of troops to move by sea, are prepared for War Office —*Grant*, 599, 600. He communicates personally with the Commander-in-Chief in reference to reliefs —*ib.* 560. Mode of obtaining sanction for reliefs being carried out—*ib.* 588–564. Questions relating to foreign reliefs and intercolonial movements pass through Military Secretary—*ib.* 554, 555. Quartermaster-General might send recommendation of Commander-in-Chief direct to War Office, and afterwards communicate Secretary of State's decision to Military Secretary—*ib.* 565. Questions relating to reduction and augmentation of garrisons and distribution of troops abroad pass through Military Secretary—*ib.* 555.

Duties of Quartermaster-General in connexion with passages—*Forster*, 15, 16, 65–67, 77; *Paulet*, 119–122.

QUARTERMASTER-GENERAL—*cont.*

2. *Movement of Troops and Passages for Officers*—cont.

The present system of dealing with passages of officers cannot be simplified—*Grant*, 602, 604; *Duke of Cambridge*, 1323.

Functions of Quartermaster-General in regard to transport under Control system relate to strategical considerations only—*Power*, 457–459, 473.

He must continue to be consulted in regard to passages—*Duke of Cambridge*, 1334.

Should conduct correspondence on passages—*Whiffin*, *p.* 13.

Sea transport still remains in hands of Quartermaster-General and Passage Branch of War Office—*Power*, 474.

Sea transport should be left with Quartermaster-General and Admiralty, and should not be handed over to Control Department—*Duke of Cambridge*, 1299–1301, 1338.

Since 1856, routes have been issued in blank to Quartermaster-General, who keeps no record of expenditure—*Report*, *p.* xiv. Delay and inconvenience caused by present system of divided responsibility at headquarters—*ib.* xiv. Business relating to transport should be under Control Department—*ib.* xiv. Opinion of Horse Guards only necessary on important questions—*ib.* xiv.

3. *Artillery and Engineer Business.*

Artillery business passing through Quartermaster-General's Office—*Gambier*, 221, 226.

Duties now performed by Deputy Adjutant-General Royal Artillery which should be performed by Quartermaster-General—*Adye*, 956, 964.

Relation of Deputy Adjutant-General Royal Engineers to Quartermaster-General—*Keane*, 369–373.

Future organization of the Department—*Duke of Cambridge*, 1330–1337.

The military functions of Quartermaster-General are untouched by Control system—*Storks*, 702.

Statement of distribution of business in Quartermaster-General's Office—*Appendix* No. IV., *p.* 107.

Questions involving new principles are sent to War Office through Military Secretary; other questions go direct—*Grant*, 566. Questions affecting finance pass through Military Secretary—*ib.* 557. There is no advantage in passing letters through Military Secretary—*ib.* 568. System of registering letters in Quartermaster-General's Office—*ib.* 609–613. Topographical Department should be under Quartermaster-General—*ib.* 634.

Employment of soldiers in trades—*Duke of Cambridge*, 1343.

Questions of selecting Indian Officers for instruction in signalling and telegraphy need not go through Military Secretary—*Grant*, 569. Reasons why those questions do not go to Adjutant-General—*ib.* 570–576. Action of Quartermaster-General's Department upon questions of rifle ranges, gymnasia, &c.; such questions from foreign stations come direct to War Office—*ib.* 585. Objections to the same course being followed at home—*ib.* 583, 584, 586, 587. Questions of ration allowance to soldiers' families come to War Office through Quartermaster-General—*ib.* 599.

The introduction of the Control system relieves Quartermaster-General's Office of a large portion of its duties—*Report*, *p.* xiii, *Duke of Cambridge*, 1329; *Grant*, 614–616; *Balfour*, 655; *Power*, 492.

The functions of Quartermaster-General's Department as regards requisitions for stores have ceased—*Power*, 460. Under the Control system, as now in force, issues of camp equipage in excess of authorised proportions are reported to Quarter-master-General—*ib.* 459, 462.

Quartermaster-General's Department should be combined with Adjutant-General's—*Reports*, *p.* xvi. Quartermaster-General's Department might be provisionally retained on a reduced scale, pending complete reorganization of Army administration, but should be subordinate to Adjutant-General's Department—*ib. p.* xxviii.

R.

RAMSAY, G. D., Esq. Director of Clothing. (*Analysis of his Evidence.*) *Appendix No. III, pp.* 53–55.

Has been Director of Clothing since 1863—663. Business which comes to the Clothing Department from the Adjutant-General's office—665. Duties of War Office and Horse Guards respectively in regard to patterns—

RAMSAY, G. D., Esq.—*cont.*

666–669. Complaints of delay in the issue of clothing, and applications for extra issues, should come direct to War Office—670. The Commander-in-Chief is kept informed of the state of the clothing of a regiment through the Monthly Return—671, 676, 677. Annual reports (in duplicate) of the wear of clothing are sent to the Adjutant-General. One copy comes to War Office, and is acted upon if there are complaints—672–675. Complaints from the Artillery and Engineers come through the Deputy Adjutants-General of those Corps. They write letters, and the Clothing Department writes to them—678. All demands come through those Officers, and are examined at the Horse Guards, as well as at the War Office—679–682. There is no reason why they should not come straight from the batteries or companies to the War Office—683. Further details of clothing business done twice over at the Horse Guards and War Office—684. Only Artillery and Engineer Clothing compensation claims come through Horse Guards—686. Regards Deputy Adjutant-General Royal Artillery and Deputy Adjutant-General Royal Engineers as in the position of Commanding Officers of Regiments—687. Brigades of Artillery might be treated as regiments, but it would be better that requisitions should come direct from Batteries—688–690. At present they come from Battery to Brigade, from Brigade to Deputy Adjutant-General, and from him to War Office—691. Functions of Assistant Adjutant-General as regards clothing—694. No advantage in the samples of clothing sent to regiments with their supplies, being sealed by Assistant Adjutant-General—695. To a certain extent the work of Director of Clothing and Assistant Adjutant-General are identical—696. Director of Clothing is the responsible officer—697.

RATIONS. *See* CONSUMABLE SUPPLIES.

RECORDS OF SERVICES. *See* PROMOTIONS.

RECRUITING.

Business is under Adjutant-General—*Paulet*, 161.

Discharge division should not be under the same department—*Paulet*, 162.

Business connected with recruiting of Royal Artillery—*Gambier*, 258, 259.

Pay and allowances of Inspector-General of Recruiting—*Edwards*, 449, 450, 452. System of recruiting returns should be revised, and the returns sent only to one branch of War Office—*ib.* 444, 448. Money saved by doing away with the "conducting" system—*ib.* 452.

REGULATIONS.

Unity of interpretation to be secured by arranging the examination of the accounts according to subjects—*Whiffin*, *p.* 17.

Good regulations would not much diminish correspondence—*Brown*, *p.* 12, *Whiffin*, *p.* 13.

England unprepared for war owing to absence of Equipment Regulations—*Hozier*. *p.* 6.

Confusion in Crimea would have been prevented if Regulations of 1833 for Ordnance Commissaries in the field had been observed—*Gordon*, *p.* 2.

Defects in regulations for stores for an army in the field—*Hozier*, *p.* 6.

Functions of Regulation Branch of War Office—*Galton*, *p.* 18.

Regulations of Pay Sub-department of Control Department have been approved by Treasury—*Report*, *p.* xix. Queen's Regulations should be revised in connection with Committee's views on the subject of over-centralization in matters of detail—*ib. p.* xiii. Regulations involving finance should be reported on by Accountant-General—*ib. p.* iv. Alterations in Regulations involving expenditure, should not be made until expenditure has been authorized by Parliament—*ib. p.* v. Regulations, warrants and circulars should receive concurrence of Financial Secretary—*ib. p.* xxi.

REPORTS OF THE COMMITTEE (*Abstract*).

First Report, pp. iii–v.

Financial Control.

General nature of the inquiry intrusted to the Committee. Organization of War Office dependent upon the nature of the financial control to be there exercised. Non-necessity for a merely critical control. Financial control should be united with administration. Secretary of State is primarily respon-

REPORTS OF THE COMMITTEE—*cont.*

First Report—cont.

sible for financial control; but this function should be actually exercised by a Financial Secretary. Accountant-General's Department would form his Staff. Audit and Account duties should be reunited. Two kinds of financial control—(1) Financial initiative and review—(2) Concurrent criticism and control—iii. Great economies are the product of policy determining the construction of the Estimates. Course to be adopted in framing the Estimates. Reductions in Estimates for 1869–70 due to policy. Departmental Estimates must be sent in in time for final financial review. Reductions in Estimates should be worked out in detail by Administrative Departments. Final compilation of Estimates would be done by Accountant-General. Concurrent financial control should continue to be exercised by his Department. Other duties of that Department. Secretary of State cannot alter Establishment or appropriation without Treasury concurrence. Certificate of Accountant-General to Appropriation Account—iv. Alterations in Royal Warrants, or Regulations involving increase of expenditure, should not, as a rule, be made until such expenditure has been authorized by Parliament. Letters to Treasury to be signed by Financial Secretary. Secretary of State should have additional assistance in Parliament—v.

Second Report, pp. vi–viii.

Principles of First Report have been accepted by Mr. Cardwell. Position of question of separating the charge of munitions of war from that of other stores, at the date of Mr. Cardwell's taking office. Evidence taken by the present Committee—vi. The separation does not work satisfactorily in Prussia. Advantages of unity of administration in regard to supply and transport in the field exceed any advantage to be gained by separating munitions of war. Scientific knowledge necessary for care of the latter can be provided by Control Department. Necessity for unity of administration in sea transport. Control Department should have provision, custody, and issue of munitions of war in garrisons and in the field up to the 3rd Reserve. These stores should be constantly inspected by Combatant Officers. Control Department should be divided into two sections, both in the War Office and in the Field, one section for providing consumable supplies and transport, and the other for issuing all other stores. The latter section should be under an Officer professionally acquainted with munitions of war—vii. Employment of Artillery Officers in this section. Objections of Heads of Manufacturing Departments to appointment of Director-General of Ordnance as Head of the Arsenal. Nature and extent of his authority not defined. Committee is of opinion that no advantage is to begained by having a local Head of the Arsenal. All Departments for manufacture and repair of stores should be under the Chief of the Control Department for administrative purposes. Responsibility as regards manufacture should rest with Heads of the Departments—viii.

Munitions of War.

Manufacturing Departments.

Third Report, pp. ix–xxiv.

Reference to 1st and 2nd Reports. Extension of inquiry to Horse Guards. Constitutional questions not touched. Recommendations limited to main principles of organization. Extent of Departments engaged in Army Administration. Comparison of Administrative Staff with that of other armies. Reasons for larger numbers in England—ix. Existing organization unsatisfactory. All Departments of Army Administration should be subordinate to Secretary of State. More responsibility should be placed upon Chiefs of Departments. Army Departments should be under one roof. Suggested distribution of the business of the Army into three Departments—1st, Military; 2nd, Control; 3rd, Financial. Secretary of State requires more assistance in Parliament—x. Chief of Control Department should be eligible to sit in House of Commons—xi.

Military Department to be under Officer Commanding-in-Chief, who should be Secretary of State's principal military adviser—xi. Confusion of authority, and unnecessary work at Horse Guards. *Chief defects at Horse Guards:* (1) No general registry of letters—xxii. (2) Unnecessary correspondence relating to supplies. (3) Too much detail business. (4) Distribution of business not clearly defined. Defects capable of easy remedy. A common Registry for Military Departments to be established. Requisitions for supplies will not pass through Horse Guards. Monthly returns afford necessary information for Horse Guards. Reduction of correspondence relating to supplies. Double position of Officer Commanding-in-Chief—xii. Evils of over-centralization (Opinion of Archduke Albrecht of Austria quoted). They should be remedied in next issue of Queen's Regulations. *Proposed distribution of business in Military Department:* Reserve Forces should be under Military Department and in Adjutant-General's Division. Decrease of business in Quartermaster-General's Department—xiii. Transport business should be under Control Department Opinion of Military Department on Supply and Finance only necessary on important questions. Military Secretary's duties. Business should be disposed of in Division to which it belongs; illustrative case of General Courts-Martial—xiv. Analogy between Military Secretary and Private Secretary to Secretary of State. The duties of the former should be confined to promotions and appointments. Difficulty in distributing duties formerly performed by Board of Ordnance. Command of Artillery and Engineers should be vested in Officer Commanding-in-Chief. Channel through which this command should be exercised. Principal Staff Officer of Royal Artillery and Inspector-General of Artillery. Distinction between personnel and matériel as regards Artillery. Difficulties connected with administration of Royal Engineers—xv. Office of Inspector-General of Fortifications should be revived. Position of Deputy Adjutant-General of Engineers. Financial control over expenditure on works not weakened. Topographical Department. Director-General of Military Education. Director-General of Army Medical Department. Chaplain-General. Offices of Adjutant-General and Quartermaster-General should be combined—xvi. Performance of the duties of Officer Commanding-in-Chief in his absence. Present and former functions of Commander-in-Chief compared. Result of this comparison. High Officers of State should not be burdened with details. Redistribution of duties between Officers of Military Staff of the Army. English and Foreign Staff systems compared—xvii. Advantages of Foreign system. Staff should be consolidated. *Officer Commanding-in-Chief should be in same office with Secretary of State*—xviii.

Military Department.

Several questions relating to this Department already dealt with in Committee's Second Report. Present constitution of Department. Department divided into a Supply Division and a Store Division. Experiments relating to munitions of war to be under Chief of Control Department; also Manufacturing Departments. Functions of Council of Ordnance—xviii. Director-General of Ordnance to be a purely consultative officer. Duties of Director of Contracts. Office for dealing with personnel of Control Department. Regulations of Pay Sub-Department have been approved. *Examination of Store Accounts:* Argument for placing Store Accounts under Chief Auditor founded on misconception of functions of Control Department. Control Department a checking not a spending, Department. Chief of Control Department not checked under present system of audit—xix. Present system described. Financial control over expenditure of stores. Store Accounts should be examined by Control Department. Administrative knowledge should be utilized in examination of accounts. Subdivision dealing with allowances should be entirely distinct from Executive Departments or Services—xx. Free communication between Controllers and Military Staff Officers essential—xxi.

Control Department.

This Department should be under Financial Secretary, who should be a Parliamentary officer, and occupy a position equal to that of the Chiefs of other Departments of the War Office. Duties of Financial Secretary. Account and Audit Departments should be reunited. Reasons which led to the separation—xxi. Examination and correspondence should be brought together. Evils of present arrangements. Employment of Military Clerks—xxii.

Permanent Under Secretary of State should superintend general conduct of business. Final arrangement of

Financial Department.

Reports of the Committee—*cont.*

Third Report—cont.

duties of this office deferred until War Office and Horse Guards are brought under one roof—xxii. When they are combined, Permanent Under Secretary should be a civilian, and superintend legal business—xxiii.

Principles which have guided the Committee in their inquiry. General remarks as to reductions in establishments. Certain reductions in War Office. Unnecessary minuting of papers in War Office. Mode in which business should be conducted in order to avoid this. Reductions at Horse Guards. Ultimate abolition of appointment of Quartermaster-General—xxiii. Reports of Treasury Committees quoted in support of the present Committee's views as to responsibility of Chiefs of Departments—xxiv.

Reports, Confidential, on Regiments.

Respective duties of Adjutant-General and Military Secretary in relation to—*Forster*, 82, 83; *Paulet*, 147, 148.

Artillery Regimental Confidential Reports—*Gambier*, 257, 262, 333, 334.

Returns, Parliamentary.

Adjutant-General's and Military Secretary's business in connection with—*Forster*, 46, 90-100; *Paulet*, 125-137.

Reserve Forces.

Military Secretary's business in reference to inspection of Yeomanry Cavalry and Militia—*Forster*, 21, 81.

Questions relating to inspection of Reserve Forces, though addressed to Military Secretary, are intended for Commander-in-Chief—*Duke of Cambridge*, 1313.

Adjutant-General's business in relation to discipline of Militia and Yeomanry—*Forster*, 21, 81; *Paulet*, 185, 186.

No advantage in business connected with inspection of Reserve Forces going through Military Secretary—*Paulet*, 136. Adjutant-General is not consulted in regard to discipline of Volunteers—*ib.* 184.

Officer Commanding-in-Chief should advise Secretary of State on questions relating to Reserve Forces, but three should also be an Inspector-General specially responsible—*Duke of Cambridge*, 1306. If Reserve Forces were put under Commander-in-Chief they would naturally form a sub-division of Adjutant-General's business—*ib.* 1327, 1328.

An Assistant Military Secretary and probably additional clerks would be necessary if Reserve Forces were transferred to Commander-in-Chief—*Yorke*, 1117-1119, 1123. Witness supposes that General Lindsay would carry on the business connected with Reserve Forces under Commander-in-Chief—*ib.* 1117, 1118.

Question of placing Reserve Forces more under General Officer Commanding Districts—*Duke of Cambridge*, 1304, 1305.

Business connected with ammunition for Militia and Volunteer Artillery might go direct to War Office instead of passing through office of Deputy Adjutant-General Royal Artillery—*Gambier*, 327.

Reserve Forces should be under Military Department and in Adjutant-General's division—*Report*, xiii. Steps are being taken to place them, for purposes of inspection and command, under Generals in Command of Districts—*ib.* xiii.

Reserve Fund. *See* Promotions.

S.

Savings Bank Accounts.

Examination of, does not properly belong to Chief Auditor's work—*Brown*, *p.* 12.

Secretary of State.

Has power to sanction special expenditure not exceeding 200*l.* on works without obtaining Treasury sanction—*Jervois*, 770.

Cannot alter establishment or appropriation of money without consent of Treasury—*Report*, iv. Responsible both for efficiency and economy—*ib.* x. Primarily responsible for financial control—*ib.* iii. All departments of Army administration should be subordinate to Secretary of State—*ib.* x. He should be assisted in Parliaments by Chiefs of Control and Financial Departments—*ib.* v xi.

Signalling and Telegraphy.

Reasons why this business is dealt with by Quartermaster-General instead of Adjutant-General. It need not pass through Military Secretary—*Grant*, 569-573, 575, 576. System of instruction lies with Royal Engineers, but classes are arranged by Quartermaster-General—*ib.* 574.

Simmons, Major-General Sir Lintorn, K.C.B. (*Analysis of his Evidence*). *Appendix III*, *pp.* 61–66.

Is a Major-General of Royal Engineers, and his last employment in connection with that Corps was that of Director of the Royal Engineer Establishment, Chatham—814, 815. Importance of having an officer of high rank at the Head of the Corps, and of reverting to the system which existed under the Board of Ordnance—816, 842. Dissatisfaction in the Royal Engineers at the Corps being without a Head, and at the two Branches of the War Department at the War Office being under junior officers—816, 830. The superintendence of the Works should be under the Head of the Corps—818, 831, 832. The system of check over expenditure on Works is so perfect that there would be no danger in that officer being under the Head of the Army, instead of directly under the Secretary of State—824. The Secretary of State would determine what was to be put into the Parliamentary Estimates—843. He should carry out both Works' and Corps' duties at his head-quarters—833. He should be responsible for the distribution of officers and men—818. Disadvantages of the distribution being as at present under the Deputy Adjutant-General at Horse Guards—834. The men are employed too much in twos and threes—819. The employment of Non-commissioned Officers as Foremen of Works answers well—820–823. The Regimental Orderly Room should be at the Head-quarters of the Corps—824. Importance of employing the Royal Engineers on works in time of peace in order that they may be trained for war—835–837. The labour of the Sappers of the Corps is economical—838. There is no lack of employment for the men in time of peace; the want is rather for the officers—839–841. Mode of considering alterations in the appropriation of Barracks—844–850. In England re-appropriation questions should be referred to War Office—851, 852. In regard to management of War Department property, witness thinks that greater power should be given to the Commanding Royal Engineer or local agent of War Department—855, 859, 860. Does not consider that the fact that Commanding Royal Engineers are frequently changed affects the question—857, 858. Commanding Royal Engineer should have power to consult a local agent—862. Difficulty of obtaining money for experiments by Engineer Committee. Importance of experiments on questions of Submarine Defences—863, 864. No difficulty in estimating probable cost of experiments every year—865. With regard to question of relation between Artillery and Engineers in planning fortifications, thinks that Commanding Royal Engineer and Commanding Officer of Artillery at stations where fortifications are going on should be placed in communication—868. If there were a professional Head of the Artillery corresponding to the proposed Head of the Engineers, they should both be consulted as to the requirements of the two services in the matter of fortifications—868, 869. This would be preferable to having the two plans considered by a committee—871. Would not put an Officer of Artillery under Inspector-General of Fortifications for the purpose of giving advice on Artillery questions affecting fortifications—870. Recommends that an Engineer Officer be added to the Artillery Committee on Experiments when questions which might have reference to works are under consideration—873. A Subaltern should be appointed to take charge of the experiments carried on under the Engineer Committee—875, 876. The targets and works erected for the Artillery Experiments should be constructed under the direction of Engineer officers instead of under the present Clerk of Works—876, 878, 879. Engineer officers, instead of Civilian Surveyors, should be employed in the Works Branch of the War Office in examining and drawing plans, &c.—876, 877, 880.

Staff, General.

Suggested reorganization. The appointment of Chief of the Staff would facilitate Control business—*Power*, 471, 472.

Chief of the Staff in the field should control Adjutant-General, Quartermaster-General, and Controller—*Dalhousie*, *p.* 10.

Appointment of Chief of the Staff advocated—*Storks* 707–711.

STAFF, GENERAL—*cont.*

Such an appointment might be necessary in the field, but would be useless at Horse Guards—*Duke of Cambridge*, 1380–1382. Commander-in-Chief is his own Chief of the Staff—*Yorke*, 1100.

Respective duties of Quartermaster-General and Adjutant-General not sufficiently defined—*Storks*, 709.

Present organization of Staff does not readily coalesce with Control arrangements. There have, however, been no difficulties in Ireland—*Power*, 472 ; *Drake*, 514.

Under Control system the Military Staff is confined to military questions, the responsibility for supply and transport being assigned to Control Department—*Power*, 464, 465, 494.

Necessity for unreserved intercourse between Controller and the Staff—*Storks*, 1385, 1386. Present practice in regard to such intercourse—*ib.* 1387.

The Staff should be consolidated—*Report*, xviii. Quartermaster-General's Department might be provisionally retained on a reduced scale, but should be subordinate to Adjutant-General's Department—*ib.* xviii. Necessity for free communication between the Staff and Controller—*ib.* xxi.

STORE ACCOUNTS. *See* ACCOUNTS, DEPARTMENTAL.

STORES.

1. *General Principles of Administration.*
2. *Warlike Stores.*
3. *Charge of General Service Stores.*
4. *Requisitions.*
5. *Information necessary for Horse Guards.*
6. *Consignments.*
7. *(Proposed) Ordnance Department.*
8. *Patterns.*

---

1. *General Principles of Administration.*

Economy resulting from concentration under Controller-in-Chief—*Gordon*, *p.* 3. Evils of independent departments dealing with stores exemplified in Crimea—*ib. p.* 2.

Necessity for classification and also for unity of administration—*Balfour*, *p.* 5.

Stores should be divided into sections, and each section put in charge of a Commissary—*Gordon*, *p.* 2.

No necessity for boards of respective officers—*Storks*, *p.* 16.

Witness is in favour of them—*Gordon*, *p.* 2.

Ditto in time of peace—*Lefroy*, *p.* 1 ; *Milward*, *p.* 4.

They should settle local questions connected with Ordnance—*Power*, *p.* 3.

They should check Artillery demands—*Gordon*, *p.* 2 *Milward*, *p.* 4.

Check established over stores in hands of regiments—*Balfour*, 644. The accumulations of stores in the hands of executive officers have been dispersed—*ib.* 654.

Extension of local purchase system abroad advocated—*Gordon*, *p.* 3.

Irregularities in regard to supplies can be more easily explained and remedied locally than by referring to head-quarters—*Power*, 490, 491.

The information of General Officers on store matters will be more complete under the Control than under the old system—*Drake*, 521.

The reserves are now maintained in general depôts. Unserviceable articles are handed over to the officers in charge of those depôts—*Balfour*, 654.

The troops are the spenders of stores. Control Department is a checking, not a spending department—*Report*, xix.

2. *Warlike Stores.*

i. Question of Separate Charge.
ii. Inspections.
iii. Demands and Proportions.
iv. Reserves.
v. Miscellaneous Questions.

---

i. Question of Separate Charge.

Ordnance stores should not be separated from general stores—*Gordon*, *p.* 2 ; *Balfour*, *p.* 5 ; *Holland*, *p.* 7.

Unity of organization should be maintained up to the field arsenal ; but there should be one section of Control Department for consumable supplies and general stores, and another for warlike stores and transport—*Hozier*, *p.* 5.

Witness had charge of munitions of war while Controller in Ireland, and found no special difficulty in connection with them—*Drake*, 522-525.

Necessity for separation would be obviated by officer

2. *Warlike Stores*—cont.

i. Question of Separate Charge—*cont.*

of Artillery frequently inspecting warlike stores in charge of Control Department—*Storks*, *p.* 1.

Warlike stores and consumable supplies should be separately administered at out-stations as well as at the War Office—*Adye*, 956, 970, 971 ; *Memo.* 75.

Munitions of war should be separated from other stores, but all should be under Controller-in-Chief—*Duke of Cambridge*, *p.* 7. Matériel should be put under Artillery officers under Director of Ordnance—*ib.* 1347.

Munitions of war should be separated from all other stores—*Power*, *p.* 3 ; *Milward*, *p.* 4 ; *Trevelyan*, *p.* 8.

They should be placed under Director-General of Ordnance, and in the field under the Commanding Officer of Artillery—*Trevelyan*, *pp.* 8, 9.

The office of Director-General of Artillery should be revived, and Munitions of War be put under him—*Adye*, *Memo.*, *p.* 75.

They should be in charge of non-commissioned officers of Artillery—*Hozier*, *p.* 6.

Controller should be responsible for supplies of ammunition—*Storks*, *p.* 1.

Munitions of war should be in charge of Commissaries of Ordnance, under the command of the Artillery—*Lefroy*, *p.* 1.

Ordnance Commissaries should be under a Controller of Ordnance at War Office, not under Artillery—*Power*, *p.* 3.

Director-General of Ordnance should be solely responsible for manufacture and supply—*Lefroy*, 1136.

Store officers who have been instructed at Woolwich are as competent to take charge of combustible stores as Artillery officers—*Balfour*, 5.

Warlike stores should have separate store accommodation and separate transport—*Lefroy*, *p.* 1.

All reserves should be kept by Commissaries of Stores—*Balfour*, 5. Third reserve of Artillery stores should not be placed in hands of Artillery officers—*ib. p.* 5 ; *Holland*, 7.

Stores in Field Arsenal should be in charge of Control Department—*Duke of Cambridge*, *p.* 7.

Position of the question of separate charge of warlike stores at date of Mr. Cardwell's taking office—*Reports*, *p.* vi. Enumeration of authorities for and against separation—*ib.* vi. Separation does not work satisfactorily in Prussia—*ib.* vii. Custody and issue in garrison and in the field, up to third reserves, should be given to Control Department—*ib.* vii. Warlike stores should be in charge of specially trained officers, and be constantly inspected by combatant officers—*ib.* vii. Necessity for special qualifications on the part of store holders in immediate charge—*ib.* vii. Special technical knowledge not necessary for the officers who control supply—*ib.* vii. Necessary scientific knowledge can be provided by Control Department—*ib* vii. Advantages of unity of administration exceed those gained by separting munitions of war—*ib.* vii. Military authorities should be responsible for stores in charge of Royal Artillery—*ib.* xv. Reasons for placing munitions of war under Chief of Control Department—*ib.* xviii.

ii. Inspections.

Mere inspection of warlike stores by Artillery would not be sufficient—*Lefroy*, *p.* 1.

They should be frequently inspected by Commanding Officer of Artillery—*Storks*, *p.* 1 ; *Gordon*, *p.* 2.

Munitions of war, both in reserve and in course of manufacture, should be inspected by Artillery Officers—*Cambridge*, *p.* 8.

Commanding Officers of Artillery should be responsible for inspection. Director-General of Ordnance should have nothing to do with it—*Storks*, *p.* 16.

Foreign system of inspection should be extended to home stations. Commanding Officer of Artillery should be responsible officer—*Balfour*, 5.

Warlike stores should be inspected by Inspectors of Warlike Stores—*Milward*, *p.* 4.

Inspectors of Warlike Stores should be under Commanding Officer of Artillery—*Gordon*, *p.* 2 ; *Milward*, *p.* 4. They should be abolished—*Power*, *p.* 3.

Warlike stores, in charge of Royal Artillery, to be inspected by Inspector-General of Artillery—*Reports*, xv.

iii. Demands and Proportions.

Demands should be checked by Deputy Adjutant-General Royal Artillery—*Cambridge*, *p.* 8.

2. *Warlike Stores*—cont.

iii. Demands and Proportions—*cont.*

Demands within fixed proportions should go direct to Control Department—*Dalhousie, p.* 11; *Storks, p.* 1; *Lefroy, p.* 2.

Artillery demands are examined by Director-General of Artillery, but the examination is purely formal—*Lefroy, p.* 2.

Director-General of Ordnance should advise Secretary of State as to proportions in Artillery charge and in reserve—*Dalhousie, p.* 11.

iv. Reserves.

Reserves of warlike stores should be under Director-General of Ordnance—*Trevelyan, p.* 9.

Home reserves of ordnance stores, and other stores, should be distinct—*Power, p.* 3; *Milward, p.* 4.

3rd Reserve should not be in the hands of Artillery officers—*Balfour, p.* 5.

1st and 2nd Field Reserves should be in charge of Royal Artillery—*Storks, p.* 1.

2nd and 3rd Reserves should be in charge of Commissaries of Ordnance—*Trevelyan, p.* 9. 1st Reserve of Small-arm Ammunition should be under Commanding Officers of Regiments; 2nd Reserve should be under Commissaries of Ordnance—*ib. p.* 9.

Artillery has its own transport for 1st and 2nd Reserves—*Power, p.* 4.

Transport for 1st and 2nd Artillery Reserves should be permanently allotted to the Artillery—*Balfour, p.* 5.

v. Miscellaneous Questions.

All armaments in position and all equipment in the hands of Field Batteries must be under Deputy Adjutant-General. Everything in store should be under Director of Ordnance—*Duke of Cambridge*, 1356, 1358.

The opinion of Deputy Adjutant-General Royal Artillery, as well as that of Director-General of Ordnance, should be given on questions of matériel—*Duke of Cambridge*, 1350–1355.

For Transport of Munitions of War, *see* TRANSPORT.

3. *Charge of General Service Stores.*

Stores which the Artillery use in common with other services might be in charge of Warlike Stores Section of Control Department—*Lefroy, p.* 1; *Trevelyan, p.* 9; *Duke of Cambridge, p.* 7.

They need not be in charge of Ordnance Commissaries—*Milward, p.* 4.

The question of the charge of General Stores should be settled in detail by the Heads of the Ordnance and Commissariat Branches of the Control Department—*Acye*, 995.

Administration of General Stores should not be separated from that of consumable supplies—*Power, p.* 3.

4. *Requisitions and Mode of Supply.*

Reason why requisitions pass through Adjutant-General's Office—*Paulet*, 153, 156.

Reports of demands made, and of demands not duly complied with, should be made to Horse Guards—*Yorke*, 1126, 1127.

The arrangement under which requisitions go direct from the troops to the Control Department was brought into operation by Clauses 58 and 111 Army Circular, 1869—*Power*, 459. The function of Adjutant-General's and Quartermaster-General's Department as regards requisitions for stores have ceased—*ib.* 460; *Balfour*, 642. No object was gained by sending requisitions through Adjutant-General or Quartermaster-General—*Power*, 468–470.

Requisitions might be dealt with locally if Adjutant-General were kept informed of state of the equipments by means of Monthly Reports—*Paulet*, 156–159.

Requisitions from Royal Engineers might be dealt with locally—*Keane*, 421–423; *Balfour*, 606, 661.

Business connected with ammunition for Militia and Volunteers might go direct to War Office instead of passing through office of Deputy Adjutant-General Royal Artillery—*Gambier*, 327. Demands, returns, and correspondence now sent to Deputy Adjutant-General Royal Artillery might go direct to War Office—*ib.* 262-267, 316-319, 325, 326.

The Artillery and Engineer business connected with arms, ammunition, clothing, &c., might be amalgamated with general business of Adjutant-General—*Paulet*, 176, 177.

Description of old method of obtaining stores—*Drake*, 507-509. Present system—*ib.* 510-512.

4. *Requisitions and Mode of Supply*—cont.

Under Control system requisitions are only made in duplicate instead of quintuplicate. It is hoped that the duplicate will ultimately be dispensed with—*Balfour*, 642.

Reports of issues to Royal Engineers, directed by a memorandum from office of Deputy Adjutant-General Royal Engineers to be made to Horse Guards, are unnecessary—*Power*, 463.

The Control Department is solely responsible for Camp Equipage, subject to strategical considerations. Issues in excess of authorized proportion are, however, reported to Quartermaster-General—*Power*, 457–459.

Advantage of late system of sending demands through Quartermaster-General—*Yorke*, 1128-1131.

When reports of deficiencies in equipments are made, it should be shown that the troops applied for them in due time—*Balfour*, 642.

Artillery demands should be checked by Boards of respective Officers—*Gordon, p.* 2.

Unnecessary work caused by requisitions passing through Horse Guards—*Report*, xii. Requisitions for supplies will not pass through Horse Guards—*ib.* xii.

5. *Information necessary for Horse Guards.*

Necessity for the Commander-in-Chief being duly informed as to demands and issues of supplies—*Duke of Cambridge*, 1284-1291; *Yorke*, 1124, 1125.

Monthly returns would be insufficient—*Yorke*, 1124, 1125.

Under Control system, Commander-in-Chief is kept fully informed of the state of the equipments—*Balfour*, 642, 644.

Commander-in-Chief should be kept fully acquainted with the state of the stores both in reserve and in the hands of the troops—*Cambridge, p.* 8.

Under Control system it will only be necessary to consult Adjutant-General, Deputy Adjutant-General Royal Artillery, or Deputy Adjutant-General Royal Engineers, on general questions affecting supplies—*Power*, 485-489.

Horse Guards will be furnished with the necessary information as to the proper supply of the troops by means of monthly returns—*Report*, xii. Opinion of Military Department only necessary on important questions—*ib.* xiv.

6. *Consignment.*

Stores of every description should be consigned to Control Department, both in peace and war—*Balfour, p.* 5; *Holland, p.* 7; *Power, p.* 3; *Storks, p.* 1; *Duke of Cambridge, p.* 7.

In the field stores of every kind might be consigned to Controller, and divided at the base of operations—*Milward, p.* 4. In Abyssinia, stores were consigned to two departments with advantage—*ib. p.* 4.

Confusion in Abyssinia owing to stores being shipped to different departments—*Hozier, p.* 6; *Holland, p.* 6.

Munitions of war should be shipped separately from other stores—*Trevelyan, p.* 9.

7. (*Proposed*) *Ordnance Department.*

Commissaries of Ordnance should be under the command of the Artillery—*Lefroy. p.* 1.

They should be under a Controller of Ordnance at War Office, and not under the Artillery—*Power, p.* 3.

They should be eligible for promotion to Controller—*Milward, p.* 4.

They might be under Controllers in time of peace, and at small stations one officer might do both Ordnance and General Store Duties—*Milward, p.* 4; *Trevelyan, p.* 10.

They might be under Controller-in-Chief, but should not be under Controllers—*Power, p.* 3.

They need not have charge of stores which the Artillery use in common with other services—*Milward, p.* 4. If it be decided to separate consumable supplies from other stores, general stores should be put under Ordnance Commissaries—*ib. p.* 4.

Question of placing them under Controller of secondary importance; but it is essential that they should have technical knowledge and be agents of Secretary of State—*Power, p.* 3.

Should have charge of 2nd Reserve of small-arm ammunition—*Trevelyan, p.* 9.

Ordnance Commissaries and Commissaries of Supply should not be interchangeable, but Control Officers might be selected from both—*Power p.* 3.

STORES—*cont.*

8. *Patterns.*

Mode of dealing with questions of changes in pattern —*Gambier*, 293-311.

They should not be referred to Controller-in-Chief —*Lefroy*, *p.* 1.

Assimilation of patterns advocated—*Gordon*, *p.* 3.

STORKS, Major-General the Right Hon. Sir HENRY K., G.C.B. Controller-in-Chief. (*Analysis of his Evidence.*)

(*First Examination.*) *Appendix No. I*, *p.* 1.

Stores of every description should be consigned to and in custody of one Department, both in peace and in war. Controller should be responsible to General Officer in Command for supplies of ammunition. Commanding Officers of Artillery should frequently inspect stores in charge of Control Department. This would obviate the necessity for separating Ordnance from General Stores in the Field up to the "Field Arsenal." Artillery would have charge of 1st and 2nd Field Reserves. Examination of Artillery demands. Proportions should be fixed. Supplies within fixed limits—*p.* 1.

(*Second Examination.*) *Appendix No. I*, *p.* 11.

Objected to Artillery officers holding appointments in the Control Departments on the footing of Staff appointments. They should be seconded. Military Store Officers should be absorbed before Artillery Officers and Non-commissioned Officers are appointed Commissaries. There should be no power of re-appointment if the positions of Superintendents of the Manufacturing Departments are to be upon the Staff footing—*p.* 11.

(*Third Examination.*) *Appendix No. II*, *p.* 16.

Saw no necessity for a Board consisting of the Heads of Departments at the Arsenal. Local business could be arranged in personal communication with Heads of Departments. The Director-General of Ordnance should be scientific adviser of Secretary of State, and should have nothing to do with inspection of warlike stores. Commanding Officers of Artillery should be responsible for that duty. Any question that could not be settled locally would be referred to Controller-in-Chief if it related to reserves, or to Commander-in-Chief if it concerned stores in Artillery charge. Any matter of patterns involved would be passed to Director-General of Ordnance, who would obtain report of Manufacturing Departments if necessary. Would not create a Board to assist General Officers in dealing with store questions. The duties of the Deputy Adjutant-General Royal Artillery in regard to armaments and fortifications should be transferred to Director-General of Ordnance, the former officer dealing for the future solely with discipline—*p.* 16.

(*Fourth Examination.*) *Appendix No. III*, *p.* 55.

Agrees generally with the evidence given before the Committee as to the working of the Control Department —698, 699. The Control system was recommended by Lord Strathnairn's Committee, and has now been introduced both at home and abroad—700, 701. The military functions of the Quartermaster-General are untouched, but he has been relieved of certain store duties for which he was not responsible—702. The duties of the Departments of the Adjutant-General, Quartermaster-General, and Deputy Adjutants-General of Artillery and Engineers, have diminished, and might be further reduced —704. Main principle of the Control system—705, 706. There should be one Staff Officer at the head of all military departments, with Staff Officers under him for the duties of the different departments—707. Respective duties of Quartermaster-General and Adjutant-General not sufficiently defined—709. If one officer were at the head of both, he might allot the duties as occasion required—710, 711.

(*Fifth Examination.*) *Appendix No. III*, *p.* 100.

Recognizes necessity for unreserved intercourse between Controllers and Officers of the Military Staff—1385. Has constantly impressed its importance upon Control Officers—1386. Present practice in regard to such intercourse—1387.

STRATHNAIRN, General the Right Hon. Lord, G.C.B., G.C.S.I. (Evidence not printed. *See Appendix No. I*, *p.* 6.)

T.

THOMPSON, RALPH, Esq. (*Analysis of his Evidence.*) *Appendix No. III*, *p.* 88.

Is in charge of the Registry at the War Office—1250. Proposed extension of War Office Registry to Horse Guards—1251. Extent of correspondence at War Office and Horse Guards compared—1252-1254. Amount of correspondence between Horse Guards and War Office, and between departments at Horse Guards—1255, 1256. Results of incorporating War Office and Horse Guards' correspondence—1257, 1258, 1264, 1265. Duplicates of letters on store subjects addressed by regiments to War Office are sent to Horse Guards—1259, 1260. The saving in correspondence which should be effected by Control system is not yet fully realized—1261. If a common registry were established for Horse Guards and War Office, there would be no difficulty in all branches referring to it—1262. Reduction in number of Clerks which would result from having one registry—1263. Secretary of State would have more general knowledge of important matters coming to Military Branch—1266. Reports of the important correspondence which arrives every morning might be prepared for Secretary of State and Principal Heads of Departments 1267-1270.

TOPOGRAPHICAL DEPARTMENT.

Is not under Quartermaster-General except in the Field—*Grant*, 632. Should be under Quartermaster-General—*ib.* 634. In the case of a campaign it would be the duty of Topographical Department to collect information respecting nature of country, &c.—*ib.* 633.

Should be under Commander-in-Chief—*Duke of Cambridge*, 1307, 1308.

Should be under Horse Guards. Position and qualifications of Chief of Department—*Reports*, xvi.

TRANSPORT.

1. *Passages and Sea Transport.*
2. *Transport in Garrison and in the Field.*

---

1. *Passages and Sea Transport.*

Duties of Military Secretary, Adjutant-General, and Quartermaster-General in reference to passages—*Forster*, 15, 16, 65-67, 77; *Paulet*, 119-122.

Military Secretary, not Quartermaster-General, applies to War Office for passages—*Grant*, 603.

Correspondence on passages should be conducted by Quartermaster-General—*Whiffin*, *p.* 13.

Passage allowance questions should be dealt with by Accountant-General—*Brown*, *p*, 12.

Present system of business in reference to passages could not be simplified—*Grant*, 602-604; *Duke of Cambridge*, 1323.

Business connected with passages might be much simplified—*Paulet*, 203-206.

Witness thinks it necessary that certain questions of passage should go to Military Secretary—*Yorke*, 1115, 1116.

Business connected with passages might be done entirely in Adjutant-General's Office—*Paulet*, 121.

Mode of conducting business relating to Artillery passages—*Gambier*, 227, 228.

Mode of conducting business relating to Engineer passages—*Keane*, 368-375.

Returns of Artillery and Engineer drafts for India to pass through Military Secretary's Office—*Forster*, 56, 57.

Sea transport should be left with Quartermaster-General and Admiralty, and should not be handed over to Control Department—*Duke of Cambridge*, 1299-1301, 1338.

The question of sea transport should be considered at the earliest opportunity—*Power*, 477. Sea transport still remains in hands of Quartermaster-General and Passage Branch of War Office—*ib.* 474.

When reliefs are settled, Quartermaster-General corresponds direct with War Office about shipping arrangements. He also corresponds with War Office respecting passages of individual officers and soldiers—*Grant*, 601. An annual statement of troops to move by sea is sent by Quartermaster-General to War Office to enable transport estimates to be framed—*ib.* 599, 600.

If foreign system were carried out at home, the Passage Branch of War Office would be part of Control Department—*Power*, 475.

TRANSPORT—*cont.*

Freight of ships for munitions of war should be issued for Director-General of Ordnance by Admiralty or Control Department—*Trevelyan, p.* 9.

Arrangements for consigning stores—*Holland, p.* 7.

Necessity for having only one consignee when sea transport is in question—*Hozier, p.* 6.

Unity of administration of sea transport necessitated by our insular position—*Report*, vii.

The whole of the transport business should be consolidated under Control Department—*ib.*, xiv.

2. *Transport in Garrison and in the Field.*

Absolute necessity for all transport being under Controller—*Power, p.* 4.

Controller should arrange for the whole transport of the army, and be indented upon by the Artillery—*Milward, p.* 4.

Transport must all be under one Department, but transport for 1st and 2nd Artillery Reserves should be permanently allotted to the Artillery—*Balfour, p.* 5.

Transport should be all under Control Department, the requisite proportion being allotted to Artillery in the same way as to other Services—*Trevelyan, p.* 10.

Necessity for placing transport under Supply Department—*Holland, pp.* 6, 7.

Transport and charge of warlike stores should be assigned to the same section of Control Department—*Hozier, p.* 5.

The arrangement under which requisitions go direct from the troops to the Control Department was brought into operation by Clauses 58 and 111, "Army Circular," 1869—*Power*, 459. Lord Straithnairn's Committee proposed that subject to strategical considerations the Controller should be solely responsible for transport—*ib.* 457, 458. No object was gained by sending requisitions through Adjutant-General or Quartermaster-General—*ib.* 468-470. Functions of Quartermaster-General under Control system relate solely to strategical considerations—*ib.* 457-459, 473.

Regimental transport should be under immediate charge of regiments—*Hozier, p.* 6.

There should be only one transport train—*Gordon, p.* 2.

Transport of munitions of war should be separate from that of other stores, and should be under absolute control of Artillery—*Lefroy, p.* 1.

Artillery has its own transport for 1st and 2nd Reserves—*Power, p.* 4. If all transport were under Controller there would be no difficulty in arranging transport of Ordnance Stores, *ib. p.* 4.

Supreme importance of supply of ammunition in the field—*Milward, p.* 4.

Transport of small-arm ammunition in the field should not be in the hands of the Artillery—*Balfour, p.* 5.

Present position of Control Department in Ireland in regard to Land Transport—*Drake*, 517, 518.

Importance of concert between Control Department and Quartermaster-General's Department in regard to Transport—*Duke of Cambridge*, 1338.

Since 1856, routes have been issued in blank to Quartermaster-General, who keeps no record of expenditure—*Report, p.* xiv. Delay and inconvenience caused by present system of divided responsibility at headquarters—*ib.* xiv. Business relating to transport should be under Control Department—*ib.* xiv. Opinion of Horse Guards only necessary on important questions—*ib.* xiv.

TRAVELLING. *See* TRANSPORT.

TRAVELLING ALLOWANCES. *See* ACCOUNTANT-GENERAL'S DEPARTMENT, 2; *Details of Work.*

TREASURY.

Sanction necessary for alteration in establishment or appropriation of money—*Report, p.* iv.

Also for increase to pay or allowances—*Knox, p.* 21.

Also for transferring a surplus in one item of a vote to another—*Jervois*, 771-774.

Letters to Treasury should be signed by Financial Secretary—*Report*, v and xxi.

TREVELYAN, Sir CHARLES, K.C.B. (*Analysis of his Evidence.*) *Appendix No. I, pp.* 8–10.

Munitions of war should be kept separate from other stores, and placed under the administration of the Director-General of Ordnance. Secretary of State should have four responsible advisers, the Commander-in-Chief, the Controller-in-Chief, the Director-General of Ordnance, and the Director of Works—*p.* 8. The Director-General of Ordnance should be the medium of communication with the Manufacturing Departments, and the reserves of warlike stores should be under his control. There is an essential difference in kind between such stores and all others, and they could only be satisfactorily dealt with by the Royal Artillery. If the Control Department were entrusted with the charge of stores of every description, it would break down in a time of war. The practice in our own wars, and at present in continental armies, has always been to place warlike stores directly under the Artillery. Warlike stores for an army in the field should be shipped separately from other stores. The Artillery officers and soldiers shipping such stores should be in direct communication with their comrades at the port of debarkation. Inconvenience in the Russian war from mixing cargoes of munitions and general stores. Freight of ships should be hired for the Director-General of Ordnance by the Admiralty or Control Department, and there should be a naval officer of Control at the port of disembarkation. Those stores which the Artillery use in common with other branches of the Service should be under the Control Department. The Second and Third Reserves of Artillery Stores in the field should be in charge of Commissaries of Ordnance. The First Reserve of small-arm ammunition should be under the Control of Commanding Officers of Regiments; the Second Reserve should be in charge of Commissaries of Ordnance. In the field the Commanding Officer of Artillery would be responsible to the General Officer Commanding for the efficiency of the Ordnance Branch. He should be assisted by a proper staff of Commissaries of Ordnance. No objection to the employment of military officers in administrative duties—*p.* 9. The whole of the transport of the Army should be provided by the Control Department, and the requisite proportion should be assigned to the Artillery. The Control Department should be divided into two sections, one for consumable stores, and the other for clothing and miscellaneous stores. Confusion in the Crimea in regard to clothing. At small stations one rce ce might perform the combined duties of the Ordoffinanand Control Departments—*p.* 10.

W.

WAR OFFICE (*Miscellaneous Questions*).

Theory of present constitution of the office explained—*Lawson, p.* 14.

Secretary of State should have four responsible advisers: Commander-in-Chief, Controller-in-Chief, Director-General of Ordnance, and Director of Works—*Trevelyan, p.* 8.

System of boards of respective officers should be adopted at War Office—*Milward, p.* 4.

Checks over Heads of Departments obtained by examination of papers before being put away in Control Registry—*Balfour, p.* 14; *Lawson, p.* 15.

Promotion Branch. Check exercised upon promotions and appointments—*Borrow*, 539-543. An account is kept of reserve fund; there seems no object in keeping a duplicate at Horse Guards—*ib.* 536, 537. Books are also kept showing amount available for retired full-pay and for good service pensions—*ib.* 544, 545; also record of officers dying while on half-pay—*ib.* 546. Suggested simplification of business in regard to appointment and promotion of medical officers, and also in regard to sale of commissions—*ib.* 549.

There should be an officer under the Military Under Secretary to deal with general questions relating to defence. He might be Secretary to a Council for deciding such questions—*Jervois*, 813.

A branch might be formed for regulating pay and allowances of both Army and Departments—*Knox, p.* 20.

Books in book-keeping room might be open to inspection of Administrative branches for the purpose of ascertaining the progress of expenditure—*Whiffin, p.* 17.

War Office—*cont.*

Permanent Under Secretary of State should be a civilian, and might superintend legal business—*Report*, xxiii. Legal business might be placed under Permanent Under Secretary—*ib.* xxiii. Unnecessary minuting of papers—*ib.* xxiii. Reductions which might be at once effected—*ib.* xxiii.

Whiffin, H. W. S., Esq., Chief Auditor. (*Analysis of his Evidence.*) (*First Examination.*) *Appendix No. II, p.* 13.

Pointed out the imperfect way in which the division of duties between himself and the Accountant-General had been carried out. The distribution of work between the Accountant-General and his Assistants previous to the division into Chief Auditor's and Accountant-General's Branches was not based on any principle. Thought that the attempted separation of the Audit and Account duties had not been successful. Admitted that there were too many superior clerks in the Audit Branch, and explained the origin of the present proportion. Had effected reductions by employing soldier clerks, who were more suitable for certain duties than established clerks. The examination and correspondence work should be kept distinct to a certain extent. Thought that the work of the present Regimental Correspondence Rooms might be done by the Examining Rooms, with a slight addition to the staff. The Chief Auditor allowed charges on the authority of the Accountant-General, provided they were not contrary to regulation. He obtained the concurrence of the Accountant-General to allowing or disallowing doubtful charges in the accounts. Considered that the power of the Assistant Under Secretary only differed from that of the Accountant-General in his having a larger discretion as to interpreting regulations. Had no objection to Store Accounts being removed from the Chief Auditor's Branch. Naval Gunner's Accounts could not be transferred to Admiralty. The registry of pensions should be transferred to Chief Auditor. Audit check upon pensions insufficient. Correspondence on passages should be conducted by Quartermaster-General. Probable saving that would result from amalgamating Account and Audit Branches. Thought that better regulations would not much lessen correspondence unless present system of pay and allowances were simplified. Recommended the employment of soldier clerks for mechanical work. Advocated division of established clerks into many classes, and would abolish annual increments of salary—*p.* 13.

(*Second Examination.*) *Appendix No. II, pp.* 16 *and* 17.

Did not see the necessity of transferring the administration of Vote I. from the Accountant-General to an independent officer. Thought the entire abolition of pre-audit dangerous. Local payments were often an inconvenience to contractors. Thought the examination of their own accounts by administrative branches objectionable in principle—*p.* 16. It is too late to exercise control when the expenditure has been actually incurred. Proposed to arrange for the examination of the accounts by subjects, so as to secure unity of interpretation of regulations. If it were thought necessary, clerks from the administrative branches might be temporarily attached to his examining rooms for the purpose of inspecting vouchers. The subsidiary books kept in the book-keeping room might be open to the inspection of the administrative branches to enable them to ascertain the progress of expenditure, but it was doubtful whether the accounts would supply such information in time to be of practical use. Denied the necessity for professional knowledge in the examination of accounts. In time of war the examination of accounts by administrative branches would be neglected for more pressing work. That system would also lead to increased clerical labour, and would hardly be applicable to miscellaneous votes. Present system admitted of economical distribution of labour as occasion required. Examination of Store Accounts might be done at Woolwich, but the clerks employed should belong to Audit Establishment. Store and Cash Accounts should verify each other. Difficulties in the way of this if Store Accounts were transferred to Control Department. Store Accounts should be made available for statistical purposes—*p.* 17.

White, W. H. Esq. (*Analysis of his Evidence*). (*First Examination*) *Appendix III, pp.* 46 *and* 47.

Is a first-class Clerk in the War Office—528. In charge of the Correspondence Room which deals with financial questions relating to the Royal Engineers—529. Is of opinion that many of the claims which now pass through the office of the Deputy Adjutant-General Royal Engineers might come direct to the War Office—530-532. *Analysis of Memorandum handed in by Witness, p.* 46; Origin of the practice of making the Deputy Adjutant-General, Royal Engineers, the channel for financial correspondence. The Paymaster of the Corps would adjust questions of finance within the limits of regulations. Those officers do already communicate directly with the War Office in most cases. The Extra Pay Returns are not now certified by the Deputy Adjutant-General Royal Engineers, and the examination of them at the Horse Guards is superfluous. The necessary information for checking claims of officers on leave, "under orders," on passage, or on special duty, should exist in the War Office, as in the case of other Branches of the Service—*p.* 47.

(*Second Examination.*) *Appendix No. III, pp.* 84–86.

Still holds the opinion expressed in a memorandum on Report of Lord Strathnairn's Committee, that the maintenance of separate establishments of the Account and Audit Branches is a mistake, although the Account and Audit duties should be kept distinct—1171-1173, 1195. Scheme for organizing a Finance Department under the three branches of (1) Control of Finance, (2) Cash and Account, (3) Audit—1175. The Branch for Control of Finance would deal with the higher financial questions, and would consist of men of superior knowledge—1176 1178. Reasons for placing Estimates under that Branch, and separating the book-keeping—1179–1182, 1212. Accountant-General should be Chief Financial Officer, and report directly to Parliamentary Under Secretary—1183, 1184 He would require two assistants, supposing that he himself can take immediate charge of Finance Branch—1184-1186. Control to be exercised by Finance Branch in regard to Control Services—1187-1191. Witness conducts correspondence on the accounts of certain regiments—1192. Examination of these accounts is done by Chief Auditor—1193, 1194. Thinks that the work of the Accountant-General's Department should be classified by subjects much more than at present—1196-1198, 1208. Numerous travelling claims are included in the accounts, without being sent to War Office for pre-audit—1199. Thus, different decisions may be given on the same subject—1200, 1201. Thinks that the authorization of travelling allowances and the correspondence on appeals should be dealt with in separate Branches—1202-1207. Administration of Vote 1 under witness's scheme—1209, 1210. Finance Branch would deal with Establishment questions—1211, 1212. Mode of dealing with Appeals—1213-1215. Examination of claims by subjects would lead to accuracy in classification of expenditure—1216.

Works Department and Director of Works. *See* Engineer Department.

Y.

Yorke, General Sir Charles, G.C.B. (*Analysis of his Evidence.*) *Appendix No. III, pp.* 79-81.

Was Military Secretary from 1854 till 1860—1090. Duties of Military Secretary not connected with promotions and appointments—1092. He is the channel of communication between the Commander-in-Chief and the Military Departments—1108, 1109, 1114, 1115. Communications addressed by the War Office to the Military Secretary are really for the Commander-in-Chief—1093. Thinks that the correspondence of the Military Secretary with the War Office and with the other Departments at the Horse Guards would not cease if all departments were under one roof—1094 1096. Military Secretary is not "Chief of the Staff"; he only carries out the orders of his chief—1097. He cannot give orders to Adjutant-General — 1098. Thinks it better that the Commander-in-Chief should communicate

his verbal orders direct to the Adjutant-General and Quartermaster-General — 1099. The Commander-in-Chief is himself "Chief of the Staff"—1100. Thinks that if the Commander-in-Chief were absent and unable to give orders, the Department would receive instructions from the Secretary of State—1102. No such case has arisen since the Duke of Wellington's resignation. Does not know what was then done—1101. In the matter of General Courts-Martial, the action of Military Secretary is purely ministerial—1103, 1104. He is, in fact, the Secretary of the Commander-in-Chief, and his office is really the office of the Commander-in-Chief—1005. Action of the Military Secretary in regard to claims and representations against officers—1106, 1107. On questions relating to interchange of regiments in India and the Colonies, inspection of Militia and Yeomanry, and appointments in Commissariat and other Departments, the Military Secretary is simply a channel of communication — 1108, 1109, 1113-1115. When witness was at Horse Guards, the communications between the Deputy Adjutant-General Royal Artillery and Royal Engineers, and the Commander-in-Chief, went

through the Military Secretary—1110-1112. Thinks it necessary that certain portions of the business connected with passages should go to Military Secretary—1115, 1116. When witness was Military Secretary, the business was as much as it was possible for him to perform —1122. An Assistant Military Secretary and probably additional clerks would be necessary if the duties connected with the Reserve Forces were transferred to the Commander-in-Chief—1117-1119, 1123. Supposes that General Lindsay would carry on the business connected with Reserve Forces under Commander-in-Chief—1117, 1118. Importance of the Commander-in-Chief being furnished with the earliest information as to any deficiencies in the supplies required by the Troops. Thinks that it would not be sufficient if it were given in the Monthly Return—1124, 1125. Reports of demands made and of demands not duly complied with should be made to the Commander-in-Chief —1126, 1127. Advantage of the late system of sending demands through Quartermaster-General—1128-1131. Does not think that there would be a great reduction of work if all the offices were brought under one roof—1133.

STATEMENT C	12

REPORT.

In compliance with the Instructions we have received, to report as to the manner in which the money stopped from Soldiers by the imposition of Fines for Drunkenness should be appropriated, we beg to submit as follows:—

In determining the principle to guide us in the consideration of this subject, we agree with the Committee, of which Major-General the Honourable J. Lindsay was President, as concurred in by the Royal Commission on Courts-Martial, "that it is "essential to the success of any System of Fines, that the sums derived from them should "be formed into a separate Fund, and should be applied towards increasing the amount "voted for Rewards to well-conducted men, or to other objects for the improvement of "the Soldier's condition," which has been reiterated in paragraph 14 of General Order 46 of the 1st May, 1869, notifying the Instructions for carrying out the System of Fines for Drunkenness, wherein it is stated "that the amount accruing from Fines will be formed "into a General Fund to be applied, under the direction of the Secretary of State for "War, to objects tending to the benefit of the Soldiers of the Army generally."

In the course of our enquiries we have elicited the opinions of 37 persons of different ranks (as stated in the margin) belonging to all branches of the Service; and it is with great satisfaction that we are enabled to concur in the opinion of the Field-Marshal Commanding-in-Chief, as to the complete success of the System of Fines, as expressed in the Adjutant-General's letter of the 26th February last, on the occasion of His Royal Highness proposing the assembling of this Committee; for to the question put categorically to the several Witnesses as to its working, the reply in each instance has conveyed an emphatic approval of the System, coupled with the general assertion that it has not increased Absence without leave.

Lieutenant-General Eyre.
Colonel Higginson, Grenadier Guards.
Colonel Shute, C.B., Commanding 4th Dragoon Guards.
Colonel Brown, C.B., Royal Engineers, Assistant Adjutant-General.
Colonel Thomas, Commanding 67th Regiment.
Quartermaster Falconer, 1st Battalion Coldstream Guards.
Serjeant-Major Ford, 2nd Battalion Grenadier Guards.
Private J. Sherratt, 2nd Battalion Coldstream Guards.
Serjeant-Major G. Baker, 1st Battalion Grenadier Guards.
Private B. Baxter, 2nd Battalion Fusilier Guards.
Quartermaster Collins, 3rd Battalion Coldstream Guards.
Colonel Henry, C.B., R.H.A.
Colonel Vesey, Depôt Brigade, R.A.
Brigade Serjeant-Major Lovell, R.H.A.
Captain King, R.H.A.
Major Geary, Adjutant 14th Brigade, R.H.A.
Battery Serjeant-Major G. Adamson, Depôt Brigade, R.A.
Gunner Alexander, R.H.A.
Gunner William Finch, Depôt Brigade, R.A.
Serjeant Samuel Tallett, 3rd Dragoon Guards.
Troop Serjeant-Major H. Tye, 5th Dragoon Guards.
Serjeant J. Simpson, 12th Lancers.
Major-General Carey, C.B.
Major-General Lysons, C.B.
Colonel Oakes, C.B., Commanding 12th Lancers.
Lieutenant and Adjutant Jarvis, 67th Regiment.
Lieutenant and Adjutant Borrett, 4th King's Own Regiment.
Captain Truell, 53rd Regiment.
Captain H. Moorsom, 1st Battalion Rifle Brigade.
Serjeant-Major Mc Kay, 33rd Regiment.
Serjeant-Major Forbes, 42nd Royal Highlanders.
Colour-Serjeant J. Desson, 1st Battalion Rifle Brigade.
Private Grant, 4th Battalion 60th Rifles.
Private Charles O'Keefe, 4th Battalion 60th Rifles.
Private Thomas McCleod, 4th Battalion 60th Rifles.
Colonel Commandant H. S. Aslett Royal Marines L.I.
Quartermaster George White, Royal Marines L. I.

We have no hesitation in recommending that the money should be formed into a Fund, for the purpose of being distributed generally among the several Corps and Regiments throughout the Service, in preference to the money that is collected from any one Corps being retained by that Corps for distribution.

To whatever objects the Fund be applied, it is clear that if the distribution of the Fines be limited to the Corps from which they are collected, the Corps that may be most irregular as regards drunkenness and from which most Fines have been levied would derive the greatest benefit, and would in this respect place the better conducted body of men in an invidious position, especially when, as might frequently happen, two such Corps found themselves quartered in the same Camp or Garrison.

The System of distribution, moreover, from a General Fund, would, it is believed, remove from the soldier any idea that he was fined for the purpose of increasing the amount of the Regimental Fund.

As regards the application of the money, we consider that the distribution should be based on the principle of rewarding Sobriety at the expense of Drunkenness; and inasmuch as intemperance frequently results in sickness or imprisonment, we are of opinion that the sober and well-behaved man, who is always available to do his own duty as well as that of his irregular comrade, should be encouraged and rewarded.

It is neither expedient nor in accordance with Military usage to grant extra pay for duty thus imposed on the

regular Soldier; and the evidence that we have taken is generally opposed to the idea of giving increased Pay from this Fund to men whilst serving; hence we are of opinion that the Fund would be most beneficially employed by its distribution in the shape of a Bonus to well-conducted Soldiers on Discharge.

The prospect of such a Reward ever present to the soldier's mind would, it is believed, act as an additional incentive to good conduct whilst serving, and the Grant would be of substantial benefit to him on his re-entrance to civil life; added to which the knowledge of his having obtained such Reward would, in the eyes of his neighbours and friends, reflect favourably on the profession he had quitted, and would tend to facilitate recruiting.

All Awards from the Fund, with the names of the Recipients, should be invariably published in Regimental Orders of the Corps to which the men belong.

We consider that such an employment of the Fund would be far preferable to its appropriation to less general objects.

The Recreation Rooms and Institutes, as well as other means of amusement, depend on Funds which have nothing in common with this. Moreover the irregular soldier is not debarred from their use, and to devote the money derived from Fines in aid of such objects would, in our opinion, be a misapplication of the Fund.

Suggestions have been made to employ the money towards the decrease of Hospital Stoppages, and in diminution of Barrack Damages. Neither proposition has found favour with us; and the latter is especially open to objection, as it would, in all probability, tend to induce carelessness on the part of the Soldier in his use of Government property.

Neither do we consider that the Fund should be used in diminution of the prices of articles sold in the Canteens; as we are of opinion that these establishments should rely on their own resources.

We deem the appropriation of the Fund, or any part of it, in aid of Soldiers' Families equally objectionable, being partial in its nature, and open to the possibility of its being employed in some cases towards the benefit of Soldiers whose characters are not above reproach.

Another proposition, which has found favour with some of the witnesses, is to use the Fund towards increasing the amount of Gratuities given annually by the Government, so as, if possible, to grant a Gratuity with every Medal. We consider that such an application of the Fund would be too limited in its extent, and moreover is open to the objection that the money would be applied to grants, which, if given, should be paid for by the State.

In determining what should be the test of Good Conduct, as entitling a Soldier to the proposed Bonus on Discharge, we have arrived at the conclusion that, on the whole, the Good Conduct Badge affords the simplest and best index of a Soldier's character. The machinery is in existence, is well understood by the Officer and Soldier, and carries with it this advantage, that the Soldier who has been fined, and who has subsequently by good conduct recovered his Badge or Badges, will be enabled to participate in the advantages of the Fund on terms sufficiently easy to encourage him in the path of reformation. At the same time, as we are of opinion that it would be expedient to mark the special application of this Fund to cases of continuous Sobriety, we are desirous of recommending that a Special Reward or Bonus should be awarded to those Soldiers who, for a long series of years, have never been recorded as guilty of an act of Drunkenness.

Considerable difference of opinion exists amongst the Officers, Non-commissioned Officers and men, who have been examined before the Committee, as to whether Non-commissioned Officers should be allowed to participate in the benefits of the Fund. We, however, after due consideration, concur in the opinion that it would be undesirable to grant any portion of the Fund to Serjeants or Corporals.

Considering the initiatory part which Non-commissioned Officers take in the infliction of Fines, we deem it most desirable that their actions should be free from even the suspicion of interested motives; and by thus keeping them clear of the possibility of any such charge being brought against them, we are of opinion that their dignity and self respect, the maintenance of which is so essential to the well-being of the Service, would be best preserved.

The annexed Return A, gives the amounts of Fines stopped from Soldiers for Drunkenness in the different Corps serving at Home and in the Colonies, according to the Pay-lists received at the War Office up to the present time.

Enquiries have been made at the India Office regarding the amount stopped from the Troops in that Country; and it has been ascertained that there is no information on the subject obtainable at present from that Department.

As, from the statement of Major-General Pears, it would appear certain that the Secretary of State for India will follow the same course regarding the distribution of the Fund as the Secretary of State for War may determine to adopt, we would suggest that the India Office be requested to move the authorities in India to furnish the Secretary of State for War with a Return showing the amount levied as Fines in each Corps of Her Majesty's Forces serving in India, and to pay over such amount to the War Office for distribution to the men discharged in this Country who may be entitled to Grants therefrom.

The annexed Return B, gives the number of Badges taken out by men on discharge to Chelsea Out-pension, whether permanent or temporary, for the years 1866 to 1869 inclusive.

To carry out the proposed distribution of Bonuses on discharge, we recommend that the amount stopped for Fines, whether levied at Home, in the Colonies, or in India, be paid into a separate Account at the War Office; and that out of such Fund every Soldier, not being a Non-commissioned Officer, who shall be discharged in his second period of service, other than by purchase, or for misconduct, should receive, at the time of his discharge, the sum of 1*l.* for each Good Conduct Badge taken out by him, not exceeding the total sum of 3*l.*, except in the special case of a Soldier who may not for the 10 years previously to his discharge have been recorded as guilty of an act of Drunkenness, when the limit should be extended to 4*l.* if he has four Good Conduct Badges, and to 5*l.* if he has five.

Further, that each such Soldier if discharged during or at the end of his first period of Service should receive 10*s.* for each Good Conduct Badge taken out by him.

This System might commence from the 1st January, 1871, when the accumulated Fund would, we consider, be sufficient to provide this Rate for two or three years, even though the receipts should somewhat diminish; and the Rate at which the Bonus is to be given would be liable to be revised from time to time according to the amounts in hand on account of the Fund (*vide* annexed Statement C).

We would, further, recommend that on the 1st of October in each year an Account of the Fines' Fund should be published to the Army in the War Office Circulars, showing the state of the Fund,—Receipts and Expenditure,—up to the 31st of March preceding; and that the Secretary of State should then fix, and publish in the same Circular, the Rates at which the Bonuses shall be issuable, for each Good Conduct Badge, during the following year, commencing on the 1st January next ensuing.

1,849	1869	3,017
6,442		9,817
14,055 ..	Total ..	36,732

GEORGE HUTT, *Secretary.*

Royal Hospital, Chelsea,
23*rd June*, 1870.

STATEMENT C.

It appears by the accompanying Return **B**, that during the last four years 14,055 men, below the rank of Corporal, took out with them, on being discharged to Pension, 36,732 Badges, or 9,183 a-year.

Of these, 7,613 men who proceeded to Permanent Out-pension took out 26,915 Badges, being, on an average, 7 Badges for every 2 men.

As the maximum Bonus proposed by the Committee is three pounds—1*l.* each for 3 Badges—(except in special cases), it will not be necessary to estimate for the whole of this number of Badges.

Assuming that of every 100 men discharged to Permanent Pension, 70 take out 3 or more Badges, 20 take out 2 Badges, and 10 take out 1 Badge, the amount required for these Bonuses would be about 4,940*l.* per annum.

Allowing 1 in 20 to have 4 Badges, and 1 in 50 to have 5 Badges, with 10 years free from Record of drunkenness, the special Bonus would amount to about 200*l.* per annum.

To provide for the whole number of Badges taken out by men discharged to Temporary Out-pension would require 2,460*l.* per annum. To this we may add, for special Bonuses, 100*l.*

The statement in the margin of the number of men, who take their discharge at the termination of their first term of Enlistment, shows an average of about 5,000 a-year. As this number includes all men of indifferent character who, not having any Good Conduct Badge, are not allowed to re-engage, and also includes all ranks, Non-commissioned Officers as well as Privates, it would seem quite sufficient to provide for an average of one Badge only for each man. The allowance of ten shillings for each Badge will require 2,500*l.* per annum.

1865–6 ..	5,932
1866–7 ..	2,909
1867–8 ..	6,824
1868–9 ..	4,771
	20,436

On the above Estimates the following amounts would be chargeable to the Fund annually, so long as the Rates of 1*l.* and 10*s.* proposed by the Committee are maintained for the Badges of men completing their second engagement, and for those discharged at the termination of their first engagement respectively:—

	£
For Permanent Pensioners—	
Ordinary Bonuses	4,940
Special Bonuses	200
For Temporary Pensioners—	
Ordinary Bonuses	2,460
Special Bonuses	100
For Men Discharged at the termination of 1st period ..	2,500
Total	10,200
Say	£11,000

The Return **A** shows that the amount raised during the first year (eleven months), during which the System of Fines has been in operation, may be expected to exceed 16,000*l.*; and it is to be remarked that the System of Fines will have been in operation for 17 months, on 31st December, 1870, before the issue of the Bonuses will commence.

JOHN MILTON.

War Office,

June 30th, 1870.

COMMISSION.

VICTORIA R.

Victoria, by the Grace of God of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith.

To Our right trusty and well-beloved Councillor Sir George Grey, Baronet, Knight Grand Cross of Our most Honourable Order of the Bath.

To Our right trusty and well-beloved Cousin and Councillor William Reginald Earl of Devon.

To Our right trusty and well-beloved Councillor Lieutenant-General Jonathan Peel.

To Our right trusty and well-beloved Councillor George Ward Hunt, Esquire.

To Our trusty and well-beloved Sir William Milbourne James, Knight, Vice-Chancellor.

To Our trusty and well-beloved Sir James Yorke Scarlett, Knight Grand Cross of the most Honourable Order of the Bath, Lieutenant-General of Our Forces.

To Our trusty and well-beloved Thomas M. Steele, Esquire, Companion of the most Honourable Order of the Bath, Major-General in Our Army.

To Our trusty and well-beloved Samuel Whitbread, Esquire.

To Our trusty and well-beloved Philip Henry Muntz, Esquire.

Whereas it is alleged that, in those Corps in Our Army in which Regimental Promotions are made by Purchase, a practice exists of paying in respect of promotions, and of receiving in respect of retirements, sums in excess of those sanctioned by Our Royal Warrant dated the 3rd February 1866.

And whereas We have deemed it expedient that a Commission should forthwith issue to inquire into and report upon the said alleged practice, together with any incidents of the legalized purchase system which may be found to be connected with the same.

Now know Ye, that We, reposing great trust and confidence in your zeal, discretion, and ability, have authorized and appointed, and do by these Presents authorize and appoint, you the said Sir George Grey, William Reginald Earl of Devon, Jonathan Peel, George Ward Hunt, Sir William Milbourne James, Sir James Yorke Scarlett, Thomas M. Steele, Samuel Whitbread, and Philip Henry Muntz, or any Three or more of you, to be Our Commissioners for making the inquiry aforesaid. And We do hereby authorize and empower you Our said Commissioners, or any Three or more of you, to obtain information thereupon by the examination of all persons most competent by reason of their knowledge, habits, or experience, to afford it; and also by calling for all documents, papers, and records which may appear to you, or any Three or more of you, calculated to assist your researches, and to promote the formation of a sound judgment on the subject.

And We do hereby require and command you, or any Three or more of you, to report to Us, under your hands and seals, with all convenient speed:

The extent and manner in which the said practice may have been carried on.

The incidents of the practice, and the circumstances under which the person who may have paid any such sum has been accustomed to receive the like sum back on the sale of his commission, or otherwise, and the circumstances under which the sum paid has been irrecoverable.

The degree of recognition which this practice may have received from any of Our public departments or officers, and how far any statutes which now or heretofore may have prohibited the said practice, and any Royal Warrants and Regulations affecting the same, have been actually enforced.

And generally to report upon the facts of the whole case.

And We will and command, and by these Presents ordain, that this Our Commission shall continue in full force and virtue, and that you Our said Commissioners, or any Three or more of you, may from time to time proceed in the execution thereof, although the same be not continued from time to time by adjournment.

And for your assistance in the due execution of these Presents, We have made choice of Our trusty and well-beloved Ralph Henry Knox, esquire, to be Secretary to this Our Commission, and to attend you, whose service and assistance We require you to use from time to time as occasion shall require.

In witness whereof we have caused these Our Letters to be made patent.

Given at Our Court at Windsor Castle this 5th day of April 1870, and in the 33rd Year of Our Reign.

By Her Majesty's Command.

EDWARD CARDWELL.

REPORT.

On entering on the duty intrusted to us by Your Majesty we found that the subject of our inquiry had incidentally come under the notice of several former Royal Commissions, and also of Select Committees of the House of Commons, and that some evidence had been received by them bearing directly on the question referred to us.*

We have availed ourselves of this evidence, and we have also examined witnesses conversant with the practice in the army as to the sale and purchase of commissions, including several military officers, who tendered to us evidence both as to their own experience of the general practice and as to the manner in which they felt their personal interests to be affected by it.

We have also had before us copies of several papers which have been laid before the House of Commons, containing reports of a War Office committee on a portion of the evidence given before the Royal Commission on the Purchase and Sale of Commissions in 1857, and also copies of official correspondence between the War Department and the Treasury from 1857 to 1860, into which the question of the over-regulation price paid for commissions largely enters. Parl. Paper 498 of 1858, Parl. Paper 71, 114, 172 of 1st Sess. 1859. Parl. Paper 210 of 2nd Sess. 1859. Parl. Paper 88 of 1860.

We thought it expedient in the first instance to ascertain the exact state of the law on the subject of our inquiry, and the terms of Royal Warrants and regulations bearing upon it.

A memorandum was drawn up by our secretary, which will be found in the Appendix to our Report, containing a summary of the law and of the rules and regulations as to the purchase and sale of commissions which have from time to time been in force since the sale of commissions was first sanctioned by the Crown. Appendix I.

No statute law on the subject appears to have been enacted until the year 1807. But in the first regulations by which the prices of commissions were fixed by Royal authority, bearing date the 27th February $17\frac{19}{20}$, it was ordered:— Appendix I.

"That whatever officer shall desire leave to sell shall be obliged to resign his "commission at the rates and on the conditions hereafter mentioned, to which end the "seller is not to be admitted to interfere in any manner whatsoever in the recommendation of his successor;" and "every officer desiring leave to dispose of his "commission shall sign such his request, and that he is content to resign at the price "fixed, and lodge the same in the War Office, that a successor may be appointed by "His Majesty."

It will be observed that while those regulations do not contain an express prohibition of the payment of any sum in excess of the price fixed, the officer desiring to sell was required to resign at that price; and the regulations seem to have been framed with a view to prevent the introduction of a system of paying more than the price fixed by excluding the retiring officer from any interference whatever in the recommendation of his successor, whose appointment was to rest entirely with the Crown.

On a revision of the prices of commissions in 1766, by a board of general officers, a Royal Warrant was issued, bearing date the 10th February in that year, which contains the first express prohibition of the payment of any sum in excess of the regulation price. The Warrant, after reference to the report of the board, was in the following terms:—"We having been pleased to approve of the same, our will and pleasure is that "in all cases where we shall permit any of the commissions specified therein to be "sold, the sum to be paid for the same shall not exceed the prices set down in the "said report. And all colonels, agents, and others our military officers are hereby "required and directed to conform strictly and carefully to the regulation hereby laid "down and established upon pain of our highest displeasure." Appendix I.

Subsequent Royal Warrants in 1772 and 1773, approving of alterations in the prices of certain commissions, were expressed in similar terms.

Appendix II. In 1783 a general order was issued by the Commander-in-Chief, bearing date the 14th August in that year, the object of which appears to have been to enforce by more stringent rules the prohibition contained in the Royal Warrants against paying any sum in excess of the fixed prices of commissions.

It required every officer, in sending to his commanding officer his application in writing praying for His Majesty's leave to dispose of his commission at the regulated price, solemnly to declare on the word and honour of an officer and a gentleman that nothing beyond the price limited by His Majesty's regulations was stipulated or promised, directly or indirectly, and that no other mode of compensation or gratuity was in contemplation of the parties, or should be given or accepted in respect of such sale or purchase.

A similar declaration was required of the officer desiring to purchase, expressly pledging his word and honour as an officer and a gentleman that he would not, either then or at any future time, give by any means or in any shape whatever, directly or indirectly, any more than the regulated price.

The commanding officer of the regiment was further required to declare that he verily believed the established regulation with regard to price was intended to be strictly complied with, and that no clandestine bargain subsisted between the parties concerned.

The same mode was to be observed in cases of exchange from half pay to full pay, as well as of exchange from one corps to another.

The colonel or commanding officer was at the same time to transmit the names of such officers in the regiment as were willing to purchase in succession, and as he should recommend for that purpose; but when the officers recommended were not the eldest in their rank he was to signify his reasons why the senior officers were not recommended. The general order also contained the following words :—" His Majesty has by the advice " of his board of general officers been further pleased to declare his determination that " any officer who shall be found to have given or to have stipulated or promised, " directly or indirectly, to give anything beyond the regulated price, in disobedience " to these His Majesty's orders, or by any subterfuge or equivocation to have evaded " the same, and to have thereby shamefully forfeited his honour as an officer and a " gentleman, shall be dismissed from His Majesty's service."

In 1786 a circular letter, bearing date the 18th March of that year, was addressed by the Secretary at War to colonels of regiments, signifying the Royal pleasure that in future, when an officer was desirous of retiring from the service, either by sale of Appendix I. his commission or by exchange to the half pay, he should not make any stipulation in regard to the particular officer who should succeed him, but should be bound by his resignation to sell out or exchange in favour of such person as His Majesty should think fit to approve.

The reason given for this order was that it was evident that by leaving officers at liberty to select their own successors and by accepting their nominations, the business of military promotion had in too many instances been conducted in such a manner as to defeat the purposes of His Majesty's regulations, notwithstanding every endeavour of office to enforce their due and punctual observance.

No further alteration appears to have been made in the regulations till 1804, in which year two circular letters, bearing date respectively the 28th September and 19th October 1804, were addressed by order of the Commander-in-Chief, the former to army agents with reference to a secret traffic as to commissions carried on with officers of the army by persons styling themselves army brokers; the latter to commanding officers of regiments, transmitting for their information and guidance a paper containing directions to be thenceforth exactly observed in the purchase and sale of all commissions, according to His Majesty's regulations.

The following are extracts from this paper, which was signed by the Military Secretary :—" His Majesty's regulations in regard to the sums to be given and received " for commissions in the army having in various instances been disregarded, to the " great prejudice of His Majesty's service, His Royal Highness the Commander-in- " Chief is pleased to direct that when an officer is desirous of retiring from the service " and of having leave to sell his commission, he is to send in his resignation in the " usual manner through the commanding officer of his regiment to the colonel, who " in transmitting the same to the Commander-in-Chief may at the same time, if there " are purchasers in the corps, recommend in succession the seniors of their respective " ranks for purchase, both the colonel and commanding officer certifying that they " are satisfied that no more than the sum stipulated by His Majesty's regulations is " given or received." " In causing these orders to be circulated to the army the

" Commander-in-Chief thinks proper to declare that any officer who shall be found " to have given directly or indirectly anything beyond the regulated price, in dis- " obedience to His Majesty's orders, or to have attempted to evade the regulations " in any manner whatever, will be reported by the Commander-in-Chief to His " Majesty, in order that he may be removed from the service; and it is also to be " understood that the prescribed forms of application for the sale and purchase of " commissions and the usual certificates annexed thereto are in all instances to be " complied with."

Down to the year 1807 the prohibition of payments in excess of the regulated price rested entirely on Royal Warrants and regulations. In that year a clause was inserted in the Mutiny Act (47 Geo. 3. c. 32. s. 97.), which was in the following terms :—

" And whereas great inconvenience has arisen to His Majesty's service from persons, not authorised agents of regiments, troops, or companies, negotiating for the purchase and sale of commissions, and much larger sums than are allowed by His Majesty's regulations are often given and received for commissions, and great frauds committed; be it therefore enacted, that every person not an authorised agent of any regiment, troop, or company, who shall negotiate or act as agent for or in relation to the purchase or sale of any commission in His Majesty's forces, and also every authorised agent as aforesaid, who shall take, accept, or receive any commission or sum of money or reward for negotiating the purchase or sale of such commission, or acting as an agent in relation thereto, shall forfeit for every such offence the sum of one hundred pounds, and treble the sum which shall be given or received for or in relation to any such commission, over and above the sum allowed by His Majesty's regulations."

It will be seen that this enactment applied only to persons not being authorised army agents negotiating for the purchase and sale of commissions, and to persons who, being authorised army agents, should receive any commission or reward for negotiating the purchase or sale of a commission. Although the preamble of the clause stated that much larger sums than are allowed by His Majesty's regulations were often given and received for commissions, and great frauds committed, the clause contained no express prohibition of the practice in question.

In 1809 the Act of 49 Geo. 3. c. 126. was passed. It was intituled " An Act for " the further prevention of the sale and brokerage of offices." By the 1st section of that Act the provisions of the Act of 5 & 6 Edw. 6. c. 16., intituled " An Act against " buying and selling of offices," were extended to all commissions, civil, naval, or military. By the 3rd section it was made a misdemeanor to sell or buy or to bargain or agree to sell or buy a commission or any nomination thereto or resignation thereof; and by the 4th section it was made a misdemeanor to receive or to pay or to agree to receive or pay money for any negotiation relating to any nomination to or resignation of a commission. The 7th section excepted from the operation of the Act any purchase, sale, or exchange of commissions in the army for such prices as should be fixed by regulation, and any act done in relation thereto by authorised army agents acting in conformity with regulations.

The 8th section directly applied to officers in His Majesty's forces, and was in the following terms :—

" Provided also, and be it further enacted, that every officer in His Majesty's forces, who shall take, accept, or receive, or pay, or agree to pay, any larger sum of money, directly or indirectly, than what is allowed by any regulations made by His Majesty in relation to the purchase, sale, or exchange of commissions in His Majesty's forces, or who shall pay, or cause to be paid, any sum of money to any agent or broker, or other person, for negotiating the purchase or sale or exchange of any such commission, shall, on being convicted thereof by a general court-martial, forfeit his commission, and be cashiered; and as an encouragement for the detection of such practices, such commission so forfeited shall be sold, and half the regulated value (not exceeding five hundred pounds) shall be paid to the informer, and the other half, or the remainder, if more than five hundred pounds, shall go and be applied as His Majesty shall order and direct by any regulations from time to time made in that behalf: Provided also, that every person who shall sell his commission in His Majesty's forces, and not continue to hold any commission in His Majesty's forces, and shall, upon or in relation to such sale, take, accept, or receive, directly or indirectly, any money, fee, gratuity, loan of money, reward, or profit, or any promise, agreement, covenant, contract, bond, or assurance, or shall by any device or means contract or agree to receive or have any money, fee, gratuity, loan of money, reward, or profit, beyond the regulated price or value of the commission sold, and also every person who shall wilfully or knowingly aid, abet, or assist such person therein, shall be deemed and adjudged guilty of a misdemeanor within the provisions of this Act."

A general order was issued to the army, dated 29th July 1809, circulating for the information and guidance of the officers of the army an extract from this Act, consisting of a copy of the 7th and 8th sections of it. Appendix I.

In 1815 the clause first inserted, as before stated, in the Mutiny Act in 1807, was replaced by another of wider scope and effect. It was in the following terms:—

"And whereas great inconvenience has arisen to His Majesty's service from persons, not being authorised agents of regiments, troops, or companies, negotiating for the purchase, sale, and exchange of commissions in His Majesty's forces, and much larger sums than are allowed by His Majesty's regulations are often given and received for commissions, and great frauds committed: Be it therefore enacted, that every person not being an authorised agent to some regiment, troop, or company of His Majesty's forces who shall negotiate or act as agent for or in relation to the purchase, sale, or exchange of any commission in His Majesty's forces, shall forfeit for every such offence the sum of one hundred pounds. And every person, whether authorised or not, as agent to some regiment, troop, or company, who shall take, accept, or receive any commission, sum of money, or reward for any negotiation relative to the purchase, sale, or exchange of any commission in His Majesty's forces, or who shall negotiate, bargain for, or receive for his own use, or for the use of any other person or persons, any sum of money or other consideration, above the amount of the price allowed by His Majesty's regulations for the purchase, sale, or exchange of any such commission, or any sum of money or other consideration where no price shall be allowed by His Majesty's regulations, shall for every such offence forfeit the sum of one hundred pounds, and treble the value of such sum of money or other consideration as he shall negotiate, bargain for, or receive above the amount of the price allowed by His Majesty's regulations for such commissions, in such cases where any price shall be allowed by His Majesty's regulations, or treble the value of the sum or other consideration negotiated, bargained for, or taken and received in such cases in which no price shall be allowed by His Majesty's regulations."

It will be observed that the terms of this clause embrace the exchange of any commission in Her Majesty's forces which was not included in the former clause, and that they extend to the negotiation, bargaining for, or receiving by, any person, whether authorised or not as agent, *for his own use* or for the use of any other person, of any sum of money or other consideration above the amount of price allowed by His Majesty's regulations.

In 1829 this clause in the Mutiny Act was again altered to the form in which it has ever since remained, and is to be found in the Mutiny Act (clause 78) of the present year.

It is now in the following terms:—

"Every person, not being an authorised army agent, who shall negotiate or act as agent for or in relation to the purchase, sale, or exchange of any commission in Her Majesty's army, shall forfeit for every such offence the sum of one hundred pounds; and every person, whether authorised as as army agent or not, who shall receive any money or reward in respect of any such purchase, sale, or exchange, or who shall negotiate or receive for any purpose whatsoever any money or consideration where no price is allowed by Her Majesty's regulations, or any money or consideration exceeding the amount so allowed, shall forfeit one hundred pounds, and treble the value of the consideration where the commission is not allowed to be sold, or treble the excess of such consideration beyond the regular price."

While the main provisions of the clause are similar to those of the clause in the Act of 1815, the words to which we have called attention in the clause in the Act of 1815, namely, "receiving for his own use or for the use of any other person," are omitted in the existing clause.

It appeared to us doubtful whether this clause applies, as the original clause of 1807 clearly did, exclusively to agents, or whether every person, including of course officers of the Army, is within its provisions. The construction of the clause in this respect is of importance, chiefly owing to the words contained in it, "who shall negotiate "or receive for *any purpose whatsoever* any money or consideration where no price "is allowed by His Majesty's regulations."

We therefore felt it our duty to request the Secretary of State to obtain the opinion of the law officers of the Crown on its true construction. That opinion has been transmitted to us by the Secretary of State, and is to the effect that although the terms of the clause are obscure, persons acting only as agents are meant, and that the clause does not apply to officers in the Army acting as principals.

To recur to regulations authorised by Royal authority we find that in 1821 a revised scale of prices for commissions was recommended in a report from a board of general officers, and approved by His Majesty on the 1st August 1821. The only remark we have to make upon this is that the form of approval differs from that adopted in 1766, and on several occasions subsequent to that year, no Royal Warrant having been issued as before, but the approval having been given in the following form:—

"Horse Guards, 1st August 1821.

"THE accompanying report of a board of general officers proposing an increase in the price of commissions in the army and alterations in the differences between full and half pay, is most humbly submitted to Your Majesty for Your Majesty's most gracious consideration and approval."

"Approved,

(Signed) "GEORGE R.

This alteration in the form of approval may account for the omission of any repetition of the expression of the Royal will and pleasure contained in the Royal Warrants, that the sums to be paid shall not exceed the sums set down in the report, and of the direction that all officers should conform strictly and carefully to the regulation upon pain of His Majesty's highest displeasure.

It is indeed obvious that no significance is to be attached to this omission, from the fact that in January 1822 a complete collection of general regulations and orders for the army was issued, which repeated the forms of declarations required to be made by officers in the General Order of 1783, and the regulations and instructions contained in the circular letter of 19th December 1804, and which also contained the extract from the Act of 1809 which was circulated by order of the Commander-in-Chief in July of that year for the information and guidance of officers of the army.

In little more than two years, however, after the issue of these regulations and orders, an important alteration was made in them. In a debate in the House of Commons on the Mutiny Bill in March 1824, an objection was taken to the regulation requiring officers to make the declarations imposed by the General Order of 1783, and by subsequent regulations, on the ground that "there was scarcely one case in ten in "which officers received their commissions at the regulated price," and that the declarations were useless. It was admitted on the part of the Government that where officers were exposed to a temptation to which they ought not to be subject, it was desirable that the declarations should be recalled. Hans. Parl. Deb., 2nd. S. Vol. 10.

On the 2nd April following His Majesty approved a memorandum submitted to him recommending the abolition of the forms and declarations hitherto required, and the substitution of new regulations for those by which the declarations were imposed. Appendix I.

The memorandum so approved by the King concluded with the following passage:—
"It is further most humbly submitted to Your Majesty that it shall be declared that
"in all cases when the regulations shall appear to the Commander-in-Chief to have
"been infringed or evaded, the promotion or exchange shall be at once cancelled, and
"in all cases where proof can be obtained that the provisions of the Act, 49 Geo. 3.
"c. 126. and the 134th clause of the Mutiny Act have been infringed, the Com-
"mander-in-Chief will take measures for giving full effect to the penalties which
"attach to such offence."

The regulations, as altered in accordance with this memorandum, were transmitted on the 5th of the same month by the Military Secretary to the Adjutant-General to be circulated to the army.

In the year 1837 a new edition of the King's Regulations was issued, but no alteration bearing on the subject of our inquiry was made, with the exception of the omission of two rules contained in the amended regulations of 1824, the first, that "when a
"resignation was sent in it should be considered unconditional and irrevocable, and
"that no successor was to be pointed out or recommended;" the other, "that can-
"didates for the purchase of promotion out of their own corps should lodge the
"purchase money without being acquainted in what regiment they were to obtain
"the promotion, and that no application for the purchase of promotion which points
"out the expected vacancy be admitted."

No further change appears to have taken place till 1866, when the prices of commissions, which up to that time had been promulgated by general orders issued by the Commander-in-Chief, were inserted in a Royal Warrant, regulating pay and promotion in the army.

By that warrant it was ordered that in the household cavalry, foot guards (up to the rank of captain and lieut.-colonel), purchase regiments of cavalry and infantry of the line, and colonial corps, or any other purchase corps, succession to a vacancy caused by an officer permitted to retire from the service by the sale of his commission shall be given to the senior qualified officer of the next grade who shall be prepared to purchase his promotion, and so on throughout the ranks below, unless it shall appear expedient to the Secretary of State for War and the Commander-in-Chief that the vacancy shall be otherwise filled; and it was also ordered that if a vacancy should arise by the promotion of an officer to the rank of major-general, or by the death of an officer, or from any cause producing a non-purchase vacancy (except augmentation), the promotions in the several ranks necessary to fill up the vacancy should, unless it should appear expedient to the Secretary of State for War and Commander-in-Chief that the vacancy be otherwise filled, be given to the senior qualified officer of each lower rank.

Article 80 of this Warrant prescribes "the prices which may be given for commis-
"sions," but neither in the warrant itself nor in the Queen's Regulations issued in

1868, is there any express prohibition of the payment of sums in excess of the regulated prices for commissions, nor is there to be found either in the Warrant or Regulations the reference to the Act of 1809, which had been contained in all previous regulations subsequent to the passing of that Act.

The result of our inquiry on this branch of the subject is, that the payment and the receipt by officers of the Army of any sum in excess of the regulated price for the purchase, sale, or exchange of commissions is expressly prohibited by the Act of 49 Geo. 3. c. 126.

By the 8th section of that Act any officer who shall take, receive, or pay, or agree to pay any larger sum of money, directly or indirectly, than what is allowed by regulations in relation to the purchase, sale, or exchange of commissions in His Majesty's forces, is liable on conviction thereof by a general court-martial to forfeit his commission and be cashiered; and any officer who shall sell his commission, who shall upon or in relation to such sale take, accept, or receive, directly or indirectly any money, fee, gratuity, loan of money, reward, or profit, or any promise, agreement, covenant, contract, bond, or assurance, or shall by any device or means contract or agree to receive any money, fee, gratuity, loan of money, reward, or profit beyond the regulated price or value of the commission sold, and also any person who shall wilfully or knowingly aid, abet, or assist such person therein, is to be deemed and adjudged guilty of a misdemeanor.

It will be observed that the latter part of this section applies only to the sale, and not also, as the former part does, to the exchange of a commission; and that while the former part of the section subjects an officer to the forfeiture of his commission for paying or agreeing to pay, as well as receiving any sum in excess of regulation, the penalty of misdemeanor under the latter part of the clause in express terms attaches only to receiving.

On the other hand, not only the person receiving more than the regulated price of his commission, but also every person wilfully aiding, abetting, or assisting him therein, are equally to be adjudged guilty of a misdemeanor. The officer paying or agreeing to pay a sum in excess of the regulated price may probably be held to be included in these terms.

This section, moreover, being limited to the cases of the sale, purchase, and exchange of commissions, does not reach the case of the payment or receipt of money as an inducement to or in consideration of retirement on full or half pay, nor does it extend to cases of exchange between officers of the same regiment from one battalion of the regiment to another.

But a question as to the construction of the earlier sections of the Act of 49 Geo. 3. c. 126. having in a civil action come before the Court of Exchequer in 1855, the Court held that they applied to all commissions, including commissions in the army (the only exception being the sale and purchase of a commission at the regulated price), and that the resignation of a commission for a pecuniary consideration was rendered by the Act illegal and a misdemeanor. The Lord Chief Baron on that occasion said that an undertaking by an officer to give up his commission in a regiment in consideration of a sum of money promised to him for that purpose, was, in his opinion, an illegal transaction. "It is," he added, "a resignation within the 49 Geo. 3. c. 126., "which pronounces not only the sale, but also the resignation and the procuring the "resignation of any officer for money, to be illegal."

Greene *v.* Wroughton, 11 Exch. Reports, p. 146.

The Court of Common Pleas in 1862 concurred in this construction of the Act.

Eyre *v.* Forbes, Scott's C. B. Reports, p. 197.

The only other statutable enactment on the subject is the 78th clause of the Mutiny Act, which applies exclusively to persons acting as agents.

There is, therefore, at present in force no Royal Warrant or Regulation expressly prohibiting the practice in any of its forms, but the prices which may be given for commissions being fixed by the 80th section of the Royal Warrant of 1866 there is an implied prohibition in it against any larger sum being given for them, and the payment by officers of any larger sum, directly or indirectly, than what is allowed by that Warrant in relation to the purchase, sale, or exchange of commissions is expressly prohibited by the Act 49 Geo. 3. c. 126., s. 8., under very severe penalties.

The payment or receipt of money not allowed by regulation in respect of retirement where there is no sale or purchase of a commission, appears from the decisions above cited to be a misdemeanor under the provisions of the 49 Geo. 3. c. 126.

Before leaving this part of the subject it may be right to notice that while it seems to have been foreseen when the first Regulations fixing the price of commissions were framed that the only security against the payment of more than the regulated price, was the exclusion of the officer from any interference with the recommendation of his

successor, and while the circular letter of 1786 states that it was evident that by leaving officers to select their own successors, and by accepting their nominations, the business of military promotion had in too many instances been conducted in such a manner as to defeat the purposes of His Majesty's Regulations, notwithstanding every endeavour of office to enforce their due and punctual observance, the General Order of 1783 directed the Colonel or Commanding Officer of a regiment to transmit at the same time with the resignation of an officer, the names of such purchasing officers in the regiment as he should recommend, signifying his reasons if the seniors in their ranks were not recommended, and the circular letter of 19th October 1804 directed the commanding officer of a regiment in transmitting to the Commander-in-Chief the resignation of an officer to recommend at the same time in succession the seniors of the respective ranks for purchase.

By the Royal Warrant of 1866 it was expressly laid down that succession to a purchase vacancy should, as a general rule, be given to the senior qualified purchasing officer of the next grade, and that in the case of a non-purchase vacancy (except by augmentation) the promotion in the senior ranks necessary to fill up the vacancy should, as a general rule, be given to the senior qualified officer of each lower rank.

The system of regimental promotion having thus been established by Royal Warrant and Regulations an officer who retires under ordinary circumstances is necessarily informed of the officer who is to succeed him, and as the officers of the same regiment are in constant intercourse with each other an opportunity is of course given for a private bargain or arrangement.

In these transactions where one man has something of value to sell, which can legally be sold, and another man is desirous of purchasing it, the opportunity being afforded them of coming to a mutual understanding, it has been found useless, as will hereafter appear, to prescribe by law or regulation the precise terms on which the sale is to be effected.

Extent and Manner of the Practice.

We next proceeded to inquire into the extent and manner to and in which the practice of paying and receiving, in respect of promotions and retirements, sums in excess of those sanctioned by the Royal Warrant of 3rd February 1866, has been carried on, and into the incidents of that practice.

Of the existence of the practice throughout the whole of the corps in which regimental promotions are by purchase, we have received the clearest evidence. 252, 306, 1323, 1324.

We have been unable to ascertain by any direct proof when this practice began, but the language of the successive warrants, regulations, and orders to which we have referred is sufficient to show that at all events in the year 1766, and from that period to the present, the practice has been known to exist, and we have no reason to doubt that it prevailed from the time when the prices of commissions were first fixed in the year 1719–20.

Experience has shown that the most explicit prohibitions and the most stringent regulations have utterly failed to prevent or even check the practice.

We agree with the opinion expressed in the Report of the Royal Commission on Purchase and Sale of Commissions in the Army "that the regulations, although "stringently worded, with the addition of a severe penalty for their infraction, are "habitually neglected, and the price paid, except in the purchase of a first commission, "almost invariably exceeds the price fixed by authority."

There is, in fact, in the case of every commission after the first, a double value, the price fixed by regulation, and what is termed the regimental value, the latter consisting, in addition to the regulated price, of a sum varying as between the cavalry and infantry, and in some cases as between one regiment and another, both in the cavalry and infantry, but as thoroughly well known and understood, and nearly as fixed in each regiment as the regulation price.

In the brigade of household cavalry, for instance, the over-regulation price is about equal to the regulation price, making the regimental price double that which has been fixed by Royal Warrant.

In the brigade of foot guards there is a slight difference between the customary over-regulation price in the Coldstream regiment and the other two regiments, but in the latter the actual price paid for promotion by purchase from the rank of ensign and lieutenant to that of lieutenant and captain is 1,800*l.*, while the regulation price is only 850*l.*, and the over-regulation price paid for promotion by purchase from the rank of lieutenant and captain to that of captain and lieutenant-colonel is exactly equal to the regulation price, namely 2,750*l.*

We have received from Mr. C. Hammersley, representing the house of Messrs. Cox and Co., who are agents for 21 regiments of cavalry and 112 battalions of infantry, exclusive of the household cavalry and brigade of guards, the following statement, showing the regulation prices and the average over-regulation prices of commissions, both in the cavalry and infantry regiments, for which they are agents.

STATEMENT showing the Regulation Prices and Average Over-Regulation Prices in Cavalry Regiments of the Line.

——	Regulation.	Over-Regulation.	Total.
	£	£	£
Cornet - - - -	450	—	450
Lieutenant - - -	250	575	825
Captain - - - -	1,100	2,006	3,106
Major - - - -	1,400	1,600	3,000
Lieut.-Colonel - - -	1,300	1,794	3,094
	4,500	5,975	10,475

This calculation is independent of the sums recoverable from the Reserve Fund in cases where officers have paid the old cavalry rate.

STATEMENT showing the Regulation Prices and Average Over-Regulation Prices of Infantry Regiments of the Line.

——	Regulation.	Over-Regulation.	Total.
	£	£	£
Ensign - - - -	450	—	450
Lieutenant - - -	250	100	350
Captain - - - -	1,100	600	1,700
Major - - - -	1,400	800	2,200
Lieut.-Colonel - - -	1,300	1,000	2,300
	4,500	2,500	7,000

It appears from this statement that the average over-regulation price paid in the cavalry is considerably more than the regulation price, and that the aggregate average price of each commission, except the first, is consequently more than double the present regulation price.

In the infantry of the line the average over-regulation price is not so high as in the cavalry, but it amounts to about one-third of the aggregate price.

It deserves notice that the reduction made in 1860 of the price of all cavalry commissions to the same rate as that fixed by regulation for the infantry, has had no effect whatever on the amount of the over-regulation price. In the correspondence to which we referred in the beginning of our Report, between the War Department and the Treasury, the Secretary of State in a letter addressed to His Royal Highness the General Commanding-in-Chief, dated 11th November 1859, expressed a confident expectation that the reduction of the regulation price of the superior commissions in the cavalry would have the effect of causing, if not a corresponding reduction, still a very considerable reduction in what he termed the illegitimate price; while on the other hand, it was contended by the Treasury, in a letter dated 24th December 1859, that "inasmuch "as the illegitimate price of a commission is understood to be ruled not by any relation "to the authorised price, but by ordinary motives, it was difficult to be believed that "the reduction in the regulated price would lead to any corresponding fall in that "part of the aggregate price which had been added in order to bring up the payment "to the market value," and they apprehended on the contrary "that it might reasonably "be expected that, other circumstances remaining the same, the aggregate price would "remain the same, and that any depression of the regulated sum would cause an "equivalent enhancement of the rest."

Parl. Paper 88 of 1860.

Neither of these anticipations has as yet been confirmed by the result. We find that the aggregate price of the commission has been reduced by the difference between the former and the present regulation price, but that the over-regulation price continues exactly the same as before.

210, 215.

This, in our opinion, affords strong evidence of the force of the custom by which the amount of the over-regulation price is fixed.

In a few exceptional cases sums largely in excess of the customary rate have been paid for superior commissions. 265, 267.

A practice formerly existed of the purchase by an officer on full pay of a half-pay commission in the rank immediately superior to his own, the arrangement for the purchase being made between the full-pay and half-pay officer, the only condition attached to the sale being that the officer who sold his commission should settle in a colony. 1176, 1330–1332, 1334.

Large sums were in some instances given for the purchase of these commissions. The purchasing officer obtained a step of rank and afterwards was brought back to full pay by his appointment to a vacancy if he had had any distinguished service, or by an exchange with an officer on full pay, for which a bonus was given.

This practice was put a stop to in 1861. The permission to sell half-pay commissions in order to settle in a colony was at that time withdrawn, and officers on half pay who were fit for service were called upon either to serve or sell, the money for the purchase in case of sale being provided from the reserve fund. Appendix IV.

Although a system of selling half-pay promotion has to a certain extent been since re-established, the selection of the officers is now made entirely by the General Commanding-in-Chief, and the money paid for the purchase is credited to the reserve fund. As no private bargain or arrangement between a full and half pay officer is any longer possible, the officer who sells the half-pay commission can only obtain the regulation price of it. 1336.

The practice of paying to a retiring officer a sum in excess of what is allowed by regulation is not limited to the case of the sale of a commission

An officer is not allowed to sell a commission which he has not purchased, except in certain specified cases, unless he has served for 20 years on full pay. After 20 years' full-pay service an officer who may not have purchased any of his commissions is entitled to sell on the same terms as a purchasing officer. An officer who has served for more than three and less than 20 years, although he has not purchased any commission, is entitled on retirement to receive a sum equal to an allowance of 100*l.* or 50*l.* a year for every year of service, the amount depending on whether the service has been abroad or at home. 148, 149. Appendix III., sec. 84 of Warrant of 1866.

An officer retiring under these circumstances receives the amount of this allowance by regulation, and in addition to it he receives, according to the general custom, a sum equal to that which he would have received as over-regulation price if he had retired from the service by sale of his commission. 268, 270.

The amount paid in excess of the regulation price is said to have varied very little for many years, and to be perhaps rather less at present than it was before the last war. 1295, 1296.

Evidence of the extent to which the practice prevails is afforded by Mr. Hammersley's estimate of 3,577,325*l.* as the total sum at present invested by officers in their commissions in excess of the regulation price. 947, 948.

Besides the practice of paying sums in excess of the regulation prices of commissions, the practice also exists of paying a sum of money, though not authorised by any regulation, to induce an officer to retire on full or half pay, when by his retirement a step of promotion goes in the regiment, either with or without purchase. Appendix III., Warrant of March 1861, and sec. 90 of Warrant of 1866.

An officer is qualified to retire on full pay after 30 years' full-pay service, though he has not an unqualified right to do so. An officer after 25 years' full-pay service has an unqualified right to retire on half pay.

In the first case, as a general rule, the vacancy caused by the retirement is filled by promotion without purchase in the regiment. 126.

In the latter case the vacancy is, as a general rule, filled by promotion in the regiment by purchase, but the purchase money, that is the regulation price of the commission, is paid not to the retiring officer, but to the reserve fund. Appendix III., sec. 54 of Warrant of 1866.

In both cases it is the custom for the officer so retiring to receive a sum equal in amount to the sum which would have been paid to him in excess of the regulation price, if he had retired by sale of his commission. 110, 115, 303, 305, 391.

Although we are only instructed to inquire into the practice of paying in respect of promotions, and of receiving in respect of retirements, sums in excess of those sanctioned by regulation, we have received evidence as to the practice, also prohibited 234, 237.

by law, and which we find to exist generally in the army, of paying and receiving money not allowed by any regulation for an exchange of commissions.

137, 143. Such exchanges take place between officers of the guards and of the line, between officers of the cavalry and infantry, and between officers of one cavalry or infantry regiment with officers of another similar regiment.

237. In these cases no money can be legally paid or received in excess of the difference in value, if any, between the two commissions. Since the equalisation in the price of cavalry and infantry commissions this difference in the value of the commission exists only between the regiments of household cavalry and of the foot guards on the one hand and a regiment of the line on the other.

In the case of an exchange between an officer in the guards and an officer of another regiment, a sum greatly in excess of the difference in the value of the commissions is paid by the officer coming into the guards to the guards officer with whom he exchanges.

247, 251. Such exchanges are seldom allowed between officers of the rank of captain and lieutenant-colonel in the guards and a lieutenant-colonel in command of a regiment, but when they have been allowed, a very considerable sum has been paid.

Exchanges however are not infrequent between a captain in the army and a lieutenant and captain in the guards. The difference in the regulation value of the two commissions is 250*l.*, while the sum usually paid is about 2,000*l.* We had evidence of 2,500*l.* having in one instance been paid for such an exchange.

240. 841.

In other cases where there is no difference in the value of the commissions, money is paid by one officer to another in consideration of his exchanging, where from the part of the world in which a regiment is stationed, or from other circumstances, an officer is desirous of effecting an exchange.

137, 141. 988. The same thing takes place between officers exchanging from one battalion of the same regiment to another, and between officers in the Royal Artillery from one station to another, though as there is no exchange of commissions in such cases, the provisions of the law do not appear to be violated.

The practice of paying money to an officer as an inducement to retire, where no sale of the commission takes place, and that of paying money not allowed by regulation in the case of exchanges, are not necessarily connected with the purchase system. They, in fact, prevail to a great extent in corps in which promotion is by seniority and without purchase.

254, 255. In the regiments added to the service on the amalgamation of the East India Company's army with that of the Queen's, and in which promotion is by seniority without purchase, the system prevails which formerly existed in the East India Company's army of buying out an officer or paying him a sum to induce him to retire.

1366–1392. In a recent case of the retirement of the senior major of one of the three non-purchase cavalry regiments the major received, in addition to the pension to which from length of service he was entitled from the East India Company, a sum of 3,500*l.*, made up by contributions from the officers junior to him in the regiment.

This sum is not paid, as in purchase corps, by those officers only who gain a step of rank by the retirement, but by all the officers who are willing to contribute, according to a scale of payments calculated with reference to the advantage gained by each officer from the retirement. In the event of any officer being unable or refusing to pay his share, the deficiency is made up by the other officers in proportion to their original payments.

1399. In the case also of exchange between officers of a purchase corps and officers of one of these non-purchase corps large sums are sometimes paid.

1402, 1405. In one instance in the same cavalry regiment 2,500*l.* was paid by a captain exchanging from that regiment to a captain who exchanged with him from a purchase cavalry corps, and 1,000*l.* was paid by a lieutenant for a similar exchange.

983, 363. The reason assigned for no such practice existing in the corps of Engineers or in the Royal Artillery is the magnitude of the corps, and the employment of the officers in stations widely separated, which interferes with anything like a private arrangement.

955, 959, 969. With a view, however, to accelerate promotion in the Royal Artillery a proposal was made about four years ago to establish a system of payments by each officer on his promotion, in order to create a fund to be applied in the payment of a bonus to induce officers to retire.

971. This proposal was assented to by a large number of officers, but has not as yet been acted on, owing to the expectation of more liberal terms of retirement than those hitherto offered being proposed by the Government.

The proposal itself was made publicly by an officer of high rank and with the full knowledge of the military authorities. 976.

We found some difficulty in ascertaining the precise manner in which payments in excess of the regulation price of commissions are made. Mr. Hammersley, though he showed every disposition to give us the fullest information which he could give, without compromising individual officers, or the house which he represented, naturally showed some reserve as to the manner in which the over-regulation price is paid. He admitted, however, that although the arrangements need not be, and in fact were not, made through the agents, as such, the over-regulation payment in the case of regiments for which they were agents was generally made through their house, though not entered in the same account with the amount lodged for the regulation price. 180, 181, 182.

It appears, in fact, to be made by the agents acting as private bankers, with no explanation asked or given of the purpose for which the money is paid, though they cannot fail to draw their own conclusions. 182.

Colonel Hardinge informed us that he believed the over-regulation price in the guards was invariably paid through the agents. 1256.

The over-regulation price is usually not paid until the promotion is gazetted, but the arrangements for the payment of it are made beforehand. In some cases very careful officers will not send in their papers till the extra money is lodged or a guarantee given for its payment, but this is said to be rather an unusual case of caution. 1298, 1299.

The over-regulation price in purchase regiments, like the regulation price, is paid by the respective officers who gain a step of promotion, but the proportion in which it is paid is not always the same as that in which the regulation price is paid. The proportion is said to vary a good deal in different regiments, and it is commonly the case that a richer officer pays more than his share. 204, 922. 232.

Incidents of the Practice.

The following appear to us to be the chief incidents of the practice:—

There can be no doubt that the high prices to which commissions are raised by this practice press with great severity on the less wealthy officers, who are in consequence frequently placed in a painful and invidious position. 71, 72.

No officer who is prepared to pay the regulation price for a commission can be passed over by a junior officer, but if he is unable to pay the additional price usually paid in the regiment, he must either borrow the money at serious inconvenience to himself, and probably at a high rate of interest, or withdraw his name from the list of purchasing officers, allowing a junior officer to pass over his head, or he must stop the promotion in the regiment. 58, 59.

In the latter case it is admitted, that except perhaps in the case of officers of long service, who are known to have very limited means, the position of the officer in the regiment becomes scarcely tolerable. 88, 225, 232, 100, &c.

The late General Sir John Macdonald, when Adjutant-general of the Army, in his evidence before the Royal Commission on Naval and Military Promotion and Retirement in 1838, said, "there is no member of a regimental society so unpopular as he who "proclaims his determination not to exceed the regulated price, thereby standing as an "obstacle to promotion by purchase in the regiment to which he belongs." Naval and Military Promotion Commission, 1840. Quest. 1912, 1924.

It is true that he also said, that "if an officer should make himself obnoxious on "that account, and that great unpopularity might attach to him, he having strictly "adhered to the regulation, and insisting on his right, is invariably supported by "the Commander-in-Chief."

The military secretary to His Royal Highness the General Commanding-in-Chief has informed us of what we cannot doubt, that the same course would now be adopted; but he has at the same time stated that no instance has occurred within his experience of an officer appealing to the Commander-in-Chief under such circumstances; nor can we be surprised that such should be the case. Every officer who enters the army in a purchase corps feels himself under an honourable, though tacit engagement to conform to the established custom of the regiment in respect of promotion and retirement, and if he were to endeavour to resist it, and were to appeal for support in so doing to the Commander-in-Chief, the inevitable result would be the destruction of the mutual confidence and good feeling between him and his brother officers, the maintenance of which is essential to the character, order, and efficiency of a regiment. 459, &c.

Another incident of the practice, is the great pecuniary advantage it confers on non-purchasing officers if they desire to retire from the army.

268, &c. We have mentioned above the rule by which an officer who has not purchased any one of his commissions, is entitled after 20 years' service to retire by sale of his commission on the same terms with officers who have purchased, and also the rule by which a non-purchasing officer, who has not served 20 years, on retiring after three years' service receives a regulated allowance according to his length of service.

In the first of these cases the retiring officer receives the full regimental value of his commission, including the usual over-regulation price; and in the latter he receives by custom, in addition to the regulated allowance, a sum equal to the usual amount of over-regulation price.

The officer thus in both cases carries with him on retirement a considerable and in some cases a large sum of money, which is an absolute gain to him, as he has not incurred any previous expenditure in respect of it.

Another incident of the practice is its effect in accelerating promotion.

One chief advantage of the purchase system is said to be that it facilitates the retirement of officers, and thereby accelerates promotion in the army. We believe that this result is in great measure due to the practice of paying more than the regulation price, and that if it were possible to restrict the sum payable to an officer for his commission on retirement to the regulation price, and to prevent any sum being paid to a retiring officer when nothing is allowed by regulation, there would be less inducement to officers to retire, and promotion would in consequence be slower than it is at present.

This incident of the practice is, though not in an equal degree, advantageous to the non-purchasing as well as the purchasing officer, as the more rapid the promotion in a regiment the greater are the chances of a non-purchasing officer obtaining a step of promotion.

1495. There is reason to believe that the advancement of a non-purchasing officer in a purchase regiment is quicker than that of an officer in a non-purchase corps, owing to the slower general rate of promotion in the latter.

Another incident of the practice should be noticed, though not of frequent occurrence.

508, &c. It is said that there have been cases in which an officer, not being able to obtain in his own regiment the price he required for his commission, has exchanged with a view to sale into another regiment where he knew he could obtain it. The effect of this would be to prevent the step caused by his subsequent retirement going by promotion in his former regiment.

No such exchange would be sanctioned by the Secretary of State or the Commander-in-Chief if he was aware of the object of it, and we are informed by the military secretary that with a view to check any such proceeding, applications from officers, soon after exchanging from one regiment to another, to sell their commissions, has in several instances been refused.

508. The usual practice is stated by him to be, that officers who exchange must serve for not less than six months in their respective regiments, but it is doubtful whether this time is sufficiently long to secure the object.

Another and not the least important incident of the practice is the habitual violation of the law by officers of all ranks under that of major-general, supported by long-established custom and unchecked by any authority.

There appears indeed to be no feeling of obligation to obey the law.

Mr. Hammersley, whose experience as an army agent extends over 30 years,

225. informed us that, although it often happened that officers refused to pay any excess on the regulation price, he had never heard of a difficulty as to such payment arising from

296. a scruple as to violating the Regulations or the law, the thing being so thoroughly understood and so common.

759, &c. One case only has been stated to us in which a refusal to pay more than the regulation price was alleged to be on principle. The objection in that case was made not by the officer himself, but by his father, who, though able to do so, refused to supply his son with the means of paying more than the regulation price.

In this case the money required to make up the deficiency was advanced to the officer as a loan by other officers of the regiment.

1562, &c. Another case of a refusal to pay more than the regulation price was brought before us in the evidence of Mr. Wood. This gentleman refused on behalf both of his son and

of his ward, who were subalterns in two cavalry regiments, to pay the over-regulation price which was demanded in the one case for a lieutenancy, in the other for a troop.

In the first case, the lieutenancy was purchased, though unknown to him, at a price beyond the regulation, the means having been procured from some other source. In the other case, the officer being prepared to pay the regulation price for his troop, no junior subaltern could purchase over his head, but two purchase vacancies for troops in the regiment having occurred, they were both filled by officers brought in one from the Military Train, the other from an infantry regiment, receiving each of them from the Reserve Fund the difference between the cavalry and infantry prices, namely 1,245*l.* 1587.

This refusal, which occurred ten years ago, was founded not on an objection to violate the law, but on an apprehension from circumstances which had then recently occurred that it was the intention of the Government to enforce the provisions of the law in the case of such payments. 1606.

On this apprehension being removed, the refusal was withdrawn, and the over-regulation price was paid for a troop, but not until the officer had lost about two years rank, promotion in the regiment having during that time been stopped. 1605. 1607. 1591.

As the facts of this case were brought fully to the knowledge of the War Department, we shall have occasion to refer to it again, as to its bearing on the question of the recognition of the practice.

THE CIRCUMSTANCES UNDER WHICH THE PERSON WHO MAY HAVE PAID ANY SUCH SUM HAS BEEN ACCUSTOMED TO RECEIVE THE LIKE SUM BACK AGAIN ON THE SALE OF HIS COMMISSION OR OTHERWISE, AND THE CIRCUMSTANCES UNDER WHICH THE SUM PAID HAS BEEN IRRECOVERABLE.

From what has been said as to the extent and manner of the practice, it is obvious that the sum paid by an officer on his promotion in excess of the regulation price is by the general custom of the army received back again by the officer, either on his promotion by purchase to a higher grade, or on his voluntary retirement while still holding a commission which is saleable. But the risk incurred of the loss of the money so paid will be seen to be great when we state the circumstances under which it is lost or is irrecoverable.

First, there is the case of death.

If an officer dies while holding a commission which he has purchased, the whole of what he has paid, whether according to regulation or in excess of it, is absolutely lost to his family. The only exception is the case of an officer killed in action or dying within six months of wounds received in face of the enemy. 107, 386.

By a Royal Warrant issued in 1856, the families of such officers are entitled under the circumstances therein mentioned to receive a sum equal to, but in no case exceeding the regulation price actually paid by the officer for the purchase of his commission or commissions. 387.

In this, however, as in other cases of death, all sums paid by the officer in excess of the regulation price are absolutely lost.

The next case is that of dismissal from the army, which involves the loss of all that an officer has paid for his commission.

If an officer, instead of being dismissed, is compelled to retire from the service, but is allowed to do so by the sale of his commission, he only receives the regulation price and loses whatever he may have paid in excess of it. The retirement being compulsory there is of course no opportunity for making a bargain, and the other officers of the regiment have no interest in paying him anything beyond the regulation price.

It is stated on good authority that there may have been instances where even under these circumstances the other officers concerned have been induced to make some arrangement for the profit of the retiring officer instead of taking advantage of it themselves. 514.

A vacancy caused by such compulsory retirement, however, is in many cases filled by an officer selected by the Commander-in-Chief from another regiment.

Another case in which the whole sum which has been paid for a commission or commissions is irrecoverable is that of the promotion of an officer to the rank of major-

509, 510. general on the fixed establishment. After such promotion he cannot recover back any portion of what he may have paid for his commissions.

430, 435. Another case in which the sum paid in excess of the regulation price of commissions may be irrecoverable, is that of a reduction in the establishment of a regiment.

1173. This may be effected either by placing the officers affected by the reduction on temporary half pay or by retaining them as supernumeraries of their respective grades with a view to the absorption of the commissions on the occurrence of vacancies.

1175. In the first case the officer placed on temporary half pay, though he may have purchased his commissions, is unable to recover any portion of what he has paid until he has got back again into a regiment on full pay.

In this case the power of recovering what he has paid may more correctly be said to be in suspense than to be lost, but the risk of absolute loss is of course increased by the inability of the officer while on half pay to realise what he has paid.

If moreover, as is usually the case, he can only get back on full pay by means of an exchange, he has to pay a large sum, though not allowed by any regulation, to the officer with whom he exchanges. This sum in the event of his subsequent retirement or promotion is irrecoverable, as it would not be taken into account in the amount he would, by custom, in that case receive.

In the case of the retention of officers as supernumeraries with a view to absorption, a different result follows.

This will best be shown by a reference to reductions recently made and to those now in progress.

1620, 1621. In 1866 in order to effect a certain reduction in the establishment of regiments of the line, every alternate vacancy, whether purchase or non-purchase, in the grade affected by the reduction was absorbed, the other vacancy only being filled up in the usual way by promotion in the regiment.

1633. In the event of the absorption of a purchase vacancy, the officer retiring by the sale of his commission obtains only the regulation price for it, which is paid to him from the Reserve Fund.

1010. In consequence of the recent decision to reduce cavalry regiments by one troop, and infantry regiments to ten companies, a large number of officers in different regiments are supernumeraries; and in order to indicate this their names are inserted in the Army List in italics. This is so with the second majors, one captain, and two subalterns of the cavalry regiments, and with two captains and several subalterns in the infantry regiments of the line affected by the reduction.

1012, 1024. In respect of these officers the course at present adopted is that in the event of a purchase vacancy occurring in the regiment the promotion goes in the usual way, the effect of which is that the retiring officer, though there may be one or more supernumerary officers in his grade, is succeeded on the usual terms by the senior purchasing officer of the grade next below and receives the full regimental value of his commission, and so on throughout the regiment, the absorption and consequent reduction being effected by filling up only every alternate vacancy in the junior ranks so long as there are any supernumerary officers in those ranks.

1636. When the subalterns are reduced to the future establishment, it is intended that
1025, 1066. the absorption shall take place in the higher ranks.

1153. In the case, however, of an officer retiring on permanent half pay, where there is a supernumerary of his rank the vacancy, though usually filled by purchase, is now absorbed.

1069, 1073. In the case of non-purchase vacancies, every alternate vacancy only is filled up by promotion in the regiment, the other being absorbed in the highest rank affected by the vacancy in which there is a supernumerary officer.

In the event therefore of an officer retiring where the vacancy according to this rule is absorbed instead of being filled by promotion, he does not receive, in addition to the regulation price of his commission, the customary payment made to an officer on retiring, as no officer succeeds him. If he has obtained his commission by purchase he loses the sum which he may have paid in excess of the regulation price. If he has obtained his commission without purchase he equally loses the sum usually paid to an officer on retirement in excess of any allowance to which he is entitled by regulation.

Appendix VI. We have inserted in the Appendix a return obtained from the Horse Guards of the number of full pay commissions in purchase corps, which have been absorbed during the last five years, distinguishing purchase and non-purchase vacancies.

The brigade of foot guards is not affected by the general reduction now in progress in the army. Each battalion of guards consists only of ten companies, and as no

reduction is made in the number of these companies, there are no supernumerary captains or subalterns.

But it was decided in the early part of the year 1869 that a reduction should be made in the number of field officers in each regiment of guards, and that for this purpose the lieutenant-colonel in each of the three regiments should in addition to his other duties assume the command of one of the battalions, one of the mounted officers or majors being gradually reduced. Col. Hardinge's evidence.

In the regiment of Grenadier Guards this arrangement took place on the promotion of Prince Edward of Saxe Weimar to be major-general, which left a vacancy in the command of one of the battalions of that regiment. The lieutenant-colonel of the regiment took the command of the vacant battalion in addition to that of the regiment, and the vacancy in the rank of major was not filled up.

There has as yet been no opportunity of effecting the same arrangement in the other two regiments, and the case of the two officers, Colonel Stephenson and Colonel Hardinge, commanding respectively the regiments of Fusilier and Coldstream Guards, has been specially brought before us with reference to the manner in which their pecuniary interests are affected by the proposed reduction.

In each of these regiments the junior major has become a supernumerary, and in the event of a vacancy occurring by the retirement of either of the three field officers, the vacancy would not be filled up, but would be absorbed.

Colonel Stephenson and Colonel Hardinge might either of them retire by sale of his commission as captain and lieutenant-colonel in the regiment. They have also, each having served 25 years on full pay, an unqualified right to retire on half pay. Had they chosen to adopt either course before the present reduction had been decided on, they would have received in the first instance what is termed the full regimental value of their commissions, amounting in the case of Colonel Stephenson to 8,500*l.*, and in the case of Colonel Hardinge to 8,200*l.*, being an excess in the first case above the regulation price of 3,700*l.* and in the second case of 3,400*l.*

In the event of their having exercised the right to retire on half pay, they would have received a sum equal to the difference between the regimental value and the regulation price of their commission, as a step of promotion would have gone in the regiment.

Under present circumstances, as on the occurence of a vacancy in one of the three higher commissions, no promotion would take place in the regiment, they would on retirement, either by sale or on half pay, lose the sum representing the over-regulation price customarily paid, as it would not be the interest of any officer to pay it.

In the event of either of these officers retiring by the sale of his commission, the Secretary of State has offered to pay him the regulated price from the reserve fund. Parl. Paper 165 of 1870.

The proposed reduction in the Guards affects these officers in a greater degree than the reduction affects officers in other regiments, to this extent, viz., that in the event of an officer in another regiment retiring by sale of his commission, promotion at present goes in the regiment, and the full regimental value of his commissions is obtained, so long as the absorption can take place in the junior ranks, whereas in the Guards the regulation price only would be received.

In the event of a retirement on half pay, there appears to be no distinction, as in neither case would the promotion go in the regiment.

But as the reduction in other regiments only affects officers in the cavalry below the rank of lieutenant-colonel, and in the infantry below the rank of major, there are probably very few, if any, of them who are entitled from length of service to retire on half pay.

We have stated the case of these two officers in detail, as it affords an instance of special circumstances, affecting their regiments only, under which an officer may be deprived of what he would under ordinary circumstances have received on retirement by sale of his commission or on half pay. 839, 841.

Until a vacancy takes place which would remove one of the field officers in these regiments, the interests of each of the mounted officers are affected in a similar manner. 853, 859, 889, 865.

In considering the circumstances under which the sum paid is irrecoverable, we must not omit to advert to the effect of a war on the price of commissions.

Nearly all that we have hitherto said must be understood to relate to the ordinary practice in time of peace. In time of war no officer belonging to a regiment actually in the field, or liable to be ordered to join the army in the field, is at liberty to retire, except under very special circumstances. In such regiments, therefore, retirement by 904, 905.

sale or on half pay is practically suspended; and where such retirement is permitted, owing to ill-health or any special circumstance, the retirement can scarcely be said to be voluntary, and the retiring officer would either receive nothing beyond the regulation price, or if the officer succeeding him should be induced by an honourable feeling not to take full advantage of the necessity in which the retiring officer was placed, the amount paid in excess of the regulation price would be depreciated.

Such was the case in the Guards, and no doubt in other regiments also, during the last war, but when peace was about to be made the former practice revived.

As a set-off, however, against the loss incurred by officers who have purchased their commissions, owing to their becoming unsaleable during a war, the greatly increased chances of promotion without purchase must be taken into account.

There are many officers who during the last war obtained promotion without purchase through the numerous casualties which occurred, and who have since realised, or are now able to realise, through length of service, the full regimental value of their commissions.

It is scarcely necessary to add that in the exceptional cases of unusually large sums, or what are termed "fancy prices," being given for commissions, the amount in excess of the ordinary over-regulation price cannot be reckoned on as recoverable.

Degree of Recognition which the Practice may have received.

We now come to the consideration of the last and most important branch of our inquiry, "the degree of recognition which the practice may have received from any "public departments or officers, and how far any statutes which now or heretofore "have prohibited the practice, and any Royal Warrants and Regulations affecting the "same have been actually enforced."

If by recognition is to be understood, "express sanction or approval," we have at once to say that we do not find that the practice has received any formal or official recognition.

79, 85, 448, 449. In the evidence given by official persons before former commissions and committees when the practice in question has incidentally formed the subject of examination as well as in the evidence of the same character which we have received, while the existence of the practice has been generally admitted as notorious, all official knowledge of it has been explicitly denied.

182, 449. On the one hand care is taken by the parties concerned that the payments are made in a manner to make any legal proof of them difficult, if not impossible.

452. On the other hand the military authorities appear to have uniformly acted on the principle that in the absence of strict legal proof of a violation of the law or regulations, they might claim to be regarded as ignorant of the practice, and in no degree responsible for its continuance.

We cannot limit our view to this narrow sense of the term "recognition."

We have felt it our duty to inquire whether the practice has received any degree of recognition, tacit or implied, from public departments or officers.

With this object we turn first to the inquiry how far the law or regulations prohibiting the practice have been actually enforced.

We have been unable to ascertain a single case in which an attempt has been made to enforce the provisions of the Act of 49 Geo. 3. c. 126., in respect of the payment of a sum in excess of the regulation price for the purchase, sale, or exchange of a commission, or for paying or receiving money for a resignation.

Neither have we found any instance in which a person, whether authorised or not as an army agent, has been subjected to a prosecution under that Act, or the Mutiny Act, for the offence of negotiating or being a party to such a transaction.

1642. The Solicitor to the War Department who has held that office for the last 12 years, has informed us that there has been no such prosecution in his time, and that the Solicitor to the Treasury, who formerly acted in those matters, has made a diligent search through his books without being able to find a trace of any such prosecution.

1653, 1654. Nor has the Solicitor to the War Department ever been instructed to ascertain whether there were materials for a prosecution in a case where over-regulation price was suspected to have been paid, or to investigate a case of that kind.

539, 540. The military secretary to the Commander-in-Chief recollects no instance in which proceedings have been taken to enforce the regulations which until 1868 prohibited the payment of over-regulation prices; and Mr. Hammersley says that he has known no instance of interference with the practice on the part of any authority.

The only two cases of which we have been able to find any record of interference on the part of the Commander-in-Chief for the purpose of enforcing the regulations occurred, the one in 1833 the other in 1834.

It is a significant fact as showing the prevailing feeling in the army on this subject, that in each of those cases the transaction was brought to the knowledge of the Commander-in-Chief, not by a complaint addressed to him of a violation of the law or regulations, but by a complaint of the non-fulfilment of the bargain or engagements made by an officer to pay money in excess of the regulation price.

In the first case the commanding officer of a regiment having signified his willingness to retire on a sum of 500*l.* beyond the regulation price being secured to him, the senior captain, lieutenant, and ensign agreed to make up this sum between them. After the retirement of the commanding officer the captain who obtained the majority refused to pay his share of the 500*l.* The promotions of all three officers were gazetted. 550 and following. 1107.

A complaint under these circumstances against the captain for refusing to fulfil his engagement appears to have been officially transmitted to the Commander-in-Chief through the major-general commanding on the station. 1133.

The Commander-in-Chief in his reply to the major-general, dated the 12th July 1833, after expressing his deep regret that "so gross an instance of irregularity should "have been brought under his notice" said, he felt at once the necessity of vindicating the rules and regulations of the service, and after consulting the Judge Advocate-General announced his intention to submit to His Majesty that the appointments of all the three officers should be cancelled, and that they should revert to their former commissions. 1195.

The appointments were accordingly cancelled, but not until the Gazette of the 13th September 1833. Another captain in the regiment having in the meantime retired, the promotions of the lieutenant and ensign to a company and lieutenancy appeared in the Gazette of the 27th of the same month. 563, 1134.

Those two officers, therefore, suffered comparatively little loss, while the only officer who materially suffered was the captain who had refused to fulfil his agreement, his commission as major having been cancelled, and the vacant majority filled up by an officer brought in from another regiment. 1106.

In the second case the complaint was preferred by a captain, after his retirement against the officer who had succeeded him, and who had not fulfilled his bargain to pay him 400*l.* beyond the regulation price.

The officer against whom the complaint was made was punished by being deprived of one year's rank in the Army, his commission as captain being dated the 6th July 1833, instead of the 6th July 1832.

The officer who made the complaint having quitted the Army, was no longer subject to the jurisdiction of the Commander-in-Chief, but he might have been indicted for a misdemeanor under the 49 Geo. 3. c. 126. We do not find that any such proceeding was taken against him.

As, however, since his retirement he had obtained the appointment of adjutant to a regiment of Militia, the facts of the case were brought by the Commander-in-Chief to the knowledge of the Secretary of State for the Home Department, under whom at that time the Militia was placed, and a correspondence with reference to the case took place between the Horse Guards and the Home Office, which will be found in the Appendix. The result was that practically the officer escaped with impunity. Appendix VIII.

These are probably the cases referred to by Sir John Macdonald in his evidence given before the Royal Commission on Naval and Military Promotion, in 1838, as proof that the practice had received no sanction at the Horse Guards.

We think it must have occurred to the officers concerned as well as to other officers to whom those proceedings were known, that the offence of agreeing to pay or receive more than the regulation price for a commission was not regarded as a very grave one by the military authorities, and that the officers likely to incur serious displeasure were those, who in addition to a breach of the regulations failed to fulfil an engagement of honour, though involving a violation of the law.

Passing from the inquiry as to how far the Law and any Royal Warrants and Regulations affecting the practice have been enforced, we proceed to consider the effect of the evidence before us, both oral and documentary, as affording an indication of the view taken of the practice by public departments and officers.

The first document to which we have to refer as evidence of the opinion of one of the highest military authorities, is a memorandum prepared by the Duke of Wellington Appendix VII.

for the Select Committee of the House of Commons on Army and Navy Appointments, in 1833, an extract from which we have placed in our Appendix.

It appears to us from the terms of this memorandum not only that the extensive prevalence of the practice of paying more than the regulation price for commissions was well known to the Duke, but that he thought the fact of such payments gave an officer an equitable claim to favourable consideration in fixing the amount of his pay.

Purchase Commission of 1857, 1794.

Again, the evidence given in 1856 by the late General Sir George Brown, before the Royal Commission on Purchase, tends to show the view taken of this question by a distinguished officer, who although not then holding any official position, had for 11 years held in succession the offices of Deputy-Adjutant-General and Adjutant-General of the Army.

Having spoken of the great outcry about officers giving more than the regulation price for commissions, Sir G. Brown defended the practice as one in which the public was not concerned, adding "it is rather an advantage; for an officer gets a better "inducement to quit, and it clears the way for the younger men who are coming up."

On being asked whether he thought it a consistent thing for a permanent system to exist under which an officer virtually succeeds to a commission by purchase in hardly any case without its being known privately that he has been violating the law, Sir G. Brown answered, "There is no law against it now; they never enforce the certificate "now."

Notwithstanding his long experience at the Horse Guards, he appears not even to have borne in mind the provisions of the Act of 49 Geo. 3. c. 126., so completely had they been considered as having no practical obligation.

Earl Grey was examined before the same Commission, and we refer to his evidence as bearing on this part of our inquiry, inasmuch as although Lord Grey did not at that time hold any office, he had previously held in succession for a considerable time the offices of Secretary at War and of Secretary of State for War and the Colonies. His opinion, therefore, could scarcely fail to have an influence on the minds of officers of the Army in judging of the view taken of the practice in question by public departments and officers.

Purchase Commission of 1857, 4046 and following.

Lord Grey considered that the abolition of the declaration formerly required of officers coupled with the habitual violation for many years of the then existing regulations, with the full knowledge of the military authorities and with no attempt to stop it, amounted to a virtual sanction of the practice,—and that if any new regulation was made for the good of the service affecting the value of the commissions, the vested interests established under the existing system were entitled to consideration.

We have inserted in an Appendix an extract from the evidence given by His Royal Highness the Duke of Cambridge on this subject before the Select Committee on Military Organisation in 1859.

Appendix IX.

We invite attention to that evidence, not only as proving the absence of any official knowledge on the part of His Royal Highness of the practice, but also as showing his opinion of the hopelessness of any attempt to check it by authority, although notoriously prevalent throughout the Army.

Parl. Paper 88 of 1860, p. 2.

A similar opinion was expressed by His Royal Highness in the official correspondence to which we have before referred between the War Departments and the Treasury. In reply to a request from the Secretary of State to be informed of the nature of the regulations which His Royal Highness would suggest for strictly enforcing the provisions of the Act of 49 Geo. 3. c. 126. He replied on the 12th July 1859, that the provisions of the enactment in question were as stringent as could be desired, and that he would be ready to carry them into effect in any case where the infringement of them should be brought to his knowledge, but that he was not prepared to adopt any additional regulations on the subject.

In a letter, forming part of the same correspondence, addressed by the War Department to the Treasury on the 23rd January 1860, the Secretary of State adverted to the distinction between moral and legal evidence, and expressed the following opinion:—

P. 11.

"The moral certainty which would justify the Commander-in-Chief in taking such a step as that of bringing in an officer from another regiment to purchase at the regulation price (a step which, though somewhat unusual, by no means exceeds the undoubted prerogative of the Commander-in-Chief), might yet be totally insufficient to bring forward as legal evidence of facts which called for the interposition of the law. The well-known difficulty of furnishing evidence in a court of law sufficient to prove the commission of even the simplest facts, would extend in an exaggerated degree to a transaction so secretly and confidentially conducted as the sale of a commission at an illegitimate price. At the same time, though it might be impossible to find legal evidence of the contravention of the law, it would be within the power of the Commander-in-Chief to obtain satisfactory information of the

fact, affording that moral certainty which in all practical matters is sufficient to act upon, and which would justify His Royal Highness in taking steps to prevent the completion of an illegitimate bargain. Notoriety affords sufficient ground for taking measures beforehand to defeat an improper negotiation, though it may fail to furnish the legal evidence which would be necessary to bring home to an offender the commission of an illegal act."

We have been informed by the Military Secretary that the Commander-in-Chief has never obtained that moral certainty which would authorise him to interfere to prevent the completion of a transaction of this illegal character, and that no step therefore of the kind suggested by the Secretary of State has been taken by him. 452.

It may be observed with reference to this correspondence, which applies only to one branch of the service, that the practice of paying large sums in excess of the regulation prices of cavalry commissions is throughout assumed as notorious, and that the Secretary of State, anxious as he evidently was to apply a remedy to the evil, does not seem to have contemplated the possibility of its absolute extinction, or to have hoped to effect more than a considerable diminution of it.

The circumstances stated in the evidence of Mr. Wood, and the communications which took place between him and the War Department with respect to his refusal (to which we have before adverted) to pay more than the regulation price for the promotion of his ward, appear to us sufficient to warrant the belief on which he subsequently acted that he should incur no penal consequences by paying the over-regulation price. 1602, 1603, 1604, 1605. 1616. 1605.

The two reports from a War Office Committee which we have had before us are not without some importance as bearing on this question. Parl. Papers, 498, of 1858, and 172, of 1859.

In the first of these reports the Committee, composed exclusively of official gentlemen connected with the War Department, prepared certain tables computed at the regulated prices of commissions, stating at the same time what the effect would have been "had "the prices notoriously current been taken into calculation;" and in a paper appended to that report, drawn up by the late Sir Alex. Tulloch, who was a member of the Committee, the practice of running up the prices of commissions to a great excess beyond the regulations is adverted to at some length. Sir A. Tulloch in that paper suggests that every vacant step arising from the sale of a commission should be filled not by succession in the regiment, but by some of the officers who are seniors for purchase in the Army, adding, "The immediate results of such an arrangement would "be that the retiring officer not knowing who was likely to be his successor could "make no bargain for any sum above the regulation price."

In the second of these reports the Committee in answer to a complaint that they had omitted to take into calculation the prices beyond the regulation said to be currently given for commissions, answered that it would ill become them as members of a public military department to put forward an estimate of the sum which the public would have to pay as reward or compensation to those who for their own convenience, or their own interests, had deliberately violated one of the most positive and stringent enactments in the statute book. They added, however, "There is no probability that "legislation can put a stop to such practices so long as promotion regimentally con- "tinues. No enactment could be more stringent than the Act of 49 Geo. 3. c. 126. s. 8., "which even awards 500*l.* to the informer in any case where an extra price has been "given, and yet this immense reward, open to any one who chooses to claim it, has "not had the slightest effect, and certificates on honour that the sale has been con- "ducted on regulation principles were so commonly evaded as to be altogether "discontinued of late years."

His Royal Highness the Duke of Cambridge, in his evidence before the Royal Commission on Purchase, in 1857, expressed a similar opinion as to the impossibility, even if the purchase system were abolished, of preventing an underhand system of purchase and sale if regimental promotion continued. Purchase Commission of 1857, 4250, 4252.

There appears to have been a general conviction that so long as regimental promotion continues no effectual means could be adopted for putting a stop to this practice, and the attempt to deter officers from being parties to it by prohibitory regulations in addition to the statutory enactments having signally failed, was at length abandoned by the omission, which we have before noticed, both from the Royal Warrant of 1866 and the Queen's Regulations of 1868, of the prohibition of the practice, and of the reference to the Act of 49 Geo. 3. c. 126., which had been contained in former Regulations.

Different reasons were assigned to us for this omission. The Under Secretary of State for War speaking, however, only as to his belief and from what he had heard, said that the omission was owing to the Secretary of State considering that a Royal Warrant should not quote an Act of Parliament. According to the opinion of the 46, 47.

Military Secretary to the General Commanding-in-Chief, the reason of the omission was
488, &c. because it was believed that the rule as it then existed was constantly evaded; that the Act of 1809 was in fact obsolete, and that it was therefore no longer expedient to call the attention of officers to it in the Queen's Regulations.

The effect of the omission in any case could not fail to strengthen the impression that no official interference with the practice would take place.

Mr. Hammersley declined to answer the question whether during his 30 years' experience as an army agent he had ever heard of over-regulation prices being paid by
326. members of the family of persons who have been in authority at the War Office or Horse Guards.

The Military Secretary to the Commander-in-Chief in answer to a similar question
477. said he had never paid anything of that sort himself, but that he could not answer for others, and in answer to a further question whether he believed that there had been in their case any exception to the general rule, he said, "I do not think that there is
479. "anybody in the Horse Guards who is treated differently from any other person in "the Army."

We have had no direct proof, except in one instance, of such a payment having
844, 877. been made on behalf of a near relative of a person in the highest authority at the Horse Guards, and that was in the case of an exchange from the line to the Guards.

But in the absence of all evidence to the contrary we are compelled to express our belief that the practice in question has not been discountenanced by the example of persons holding high civil or military offices.

We are led to the conclusion that the whole course of official conduct with regard to this practice for many years has been such as to justify officers in inferring, that though contrary to the letter of the law, it was not seriously disapproved, and that they might continue it without the fear of incurring the penalties of the law or the displeasure of the military authorities.

On the other hand, the Warrant of 1856 expressly recognizes the regulation price only of a commission in the case of an officer killed in action, and the course adopted by the War Department in the case of the absorption of commissions, and in every case in which either full or half pay commissions are purchased by means of the reserve fund, is a practical assertion of a right which does not appear to have been disputed, strictly to limit the claim of officers whose commissions are so purchased to the regulation prices of such commissions.

On a review of the whole facts of the case, we have to report as to the several branches of the inquiry referred to us, that,—

1.—

(*a.*) The practice of paying in respect of promotions and of receiving in respect of retirements sums in excess of those sanctioned by the Royal Warrant of the 3rd February 1866, is general throughout those corps in which regimental promotions are by purchase;

(*b.*) The practice of paying in respect of promotions and receiving in respect of retirements sums not sanctioned by Royal Warrant, prevails also in corps in which regimental promotions are not by purchase but by seniority;

(*c.*) The practice of paying and receiving sums of money in excess of those sanctioned by Royal Warrant, or sums not sanctioned by such Warrant prevails also in the case of exchanges from one corps to another and from one battalion of a regiment to another battalion of the same regiment.

2.—That the payment of those sums is a matter of arrangement between the officers, and that it is usually, though not in all cases, made through the regimental agents acting in the matter as private bankers, no record being kept of the purpose for which the money is paid.

3.—That the chief incidents of the practice are:—

(*a.*) The raising the prices of commissions, with the exception of the first, to an amount which subjects officers of limited means to serious inconvenience while they remain in the Army.

(*b.*) Considerable pecuniary advantage to non-purchasing officers in the event of their retirement.

(*c.*) The acceleration of promotion by the inducement it offers to retirement, and the consequent advantages both to purchasing and non-purchasing officers.

(*d.*) The habitual violation of the law supported by long-established custom and unchecked by any authority.

4.—That under ordinary circumstances, and with the exception of "fancy" prices occasionally given, the officer who has paid any sum in excess of that sanctioned by Royal Warrant is accustomed to receive the like sum back on his retirement by sale of his commission or on full or half pay, but that the circumstances under which the sum so paid is irrecoverable are so various and uncertain that the payment of it, if regarded as an investment, is attended with great risk of loss.

5.—That—

(*a.*) The practice has received no formal or express sanction from any public departments or officers, and the regulation price only of commissions has been recognized and paid by the War Department in the case of payments to the families of officers killed in action, and of purchase of commissions by means of the Reserve Fund.

(*b.*) While the existence and general prevalence of the practice has been notorious, there has been no attempt to put a stop to it by enforcing the provisions of the Statutes prohibiting it.

(*c.*) The habitual violation of the Law and Regulations prohibiting the practice has passed unnoticed, except in very rare instances which occurred many years ago, in which the facts were brought officially to the knowledge of the Commander-in-Chief by complaints against officers for refusing to fulfil an agreement to pay money in excess of the regulation price for a commission.

(*d.*) In those instances the course pursued by the military authorities was not calculated to check the practice.

(*e.*) The Regulations expressly prohibiting the practice have been gradually relaxed and finally withdrawn.

(*f.*) There has been no real discouragement of the practice by any authority.

(*g.*) There has been a tacit acquiescence in the practice, amounting, in our opinion, to a virtual recognition of it by civil and military departments and authorities.

ANALYSIS OF EVIDENCE.

LIEUT.-GENERAL SIR EDWARD LUGARD, G.C.B.

Statutes and regulations limiting the prices to be paid for commissions, 3, 4. First mention made of over-regulation payments in 1766, 5–8. Regulations against over-regulation payments first made in 1783, 9, 12. Circular to army agents and commanding officers in 1804, 20. Seniors for purchase to be recommended to succeed to sale vacancies. Seniors do not succeed to vacancies caused by compulsory retirement, 20, 23. Evasion of regulations to be reported in 1786, 24, 25. Clause against traffic in commissions in Mutiny Act, 26, 30. Act of 1809 against sale of offices, 31, 41. Act quoted in Queen's Regulations, 37, 41. Omitted in 1868, 42, 48. Mutiny Act altered in 1815, 49, 54. Declaration of officers given up in 1824, 55, 57. Senior officer for purchase cannot be passed over, 58, 59. In 1824, resignation was unconditional, 63. This requirement was omitted in 1837, 64, 66. Full penalties to be inflicted on officers, 67, 70. Poor officers suffer by over-regulation payments, 71, 72. Bonus system, 73, 74. Not in Artillery and Engineers, 75, 76. No prosecutions of officers have taken place, 77, 78. Over-regulation payments not officially known, 79, 85. Declarations cannot now be required, 86. Evidence necessary to convict, 87. Moral courage required to refuse over-regulation payment, 88, 92, 97, 98. Applies equally to bonus system, 93, 100. Cases in which over-regulation payment is lost, 101, 106. Warrant of 1856 granting purchase money to families of officers killed, 107, 109. Bonus on retiring on full pay, 110, 115, 126, 128, 159, 163. No prohibition of bonus system, 116, 117. No difference between it and over-regulation payments, 118, 125. Difference between promotion under purchase and bonus systems, 129, 134. Bonus made up by the officers promoted, 135, 136. Payments for exchanges, 137, 143. Prohibited by Act of 1809, 144, 146. Sum allowed to non-purchase officers retiring with less than 20 years' service, 147, 151. With more than 20 years, 152, 158. Indian bonus system in non-purchase infantry regiments, 164, 165.

LIEUT.-GENERAL SIR E. LUGARD, G.C.B., re-examined.

Warrant of 1856 granting value of purchased commissions to families of officers killed, 386, 387. Payments to officers retiring on permanent half pay, 388–391. Loss of purchase money on promotion to general officer on fixed establishment, 392–398. On retiring on full pay, but over-regulation is received, 399, 400. Exchange to and from temporary half pay, 401, 404, 406. Sale of half-pay commission, 402, 403. Purchase of unattached commissions, 408, 409. Exchange from half to full pay, 410–419. Exchanges from infantry to cavalry, 420. Over-regulation is lost by death, reduction to half pay, retirement by compulsion, or by an officer refusing to pay over-regulation, 421–429; in time of war, 422; in an unhealthy climate, 423. On proceeding on foreign service, 424, 425. Cases of reduction, and the absorption of supernumeraries, 430, 438.

LIEUT.-GENERAL SIR E. LUGARD further examined.

Over-regulation payments irrecoverable in cases of absorption of supernumeraries, 1009, 1010. Supernumerary absorbed on an officer retiring on permanent half pay, 1011. Supernumerary would not be absorbed in the senior rank if proposing to sell, 1012, 1024. But in the lowest rank in which there was a supernumerary, 1025, 1026. Supernumerary always absorbed on an unattached promotion being given, 1027, 1028. A sum provided by Parliament to buy up supernumerary junior commissions, 1029, 1030. Positions in which field officers in foot guards are placed by reduction, 1031, 1036. Application of Colonels Stephenson and Hardinge to retire on half pay and to sell, 1037, 1040. Supernumerary majors of cavalry on return from Indian service allowed to sell, 1041, 1047. No supernumerary junior commission to be absorbed in the foot guards, 1048, 1054, 1058, on the sale of a commission in the rank of field officer, the supernumerary would be absorbed, 1049, 1050, and over-regulation payment would be irrecoverable, 1051, 1053. Abolition of purchase above the rank of lieutenant-colonel and captain in the Guards, 1059, 1063. Over-regulation payments on promotion to field officer in the Guards, 1064, 1065. Absorption could only be effected on occasion of a death, or promotion to major-general, 1066, 1068. Absorption of alternate non-purchase vacancies, 1069, 1082. Reductions make promotion uncertain and affect over-regulation prices, 1083, 1090. Full-pay retirements are limited, 1091, 1096. Reduction of one field officer in each regiment of Guards, 1097, 1101.

LIEUT.-GENERAL SIR E. LUGARD—*cont.*

LIEUT.-GENERAL SIR E. LUGARD further examined.

Purchase of half-pay promotion from officers on the half-pay list, 1330, 1331; on condition that the officers selling settled in the colonies, 1332, 1334. Abolition of the practice, and substitution of the power to sell half-pay to and to purchase half-pay promotion from the Reserve Fund, 1336, 1337. All private arrangements thus ceased and officers were selected by the Commander-in-Chief for half-pay promotion, 1338, 1341. Officers selling under the circular of 1861 received only the regulation price of their commissions, 1342. Returns of half-pay commissions bought and sold since 1861, 1343, 1345.

CHARLES HAMMERSLEY, ESQ.

Is a member of the firm of Cox & Co., 166. Number of regiments to which they are agents, 167. Arrangements for purchase and sale made by them, 168–174. Is aware of the object of the Commission, 175, 176, and of the Act of 1809, 177. Prepared to give general evidence, 178, 179. All over-regulation payments do not pass through agents' books, 180–185. Prices paid for commissions in the Guards, 186–191. In household cavalry, 192–198. In cavalry of the Line, 199–202. Do not vary on foreign service, 203. Proportion paid by several ranks, 204, 207. Reduction of Cavalry prices in 1860, 208–209. Result thereof, 210–217. Prices in Infantry, 218–220. Money not lodged until called for, 221–222. A list of purchasing officers kept, 223, 224. Officers often refuse to pay over regulation, 225–233. Payments for exchanges, 234–239. Exchanges between the Line and the Guards, 240–251. Over-regulation payments usual, 252, 306, 307. Authorities have never made inquiries, 253, 308, 309. Payments in late Indian regiments, 254, 255. Payments made up by the officers promoted, 256–258. Officers sometimes passed over, 259, 260. Prices in Cavalry and Infantry, 265–267. Payments to officers not entitled to full regulation price, 268–271. Over regulation not given during war, 272–276. Mode of application to sell, 277–279. Arrangements as to over regulation are previously made, 279, 280. Mode of application to purchase, 281–284. Officers not unpopular who refuse to pay over regulation, 285–287. Money lost by death, 288, 291. Purchase an unprofitable investment, 293–295. No scruples exist against over-regulation payment, 296, 297. Price not affected by Indian service, 301. Promotions cancelled on account of illegal payments, 302. Payments to officers retiring on full pay, 303–305, 310–312. Payments by Court of Chancery, 313–316. Act of 1809 and Mutiny Act, 317–323. Payments of over regulation by persons in authority, 324–326. Officers brought from half pay to sell, 327–338. Over-regulation payments irrecoverable in case of death, 339; of enforced retirement, 340–345; of abolition of purchase in rank of mounted officer in the Guards, 345–352; of reduction, 353. Exchange to full pay, 354–357. No payments in Artillery and Engineers, 358–365. Sale of half pay in Artillery, 366–370. Rate of promotion in Artillery, 371. Rapid promotion secured by over regulation, 372–374. No possibility of checking it, 375. Bonus system in Indian army, 377–380. Purchase of promotion from one regiment into another, 381–385.

CHARLES HAMMERSLEY, ESQ., further examined.

Proportion of over-regulation price paid by the officers of the several ranks in the cavalry, 922, 928. Return of average over-regulation payments, 929. Return of promotions by purchase, 930, 935. Length of service of purchasing and non-purchasing officers, 936, 939. Payments for exchanges between purchase and non-purchase corps, 940, 942. Payments to induce officers to retire in the non-purchase infantry regiments, 943, 946. Total amount invested in commissions, 947, 949.

CHARLES HAMMERSLEY, ESQ.

Return of the average prices paid for commissions in cavalry and infantry, 1289–1290; and of promotions in certain regiments, 1291. Over-regulation payments in West India regiments, 1292, 1264. No variation of price for 30 years, 1295, 1297. Arrangements as to over-regulation price in negotiating a sale, 1298, 1299. Exchanges between purchase and non-purchase corps, 1300, 1305. The value of their commissions allowed to officers retiring from non-purchase corps, 1306, 1316. Payments for exchanges, 1317. Instances of payment of regulation price only, 1318, 1322. Over-regulation payments general, 1323, 1324. Death vacancies not always succeeded without purchase, 1325, 1326. Double payment for an ensigncy, 1327, 1329.

LIEUT.-GENERAL W. F. FORSTER, K.H.

Is military secretary to Commander-in-Chief, 439–442. Correspondence between War Office and Treasury as to pay of cavalry officers, 443–447. If over-regulation payments were officially known officers would be punished, 448–450. No regulations can be devised to prevent it, 451. The Commander-in-Chief has never obtained any "moral certainty" of such transactions, 452. Instances in which officers have been punished, 453–456. No inquiry has been made into a supposed case, 457. No case of appeal to Commander-in-Chief for assistance to resist payment of over-regulation, 458–463. Two cases referred to in which the promotion was cancelled or post-dated, 464, 465. Mention of the practice in official correspondence, 466–470. Distinctions between sanction and recognition of the practice, 471–474. The practice acts as an inducement to enter the profession, 475, 476. Members of the families of persons in authority are not dealt with differently from others in the army, 477–479. Evasion of the declaration against over-regulation, 480, 481. Effect of purchase upon poor men, 482–487. Omissions of reference to Act of 1809 from Queen's Regulations, 488–492. Effect of alteration in cavalry prices, 494–498. Regimental system of promotion, 499–501. Exchanges between commanding officers, 502–507. Required to serve six months after exchanging, 508. Cases in which purchase money is lost, 509–512. Compulsory retirement, 513–515. Cases of reduction in the Guards, 516–526. Over-regulation payments authorised by custom, 527. Purchase of commissions by the reserve fund on reduction, 528. Promotion by purchase, and without purchase for one year, 529. Return of commissions absorbed, 530. Sale by an officer not entitled to full value of his commission, 531. Rapidity of promotion secured by over-regulation payments, 532–534. Over-regulation payments inseparable from purchase system, 535; if promotion be regimental, 536. No active steps taken by the authorities to put a stop to the practice, 537, 542.

LIEUT.-GENERAL W. F. FORSTER further examined.

Instances in which officers have been punished for payment of over-regulation prices, 1102, 1105, 1117, 1125, 1126. Case of Captain Carey, 55th Foot, 1106. Case of Captain Denny, 71st Foot, 1107, 1109, 1121, 1124. Double payment for ensigncy, 1110, 1116. The punishment prescribed by statute has never been inflicted, 1127, 1131. Report of general commanding on Captain Denny's case, 1132.

COLONEL WM. DENNY.

Sold out as colonel in the army, 543–549. Commission as captain cancelled in 1823, 550, 551; in consequence of entering into an arrangement to pay over regulation, 552, 553. The senior captain for purchase subsequently refused to contribute his quota, 554, 560. Known at the regiment that if officially reported the commissions would be cancelled, 561. The promotions were cancelled, but not until another vacancy occurred, 562, 571; by reason of a captain in ill-health exchanging with an officer who was brought in to sell, 572, 574. The agreement was made generally with the officers who were to be promoted, 575, 580. Passed over several lieutenants on promotion, 581, 582. A major was brought in from another regiment, 583, 587. Not aware of any communication being made from the Horse Guards of the reasons for cancelling the commissions, 588, 594. Received a sum of money over-regulation on selling out, 595, 598. Paid twice for his commission as ensign, 599, 624, 650, 654. Purchased lieutenancy and paid over regulation, 625, 626. Paid over regulation for company and majority, 627, 634. Promoted lieutenant-colonel without purchase, 635, 638. Promotion accelerated by over-regulation payments, 639, 642. No remonstrance made by the officers when the commissions were cancelled, 643, 648. Over-regulation

CHARLES WM. DENNY—*cont.*

payments formerly not large, 649. Amount received on retirement was a voluntary gift, 655, 662. Time given to a Waterloo officer to obtain purchase money for his promotion, 663, 666.

COLONEL H. AIME OUVRY, C.B.

Sold from half pay as cavalry lieutenant-colonel, 667, 676. Entered the army as an ensign, 677, 684. Paid over-regulation on promotion to lieutenant and captain, 686, 693. The prices in the regiments were high, 694, 696. Paid over regulation difference on exchange to cavalry as captain, 697, 711. Paid double the regulation price for majority, 713, 718. Received a sum of money on exchanging as a major into a regiment in India, 719, 723, 740. Promoted lieutenant-colonel without purchase, 724, 729. Placed on half pay on reduction, 730, 733. Received regulation price on selling half pay, 734, 739. Total loss of money on selling out, 741, 742. Sum required to be paid to exchange to full pay, 743, 746. No difference between the price of a full and half pay commission, 747, 751. No opportunities occur for bringing a half-pay lieutenant-colonel to full pay, 752, 754. Officers passed over by purchase, 755, 757, 773–781. Over-regulation payment well understood, 758. An officer whose father insisted upon his name being put down for purchase at regulation price, 759, 762; over-regulation money was lent to him in the regiment, 763, 772. Non-purchase officers realise value of commissions on selling out, 779, 784. Compulsory transfer, 785, 802. Transfer of supernumerary major to a regiment to be augmented, 803, 814.

COLONEL HON. A. HARDINGE, C.B., and COLONEL FREDERICK C. A. STEPHENSON, C.B.

Are colonels of the Coldstream and Scots Fusilier Guards, 815, 817. Establishment of mounted officers of the Guards, 818, 820. Regimental price of lieutenant-colonelcy, 821, 822. Contributed by the officers promoted, 823, 824. Prices vary in regiments of Guards, 825, 827. Payment on retiring to half pay, 828, 831. The promotion going in the regiment, 832. Absorption of supernumerary major, 833, 836, would cause a loss to the retiring officer of over-regulation price, 837. Act of 1809, 838. Steps purchased by Col. Hardinge, 839, 845. Steps purchased by Col. Stephenson, 846, 851. Hardship consists of loss of over-regulation payments, 852. Reduction in Grenadier Guards, 853, 858. Position of the junior field officers of the Guards consequent on the reduction, 858, 863. Stagnation of promotion until a promotion to major-general takes place, 864, 866, 886, 890. Col. Hardinge entered the army when Lord Hardinge was Commander-in-chief, 867, 870. Officers do not decline to pay over regulation, 871, 875. Payment by Lord Hardinge to effect exchange for Col. Hardinge, 876, 877. Abolition of the purchase of commissions of the mounted officers in the Guards, 878. Reductions in the cavalry and infantry, 880. Senior ranks are allowed to retire by sale and receive over-regulation money, 881, 884. Absorption of death vacancies, 885. Absorption of non-purchase vacancies, 894. Correspondence on the subject of the reduction in the Guards, 895, 902, 916, 921. Prices in time of peace and war, 903, 912. Officers are aware of the risks incurred in paying over-regulation prices, 913, 915.

COLONELS HON. A. HARDINGE and F. STEPHENSON.

The obligation to pay over-regulation price in the Guards is a moral and customary one, 1252, 1256. Prices in the Guards have remained the same for many years, 1257, 1262. Same rule applied to absorb supernumeraries in the Guards as in other corps, 1263, 1270. Reduction of cornets in Household Cavalry, 1271, 1280. Only over-regulation price is in question in the reduction in the Guards, 1281, 1286. Absorption on promotion to major-general, 1287. Supernumerary majors in cavalry, 1288.

MAJOR-GENERAL J. H. LEFROY, C.B.

Has always served in the Royal Artillery, 950, 953. Proposed a scheme for quickening promotion in the artillery by means of a bonus fund, 954, 956. Government provision for retirement insufficient, 957, 958. Scheme generally accepted by the corps, 959, 969, 970, 985. Mode of its proposed operation, 960, 962, 998, 1008. Slow promotion in the corps suggested the plan, 963, 968. Mr. Childers' plan for accelerating promotions, 971, 972. Comparative length of service in artillery, engineers, non-purchase corps, and marines, 973, 975. Legality of the scheme, 976, 979, 991; is similar to the practice of paying a sum to induce an officer to retire on

Major-General J. H. Lefroy, C.B.—*cont.*
full or half pay, 980, 981. No inducement to pay more than the sum agreed on, 982, 984. Application of clause in Mutiny Act to payments for exchanges of stations in the artillery, 986, 999, 994, 997.

Leonard Coleman, Esq.
Is assistant to the Military Secretary, 1142, 1144. Mode in which supernumeraries are absorbed on reduction, 1145, 1147; on selling, 1148, 1152, 1160; on retirement to half pay and full pay, 1153, 1156, 1161, 1172; on death, 1157, 1159. Captains were placed on half pay on the reduction after Crimean war, 1173, 1175, 1183, 1185. Sale of half-pay commissions on settling in the colonies, 1176, 1178. Applications to sell made to Commander-in-Chief, 1179, 1180. Reserve Fund under control of Secretary of State, 1180, 1181. Applications have been made in the interest of junior officers of long service not to absorb a supernumerary on retirement to half pay, 1182, 1185, 1214, 1224, 1235. Supernumerary majors allowed to sell, 1186, 1188, 1209, 1213. Absorption of supernumeraries under Art. 71, 72, of Warrant of 1866, 1189, 1192. Army promotion on the death of a general officer, 1193, 1197. Return of promotions and absorptions, 1198, 1203. Reductions of lieutenant-colonels of cavalry regiments on return from India, 1204, 1208. Succession on retirement to half pay, 1225, 1227, 1242, 1246. Exchange to half pay, 1228, 1234. Officers retiring on temporary half pay are always succeeded from the half-pay list, 1236, 1241. Compulsory retirement at 60 years of age, 1247, 1251.

Leonard Coleman, Esq., further examined.
Absorption of full-pay commissions during last five years, 1619, 1620. Every alternate purchase and non-purchase vacancy was absorbed in the rank in which the vacancy occurred in 1866, 1621. In the present reduction every alternate purchase vacancy is absorbed in the lowest rank in which there is a supernumerary, 1622, 1623, 1636. Purchase vacancies are absorbed by payment of the regulation price from the Reserve Fund, 1624, 1625, 1631–1635. Absorption of two lieutenant-colonelcies by retirement to full and half pay, 1627–1630. The same course as that adopted in 1866 might now be pursued, 1637–1639.

Lieut. John Biddulph, 19th Hussars.
Served as lieutenant in 19th Hussars, a non-purchase regiment, since 1862, 1346, 1351. Was previously in the Bengal Cavalry, 1352, 1356, 1440; and is therefore entitled to pension from the Indian Government under the regulations of the old Company, 1357, 1358. Is also entitled to receive the same allowance on retiring as officers in purchase regiments who have not purchased their commissions, 1359–1363, 1447–1452, 1519–1526. A system of giving a bonus to induce officers to retire exists in the non-purchase regiments, 1364, 1365, 1433, 1469–1472; system illustrated by a recent case, 1366–1370, in which 3,500*l.* was subscribed in the regiment, and paid, 1371, 1375. The officer chiefly interested in the promotion collects the subscription by means of a circular, 1376–1378. Proportion paid by the several officers, 1379–1385. Cornets who contemplate entering the Staff Corps do not subscribe, 1386, 1389. Some officers do not subscribe, and the deficiency has to be made up, 1390, 1393. Such officers receive a less amount on retiring, 1394, 1476. An officer who has succeeded to a death vacancy receives the same sum as an officer who has subscribed to the purse, 1395. The payments are voluntary, 1396, 1397. An officer of small means is not unpopular if he declines to subscribe, 1398, 1399, 1476. Payments for exchanges between purchase and non-purchase corps, 1399, 1405, 1459, 1478, 1483. The bonus system exists in both cavalry and infantry non-purchase regiments, 1406–1408. Money thus paid is lost in case of death, 1409. Payments made to induce an officer to enter the Staff Corps, 1410–1412. The money is generally deposited with the agent to the credit of the officer retiring, 1413, 1417. Promotion is more

Lieut. John Biddulph, 19th Hussars,—*cont.*
rapid in a purchase than a non-purchase regiment, 1418, 1421, 1457, 1458. Payments made by him during eight years, 1422, 1429. Probable amounts required to be paid to gain each step, 1430, 1432, 1435, 1439, 1444. Bonus system existed in the old East India Company's service, 1440, 1443. No objection on the part of the officers of his regiment to his giving evidence, 1445, 1446. Length of service of officers exchanging from purchase to non-purchase corps, 1466, 1477. Exchanges between non-purchase regiments of cavalry and infantry, 1467, 1468. The agents hand over the money to the retiring officer on the retirement being gazetted, 1473, 1475. Payments for exchanges in order to serve at home, 1484, 1485, 1496, 1498. Subsequent promotion of officers exchanging, 1486, 1490. No desire exists on the part of officers to put a stop to the bonus system, 1491, 1495. Probability of the bonus system being maintained on home service, 1499, 1500. Difference between pay in India and England, 1501, 1511. Reduction and absorption of a major in the non-purchase regiments, 1512, 1515. Bonus might be paid although the vacancy would be absorbed, 1516, 1518.

Denham Robinson and Robert Davey, Esqs.
Are clerks in the War Office and actuaries, 1527. Average service of purchasing and non-purchasing officers in purchase regiments in 1852 and 1870, 1528–1534, 1550. Promotion in the Artillery and Engineers, 1535, 1545. Comparison between promotion in the purchase regiments and the Royal Artillery, 1546, 1557. Effect of the Crimean War on rate of promotion, 1558, 1559. The non-purchase line regiments do not afford sufficient data to make a calculation of the rate of promotion, 1560, 1561.

Chas. Alex. Wood, Esq.
Is deputy chairman of Great Western Railway, 1562, 1563. Has a son who obtained a commission in a cavalry regiment without purchase, 1564–1566. Paid regulation price only for his promotion to lieutenant, but subsequently ascertained that his son had obtained the money to pay the over-regulation, 1567–1574. Has a ward in the cavalry, for whose promotion to lieutenant he paid over-regulation, 1575–1581. He declined to pay over-regulation for his troop, 1582–1586. This resulted in officers being brought in from other regiments as captains, the officers exchanging from cavalry receiving the difference between infantry and cavalry prices from the Reserve Fund, 1587–1589, 1609–1611. After losing two years he paid over-regulation for his troop, 1590–1594. Refused to pay over-regulation because the Act of 1809 had been put in force, 1595–1599, 1606, 1607. Addressed a letter to the War Department on the subject, 1600, 1601; and about the same time received a letter from Mr. Sidney Herbert, 1602. Paragraph in reference to the Act of 1809 proposed in the draft report of the Military Organisation Committee of 1860, 1603, 1604. Reply of War Department to letter addressed to Secretary of State, 1605. The names of his son and ward were always retained on the purchase list, 1608, 1611. Received frequent remonstrances in consequence of the course he pursued, 1612, 1616, 1618. Inference from reply of Secretary of State that he sanctioned over-regulation payments, 1616. Letter which was addressed to Secretary of State on the subject, 1617.

C. M. Clode, Esq.
Has been solicitor to the War Department since 1858, 1640, 1641. No prosecution has taken place under the eighth section of the Act of 1809 for payment of over-regulation, 1642. The question of the prohibition to make a payment to induce an officer to retire on pension has been before the court, 1643, 1648. Prosecution for sales of militia commissions, 1649, 1652. Never received instructions to ascertain whether materials existed to sustain a prosecution for payments in excess of regulation, 1653, 1654. Memorandum upon the brokerage Act, 1655, 1656.

INDEX TO EVIDENCE.

Absorption of supernumeraries:
on reductions, 430–438, 520–530, 832–866, 885–894, 1009–1030, 1145–1147.
in the Foot Guards, 1049–1058, 1066–1068, 1264–1269.
takes effect in junior ranks first in the case of sale vacancies, 1012–1019, 1022–1025, 1066–1068, 1148–1152, 1160, 1636.
in non-purchase vacancies, 1069–1073, 1157–1159.
on retirement to half and full pay, 1153–1156, 1161–1172.
exceptions have been made, 1182–1185, 1214–1224, 1235.
on promotion to major-general, 1287.
in non-purchase regiments, 1512–1515.
when a bonus would probably be paid, 1516–1518.
plan usually adopted for, 1619–1639.
return of; App. VI.

Act for prevention of sale and brokerage of offices, of 1809, 31–41, 177, 179, 300–322, 838, 1595–1599, 1606–1607, 1645, 1653, 1654; App. I.
memorandum upon, by Mr. Clode, 1656; App. XIV.
prosecutions under, 77, 78, 87.
exchanges prohibited by, 144–146, 238.

Amount invested in commissions, 947–949.

Applications to sell, 763.

Army agents:
circular addressed to, 12–15.
clause of Act of 1809 referring to, 33, 34.
clause of Mutiny Act referring to, 28, 30.

Army brokers, 15.

Artillery:
promotion in, 370–372, 939, 950–958, 964–968, 971, 1535–1547.
No payments for, take place in, 75, 358–361.
Mr. Childers' plan for accelerating, 969–971.
payments for exchange of stations in the, 986–988, 994, 997.
proposal to establish a bonus system in, 954–963, 975, 976, 979–985, 987–993, 998–1008.

Biddulph, Lieutenant John. *See* Analysis of Evidence, p. xxx.

Bonus system on retirement, 73, 74, 93–100.
to full pay, 110–115, 126–128, 159–163, 303–305, 310–312, 318–322.
to permanent half-pay, 388–391.
not prohibited, 116, 117.
mode of contributions, 135, 136.
Indian system, 129–134, 159, 1365, 1440–1443.

Bonus system in non-purchase regiments, 164, 165, 943, 1364–1518.
mode of payment, 1413–1417, 1473–1475.
amount thereof, 1422–1429, 1430–1432, 1435–1439, 1444.
no desire to put a stop to it, 1491–1495.
probability of its being maintained on home service, 1499, 1500.

Brokerage and Sale of Offices Act, 31–41, 177, 179, 300, 1595–1607, 1653–1656; App. I., XIV.

Carey, Lieut., and Capt. Bird, penalty, &c. for payment of over-regulation, 1106.
correspondence with Home Office respecting, App. VIII.

regulations as to, 502–508; App. III.
payments on, 137, 143, 697–711, 718–723, 740, 841, 1484, 1485, 1496–1498.
prohibited by Act of 1809, 144–146, 238.
to purchase promotion, 381.
to sell, 504, 505.
to full pay, to sell, 327–331, 354–357, 404, 405, 409.
payments for, 415, 743.
to half-pay, 401, 1228–1241.
regulation, difference of prices paid on, 241, 243.
between the line into the Guards, 234, 236, 240, 244, 246, 251.
between purchase and non-purchase corps, 940, 1300–1305, 1317, 1399, 1405, 1459, 1478–1483, 1466–1468, 1477.
between non-purchase infantry and cavalry regiments, 1467–1468.
between cavalry and infantry, 419, 420.

Exchange of stations:
payments for, in the artillery, 986–988, 994–997.

Forster, Lieut.-Gen. W. F.; *see* Analysis of Evidence, p. xxix.

Full pay retirements, 110, 115, 126, 128, 159, 163, 303, 305, 317, 322, 1086–1096; App. III. cl. 29 of warrant of 1858, p. 77.

Guards, alteration in establishment of, 516–527, 818–820, 833–837, 852–866, 1031–1039, 1048–1058, 1097–1101, 1263.

Guards, prices in, 821–827.

Guards, Foot: abolition of purchase above rank of captain in, 345–351, 878–879, 1059–1065.

Guards: correspondence respecting reduction in, 895–902, 915–921.

Half-pay on reduction, 357, 730–732, 750, 751, 1173–1175, 1183–1185:
field officers thus reduced seldom re-employed, 752–754.

Half-pay retirements, 332, 338, 389, 391, 401, 406, 828–831. App. III., cl. 54, 90:
in artillery, 957, 980, 1003–1006.

Half-pay commissions:
sale of, 337, 338, 401, 733–739.
of artillery, 366–369.
price of, 412–414, 671.
sale of, on settling in the colonies, 1176–1180, 1332–1334.

Half-pay ensigncy, purchase of, 599, 605–609, 650, 1110–1116, 1327–1329.

MINUTES OF EVIDENCE

TAKEN BEFORE THE

ROYAL COMMISSION APPOINTED TO INQUIRE INTO OVER-REGULATION PAYMENTS ON PROMOTION IN THE ARMY,

AT THE

War Office, Pall Mall.

Friday, 29th April 1870.

PRESENT:

THE RIGHT HONOURABLE SIR GEORGE GREY, BART., M.P., G.C.B., IN THE CHAIR.

THE RIGHT HON. THE EARL OF DEVON.	LIEUT.-GENERAL SIR JAMES YORKE SCARLETT, G.C.B.
THE RIGHT HON. LIEUT.-GENERAL PEEL.	MAJOR-GENERAL STEELE, C.B.
THE RIGHT HON. G. WARD HUNT, M.P.	SAMUEL WHITBREAD, ESQ., M.P.
VICE-CHANCELLOR SIR W. M. JAMES.	P. H. MUNTZ, ESQ. M.P.

R. H. KNOX, ESQ., *Secretary.*

Lt.-Gen. Sir E. Lugard, G.C.B.

29 April 1870.

LIEUT.-GENERAL SIR EDWARD LUGARD, G.C.B., examined.

1. (*Chairman.*) What office do you hold in the War Department?—I am Permanent Under Secretary of State.

2. You are aware of the terms of the present Commission and the object with which it has been appointed?—Yes.

3. One of the instructions we have received is to enquire what degree of recognition the practice of paying more than the regulated price for commissions may have received from any public department or officer, and "how far any statutes which now or "heretofore may have prohibited the said practice, "and any royal warrants and regulations affecting "the same, have been actually enforced." Will you be good enough to inform the Commission what the statutes are which bear upon this question, and the terms of the Royal Warrants and regulations which also bear upon it?—I cannot do better in answer to this question than place before the Royal Commissioners a memorandum which has been prepared in this office by their Secretary.

4. Will you be good enough to hand it in?—Yes. That paper gives a history of the statutes and warrants relating to the subject. (*The same was handed in*, Appendix I.)

5. Will you point out at what date or in what document any reference was first made to this practice of paying more than the regulated price for commissions. The first notice of it, according to this paper, was in 1766, in the warrant promulgating the new prices which were then fixed; is not that so?—Yes.

6. Is that warrant expressed in the following terms, as far as it bears upon this point, that,—"In all cases "where we shall permit any of the commissions "specified therein to be sold the sum to be paid for "the same shall not exceed the prices set down in "the said report; and all Colonels' agents or other "our military officers are hereby required and "directed to conform strictly and carefully to the "regulation hereby laid down and established upon "pain of our highest displeasure?"—Those are the words of the warrant.

7. There appears to have been no previous reference to this practice of paying more than the regulated price for commissions?—No.

8. This clause appears to have been repeated in the subsequent warrants of July 1772 and February 1773?—Yes.

9. What was the date of the next change that was made?—In 1783 the prices at which commissions should be sold were again considered, and it was determined to make no change.

10. The determination was to make no change in the price to be paid for commissions?—Quite so.

11. But there were some instructions added which had not previously been issued?—Yes.

12. Will you be good enough to state them?—"When an officer is desirous to sell his commission, "he is to make application in writing to the colonel "of the regiment he belongs to, or in his absence to "the field officer commanding the regiment, praying "for His Majesty's leave to dispose of his commission "at the regulated price, stating that he thereby "means to resign all pretensions to any future rank "or promotion in the army, and solemnly declaring "on the word and honour of an officer and a gentleman that nothing beyond the price limited by His "Majesty's regulations is stipulated or promised "directly or indirectly; and that no other mode of "compensation or gratuity is in contemplation of the "parties, or shall be given or accepted in respect of "such sale or purchase." This declaration was to be accompanied by another on the part of the Commanding officer, "that he verily believes the established regulation with regard to price is intended "to be strictly complied with, and that no clandestine "bargain subsists between the parties concerned." Application in writing was also to be made by the officer desiring to purchase, "stating his pretensions, "accompanied with a declaration on his part as is

Lt.-Gen. Sir E. Lugard, G.C.B.

29 April 1870.

" herein-before prescribed with regard to the officer " applying for leave to sell; expressly pledging his " word and honour as an officer and a gentleman " that he is not to give, nor will either now, or at " any future time, give by any means, or in any " shape whatever, directly or indirectly, any more " than the regulated price. And His Majesty has, " by the advice of his Board of General Officers, been " further pleased to declare his determination that " any officer who shall be found to have given, or to " have stipulated, or promised, directly, or indirectly, " to give anything beyond the regulated price, in " disobedience of these His Majesty's orders, or by " any subterfuge or equivocation to have evaded the " same, and to have thereby shamefully forfeited his " honour as an officer and a gentleman, shall be dis- " missed from His Majesty's service." The forms to be used were,—" Sir, I beg you will be pleased to " obtain for me His Majesty's consent to the sale of " my commission of . In case His " Majesty shall be graciously pleased to permit the " same, my intention is thereby to resign all rights " and pretensions to any future rank or promotion " in the army; and I do further declare and certify " upon the word and honour of an officer and a " gentleman, that I have not demanded or accepted, " neither will I demand or accept, directly or in- " directly, at any time or in any manner whatever, " more than the sum of £ , being the price " limited and fixed by His Majesty's regulations, as " the full value of the said commission." "Sir, " I beg you will be pleased to obtain for me His " Majesty's permission to purchase the . " In case His Majesty shall be graciously pleased to " permit me to purchase the said commission, I do " declare and certify upon the word and honour of " an officer and a gentleman, that I will not either " now or at any future time give by any means, or " in any shape whatever, directly or indirectly, any " more than the sum of £ , being the price " limited and fixed by His Majesty's regulations, as " the full value of the said commission." Then again in 1786, three years subsequently, a circular letter was issued in which occurred these passages: " In future when an officer is desirous of retiring " from the service, either by the sale of his com- " mission or by exchange to the half-pay, he shall " not make any stipulation in regard to the particular " officer who shall succeed him;" and "it being " evident that by leaving their officers to select their " own successors, and by accepting their nominations, " the business of military promotion has in too many " instances been conducted in such a manner as to " defeat the purposes of His Majesty's regulations, " notwithstanding every endeavour of office to enforce " their due and punctual observance." These regu- lations remained in force until 1804, when circulars were again issued, insisting on compliance with the regulations, one addressed to all army agents and one to officers in command of regiments. The circular to army agents is as follows: " Sir, His Royal High- " ness the Commander-in-Chief, having the strongest " reason to believe (from the advertisements that " have frequently appeared in the public papers), " that an extensive correspondence is carried on with " the officers of the army by persons styling them- " selves army brokers, to induce them to enter into " pecuniary engagements for the purpose of obtaining " commissions contrary to the established regulations, " and it being the earnest desire of the Commander- " in-Chief to check as much as possible a practice so " extremely prejudicial to the service, I am com- " manded to call your attention to this important " point, and to impress on you the necessity of the " utmost vigilance in preventing as far as may be in " your power any communication whatever with " those persons and the officers in your agency, and " to acquaint you that should it at any time appear " that any such commission shall have been nego- " ciated through your office, the Commander-in-Chief " will consider it his duty to recommend to the " colonels of the respective regiments to notice such " irregularity by withdrawing their regiments from " that agency, and placing them in other hands. I " have it further in command to desire that you may " be pleased to convey to the officers commanding " regiments in your agency, the most marked dis- " approbation of His Royal Highness of this improper " and secret traffic, and to assure them that if sub- " sequent to the date of this letter any commission " shall be discovered to have been so obtained, such " commission will be immediately cancelled, and the " officer be reported to the King as having acted in " direct disobedience to the orders of the Commander- " in-Chief."

13. Is there anything in that circular to army agents expressly bearing upon the point of our present enquiry; does not it seem rather to refer to the manner in which first commissions were obtained. It speaks of an "improper and secret traffic"—Yes.

14. (*Sir J. Scarlett.*) It says nothing of an extra price being given?—No; it refers more to obtaining the first commission; indeed it appears to refer to that entirely.

15. (*Chairman.*) It refers to first commissions being obtained by improper means, and through what are termed "Army Brokers"?—Yes.

16. Then, in a circular to commanding officers, I see that there are extracts from the regulations en- closed, in which it is stated that "His Majesty's " regulations, in regard to the sums to be given and " received for commissions in the army, have in " various instances been disregarded to the great " prejudice of His Majesty's service?"—Quite so.

17. And a regulation was made as to the manner in which an officer having leave to sell his commission was to send in his resignation?—Yes.

18. I observe that the commanding officer of a regiment was directed in transmitting the resignation of the officer to the Commander-in-Chief, "at the "same time, if there are purchasers in the corps, to " recommend in succession the seniors of their re- " spective ranks for purchase, both the colonel and " commanding officers certifying that they are satis- " fied that no more than the sum stipulated by His " Majesty's regulations is given or received"?—Yes.

19. Was not the effect of that to designate the officer who was to succeed to a commission which was to be vacated by an officer resigning. The senior of the corps, if he had the money to purchase, would necessarily succeed if qualified?—The senior for purchase, if qualified, must necessarily succeed.

20. Be good enough to look back to page two at the paragraph beginning "In 1786." From the terms of that circular letter it seems to have been contemplated that the officer resigning should not know who was to succeed him; and of course it would make it more difficult to negotiate for any price beyond the price authorized by the regulation if the officer resigning did not know who was to succeed him?—Quite so. There are circumstances under which the senior does not succeed.

21. Be good enough to state what they are?—For instance; if an officer has committed any offence and has been tried by a court-martial but has been allowed to receive the value of his commission, the purchase is not, as a rule, allowed to go in the regiment.

22. That is compulsory retirement and not volun- tary?—Quite so.

23. (*Sir W. James.*) How does it go then?—An officer from the general army is selected.

24. (*Chairman.*) In these regulations of 1786, to which we are now referring, there was a repetition, was there not, of the prohibition against giving any- thing beyond the regulated price?—Quite so.

25. And a statement that if these regulations were evaded, or attempted to be evaded, a report was to be made to the Commander-in-Chief, in order that the officer might be removed from the service?—Quite so.

26. Then there seems up to that period to have been a constant endeavour, from the year 1766, on the part of the military authorities to check this practice?—Yes, up to 1807.

27. No statute law had been passed prohibiting it up to that time?—No.

28. Be good enough to state the purport of the enactment passed in 1807; it was a clause in the Mutiny Act, I believe?—In 1807 a clause was inserted in the Mutiny Act forbidding the traffic in commissions.

29. Will you read that clause?—It is the 47 George III., chapter 32, clause 97. "And whereas "great inconvenience has arisen to His Majesty's service from persons not authorised agents of regiments "troops, or companies, negotiating for the purchase "and sale of commissions, and much larger sums than "are allowed by His Majesty's regulations are often "given and received for commissions, and great "frauds committed: be it therefore enacted, that every "person not an authorised agent of any regiment, "troop, or company who shall negotiate or act as "agent for or in relation to the purchase or sale of "any commission in His Majesty's forces, and also "every authorised agent as aforesaid who shall take, "accept, or receive any commission or sum of money "or reward for negotiating the purchase or sale of "any such commission, or acting as an agent in relation thereto, shall forfeit for every such offence the "sum of 100*l.* and treble the sum which shall be "given or received for or in relation to any such "commission, over and above the sum allowed by His "Majesty's regulations."

30. Is not that clause exclusively applicable to agents. There appears to me to be no reference to officers of the army in that clause?—Quite so.

31. Then what was the next Act that was passed on the subject?—The 49th of George III., chapter 126, entitled "An Act for the further prevention of "the sale and brokerage of offices."

32. Was that in 1809?—Yes.

33. What is the effect of clauses 7 and 8 of that Act?—Clause 7 refers to agents and clause 8 to officers in the army.

34. Will you read those clauses?—Clause 7 is—"Provided always, and be it further enacted that "nothing in this Act contained shall extend or be "construed to extend to any purchases, sales, or exchanges of any commissions or appointments in the "honourable band of gentlemen pensioners, or in His "Majesty's Yeomen Guard, or in the Marshalsea, and "the Court of the King, of the Palace of the King "at Westminster, or to extend to any purchases, sales, "or exchanges of any commissions in His Majesty's "forces for such prices as shall be regulated and "fixed by any regulation made or to be made by His "Majesty in that behalf, or to any Act or thing done "in relation thereto by any agents, provided that "such agents shall be agents of regiments authorized "by the Commander-in-Chief of His Majesty's forces, "or by colonels or commandants of regiments or "corps, and shall act therein under such regulations "only as are or shall from time to time be established "by His Majesty, and shall not cause or procure or "knowingly permit or suffer to be printed or advertised any advertisement or advertisements, proposal "or proposals, for any purchase or sale or exchange "of any commission, or any negotiation relating "thereto, and shall not receive, or take any money, "fee, gratuity, or reward, or any promise, agreement, "covenant, contract, bond, or assurance, or by any "way, means, or device contract or agree to receive "or have any money, fee, gratuity, or reward for "acting in such behalf." Clause 8 is—"Provided "also, and be it further enacted that every officer in "His Majesty's forces who shall take, accept, or receive, or pay, or agree to pay any larger sum of "money, directly or indirectly, than what is allowed "by any regulations made by His Majesty in relation "to the purchase, sale, or exchange of commissions "in His Majesty's forces, or who shall pay or cause "to be paid any sum of money to any agent or broker "or other person for negotiating the purchase or sale "or exchange of any such commission, shall on being "convicted thereof by a general court-martial, forfeit his commission and be cashiered, and as an encouragement for the detection of such practices "such commission so forfeited shall be sold and half "the regulated value (not exceeding five hundred "pounds) shall be paid to the informer, and the other "half or remainder, if more than five hundred pounds, "shall go and be applied as His Majesty shall order "and direct by any regulations made from time to "time in that behalf. Provided also that every person who shall sell his commission in His Majesty's "forces, and not continue to hold any such commission in His Majesty's forces, and shall upon or in "relation to such sale take, accept, or receive directly "or indirectly, any money, fee, gratuity, loan of "money, reward, or profit, or any promise, agreement, covenant, contract, bond, or assurance, or "shall by any device or means contract or agree to "receive or have any money, fee, gratuity, loan of "money, reward, or profit beyond the regulated price "or value of the commission sold, and also every "person who shall wilfully or knowingly aid, abet, "or assist such person therein shall be deemed and "adjudged guilty of a misdemeanour within the provisions of this Act."

35. That Act is still in force?—Yes, it is still in force.

36. (*Sir W. James.*) Has any opinion ever been taken within your knowledge by the War Office as to whether that Act applies to the present Sovereign. It says "Every officer in *His* Majesty's forces." Has any opinion ever been taken as to whether the words "His Majesty" there are equivalent to the Crown?—Not to my knowledge.

37. (*Chairman.*) Has not a reference been made to these clauses of the Act of 1809 in the Queen's Regulations, which have been issued from time to time down to the year 1866 or 1868, or at all events to a very recent period in order to call the attention of the officers of the army to them?—Yes, quite so; down to the Queen's Regulations of 1859.

38. They are referred to in the 38th of those regulations, I think?—Yes; that is at page 75: "It is also to be observed that 'every officer in Her "'Majesty's forces who shall take, accept, or receive, "'or pay, or agree to pay any larger sum of money, "'directly or indirectly than what is allowed by "'any regulations made by Her Majesty in relation "'to the purchase, sale, or exchange of commissions "'in Her Majesty's forces, or who shall pay or cause "'to be paid any sum of money to any agent or "'broker, or other person for negotiating the purchase, sale, or exchange of any such commission "'shall, on being convicted thereof by a general "'court-martial, forfeit his commission and be "'cashiered,' and 'that every person who shall sell "'his commission in Her Majesty's forces, and not "'continue to hold any commission in Her Majesty's "'forces, and shall, upon or in relation to such sale, "'take, accept or receive, directly or indirectly, "'any money, fee, gratuity, loan of money, reward "'or profit, or any promise, agreement, covenant, "'contract, bond of assurance, or shall by any device "'or means, contract or agree to receive, or have "'any money, fee, gratuity, loan of money, reward "'or profit beyond the regulated price or value of "'the commission sold, and also every person who "'shall wilfully or knowingly aid, abet, or assist "'such person therein shall be deemed and adjudged "'guilty of a misdemeanor.'"

39. That in fact was a recital of the Act of 1809?—Yes, of that portion of the Act of 1809. It is a curious thing too that in the quotation from the Act in these regulations instead of "His Majesty" "Her Majesty" is inserted. It is quoted as "Her "Majesty's forces."

40. Will you be so good as to read the 39th of those regulations following the reference to the

Lt.-Gen. Sir E. Lugard, G.C.B.

29 April 1870.

provisions of the Act of 1809:—"In all cases when "these regulations shall be infringed or evaded the "promotions or exchange will be at once cancelled, "and where proof can be obtained that the pro- "visions of the Act 49 Geo. 3. c. 126, and those of "the Mutiny Act have been directly or indirectly "infringed the commander-in-chief will take mea- "sures for giving full effect to the penalties attaching "to such offence."

41. (*Mr. Muntz.*) That refers to the Act of 1809, does it not?—Yes.

42. (*Chairman.*) I believe those regulations remained in force from 1859 to 1866, did they not?—To 1868.

43. Is not it the case that in 1868 the Queen's Regulations and the Royal Warrants were consolidated?—Yes.

44. And that the Royal Warrants for the first time then contained a statement of the prices of commissions which before had been contained only in the Queen's Regulations?—Yes, the Royal Warrant of 1866.

45. Is it also the case that when the transfer took place the reference to the Act of 1809 was omitted, so that since 1868 the attention of officers has no longer been called by the warrants or regulations which are now combined to the provisions of that Act?—Yes, certainly.

46. Are you aware of the object with which that alteration was made in 1868?—I have only heard that the military authorities and the compilers of the Queen's Regulations considered that it should be struck out from the regulations relating to discipline; and the compilers of the Financial Warrant were under the impression that it was not right to quote an Act of Parliament in a Royal Warrant.

47. The natural inference from the omission would appear to be that the Secretary of State or the military authorities, if they were acting in concert with the Secretary of State, thought it no longer necessary specifically to call the attention of the officers of the army to the stringent provisions of that Act; do you think that that was the case?—No, that was not the case. In the first revise of the Financial Warrant the attention of the officers was called to that Act, and it was only when the final revision of the warrant took place that the Secretary of State struck it out, and I believe it was done for the reason I have stated, namely, that he considered a Royal Warrant should not quote an Act of Parliament.

48. But in point of fact, has not the effect of it been that the attention of officers is no longer specifically directed as it was before to the prohibitions contained in the Act of 1809?—Certainly.

49. Some alteration appears to have been made in the year 1815 in the Mutiny Act of that year, in the terms of the clause relating to what is called "trafficking in commissions?"—Yes. A clause was inserted assimilating it to the clauses in the Act of 1809

50. (*Mr. Hunt.*) That is to the seventh clause?—Yes.

51. (*Chairman.*) Relating to agents?—Yes.

52. And prohibiting on the part of agents, their being parties to negociating for the use of themselves or any other person, the payment or receipt of "any "sum of money or other consideration above the "amount of the price allowed by His Majesty's "regulations?"—Yes.

53. (*Mr. Hunt.*) Was there any clause in that Act relating to officers?—I am not aware that there was.

54. There has been no clause in any Mutiny Act with reference to officers paying more than the regulation price, has there?—No, I think not. The clause refers entirely to agents.

55. (*Chairman.*) You referred just now to a stringent declaration that was required in 1783 from officers that they had not demanded or accepted, nor would demand or accept, directly or indirectly, at any time or in any manner whatever more than the price limited and fixed by His Majesty's regulations as the full value of the commission?—Quite so.

56. How long did that remain in force?—That remained in force up to 1824, I think.

57. What took place then?—Then in consequence of a debate in the House of Commons introduced by Mr. Hume, that declaration was discontinued. This paper says: "On the second of April following, a "memorandum was submitted to the King proposing "the abolition of the forms of declaration hitherto "required and eliminating from the regulations all the "words calling for them, substituting the following "rules, that the quarterly returns of officers who are "desirous of purchasing promotion either in their "own corps or in any other regiment, should con- "tinue to be sent in as at present, according to the "form prescribed in page 52 of the said regulations "and orders, with the addition of the following "certificates signed by the colonel or command- "ing officer of the regiment, first, that he has "ascertained by reference through the regimental "agent to the responsible persons, that in each case "there is good and sufficient security that the pur- "chase money will be forthcoming when called for. "Second, that of the individuals so returned as pur- "chasers A. B. C., &c., are in all respects deserving "of promotion, and those whom he would not hesitate "to recommend whenever the vacancy shall offer, as "fit for the duties of the higher and more responsible "commission. When the regimeut and commanding "officer are abroad, the commanding officer to state "the security to which reference is made, and the "military secretary will ascertain through the agents "whether that security be good and sufficient, it "being understood that if the answer be not at once "satisfactory the individual will be struck out of the "list of purchasers. That this quarterly return so "certified shall be the only communication made on "the subject of promotion by purchase, and that when "a resignation is sent in it shall be considered uncon- "ditional and irrevocable, and no successor shall be "poinred out or recommended. In all cases the in- "dividual selected for the purchase, or his sureties, "will be called upon to lodge the purchase money "with the agents. If the senior who may have been "returned as a purchaser, and whose money shall "have been certified to be forthcoming, should decline "the purchase when selected for it, or his sureties "should decline it for him, he or they will be called "upon to state the reason for so declining to the "Military Secretary, for the Commander-in-Chief's "information, and if the explanation should not be "considered satisfactory, his name will be struck out "of the future list of purchasers. The candidate "who may be selected from reference to the quarterly "returns for the purchase of promotion out of his "own corps, will be directed to lodge the purchase "money without being acquainted in what regiment "he is to obtain the promotion, nor will any applica- "tion for purchase of promotion which points out the "expected vacancy be admitted. In all cases of ex- "changes between officers, both on full pay, whether "of cavalry or infantry or from cavalry to infantry, "the recommendations must be signed by the colonels "or commanding-officers of the respective regiments, "accompanied by a declaration, signed by the in- "dividuals and certified by the colonels or command- "ing officer, that they do not intend to sell out or "retire upon half-pay after effecting such exchange, "but that it is their *bonâ fide* intention to join and "do duty with the corps to which they exchange "immediately; the leave of absence that may have "been granted to either or both being cancelled by "such exchange. That no officer of cavalry who "shall apply for permission to retire on half-pay will "be permitted to receive the difference between full- "pay of cavalry and full-pay of infantry, but his ex- "change will be viewed as being, to all intents, an "exchange to the half-pay of his own branch of the "service, receiving the difference between full and "half-pay, and subject to the restrictions applicable "to such exchanges. That in exchanges to half-pay, "either with or without the differences, or from

" cavalry to infantry, the application must be general " and unconditional, and the officer, upon full-pay " will not be allowed to point out his successor, who " will be indiscriminately selected by the Commander- " in-chief without any previous notice to the parties. " It is further most humbly submitted to His Majesty " that it shall be declared that in all cases when the " regulations shall appear to the Commander-in-Chief " to have been infringed or evaded, the promotion or " exchange shall be at once cancelled; and in all cases " where proof can be obtained that the provisions of " the Act 49 George III. ch. 126, and the 134th " clause of the Mutiny Act have been infringed, the " Commander-in-Chief will take measures for giving " full effect to the penalties which attach to such " offence."

58. (*Mr. Muntz.*) It appears evident from the statement of Sir Henry Hardinge, afterwards Lord Hardinge, that he believed that "under these regulations it " was impossible for a junior officer, however rich, to " step over the head of a senior officer" so long as the latter had the means of putting down the stipulated price for his commission?—Nor can he do so at the present day. If I am first for purchase, and I am determined not to give a farthing above the regulated price, no officer under me, if he has millions, can go over my head.

59. But under such circumstances, no officer could remain in the regiment?—It requires only a certain amount of moral courage.

60. (*Chairman.*) You referred just now to a debate in the House of Commons; was not an objection then taken to the declaration by Mr. Hume, and allowed by the Government of the day, that "there was ' scarcely one case in 10 in which officers received ' their commissions at the regulated price, though " they thus certified that fact." In fact the practice was notorious?—Quite so.

61. I think it was not denied that the practice was notorious. The objection was held to be entitled to weight, and the declaration was discontinued?—Quite so.

62. I see in the regulations made on the discontinuance of that declaration, it is said that quarterly returns were to be sent in of the officers who were desirous of purchasing?—Yes.

63. "And that when a resignation is sent in, it " shall be considered unconditional and irrevocable, " and no successor shall be pointed out or recommended?"—Yes.

64. In 1837 that is stated to have been omitted. Are you able to state why that change was made, and why that part of the new regulations was discontinued in 1837?—"In the year 1837 a new edition of the " 'King's Regulations' was issued, and two of the " most important of the regulations which were intro- " duced in 1824 were omitted." I am not cognisant of the reasons for that.

65. There was also another regulation made which was omitted then. "The candidate who may be " selected, from reference to the quarterly returns, for " the purchase of a promotion out of their own corps, " will be directed to lodge the purchase money, with- " out being acquainted in what regiment they are to " obtain the promotion; nor will any application for " the purchase of promotion which points out the ex- " pected vacancy be admitted?"—Yes.

66. Both those regulations were omitted from the edition of the "Regulations" of 1837?—Yes.

67. Is it not the case that in those regulations, although the declaration was discontinued this rule was laid down:—"It is further most humbly submitted " to His Majesty that it shall be declared that in all " cases when the regulations shall appear to the Com- " mander-in-Chief to have been infringed or evaded, " the promotion or exchange shall be at once can- " celled; and in all cases where proof can be obtained " that the provision of the Act 49 Geo. III. c. 126, " and the 134th clause of the Mutiny Act, have been " infringed, the Commander-in-Chief will take mea- " sures for giving full effect to the penalties which " attach to such offence?"—Yes, quite so.

68. Does not it appear from that, that although the declaration was discontinued because it had been found to be practically ineffectual, and to have been taken by officers notwithstanding the notoriety of the practice, it was intended still to enforce the provisions of these two Acts against the practice of paying more than the regulated price for commissions?—Quite so.

69. Is there anything else, either in the Statute Law or in the Royal Warrants and Regulations, bearing upon this question?—Nothing that I am aware of.

70. Nothing but what is contained in this memorandum which you have handed in?—Nothing.

71. (*Sir W. James.*) What is considered in this office to be the practical mischief arising from one officer receiving and another officer giving more than the regulation price for a commission?—The great mischief is that it bears heavily upon the poorer men.

72. As I understand you a poor man who is in the course of promotion is entitled to say, I will not give more than the regulated price?—Quite so. He has the power to do it, but the doubt is whether he has the moral courage to withstand the pressure that would be put upon him, no doubt by his brother officers.

73. Does that differ from the moral pressure which may be put on non-purchase corps upon officers for the purpose of making up a sum to induce another officer to retire?—It is exactly the same. No officer in a non-purchase corps could refuse his quota towards the bonus. Indeed the bonus system bears more heavily upon poor men than the purchase system.

74. Is there anything in any regulation or in any law that you are aware of to prevent that bonus system?—Nothing. It is merely a private subscription among the officers to give a bonus to induce a senior to go.

75. Are you aware whether that practice prevails in the non-purchase corps of the army in England. I am told that it prevails very largely in the Indian army, in the Engineers and Artillery for instance?—I think not; I never heard of it. You see these corps are scattered over the world I may say, so that you never could get an accord; you never could get the officers together for the purpose of making any such arrangement.

76. (*Sir J. Scarlett.*) Has not there been an attempt in the Artillery, which is a non-purchase corps, to introduce some kind of purchase system or some subscription for retirement?—I have not heard of any, but I think it is very likely that there may have been.

77. (*Lt.-Gen. Peel.*) Notwithstanding these Acts of Parliament and regulations, and the notoriety of their having been constantly evaded, are you aware since your connexion with the War Office of any prosecutions ever having been carried on in consequence of such evasion?—Never.

78. (*Mr. Hunt.*) Or of any military punishment having been inflicted?—No.

79. Has any investigation been made with a view to a prosecution within your knowledge?—Never. In short I may say that the fact of extra prices over the regulation prices being given is not officially known; I may almost say that we know nothing of it because the transaction is outside this office altogether. Perhaps you will allow me to explain how the sale takes place. An officer wishes to sell; he applies through his commanding officer to the Military Secretary at the Horse Guards. That application is then sent to this office to know what sum the officer will be entitled to, according to the rules and regulations of the service. That is stated, and we never know who the successor is to be, or any more of the transaction, until the names come up for submission to Her Majesty, in the paper that goes forward. Therefore we know nothing of what goes on with regard to the purchase.

80. (*Lt.-Gen. Peel.*) When the name of the successor comes up, if you had reason to believe that he

Lt.-Gen. Sir E. Lugard, G.C.B.

29 April 1870.

was going to pay an over-regulation price, would it not be your duty to object to him?—No, because we have nothing at all to do with that.

81. The submission paper comes to you in the first instance before it goes to Her Majesty?—Yes.

82. And if you had any reason to object to an officer on account of his paying over-regulation price, would it not be your duty to point that out to the Secretary of State?—Certainly, if that was officially known to me.

83. If it were notorious that an officer was going to give more than the regulation price, would it not be your duty to point that out?—Yes it would; but you cannot make an official representation upon a rumour outside, and as was stated in the debate in the House of Commons, and has been recorded, you never can get at the facts, you never can, even from the agents, arrive at the fact that the money is *bonâ fide* given by one officer to the other for this object.

84. I only wanted to bring out the fact that it would be your duty to point it out if there was anything contrary to regulation, a person over age or anything of that kind within your knowledge?—Yes, certainly.

85. (*Sir J. Scarlett.*) That is if anyone were to report it to you officially?—Yes. I think it is stated in the paper I was reading, that they never have been able to establish the facts before a Court of Law.

86. (*Chairman.*) The declaration formerly required by the regulations having been officially withdrawn, would the military authorities think themselves justified in requiring a declaration from an officer that he had not violated the law in that respect?—I should say not.

87. Unless information were given them which led them to suppose that it had been done and which might lead to an inquiry?—That is the point; you could not do it upon rumour, you must have actual facts to go upon before you could officially notice the matter, and the getting those facts is of course the difficulty.

88. (*Mr. Muntz.*) You stated just now that there was a certain amount of moral courage requisite to pay the regulation price without the customary over-regulation price?—Yes.

89. Is it not the custom to put down the name for purchase of every officer who wishes to purchase?—Yes.

90. When the name is put down, is not it a matter of notoriety that it is looked upon as the gentlemanly thing in the regiment that the officer will not only pay his regulation price but also the customary over-regulation price?—Not at all; I have known instances of an officer not being able to pay more, and being unwilling to forego his promotion; that has been done.

91. There are individual cases, but is not it generally the case that an officer is tabooed if he refuses to pay the over-regulation price?—I am not prepared to say that of my own knowledge; I am not aware of it and I doubt it.

92. But if an officer does not put down his name for purchase in that case he would be purchased over in the line?—Yes.

93. If, however, it was a non-purchase regiment in that case he would not be purchased over?—Of course not.

94. Then this moral difficulty would not exist and moral courage would not be requisite, as he would not have to put down his name for purchase?—He would still have to pay what very likely he could not afford and what would plunge him into debt, that is, his quota to the bonus for the retirement of his senior officer, if the Indian system were introduced.

95. But he would not have to put down his name for purchase, and thereby literally cheat (if I may use the term) the other officers, who would look upon his over-regulation price as the customary and proper thing?—I cannot agree to that.

96. (*Lt.-Gen. Peel.*)—His moral position would be the same in a purchase as in a non-purchase regiment, would it not?—Quite so.

97. (*Mr. Muntz.*) Is there not this difference, that in the one case he puts down his name, giving the customary undertaking that he will pay the over-regulation price, and that in the other case he does not put down his name, and gives no undertaking at all. In the purchase regiments an officer puts down his name for purchase, and gives an undertaking that he will pay the customary over-regulation price?—No, I cannot say that.

98. Is not an officer notoriously called a "Sticker" who refuses to do it?—I am not aware of it.

99. (*Chairman.*) Have you read the evidence of Sir John McDonald, who was at that time Adjutant-General, given before the Commission on Naval and Military Promotion and Retirement in 1838?—Yes.

100. I see he says that "there is no member of "a regimental society so unpopular as he who pro- "claims his determination not to exceed the regu- "lated price; thereby standing as an obstacle to "promotion by purchase in the regiment to which he "belongs." Do you concur in that view?—I should say so; I have no doubt that it is so in most cases.

101. Are you aware of the circumstances under which an officer is liable to lose the purchase money he has paid for his commission?—By his promotion to the rank of general officer, by compulsory retirement from the service, or by death.

102. (*Sir J. Scarlett.*)—Or by reduction?—No.

103. Supposing the regiment is reduced; what would be his position?—He would be brought into full pay in another regiment, as opportunity occurred.

104. (*Chairman.*) You stated that he would lose the purchase money he had paid for his commission by death. Was not there some new regulation made at the time of the last war by which, in the case of an officer killed in action or dying within six months from wounds, the family did not lose the value of his commission?—Quite so. Those were exceptional cases. I was speaking of time of a peace.

105. (*Lt.-Gen. Peel.*) Then you qualify your former answer, that he loses his purchase money by death, by adding with the exception of officers killed in action or dying within six months of wounds received before the enemy?—Yes, to a certain extent.

106. (*Chairman.*) That, I believe, is confined to cases in which the circumstances of the officer make it just that his family shall receive some compensation of that kind?—Yes, it is so stated in the warrant.

107. Can you put in the warrant under which that regulation was made?—It was in 1856, and it runs thus:—"We have deemed it advisable to allow to the "widows and families, or to certain of the relatives "herein-after specified, of officers of our army, who "since the declaration of war with Russia, have been "or may be killed in action, or who have died or may "die of wounds received in face of the enemy within "six months after being wounded, the alternative of "receiving a fixed sum of money in lieu of such "rates of pension and compassionate and other al- "lowances as are prescribed by our Royal Warrant "of the 15th of June 1855. And whereas we were "pleased to issue a warrant under Our Royal Sign "Manual dated 23rd October 1855. Our will and "pleasure now is, that Our said Royal Warrant of "the 23rd October 1855 shall from henceforth be "cancelled, and that this, Our Royal Warrant, to be "administered and interpreted by Our Secretary of "State for War, shall be constituted in lieu thereof, "and shall be the sole and standing authority upon "the matters herein contained; but shall not annul "or in any way invalidate any act heretofore per- "formed by Our Secretary of State for War, under "the provisions of the last-mentioned warrant." Then it is in the original Pension Warrant that it states that the circumstances shall be taken into consideration.

108. (*Lt.-Gen. Peel.*) That applies to pensions and not to money paid for the purchase of commis-

sions?—Yes; but this is in lieu of it; they may receive either a pension or a money allowance.

109. I understand that the question was, under what circumstances they were to receive back money paid for a commission. That which you have read has no reference to money previously paid—it would apply equally to an officer who had never purchased at all?—Yes.

110. (*Chairman.*) Is an officer entitled after a certain number of years' service to retire on full pay?—Yes.

111. After how many?—After 30 years.

112. He is entitled to retire then; but is he compellable to retire, or is it a voluntary act on his part?—A voluntary act.

113. Are you aware of the practice of paying money to an officer to induce him to retire, in order that there may be a step of promotion in the regiment?—I have no doubt that it is done continually, but I have no facts bearing upon the case.

114. I do not mean have you any official knowledge of it, but are you aware that the practice is equally notorious with that of giving an excess beyond the regulation price for commissions?—I believe so.

115. (*Mr. Hunt.*) That is equivalent to the bonus system?—It is not exactly equivalent to a bonus. The worst of the bonus system, as I have seen it, is that every officer is compelled to pay, from the junior ensign upwards. He pays not for the actual promotion but for each step in gradation up, and by the time he gets to be senior lieutenant I have known officers in India involved in debt. They have been obliged to borrow the money for each step as they had to pay it.

116. (*Sir W. James.*) Is there any prohibition by warrant or regulation against that practice?—No.

117. Can you distinguish in principle between the two practices of paying a bonus contributed to by the different officers of the regiment and paying over-regulation price?—Paying an over-regulation price rests entirely with those who can afford it, or at any rate who have means at their disposal; whereas the bonus very often presses upon men who have to borrow the money to pay it, and who, if in a purchase corp would not purchase at all.

118. With regard to the principle of it, is there any difference in the principle between getting rid of a man by paying a bonus and getting rid of him for the benefit of an individual by paying an over-regulation price?—Not at all, the principle is the same.

119. (*Sir J. Scarlett.*) The object of the bonus is to induce a senior officer to retire?—Yes.

120. To give him a better retirement?—Yes, to give him a better retirement.

121. (*Sir W. James.*) The practice is oppressive upon poor men in each case, is it not?—Yes.

122. (*Sir J. Scarlett.*) Does not it happen that some men do not derive any benefit from having subscribed to a bonus?—Many do not.

123. (*Mr. Muntz.*) All the juniors in case they die or sell out have lost their money?—Yes, in case they die.

124. (*Mr. Hunt.*) Under the bonus system promotion goes through the whole regiment; every man gets a step?—Yes.

125. But the paying over-regulation price operates only in favour of one particular individual?—Yes, the man who purchases.

126. (*Chairman.*) In the case of an officer retiring upon full pay, does not the officer next in succession obtain the promotion without purchase?—Yes.

127. And therefore is it to his interest to give a certain sum of money to an officer entitled to retire, in order to induce him to make a vacancy which he can get without purchase?—Certainly.

128. Is it the practice to do that?—I understand that it is.

129. (*Mr. Hunt.*) With regard to the difference of promotion in the case of paying a bonus, and in the case of paying an over-regulation price, you state that the fourth captain for instance may leap over the heads of his three seniors by purchase?—Yes.

130. In that case all below the fourth captain would gain a step, would they not?—Yes, certainly.

131. It would be in that case the three who were passed over who would gain nothing?—Quite so.

132. But all below the man who purchased would obtain a step?—Yes.

133. But in the case of the bonus system the whole of them would gain?—Yes.

134. There would be no passing over any one?—There would be no passing over any one.

135. (*Chairman.*) Is it the case in the instance to which I have been referring of an officer retiring on full pay, that all the officers in the regiment contribute to make up the sum required by that officer to induce him to retire, or that it is paid by the officer who immediately succeeds him?—I should say that it is made up by those who immediately succeed.

136. Just as the over-regulation price would have been if the Commission had gone by purchase?—Quite so.

137. Do exchanges from one regiment to another frequently take place?—Yes.

138. Are there exchanges from the line into the Guards, for instance?—Yes.

139. From a regiment going abroad to one remaining at home?—Yes.

140. From one battalion of a regiment going abroad to another battalion of a regiment remaining at home?—Yes.

141. Is it equally the practice, or have you reason to believe that it is so, that money passes between officers in making these exchanges?—I have not the slightest doubt of it.

142. Perhaps you can tell the Commission what the price paid in those cases is?—No, I cannot.

143. (*Mr. Muntz.*) Is it not notorious that that is done?—Yes.

144. (*Chairman.*) That, I think, is prohibited by the terms of the Act of 1809?—Yes.

145. The word "exchange" is used in that Act?—Yes.

146. So that that is equally illegal with the payment of a sum in excess of the regulation price for promotion?—Yes.

147. (*Lt.-Gen. Peel.*) You state that after 30 years' service an officer is entitled to retire upon full pay?—Yes.

148. After a certain number of years' service he is entitled to sell his commission, is he not, even if he has not purchased a single step?—Yes.

149. How many years' service entitles him to do that; it is 20 years' service, is it not?—Yes; after 20 years he can sell for the full price.

150. (*Chairman.*) Therefore, after 20 years' service, a non-purchasing officer is in exactly the same position as if he had purchased his commission, and is entitled to sell upon the same terms for the full regulation price?—Yes.

151. (*Lt.-Gen. Peel.*) Practically he would receive exactly the same price as an officer who had purchased every one of his commissions, would he not?—Yes.

152. But an officer who has not served 20 years and makes an application to go upon half-pay, would be told by the War Office, we will not give you the half-pay, but you may receive an allowance for your services?—The warrant says:—"An officer shall "not be allowed to sell any commission which he "shall not have previously purchased, nor the com-"mission of a rank in which he shall not actually "have served, unless with the sanction of our Com-"mander-in-Chief and our Secretary of State for "War, after service on full pay of 20 years or up-"wards. An officer who shall have served less than "20 years and more than three years, and who shall "have obtained any or all of his commissions with-"out purchase, may be permitted to receive, on re-"tiring from the service, the full value of such "commissions as he may have purchased, or of a "first commission granted without purchase for dis-

Lt.-Gen. Sir E. Lugard, G.C.B.

29 April 1870.

"tinguished conduct in the field; and in respect of "his other non-purchase commissions, if he be com- "pelled to retire by ill-health, misfortune, or other "stringent cause, a sum not exceeding 50*l.* for every "year of home service, and 100*l.* for every year of "foreign service," — he would get that besides. Therefore the 20 years' service only entitles him to receive the full value for the whole of his commissions.

153. And there is also this distinction, that after 20 years' service he is as much entitled to sell his commission as a man who has purchased every one of his commissions?—Yes.

154. In the other case you will see that it says he "may be permitted" to do so—he has no actual claim—that is the distinction?—Yes.

155. But when he has served for 20 years, the commission is just as much his own as if he had purchased every step?—Yes.

156. (*Chairman.*) Is not it the case now that without reference to ill-health or any necessity that may arise for an officer's leaving the army, if after 10 years' service he quits the army, he gets the 50*l.* or 100*l.* a year, or whatever the sum may be for every year that he has served?—Quite so.

157. Then the qualification is not necessary with regard to ill-health?—The warrant says: "ill-health, "misfortune, or other stringent cause."

158. In those cases I presume he equally negotiates with the officer who is to get the benefit of his leaving the regiment, for a sum of money which would be tantamount to the excess of price paid, provided he was selling his commission on the usual terms?—Doubtless.

159. (*Mr. Whitbread.*) Is not it the fact that the bonus which is given to an officer to retire on full pay is made up by the contributions generally of the seniors of each rank below him who would thereby obtain a direct step?—No, I think that the practice which I have generally understood to exist and seen carried out would be that every officer gives a quota. There is a regulated scale from the senior to the junior.

160. (*Sir J. Scarlett.*) You refer to the bonus system in the Indian army?—Yes; that is the only bonus system that I know of.

161. (*Mr. Whitbread.*) I am speaking of that bonus which is given to an officer after 30 years' service to induce him to retire upon full pay?—I do not know that there is any, and I do not know how it is regulated at all; I only know of the rumour. I imagine that it is so, and I should think that very few officers would go unless they got a certain sum of money; but how that money is collected I cannot say.

162. I am not speaking of your official knowledge?—I do not know privately either; I may explain to you that all my regimental service and nearly all my army service was passed in India; I was there for 27 years, and there is very little going on in India, either of the payment of over-regulation price or of the traffic which exists in the home service.

163. (*Mr. Muntz.*) Are you referring to the old Company's service or the Queen's service?—The old Company's service.

164. In the non-purchase regiments, that is, from the 101st to the 109th, I believe, does that system of bonus, as far as you are aware, continue?—I suspect not, especially when they are brought home; then the officers could not very well pay it. In India there is greater facility; the allowances are better, and there are facilities for borrowing money from the banks there, and a poor man is able to get a few pounds to contribute. In this country he could not do it; a man cannot live upon his pay, and it would be most difficult for him to get money for that purpose.

165. Does not it lead to a great deal of misfortune in India?—In some cases.

The witness withdrew.

Mr. C. Hammersley.

Mr. Charles Hammersley examined.

166. (*Chairman.*) Are you a partner in the house of Messrs. Cox & Co., army agents?—I am.

167. For how many regiments of infantry and cavalry are your house agents?—For two regiments of Life Guards and Blues, 21 regiments of cavalry, the brigade of Guards, the Artillery and Engineers, and 112 battalions of infantry.

168. Are the arrangements for the purchase and sale of commissions in those branches of the army in which commissions are sold made through your house?—Yes, they are.

169. Is the money for the regulated price of the commission lodged in your house, and do you certify to the Commander-in-Chief that it has been paid?—We do.

170. Is that the case in the grant of a first commission?—Yes, we report the money.

171. Upon that certificate being received at the Horse Guards, is the appointment or promotion, as the case may be, of the officer gazetted?—It is.

172. Is the money that was lodged with you then paid, and if so, to whom?—It is paid to the retiring officer.

173. In the case of a promotion?—Yes.

174. And in the case of a first commission?—It forms part of the sum that is paid to a retiring officer.

175. Are you aware of the terms of the present Commission, and the object with which it has been appointed?—I am.

176. We are directed to inquire as to the extent and manner in which the practice of paying in respect of promotions and of receiving in respect of retirements sums in excess of those sanctioned by the Royal Warrant of the 3rd of February 1866 exists. Have you read the evidence given by the late Mr. Charles Hammersley before the Commission of 1857 on purchase?—Yes.

177. Can you give the present Commission any information as to the practice referred to in that evidence of paying large sums of money in excess of the regulation prices?—I have reason to believe that it exists, but perhaps before I answer any question upon it, you will allow me to draw your attention to the Act of the 49th of George the Third, which is very stringent and very comprehensive in its terms.

178. We have just referred to the clauses of that Act?—On that account I am afraid I must answer the questions very generally. I am quite willing to give all the information that I have it in my power to give, but I am in this position, that I run the risk of compromising officers, or I may do so; that is my sole difficulty.

179. We feel that you will be quite right in stating any objection that occurs to you, therefore, if I ask any question which you think will subject you to any legal consequences, which you have a right to protect yourself against, you will feel yourself at liberty to take the objection; and in answering other questions you need not give the name of any officer or regiment?—With your permission I will speak generally.

180. Do all the pecuniary arrangements with regard to promotions in the army, not only as respects the regulated price, but as respects the prices paid in excess of the regulated price, pass through your house?—No, not necessarily. The regulation money must be received by us and reported by us in the mode in which I have mentioned to the Horse Guards; but with regard to anything else, although I know that it is a matter of notoriety, the arrangements need not be and in fact are not made through us.

181. What I want to know is whether in point of fact if an officer is going to retire from the army by the sale of his commission and another officer is going to pay for the commission with a view to his

promotion, the money which it is a notorious fact is paid in excess over and above the regulation price is generally paid through your house though it may not be entered in the same account?—Yes.

182. (*Sir W. James.*) The money is paid and received through you as private bankers?—Yes, as bankers, without any explanation whatever. As a matter of fact when I see large sums of money paid to a retiring officer, I form my own conclusion as to its being a payment in excess of the regulation price.

183. (*Sir J. Scarlett*). It is paid to the officer's private account?—Yes.

184. Did you receive it as his bankers?—Yes.

185. (*Chairman.*) Is it the case that when a negotiation for the sale of a commission is going on, the price to be paid by the officer to obtain the promotion, the money to be paid by A. to B., is deposited with you and paid over without stating what it is for to the officer retiring?—That is very commonly the case. We act upon the officer's instructions as to the payment of the money.

186. Taking the brigade of Guards in the first place, can you inform the Commission what in the several steps which are obtainable by purchase in the guards is the amount paid in excess of the regulated price in time of peace?—I can give it either approximately as regards the total of the regiment or as regards individual commissions.

187. Take the promotion from ensign and lieutenant, to lieutenant and captain, will you first of all be good enough to state what the regulation price is for that step?—The regulation price is 850*l.*

188. And what is the price in ordinary times actually paid?—1,800*l.*

189. (*Lt.-Gen. Peel.*) Does it vary in any of the regiments?—Yes, the Coldstreams are rather cheaper.

190. (*Chairman.*) Can you now state what it is from lieutenant and captain, to captain and lieutenant-colonel, giving both the regulated price and the actual price paid?—The regulation price is 2,750*l.* and the extra payment is 2,750*l.*

191. Then what is actually paid is just double the regulated price?—Yes.

192. Now in the Life Guards and Blues what is it?—For a cornetcy the regulation price is 1,260*l.*, the regulation for the next step is 525*l.*, and the extra is as much more in the Life Guards, in the Blues much less.

193. Does that go through the other ranks that are purchaseable?—Yes.

194. In the same proportion?—Yes; in nearly the same proportion.

195. The extra regulation price is in fact equal to the regulation price speaking generally?—Yes; I think we may say that it is so, or nearly so, in the Guards.

196. That is the case in the Life Guards, and in the Foot Guards?—It is hardly double in the Foot Guards. The regulation price there would be 4,800*l.* for a company, and the whole price that is usually paid is 8,500*l.*

197. That is in the regiments where the price is the highest. You said that in the Coldstreams it was rather lower?—Yes, that is the price paid in the Grenadiers and the Scotch Fusilier Guards.

198. (*Sir J. Scarlett.*) In the Coldstreams it is about 300*l.* less?—Yes.

199. (*Chairman.*) In the ordinary cavalry what is the proportion between the regulation price and the over-regulation price?—The over-regulation price is more than double in the cavalry; that is to say, it is more than as much again.

200. (*Sir W. James.*) It makes the amount more than double you mean?—Yes.

201. (*Chairman.*) Will you state now what the regulation price for a troop in a cavalry regiment is?—It is now 1,800*l.*

202. What is actually paid?—The sums vary a good deal.

203. Do they vary according to the place where the regiment may be, whether it is at home or abroad, or according to the character of the regiment?—It is a regimental system which has been going on for a great number of years. It varies a little in India, I think, but as a rule the regiments have a customary extra-regulation price.

204. Does it vary very much between one regiment and another?—The proportion paid by the officers varies a good deal. In the cavalry, for instance, in some regiments a cornet will only pay 250*l.* for his lieutenancy over the regulation price, in others he will pay as much as 900*l.*

205. Can you tell us in any one regiment (without mentioning the regiment, of course) what the price is that is paid in excess of the regulation through the different steps?—I thought the question might be asked me, and I have averaged the whole of the cavalry.

206. Exclusive of the Life Guards?—Yes. I find that the average for a lieutenant-colonelcy is 10,475*l.*; for a majority, 7,381*l.*; for a troop, 4,381*l.*; and for a lieutenancy, 1,275*l.*

207. You are speaking now of the whole prices paid, including the regulation?—Yes; including the regulation, which is respectively 4,500*l.*, 3,200*l.*; 1,800*l.*, and 700*l.*, for a lieutenancy.

208. Previously to 1860 was not it the case that in a cavalry regiment the regulation price for a first commission was much higher than that for a first commission in the infantry?—Yes. On the 31st of January 1860 the cavalry prices were reduced to those of the infantry.

209. The regulation prices of all the commissions were then reduced to the same as the infantry prices?—Yes.

210. What effect did that have upon the actual price paid?—The value of the commission was reduced *pro tanto*—the old cavalry difference was deducted because that sum is now receivable from the reserve fund.

211. You speak now of the regulation price?—Yes.

212. Of course a first commission is obtainable now for 450*l.*, as in the infantry?—Yes.

213. After first commissions, in the case of promotion, is the price actually paid upon the promotion of an officer to the successive ranks in the regiment diminished?—That is diminished by the amount of the regulation difference.

214. Is the amount of the excess payment increased proportionately?—No, the over-regulation payment remains the same.

215. Therefore there has been a diminution in the gross amount of the price paid to the extent of the difference between the old regulation price and the new in the separate steps?—Exactly.

216. (*Sir J. Scarlett.*) There has been no change in the price received?—No, because the officers who were then in the cavalry, of course, expected to be reimbursed their extra money, and they always have been hitherto.

217. (*Chairman.*) Then is the effect of the reduction this, that the amount paid in excess of the regulation bears a larger proportion to the whole amount than it did before?—Certainly.

218. With regard to the infantry of the line, can you give the same information, either stating the average prices, or taking a particular regiment, without naming that regiment of course?—They vary very little. I find that the over-regulation price paid is as nearly as possible 2,500*l.* for a lieutenant-colonelcy.

219. What proportion does the excess price paid bear to the regulation price?—I think you may say that it is about a quarter.

220. A quarter in excess of the regulation price?—Yes. For instance, the regulation price would be about 45,000*l.* for a whole regiment, and the average of the whole over-regulation payments would bring it up to about 60,000*l.* about an addition of a third.

221. Have you known cases in which an officer has deposited the money with you for the regulation

Mr. J. Hammersley.

29 April 1870.

price, and refused to pay any sum in excess, and has claimed his right to the step?—Officers do not lodge the money with us until it is called for.

222. Not for the regulation price?—No, not until it is called for by a letter from the Horse Guards.

223. Do you keep a list of the purchasing officers in each regiment?—Yes.

224. Therefore you know who are purchasing and who are non-purchasing officers?—Yes, a duplicate is sent to us, and the list is sent to the Horse Guards.

225. Have you known a case of an officer who stood first upon your list of purchasing officers, who has refused to pay any excess over the regulation price?—It does often happen.

226. What is the consequence in that case, is the promotion of the regiment stopped?—The promotion of the regiment is stopped for a time, but then very often some way is found out of the difficulty. I know a case now where the two senior captains are both on the list for promotion by purchase, but they will not give more than the regulation price.

227. How long now has it been known that they will not give more than the regulation price?—I think they have always held the same language. There they remain, they are old officers, and there is no way out of the difficulty; they will wait until the commanding officer is obliged to go either by becoming a major-general or otherwise.

228. You speak of two captains?—Yes.

229. In that case is either of the majors in that regiment ready to retire provided he can get not only the regulation price but the ordinary sum in excess of it?—I have no reason to doubt that they would be in due course ready to go, but the difficulty has been with the two senior captains.

230. Therefore, practically, that difficulty stops promotion in the regiment?—It does for a certain time.

231. You mean until some circumstances, such as death or promotion, takes away either the commanding officer or one of the two majors?—Yes.

232. Do you know of any instance in which, such being the case, an officer not being able to pay more than the regulation price, and being prepared to pay the regulation price, the officers below him have contributed to make up the ordinary sum paid in excess of the regulation price so as to prevent the stoppage of promotion in the regiment?—No, I cannot recall any case of that sort. I think it very often happens that where one officer in the succession is more wealthy than another he will pay a larger proportion than the ordinary proportion in the regiment; for instance, if the senior captain is in a better worldly position than the major he will take upon himself a larger proportion of the extra money.

233. Of what the major would have to pay to become lieutenant-colonel?—Yes, but that is a matter entirely for arrangement amongst the officers themselves.

234. I am quite aware of that, but I wanted to know what these arrangements were as far as you have reason to know them. Do exchanges from one regiment to another pass through your hands. Supposing an officer wishes to exchange from the line into the Guards, what steps are taken so far as they come within your cognizance?—All that we do is to put the officers in communication with one another.

235. An officer informs you of his desire to exchange from a regiment of the line into the Guards?—Yes.

236. What do you do upon receiving that information from the officer?—If we know of any other officer who is willing to exchange we put the two officers in communication and leave them to make their own arrangements.

237. No money is paid in such a case with the sanction of the military authorities or in accordance with the law?—No.

238. I believe the Act of 1809 prohibits any money being taken for such an exchange?—Yes.

239. Does money pass upon these occasions between the two officers?—Yes, I think it does; I have reason to believe that it does.

240. Take the case of a lieutenant and captain of the Guards exchanging with a captain in the line, do you know the amount of money which is ordinarily paid by the captain in the line to the officer in the Guards to effect the exchange?—A considerable sum is usually paid, something like 2,500*l.*

241. (*Sir J. Scarlett.*) But there would be a regulation price in that case on account of the difference in the value of the commissions?—Yes.

242. For instance, the commission of a captain in the Guards is worth 2,050*l.*, and a commission of a captain in the line is worth only 1,800*l.*, so that the captain in the Guards exchanging would receive the difference in the value of the two commissions?—Yes.

243. (*Chairman.*) He would receive that by law?—Certainly.

244. What he receives in excess is the difference between that and 2,000*l.*?—Yes. He would probably receive a little more, I think, but it certainly would be fairly 2,000*l.*

245. Do you know what it is in the case, which would not be a frequent one, of a lieutenant-colonel in the line exchanging with a lieutenant-colonel and colonel in the Guards?—It is a long time since there has been such a case.

246. An officer going in that way from the Guards to the line would become the commanding officer of a regiment?—Yes, if he becomes the senior lieutenant-colonel, or if there is only one lieutenant-colonel. But the cases are very rare now in which such an exchange takes place, because unless a man was very well qualified he would hardly be allowed to exchange.

247. I know the cases are rare. But looking to the advantage that an officer going from the Guards to the line would obtain in such a case, if any money passes who receives it?—The Guards officer would receive a very considerable sum.

248. (*Maj.-Gen. Steele.*) The companies in the Guards are worth more than a regiment in the line, are they not?—Yes, a great deal more.

249. (*Chairman.*) In the case of such exchange, does not the officer who succeeds to the command of a regiment get a much better position in the army with reference to his becoming a colonel and major-general?—No, there is only one real advantage that he would get, that it would be qualifying ranks for promotion.

250. Five years spent in commanding a regiment would qualify him to be a full colonel?—Yes; whereas in the Guards a captain and lieutenant-colonel will not qualify until he becomes a mounted officer.

251. Notwithstanding that advantage a considerable sum is paid by the officer of the line to the officer exchanging with him from the Guards?—Yes, certainly, because a company in the Guards is looked upon as the choicest position in the army.

252. (*Lt.-Gen. Peel.*) I understand your evidence to be this, that in every purchasing regiment in the service there is an extra regulation price which very seldom varies much for the commissions in that regiment; that is universal?—I wish to guard myself against saying that it is universal, because if I said that it was universal it would become particular, and there might be objections to that. I say that it is common—it is usual. I will not say it is universal, and I must not be understood as saying so.

253. (*Mr. Hunt.*) Have you ever known a case of the authorities at the War Office or the Horse Guards making inquiries as to whether more than the regulation price had been given?—No.

254. (*Chairman.*) Are your house also agents for any of the new regiments which, since the amalgamation of the Indian army with the Queen's army has taken place, are non-purchase corps?—Yes, for three or four—five infantry and one cavalry, I think.

255. Are you aware whether in those regiments any money is paid in the same manner, in order to

induce officers to retire to create a step in the regiment?—I have reason to believe that there is.

256. (*Sir. W. James.*) In the case of a major who has bought all his steps up to a majority, and paid the extra regulation price all the way up, and who then pays the extra regulation price to get the step to lieutenant-colonel, how does he get reimbursed any part of the extra regulation price he has paid for the lower ranks; for I suppose when he buys, the man below him would be promoted by seniority, would he not?—No.

257. Then the major will not buy until he has sold to a captain, and so on?—Yes.

258. Therefore it is a contribution from the whole regiment?—Yes.

259. (*Chairman.*) Is the case very frequent of a junior officer purchasing in the infantry of the line over the heads of a senior officer in the same rank?—Yes, it occurs, not very often, but sometimes.

260. Owing to the senior officer not being able to purchase?—Yes.

261. (*Lt.-Gen. Peel.*) Even if he was able to purchase, and there was a great chance as a senior officer of his obtaining promotion without purchase, he would not do so. For instance, supposing he was the senior lieutenant, and there was a colonel who would become a major-general in a very short time?—He might decline to purchase.

262. And probably would do so?—Probably he would.

263. If he had been a purchasing officer previously, and there was a great chance of his succeeding without purchasing, he would withdraw his name from the list for purchasing, would he not?—Certainly.

264. (*Chairman.*) It would be a great inducement to a junior officer to purchase, would it not, because he would get superior rank in the regiment?—Yes, to purchase before the vacancy occurred.

265. Can you state what is the highest price given for a lieutenant-colonelcy of a cavalry regiment?—I must say that I merely know these things from hearsay. I think I have heard of 17,000*l.* being given.

266. And in an infantry regiment of the line what has been the highest price?—The highest price I think that I ever heard of was 8,000*l.*

267. (*Mr. Whitbread.*) Of that 17,000*l.* how much was the regulation price?—6,175*l.* I think was the old cavalry price.

268. (*Chairman.*) We have been told that officers who have not purchased, if they have served more than three years, are entitled to receive a certain allowance of 50*l.* or 100*l.* a year, as the case may be, for every year they have served, if they leave the army?—Yes, that is the practice.

269. In those cases does the excess paid by the officer who is to succeed to the vacancy equal the excess that would be paid provided that officer sold his commission on the usual terms?—That makes no difference to the over-regulation price; the over-regulation price is always paid.

270. A non-purchasing officer, if he retires after 10 years' service, would get in some cases 1,000*l.*, and in some cases 500*l.*, according to where the service has been, in addition to which he would get the full amount ordinarily paid in excess of the regulation price?—Decidedly. I know many cases of it. I know of many officers who either got promoted from the ranks or who got appointments without purchase in the Crimea who have since sold.

271. You have been speaking of course of ordinary times, times of peace?—Yes.

272. What was the case during the war with regard to the value of commissions, and the extra regulation price given?—There was very little paid over regulation.

273. In fact an officer could not leave the army if the regiment was on service, and therefore there were no commissions to be sold?—Very few.

274. On the other hand there was the expectation, I suppose, of a great many promotions without purchase owing to deaths?—Exactly so. Of course no officer would purchase when perhaps the next gazette might bring him the news of his promotion without purchase through a death vacancy.

275. You mean that no officer would purchase, even at the regulated price?—Many refused.

276. When purchases did take place during the war, was anything paid in addition to the regulated price in those regiments that were on service?—It was mainly the regulation price. The Crimean war is a good many years ago now, but my impression is that there was little or nothing but the regulation price paid then.

277. (*Mr. Whitbread.*) What is the formal step that an officer takes when he desires to sell his commission?—He applies to the military secretary to submit his name to the Commander-in-Chief for permission to sell his commission.

278. And when the permission of the Commander-in-Chief is obtained, the officer who is next for purchase below him can claim the step at the regulation price, can he not?—Yes.

279. Have you ever known it happen that an officer asked leave to sell from the belief that he would get over-regulation price, and then got nothing but the regulation price?—No, his arrangements would be all made beforehand. Very careful officers would not send in their papers until the extra money was lodged. I have known that done, or at any rate he would require a guarantee from the senior purchasing officer.

280. (*Mr. Muntz.*) Was not there one notorious case a very few years ago of an officer who put his name down for purchase, and afterwards refused to pay over-regulation price, and caused a good deal of scandal. I do not wish to mention any regiment?—I have no recollection of it. I dare say such a thing may have occurred.

281. I think it is customary for any officer who wishes to purchase to put down his name as being prepared to purchase?—He is obliged to do so by regulation.

282. Without that he would be passed over as a matter of course?—Yes.

283. Is the money lodged at the time that he puts down his name?—The money is only lodged when it is called for by the military secretary.

284. Is not some security required previously?—No, he must give a reference, and it is our duty to satisfy ourselves by inquiry that the money will be forthcoming when required.

285. In the case of the two senior captains you referred to, will they not be rendered extremely unpopular by sticking in the regiment in that way?—No, I do not think so, they are old officers and fully entitled to promotion. I do not think it would affect their position with regard to their brother officers at all.

286. Are your house agents for the 91st infantry?—We are not agents for the 91st.

287. If you are I would ask you whether you were aware that some time last January there was a step of promotion in that regiment, and nine senior subalterns were passed over and a young man who had recently come into the service bought over them?—I am not aware of that. I am inclined to think that we are not agents for that regiment.

288. You stated that the average value of a lieutenant-colonelcy in the cavalry was 10,487*l.*?—Yes.

289. As matters stand now, an officer having the misfortune to die would lose that, would he not?—Yes, generally.

290. Except if killed in action, and then he would lose a great part of it?—Yes.

291. The lieutenant-colonels being mostly married men, do not the greater part of them insure their lives as far as you are aware?—No, I really do not think that they do more than other people; of course every married man ought to insure his life, or at least he ought to make some provision for his family, particularly when he has only a life interest in his income.

Mr. C. Hammersley.

29 April 1870.

292. But if they do not insure their lives they take a risk, which is equivalent?—Yes.

293. Would not the insurance of 10,475*l.* absorb the whole of their pay?—It depends upon the age.

294. A lieutenant-colonel would be about 40 probably?—I should think it would absorb it pretty nearly; of course a commission is a very bad investment.

295. Then in fact an officer who has the command of a regiment has paid 10,475*l.* for his commission, and either taking the risk or the insurance he literally has no reward and no payment whatever for it?—I should say not; but I think officers do not look to the pay; as a matter of interest upon money it does not pay.

296. (*Mr. Hunt*). As far as you have heard has any difficulty ever arisen with respect to paying over-regulation price by reason of the scruples of officers about offending against the Regulations or the Act of Parliament?—No, I do not think so. I never heard a difficulty of that sort made, the thing is so thoroughly understood, it is so common.

297. (*Lt.-Gen. Peel.*) It did exist when a declaration was required?—Yes.

298. (*Mr. Hunt.*) Your recollection does not go back to the time when a declaration was required, I suppose?—No; I think the declaration was done away with in 1824. Perhaps I may be allowed to remark that in the last issue of the Queen's Regulations all notice of it is omitted.

299. Have you found that the omission of that notice, when the Regulations were transferred to the Royal Warrant, has given any stimulus to the practice at all?—No; I think it made no difference one way or the other; indeed I was not aware of the omission myself until the other day.

300. The practice has always been the same whatever the law has been?—The practice has always been the same whatever the law has been. The law has fallen entirely into disuse, but there it remains still unrepealed.

301. (*Mr. Whitbread.*) If a regiment is ordered to India does that affect the over-regulation price which an officer will get upon selling?—No, I do not think it does. There is not the same objection to India now that there used to be; there is greater facility of communication and higher pay; that is a great inducement to go there, of course.

302. (*Chairman.*) In Sir John Macdonald's evidence before the Commission of 1838 he states in answer to Lord Hill, who was then commander-in-chief, that he recollected one or two cases in which it came to Lord Hill's knowledge, "and more par-"ticularly the case of one regiment, in which a "transaction of that nature was reported to the "general commanding-in-chief, and the evidence "adduced in the report having left no doubt whatever "as to the facts of the case the promotions were "cancelled, and the individuals in question were in "consequence put to the most serious inconvenience." Within your recollection can you recall any case in which a promotion has been cancelled owing to the violation of the Regulations as to the price paid for it?—No, certainly not.

303. I forgot to ask you just now with regard to officers retiring,—an officer is entitled to retire after a certain number of years' service upon full pay?—After 30 years he is allowed to retire on full pay.

304. It has been stated that in those cases money is frequently given by the officer who will succeed without purchase to the step vacant by the retirement of the officer in order to induce him to retire. Would a transaction of that kind pass through your hands very much like the payments in excess of the regulation price?—Yes, exactly in the same way. I know it in the same way. I see sums of money transferred from A. to B., and I can come to no other conclusion than that it is for that purpose.

305. What is the highest amount that you have ever known paid to induce an officer to retire from the command of a regiment under those circumstances?—I think about 2,500*l.*; that is just the difference between the regulation price, and the sum that he would receive if he sold.

306. Am I right in collecting from your evidence that the practice of paying an over-regulation price is very general throughout the army, and that you consider it a well understood and recognised practice. I do not mean officially recognised by the authorities, but a practice throughout the army perfectly well understood and acted upon?—Decidedly.

307. How long have you been acting as a member of the firm of Messrs. Cox and Co.?—About 30 years.

308. And during that period you have known of no instance of any interference on the part of any authority with the practice, or of any commission having been cancelled in consequence of any evidence that that practice had been resorted to?—No, never.

309. I think you said in answer to a member of the Commission just now, that no inquiry had ever been addressed to your house for information as to that practice?—I do not recollect any.

310. (*Mr. Whitbread.*) Is there any regulation against a bonus being given to an officer to induce him to retire upon full pay in the way in which you have just now described?—No, I am not aware of any. I do not think there is.

311. That is perfectly legal as far as you know?—It is legal inasmuch as it is not forbidden. What is forbidden is paying over-regulation for a step.

312. It is illegal and contrary to the Act of Parliament as well as contrary to the Regulations to pay an officer over-regulation money, when he sells his commission; but on the other hand it does not appear to be illegal, contrary to Act of Parliament, or contrary to the Regulations to give to an officer that sum of money which, as you say, exactly represents the over-regulation money to induce him to retire upon full pay?—No, I do not think that there is any rule against it. The fact is that full pay retirements have only been in existence for a limited number of years, they began long after this Act of Parliament had fallen into disuse.

313. (*Sir W. James.*) Do you know of any cases within your knowledge of any minors having to pay for promotion in the army who were wards of the courts of Chancery?—Yes.

314. Have you known wards of the court of Chancery for whom commissions have been bought in that way?—Yes.

315. To your knowledge have the extra regulation prices been paid in those cases?—Certainly, over and over again.

316. (*Chairman.*) With the sanction of the court?—I believe that an application is made to the court for money, not specifically for a commission, but to advance the minor in his profession. I really do not know whether the judge would inquire particularly whether any portion of that was for an over-regulation payment or not, but it certainly has been paid over and over again.

317. (*Mr. Muntz.*) With regard to the bonus system, if the officers of a regiment wished to advance a step and bought out a lieutenant-colonel, would they not come under the clause which contains these words provided that every officer who shall "receive "or pay or agree to pay any sum of money" over regulation shall be punished in such and such a way. Would not the bonus in your opinion be an over-regulation price and virtually amount to buying a step?—I have not read the Act very critically.

318. It is the 8th section of the 49th of George the Third, chapter 126?—The Act of 1809 does not appear clear on that point.

319. (*Chairman.*) I have no doubt that you were quite right in stating just now that as the right to retire upon full pay after a certain number of years' service did not exist when the Act of 1809 was passed, that case was not provided for; but the Mutiny Act

in the 78th section contains these words: "Every "person who shall negotiate or receive for any pur- "pose whatsoever any money or consideration where "no price is allowed by Her Majesty's Regulations." Would those words include the case of paying money to induce an officer to retire from the service to make a vacancy in the regiment?—I have no doubt that they would.

320. (*Mr. Whitbread.*) Then perhaps you will correct the answer which you gave to my question?—It is prohibited by the Mutiny Act, but not by the Act of George the Third.

321. Is that prohibition contained in the Regulations in any way?—I am not aware of it.

322. (*Mr. Muntz.*) But this is merely a money penalty. In the Act of 1809 it is made a misdemeanour to be tried by court-martial?—Yes, it is punishable by a money penalty under the Mutiny Act.

323. (*Mr. Whitbread.*) That applies to the officer who receives it, does it not?—It seems that everybody who negotiates or receives the money is liable to the penalty, but it does not say who is to receive it. In the Act of George the Third the penalty is given to the informer.

324. (*Mr. Hunt.*) We are directed to inquire into the degree of recognition which this practice of paying over-regulation price may have received from any of our public establishments or officers?—Yes.

325. You have an experience of 30 years, I think you have told us?—Yes.

326. During those 30 years have you ever heard of over-regulation price being paid by members of the family of persons who have been in authority at the War Office or at the Horse Guards?—I think I must decline answering that question.

327. (*Lt.-Gen. Peel.*) If an officer is brought in from half-pay to sell, he merely gets the regulation price, does he not; he does not get any over-regulation?—I think I have, known cases where he did; that is to say, where the half-pay officer expects a small bonus for going.

328. The half-pay officer makes an application to the Commander-in-Chief to be allowed to sell his commission?—Yes.

329. He is brought in upon full pay in order to sell it?—Yes.

330. Then he can make no bargain whatever; he comes in for the express purpose of selling?—Yes, but he finds a man who will exchange with him.

331. Supposing a lieutenant-colonel having served his five years qualifying him for promotion said, "Now I will go upon half pay if you will make up "the extra regulation price to me," then a man is brought in from the half pay who sells?—Yes.

332. That man does not get anything, it is the man who retires who is paid?—But now it is not necessary to bring in a man to sell. The War Office authorities allow any officer who has served 25 years to go on half pay without bringing in an officer of the same rank to sell, and a very good bargain they make.

333. Who make a good bargain?—The War Office; the public make a capital bargain.

334. They sell his commission?—No. They retain his commission money.

335. And give him an annuity of so much a year?—Yes, they give him an annuity of 200*l.* 5*s.* At 45 years of age he could with 4,500*l.* buy an annuity of 294*l.* a year.

336. Supposing he then makes an application to be allowed to sell his commission, they sell another lieutenant-colonelcy?—No, he is paid out of the Reserve Fund.

337. When he is upon half pay he may say, I wish to get my capital and sell; then they sell another lieutenant-colonelcy, that is to say the War Office sell two lieutenant-colonelcies; they are obliged to sell another lieutenant-colonelcy in order to pay him?—No, he is paid out of the reserve fund, but it is a very hard bargain that they make with the officer. At 45 he could buy an annuity with that money to pay him 294*l.* a year; at 50 he could buy an annuity to pay him 326*l.* a year, so that the country absolutely benefits very considerably by an officer being put upon half pay, when they take the value of his commission.

338. That is to say, that the country have become the sellers of the commission?—No. The State retains the value of the commission, 4,500*l.*, for the time, granting the officer an annuity of 200*l.* 5*s.*

339. (*Chairman.*) A part of our inquiry is into the circumstances under which the sum paid in excess of the regulation price has been irrecoverable. You have mentioned the case of the death of an officer, in which except under peculiar circumstances his family loses all he has paid, whether regulation price or a sum in excess of the regulation price; what are the other circumstances under which, while he might not lose the regulation price, he would lose the sum paid in excess of it?—His enforced retirement.

340. You mean when an officer is compelled to leave the army, and allowed to leave it by the sale of his commission?—Yes.

341. In that case he would not get anything in excess of the regulation price?—No.

342. How does the promotion go in the case of a forced retirement, does it go in the regiment or is an officer brought in from another regiment?—It depends upon the case very much. If there is any thing much affecting the credit of the officer, I think the Commander-in-Chief would probably fill up the vacancy from another regiment.

343. Of course as the retirement is not voluntary, the officer retiring cannot make his own terms?—No.

344. If it went in the regiment would the officer succeeding obtain the step by payment of the regulation price only?—Yes.

345. Are there any other cases in which sums paid in excess of the regulation are irrecoverable; take the case of a reduction?—Yes, then the officers may lose their money. That was the case with two officers of the Guards some years ago. I recollect that when it was determined to make all the steps above the captain, that is, the majority and the lieutenant-colonelcy, no longer purchaseable steps in the Guards, two officers lost their money.

346. What was the rank of those officers in the Guards?—They were mounted officers. A brevet took eight out of ten field officers, and two lost their money.

347. Will you just explain how they lost their money, they were mounted officers in the Guards?—Yes.

348. How were they affected by the new regulation?—Because for the future there were no saleable commissions in the Guards above the rank of captain.

349. Therefore they could not sell the commissions they held at the time?—They could not sell the commissions they held when the change took place.

350. Then did they lose the regulation price as well as the sum paid in excess?—Yes, they did, and they never got reimbursed.

351. Not even for the regulation price?—No, they were shortly after taken as major-generals, but they had not the opportunity which they would have had without this change of getting their money back; otherwise they might have gone to half pay and got their money back.

352. They were affected in just the same way as if they had been made major-generals against their will at the time?—Yes.

353 (*Lt.-Gen. Peel.*) Another instance in which an officer would lose the extra price would be in case of any regiment coming from India, or in case of any reduction; unless the officer to be reduced is kept as a supernumerary to be absorbed when an opportunity offers, he would lose his money?—Certainly.

354. (*Chairman.*) When an officer comes from India how is he brought in?—As an ordinary half-pay officer there is extreme difficulty in getting back.

Mr. C. Hammersley.

29 April 1870.

355. (*Lt.-Gen. Peel.*) He has to pay a larger price to get in again?—Yes.

356. (*Chairman.*). To whom?—To some officer who is willing to change with him again that he may get his position.

357. (*Mr. Muntz.*) Was not that the case in several instances when there were two majors in a regiment returning home, and one was put upon half pay?—Yes, but I think now the practice is rather to leave those majors upon full pay for the time.

358. (*Chairman.*) You said that your house was agent for the regiment of artillery, I think, and for the engineers?—Yes.

359. Does anything take place in the artillery or in the engineers of the same character as that which we have been speaking of in the rest of the army?—No.

360. Is no money paid in any case to induce officers to retire, or for promotion?—No, certainly not; neither for promotion, nor retirement, nor anything of the kind. No money passes at all.

361. I do not mean any regulation money?—No; there is no regulation money, and no over-regulation money.

362. (*Mr. Hunt.*) And no bonus?—No bonus at all.

363 (*Chairman.*) How do you account for that—why should not the same motives lead officers of the Artillery to pay money to induce the retirement of a senior officer which lead officers to do so in the Indian army and in the army generally?—It has never been the practice; I can only give that answer. I think the magnitude of the corps interferes with anything like a private arrangement.

364. The promotion there is entirely by seniority?—The promotion there is entirely by seniority.

365. (*Sir. W. James.*) And from the whole corps?—Yes, that is the difficulty.

366. (*Lt.-Gen. Peel.*) But have not there been instances of officers of the Artillery and Engineers been allowed to sell their commissions, receiving the price from the reserve fund?—Yes, there have.

367. (*Chairman.*) That was an authorised transaction?—No. Authorized by Horse Guard Circular, 15th February 1861.

368. (*Sir. J. Scarlett.*) And to quicken the promotion?—No, as it applied only to officers on the half-pay list.

369. (*Lt.-Gen. Peel.*) If that was general there would be the same inducement to an officer to retire in the Artillery and in the Engineers as in any other regiment, would there not?—Yes.

370. (*Chairman.*) Can you tell the average term of service when an officer of the line attains the rank of lieutenant-colonel, and when an officer in the Artillery and the Engineers attains that rank?—A reference to Hart will tell that at once; but the case of the Artillery is becoming more aggravated every year.

371. Does it require a much longer time to attain the rank of lieutenant-colonel in the Artillery than it does upon the average for an officer entering a regiment of the line to attain that rank?—Very considerably more in ordinary times, but the Artillery is still enjoying the great current of promotion which they have had from 1844, I think when the augmentation began, but the term of service before promotion is becoming longer every year.

372. I see in looking back to the evidence taken before the Commission of 1857 upon purchase in the army, that the advocates of the purchase system state that one very beneficial result of that system is that it produces rapid regimental promotion?—There is no doubt of it.

373. Do you believe that the rapidity of promotion would be the same, and that that advantage would be as great, if the regulation price were strictly adhered to, and no money was given in excess of the regulation price?—No, I think that the over-regulation price is the natural sequence of the purchase system; it is a corollary of the system, and I think it increases its advantages or disadvantages according as the opinion may be upon the general question.

374. Do you believe that there are many officers who are induced to retire by the larger sums given in excess of the regulation price who would not retire if they had only the regulation price?—No doubt there are.

375. Do you believe that there is any possibility, if the purchase system continues in the army, of checking the practice of paying sums in excess of the regulation price?—I think it would be very difficult. There was a very stringent declaration that officers had to make in old days upon the subject. That did not have the effect of stopping it, and I do not know what other steps could be taken for the purpose.

376. Do you believe that when one man has something valuable to sell and another wants to buy it, you could by law or regulation fix a price beyond which the seller is not to go?—I think not. I think that it is impossible.

377. (*Mr. Muntz.*) Then the only way to stop the over-regulation payment would be to do away with the regulation money?—Yes, if it were possible.

378. (*Chairman.*) But even in the Indian army, where there was no regulation price, did not something of this kind take place?—In the Indian army they have the system of a "purse," everybody subscribed all through.

379. To buy out a senior officer?—Yes.

380. You have been speaking now almost exclusively of regimental promotion?—Yes.

381. It is the case sometimes that an officer obtains his promotion in another regiment, when that is the case on what terms does he do it. If such a thing is possible as obtaining his promotion by purchase in another regiment, would he, in that case, pay the price in addition to the regulation price just as if he was promoted in his own regiment?—I should say not, but cases of that kind occur very rarely. I think when a man gets promotion by purchase out of his own corps it is in some such way as this: In a West Indian regiment, for example, sometimes there may happen to be no officers for purchase, and then the Commander-in-Chief will select an officer from another corps.

382. In that case I presume he would purchase upon the same terms as if he had been in the regiment?—For the regulation price only, because there is nobody to make a bargain with him.

383. There is no competition in fact?—No.

384. (*Lt.-Gen. Peel.*) For instance, if a regiment was to be reduced, no officer in the regiment would purchase, because he would know that he would be immediately reduced?—No, nobody would buy a commission when the regiment was going to be immediately reduced.

385. (*Mr. Whitbread.*) Is the reason why an officer selling in that case does not get more than the regulation price because he does not know who his successor is to be?—Yes.

The witness withdrew.

Adjourned to Tuesday next at 1 o'clock.

Tuesday, 3rd May 1870.

PRESENT:

THE RIGHT HONOURABLE SIR GEORGE GREY, BART., M.P., G.C.B., IN THE CHAIR.

THE RIGHT HON. THE EARL OF DEVON.	MAJOR-GENERAL STEELE, C.B.
THE RIGHT HON. G. WARD HUNT, M.P.	SAMUEL WHITBREAD, ESQ., M.P.
LIEUT.-GENERAL SIR JAMES YORKE SCARLETT, G.C.B.	P. H. MUNTZ, ESQ. M. P.

R. H. KNOX, ESQ., *Secretary.*

LIEUT.-GENERAL SIR EDWARD LUGARD, G.C.B., further examined.

Lt.-Gen. Sir E. Lugard, G.C.B.

3 May 1870.

386. (*Chairman.*) Will you turn to question 107, in the printed copy of the evidence which you have previously given; the question related to the warrant which was passed in 1856, under which, for the first time, it was provided that in the event of an officer being killed in action, or dying within six months of wounds received in face of the enemy, his family should receive a sum, under certain circumstances, equal to the regulation price of his commission?—Yes.

387. If you look at your answer, I think that you will see that you merely stated the former part of that warrant, and did not read the rules and regulations at page 2 (the first paragraph), which were substituted for the warrant which was withdrawn. There is a material passage in that document which I should wish you to put upon the evidence; will you be good enough to add that paragraph?—"The amount of "money to be paid to a widow. Widow and children, "or other relatives of an officer killed in action, or "dying of wounds received in face of the enemy "within six months after being wounded, shall, what-"ever branch of the service he may have belonged "to, be the regulation price fixed for commissions "in cavalry and infantry of the line, as set forth in "the following scale, viz.:—

		Cavalry.	Infantry.
		£	£
To the widow, widow and children, children, father, mother, sister or sisters of	Lieut. Col.	6,175	4,500
Ditto	Major	4,575	3,200
Ditto	Captain	3,225	1,800
Ditto	Lieutenant	1,190	700
Ditto	Cornet	840	—
Ditto	Ensign	- -	450

"But it shall in no case exceed the sum of money "actually paid, in conformity with the regulation "price, by the officer for the purchase of his com-"mission or commissions."

388. You were asked in your last examination, as to an officer retiring on full pay, and as to the arrangements which were believed to be made between the officer about to retire, and the officer about to succeed. When is an officer entitled to retire upon half pay?—After 25 years' service.

389. If he retires upon half pay, how does the promotion go?—According to the present regulation the promotion goes in the regiment by purchase, and the purchase money is made over to the reserve fund to purchase out some other officer on the half-pay list.

390. The regulation price of the commission is carried to the credit of the reserve fund?—Yes.

391. In those cases, have you reason to believe that some arrangement is made by the officer who is retiring, and the officer who is succeeding, by which a sum equal to the over-regulation price is paid to the officer going on half pay?—I have no doubt of it.

392. You were asked some questions as to the circumstances in which an officer is liable to lose the purchase money which is paid for his commission?—Yes.

393. I do not think that you quite exhausted those cases?—I should have said that he lost the purchase money by his promotion to the rank of General Officer on the fixed establishment. There is a fixed establishment of General Officers, and there is what the Admiralty would call the reserve list. An officer gets the nominal rank of a General, but he draws the half pay of the rank which he formerly held. For instance, an officer may be a Major-General, or a Lieutenant-General, but still only a half-pay Major, and he is then not on the establishment; but up to the age of 60 he may realize the value of his majority, or his lieut.-colonelcy, or whatever commission he held.

394. Am I to understand that a general can hold the commission upon which he last served in the army?—Yes.

395. And he can obtain only the regulation price for it?—Yes.

396. (*Sir J. Scarlett.*) Did you ever hear of a general officer selling?—Yes, when not on the fixed establishment.

397. (*Chairman.*) Under those circumstances there is no officer who is interested to give more than the regulation price?—No, he only gets the regulation price.

398. Therefore in that case he would lose whatever sum he had paid in addition to the regulation price?—Yes.

399. If an officer retires on full pay does not he lose the regulation price of his commissions and obtain nothing for them?—He obtains nothing for them; he gets his full pay.

400. He loses his regulation price but he receives an amount equal to the extra regulation price?—Yes, I should say so.

401. Does the same thing happen if an officer retires upon half pay?—It may depend upon circumstances, namely, as to how the vacancy in the regiment is filled up. If it is filled up by a half-pay officer being brought in to sell an arrangement may be made by the officers of the regiment giving the retiring officer a certain sum to bring in the other officer.

402. Is not an officer who goes upon half pay entitled afterwards to sell his commission?—Yes, according to the regulation price.

403. After a certain number of years' service?—After 20 years' service he is entitled to full price.

404. Supposing that he is again brought in upon full pay upon what terms does he come in if he exchanges with an officer so as to come in again upon full pay?—According to regulation he would be brought in to serve upon a half-pay vacancy, say that a captain retired upon half pay, and that another officer wanted to come in upon full pay, he would be brought in in the place of the captain who retired.

405. Would it be a matter of arrangement subject to the regulations?—Yes.

406. (*Maj.-Gen. Steele.*) Does it not depend upon circumstances?—Yes, this Department keeps a strict eye upon the half pay list. An officer upon temporary half pay is placed upon half pay for two years, or a year, or for six months, as the medical board may recommend. At the expiration of that time the Horse Guards are called upon to have that officer examined again, and if he has recovered we require him to be brought to full pay upon the first opportunity.

Lt.-Gen. Sir E. Lugard, G.C.B.

3 May 1870.

407. (*Chairman.*) The arrangements with regard to his being brought back would depend upon the regulations?—Yes.

408. Do officers now purchase unattached commissions?—Yes, but not from one another.

409. Suppose that a lieutenant-colonel on half pay wishes to obtain the command of a regiment?—He must exchange with an officer of the regiment who is entitled to go upon half pay.

410. Is any money by law authorised to be paid by an officer umder those circumstances?—No.

411. (*Sir J. Scarlett.*) Are you speaking of the regulation price as between full and half pay?—It is never done because an officer suffers by it.

412. If a major obtains an unattached lieutenant-colonelcy and he wishes to come back to full pay is he not obliged to pay to the lieutenant-colonel the difference between full and half pay?—Yes, if he has received it, but not otherwise.

413. He wishes to command a regiment and he exchanges with some officer commanding a regiment?—Yes.

414. Is it not the custom for that officer if he wishes to come back to pay the regulated difference between full pay and half pay?—If done it places the officer going on half pay at a disadvantage.

415. (*Chairman.*) Have you reason to believe that an officer, under those circumstances, going on half pay receives from the officer taking his place, who would receive an attached lieutenant-colonelcy, money in addition to the regulated price?—There is not the slightest doubt of it I should say.

416. It is an arrangement between the two officers into which the payment of money enters?—Yes.

417. Was not it more frequently the case formerly than now that officers purchased unattached commissions and then got back to full pay?—Yes.

418. That is not sanctioned now?—No, one officer cannot purchase from another unattached.

419. Take the case of exchanges between officers in the cavalry and in the infantry, there would be no authorised difference in the price of the commissions?—None at all.

420. But in those cases, as the cavalry commissions are more valuable in a money point of view than the infantry commissions, on account of there being a higher price paid in excess of the regulations, does money pass between those officers?—I do not know. I have never heard that it was so, and I have my doubts upon the point, but it may be so. Any man who wishes for a thing will pay for it if he can do so.

421. Is there any other case in which an over-regulation price is lost?—The over-regulation price is lost on promotion to the rank of a general officer. I would refer to the regulation. The cases are, reduction to half pay from sickness, or by compulsion, death, and the refusal of the officer in the regiment first for purchase to give more than the regulation price.

422. In case of a war when regiments are on active service, is the over-regulation price paid?—I cannot say; I should think not; I do not hear of these things; I am not likely to hear of them in this office.

423. (*Mr. Whitbread.*) Is the over-regulation price affected if the regiment is ordered to a notoriously unhealthy station?—I should think that it would be, but you must calculate the over-regulation price according to the market value of the commission; a thing would not sell for the same amount under two different circumstances.

424. (*Chairman.*) Is an officer allowed to sell after the regiment has been ordered on foreign service in time of peace?—I should say not. It would be entirely a matter of discipline; it would be for the Commander-in-Chief to decide the case.

425. (*Mr. Hunt.*) Is it not the case that officers know pretty well where they are likely to be sent?—I should say so; it is pretty well known six months before it is officially issued.

426. (*Mr. Muntz.*) You have stated that when an officer in the command of a regiment is promoted to be a general officer he loses the over-regulation money, but that the regulation money is provided for by his full pay; in case of his death there is a loss of the over-regulation money and of everything else, is there not?—Yes.

427. If the officer in command of a regiment is promoted to be a general officer, and has the misfortune to die in 12 months, his regulation money and everything else is lost?—Yes.

428. I think that 10,400*l.* was mentioned as the average amount in a cavalry regiment, and in that case everything is lost?—Yes.

429. Are there many cases in which that money is lost?—Yes.

430. (*Chairman.*) You have spoken of a reduction in the army, does not a process called absorption take place?—By reduction I meant the disbandment of a regiment, and the officers are at once placed upon half pay; but in the case of the reduction of one company or two companies in a regiment we generally leave the officers as supernumeraries and absorb them, as opportunity offers.

431. In the case of two supernumerary captains in a regiment, and of a vacancy taking place, what would be the course which would be followed?—The practice heretofore has been for the public to take the alternate vacancies.

432. On the first an officer would be allowed to purchase the vacancy, but on the second he would not?—Just so.

433. Would not the second officer lose the advantage of the extra-regulation price, whereas the first person would obtain it?—Yes, the officer who sells would.

434. If a supernumerary captain wishes to retire, is he at liberty to sell his commission?—Yes; if it was an absorption to be taken by the public it would be purchased by the public from the reserve fund, or from a fund voted by Parliament.

435. He would obtain the regulation price, and nothing more?—Yes.

436. (*Sir J. Scarlett.*) Would he then be promoted?—No.

437. Then a supernumerary captain could only sell at the regulation price, and could not get any extra price?—He might do so if it was the turn of the regiment to get the price, and then he would sell in the regiment.

438. (*Chairman.*) Is there any other information which you can give us?—No.

The witness withdrew.

Lt.-Gen. W. F. Forster, K.H.

LIEUT.-GENERAL WILLIAM FREDERICK FORSTER, K.H., examined.

439. (*Chairman.*) You are military secretary to the Field Marshal Commanding-in-Chief?—I am.

440. How long have you held that office?—Nearly 10 years.

441. Have you read the terms of the Commission under which we are acting?—I understand them.

442. You know the object of our enquiry?—Yes.

443. We have received a good deal of evidence as to the practice of paying considerably more for a commission than the regulation price, and we are also to inquire into the recognition which this practice may have received from any public department or officers. Has your attention been called to the correspondence which passed between the War Department and the Treasury upon a proposed increase of payment to cavalry officers, and the reduction in the price of cavalry commissions?—I have read it cursorily; it took place before I held my present office.

444. Do you infer from the statement in the correspondence that the main objection which appears to have been made by the Treasury to a proposal of

the Secretary of State for War was that an increase in the emoluments of the officers would only lead to a corresponding increase in the illegitimate price paid for commissions?—I am not aware of that circumstance.

445. Will you look at the parliamentary paper headed "Army (Pay of Officers)"?—I do not know at what period that correspondence took place, but I think that the present Commander-in-Chief was very anxious to reduce the prices of commissions in the cavalry, as compared with the infantry, because we could not at that time get candidates for the cavalry on account of the idea of the expense being so much greater.

446. Will you look at Parliamentary paper No. 210, which was presented to the House of Commons in August 1859; and will you refer to the second paragraph of a letter from the War Office to the Treasury, dated 23rd February 1859, which deals with the objection urged by the Treasury to the proposal of the Secretary of State?—That was on account of stoppages for the supply of forage for horses.

447. The correspondence relates to that as well. Is there not a reference in that correspondence to the large sums believed to be paid, in addition to the regulation prices, for all cavalry commissions, except in the case of cornets?—If that order existed (of which I have no official knowledge), I fancy that it did not then originate.

448. Is it not a fact that extra-regulation prices were paid for cavalry and infantry commissions?—It seems to have been considered so, and it seems to have been admitted, but in the position which I hold I know nothing of the matter whatever.

449. Will you look at the last paragraph of the letter dated the 18th June 1859, which is as follows: "My Lords are glad to find from your letter of the "20th ultimo, that Major-General Peel cannot ac- "quiesce in the justice of their assumption that the "officers of cavalry regiments are in the habit of "paying more than the regulation price for their "promotion. They are aware, of course, that such "payments are illegal, and that they would subject "the offender to the loss of his commission, and to "other punishments, if the letter of the law were "enforced; but they are also aware that in past "times this law has not always been acted on; and "they are therefore induced to ask whether it is "now the intention of Major-General Peel to adopt "any new regulations for strictly enforcing it; as, "should this be the case, it will remove the ob- "jection which my Lords feel to the measure now "recommended."?—I take it for granted that if it came to the knowledge of the Commander-in-Chief officially, that an over-regulation price was given proper steps would be taken to correct the matter, or to punish the offender; but I myself do not think that it is possible to find it out.

450. Will you look at Parliamentary Paper No. 88, of the year 1860, and in which there is a letter from Sir Charles Yorke, who was then, I believe, military secretary to the Commander-in-Chief, in which he answers that enquiry which appears to have been forwarded from the Secretary of State to the Commander-in-Chief; will you be good enough to look at the second paragraph of that letter, which is as follows: "In reply to Mr. Herbert's request to be "informed of the nature of the regulations which His "Royal Highness would suggest for this purpose, I "am directed by His Royal Highness to state that "in his opinion the provisions of the enactment in "question are as stringent as can be desired, and "that he would be ready to carry them into effect in "any case where the infringement of them should be "brought to his knowledge, but that he is not pre- "pared to suggest any additional regulations on the "subject"?—I can understand that perfectly.

451. Do you believe that any additional regulations could be devised which would check this practice?—No, I think that it is impossible.

452. I will now call your attention to a subsequent letter in that correspondence; it is a letter from Sir Edward Lugard to the secretary to the Treasury of the 23rd January 1860. Will you look at page 11? You will there find the following passages: "In the "doubts expressed by their Lordships as to the "possibility of an exercise of the Commander-in- "Chief's authority to prevent the practice of giving "illegitimate sums under the new system, and in the "supposition that if such an exertion of authority "were actually possible it could not stop short of the "infliction upon the offender of the extreme punish- "ment laid down by Act of Parliament, of dismissal "from the service, their Lordships appear to have "overlooked the wide distinction between moral and "legal evidence. The moral certainty which would "justify the Commander-in-Chief in taking such a "step as that of bringing in an officer from another "regiment to purchase at the regulation price, a step "which though somewhat unusual, by no means ex- "ceeds the undoubted prerogative of the Commander- "in-Chief might yet be totally insufficient to bring "forward as legal evidence of facts which called for "the interposition of the law. The well-known "difficulty of furnishing evidence in a court of law "sufficient to prove the commission of even the "simplest facts would extend in an exaggerated "degree to a transaction so secretly and confidentially "conducted as the sale of a commission at an ille- "gitimate price. At the same time though it might "be impossible to find legal evidence of the contra- "vention of the law it would be within the power of "the Commander-in-Chief to obtain satisfactory in- "formation of the fact affording that moral certainty "which in all practical matters is sufficient to act "upon, and which would justify His Royal Highness "in taking steps to prevent the completion of an ille- "gitimate bargain. Notoriety affords sufficient "ground for taking measures beforehand to defeat an "improper negotiation, though it may fail to furnish "the legal evidence which would be necessary to "bring home to an offender the commission of an "illegal act. The evil of giving large sums above "the authorised price for commissions in the cavalry "would perhaps under the proposed system not be "entirely eradicated, but it would at least be very "considerably diminished in extent and the contra- "vention of the law in regard to the sale of commis- "sions would daily become more difficult and likely "to be discovered." Has the Commander-in-Chief within your knowledge ever obtained that moral cer- tainty which in the opinion of the then Secretary of State would authorise him to interfere to prevent the completion of a transaction of this illegal character?—Never.

453. Have you read the evidence which was given by Sir John Macdonald on the Commission upon naval and military promotion and retirement in 1838?—I have read it cursorily, but probably I am not quite master of the subject.

454. After stating that the regulation price is not adhered to, he was asked by Lord Hill at question 1919 in that evidence, "Do you ever remember an instance "within the last two or three years where it came to "my knowledge that more had been given than the "regulation allowed, and that ordered it to be "cancelled?" To which he replied, "I recollect "one or two cases in which it came to your Lord- "ship's knowledge, and more particularly the case of "one regiment, in which a transaction of that nature "was reported to the General Commanding-in-Chief, "and the evidence adduced in the report having left "no doubt whatever as to the facts of the case, the "promotions were cancelled, and the individuals in "question were in consequence put to the most serious "inconvenience." Has any case occurred within your own experience in which a report of that nature has been made to the General Commanding-in-Chief, and any steps have been taken in consequence of it?—I never knew an instance of it.

455. Have you looked at the records of the office so

Lt.-Gen. W. F. Forster, K.H.

3 May 1870.

as to be able to state whether any notice was taken by the Commander-in-Chief in a case of that nature?—No.

456. I hold in my hand a letter from the Horse Guards dated in 1834, signed by Lord Fitzroy Somerset, in which it is stated that a captain of the 55th Foot submitted to the General Commanding-in-Chief a statement by which it appeared that a lieutenant in that regiment agreed to give 300*l.* above the regulation price. It seems that the Commander-in-Chief had that case under his consideration and considered the manner in which the King could best mark his disapprobation of it, and it resulted in one year being deducted from the officer's time. No case of that sort has occurred in your experience?—No.

457. Has any enquiry been made into such a case where there has been a supposition of its existence? No, I do not think that anything has occurred to make it necessary to institute any enquiry.

458. Do you know of any case in which an officer who has been returned for purchase has refused to give more than the regulation price, and has appealed to the Commander-in-Chief for his protection in consequence of the inconvenience resulting in the regiment?—I do not remember such an instance.

459. In the same evidence of Sir John Macdonald at question 1924, he was asked, "Do not the "Horse Guards on all occasions support the first "officer for purchase, if he is only willing to give "the sum fixed by the regulation; and if he should "make himself obnoxious on that account, which you "have stated to be the case, and that great unpopu-"larity may attach to that officer, is he not on every "occasion, having strictly adhered to the regulation "and insisting upon his right, supported by the "Commander-in-Chief at the Horse Guards?" He answers, "Invariably, I have cases in my view of the "kind?"—I should say so most decidedly.

460. Have any cases of that kind occurred during the ten years for which you have held your present office?—No, but if they did occur the officers would be reported to the Commander-in-Chief.

461. Has any case come within your knowledge in which an officer has been willing to pay the regulation price, but nothing beyond it?—No, I know of no price beyond that prescribed by the regulation.

462. Would it be possible for you in the office to ascertain whether within the last 30 years any cases of that sort have occurred?—Certainly; but it would occupy much time and labour, and probably without any result.

463. And whether any officer has been reported to the Commander-in-Chief as having given more than the regulation price?—I know of no such cases, but I will make every search.

464. We have a statement by an officer before the Commission on naval and military promotion and retirement, that the promotions were cancelled. The report in that case to the General Commanding-in-Chief would be in the office?—That is 32 years ago. If you will kindly allow a memorandum to be made of it, I will look for it.

465. We have two cases in 1833 and 1834, in one of which Lord Hill appears to have objected to more than the regulation price having been paid, and to have cancelled the commission, and in the other case the officer was deprived of a year's seniority. Since that time has any case been reported to the Horse Guards?—If the Secretary will be kind enough to make a note of that I will refer to it.

466. (*Mr. Hunt.*) Has your attention been called to a letter of Mr. Sidney Herbert, who was then Secretary of State, to the Commander-in-Chief dated 11th November 1859, in which the following passage occurs: "A long correspondence has passed with the "Treasury on the subject. Their Lordships have "argued that the regulation cost of Commissions is "already very high, that notoriously a price beyond "the regulation is habitually given, and that as the "price of a Commission is to a certain degree a "capitalization of the profit derivable from it, the "price must fluctuate with the pay, and the con-"sequence of the reduction of the forage stoppage "would simply be to augment the already exorbitant "price of the Commission, and so make the cavalry "service as unattainable, as now, to men of moderate "means?"—No.

467. Then there is another passage which goes on to say: "It seems to me, however, quite clear that "the first Commission should be reduced. 1st. Be-"cause the expenses of outfit are very heavy, and of "course fall harder on first joining. 2nd. Because "that is the only Commission which is thoroughly "under the control of the military authorities, as "there is no illegitimate price beyond the regulation "price for it." Should you say that when those arguments were made use of in a correspondence between the Secretary of State for War, and the Commander-in-Chief, the practice has no recognition from the authorities?—It has no official recognition.

468. This is an official letter from the Secretary of State for War, to the General Commanding-in-Chief. When those arguments are made use of in an official letter, should you say that the practice has no official recognition?—The great thing would be to produce instances of it.

469. But the letter appears to recognise the existence of the practice?—It appears to be so. I believe that it is acknowledged in the world. I can only speak of what comes before me officially. I cannot shut my ears to what I hear.

470. In the letter from the War Department to the Horse Guards, should you say that there is no recognition of the existence of the practice?—That is between the parties.

471. (*Chairman.*) Cannot you draw a distinction between the recognition of the practice, and the sanction of it?—Sanction would never be given to it. If the Commander-in-Chief had cognizance of such an affair, he would put a stop to it.

472. You mean that he would put a stop to it, if he knew that the practice existed in any particular instance?—Yes; of course he must have the evidence placed before him in order to reprimand the individual who commits the error.

473. Has any serious effort been made by the military authorities, to check the practice which everybody knows to exist?—No; because the military authorities are not officially cognizant of this practice.

474. (*Earl of Devon.*) It being spoken of in this letter as an illegitimate practice, I suppose that that would imply that the practice was not sanctioned?—Yes. Perhaps the word "illegal" would be better.

475. (*Mr. Hunt.*) Has the knowledge that such an illegitimate practice existed, deterred persons in authority at the Horse Guards and War Office from sending their sons into the army?—Certainly not.

476. Has an exception been made in the case of members of the families of such persons with regard to that illegitimate practice?—No; we know nothing about it. Every officer in the army is entitled to justice, whether he be a poor man, and in the lower class of life, or whether he be in the upper class; there is no favour of that sort. I suppose that the word "illegitimate" means not according to regulation.

477. Have sums in excess of the regulation price been paid by members of the family of persons in authority at the War Office and at the Horse Guards?—I can only say that I never paid anything of that sort myself, but I cannot answer for others.

478. In your experience do you know that it is the case that members of the family of such persons have paid for commissions sums in excess of the regulation price?—I am not aware of it; they would not consult me upon the subject.

479. Is it your belief that there has been in their case any exception to the general rule, or not?—I do not think that there is anybody in the Horse Guards who is treated differently from any other person in the army.

480. (*Mr. Muntz.*) Are you aware that a few years ago, there was a rule that officers had to make a

declaration that they had not paid beyond the regulation price?—Yes; but that rule was so evaded, that it did not act.

481. Was not it altered because it could not be subscribed to?—Yes. A man may declare that he does not give directly an extra price for his commission, but he may say, "That is a very good horse, "and I will give you a thousand guineas for it." It is an evasion. I do not mean to say that those things ever have existed, but I mean to say that money will find its full value, and that persons will pay for the true value of a thing.

482. With your great experience in the army, have you not noticed that there are some men of greater aptitude for it than others. Is it not very desirable that officers should be men of gentlemanly feeling and habits; and that they should make the army as much as possible their profession for life?—Certainly.

483. Would not the purchase system prevent men of moderate means, but otherwise of good birth and education, from entering the army?—I thought that I was to be examined on the question of over-regulation price.

484. Would not the purchase system prevent poor men of good birth and education from entering the army?—I do not find it so.

485. In that case, are they not frequently involved in great difficulties by borrowing money from money-lenders?—That is a thing into which I cannot enter. I know that a young man will be very extravagant, and that instead of the people who are rich coming down to the platform of those who are poor, the poor generally endeavour to get up to the platform of the rich, and that makes them extravagant.

486. Would not the officers whom I have just mentioned be of greater value to the Queen's service than those who have merely wealth to recommend them?—I do not know that it is possible that a man should have merely wealth to recommend him.

487. (*Sir J. Scarlett.*) The mere fact of a man's being poor does not make him a capable officer?—Not at all.

488. (*Chairman.*) You are, of course, cognizant of the Queen's Regulations which were issued in 1868?—Yes.

489. Are you aware that previously to 1868 the Regulations contained a distinct reference to the Act of 1809, prohibiting the payment of any money in excess of the regulation price, and that that was omitted in 1868 from the Regulations of the Horse Guards issued with the sanction of the Secretary of State?—Yes.

490. Can you inform us of the reason of that omission?—It was because it was believed that the rule, as it then existed, was constantly evaded. Although it might be acknowledged that these things took place, it was a very difficult thing to prevent the money being paid in some other way than by being paid down upon the table.

491. Do you mean that it was thought that the Act of 1809 was perfectly obsolete, and that therefore it was no longer expedient to call the attention of the officers to it in the Queen's Regulations?—I consider so.

492. Do you not think that to a certain extent that was a recognition of the practice, and an intimation that the law would not be put in force against any persons who were guilty of the practice?—I have mentioned two or three instances in which it was discovered that it acted improperly. I do not think that it was from any official information, but more from the information derived in the world at large. You heard that people had given so much for their sons' commissions, but it was not officially brought before the authorities.

493. Was reference to the Act of 1809 omitted because it was felt almost hopeless to prevent that practice?—I should view it in that light.

494. You stated that in 1859 it was felt almost hopeless to obtain candidates for cornets' commissions?—Yes.

495. And consequently the price was reduced in 1859. Has the difficulty been removed with respect to obtaining candidates for cornets' commissions, or are there still vacancies?—Yes, we have a large number of candidates waiting for commissions in the cavalry who have passed their examinations, and many candidates on the list for that branch of the service who have not yet been examined.

496. Do you attribute that to the reduction in the price of cavalry commissions?—Yes, because when the change was made we had no candidates for the cavalry.

497. Was that owing to the high price of a cornet's commission?—I think that when the world saw that the expense of a cavalry commission was very much reduced it had the effect of inducing young men to enter the cavalry instead of the infantry.

498. Are you aware of the effect which that has had upon the over-regulation price in the cavalry?—I have nothing to do with the over-regulation price All that I can say is, that it appears to have had a good effect, inasmuch as we have many more candidates for the cavalry now than we had in those days.

499. Is not promotion now almost exclusively regimental?—Almost without exception.

500. So that upon the retirement of an officer the senior officer in the rank below him, if he is qualified, succeeds him?—Yes; it may be quite possible that an officer had not served the length of time, but he succeeds if he is qualified by length of service, and in other respects.

501. Is not the consequence of that that the retiring officer always knows the officer who is to succeed him, and has an opportunity of making a private arrangement with him?—I conceive that every officer in the regiment knows who is the individual in the next grade for purchase, so that he takes it for granted that he is the individual who is to succeed him.

502. Is the case common of an exchange between the officer commanding one regiment and an officer commanding another?—Yes.

503. That can only be done by the sanction of the Commander-in-Chief?—Yes.

504. What circumstances would lead the Commander-in-Chief to sanction such an exchange?—One officer, for certain reasons, might like to serve at home. It is much more expensive to serve at home than if a man has to go to India. We may suppose that a man wishes to go to India who has a large family and wishes to save money for the benefit of his family. I do not think that the Commander-in-Chief ever makes any objection to that when he is satisfied that it would not deteriorate the service, and that no one would be injured by it; but His Royal Highness constantly objects to bring an officer into a regiment who is of less service than the senior of the next grade.

505. But is there not an opportunity of officers making a pecuniary arrangement?—It is possible that they might do so. When an officer exchanges he is obliged to sign a certificate that he has no intention to sell, but that he intends to do duty with the regiment into which he exchanges.

506. Is there any reason why officers so exchanging should not do so?—I think that there is a limit.

507. I ask the question because it has been stated that when an officer cannot obtain from the officers of his own regiment the sum which he requires, he exchanges into another regiment and obtains the sum which he asks; the effect of which would be to stop promotion in his own regiment; do you know of any instance of that kind?—I know of several instances in which an officer after exchanging from one regiment to another has very soon asked to sell his commission, and it has been constantly refused because it was considered that it took away the advantage of the step from the regiment to which he belonged.

508. Then is it the case that the existing regulations, or the authority which is now exercised by the

Lt.-Gen. W. F. Forster, K.H.

3 May 1870.

Commander-in-Chief, would prevent any such transaction as that which I have mentioned?—Yes, the usual practice is that those who exchange must serve for not less than six months. In six months certain things may occur to make an officer anxious to sell his commission.

509. We are also directed to enquire into the circumstances under which the price paid by an officer for his commission is lost. We have received evidence upon that subject, and it appears that the price is lost by death, his compulsory retirement by the sentence of court-martial, or by the officer's promotion to the rank of major-general?—I should not include the promotion to the rank of major-general because I can mention several instances where commanding officers have come into what they call clear vacancies, and have sold their commissions as lieutenant-colonels.

510. Then I should add promotion to the rank of major-general upon a fixed establishment?—Yes.

511. If an officer was compelled to retire by the sale of his commission he would in that case lose all that he had paid over the regulation price?—I cannot say.

512. If an officer is compelled to retire and is allowed to do so upon the sale of his commission, does he know what officer will succeed him?—No, because in many cases the other officer will come from another regiment. If an officer is removed from his regiment on account of incapacity, or any other cause which necessitates his removal, the Commander-in-Chief will appoint another officer.

513. Is it not the case that where the retirement is compulsory no arrangement can be made with the officer to succeed the officer who retires?—There is a sort of feeling in the army that an officer generally wants to obtain from another what he has given himself.

514. Do you mean that if from misconduct an officer is required to retire from the army and is allowed to do so by the sale of his commission, he receives something beyond the regulation price?—I have no official knowledge of anything beyond the regulation price, but I daresay there have been instances where an officer has said, "I must take the "regulation because I must go," and if that officer had given a reasonable price for his commission the other officers concerned might be induced to make some arrangement for his profit so as not to take advantage of that.

515. (*Sir J. Scarlett.*) Generally speaking the promotion would not go in a regiment where the officer is in the regiment?—Just so, but a man may be worn out, and he may have served well and with distinction, but old age overtakes him, and it might be said to him, "I am very sorry to say that you are no "longer fit to command a regiment, and I must "refer your case to the Commander-in-Chief," and his discretion would be exercised in a case of that sort.

516. (*Chairman.*) Take the case of a reduction in a regiment, what is the effect of it upon any officer in the regiment when promotion is stopped by reduction?—The effect was that the lieutenant-colonels of the Coldstreams and of the Third Regiment were affected by it very materially.

517. Taking the case of the two regiments of the Coldstream and of the Fusilier Guards, in what way will the colonels suffer?—Because it is understood that under the existing practice they will not get the same amount as they would previously have done.

518. Of what does that amount consist?—I am told that it differs in different regiments.

519. You are now speaking merely of the over-regulation price which they have given, and which they expect to get back?—Yes.

520. Are those cases taken into consideration by the Horse Guards in the case of a reduction?—They are not officially known at the Horse Guards; the case you probably refer to was that of an officer who was promoted in the Grenadier Guards, and the vacancy was not filled up.

521. The officer who would have purchased the commission if the other officer had sold, was not promoted?—No; the officer was promoted to the rank of major-general and it became a clear vacancy. Up to that time all the other officers had been promoted, but on this occasion it was stopped because the desire of the Secretary of State was to reduce the number of field officers in each regiment of Foot Guards by one.

522. No officer has been promoted in either of the other regiments to the rank of major-general?—No, not since that occasion.

523. Is it the case that neither of those officers can sell?—If an officer so situated wished to sell he could do so, but a captain and lieutenant-colonel would not be promoted, the supernumerary field officer would be absorbed.

524. What price would he receive for his commission?—He could sell receiving the regulation value of his commission.

525. From what source would they get the regulation price?—They would probably get it from what we call the reserve fund.

526. Supposing that either of those officers went upon half pay how would he be affected?—The vacancy would not be filled up.

527. Is it the case that the custom which exists in the army rests merely upon practice, and that it is not authorised by law or by the Queen's regulations?—It rests upon custom. It certainly is not authorised by law or Queen's regulations.

528. In all other cases of reduction in the army, would not an officer if he sells get the regulation price?—Yes, if money was taken for the purchase of these Commissions from the reserve fund.

529. Can you give us a statement of the number of promotions which have taken place in the army in the last two years, distinguishing those which have been by purchase, and those which have been without purchase, and showing the ranks to which the promotion has been made?—Yes. I think that that could be done.

530. Could you also give the number of absorptions of commissions, distinguishing those which were by purchase, and those which were not?—Yes.

531. How long is it since the rule has been adopted of paying to an officer who has not paid for his commission a sum equal to an annual allowance of 100*l.* or 50*l.* for the time for which he has served?—In May, 1862, it was decided that 100*l.* should be granted to an officer for each year's service abroad, and 50*l.* for similar service at home.

532. It was stated in the course of the evidence given before the Purchase Commission in 1857, that the great advantage of the purchase system was the rapidity of promotion which it gave?—It appears to me that the purchase system benefits the non-purchase men to a very great extent.

533. It was stated that the advantage of the purchase system was, that it produced rapidity of promotion. Do you think that that rapidity of promotion would be equal to what it is now, if only regulation prices were given, or do you think that it would be greatly reduced, if only regulation prices were given?—I think that it would be reduced if only regulation prices were given.

534. Do you think that there are officers who are now induced to retire from the army by the large prices which are given, who would not be so induced if only the regulation prices were given?—Yes; I think that there is a great inducement for old officers of the army to sell out for the benefit of their families.

535. As long as the purchase system is maintained do you think that it is possible to maintain the regulation prices?—I think not.

536. (*Mr. Whitbread.*) That of course is qualified by the succession being regimental?—Yes; it follows as a matter of course. If persons get more than the regulation price they know who are the individuals with whom they have to deal.

Lt.-Gen. W. F. Forster, K.H.

3 May 1870.

537. Not going back beyond the beginning of the present century, we have had evidence before us that the authorities have taken steps by Act of Parliament and by regulations to check over-regulation payments. You have said that the regulations have been abandoned and that no step has been taken in the matter?—Yes.

538. Is it not true that if the authorities have not recognised the over-regulation price they have at least ceased actively to combat the practice?—All that I can say is, that there is a certain regulation price laid down for each commission, and that if it came to the knowledge of the Commander-in-Chief officially that any individual has paid more than that amount he would take steps upon it.

539. Is it not the fact that if the authorities have not recognised the practice they have, at least, ceased to take active steps to endeavour to put it down?—It would be almost impossible to do so. In the year 1803–4, when Sir Willoughby Gordon was military secretary, he called attention to the fact that the rules then insisted upon had been infringed, and he said that if instances were brought to the notice of the Commander-in-Chief he would inflict the penalty which they deserved.

540. (*Earl of Devon.*) You do not recollect any instance in which such proceedings have been taken?—No.

541. (*Sir J. Scarlett.*) Unless officers betray themselves in some way you have no means of coming at the fact?—If an officer gives his sanction I look to the names which are recorded for purchase, and I then desire an intimation to be made to the agent that a promotion is going forward, and that certain officers are selected, and that I beg to know whether the purchase money has been paid. That is all that I have to do.

542. Without having some proof it would be impossible for you to take any steps to prevent an over-regulation payment?—Yes, these things are all arranged, I presume, privately by the parties concerned.

The witness withdrew.

Adjourned.

Friday, 6th May 1870.

PRESENT:

THE RIGHT HONOURABLE SIR GEORGE GREY, BART, M.P., IN THE CHAIR.

THE RIGHT HON. THE EARL OF DEVON.
THE RIGHT HON. LIEUT.-GEN. PEEL.
THE RIGHT HON. G. WARD HUNT, M.P.
VICE-CHANCELLOR SIR W. M. JAMES.
LIEUT.-GENERAL SIR JAMES YORKE SCARLETT, K.C.B.
MAJOR-GENERAL STEELE, C.B.
SAMUEL WHITBREAD, ESQ., M.P.
P. H. MÜNTZ, ESQ., M.P.

R. H. KNOX, ESQ., *Secretary.*

COLONEL WILLIAM DENNY examined.

Col. W. Denny.

6 May 1870.

543. (*Chairman.*) Are you a retired colonel in the army?—I am. I sold out 11 years ago.

544. What were you when you sold out?—I was a full colonel of 1854.

545. Were you in command of a regiment at that time?—Yes; I was in command of a regiment then.

546. Was that regiment the 71st?—Yes; I commanded one or the other battalion of that regiment for 18 years, seven years as a major.

547. What length of service had you altogether?—About 37½ years.

548. How much of that was on full pay?—All except five or six months.

549. Was that in the same regiment?—No; I was in another regiment first.

550. In a letter in which you have expressed a wish to be examined by the Commission, you state that you have been a severe sufferer by having had your captaincy commission cancelled in September 1833 for having been concerned in giving a sum of money over the regulation price?—That is so.

551. Can you state how the fact of your having been so concerned came to the knowledge of the Commander-in-Chief?—I had better state the whole circumstances probably.

552. If you please, shortly?—In 1831 I was serving with my regiment in Canada, Colonel J——, who was then commanding the regiment, was either so ill or there were other reasons why he was told that he must either retire on half pay or sell out. This was in Canada, and Colonel J—— went away on leave, but before going away he entered into a sort of agreement with the officers of the regiment. He said "I will not exchange to half pay, but I will sell out "provided you secure me 500*l.* at the expiration of "my leave; I will sell out rather than go out on "half pay."

553. Do you mean that the officers were to secure him 500*l.* in excess of the regulation price?—Yes. After Colonel J—— went away the regiment was ordered suddenly to Bermuda on account of some rioting in the West Indies. We got as far as Bermuda. Colonel J——'s leave would expire in the month of November following, that would be in 1832. He had remained in Canada and settled there. Having known him from a child when he made up his mind to sell out and not to go upon half pay he wrote to me about it. I was the lieutenant who was to get the company. He said "I have sent in my papers, "and I beg you will collect the 500*l.* for me, as you "are one of the parties concerned." This I proceeded to do; I went to the different officers concerned. Captain M—— was the captain who would get the majority.

554. Was he the senior captain?—No, he was not the senior captain, but he was the first for purchase.

555. He was the senior captain for purchase?—Yes, I went to Captain M——, who was, I believe, perfectly aware of this transaction, as were indeed the whole regiment, and I got a letter from him in writing saying that he would give 225*l.* towards the payment to the colonel. I was to give 185*l.*, and the ensign was to give 100*l.*, and that made up the 500*l.* We did not take the major into consideration because he could not give anything; he would not give anything.

556. Did he object to give anything on principle, or was it in consequence of his circumstances that he gave nothing?—He had no objection in principle. He was a very old officer. He was commanding the depôt, and he was away at the time, therefore he was no party to the arrangement. When Colonel J—— wrote to me to collect this 500*l.* I went to the different parties; I went to Captain M——, and I said to him "We must make up the sum, and we will do it in "any way you like. Probably the fairest way would "be for me to give 185*l.*, for the ensign to give 100*l.*, "and for you to give 225*l.*" On his consenting I wrote off to Colonel J—— saying that the money would be all right, and that I had arranged everything I had taken the precaution of getting a writing from all the parties concerned, saying that they would give the sum opposite their respective names on getting

Col. W. Denny.

6 May 1870.

the promotion. At the time this letter to Colonel J—— was sent there was no immediate communication with Canada, except by a round-about route through Halifax; several packets had been lost about that time. However I sent this letter, but it turned out that Colonel J——, on the strength of the promise made to him, had sent in his papers as soon as he wrote me the letter I have referred to. Then when Captain M—— saw the Gazette he said, "Colonel "J—— never could have got your letter in time for "this. I do not hold myself bound to pay that money. "I will not pay it, because Colonel J——'s papers "were sent in before he got your reply."

557. Had all the promotions consequent upon Colonel J——s' retirement been gazetted then?—No; they were not; they were to be gazetted. I assumed that before Colonel J—— could have got my letter his papers had gone in, and that when he wrote to me to collect the money he sent his papers to England to sell out, and then his letter went to me to Bermuda asking me to collect the money for him, which I did, so far as getting the promises went.

558. At what stage of the proceedings did the captain make the objection to pay?—He only made the objection after he was gazetted to the majority.

559. Then no objection was taken until all the promotions consequent upon Colonel J——'s retirement had been gazetted?—None. We were all gazetted. The end of it all was that the regiment was exceedingly disgusted with this proceeding on the part of Captain M——. There was a feeling of honour about the thing; they would not acknowledge Major M—— in any shape. They would not touch their hats to him on parade; and they would not speak to him, or anything.

560. Who was the major whom they would not acknowledge?—Major M——. He was the captain who became major. The former major who was at the depôt had got the lieutenant-colonelcy in which he was succeeded a few months afterwards. He sold out at once. Things were in this state, and the regiment was under the temporary command of Major L——. He was a very good-natured gentlemanly person. He knew all that had happened, and he thought the thing would blow over; but Major M—— would not pay this money, and I ultimately paid it all. When he refused to pay the money the regiment took the matter up.

561. The money was actually paid then?—Yes, ultimately it was paid. It was I who made up the deficiency. As I say, the regiment took the matter up, but Major M—— said he did not care. He knew the thing would not be reported, because if it was reported the whole of the promotion would be cancelled; that is, if it was made known at the Horse Guards. Just at that time Sir M—— C—— came into the regiment, and when he heard of this he said to Major L——, "I would not keep that man in "my regiment." Major L—— said, "It has never "been reported to me or I would take notice of it." I thereupon said, "Well, I will report it to you, and "there it is; it is a fact." Major L—— reported it to the general. The general sent for Major M—— and asked him about it. He said, "I was no party "to this transaction. Colonel J—— must have sent "in his papers and been gazetted out before I signed "my name to the undertaking to give the money. "Therefore I am in no way bound to pay it." He tried to reason with him, but he would not give way. The matter was then reported to the Horse Guards.

562. Was it reported to the Horse Guards that Major M—— had refused to pay a sum which he had promised to pay over regulation?—Yes. That was in the month of March. They kept us all in a great state of anxiety for a great length of time,—until September,—and in September an opportunity occurred of a captain's retiring. Captain H—— retired at that time, and when that opportunity offered the Horse Guards ungazetted the whole of the promotions except Major P——'s. They ungazetted the promotion of all of us who were concerned in the matter of the over-regulation payment.

563. They cancelled all those commissions?—Yes, our promotion was cancelled in the "Gazette" about the middle of September. At that time I came home, and I found that I had been gazetted to Captain H——'s company. The Horse Guards did it very kindly, for they did not cancel the commissions until another opportunity of promotion offered, and then in the next "Gazette" they cancelled the promotions of the ensign, lieutenant, and captain.

564. (*Maj.-Gen. Steele.*) Including Major M——'s?—Yes, including Major M——'s.

565. Although he did not give any extra money above the regulation?—Yes, although he did not give anything over regulation.

566. (*Sir J. Scarlett.*) But he had agreed to give it?—Yes; he had agreed to give it. They cancelled the whole promotion, and in the next "Gazette" I appeared as a captain by the retirement of another officer, but I lost all my 9 or 10 months' service and pay as captain, and I paid the deficiency to Colonel J—— that Captain M—— refused to pay. The end of it was that a court-martial took place; there was disagreement in the regiment, and Captain M—— had to leave; that was how it ended.

567. What was the charge before the court-martial?—It had nothing to do immediately with this matter.

568. (*Chairman.*) But it was produced by it?—Yes; quite so.

569. The only action on the part of the Horse Guards in the matter was that these promotions were cancelled on the occurrence of another vacancy, which enabled those officers to obtain the step by other means?—Yes, they obtained it directly.

570. (*Sir J. Scarlett.*) With the exception of Captain M——?—Yes.

571. You who were known to have paid over-regulation money, were immediately gazetted to another company?—Yes.

572. (*Lt.-Gen. Peel.*) Did Captain H——, retire upon half pay?—No; he exchanged to half pay, bringing in an officer who sold. He went away from Bermuda very ill. He had married in Canada, and having gone away from Bermuda very ill his friends thought he ought to sell out, and he did so.

573. What did he get when he sold out?—He did not get a halfpenny.

574. (*Chairman.*) You mean that he got nothing beyond the regulation price?—He did not get anything beyond the regulation.

575. (*Lt.-Gen. Peel.*) How came Colonel J—— to make the agreement with you?—It was not with me; it was with the officers generally. Captain H——, Captain G——, and Captain S—— were the men who were the seniors, and were likely to get promotion. It was they who made it. I, having been brought up with Colonel J——'s sons, and living almost intimately with his family, he wrote to me to ask me to collect the money—that is all.

576. You being the senior lieutenant for purchase?—Yes, and I therefore undertook to collect the money.

577. Did you consider that after having made that agreement with Colonel J—— you and all the other officers were bound to pay what they had promised?—Yes, but I had to pay the deficiency.

578. Therefore the only person who really suffered by the transaction was Captain M——, who having been gazetted to a majority was ungazetted?—Yes, except that we lost our ranks for nine months, or something of that kind.

579. When was it that you were all gazetted the first time?—We were all gazetted in the month of December 1832.

580. And after the gazette came out Major M—— refused to pay his quota of the 500*l.*, as I understand you, and upon that being reported subsequently to the general, the general reported it

to the Horse Guards, and they cancelled all those appointments?—Yes.

581. Were you the senior lieutenant as well as the senior for purchase?—No, I had several before me.

582. Then when Captain H—— retired did the Horse Guards pass over all those officers who were senior to you and who were not on the list for purchase, but one of whom would naturally have got Captain H——'s company when it became vacant?—No, I was still the senior for purchase. I purchased Captain H——'s company.

583. (*Chairman.*) How was the vacancy in the majority filled up then?—The vacancy in the majority was ultimately filled up by an officer being brought in from another regiment; Major P—— from the 52nd was brought into the 71st.

584. (*Lt-Gen. Peel.*) Was Captain M—— the senior captain then?—No, there were as many as three or four before him. Captain H——, Captain G——, and Captain S——.

585. Those were all very old officers who had been a long time in the service, were they not?—Yes; they were all Waterloo officers.

586. And this officer was brought in over their heads?—No; Captain M—— obtained the majority.

587. I mean afterwards when Major P—— was brought in from another regiment?—Yes, I believe it was through that, as there was a row in the regiment.

588. (*Chairman.*) Was any communication addressed from the Horse Guards to you or to any other officer stating the reasons for the cancelling of those commissions?—No, never; I received no communication on the subject.

589. You only knew the fact of your commission having been cancelled?—I only knew that, and I assumed that the Horse Guards approved of what had been done by their keeping it so long in abeyance, because there was no necessity to have kept it in abeyance as they did for about nine months.

590. (*Lt.-Gen. Peel.*) As I understand you, no official notice was given to the regiment, but when the major had been gazetted, they afterwards ungazetted him, and brought in an officer from another regiment?—Something may have been written officially to the commanding officer or to the general; but I never knew of it if anything of the kind was done.

591. (*Sir J. Scarlett.*) Were you not afterwards in command of the regiment?—Yes, for 18 years.

592. When you were in command of the regiment did you find any official letter on the subject?—No; I never saw a record upon the books relating to it.

593. Did you not find any correspondence on the subject?—No; but it is easy to ascertain the fact. You have only to refer to the Gazettes, and you will see the whole thing; you will find that we were gazetted and then ungazetted again.

594. (*Lt.-Gen. Peel.*) The officer who was brought in from another regiment was a major, was he not?—Yes; a half-pay major from the 52nd.

595. (*Chairman.*) When you sold out yourself from the command of the 71st Regiment, what did you receive for your commission?—I ought to have received nothing over regulation.

596. Do you object to tell the Commission how much you received for the sale of your commission when you sold out?—No; I sent in my papers at five minutes' notice, and consequently I had no time to make any arrangement with the officers whatever. I would not serve any longer; but after my papers had gone in, the officers of the regiment gave me 1,300*l.* of their own accord. I never asked them.

597. (*Lt.-Gen. Peel.*) The officers gave you 1,300*l.* over the regulation price?—Yes, over regulation.

598. (*Chairman.*) What would you under ordinary circumstances have received in the way of over-regulation payment if you have sold out?—I should have looked to have recouped myself the money I had expended in the purchase of my commissions.

599. How much had you expended in the purchase of your commissions?—I have a memorandum of it here. I should state that I was at the Military College at Sandhurst, when the Horse Guards wrote to say that a reduction was going to take place in the army; and although I had passed my examinations there was no chance of my getting a commission without purchase, and therefore they recommended me to purchase an ensigncy in the 15th Regiment, which, with the consent of my guardians, I did at that time. At the same time they told me that I should be placed upon half pay immediately. I remained at the Military College for six months after that, studying. My first commission was dated on the 10th of January 1822, and for six months afterwards while I was on half pay I remained at Sandhurst as an ensign. Sir T—— A—— was commanding the 71st Regiment in Ireland in that year; I went over there, being an Irishman. I knew the regiment very well, and I knew that a vacancy was going to take place. They said, we will get you into the 71st if you like to come, but you will have to give something over regulation price; and I agreed to that, and paid 200*l.* over regulation price.

600. That was in order to come from half pay to full pay, was it not?—No, to get into the 71st.

601. But you were at that time on half pay?—I was an ensign on half pay in the 15th Regiment. I was gazetted in October 1822 to the 71st Regiment.

602. (*Sir J. Scarlett.*) What sum had you paid before that?—I paid 450*l.* for my ensigncy in the 15th, and I paid 200*l.* to come into the 71st, that was over regulation. Captain B—— of the 71st was going to retire at that time, and they could not make up the money, and the colonel said, "I will get you "into the regiment, but you must come into their "views." There were a couple of hundred pounds wanting and I gave it.

603. You gave the difference between full pay and half pay I suppose?—No, that had nothing to do with the 200*l.*; it was simply an over-regulation payment. There was a deficiency of 200*l.* in the amount that they were wanting to make up for Captain B—— and I gave that; it had nothing to do with the difference between full and half pay.

604. (*Chairman.*) How did you get your lieutenancy?—I was appointed to the 71st in the way I told you, and then a matter occurred to which I wish to call your attention. After I had been appointed to the 71st for a year, Messrs. Cox and Co. wrote to me to request that I would pay 450*l.* more for my commission.

605. For a lieutenant's commission?—No, for my ensign's commission. I wrote to my guardians, and they said that there was something wrong about it, but the only answer we could get was that a half pay ensigncy could not be sold, though I purchased mine and gave 450*l.* for it. As I have said in October 1822 I was gazetted to the 71st Regiment. I then gave the 200*l.* that I have mentioned over regulation, and nearly a year after I joined the 71st I got a letter from Cox and Co. to beg that I would pay 450*l.* with the interest thereon, because the money had been unpaid up to that time.

606. Have you got that letter with you?—It is a patent fact; everybody knows it at the Horse Guards. It can easily be proved.

607. I ask whether you have got the letter with you?—No.

608. Did it state the grounds upon which that demand was made?—I can tell you what the ground was. The thing has been so often before the Horse Guards that they are sick of it. The ground was that a half-pay ensigncy could not be sold.

609. (*Sir J. Scarlett.*) You had bought a half-pay ensigncy?—Yes.

610. And they treated that transaction as null and void?—Yes, they did me out of what I had paid. The officer whose step I got in the 15th was H—— (afterwards General H——, who died lately). He was a lieutenant in the 15th, and he was going to get

Col. W. Denny.
6 May 1870.

promotion to some other regiment, and it became necessary that he should get his money, although it was known that whoever came into the 15th would be put upon half pay. I knew at the time I bought my ensigncy that I should be put upon half pay, but I took it for granted that I should come upon full pay some time or other. When an opportunity offered for my coming into the 71st regiment I availed myself of it, and having paid 450*l.* for my ensigncy I never dreamt of being required to pay it over again; and I was a good deal surprised, about nine months afterwards, to get a letter from Messrs. Cox and Co., asking me for 450*l.* and the interest upon it for the time it was lost to Captain B——.

611. (*Chairman.*) Did they demand interest upon the 450*l.* from the time you joined the 71st?—From the time that I joined the 71st. Messrs. Cox and Co. have the letter, and they could show it at a moment's notice. I refused to pay the demand, and the Horse Guards wrote back after an angry correspondence and said that it must be so, and that if I did not like it I might go back to what I was before. Having joined the regiment for a year, and having gone to the expense of my outfit, I had no option but to stick to the regiment, which I did, and there was a sort of promise held out to me that if I retired my case should be entertained.

612. (*Lt.-Gen. Peel.*) In point of fact you paid 1,100*l.* altogether for the ensigncy in the 71st?—Yes, for the ensigncy.

613. When you were gazetted to the 71st what did the Gazette state; were you gazetted as an ensign?—I think it stated that I was an ensign on half pay in the 15th.

614. You were brought in then as a half-pay officer?—I was brought in as a half-pay officer.

615. (*Sir J. Scarlett.*) Did you pay any money for being brought in on full pay at that time?—No.

616. They did not make you pay the difference between half pay and full pay?—No.

617. The 200*l.* you paid an joining the 71st had nothing to do with the regulation price or with the difference between the half pay and the full pay?—No, that was quite a separate affair.

618. But naturally you ought to have paid the difference between the 15th half pay and the 71st full pay?—Yes, one would suppose so, but that did not come into their heads at all.

619. (*Lt.-Gen. Peel.*) When you were gazetted to the 15th were you not on full pay for a single day previous to reduction?—No; I never received a day's full pay there; my name never appeared in the list, either on half pay or full pay.

620. (*Sir J. Scarlett.*) Were you gazetted before the order for the reduction of the 15th was gazetted?—I was at the Military College at Sandhurst. I had passed two of my examinations, and my name was down for a commission by purchase. I knew that I should have a long time to wait, and seeing that my name was down for purchase, Messrs. Cox and Co. wrote to say that it was desirable that I should purchase an ensigncy in the 15th, but that if I did purchase I should be placed upon half pay. I thought it better to take the offer under the circumstances, and I was gazetted to the 15th. The officer in the 15th who purchased his promotion at that time got promotion in some other regiment, that was Lieutenant F—— H——, afterwards General H——; and the ensign who purchased his lieutenancy left a vacancy in the 15th. That vacancy I got, but I was put upon half pay the moment I got it. The fact is they wanted my 450*l.*

621. (*Lt.-Gen. Peel.*) There must have been a vacancy for you to be gazetted to it?—Yes.

622. If you were gazetted you must have been on full pay until the 15th was reduced?—I never received a day's full pay in the 15th.

623. (*Chairman.*) Of the 1,100*l.* which you paid altogether for your ensigncy in the 71st, 200*l.* only was over-regulation price?—Only 200*l.* was over regulation.

624. The remainder, according to your statement, was the regulation price for an ensigncy?—Yes.

625. When you got your lieutenancy how did you get it?—By purchase.

626. What did you pay for it?—I paid 100*l.* in addition to the regulation price.

627. When you got your company how much did you pay?—I was to pay 185*l.* first of all; that I recouped to the colonel, and the deficiency that I had to make up for Captain M—— was 225*l.* That brought it up to 410*l.* over the regulation price.

628. Did you purchase your majority?—I did.

629. What did you pay then?—Before I purchased my majority there were six or seven old officers who wished to retire under some particular Act. They were to retire from the service and go upon half pay, I think, and get a step of rank. Those men expected to put something in their pockets before they went, and accordingly we all gave them money in the regiment. The officers who were pretty well off contributed, and all these Waterloo officers got 700*l.* or 800*l.* apiece.

630. To induce them to retire?—Yes; and then the steps went in the regiment. Although I was a junior captain I contributed towards it pretty handsomely to get to the top of the list, so that in the course of a few years I found myself third or fourth captain in the regiment.

631. Do you mean third or fourth for purchase?—No; I was first for purchase.

632. When you purchased your majority what did you give?—I paid 1,000*l.* over regulation, and I had given about 300*l.* or 400*l.* in the way I have mentioned.

633. That is what you had previously given in the way of contributions to induce officers to retire?—Yes; altogether I paid about 1,400*l.* for my majority.

634. I suppose the officer who got your company gave you something?—He gave 1,000*l.*, which the major who retired received.

635. Did you purchase your lieutenant-colonelcy?—No; I was one of those who made a reserve battalion, and after working for six years single-handed, with no staff, and doing all the duty of the two majors, I got my lieutenant-colonelcy given to me.

636. How many years had you been in the army when you got your majority?—I got my majority in 1838. Then I must have been 16½ years in the army.

637. (*Sir J. Scarlett.*) How long was it before you got your lieutenant-colonelcy?—I became lieutenant-colonel in 1846.

638. You entered the army in 1821, did you not?—In 1822.

639. If you had never given this money your promotion would have been much slower than it was, would it not?—A great deal slower. In fact, we never should have had any promotion in the regiment if we had not given large sums of money.

640. You would have come to a dead lock?—Yes.

641. In order to move the old officers above you, you must either have paid the money, or the public must have come forward with a handsome sum?—Yes. I do not know that the public ever does come forward to do anything in that way.

642. (*Chairman.*) Do you mean that these old Waterloo officers would not have retired without receiving a sum of money to induce them to go?—Yes. Perhaps you will allow me to state a curious thing which happened when they went. I think I stated that I gave about 1,400*l.* altogether for my majority. I was only to have given 500*l.* myself personally, but the senior captain in the regiment was to retire, and to get an unattached majority. Some money was made up for him, I forget what the exact amount was, but after all that was done he came to me and said "I will not stir unless you give me 500*l.* out

" of your pocket for myself." I said " The thing is " already arranged ; I will not do it." However the senior captain stuck to it, to the last moment and said, that he would not stir unless he got 500*l.* from me. I had not got 500*l.*, but he would not leave the hotel in Dublin, so I wrote to a friend of mine, and asked him to send me 500*l.*, which he did, and I gave it to the senior captain. He got 1,000*l.* altogether for going.

643. Was any remonstrance made by the officers in the regiment upon their commissions being cancelled in the way you have described, or did they ask for any explanation of the reasons why their commissions had been cancelled?—No, we did not because we knew perfectly well that the Horse Guards had no option but to cancel them, because their orders were that if anybody was found giving money over regulation, his commission would be cancelled.

644. Then did the officers acquiesce without any remonstrance in the cancelling of their commissions by the Horse Guards, because they knew that they had been doing what was illegal and could not be justified?—We acquiesced because there was no use in resisting.

645. (*Mr. Hunt.*) Had the money been paid?—Yes.

646. Was it returned?—No.

647. (*Sir J. Scarlett.*) Colonel J—— did not return the money?—Colonel J—— got all his money, and I had to make up the deficiency.

648. (*Lt.-Gen. Peel.*) There was some peculiarity as to Colonel J——'s retirement, was there not?—Yes.

649. It appears that he received 500*l.* over the regulation price ; but it was the habit of the regiment for a lieutenant-colonel retiring to receive nearly 2,000*l.*, was it not?—Not at that time. You will probably recollect that these heavy over-regulation payments did not commence until the Waterloo officers were pretty well cleared off. Large sums were not given in those days for over regulation. However, Colonel J—— was not in a position to make a bargain on retiring.

650. (*Mr. Muntz.*) With regard to the 450*l.* which you paid at first when you entered the 15th Regiment, to whom did you pay it?—I paid it to Messrs. Disney and Co.

651. You were then really gazetted?—Yes, I was gazetted to the 15th Regiment.

652. On half pay?—The Gazette did not say on half pay. I was simply gazetted to the 15th Regiment.

653. Did you ever hear of another case like that?—I never heard of a case like it.

654. You said that when you joined the 71st you paid 200*l.*?—Yes, that was quite a separate thing ; that was done under the rose.

655. And then you said that about six or nine months afterwards Messrs. Cox and Co. applied to you for a second payment of 450*l.*, and they insisted on that sum being paid, with interest. To whom did you pay it?—To Messrs. Cox and Co. for Captain B—— ; but they let me off the interest. There were two separate and distinct commissions, for which I paid 450*l.* each. I wish it to be understood that when I sold out of the army I was in such a position that I should not have received a shilling if the gentlemanly feeling of the officers of the regiment had not led them to give me what they did. My papers had gone in, and under the circumstances of my retiring so suddenly at five minutes' notice, they lodged to my credit 1,300*l.* The major who got the lieutenant-colonelcy gave 500*l.*, the captain who got the majority gave 300*l.*, and the lieutenant who got his company gave 500*l.*, so that I recouped 1,300*l.* altogether by over-regulation money. I was 1,250*l.* out of pocket when I retired from the service.

656. I think you stated that you were not the senior captain, but the senior captain for purchase at the time you obtained your majority?—I was the fourth captain.

657. But you were the senior captain for purchase?—Yes.

658. Were the three senior captains without purchase the Waterloo officers whom you mentioned?—Yes.

659. You bought over their heads?—Yes.

660. (*Sir J. Scarlett.*) Did you not say that they retired?—No ; Captain L—— was the only one who retired. The other two were I—— and L——.

661. (*Lt.-Gen. Peel.*) Captain L—— afterwards commanded the regiment, I think?—No, never.

662. At what rank did he retire?—He got his majority as a major when I was made lieutenant-colonel of the reserve battalion. They made him up 3,000*l.* to induce him to retire. He retired upon full pay as a major, and with the brevet rank of lieutenant-colonel seven years later.

663. He had never purchased a commission, I think?—No. I will mention a very peculiar circumstance to the Commission upon this point, as showing the regard which was paid to Waterloo officers. I was the first for purchase in 1829—

664. (*Chairman.*) In what rank?—Lieutenant. Lieutenant L—— was my senior by a good many years. I was going to purchase over his head. He was at home at the depôt, and he applied to the Horse Guards, saying that if they would give him time he would get the money to purchase. They acceded to his request and gave him a year. He married and got some money and purchased the company that I was to have had.

665. Did he give more than the regulation price for it?—No ; I do not think he did.

666. (*Mr. Muntz.*) The over-regulation price at that time was not as much as it is now, was it?—No, it was very much lower.

The witness withdrew.

COLONEL H. AIME OUVRY, C.B., examined.

667. (*Chairman.*) Are you a retired colonel in the army?—I am.

668. How long have you retired?—About three or four years.

669. When you retired were you in command of a regiment?—I was not.

670. Had you been in command of a regiment?—I had.

671. Have you retired on full pay or half pay?—I sold out from half pay.

672. How long have you served altogether?—The date of my commission was 1833.

673. That was the date of your first commission as ensign?—Yes.

674. In what year did you sell out?—I forget the exact year in which I sold out ; it was about 1866, I think.

675. About four years ago?—Yes, about three or four years ago.

676. In the letter in which you offered to give evidence before the Commission you said that you had served both in the infantry and in the cavalry?—I have.

677. Did you begin with the infantry?—I was in the 68th Light Infantry as ensign.

678. Did you become a lieutenant in that regiment?—Yes.

679. What rank had you attained when you left the 68th?—I was a captain.

680. How did you obtain your two steps of lieutenant and captain in the 68th, was it by purchase?—I purchased up to the rank of major.

681. In the 68th?—No, I purchased up in the army.

Col. H. A. Ouvry, C.B.

6 May 1870.

682. I am speaking of the 68th now?—I purchased in the 68th up to the rank of captain.

683. Then you obtained the two steps of lieutenant and captain in the 68th by purchase?—No; I was lieutenant in the 12th. I exchanged from the 12th to the 68th by purchase.

684. In which regiment did you begin?—I served in the 99th, in the 12th, and in the 68th in the infantry.

685. In what regiment did you become lieutenant?—I became lieutenant in the 99th I think.

686. Did you obtain your lieutenancy by purchase?—I did.

687. Have you any objection to state what you gave for your lieutenancy?—I think I gave 150*l.* over regulation.

688. How did you obtain your company?—I exchanged into the 12th.

689. As lieutenant?—As lieutenant; and I afterwards exchanged into the 68th, and there I purchased my company.

690. What did you give for your company?—I gave 3,100*l.*

691. How much was that above the regulation?—That is 1,100*l.* over regulation.

692. Did the ensign who obtained your lieutenancy contribute; did he also pay towards the sum paid to the retiring captain?—He did not contribute any part of that sum. I paid 1,100*l.* myself.

693. Do you know what the captain who retired and into whose vacancy you came received in addition to the regulation price?—His name was Captain Mackinnon. I have some memoranda here from which I think I can answer your question. I believe it was 1,000*l.*

694. Was there a fixed over-regulation price which it was generally understood was given in the 68th Regiment for the successive steps in that regiment?—Yes, I gave a comparatively large sum. The prices were from 900*l.* to 1,100*l.* in the 68th Regiment; the 68th was rather a high priced regiment.

695. Those were the prices over regulation given by lieutenants for a company?—Yes; I am perfectly aware that that is rather more than the average.

696. Did you continue in the 68th or did you exchange into any other regiment?—I remained in the 68th for a very short time after I got my company. I suppose I was in the 68th for about seven years.

697. Did you then exchange into another regiment?—I had an accident on service which prevented my remaining in an infantry regiment, and I had my choice of leaving the army or exchanging into the cavalry. I broke my leg on service, so that I could not walk. I then exchanged into the cavalry.

698. Into what regiment?—I exchanged into the 3rd Light Dragoons.

699. Did you pay anything on that exchange?—Yes.

700. What did you pay; and was that an authorised payment sanctioned by law?—I merely paid the difference between a cavalry and an infantry commission.

701. The authorised difference?—Yes.

702. Did you pay anything in addition to that?—Yes.

703. Did you pay it to the officer who exchanged with you?—Yes.

704. How much did you pay?—2,500*l.*

705. (*Sir J. Scarlett.*) You do not mean that you paid 2,500*l.* over regulation, but that that is what you paid altogether?—Yes, I paid that altogether.

706. (*Chairman.*) How much of that was over regulation?—It would be the balance between the authorised difference and 2,500*l.*

707. The difference is about 1,200*l.* I think?—Yes.

708. Then you paid 800*l.* above the regulation?—I suppose that would be about it.

709. Did you continue in that regiment?—I continued in that regiment until I exchanged into the 9th Lancers.

710. Was that as captain still?—I exchanged into the 9th Lancers as major.

711. When did you become major?—I got my majority in the 3rd Light Dragoons.

712. Did you obtain your majority by purchase?—I did.

713. What did you pay for it?—I paid 9,500*l.* and I got something out of that; so far as I can make a good calculation I paid altogether for my majority 8,000*l.* of my own money, although I agreed to give the major 9,500*l.* I got from the junior ranks a portion of it back, so that I was out of pocket just 8,000*l.*

714. How much of that 9,000*l.* was above the regulation?—It was 9,000 guineas, 9,500*l.*

715. The regulation price for a majority appears to be 4,500*l.*?—The over-regulation payment would be the difference between that and 9,000 guineas.

716. Then what you paid was nearly double the regulation price?—Yes, just about that.

717. Then you said you exchanged into another regiment as major?—I did.

718. Into the 9th Lancers?—Yes; I exchanged into the 9th Lancers, major with major.

719. There was no difference to pay; but did you pay anything upon that exchange?—No, I paid nothing.

720. Did you receive anything?—Yes, I received something.

721. What did you receive?—I received 2,000*l.*

722. Under what circumstances did that exchange take place?—The major in the 9th Lancers was serving in India, and I was serving in England.

723. You were willing to go to India and he wished to come to England?—He wished to return to England, he being able to afford to serve in England. He came to England. My commission was worth to sell in England 2,000*l.* more than it was worth to sell in India, and accordingly he gave me that difference, but that had nothing to do with the purchase, that was merely a private arrangement between us.

724. Did you continue in the 9th Lancers until you became lieutenant-colonel?—I did,

725. Did you purchase your lieutenant-colonelcy?—I did not, I got it for nothing.

726. What occasioned the vacancy?—The vacancy was occasioned by General Grant, who is now quartermaster general, being promoted to be general for distinguished service in the field.

727. Then the promotion went in the regiment without purchase?—Yes, the promotion went in the regiment without purchase in consequence of that.

728. The other steps went successively without purchase?—They all went without purchase throughout the regiment.

729. How long did you remain lieutenant-colonel in the 9th Lancers before you sold out?—I remained a few months after that; I cannot tell you exactly how many months; about six months perhaps.

730. And you then sold out?—No, I did not; I was put upon compulsory half pay.

731. Upon a reduction?—Yes as being the second lieutenant-colonel.

732. Was that upon the regiment coming to England?—Yes.

733. And then you sold out, I think you said, from half pay?—I sold out from half pay.

734. When you sold out what did you receive for your half pay lieutenant-colonelcy?—I received 4,500*l.*

735. Was that the regulation price?—Yes.

736. There was no officer with whom you could make any private arrangement then?—No, none whatever.

737. Therefore you received nothing but the regulation price?—No, I received 4,500*l.* as the regulated value of the commission, but some long time previous to this I had received other money from the reserved fund which would not appear.

738. For what did you receive that money?—That was the difference between the old rate of

commission and the new. They did away with the 6,100*l.* in the cavalry and they made it equal with the infantry 4,500*l.* That was many years previous to the time when I sold out.

739. That was in 1860 when the cavalry commissions were reduced to the same rate as the infantry?—Yes; therefore although I only received 4,500*l.* when I sold out I think you ought to take account of the fact that I had received something previously, because it was the same thing as if I had received 6,100*l.* for I had received the difference previously.

740. Is it a common practice for officers either in the infantry or the cavalry exchanging from a regiment in England to a regiment in India to receive anything for the exchange?—That is a kind of thing that there is no regulation about; but if a man serving in India wishes to exchange with a man serving in England, he goes to an agent and gets an offer. For a lieutenant-colonel the payment is generally about 2,000*l.* (as I have stated, I received 2,000*l.*), but the value of the commission in India is about 2,000*l.* less if he wishes to sell it.

741. Have you any objection to tell the Commission how you stand at the end of these transactions? Have you received altogether as much as you have paid over regulation for your commissions?—No; I have received 2,000*l.* less.

742. Did that arise from your having to sell a half-pay lieutenant-colonelcy instead of a full-pay lieutenant-colonelcy?—Yes, I had to sell a half-pay lieutenant-colonelcy. I can tell you the exact sum that I lost.

743. How could you have come back again upon full pay if you had wished to do so?—I was offered to come back to full pay by paying 8,000*l.*

744. What would have been the difference between the half pay and the full pay?—8,000*l.*

745. That includes the extra regulation payment. What is the authorised difference?—I do not know; it will appear from the Army List.

746. Do you know how much of that 8,000*l.* was over regulation?—The whole of it was over regulation.

747. Do you mean to say that apart from any over-regulation payment you would pay nothing on coming from half pay to full pay?—Nothing; because, although there is a regulated difference put down in the Army List as being the difference between full pay and half pay, it is only a myth; it is not so in fact. When an officer gets put on half pay he gets nothing given him. I applied for it, and although it is so by regulation they would not give me anything.

748. (*Sir J. Scarlett.*) If you had exchanged with any other officer you would have got the difference, would you not?—Yes.

749. But you did not do so?—No. I had served for upwards of 30 years, and I should have got the 8,000*l.* for my regiment if I had gone on half pay for my own convenience.

750. (*Chairman.*) I understand that you had no option of exchanging. You were reduced upon the regiment coming back to England?—Yes.

751. You went compulsorily upon half pay?—Yes.

752. (*Lt.-Gen. Peel.*) When an apportunity offers, do they not bring those officers back again from half pay?—But an opportunity never does offer.

753. (*Sir J. Scarlett.*) There are opportunities occasionally when an officer is brought from half pay to full pay?—I only know of one case having occurred in the last 50 years, of a colonel being brought from half pay to full pay; that is in the case of Colonel Shute. If an officer misconducts himself, the Commander-in-Chief has then an opportunity of bringing in an officer from half pay.

754. Do you remember the case of Captain Revell, who was reduced when he came from India, and has since been replaced in his regiment?—That is the case of a captain. I am speaking of colonels. There is a very great difference between the position of a captain and that of a colonel in this respect.

755. (*Chairman.*) When you purchased your successive steps, were you the senior officer in rank, or only the senior for purchase, with officers above you who were not prepared to purchase?—I doubt whether I ever purchased over anybody's head. I do not think I did; I may have done so as a lieutenant, but I do not recollect it. I know I never purchased over anyone's head as a captain.

756. Did you ever hear of any objection being made on principle by an officer, to paying the over-regulation price?—In my own regiment there was an officer who was purchased over, I suppose, 60 times, and he never made any objection to it whatever.

757. Did you ever hear of any officer objecting on principle to violate the law by paying an over-regulation price?—No, I do not know that I have.

758. Is the payment of over-regulation prices as well as regulation prices for commissions a common practice, and a practice generally understood to exist throughout the army?—Certainly it is a well-known and understood thing.

759. Have you ever known a case of an officer who was prepared to pay the regulation price but was not able to pay more standing in the way of promotion in the regiment?—Yes, I recollect the case of one officer in the infantry.

760. What rank had he?—He was the senior lieutenant.

761. Was he ready to purchase at the regulation price?—He wrote to withdraw his papers for purchase.

762. But he had been returned as a purchasing officer?—Yes; his father insisted upon it; his father went to the Horse Guards and lodged the regulation money, and, against his will, insisted upon his name being put down, but he would not pay the over-regulation price.

763. What followed?—The officers in the regiment subscribed and lent him the money.

764. Then he purchased, paying the over-regulation price?—Yes, the other officers subscribed to enable him to do so.

765. That was in order that the promotion might not be stopped in the regiment?—Yes.

766. Did his father object to his paying the over-regulation money?—Yes.

767. That objection, I presume, was on principle, and not from want of means?—He said it was on principle.

768. (*Lt.-Gen. Peel.*) Did the money so advanced to that officer become a debt of honour?—Yes; he was a very honourable man, and he said he would pay it back if he possibly could. I believe it never was paid back; but I could ascertain that if it was considered important, as I know the man, although it occurred 33 or 35 years ago.

769. (*Chairman.*) You mean that he was unable to pay it back?—Yes, he was unable; he had no money except from his father.

770. Of course the other officers advanced the money knowing that it might be impossible for him to repay it?—Yes; he said that he would pay it back if he could.

771. They advanced him the money for their own advantage as well as for his,—in order that the promotion might not be stopped in the regiment?—Yes.

772. If I understood you rightly you said that he never was able to repay it?—Yes.

773. (*Mr. Muntz.*) You stated that you knew the case of one officer who was bought over 60 times?—Yes, a great many times at all events; he is in London now.

774. Do you mean 60 times, or a great many times?—I cannot tell you for certain that it was 60, but he was 18 years in one rank.

775. What rank did he hold?—He was lieutenant.

776. I presume he was bought over because he had not put down his name for purchase?—Yes; he had no money.

Col. H. A. Ouvry, C.B.

6 May 1870.

777. Do you know how long he had been in the service at that time?—He served 18 years as a lieutenant; therefore one can judge how long he had been in the service.

778. (*Earl of Devon.*) Is he a lieutenant still?—No; he sold out.

779. (*Chairman.*) Had he purchased his first commission?—No, he had not.

780. Had he purchased his second commission, his lieutenancy?—No, I think not; he got both commissions without purchase. He is now a man of large property. He left the army I should think 18 years ago; at all events it was many years ago.

781. At that time did the regulation exist by which a non-purchasing officer, if he had served more than three years, could obtain 100*l.* a year or 50*l.* a year, as the case might be, for every year he had served?—I do not know.

782. (*Lt.-Gen. Peel.*) You say that he sold out finally, therefore it must have been so?—Yes.

783. (*Sir W. James.*) Did he get the over-regulation price?—He got the regulation price.

784. And the extra regulation price too?—I daresay he did; I do not know.

785. (*Chairman.*) Although he had given nothing for his commissions?—I believe he had given nothing for his commissions, but he is in London if you wish to examine him. There is another phase of the subject which I should like to present to the Commission if you wish to hear me, and that indeed was my object in applying to be examined here. It is a phase which I think has not yet been presented to you, and that is the consequence which may occasionally follow from transferring an officer from one regiment to another. To take an example, I will suppose that it was required that the colonel of the Blues should be transferred to another regiment.

786. (*Chairman.*) You speak now of a compulsory transfer?—Yes. It is a thing which rarely or hardly ever occurs. I never knew it occur but once in the whole army, but suppose there was an expedition, say to Abyssinia, and suppose there was a particular officer of whom you said, "This is an excellent officer "to take charge of the cavalry, we will appoint him "to one of the regiments going out." If that officer is appointed to that regiment going out in that way the chances are that he may be mulcted of about 10,000*l.* perhaps. That case absolutely occurred to me, and I have got here the exact amount in figures that I was mulcted in that way.

787. Will you state the facts of your own transfer first, if you please?—I was serving in the 9th Lancers in India.

788. In what rank?—In the rank of major; I was the junior major; there were two majors in India. The regiment had served its time in India, and it had received its orders to return home. The officers had sold their horses, and were preparing to come home. Several months previously, knowing that the regiment was about to come home, and that I was the second major, and was therefore liable to be reduced on the return of the regiment, I made application to His Royal Highness the Commander-in-Chief to be placed in the relieving regiment in order that I might not be put upon half pay as the second major when the regiment arrived in England. Accordingly this was done.

789. In the relieving regiment there was an augmentation of a major?—Yes. The relieving regiment was the 2nd Dragoon Guards, and I was appointed to it, as appears by the War Office Order of the 29th of June 1857. In the July Army List my name appears in the 2nd Dragoon Guards as senior major, because when I got into that regiment I got a step immediately. When the Gazette in which my name appeared in the 2nd Dragoon Guards arrived in India it found me in the command of the 9th Lancers before Delhi.

790. As major?—I was major in command, the two lieutenant-colonels being absent. General Grant, who is now quartermaster-general, had a command, and the other lieutenant-colonel was away on leave in England. Therefore I was in command of the regiment before Delhi. When the Gazette arrived in camp I had nothing to do but to throw up the command, and I became immediately a private individual. I represented the case to the general commanding. He said, "I am very sorry, but it cannot be helped. I will "put you on my staff as aide-de-camp." However that does not bear upon the questions. As soon as the news of the mutiny arrived in England (you know the time it takes for the communications to reach this country) about six weeks afterwards they re-transferred me back to the 9th Lancers. They took me out of the 2nd Dragoon Guards without consulting me, and put me back into my old position of junior major in the 9th Lancers.

791. That regiment being ordered to remain in India, I presume?—Yes, the regiment being detained in India, although it had served its time. In consequence of this I was put upon half pay when the regiment came home to England. I have made a calculation of what that cost me, and I can state to the Committee what I lost by it.

792. Our inquiry is limited to the question of over-regulation payments; does it bear upon that subject?—It bears upon that. I was put upon half pay by a perfect error, I believe, and I have lost by that up to the present time 13,682*l.* and some shillings.

793. Will you explain how you lost that sum?—I lost it because I was put upon half pay. If I had not been re-transferred into the 9th Lancers I should have been in a valid regiment, but my transfer back into that regiment put me into a place where I was liable to reduction, and I was reduced. Otherwise, if I had retired upon half pay, which I was entitled to do, I should have got 8,000*l.* from my regiment.

794. If you had retired upon half pay from which regiment?—If I had retired from any regiment, either the 2nd Dragoon Guards or the 9th Lancers, I should have got 8,000*l.* That is now 11 years ago.

795. You mean that if you had retired upon half pay from a rank in which a captain would have succeeded you, you would have got that sum from him?—Yes.

796. But in point of fact you were put upon half pay on the reduction which took place in consequence of the regiment coming back to England?—Yes, that is the substance of it.

797. (*Sir W. James.*) The sum you lost was 8,000*l.* and interest?—Yes; the interest makes it up to the amount I mention. I had it cast up by a clerk.

798–9. (*Lt.-Gen. Peel.*) I thought you said that the difference between what you received and what you paid was 2,000*l.* and now you speak of 13,000*l.* odd?—Yes, but if you are placed upon half pay you do not get your money for your regiment.

800. Is it the fact that the only difference between what you paid and what you received was 2,000*l.*?—Yes, that is very true, but I had served for 30 years,—indeed for more than 30, for 33 years,—at that time to get into a position which was worth a certain sum. It was worth about 14,000*l.* Then instead of getting that 14,000*l.* I only got 6,000*l.*

801. Your original transfer from the 9th Lancers to the regiment in which you were placed as second major was a favour to yourself was it not?—It is the usual custom of the service to do it.

802. You were put over the head of the senior captain of that regiment who would have got the majority if you had not been appointed to it?—It is a rule of the service to do that for the second major of a regiment returning home from India.

803. (*Chairman.*) Is it the custom to put in a major from some other regiment which is coming home as the second major of a regiment which is going out to India?—Yes, in order to avoid putting the second major of a regiment that is coming home on half pay they transfer him into a regiment that is going out, and very fairly.

804. (*Lt.-Gen. Peel.*) What became of the other majority in the 9th Lancers?—The 9th Lancers came home, and then the second major went on half pay, of course.

805. (*Sir W. James.*) Who had the second majority in the relieving regiment that went out to take the place of the 9th Lancers?—They appointed another major to that. When I was put upon half pay I was a lieutenant-colonel.

806. (*Lt.-Gen. Peel.*) Who was the lieutenant-colonel in the 2nd Dragoon Guards when you were appointed second major?—I think his name was Keane.

807. Was he the senior captain in the regiment at that time?—I do not know whether he was or not; I never joined the regiment, and therefore I hardly know.

808. The fact is, you had a boon granted to you in being transferred to the 2nd Dragoon Guards, had you not?—No, I do not regard it as any boon whatever.

809. (*Chairman.*) As I understand you, you applied to be transferred from the 9th Lancers?—Yes, in order to avoid being put upon half pay upon the return of that regiment to England.

810. And I understand on the mutiny breaking out, and the 9th Lancers being retained in India, you were replaced in the 9th without your own consent?—Yes. It is like taking a captain of the Blues and putting him to another regiment against his will.

Col. H. A. Ouvry, C.B.

6 May 1870.

811. Am I right in collecting the result of your evidence to be that upon the whole balance of the account you have lost 2,000*l.* by over-regulation payments, and that if this transaction which you have spoken of, with regard to your transfer to the 2nd Dragoon Guards and re-transfer to the 9th, had not taken place, you would have received 13,000*l.* for principal and interest, which would have been a set-off against that 2,000*l.*, leaving you a gain of about 11,000*l.*?—Yes.

812. That is by the payment of the over-regulation price?—Yes; therefore I have now had all my service for nothing. I had a pension for distinguished service in the field, but that was taken away. I have just simply got 300*l.* a year.

813. That pension was taken away owing to your having sold out. You cannot retain it after you sell out; is not that so?—Yes; and beside that I lost the second Order of the Bath, the K.C.B.

814. You lost that by your selling out?—Yes. My reason for selling out was that I wanted to retain that money for my family. I should not have had a halfpenny if I had not done so.

The witness withdrew.

COLONEL THE HONOURABLE ARTHUR HARDINGE, C.B., and COLONEL FREDERICK CHARLES ARTHUR STEPHENSON, C.B., examined.

Col. the Hon. A. Hardinge, C.B.
Col. F. C. A. Stephenson, C.B.

815. (*Chairman, to Col. Hardinge.*) I believe you are in command of the regiment of Coldstream Guards?—I am.

816. That regiment consists of two battalions, does it not?—Yes.

817. (*To Col. Stephenson.*) I believe you are in command of the Scots Fusilier Guards, which also consists of two battalions?—Yes.

818. (*To Col. Hardinge.*) Will you be good enough to state what the establishment of the superior officers of those two regiments is at present without reference to the contemplated reduction?—Exclusive of the three field marshalls, who are our colonels, the establishment of the regiments of Guards is one lieutenant-colonel, who is a *quasi*-regimental brigadier; two majors, who are battalion-commanders. In the Guards we have not any rank which corresponds with line-majors, but two of our senior captains are mounted. Therefore, in the Coldstream Guards there are only, according to the Guards' rank, three field-officers, but the two senior captains in each battalion are mounted, which is equivalent to major in a line regiment.

819. Do each of those regimental-majors command a battalion under the lieutenant-colonel of the regiment?—We have the regimental system, and therefore each of those majors commands his battalion subject to the superior control of the regimental lieutenant-colonel.

820. Will you be good enough to state whether the same is the case with the Grenadier Guards, with the exception that the regiment consists of three battalions instead of two?—Before the reduction that took place in the Grenadier Guards last year, all three regiments of the brigade of Guards were on an identical establishment.

821. If no reduction had been made or contemplated, what would you, in the position you now occupy, have received, according to the ordinary custom of the regiment, if you had retired by the sale of your commission?—The regimental price in the Coldstream Guards would have been 8,200*l.* if I had sold out.

822. When you speak of the "regimental price," do you mean that that includes the regulation price, together with the over-regulation price customarily paid?—I include, in excess of the regulation price, the lowest price it has been the regimental custom to pay. That price varies sometimes under particular circumstances. In the case of my immediate predecessor, for example, for certain private reasons, it was raised to a fictitious price, but the regimental price in the Coldstream Guards is 8,200*l.* By the regimental price I mean the price that every officer who returns his name for purchase is expected to lodge.

823. In what proportion would it have been paid by the officers who would have profited by your retirement?—In the Coldstream Guards the extra price as coming to my account would be principally given, of course, by the officer who succeeded to the vacant company. Of course my retirement would give a step in rank to every officer in the regiment, and that would act upon the companies. One company would thereby become vacant. The regimental price of a company is 8,200*l.* That includes, of course, the whole price that an officer would have to pay for his company. In the case of my retirement by the sale of my commission that 8,200*l.* would have been lodged at Cox and Company's to my account. It would have been contributed by the ensign coming in, and also by the ensign and lieutenant getting his promotion as lieutenant and captain.

824. Would so much of that as represents the over-regulation price be paid in the same proportion as the regulation price by those respective officers?—That is a question which I am not prepared at once to answer.

825. (*To Col. Stephenson.*) Can you answer the question I have just put to Col. Hardinge?—I think it would not be paid in the same proportion exactly. I should first wish to state that the price in the Scots Fusiliers is a little different from what Colonel Hardinge stated as the price in the Coldstreams.

826. What is it in your regiment?—8,500*l.*

827. If it is not paid in the same proportion how does it differ?—The price that an ensign and lieutenant would have to pay in addition to his regulation price would be about 950*l.*

828. (*To Col. Hardinge.*) Supposing instead of wishing to retire by the sale of your commission you wished to go upon half pay, would you under those circumstances receive anything in the way of regulation price?—I should receive nothing in the way of regulation price.

829. Would you receive anything from the officer who was to succeed you or would any sum of money which is not included in any regulation be made up

Col. the Hon. A. Hardinge, C.B.
Col. F. C. A. Stephenson, C.B.

6 May 1870.

by the officers who would in succession profit by your retirement?—In the case of my going upon half pay I should receive exactly the same amount as if I had sold out, which would be 8,200*l.*, principally from the officer who got the company; but as I should not retire absolutely from the service, from the 8,200*l.* I received the Government would deduct 4,500*l.*, which is the regulation price for a lieutenant colonelcy of the line, and I should go upon half pay exactly under the same circumstances as any other lieutenant-colonel of the army.

830. You would receive the difference between 8,200*l.* and 4,500*l.*?—Yes.

831. (*To Col. Stephenson.*) Would you receive the difference between 8,500*l.* and 4,500*l.*?—Yes.

832. (*Sir J. Scarlett, to Col. Hardinge.*) Would the promotion go in the regiment whether you went upon half pay or whether you retired?—It would always go in the regiment. I believe that there is no case of the promotion ever being refused to go in the regiment with regard to the benefit of an officer who has 25 years' service.

833. (*Chairman.*) Assuming that the proposed reduction takes place as has been announced and is intended to take place, if I understand the matter rightly, upon the first vacancy of any of the three superior officers in each regiment; what would you receive if you retired by the sale of your commission?—Only the regulation, because my junior field officer has in consequence of the contemplated reduction been put into italics.

834. As a supernumerary?—Yes. Colonel Baring therefore appears in the Army List in italics. This denotes that his vacancy will not be filled up. Consequently either in the event of my wishing to sell out absolutely, or in the event of my claiming under the terms of the Royal Warrant of February 1866, an unqualified right to go upon half pay after 25 years' service, such retirement on my part would create no regimental promotion. In other words, if I may use the expression, the regimental stem has received an incision through the line of my junior field officer. Consequently the sap of the regimental money which rises to the lower branches is cut off from the top of the tree.

835. I do not think we have got before us exactly what the contemplated reduction is?—The contemplated reduction is the reduction of the junior field officer; in short, it is the reduction of a battalion commander.

836. Therefore if you were now to retire, either by the sale of your commission or by claiming your right to go upon half pay, no officer would succeed you?—No. And if I claimed my unqualified right to go upon half pay, I should receive nothing for going upon half pay. In the event of my wishing to sell out absolutely I should receive only the regulation price of my commission in the Guards.

837. Then in both of these cases the effect of this reduction upon you is, that if you preferred either to retire by the sale of your commission, or to go upon half pay instead of waiting to become a major-general, you would lose the whole amount you would have received as over-regulation price?—Exactly so.

838. I presume you are aware of the enactment in the Act of 1809, which prohibits in strong terms the paying, or receiving of over-regulation payments, and subjects an officer to heavy penalties for being engaged in a transaction of that kind?—Yes, I am perfectly aware of it.

839. How many of your steps did you purchase? My career commenced in the line. I purchased my ensigncy. I was serving on the staff of the Governor-General, during the Sutlej campaign of 1845 and 1846. There were a great many casualties both on my own staff and amongst the regiments that were serving in that campaign, and I was therefore promoted to a lieutenancy without purchase for service in the field. I purchased my captaincy.

840. In the Guards or in the line?—In the line. I exchanged into the Guards,

841. What did you pay for that exchange?—2,500*l.* I always returned my name for purchase, but I got my company in the Guards without purchase, by the promotion of the colonel of the regiment for the time being,—he being promoted to be a major-general.

842. Then, in point of fact, the only commission that you have purchased is the company: your commission as captain?—My ensigncy and captaincy are the only commissions I have purchased.

843. But that 2,500*l.* which you paid for your exchange from the line into the Guards was in addition, as I understand it, to what you paid for your company?—Yes.

844. How much of that consisted of the difference between the price of the two commissions, and how much was over-regulation?—The regulation price of a lieutenant and captaincy in the Guards is 250*l.* more than that of a company in the line. I paid 2,250*l.* above that difference for my exchange.

845. Over the regulation?—Over the regulation, as far as I can say.

846. (*To Col. Stephenson.*) Have you purchased your commissions?—Only one.

847. Which was that?—My second; from ensign and lieutenant to lieutenant and captain.

848. Did you begin your service in the Guards?—I did.

849. What did you pay for that commission in the Guards?—Altogether, including what the ensign coming in contributed (namely 1,200*l.*), I paid 3,000*l.*

850. How much is that over the regulation price?—My own contribution would be 950*l.* over the regulation price.

851. You have obtained your subsequent steps without purchase?—Yes.

852. (*To Col. Hardinge.*)—We wish to understand precisely the objection you make to the proposed reduction. So far as it affects your interests it is this, is it not? that it deprives you of the power of receiving a sum of money which, though you are prohibited from receiving by law, it has been the custom in the army for officers to pay and to receive?—Not only is it in this respect a personal grievance to ourselves, but the arrangement is also a very great disadvantage and a very exceptional disadvantage to our regiments. As far as our pecuniary interests are concerned, I think that that fully states the case; but of course there are regimental interests involved in addition.

853. This pecuniary loss, as I understand, does not affect you personally only, but it affects the two mounted officers—the majors of your regiment, does not it?—It affects them relatively to the arrangement which has taken place in the Grenadiers. In the Grenadiers the reduction of a battalion commander, which is contemplated also in the other two regiments, has been effected by the advantage being taken of a vacancy created by the promotion of Prince Edward of Saxe-Weimar to be major-general, to put the lieutenant-colonel back to the command of the battalion that is vacated. This inversion of promotion has filled the vacancy from the top instead of filling it up from the bottom.

854. I understood you to say that the effect of the reduction was to reduce one of the mounted officers. Colonel Bruce, who now commands the Grenadier Guards, is still considered colonel of the regiment, is he not, although he combines with that the command of one of the battalions?—Yes; but he has been put back to that vacancy.

855. (*Lt.-Gen. Peel.*) By a retrograde step?—Yes, because unless he had been absolutely put back to that vacancy he could not have been pecuniarily indemnified, which was the object of his degradation.

856. (*Chairman.*) But he still remains colonel of the regiment, though he has the command of one of the battalions, and he receives higher pay than the other officers who command the other two battalions? Is not that the case?—Yes. In the Grenadiers the

reduction has been effected by the unification of the double functions in one person.

857. And that was because of Prince Edward becoming major-general; the strength of the regiment remained the same?—Yes, except that they have one field officer less.

858. Supposing one of the mounted officers in the Coldstreams now wished to retire by the sale of his commission, could he do so?—No, on account of the precedent of the Grenadiers, that precedent having been made for the advantage of the senior officer, who has been put back out of consideration to his pecuniary claim. If either of my two field officers wanted to sell, the Secretary of State for War has promised to treat my pecuniary claims with the same consideration that he has treated those of Colonel Bruce. My two field officers are Colonel Fielding and Colonel Baring. Assuming that the middle field officer, Colonel Fielding, who must be the one least affected by the change, wants to go he would be unable to recover any extra price, because I should claim the right assured to me by the Secretary of State for War and go into his place.

859. Therefore it does affect your two majors as well as yourself?—Momentarily they are put in exactly the same predicament as myself.

860. And if Colonel Fielding was entitled to retire upon half pay, as having had 25 years' service and wished to do so, he would get nothing in case of his retiring now?—Nothing; he is just in my position with regard to that.

861. (*Sir James Scarlett.*) You would be reduced when he went?—Yes, I should be degraded into his place.

862. (*Chairman.*) You would still command the regiment, but you would combine with that the command of one of the battalions?—Yes.

863. (*To Col. Stephenson*).—What would be the position of your regiment in that respect?—It would be precisely the same with regard to my regiment.

864. Do you wish to make any addition to, or any correction of, Colonel Hardinge's evidence?—No, not beyond this. I wish merely to mention that this check in promotion has now been going on for upwards of a year in the two regiments consequent upon this question; and it must go on, I presume, until one of the three superior officers in each regiment shall have been absorbed by a non-purchase vacancy; and though it might be a short time in Colonel Hardinge's case, in mine it might be some years to come.

865. (*Lt.-Gen. Peel, to Col. Hardinge.*)—In the meantime if any captain and lieutenant-colonel, junior to your two senior mounted officers, wished to retire, even if he had not purchased his commission, would he receive from the regiment the customary over-regulation price?—Certainly. No officer, except the three seniors, is in the slightest degree affected by the reduction. As regards the senior officers, in the case of Colonel Stephenson and myself, we should suffer the most, because we should be forcibly compelled to remain on, if no vacancy occurred, until the time when we should be taken as major-generals, and that would at once release our two field officers. It would enable them to recover their extra money and to receive the regimental prices, either in case of their going upon half pay or their selling out.

866. Do your mounted officers retain their companies?—Yes.

867. (*Mr. Hunt.*) What was the date of the purchase of your company; your captaincy in the line?—It appears from the Army List that I obtained it in June 1849.

868. You were then exchanged into the Guards; can you give us the date of that?—I cannot give you the exact date of that, but it was within six months afterwards.

869. Do you remember who was Commander-in-Chief at that time?—Lord Hardinge.

870. At the time of your purchase?—At the time of my exchange from the line into the Guards Lord Hardinge was Commander-in-Chief.

871. (*Mr. Muntz.*) You stated just now that when an officer put down his name for purchase there was a certain understood sum to be paid for each rank, whatever the rank might be?—Yes.

872. Did it ever come to your experience that an officer put down his name for purchase and afterwards declined to pay more than the regulation price?—I believe that such cases have occured. I have heard, but I cannot say so authentically, that in the brigade of Guards there was an attempt for a certain time to stop regimental promotion by an adherence to the regulation prices, but the obstruction was only temporary, and the officer who had made the objection paid the usual sum.

873. But you would understand as a matter of course, I presume, that if an officer put down his name for purchase it would include the usual over-regulation price?—Certainly.

874. And that if an officer did otherwise it would be an ungentlemanly act?—Yes.

875. (*Col. Stephenson.*) They do not put down their names, but it is an understood thing.

876. (*Sir W. James, to Col. Hardinge.*) Did I rightly understand you to say that you exchanged from the Line into the Guards when Lord Hardinge was Commander-in-Chief?—Yes.

877. Was Lord Hardinge aware of the circumstances of that exchange?—Lord Hardinge must have been aware of the circumstances. I presume that Lord Hardinge paid the 2,500*l.* which was paid for my exchange.

878. (*Chairman.*) Will you refer to question 345 of Mr. Hammersley's evidence. He refers there to the case of two officers of the Guards some years ago. He says: "I recollect that when it was deter-
" mined to make all the steps above the captain, that
" is the majority and the lieutenant-colonelcy, no
" longer purchaseable steps in the Guards, two officers
" lost their money." Are you aware of these circumstances?—I am aware of the circumstance that a lieutenant-colonelcy of the Guards used to be purchaseable, and that that has been done away with; but I do not know in the least the circumstances as to how that change was carried into effect.

879. He goes on to say that, "They were mounted
" officers. A brevet took out eight out of 10 field
" officers, and two lost their money;" and he explains that that was, "because for the future there
" were no saleable commissions in the Guards above
" the rank of captain." Assuming his statement of the case to be true, would not that case be analogous to yours?—I do not think it would be analogous at all, because in that case, as in all reductions that have ever taken place, those reductions have been consequent upon the condemnation, or, as in the case quoted, the pecuniary depreciation of the rank so affected. In our case our loss is not consequent upon any condemnation of our own rank, but it is consequent upon the prospective absorption of a junior rank.

880. You know the reduction that is contemplated throughout the army. I think in the Army List for the present month two of the junior captains in almost every regiment are placed in the List of Supernumeraries?—Quite so. I know the arrangement and the proposed means of dealing with those officers who are placed in italics, both with regard to the Infantry and the Cavalry; and Colonel Stephenson and myself only wish that the method of dealing with them may be applied to us in the same way.

881. In that case could either of those two junior captains in the Cavalry or the Infantry, who wished to retire by the sale of his commission do so?—Yes, certainly.

882. Would he get more than the regulation price?—Certainly. In fact, he would be in his normal condition with regard to recovering any over-regulation money. Take a Cavalry regiment for example. In the month of April the junior major has been put into italics, which is an exactly analogous case to that

Col. the Hon. A. Hardinge, C.B.
Col. F. C. A. Stephenson, C.B.

6 May 1870.

of our own field officers. In the event of the commanding officer of that regiment wishing to retire upon half pay his senior major would succeed to the command of the regiment. The junior major now in italics would be released from that unhappy type, and the senior captain would succeed to the italic type. All would be able to deal with one another according to regimental custom and the succession would be uninterrupted.

883. You are assuming that the commanding officer of the regiment retires?—The question does not affect the commanding officer alone. For instance, if the junior major in italics wished to sell out, he would also get the over-regulation price, because in his case the senior captain would succeed to his majority, although that majority is italicised.

884. Take the case of two supernumerary captains in an infantry regiment; if a captain wants to sell out no lieutenant would succeed to his vacancy, would he?—Yes.

885. Is it not only every alternate vacancy that is so filled up?—As far as Mr. Cardwell has answered the question in the House of Commons, he has stated that the promotion would go on in the usual succession. The italics would denote that those steps would be absorbed when vacancies either by death or other causes occurred. For instance, take the case of a junior major of a cavalry regiment. In the event of his sudden death the senior captain would not be promoted to the majority without purchase, and the reduction would be made in the interests of the public service by his death, instead of allowing the benefit of that death to go, as it would under ordinary circumstances, when the junior major was not in italics, to the benefit of the regiment.

886. If you were to continue in the command of the Coldstream Guards until you attained the rank of major-general, the vacancy occasioned by your promotion I presume would be absorbed?—Yes, just so. Colonel Fielding would command the Coldstream regiment without vacating the first battalion of that regiment.

887. That is what happened in the Grenadier Guards, is it not?—Quite so; but in the Coldstream Guards it would be done by ascension; in the case of the Grenadiers it was done by declension.

888. (*Lt.-Col. Stephenson.*) Do you wish to add anything to what Colonel Hardinge has stated?—No.

889. (*Mr. Whitbread, to Col. Hardinge.*) You and the two junior field officers are exactly in the same position now, whichever of you is taken first loses his over-regulation money?—Unless death vacancies occur I must be taken first.

890. I assume that no death vacancy occurs and you are taken first, may I ask you, is there any prospect of your being taken at an early day?—I shall be taken in all probability in the course of a year.

891. (*To Col. Stephenson.*) Is your case similar in that respect?—No, my case is not similar; I should probably not be taken for four or five years.

892. (*Lt.-Gen. Peel.*) When the lieutenant-colonelcies and the majorities in the Guards were saleable, what was the over-regulation price paid for them?—The price for a regiment was once, to my knowledge, up to 12,000*l.* I have known that sum given.

893. Since those sales have been abolished, you are all upon the 8,200*l.* rate?—Yes.

894. (*Mr. Whitbread, to Col. Hardinge.*) As regards the course which you wish to have adopted, and which has been adopted when a reduction has taken place in some other regiments, the disadvantage of it falls upon the non-purchasing officers, but in your case it falls upon the purchasing officers?—No, it makes no difference in our case. The burden of the indirect method of prospective absorption naturally falls upon the senior of each rank. For instance, it is considered desirable to reduce eight captains of a cavalry regiment to seven—that is part of the scheme. The eighth captain is put into italics. Consequently, if the promotion was not allowed to go regimentally until it was absorbed by a death vacancy, the senior captain would be alone placed in the position of being unable to realize his extra money in the case of his wishing to sell out. Of course the moment that he was got rid of, the regimental prices would be realized, and every one of his junior officers, therefore, would find himself in a better position than the senior captain. The case is the same with our field officers. I am unable to sell out and recover anything extra on going on half pay, and the same thing applies to my field officers; but as soon as I am taken for major-general, they will have the same facilities as they would in any other regiment of the army to make either the one or the other arrangement, according to their private wishes.

895. (*Chairman.*) Have you had any correspondence with either the Secretary of State for War or the Commander-in-Chief upon this subject?—On the 16th of March 1869 I was authorised by the Commander-in-Chief to submit to him a statement of my case. On the 24th of July, a letter was transmitted from the War Department through the Horse Guards to Colonel Stephenson and myself touching our case.

896. You addressed your letter to the Horse Guards?—Everything was submitted through the Horse Guards for the consideration of the Secretary of State, except two letters afterwards, written under peculiar circumstances.

897. In that letter which you sent to the Horse Guards did you state what you conceived to be the injury that would be done to you by the proposed arrangement?—Yes, to the best of our abilities.

898. Did you, in fact, put in any claim in that letter for the payment, in addition to the regulation price, in the event of your selling out, or if you retired upon half pay, of what you would have received according to the custom of the regiment upon so retiring?—I will speak for myself first. The first letter I sent contained a general statement of my case. It was met by a letter of the Secretary of State for War. In that letter the Secretary of State for War alluded, as we conceived, indirectly to over-regulation prices. In our joint letter, which was an answer to the Secretary of State's first letter, are mentioned over-regulation prices, the subject having been, as we imagined, implied in the Secretary of State for War's own letter.

899. I presume you would not feel yourself at liberty to produce the correspondence to the Commission, but if we wished to see it we should have to apply to the Secretary of State?—I should feel no hesitation as far as I am concerned in producing the correspondence. We took copies of the correspondence, but I think it only fair to state to the Commission that the case of Colonel Hardinge and Colonel Stephenson was brought before the notice of the House of Commons in February, in consequence of a letter which appeared in the "Times." Neither Colonel Stephenson nor myself had any cognizance either of the question in the House of Commons or of the letter which inspired it, but as we thought that our case, if discussed at all, ought to be discussed upon the correspondence which had taken place, we asked the member of the House of Commons who had given notice of the question to withdraw his question until a discussion could be raised upon the correspondence itself. The correspondence was called for on the 3rd of March, and was promised to be presented to the House. I believe the correspondence is printed. We have copies of the letters, but if the Commission think it would be a more convenient to ask the Secretary of State for War whether he has any objection to anticipate his presentation to the House of Commons of the printed correspondence, perhaps it might assist the inquiry into our case.

900. I was not aware of the fact which you now state that the Secretary of State for War had consented to the production of the correspondence in the House of Commons. That being the case of course we can obtain it without asking you to produce the

letters?—It has been asked for in the House of Commons, and has been promised by the Secretary of State for War to be presented to the House, but it has not yet been presented.

900*a*. You believe that it has been laid upon the table, and ordered to be printed?—It has been asked for and ordered to be printed by the House.

901. It has not yet been delivered to the members of the House?—No.

902. But an order has been made for its printing?—Yes.

903. You have been speaking, of course, of ordinary times of peace when you have been referring to the prices given for commissions in the Guards?—Yes.

904. If a war was to break out and your regiment was ordered on service, of course there would be an end of any ground of complaint which you might have; you would go on service with the regiment?—Yes.

905. In that case, would the extra regulation price be in fact lost to all those officers in the regiment who have paid it?—The officers, of course, who have paid the extra money incur great risks. Those risks would be increased by service. In the Crimea, for instance, there were cases of officers who were incapacitated by ill-health from remaining with their regiments. Under these circumstances, an officer would be obliged to retire by the sale of his commission. Therefore the action on his part would not be a voluntary one, but it would be compulsory.

906. And he would get nothing more than the regulation price?—It would depend entirely upon his successor, and whether the man who stepped into his shoes would avail himself of the necessities in which this man was placed by ill-health to make a hard bargain, or whether he would pay the usual money.

907. If he paid him it would not be the result of a bargain in that case, would it? because the officer's retirement would be compulsory?—Yes.

908. Therefore the retiring officer would have no means of exacting any terms from his successor, but he might, you think, receive some payment from his successor from honourable motives?—Yes.

909. Would that payment be equivalent to the amount of the ordinary over-regulation money?—I think that that amount would be depreciated on account of the exposure in time of war.

910. In point of fact, in time of war are you not aware that the over-regulation price practically disappears?—It is depreciated. In my own regiment I know that the regimental prices were maintained towards the end of the Crimean war.

911. The over-regulation price did disappear, did it not?—No; it was maintained towards the end of the time. I do not say that it was maintained during the whole period.

912. (*To Col. Stephenson.*) Was that the case in your regiment?—No, because there was an inability to sell out. It was impossible to sell out as long as the war was lasting, but towards the end when peace was about being declared opportunities of doing so were offered and it was done.

913. (*To Col. Hardinge.*) In giving these large prices greatly in excess of the regulation price, are not the officers fully aware of the risks they run of losing their money?—Certainly they are, and they lose it very frequently.

914. They are also aware of the liability to a reduction being made in the army?—Certainly, they are aware of both those things. I think the position of the officers with regard to such contingencies is that they know certain risks which they run, and they rather trust *bonâ fide* that the Government will not increase those risks by the introduction of a new principle.

915. I presume that the correspondence will state clearly the whole of the grounds you have taken in objecting to the proposed arrangement as affecting your interests?—It will perfectly. There is only one thing I wish to state with regard to the correspondence and the cause of its delay.

916. You mean the delay in its production?—Yes, the delay in its production. It certainly was transmitted duly through the Horse Guards, and it has been in the War Office for a period of nearly a year, but after its having been called for by the House of Commons we were told that there was an objection to the production of some of the letters, as they referred to over-regulation prices, a subject which it was thought indiscreet for officers to broach in their letters, and it was for that reason I believe that the correspondence has been delayed; and there was also some question as to whether the Horse Guards ought to have forwarded letters from officers containing allusions to those matters.

917. But you have not withdrawn any part of that correspondence?—No. We have not withdrawn any part of the correspondence, on the contrary it has been promised to be presented to the House in its entirety.

918. (*Lt.-Gen. Peel.*) You, as officers in full pay, would naturally not communicate directly with the Secretary of State for War, but through the Commander-in-Chief?—Certainly, we should not communicate directly. The only occasion upon which we communicated directly with the War Department was when we asked Mr. Cardwell to allow us to have an interview with him. Mr. Cardwell granted us that interview, and he promised to give us an answer to the question we had put to him in a short time. As the Secretary of State for War had not given us an answer after what we thought a reasonable delay, we wrote a letter, and as it had reference to the interview we ourselves had had with Mr. Cardwell we addressed him directly. Under these circumstances we received a direct communication from the War Office, but with these exceptions all our previous letters had been duly transmitted through the Horse Guards to the War Department.

919. (*To Col. Stephenson.*) Have you any observation to make on this subject?—Merely that that communication took place with the sanction and knowledge of the Horse Guards.

920. (*Chairman.*) These letters will all appear in the correspondence?—Yes.

921. (*Lt.-Gen. Peel to Col. Hardinge.*) I understood you to say that there were allusions to the question of over-regulation payments in the letters you addressed to the Commander-in-Chief?—Certainly.

The witnesses withdrew.

MR. CHARLES HAMMERSLEY further examined.

922. (*Chairman.*) I do not think that I asked you when you were here before whether the over-regulation price paid by officers who get a step of promotion is paid by the successive officers in the same proportion as they pay the regulation price; can you answer that question?—I think they hardly pay in the same proportion; it varies a good deal in different regiments.

923. Speaking only of averages, and without referring to particular regiments, we will suppose the case of a major purchasing a lieutenant-colonelcy; the gross average sum for a lieutenant-colonelcy in the cavalry you stated the other day to be 10,475*l.*?—Yes.

924. How much of that represents the regulation, and how much the over-regulation, price?—The regulation price is 4,500*l.*, and all above that is over-regulation.

925. How much of the regulation price is paid by the major succeeding to the lieutenant-colonelcy; how much by the captain succeeding to the majority; how much by the lieutenant succeeding to the

C. Hammersley, Esq.

6 May 1870.

captaincy; and how much by the cornet succeeding to the lieutenancy?—Of the regulation price the major would pay 1,300*l.*; the captain would pay 1,400*l.*; the lieutenant, 1,100*l.*; and the cornet, 450*l.*

926. I wish to put aside first commissions for the present?—250*l.* would be the difference.

927. You say that the over-regulation price is not paid in precisely the same proportions as the regulation price, but that it varies in different regiments?—Yes, it varies a good deal in different regiments.

928. I suppose if one officer is richer than another he would probably pay a larger proportion of the over-regulation price?—Yes, that is very commonly the case; a rich officer would pay rather more than another officer.

929. Can you give us in a tabulated form the regulation and the average over-regulation price paid for the respective commissions which are saleable in the cavalry and infantry of the line?—Yes, I can do so; I will prepare such a table.

930. Can you also tell us how many commissions by promotion took place in any given year, say in the year 1869, in those regiments for which your house are agents; of those how many were by purchase and how many without purchase; of those by purchase in how many cases was the regulation price alone paid without any over-regulation (this is all exclusive of first commissions); and of those without purchase how many were in consequence of retirement either upon full or half pay?—I shall be happy to send in that table as soon as it can be prepared. I have not averaged the over-regulation price because it varies so very much. I took the whole price when I averaged it.

931. (*Lt.-Gen. Peel.*) Does the average price of 10,475*l.*, the price of a lieutenant-colonelcy in the cavalry, include the money received from the Army Reserve Fund as the difference between the old and the new regulation prices?—No, that is the present price—the infantry price.

932. What would be the difference then?—1,675*l.*

933. Then that 1,675*l.* has to be added to the 10,475*l.*?—Yes.

934. (*Chairman.*) That is in respect of officers who have paid the former regulation price?—Exactly so. Those who have not paid it would not be entitled to receive it.

935. (*Mr. Whitbread.*) I think that your answers to the questions of the Chairman will enable us to decide, as far as your information goes, with respect to the regiments for which you are agent, the proportion of cases where the over-regulation price is recoverable compared to those where it is irrecoverable either by death, by a colonel being taken to the rank of major-general, or other causes?—Yes, I have no doubt it would; it would give you a sort of general idea of it at least.

936. Can you tell the Commission what is the difference of time which it takes an officer upon the average in a purchase regiment as compared with a non-purchase regiment to attain the rank of lieutenant-colonel in a case where the officer in the purchase regiment has not put down his name for purchase?—The Army List would tell that; but I think even if I were able at this moment to answer the question, which I am not, it would give no fair conclusion. Those Indian regiments had only been recently formed at the time that they were taken over from the old East India Company. They were formed by extracts from different regiments, and the men were brought together from different corps. I do not think you could draw any fair conclusion from them as to the period in which an officer in an Indian corps would become a field officer. Indeed in India they have the purse system, which is a system of purchase.

937. You could give us that information with respect to the Engineers?—There, again, you would have a difficulty in arriving at any conclusion, because there was a great run of promotion in the Ordnance Corps, commencing in 1844, and the corps are still subject to the influence of that promotion, but the state of things has been becoming worse and worse every year in the last 10 years. The length of time that an officer passes as a subaltern is four years more than it formerly was. It has increased between four and five years, and the calculation is that in about 19 years you would have subalterns of about 45 years of age.

938. (*Lt.-Gen. Peel.*) Would the Marines be a fair comparison?—I do not know anything about the practice of the Marines.

939. (*Mr. Muntz.*) Would not the Artillery give a fair comparison?—The same observation would apply in that case. There is a frightful stoppage in the Artillery in the face of an addition to the retirement of about 12,000*l.* a-year in the last three years.

940. (*Chairman.*) Do exchanges take place between the officers in the purchase and those in the non-purchase corps; I mean by the latter those Indian regiments which have been recently added?—Some few do.

941. Does money pass upon those occasions between the exchanging officers?—I cannot say. I do not know, but I think it must.

942. You think money would pass?—Yes; but I really am not in a position to answer that question.

943. You said the other day, and I think you have repeated the statement to-day, that in those regiments there is a system of purchase, or at least a system of paying money, to induce officers to retire?—Certainly, I believe that is so.

944. Although those regiments have not been in existence long enough to enable an officer to attain to the command of a regiment by that system, does an ensign entering one of those regiments obtain his company sooner or later than he would do entering a purchase-regiment and being a non-purchase officer?—I was surprised on looking into the matter the other day to find that there is not much difference, but I think that no fair comparison can be drawn, in consequence of the recent formation of these Indian regiment. And I must mention that all these regiments are still in India, with the exception of two which have come home.

945. Are the retirements in the lower ranks more or less frequent than they are in the ordinary regiments of the line?—Less. In 136 battalions of the Line there were 147 promotions to rank of captain in the year 1869. In the nine Indian battalions, seven in the same period.

946. Probably the return you have been good enough to say you would give us would show that, because it would show how many vacancies have taken place in those regiments during the last year?—Yes.

947. (*Maj.-Gen. Steele.*) Can you give the Commission any idea of the total sum of money invested by officers, including the over-regulation price?—My calculation is that the total sum, including regulation and over-regulation, amounts to more than 11,000,000*l.*

948. (*Mr. Muntz.*) Can you give us the separate items?—I must premise that it is only an estimate. I calculate the regulation amount at 7,668,953*l.*, and the extra regulation amount at 3,577,325*l.*, making a total of about 11,246,000*l.*

949. (*Mr. Whitbread.*) For the whole service?—That is what I calculate for the whole. In addition to that there is 159,265*l.*, the difference of the value of the old and the new Cavalry commissions, that is still due; that would make rather more than 11,400,000*l.* I am bound to say that that is only an estimate, and I have had considerable difficulty in arriving at it, because it depends upon the view that the War Office might take of the value of certain commissions, particularly Cavalry commissions.

The witness withdrew.

Adjourned to Tuesday next at half-past one o'clock.

Tuesday, 10th May 1870.

PRESENT:

THE RIGHT HONOURABLE SIR GEORGE GREY, BART, M.P., G.C.B., IN THE CHAIR.

THE RIGHT HON. LIEUT.-GENERAL PEEL.
THE RIGHT HON. G. WARD HUNT, M.P.
LIEUT.-GENERAL SIR JAMES YORKE SCARLETT, G.C.B.
MAJOR-GENERAL STEELE, C.B.
SAMUEL WHITBREAD, ESQ., M.P.
P. H. MUNTZ, ESQ., M.P.

R. H. KNOX, ESQ., *Secretary.*

MAJOR-GENERAL JOHN HENRY LEFROY, R.A., C.B., examined.

Maj.-Gen. J. H. Lefroy, R.A., C.B.
10 May 1870.

950. (*Sir J. Scarlett.*) I believe you have always served in the artillery?—Always.

951. What length of service have you had in the artillery?—36 years nearly.

952. Your rank now is, I believe, that of major-general?—I am a colonel in the artillery, with the honorary rank of major-general.

953. It has taken you 36 years to attain your present position in the artillery?—It has.

954. Did it ever occur to you, or is it within your knowledge, that it has been contemplated amongst the officers at any time to take means to quicken the promotion in the Royal Artillery by any action of their own?—I cannot speak with confidence to any proposal in the old Royal Artillery earlier than that which I made myself about four years ago.

955. Will you state what that proposal of your's was?—My proposal was that each officer on being promoted from a lower rank to a higher rank should contribute to a common fund, one year's difference of pay between the two grades; but that, in order that he might not lose all advantage by promotion, that payment should be spread over two years, so that he would give up half a year's difference in pay, in point of fact, for each year. That was the first specific proposal that was made, as far as I know, but there have been others since.

956. How was that fund to be applied?—It was to be applied in the form of a bonus to induce officers to accept the Government terms of retirement, if they were entitled to them, or if they were not entitled to retirement under the Royal Warrant, to take a lump sum.

957. Then did you find that the Government allowance was not sufficient to tempt them to resign previously?—Certainly. The Government allowance has been for some years quite inadequate to tempt junior officers out of the Royal Artillery. It only offers them half pay after 25 years' service, and nothing under 25 years' service, unless upon grounds of ill-health, of course.

958. (*Chairman.*) It gives them a right to retire upon half pay after 25 years' service?—Yes.

959. You were going on just now, I think, to state something that took place subsequently to the period when your proposal was made four years ago?—I took steps to ascertain whether the proposal which I had made was one likely to be accepted by the officers of the artillery, if they were permitted to do so, and about 300 officers communicated to me their entire assent to it. They were prepared at any moment to sign an agreement to forego one year's difference of pay in the manner proposed. Some other officers, I think as many as three subalterns and two captains, have subsequently proposed alternative schemes. None of them, however, as far as I know, have received any very general acceptance, and none of these officers, I think, have taken the same steps as I did to ascertain how far his proposal would meet the wishes of the service.

960. (*Sir J. Scarlett.*) Then the object of the plan altogether was to accelerate promotion by payment?—Yes, to accelerate promotion by payment, but in the form of bonus, by which no man passes over the head of any other man, and which only accelerates the current of promotion.

961. If any of these officers had died in the meantime their bonus would have been lost, would it not?—There would have been no loss, because no man would have paid except for what he had already got, namely, his promotion. He might die in the two years, it is true.

962. If he died after having paid one year's pay he would lose that, and his friends would be so much the worse for it?—Yes, except in so far as it would have accelerated his promotion.

963. (*Lt.-Gen. Peel.*) What caused you to make that suggestion as to a bonus?—From having very attentively studied the prospects of the Royal Artillery in reference to promotion, and from being struck with the stagnation which is almost certain to fall upon the corps unless something is done in addition to the present Government arrangements. The bonus system has worked generally so well in the Indian Artilleries, and has given so much satisfaction to the officers who contributed to it, that I thought we might introduce it into our system, and that it was on public grounds an unobjectionable form of applying private funds.

964. What was the state of promotion in the artillery previous to the last augmentation, which created for the moment a great current of promotion?—You mean, I presume, previous to the first augmentation which occurred in 1846. That was the great beginning of our promotion. If you will allow me to consult a pamphlet which I have here I think I can tell you exactly how we stood at that time. In 1845, which is the period nearest to this question, the senior second captain was an officer of 25 years' service; the senior captain of artillery was an officer of over 38 years' service; the senior lieutenant-colonel of artillery was an officer of 45 years' service; and the senior colonel an officer of nearly 50 years' service. Taking a long average in the artillery, including both peace and war, it has taken an officer from 28 to 29 years to become a lieutenant-colonel on major's pay; but for a quarter of a century, from 1820 to 1845, it took from 35 to 38 years.

965. You spoke of a lieutenant-colonel on major's pay?—Yes; the rank of major was done away with in the artillery in 1827, and the captains were promoted to the rank of lieutenant-colonel, but they did not augment their pay. They remained lieutenant-colonels on majors' pay.

966. (*Chairman.*) The next step that that captain of 38 years' standing would obtain would be that of lieutenant-colonel, not that of major?—Yes, he would be a lieutenant-colonel on major's pay.

967. (*Lt.-Gen. Peel.*) Was it usual at that time for the officers in the higher ranks of the Royal Artillery to remain in the service to extreme old age?—It was very usual indeed.

968. What was the age of the director-general of ordnance then?—Sir John Macleod was director-general of artillery when he was past the age of 80, and I recollect well that when the late Sir William Cator was made director-general of ordnance we all congratulated ourselves on having so young a man. He was under 70; I think about 67.

969. (*Mr. Muntz.*) Was the proposal that you made three or four years ago accepted?—It was accepted as I mentioned just now by a large body of officers, principally the juniors, but it hung fire in consequence of Mr. Childers' measure for accelerating promotion.

Maj.-Gen. J. H. Lefroy, R.A., C.B.

10 May 1870.

Everybody was in hopes that that would produce some good result, and it has simply been hanging over from that day until now. I have brought with me here a list of the regiment, in which I have ticked off those who have signified their assent to my proposal (*producing a paper*), and you will observe by the red marks that they are in every grade of the service, and a little more trouble in canvassing would no doubt have added very largely to the number. I still believe that that scheme is a feasible scheme if it should receive the sanction of the Government.

970. Hitherto it has not been acted upon?—No, it has not been acted upon yet at all.

971. (*Sir J. Scarlett.*) Has Mr. Childers hitherto produced any scheme for the purpose of accelerating promotion?—A committee, of which Mr. Childers was president, proposed terms of retirement which were much more liberal than those previously in force, and which would have had the effect, no doubt, of inducing many officers to retire, but they have never come into operation. At this moment the promotion in the artillery is in a more stagnant state than I have ever known it. It may be a temporary thing, such as must from time to time occur, but it is the fact that at the present moment only three or four subalterns, I think, have been promoted in as many months. The promotion has been for a year or two excessively slow, and there is no prospect of its accelerating; I mean on the old Royal Artillery list. The lieutenants of 1857 will not all be promoted in 1870, and some of that rank will be 15 years subalterns, although they obtain commissions at advanced ages.

972. Then either the public or the officers themselves must do something to accelerate that promotion if we are to have efficient artillerymen?—That is my firm and strong persuasion. I wish to say as emphatically as I can that I am persuaded that unless something material is done to accelerate the promotion in the artillery, and in the engineers also, both corps will be in a most inefficient state in 15 years time.

973. (*Lt.-Gen. Peel.*) Is there any difference between the artillery and engineers and other non-purchasing regiments with regard to promotion?—At the present moment the artillery and engineers are behind the marines owing to the very liberal terms of retirement offered to the marines four or five years ago; but as a general rule the marines have been behind us. At this moment the officers of superior rank in the engineers are rather older than the corresponding ranks in the artillery, but the junior ranks of the artillery, that is, the captains and subalterns, have rather longer service than the engineers, I think. I speak under correction.

974. Is the promotion in those corps much slower than in the purchase regiments?—It is very much slower indeed than in the purchase regiments. It is even slower than it is to the non-purchasers in the purchase regiments. I do not mean at this moment, but taking the artillery on the average, it is so.

975. (*Mr. Muntz.*) In your opinion if your proposal were carried out would it not accelerate the promotion so as to make it as rapid as it is in the purchase regiments?—As rapid as it is in some of them, such as the Rifle Brigade.

976. (*Chairman.*) Was this proposal made publicly and brought to the knowledge of the military authorities generally?—It was made quite publicly, because it was proposed in a pamphlet which I ventured to publish at that time, and of which I presented copies to everybody concerned, including His Royal Highness the Commander-in-Chief and the Secretary of State for War, and although I cannot say that anybody was officially responsible for the step that I took, it was taken with the full personal knowledge of the adjutant-general of artillery.

977. Had you any doubt of the legality of it under the 78th section of the Mutiny Act, the terms of which are as follows:—"Every person, whether "authorised as an army agent or not, who shall "receive any money or reward in respect of any such "purchase, sale, or exchange, or who shall negotiate "or receive for any purpose whatsoever any money "or consideration where no price is allowed by Her "Majesty's Regulations, or any money or consideration "exceeding the amount so allowed, shall forfeit 100*l.*," and so on?—It appears to me that the system of offering officers by private arrangement a bonus to retire is a very different thing from purchasing a commission. Nobody in the former case really purchases a commission. There is a vacancy created, no matter how, and the senior officer on the list succeeds to that vacancy, but there is no purchasing.

978. The words of the Mutiny Act I have read are, "Every person who shall negotiate or receive for any "purpose whatsoever any money or consideration "where no price is allowed by Her Majesty's Regula- "tions, or any money or consideration exceeding the "amount so allowed, shall forfeit 100*l.*" No price was directly sanctioned or allowed to be paid to an officer in the Royal Artillery on retiring after 30 years' service on full pay or after 25 years' service on half pay. Did it ever occur to you that this transaction might come within the terms of the Mutiny Act?—No, it never did; but perhaps you will allow me to read the very words of my proposal, "Let the "subalterns, always with the knowledge and sanction "of the administration, enter into an agreement that "at each successive step of promotion they will "resign one year's difference of pay between the "rank they had and the rank they attain."

979. Then will you go on to the appropriation of the fund to be so constituted, if you please?—"Let "the sum thus accruing be applied to induce one or "more captains above them to retire." The scale proposed was three months' full pay for every year of service.

980. Does that proposal differ at all in your opinion from the practice that we are told exists in the purchasing corps of the army of paying an officer a certain sum to induce him to avail himself of the privilege he possesses of retiring on full pay after 30 years' service, or on half pay after 25 years' service?—I do not think it is substantially different in character, but I think it is free from some of the objections to the practice which prevails in the line by which sums are levied throughout all the grades in a somewhat arbitrary manner. In this case the sum was a definite one, and I think it was assessed in a manner the least inconvenient possible to the officer paying, because it came when he had an addition to his income, and it took only half of that addition.

981. (*Sir J. Scarlett.*) You would call it then a regulated subscription?—Yes.

982. Do you not think that in time that subscription would have been increased. When men became impatient of a delay of promotion, would they not have endeavoured to add to the temptation to officers to retire?—I think not in the artillery, because the artillery is not a monied branch of the army, and a more serious difficulty with us was to raise the sum in its lowest form. Moreover, I think that people will not pay large sums unless the benefit is immediate to themselves. In the case supposed, the officer promoted would not be inclined to pay more than his bargain, because his promotion would be safe without doing so by seniority.

983. The senior lieutenant perhaps in addition to this sum, being impatient of a delay of promotion, might have given an extra 100*l.* or 200*l.*?—Where that will turn the scale it may always come in, but the size of the corps and the scattered state of officers would make such arrangements difficult.

984. That might happen, might it not?—Yes, unless the thing were done quite openly and above board, which was my proposal, then it would be regulated.

985. (*Lt.-Gen. Peel.*) It would be necessary, would it not, in order that that scheme might be carried into effect, that its acceptance should be general throughout the artillery?—It would be necessary for a very considerable portion of the officers to agree, but the

Maj.-Gen. J. H. Lefroy, R.A., C.B.

10 May 1870.

officers I consulted, the juniors more particularly, were quite prepared to allow individual dissentients to take the benefit of it. Whatever money was contributed would be to the good. But I think the moral force in the regiment would have taken all the men with it. In some schemes they allow for 10 per cent. of dissentients or non-payers.

986. Would not the 78th clause of the Mutiny Act apply to the officer who received the money, the words of the clause being "Negotiate or receive "for any purpose whatsoever"?—If I may venture to say so, the clause is so sweeping in its character that it has no effect at all. It is violated every time a sum of money passes between officers to negotiate an exchange of stations, which happens every day.

987. (*Chairman.*) Does it happen as commonly in the artillery as it does in the line?—I think it does.

988. Money is paid by one officer to another to induce him to exchange from one station to another?—Yes, constantly.

989. But I understand that you never heard any objection being taken to this proposal of yours on the ground that it was illegal?—No.

990. Or as coming within the terms of the Mutiny Act?—No, I never heard any objection of that sort raised.

991. (*Lt.-Gen. Peel.*) Although you submitted your proposal both to the Secretary of State and to the Commander-in-Chief?—I cannot say that I submitted it to them. I had the honour of presenting my pamphlet to them.

992. (*Chairman.*) It was brought under their notice?—Yes, it was much talked of at the time.

993. (*Sir J. Scarlett.*) It was never pointed out to you that there was anything illegal in it?—No.

994. (*Chairman.*) Are large sums given in the case of those exchanges that you have referred to?—Not very large sums. It depends upon the station, and the rank of the parties, and the urgency of the case. I should say that a sum of 500*l.* was very seldom exceeded.

995. Is it done with the sanction of the military authorities or of the commanding officer of the respective stations?—The exchange must be first agreed to by the military authorities on personal grounds, and their assent having been obtained it is for the two parties to arrange between themselves.

996. Is there any secresy in this arrangement or is it well known?—I should say that there was no secresy at all about it.

997. You never heard of any objection being taken?—Never.

998. (*Mr. Whitbread*) I suppose you would claim for your scheme as an advantage over the present system that the contribution was out of a fund, which every officer would possess, and that it was not made by private funds brought in from without?—Quite so.

999. And also that in fact it was merely an undertaking to receive at some future date a portion of the pay which would naturally come to an officer on promotion?—Yes, and it was also easy to show that officers would so far accelerate their promotion by the operation of that scheme that they would receive in the shape of augmented pay, setting rank on one side, a good deal more than they would contribute, if the system became general.

1000. (*Lt.-Gen. Peel.*) Did you propose any fixed price for the officer who is to retire in each rank?—I proposed for officers who accepted the bonus three months' pay for each year of service. There have been various proposals, generally of a more heavy character to the officers, and a very large number of subalterns agreed to pay 10*l.* annually to a fund; that was a tremendous income tax upon a subaltern. Other proposals have been that they should contribute 1*l.* per annum for every year of service, which in the case of subalterns of 15 or 16 years' service would also be a very large sum. In my opinion officers on British pay and allowances could not afford it.

1001. There are two parties to be consulted, the party to pay and the party to receive payment?—Yes.

1002. Suppose an officer said, "I will not go for "that sum, but I will go for a much larger sum," what would be done then?—I most distinctly debarred all bargaining; they should go or not go. In so large a body as the artillery there are a considerable body of men who are wavering as to whether they will remain in the service or not, and I am sorry to say that a proportion of men now and then go to whom it is of great importance that they should raise a few hundred pounds in ready money. In fact a tolerable proportion of officers under 10 years' service resign their commissions on various personal grounds. I believe that that proportion would be largely increased if there was a sum offered them.

1003. If those officers had served 25 years they would be entitled to go upon half pay?—Yes.

1004. Did you propose to extend the bonus to them?—Yes.

1005. And that they should receive both half pay and bonus?—Yes, both the bonus and the half pay.

1006. Suppose a man had not served 25 years, how would you deal with him?—There might be a difficulty in getting him to go. I would offer him the bonus and no more. I ought to add that I did not propose to give the bonus to officers entitled to full-pay retirement, and did not expect that individuals who were near the term for half pay would be those to go.

1007. But you want to get rid of them just as much as the others, do you not?—Looking at the actual state of the corps at present, and at what is likely to be its state 10 or 15 years hence, we want to get rid of some younger men—not the older men—we want thinning out; we are like a young plantation, all of one age.

1008. (*Sir J. Scarlett.*) You are too crowded?—We are too crowded.

The witness withdrew.

LIEUT.-GENERAL SIR EDWARD LUGARD, G.C.B., further examined.

Lt.-Gen. Sir E. Lugard, G.C.B.

1009. (*Chairman.*) We wish to have some further information from you as to the circumstances under which the sum paid in excess of regulation has been irrecoverable. We are told that that is the case when a reduction takes place. Will you be good enough to tell us in cases in which reduction has been determined upon by the Secretary of State in the establishment of regiments both of cavalry and infantry what is the course that is now pursued. We will take the cavalry first?—Do you mean the reductions now or heretofore?

1010. I mean the reductions that have recently been determined upon and which are going on. Take the case of those officers whose names appear in the Army List of the present month in italics, who are, I believe, called supernumeraries, and who are therefore in excess of the fixed establishments of regiments. What course is taken with regard to those officers?—The reductions are made alternately when vacancies occur.

1011. (*Lt.-Gen. Peel.*) Supposing a senior major in a cavalry regiment wished to retire, would the step go in the regiment or would it be absorbed?—If the senior major of the Second Dragoon Guards, for instance, wished to go on half pay the step would not go in the regiment.

1012. Supposing he wanted to sell?—If he wanted to sell it must go in the regiment, because we have not money to absorb it. We should absorb a cornet.

1013. (*Chairman*) Then in the first case supposing

Lt.-Gen. Sir E. Lugard, G.C.B.

10 May 1870.

he wished to go upon half pay would he lose that sum of money, which we have heard is usually paid to an officer retiring on half pay by the officer succeeding to his vacancy?—Certainly.

1014. In case of his wishing to sell the absorption would not take place, but another officer would succeed him in the regiment?—Yes; the supernumerary major would remain, but a supernumerary cornet would be absorbed.

1015. Would he then, in fact, sell on the usual terms?—I presume he would sell on the usual terms.

1016. Is that the case in the junior ranks of the same regiment. Are there any supernumerary officers?—Yes, it would be exactly the same.

1017. Are there any supernumerary captains now in that regiment?—Yes, there is a supernumerary captain and a supernumerary lieutenant.

1018. If any captain in the regiment now wished to retire by the sale of his commission could he do so?—Yes.

1019. Would the senior lieutenant for purchase succeed him?—Yes.

1020. If that captain was entitled by length of service to retire on full pay or on half pay and wished to do so would any lieutenant succeed him?—No.

1021. Then in that case he would lose the price which we have heard is usually paid to an officer to induce him to retire?—Quite so. That is the rule laid down by the Secretary of State.

1022. What is the case in an infantry regiment; is it the same?—Exactly the same, only we have no supernumerary majors.

1023. But there are two supernumerary captains in all those regiments?—Yes, and the same course would be pursued with regard to them.

1024. There would be no interference with the process of retirement by sale?—No.

1025. Then how would the absorption take place. Would it be by not appointing ensigns to the vacancies so created?—Yes, we should absorb from the bottom.

1026. (*Lt.-Gen. Peel.*) And you would pay the officer out of the Reserve Fund the price of a cornetcy or an ensigncy?—Out of the funds.

1027. (*Chairman.*) In the event of a captain obtaining an unattached majority, and thereby creating a vacancy in a regiment in which there were two supernumerary captains, would the senior lieutenant then obtain the promotion?—Unattached promotion has been given as a means of absorbing supernumeraries, and for no other purpose at all.

1028. (*Mr. Hunt.*) One of the supernumerary captains would cease to be italicised, would he not?—Yes, that is, we place a captain upon the half pay of a major, and so absorb the full pay of a captain.

1029. (*Lt.-Gen. Peel.*) You would not purchase out of the Army Reserve Fund the price of any commission higher than that of a cornet or an ensign, would you?—Those are not purchased from the Army Reserve Fund, if I may term it so. They are purchased from a vote of 49,000*l.* granted by Parliament for this express purpose.

1030. Do you not take credit in your estimates for a sum from the Army Reserve Fund. I have seen your estimates. There is a sum of money transferred from the Army Reserve Fund. Were you not allowed to make use of that?—Yes.

1031. (*Chairman.*) We have had a case before us of the two colonels of the Coldstream and the Scots Fusilier Guards, and what they apparently claim is, that they should be put upon the same footing as other officers who are affected by these reductions, that they should in fact be allowed to sell just as you say every other officer who is a supernumerary is allowed now to sell. Is it the case that they have been dealt with differently from officers in other regiments of infantry?—Formerly in infantry regiments when a lieutenant-colonel was reduced he was at once placed upon half pay. We have never reduced a major in the infantry; the infantry establishment has always remained the same, namely, two majors. Therefore the reduction of a major in the Guards was a novel thing, there was no precedent to govern it.

1032. How did it differ from the reduction of a major in any regiment of the line?—It differed in this way, that above the rank of captain a commission in the Guards is not saleable.

1033. Above captain and lieutenant-colonel?—Yes; the majority and lieutenant-colonelcy of the Guards are non-purchase steps.

1034. That is, an officer holding a commission as field officer would only be entitled to the sale of his captaincy in the Guards?—His captain and lieutenant-colonelcy.

1035. He might sell, but he would not get more than the value of his captaincy?—Not by regulation.

1036. In fact, the commanding officer of the regiment would get no more than any captain in it if he sold out?—No, not by regulation.

1037. Then why should not a supernumerary major in the Guards be allowed to sell for the regulation price of his commission just as a supernumerary captain in a line regiment might?—We have had no application from a supernumerary major; the application was from a lieutenant-colonel to go upon half pay, there being a supernumerary major in the regiment.

1038. But apparently from the correspondence which took place between these officers and the Horse Guards and the War Office there has been a distinct application, has there not, that on either of them selling out or retiring on half pay the promotion might go in the regiment, as they allege it does in the case of officers reduced in other infantry regiments?—Yes, on their going to half pay.

1039. I see that Colonel Stephenson, in his letter to the Horse Guards of the 7th of August 1869, says, "The question has now been put to me officially, "'Whether under the arrangements notified to the "'major-general commanding the brigade of Guards "'in your letter of the 28th of May last, the majors "'of battalions under my command can retire from "'the service or upon half pay'" (he puts both cases) "'in the manner heretofore customary, namely "'by the promotion consequent upon such retirement "'allowed to go in the regiment in the usual way'"?—Yes.

1040. Now I understand that a supernumerary major retiring from an infantry regiment would be allowed to sell his commission, and the promotion would go in the regiment in the usual way; is not that so?—I do not think we have had one case of that kind. If a case did occur we should absorb the supernumerary ensign.

1041. It is the case you say with a supernumerary captain, at all events?—In the cavalry we have supernumerary majors, and there the promotion was continually allowed to go in the regiment, the supernumerary being kept on.

1042. Then would the supernumerary major in the cavalry be allowed to retire from the service by the sale of his commission on the usual terms, the promotion going in the regiment?—Yes, the junior supernumerary being absorbed.

1043. Would he now be allowed to do so?—Yes.

1044. Is there such a thing as a supernumerary major in the cavalry now?—Yes, there is.

1045. These reductions do not involve the reduction of a major in the cavalry, do they?—Yes, one major of every cavalry regiment. For instance, if you look at the 6th Inniskilling Dragoons, you will find that the second major there (Major Gore) is in italics.

1046. Could Major Gore retire from the service by the sale of his commission on the usual terms, the promotion going in the regiment?—Yes, he would be able to retire by the sale of his commission.

1047. The promotion going in the regiment, so that he would obtain what has been termed the full "regimental value," as distinct from the regulation price?—Yes, quite so. A cornet would be absorbed

in the same way as an ensign would be in the infantry.

1048. If that rule has been adopted with regard to supernumerary majors in the cavalry, we want to know the reasons which have induced the authorities to establish a different rule in regard to the majors in the regiments of Foot Guards?—There is no supernumerary ensign to absorb in the Guards, no reduction taking place in the junior ranks, as in the regiments of the line.

1049. (*Lt.-Gen. Peel.*) On any officer of a rank senior to lieutenant and captain of the Guards selling his commission, would that step go in the regiment?—You will find that Mr. Cardwell replied to Colonel Stephenson or Colonel Hardinge that he was prepared to give the 4,800*l.* for his commission and to absorb a majority.

1050. That is not exactly an answer to my question; I want to know whether the step would go in the regiment?—That has been refused.

1051. (*Chairman.*) That refusal involves the very question we are now inquiring into, namely under what circumstances the over-regulation price is lost. As I understand this correspondence, it is this,—that the Secretary of State for War offered, if those officers desired to retire from the service by the sale of their commissions, to find the regulated price from the Reserve Fund?—Yes.

1052. But what they ask is that the promotion may go in the regiment, in order that they may obtain what they call "the regimental value" of their commissions?—Yes.

1053. Is it the case, that by the rule adopted with respect to the Foot Guards those officers do, in fact, lose the over-regulation price?—Yes.

1054. I do not understand from your statement that any other officer who is to be reduced does so; if an officer desires to sell his commission in other cases, the promotion going in the regiment, the usual terms are made upon which officers retire under ordinary circumstances?—Quite so.

1055. (*Sir J. Scarlett.*) But is this case analogous to other cases; in this case your object is to reduce the seniors of the regiment?—Yes; there are no juniors to reduce in the Guards.

1056. Then the case is not quite analogous to those with which it has been compared?—No.

1057. If one major was removed by any accident in the Guards now, what would be the effect of that; for instance, if, we will say, Lord Abinger was removed from the Scots Fusilier Guards, what would become of Lieutenant-Colonel Stephenson?—There would be then no longer any supernumerary, and he would be allowed to do as he pleased with regard to sale or retirement.

1058. Then Colonel Stephenson would command a battalion, would he not?—Colonel Stephenson would command a battalion as well as the regiment, the same as Colonel Bruce does now.

1059. (*Chairman.*) There was a case mentioned by Mr. Hammersley the other day of two officers of the Guards who "lost their money," as he says, some years ago when it was determined to make all the steps above captain, that is, the majority and lieutenant-colonelcy, no longer purchaseable steps in the Guards. You alluded to the circumstance just now yourself, I think?—I alluded to the fact of their being non-purchase steps, but I was not in office at that time; I think it took place in 1857.

1060. Do you know whether the change which was then made did subject the officers then holding commissions as majors and lieutenant-colonels in the Guards to any pecuniary loss?—I understood that it did.

1061. In what way, because they could still sell their captain and lieutenant-colonelcy, could they not?—They could still sell a captain and lieutenant-colonelcy, but we all know that a sum is given beyond that for a majority and for a lieutenant-colonelcy.

1062. (*Sir J. Scarlett.*) Or was formerly?—Or was formerly.

1063. It is not now, is it?—I am not aware that it is not.

1064. (*Maj.-Gen. Steele.*) They could not sell the price of their majority and the price they paid for their regiment, because it was made non-purchaseable after the rank of captain?—Quite so, by regulation.

1065. In any way?—Yes, that is what I am saying, that there is still an extra-regulation payment, as I understand it.

1066. (*Chairman.*) Then the distinction you draw between the regiment of Guards and the other infantry regiments is, that in the Guards there has been no reduction in the junior ranks, and consequently the absorption must be at the top instead of at the bottom of the regiment?—Quite so.

1067. And therefore if those officers were allowed to sell, and the promotion to go in the regiment, the absorption would never take place, is that the case?—It would never take place until a promotion to a major-general occurred.

1068. Or a death?—Or a death.

1069. Is there any difference made between purchase vacancies and non-purchase vacancies in this system of absorption?—In the non-purchase we absorb the senior rank; we do not go to the bottom for the absorption.

1070. Will you be good enough to give an instance?—Suppose a captain died, we should take that step. If there was a supernumerary captain we should at once absorb that supernumerary captain, we should not go lower. Supposing two companies were reduced in a regiment, according to the present practice the first captain who died, that is the first non-purchase vacancy would be taken as an absorption by the public.

1071. The promotion would not go in the regiment without purchase, as it usually does?—Quite so.

1072. Supposing that were to occur a second time, what would happen?—The promotion would then go in the regiment.

1073. Then in the case of those non-purchase regiments every alternate vacancy only goes in the regiment?—Yes.

1074. (*Lt.-Gen. Peel.*) Will you have the goodness to explain what the rule has been with regard to first appointments at present?—That every alternate purchase and non-purchase vacancy be filled.

1075. Has that any reference to what regiment the vacancy may occur in?—It is without any reference to that.

1076. Therefore one regiment might by accident have two ensigns absorbed, whilst another had two ensigns added?—There would not be a vacancy in that case; the vacancy would be caused either by an officer selling out or by an officer dying.

1077. (*Sir J. Scarlett.*) If two ensigns were to die you would gazette one?—Yes, quite so.

1078. (*Lt.-Gen. Peel.*) You say that when two vacancies take place one is filled up and the other is absorbed?—Yes.

1079. Without any reference to the regiment in which the vacancies occur?—No, it must take place in the regiment in which it occurs.

1080. I thought it was in consequence of the necessity of supplying the cadets at Sandhurst and other places that you filled up those vacancies?—Yes. A vacancy can only occur in a regiment when a casualty occurs; as, for instance, if an officer in any regiment dies.

1081. Then you go not according to the general vacancies of the army, but according to the vacancies of the particular regiments?—Yes, quite so.

1082. (*Chairman.*) Have you any other information to give to the Commission with regard to the effect of these reductions upon the pecuniary interests of officers?—No, I think not.

Lt.-Gen. Sir E. Lugard, G.C.B.

10 May 1870.

1083. In respect of the prices paid for their commissions?—No. There is no doubt that these reductions reduce the over-regulation price; they make the promotion more uncertain.

1084. How long has it been known that these reductions would be carried into effect?—It could not have been known before it had been decided by the Secretary of State for War and the Government.

1085. I presume the time has not been long enough for you to know whether any officers have availed themselves of the power of retiring either on half pay or on full pay since those reductions have been announced, because in those two cases the sum paid is over regulation?—Yes.

1086. You do not know whether it has in fact checked the retirement of officers on full pay or on half pay?—Not on full pay. The retirement on full pay is generally regulated by the sum that is appropriated for that purpose, and when there is a vacancy in that sum you generally get an officer immediately ready to take it.

1087. But we have been told that money is usually paid by the officers of the regiment to an officer who is entitled to retire on full pay to induce him to avail himself of that privilege?—I imagine that that is so.

1088. But if the vacancies are absorbed he could not get that money?—Just so, if no promotion took place.

1089. I want to know whether the effect of the announcement of the proposed reductions has been to check retirement on full pay or on half pay?—It has checked the retirement on half pay I have no doubt, but not on full pay I think; the officer would most likely wait until the promotion was due.

1090. You think that the inducement to retire on full pay is sufficient without the additional inducement of the money which is generally paid by officers in the regiment?—No, I do not think it is.

1091. (*Sir J. Scarlett.*) Are there many instances of full pay retirement in the course of the year?—Yes, your Secretary might be able to tell whether there is any sum available now for that purpose, but I do not think that there is. There is a certain sum voted for retirements, and no officer can be allowed to retire on full pay unless there is a portion of that sum available, that is, unless some other officer has gone off the list.

1092. (*Lt.-Gen. Peel.*) Then although an officer may have served for 30 years he cannot claim to retire upon full pay until there is a vacancy in that fund?—He can claim it, but he cannot get the retirement until the money is forthcoming.

1093. (*Chairman.*) Then he has no absolute right to retire after 30 years' service on full pay?—He has a right to retire when the money is ready; his right is established by 30 years' service.

1094. (*Mr Hunt.*) He is qualified to retire?—He is qualified to retire, but the opportunity for retirement depends upon a vacancy in the fund.

1095. (*Lt.-Gen. Peel.*) Are officers so qualified afterwards taken according to the date of their application to retire upon full pay?—That I am not aware of. The recommendation comes from the Military Secretary, and if the officer is qualified in every respect the Secretary of State has no objection to his retirement.

1096. (*Chairman.*) Will you be good enough to put in the regulation with regard to the retirement on full pay to which you have just alluded?—"The "retired full pay list shall be limited to field officers "and captains, and the annual amount expended on "this head shall not exceed for the Guards and line "62,000*l.*, for the Artillery 32,000*l.*, and for the "Engineers 16,000*l.*, but lieutenant-colonels who "retire under article 88" (that is, compulsory retirement) "and all officers placed on this list prior to our "royal warrant of 1840 shall be supernumerary to "the above establishment."

1097. (*Sir J. Scarlett.*) With reference to the cases of Colonels Stephenson and Hardinge, what was the object of placing them in the situation in which they complain that they are placed?—The object was to reduce one field officer of the Guards in each regiment.

1098. The object was to reduce the senior field officer of the Guards in each regiment?—Yes; the original proposal was to reduce the lieutenant-colonel.

1099. The lieutenant-colonel who commands the two or three battalions?—Quite so. That was the first proposition. Then it was altered afterwards to reducing a major and leaving the lieutenant-colonel.

1100. Therefore this difficulty arises from the desire to reduce the senior officer of each regiment?—Yes, it was discussed whether the general officer commanding the brigade of Guards should be done away with or a lieutenant-colonel of each regiment. The decision was that a lieutenant-colonel of each regiment should be done away with. It was subsequently changed to reducing a major of each regiment.

1101. (*Mr. Whitbread.*) If that alternative proposition had been adopted would any hardship of a similar character to that of which Colonels Hardinge and Stephenson now complain have followed?—According to the usual practice Colonel Hardinge and Colonel Stephenson would have been placed upon half pay at once.

The witness withdrew.

Lt.-Gen. W. F. Forster, K.H.

LIEUT.-GENERAL W. F. FORSTER further examined.

1102. (*Chairman.*) I think you said that you would ascertain whether there had been any cases since those which are stated in Sir John Macdonald's evidence to have occurred about the year 1834, in which the Horse Guards had interfered at all on proof that an officer had given more than the regulation price for his commission. Have you discovered any case since the time referred to by Sir John Macdonald?—No; I desired inquiry to be made, and I failed in discovering anything of the sort, but I forget when that case which you refer to took place.

1103. The evidence was given by Sir John Macdonald before a Commission on promotion and retirement in the year 1838, and his statement was in answer to a question put to him by Lord Hill, who was then Commander-in-Chief. The question is in the evidence, No. 1919, "Do you ever remember an "instance within the last two or three years where it "came to my knowledge that more had been given "than the regulation allowed, and that I ordered it to "be cancelled?" His answer is, "I recollect one or "two cases;" and he mentions one. We have also had before us a letter from a lieutenant of the 55th regiment, which you said you would inquire into.—I have done so.

1104. That was in the year 1835, was it not?—In 1834.

1105. That was probably one of those cases referred to by Sir John Macdonald, in which notice was taken by Lord Hill, the then Commander-in-Chief, of more having been given than was sanctioned by regulation for a commission, and in which the officer was deprived of a year's rank in consequence?—I will hand in a memorandum upon that subject (*producing the same*).

1106. You have referred to that case in the records of the Horse Guards, and this memorandum explains it?—Yes. "The case of Lieutenant Carey, 55th "Regiment, was brought to the notice of the Com-"mander-in-Chief in January 1834 by a letter from "Captain Bird, then a retired officer, but late of the "55th, complaining of the non-fulfilment of a bargain "on the part of Lieutenant Carey. It appears that in "the year 1830 Lieutenant Carey was guilty of

" making a bargain with Captain Bird to give him " 400*l.* for his company, to which he succeeded, " beyond the regulation price. The punishment " inflicted on Captain Carey for this breach of the " regulations of the service was the post-dating one " year of his commission as captain."

1107. Have you also looked out in the records the case of Colonel Denny, of the 71st Foot, who has given evidence before the Commission, from which it appears that the whole of the promotions in that regiment, including his promotion to the rank of captain, were cancelled in consequence of some arrangement which had been made for the payment of a sum of money to an officer retiring?—All the information that I can arrive at with regard to that circumstance is contained in this memorandum (*handing in the same*).

1108. Could you trace the papers in this case?—No, we could not.

1109. Colonel Denny has stated that no communication was made to the regiment from the Horse Guards of the reason why these commissions were cancelled, nor were any steps taken to cancel them until another vacancy took place, so that the cancelling of the old commissions was coincident in point of time with the re-gazetting of the officers to new commissions consequent upon another vacancy occurring, with the exception of the major, who was the only officer who refused to pay the extra money after having promised to do so. You cannot find any trace of that in the office?—No.

1110. (*Lt.-Gen. Peel.*) Would this be possible, that an ensign on half pay, having paid the regulation price of 450*l.*, and having been gazetted to a regiment, should afterwards be gazetted into another regiment and be called upon to pay an additional 450*l.* as the regulation price, and also to pay 200*l.* to the officers of that regiment?—He could not have paid 900*l.* for one ensigncy; it is impossible.

1111. He said he was not called upon in the case of the second ensigncy (which was in the 71st Foot) by Messrs. Cox to pay the 450*l.* for some months after he was gazetted, and that he was then called upon to pay 450*l.* with the interest upon it. Would it not have been necessary for the army agents, Messrs. Cox and Greenwood, to report to the Horse Guards that the regulation price of the commission was lodged in their hands before he was gazetted to it?—Certainly; he could not be gazetted until the money was paid.

1112. (*Mr. Hunt.*) Messrs. Cox and Greenwood might advance the money to him, might they not?—Yes; that would be a private arrangement.

1113. It may have been the case that they advanced the money and then reported it as lodged?—Yes, I suspect it is very possible that Colonel Denny might have purchased what they called a half pay ensigncy, which existed in those days.

1114. (*Sir J. Scarlett.*) But then he would not have paid the 450*l.* again, would he?—A great number of people purchased half pay ensigncies in those days to get a good interest for their money.

1115. Would such a person have had to pay the whole 450*l.* over again, or only the difference between half pay and full pay?—It appears to me a very extraordinary thing if he did pay the 450*l.* over again.

1116. There is no such custom now?—No, ensigncies on half pay are not now to be purchased.

1117. (*Chairman.*) Then are we to understand you as saying that since the case of Lieutenant Carey of the 55th and Captain Denny of the 71st, no instance has occurred in which any officer has been reported to the Commander-in-Chief an account of anything relating to an over-regulation payment?—Not that I am aware of.

1118. You cannot trace any record of any inquiry having been made or of any information having been received that would justify the Commander-in-Chief in interfering on that ground?—Certainly not, so far as I have been able to ascertain.

1119. Does not it also appear that those two cases which occurred about the year 1834 were both brought before the notice of the Commander-in-Chief in the way of a complaint of the money not being paid, though it had been agreed to be paid?—From that memorandum it would appear to be so. It would not have been represented at all if it had not been a grievance, I conceive.

1120. The grievance was not that the law had been violated by paying more or agreeing to pay more than the regulation price, but that the agreement to pay more than the regulation price had not been fulfilled?—Yes, I presume so.

1121. (*Mr. Hunt.*) With regard to these transactions that Colonel Denny speaks of there would be a record of them at the Horse Guards, would there not, if certain commissions had been gazetted and they had been afterwards cancelled by gazette, that would all be recorded?—It could be found in the gazettes certainly.

1122. You would be able to verify those statements in Colonel Denny's evidence?—I presume so. The only question is whether Colonel Denny is quite correct in what he believes to be the case himself, and what he has therefore stated to be the case.

1123. (*Lt.-Gen. Peel.*) It would be perfectly easy to find out from the gazette whether or not Captain Myddleton was gazetted a major?—Yes.

1124. (*Mr. Hunt.*) And whether his commission was afterwards cancelled, that is what I want to know?—Yes. The only question is as to how it was done, because the extracts from the gazettes which I have before me agree as to dates with what he stated.

1125. (*Sir J. Scarlett.*) Do you know of any case in which the Commander-in-Chief or the Secretary of State for War has taken notice of any extra money being paid unless those cases were brought before him by an indiscretion or by an action of this kind?—I do not know of any case under either of those circumstances.

1126. You know of no other case except these two?—No; but as you are aware it is a very difficult thing to look thoroughly into the records for a vast number of years. I can speak much more decisively with regard to what has taken place since I have been the Military Secretary.

1127. (*Lt.-Gen. Peel.*) In reference to the cases that have been brought to the notice of the Commander-in-Chief which you have laid before us, the punishment inflicted was not that pointed out by the Article of War, but merely suspension of a year's rank?—Nothing more that I am aware of.

1128. (*Sir J. Scarlett.*) The law was not carried out?—Not to the full extent.

1129. (*Chairman.*) I think you say that you have not been able to trace any papers in the case of Colonel Denny at the Horse Guards?—No, not any papers.

1130. Have you found any correspondence?—No, I think not.

1131. Have you found an official letter from Lord Fitzroy Somerset, who was then Military Secretary to the Commander-in-Chief, relating to that case?—I have, and I produce it (*producing the same*).

1132. The letter is addressed to "Major-General " Sir S. R. Chapman, K.C.B., Bermuda." I presume he was the commanding officer on the station?—He was.

1133. Will you read that letter?—It is dated "Horse Guards, 12 July 1833. I have had the honour to submit to the general commanding-in-chief your letter of the 1st of April, transmitting for his information a variety of papers which were placed in your hands by Major Levinge commanding the 71st Regiment explanatory of an arrangement by which Major Myddleton, Captain Denny, and Lieutenant Austen agreed to give Lieutenant-Colonel Jones late of that regiment sums of money each in excess of the regulation, and exhibiting a complaint on the part of Major Levinge that Major Myddleton had refused to

Lt.-Gen. W. F. Forster, K.H.

10 May 1870.

fulfil the engagement he had entered into. Having perused these papers with the utmost attention Lord Hill deeply regrets that so gross an instance of irregularity should have been brought under his notice. He at once saw the necessity of vindicating the rules and regulations of the service, and of recommending that the promotion of the above-named officers should be cancelled; but in a matter involving a legal question he felt it his duty to solicit the opinion of the Judge Advocate General upon the course which he proposed to pursue, and now having obtained that opinion and finding it in accordance with his own, his lordship directs me to intimate to you that he will immediately submit to His Majesty that the appointment of Major Myddleton, Captain Denny, and Lieutenant Austen should be cancelled, and that they should revert to their former commissions."

1134. You have not then been able to find the letter from Sir S. R. Chapman enclosing Major Levinge's letter?—No, we have not been able to discover it yet.

1135. This is the only letter that you have yet been able to find bearing upon the point?—Yes.

1136. Have you got a copy of the Judge Advocate's opinion which is referred to here at the Horse Guards?—Probably that would be at the Adjutant-General's, but I can inquire for it.

1137. Will you be good enough to inquire for it?—I will.

1138. That letter probably would not reach Bermuda for several weeks in the then state of communication?—It would take about six weeks.

1139. It appears I think that the appointments were cancelled in the gazette of the 13th of September 1833, and that Lieutenant Denny was gazetted to a company by purchase on the 27th of the same month of September?—Yes, about a fortnight afterwards.

1140. Therefore probably he never heard of the first promotion being cancelled until he heard also of his being gazetted to a company on another vacancy occurring?—Yes, as he was at Bermuda at the time that might be so.

1141. (*Lt.-Gen. Peel.*) In point of fact the Horse Guards must have brought in a man perfectly unknown to Colonel Denny and the other officers in the regiment in order to give Lieutenant Denny the company?—I have no doubt of it.

The witness withdrew.

Adjourned to Tuesday next, at half-past one o'clock.

Tuesday, 17th May 1870.

PRESENT:

THE RIGHT HONOURABLE SIR GEORGE GREY, BART., M.P., G.C.B., IN THE CHAIR.

THE RIGHT HON. LIEUT.-GENERAL PEEL.	MAJOR-GENERAL STEELE, C.B.
VICE-CHANCELLOR SIR WM. JAMES.	SAMUEL WHITBREAD, ESQ., M.P.
LIEUT.-GENERAL SIR JAMES YORKE SCARLETT, G.C.B.	P. H. MUNTZ, ESQ., M.P.

R. H. KNOX, ESQ., *Secretary.*

L. Coleman, Esq.

17 May 1870.

LEONARD COLEMAN, ESQ., examined.

1142. (*Chairman.*) What office do you hold?—I am one of the assistants to the military secretary.

1143. In the Commander-in-Chief's office?—Yes.

1144. You are well acquainted, are you not, with the arrangements which have been made with regard to the present reductions in the army?—I am.

1145. Will you be good enough to state to us in what way the absorption of commissions takes place with a view of effecting those reductions. Take for instance, any cavalry regiment. I have before me now the 6th Inniskilling Dragoons. I see there is the name of a major placed in italics, which means that that commission is to be absorbed, does it not?—Yes.

1146. How does that process of absorption take place in the case of the second major in that regiment?—It can only take place on the occasion of the promotion, retirement, or death of one of the two majors.

1147. It can only take place in the case of the lieutenant-colonel or one of the two majors dying or being promoted?—Yes, or retiring.

1148. Supposing that either of those majors wished to sell, could he do so, and would the promotion go in the usual way?—At this moment the promotion would go through the regiment.

1149. (*Sir W. James.*) Will you explain why you say "at this moment?"—Because there happens to be no reserve fund to pay for it. If the reserve fund had been as it stood some time back it would have provided sufficient money to purchase up the vacancy, and the majority would not have been filled. There being no money available for that purpose now the promotion would go through the regiment.

1150. (*Chairman.*) Do you mean that it is owing to that fact, namely, that there is no money now in the reserve fund out of which the price could be paid to the officer retiring, that the promotion would be allowed to go in the regiment?—Yes.

1151. Is the effect of that that the officer retiring now by the sale of his commission would obtain what is called the "regimental value" of his commission, meaning the over-regulation as well as the regulation price, whereas if the reserve fund was rich enough to pay him the value of his commission he would only obtain the regulated price?—I have no knowledge of anything beyond the regulated price.

1152. Would he obtain from the reserve fund if it were rich enough, the regulated price of his commission?—Yes.

1153. Supposing one of these majors was entitled to retire, and wished to retire upon full pay or upon half pay, what would happen?—If he were to retire on half-pay the vacancy would be absorbed.

1154. Then if either of these majors retired on half pay now, the vacancy would not be filled up?—No.

1155. Supposing one of them were to retire upon full pay?—The same thing would take place.

1156. Is the same the case with regard to the supernumerary captains and lieutenants?—Yes.

1157. Then the absorption takes place in fact, in the case of an officer retiring upon half pay, and in every alternate case of retirement upon full pay, and in a case of vacancy by death, from the lowest to the highest rank of the regiment?—Yes.

1158. Does the same thing occur in the infantry with regard to captains?—Yes.

1159. There are no supernumerary majors there?—No.

1160. In the case of a regiment where two captains are placed in italics as supernumeraries, may a captain in that regiment sell his commission just as he might have done before, and will the promotion go in the regiment as it would have done before these reductions were decided on?—Exactly, for the present.

1161. But if he retires upon full or upon half pay, what would happen then?—Supposing he retires upon full pay, it would depend upon whether it was the turn to fill the vacancy. If he retires upon half pay, the vacancy would be absorbed.

1162. Take the case of two majors in a cavalry regiment. Supposing the senior major wished to retire upon half pay, what would be done?—That vacancy would be absorbed.

1163. Then supposing the only remaining major wished to retire upon half pay, he might do so upon the usual terms, the promotion going in the regiment?—When there is only one major, he would retire upon half pay under whatever arrangement His Royal Highness thought proper to sanction.

1164. Does that apply to all ranks where there are supernumeraries?—Yes.

1165. Take the case of a regiment where there are several supernumerary lieutenants. Suppose a lieutenant entitled to retire and wishes to retire upon half pay, what would happen in that case?—Those vacancies invariably go to the public. They are not looked upon as falling within the category of those of which every other vacancy is filled.

1166. They are absorbed?—They are absorbed.

1167. That applies to the case of supernumerary lieutenants?—It applies to the case of any officer going upon half pay in any rank where there are supernumeraries.

1168. I suppose that scarcely any lieutenant is entitled to retire upon full pay by reason of length of service; therefore the case of a full-pay retirement would not occur with regard to the lieutenants?—No, it does not occur.

1169. But in the case of two supernumerary captains assuming that by length of service a captain was entitled to retire upon full pay, the vacancy would be absorbed?—It would depend upon whether it was the turn for it to be filled or not.

1170. How would it be with the first one?—The first would be absorbed.

1171. And the second?—The second would go in the regiment.

1172. Therefore assuming that there is any pecuniary interest which an officer has in retiring upon full pay, the first officer would lose it and the second would not lose it; is that so?—I imagine so.

1173. Was the same rule adopted in the reductions which took place after the last war?—The captains went on half pay; they were not kept as supernumeraries, but the subalterns were retained.

1174. Those officers who would under the present arrangements be supernumerary captains were then placed on half pay?—Yes.

1175. Then supposing they had bought their commissions as captains, they had no power of selling them until they came back again upon full pay?—No. They could not sell until they came back again upon full pay.

1176. Could they sell a half-pay commission?—No; the rule did not exist at that time of selling a half-pay commission, unless the object of the officer selling was to become a settler in one of the colonies.

1177. Then an officer placed upon half pay under those circumstances would lose all the money he had expended for the purchase of his commission, either as regulation price or as over-regulation?—He could not realize anything.

1178. The officers are treated more considerately now by being kept as supernumeraries?—Unquestionably they are.

1179. (*Gen. Peel.*) When an officer makes an application to His Royal Highness the Commander-in-Chief to sell his commission, he forwards that application to this department, does he not?—He forwards it to the Horse Guards only.

1180. Certainly the officer who makes the application forwards it only to the Horse Guards?—Yes.

1181. Does not the question of the purchase of that commission out of the Army Reserve Fund or in the regiment depend entirely upon this office, and not upon the Horse Guards?—It depends entirely upon the Secretary of State for War.

1182. In many cases if the officer next for purchase is an officer of very long service or very long standing, have not applications been made to this department on the part of His Royal Highness for the promotion to go in the regiment?—Yes.

1183. After the late Crimean war you say a great many captains were placed upon half pay, was not it an inducement held out to those officers who had obtained brevet rank for distinguished conduct in the field, that they having been made brevet-majors, in order to make vacancies their brevet rank was converted into substantive rank?—Yes.

1184. The consequence of that was, I think, that there were very few captains placed upon half pay?—No, there were a great many notwithstanding.

1185. Those captains who went upon half pay were brought back upon full pay as soon as opportunities offered?—Yes.

1186. (*Sir W. James.*) In the regiments where there are two majors one of whom is supernumerary, you say that in the present state of the Reserve Fund, if one of them wanted to sell out he would be allowed to sell out and the promotion would go in the regiment?—Yes.

1187. Then there would still be two supernumerary majors?—Yes, the state of things would remain the same.

1188. A captain would become a major, but he would be put in italics?—Yes.

1189. (*Chairman.*) Will you be good enough to look at Article 71, of the Warrant of February, 1866, called "Regulations as to Pay and Promotion." That Article says: "If a supernumerary major shall "purchase the lieutenant-colonelcy of his regiment, "the supernumerary majority shall be absorbed by "payment from the Reserve Fund of the difference "between the amount to be paid by the major so "promoted, and the amount required for a lieutenant-"colonelcy;" that is not adhered to now, is it?—We have not had a case since the Reserve Fund has been expended. I was only speaking of what would be the case, and describing the course we are pursuing with regard to sales of commissions where there are supernumeraries.

1190. Supposing the major in one of these cavalry regiments now should purchase the lieutenant-colonelcy of his regiment, would the captain be promoted to the majority?—I imagine so.

1191. The Article 71 is not now acted upon in consequence of the deficiency of the Reserve Fund?—Yes.

1192. Will you look at the following Article 72, it says: "If a captain shall be promoted to the rank of "major, a lieutenant to the rank of captain, or a "cornet or ensign to the rank of lieutenant, by pur-"chase, while seconded or supernumerary, the super-"numerary commission shall be absorbed by payment "from the Reserve Fund of the difference between the "sum paid by him and the amount required for "their superior commission;" is that acted upon now?—No, not now, but the practice has been to absorb every other sale vacancy, giving the regiment the benefit of every alternate one.

1193. Take the case of promotions by army seniority when a general dies the senior colonel in the army becomes a major-general does he not?—Yes.

1194. The senior major becomes a lieutenant-colonel and the senior captain a major?—Yes.

1195. Does the promotion go below that?—No.

1196. Take the case of a major becoming lieutenant-colonel by seniority in that way, what becomes of his vacancy?—There is no regimental vacancy at all. What he gets is merely army rank.

1197. He retains his majority in the regiment?—Quite so. He remains in the regiment until he becomes a major-general.

1198. I believe you prepared a paper which has been laid before us containing some statistics with reference to promotions and absorptions?—I did.

1199. Referring to your "Return of the number of "full-pay commissions of each rank in purchase corps "which have been absorbed on reduction during the "past five years," I see that in the 7th Hussars in the

L. Coleman, Esq.

17 May 1870.

year 1867–8 one lieutenant-colonelcy was absorbed?—Yes.

1200. What were the circumstances under which that lieutenant-colonelcy was absorbed?—I do not recollect that case. I have forgotten it at the moment.

1201. Could there be a supernumerary lieutenant-colonel now?—Yes, there might be.

1202. There is one other case, in the 1st Foot, where a non-purchase lieutenant-colonelcy was absorbed?—Yes.

1203. Do you know the circumstances under which that absorption took place?—No, I do not.

1204. Until within the last few years there were two lieutenant-colonels in the cavalry regiments in India, were there not?—There were.

1205. Was it the practice to reduce one of those lieutenant-colonels on the return of the regiment to England?—Yes.

1206. How was that effected?—The junior lieutenant-colonel was placed upon half pay.

1207. Was that the common practice?—Yes.

1208. But was it not occasionally if not frequently the practice instead of placing the junior major of the regiment returning from India on half pay to place him as the additional major in the relieving regiment going out to India?—Yes, that has been done.

1209. (*Mr. Muntz.*) If I understood you correctly, in the present unsatisfactory state of the Reserve Fund the second major of a cavalry regiment would not be absorbed?—He would not be absorbed if a sale took place.

1210. That is to say, the promotion would go in the regiment?—Yes, because the officer selling requires so much money and the Reserve Fund cannot make it up.

1211. The senior captain purchases?—Yes.

1212. Supposing afterwards the Reserve Fund became in a more satisfactory state he could be put upon half pay by merely paying his regulation money, could he not?—He could be put upon half pay and the vacancy absorbed. There would be no regulation or any other money to be paid in that case. If he went upon half pay there would be no money passing.

1213. But the vacancy would be absorbed; the promotion would not go in the regiment?—Just so.

1214. (*Mr. Whitbread.*) With reference to a question which has been put to you with regard to applications having been made on the part of the Commander-in-Chief to the War Office in the case of officers of long standing to allow the step to go in the regiment, will you state what was the object of those applications?—It was because a rule had been laid down that a step should be absorbed, and His Royal Highness the Commander-in-Chief had not the power to break through that rule without the concurrence of the Secretary of State for War.

1215. Was not the effect of allowing the step to go in the regiment to enable the selling officer to get the ordinary price of his commission from the officer below him, instead of getting the price of the step from the Reserve Fund?—He would receive the money certainly from an individual instead of from the fund.

1216. (*Sir W. James.*) Would it not enable him to make his own terms with the individual who was to succeed him?—I do not know about that.

1217. Did it not put it in his power to make his own terms?—He was at liberty to do as he thought proper about that.

1218. (*Sir J. Scarlett.*) It would save the Reserve Fund, would it not?—Yes.

1219. And the money would be extracted out of the pockets of the officers?—Yes.

1220. (*Mr. Whitbread.*) Have you ever known any instances in which applications in the interest of the officer who sells have been made by officers of long standing, that the step caused by their retirement should be allowed to go in the regiment instead of the vacancy caused by their retirement being absorbed?—No. In such cases an application of that kind would be made in the interest of the officer to be promoted, not in the interest of the officer selling. His Royal Highness the Commander-in-Chief would only step out of the beaten track in consequence of the long services of the senior officer in the lower rank; certainly not in the interest of the officer selling.

1221. Would he not do so in the case of a pending absorption?—It would not be in the interest of the officer retiring; it would be only in the interest of the officer purchasing the step that the application would be made. His Royal Highness would not consider the interest of the officer retiring, as over-regulation price, as it is termed, is not recognised; and as regards the regulation price, of course it would be just the same thing to the officer retiring whether he received it from the fund or from an individual.

1222. (*Sir J. Scarlett.*) The application would be in favour of a very meritorious officer, who stood first for promotion, supposing it was a saleable commission?—Yes, it would be in consequence of the great length of service or the great claims of the officer who was the senior for purchase.

1223. (*Lt.-Gen. Peel.*) In some instances application has been made, has it not, by a senior officer of very long standing for the promotion to go in the regiment without purchase?—Yes, that has been done in very rare cases.

1224. (*Chairman.*) You mean that in the case of an officer retiring upon half pay in which the public according to the general rule gets the benefit of it, the promotion has been allowed to go in the regiment in certain cases on account of the very long service of the officer who would get the promotion?—Yes.

1225. (*Maj.-Gen. Steele.*) If the lieutenant-colonel of a regiment after 25 years' service wishes to go upon half pay the promotion invariably goes in the regiment, does it not?—Yes.

1226. And he is allowed to make his own terms with the officer succeeding him?—I cannot say about that.

1227. (*Mr. Whitbread.*) What is the object of allowing the promotion to go in the regiment?—The rule is laid down in the warrant which governs all the promotions in the army. If it is a lieutenant-colonel who retires, the Reserve Fund gets 4,500*l.* as a set off to the half pay created by the retirement of the officer.

1228. (*Chairman.*) Is the case common of an officer in command of a regiment exchanging with an officer of the same rank from the half-pay list?—It is not common.

1229. It is done sometimes, is it not, with a view to enabling an officer on the half-pay list to sell?—Yes.

1230. Then where does the money come from which he receives for his commission?—He gets the money; the money is supplied by his successors.

1231. He sells and the promotion goes in the regiment?—Yes, the two officers exchanging being of similar age.

1232. Is there any regulation difference that is paid by one of those officers to the other?—There is no regulation difference paid now, and there has not been for many years.

1233. That exchange could only take place, of course, with the sanction of the Commander-in-chief?—Certainly.

1234. (*Lt.-Gen. Peel.*) If the officer who is brought in from half pay has received the regulated difference between half pay and full pay, he repays it does, he not?—He is obliged to repay it.

1235. (*Mr. Whitbread.*) You have spoken of two cases in which a step of promotion which would otherwise have been absorbed is allowed to go in the regiment, one in the interest of the officer who was next below for promotion, and the other in the interest of an officer who had had long service?—The one would be by purchase and the other without purchase. A vacancy of this kind might occur, an officer wishes to retire upon half pay, and his vacancy should properly be filled from the half-pay list, but cases have occurred where, in consequence of the long service of the senior officer in the rank below, His Royal High

L. Coleman, Esq.

17 May 1870.

ness has thought proper to recommend to the Secretary of State that he should be given promotion without purchase.

1236. (*Chairman.*) What are the cases in which an officer is brought in from the half-pay list, to fill a vacancy in a regiment. I do not mean in the command of a regiment, but in any rank?—If an officer goes upon temporary half pay, being a regimental officer he must be succeeded by an officer from the half-pay list.

1237. What do you mean by going upon "temporary "half pay"?—It occurs when an officer is not entitled to permanent half pay.

1238. When either ill health or other circumstances render it necessary that he should go, and he is not entitled to permanent half pay he goes upon temporary half pay?—Yes.

1239. Then an officer so retiring has no means of obtaining anything from the other officers of the regiment because the promotion caused by his retirement does not go in the regiment?—No, but that does not apply to the present state of things when there are supernumeraries. If an officer wished to go upon temporary half pay now there would be no vacancy. I am speaking of the state of things at the present moment.

1240. (*Sir W. M. James.*) I suppose when an officer is brought from half pay to full pay to fill up the place of another who is going upon half pay the selection of the officer so brought in is made at the Horse Guards?—Yes.

1241. (*Chairman.*) Will you look at Article 90 at page 9 of the regulations respecting pay and promotion in the warrant of February 1866?—Yes.

1242. (*Mr. Whitbread.*) That article gives an officer an unqualified right after 25 years full pay service to retire upon half pay. The step in that case would go through the regiment, would it not?—Yes.

1243. That is strictly in the interest of the officer with that long service, not in the interest of the officer who is to succeed him, is it not?—It is in the interest of everybody. It is in the interest of the officer retiring, and it is also in the interest of the regiment.

1244. But the rule is made in the interest of the officer who retires not with regard to the long service or other claims of the officer who is to succeed him?—It is more in the interest of the officer retiring, certainly.

1245. And it does enable that officer to make his own terms, does it not?—I do not know about that.

1246. (*Sir J. Scarlett.*) It does not seem to be advantageous to exchange full pay for half pay and to be allowed to retire upon half pay unless a man is very much worn out?—No, and yet there are many applications for it.

1247. (*Chairman.*) I see that Article 88 of the regulations to which I called your attention just now, says: "A regimental lieutenant-colonel shall retire from the "command of a regiment or battalion on attaining "the age of 60 years," are those compulsory retirements on attaining the age of 60 common?—They are not common but they occur occasionally.

1248. I presume they are not common because an officer either sells out or retires upon full or half pay before he attains that age, as a general rule?—Yes.

1249. (*Lt.-Gen. Peel.*) Have any compulsory retirements taken place?—Yes.

1250. (*Chairman.*) When one of those compulsory retirements takes place how does the promotion go?—The promotion goes without purchase, provided it is not necessary to absorb a commission.

1251. In the regiment?—Yes, in the regiment.

The witness withdrew.

COLONEL THE HONOURABLE ARTHUR E. HARDINGE, C.B., and COLONEL FREDERICK CHARLES ARTHUR STEPHENSON, C.B., further examined.

Col. the Hon. A. E. Hardinge, C.B.
Col. F. C. A. Stephenson, C.B.

1252. (*Chairman, to Col. Hardinge.*) Since you were here the other day the correspondence which was then referred to has been circulated to members of the House of Commons, and I have a copy before me. I see that in your joint letter, signed by both of you, of the 7th of August 1869, to the Military Secretary, the following passage occurs:—"We would "respectfully submit that in dealing with our cases "the full regimental values of our commissions cannot "with justice be ignored." And in a letter signed by Col. Hardinge alone, in the absence of Col. Stephenson from England, dated the 22nd of January in the present year, you say: "I beg to explain that the "expression, 'the full regimental values of our com-"'missions cannot in justice be ignored;' that occurs "in our joint letter dated the 7th August 1869, does "not refer to any fictitious price, but to the standard "value fixed by regimental custom recognised through-"out the service, repeatedly admitted in the conside-"ration of the purchase system as a public question; "the sum, in short, which every officer who returns "his name for purchase is obliged to lodge." Will you explain what you mean by the last sentence in that letter, in which you say that every officer who returns his name for purchase is obliged to lodge not the regulation price only, but what you term "the regimental value" of his commission?—I allude entirely in that passage to what is the custom of the regiment, namely, that an officer who returns his name for purchase would be understood to lodge the regimental price.

1253. That understanding would be as between him and the officers who would gain promotion by his retirement, would it not?—It would be an understanding between him and the officers of the regiment generally.

1254. But the obligation is a moral and customary one?—Certainly.

1255. You do not mean to put the obligation upon the same footing as the obligation to lodge the regulated price in the case of officers purchasing commissions?—Certainly not. I only allude to the custom.

1256. Is this non-regulation price or over-regulation price paid generally through the army agents in the same way as the regulation price?—Yes, I believe invariably.

1257. Has what you would call the standard value affixed by regimental custom to the different commissions been the same ever since you have been in the Coldstream Guards?—I think so.

1258. With the exception, of course, of the variation which took place during the Crimean war, which you alluded to the other day?—I think it has been constant.

1259. There has been no material increase or decrease in it?—Since I have been in the Coldstream Guards it has been constant.

1260. Do you know how long the present rate has prevailed?—I cannot answer that question.

1261. It has prevailed at any rate all the time you have been in the Coldstream Guards?—Yes.

1262. (*To Col. Stephenson.*) Is that the case also in the Scots Fusilier Guards?—I think it is, generally speaking, the same. There may possibly have been an increase of 100*l.*, but to the best of my recollection when I joined the regiment it was within 100*l.* of what it is now.

1263. (*To Col. Hardinge.*) The other day, in answer to Question 880, which referred to the reductions which are taking place in the regiments of the line, you said that you knew "the arrangement and the "proposed means of dealing with those officers who "are placed in italics, both with regard to the infantry "and the cavalry," and you went on to say, "and "Colonel Stephenson and myself only wish that the "method of dealing with them may be applied to us "in the same way." Are you fully aware of the method which is adopted in dealing with officers, either

Col. the Hon. A. E. Hardinge, C.B.
Col. F. C. A. Stephenson, C.B.

17 May 1870.

supernumerary majors in the cavalry or supernumerary captains in the infantry, now if they wish to retire upon half pay?—I only know it from the answers Mr. Cardwell gave in the House of Commons to questions having reference to dealing with officers in that position. From the answers which Mr. Cardwell gave I imagined that the mode of treating those officers would be such as I then described it. I had no other way of interpreting what Mr. Cardwell said.

1264. We have been informed to-day by a witness from the Horse Guards, who is conversant with all these arrangements, that you are right so far as relates to the sale of commissions, and that a supernumerary major in the cavalry or a supernumerary captain in the infantry, or indeed any captain in a regiment where there are supernumeraries wishing to sell his commission, would be allowed to do so, and the promotion would go in the regiment; but that in the case of a major or captain retiring upon half pay the commission would be absorbed and no promotion would take place in the regiment. Is not that exactly the same position as that in which you are now placed in the Coldstream Guards? We understand that your wish is not to sell but to retire upon half pay?—I think the case is not exactly the same, for this reason, that there is no half pay to the Guards; therefore an officer retiring from the Guards to half pay goes upon the half pay of the line. There would be no difference in his position after he had retired from the Guards from that of an officer who had retired from the line. But there is a difference between even the regulation price of our commissions in the Guards and the regulation price of a lieutenant-colonelcy in the line. In Mr. Cardwell's first letter of the 24th of July, he tells Colonel Stephenson and myself that we may retire upon half pay in the usual manner. Now according to the regulated value of our commissions, if we were to claim under the terms of the Royal Warrant an unqualified right to retire upon half pay, that right would really be qualified by the sacrifice on the part of each of us of 300*l.*, which is the difference between the regulation value of our commissions in the Guards and the regulation value of a lieutenant-colonelcy in the line. Mr. Cardwell in his letter to us makes no allowance for that difference.

1265. That is quite irrespective of any loss you might incur by not obtaining the customary payment on your retirement on half pay or on selling your commission?—Yes, it refers entirely to the regulation price.

1266. But in this correspondence, if I understand it rightly, you have both of you asked that the promotion might go in the regiment?—Quite so.

1267. That would of course enable either of you wishing to retire by the sale of your commission or to go on half pay to make the usual terms with the officer succeeding you, and to obtain the customary payment?—Yes.

1268. You are not aware perhaps that now any officer retiring upon half pay where there is a supernumerary either in the cavalry or in the infantry would not be able to make those terms with any other officer in the regiment because his commission would be absorbed? To that extent is there any difference between your position and that of any other officer who is a supernumerary?—Not in that part of the Government arrangement, but the officers mentioned could scarcely have the required service, to constitute their claim to half pay.

1269. (*Sir J. Scarlett.*) Do you consider yourself a supernumerary in the Guards now?—Certainly not. The officers who are italicised are the supernumerary officers.

1270. (*Mr. Whitbread.*) Is there any other instance of an officer after 25 years full pay service claiming under the warrant of 1866 to go upon half pay where the step has not gone in the regiment?—I believe not. It is rather difficult for individuals always to ascertain thoroughly matters involving precedence of this kind. So far as we can hear, I believe there is no such case. We have to depend very much upon hearsay on these points, having no official means of ascertaining the facts.

1271. (*Lt.-Gen. Peel.*) If you will look at page 11 of the correspondence you will see that in your letter of the 7th of March you make an application "that "promotion should be allowed to go in my regiment, "as this course has been sanctioned with regard to "the cornets of the Household Cavalry;" is not that a mistake?—No, it is no mistake. Perhaps I have expressed myself badly in that letter, but this latter sentence had reference to the precedent of the cornets of the Household Cavalry. They were put into italics, but the promotion was allowed to go on in their case in defiance of the italics. Therefore I quoted this which had been allowed for the benefit of the cornets in the regiment of Household Cavalry as a precedent that might extend to the case of the field officers in the Household Regiment of Infantry, and that the italics should not be a bar to the promotion going on in the regiment.

1272. I understand that the reason why you say a difference is adopted in your case as compared to the case of other officers is, that in the Guards there are no junior commissions to absorb?—There are no ensigncies to be absorbed, but in the Household Cavalry they put a certain number of cornets into italics.

1273. But the promotion to a cornetcy could not go in the regiment?—When these cornets leave the regiment their steps are not absorbed, but incomers succeed to them in spite of the italics.

1274. But then they get no advantage because nothing can be paid beyond regulation for a cornetcy?—I only cited it as an instance showing that italics had not, by the present Government been made inviolably the immediate precursors of absorption.

1275. (*Chairman.*) I have the Army List here, and in the 1st Life Guards I see four cornets in italics. Do you mean that supposing a vacancy were to take place among the lieutenants in that regiment the senior cornet for purchase would obtain his promotion to be lieutenant, and that another cornet would be appointed to the vacancy?—Yes; another would be brought in at the bottom and appointed to his vacancy. That has been repeatedly done, and therefore the absorption of these cornets, though they are italicised, has been indefinitely postponed. In that case the analogy is complete between their treatment and that we desired for our field officers.

1276. Is that the case in any other regiment?—No. I believe in none.

1277. Do you know the reason why it has been done in that case?—I believe the reason of it is connected with the requirements of London duty.

1278. Do you mean that practically a reduction could not take place without interference with the duty that the regiment has to perform?—I believe that that is the reason. I have been told so.

1279. (*Lt.-Gen. Peel.*) Does not the price of the cornetcy go to make up the money which the officer retiring has to receive?—To some extent I presume it would.

1280. (*Chairman.*) What is the price of a cornetcy in the Life Guards?—It appears in the Army List as being 1,260*l.*

1281. In fact does the whole of your case rest upon the loss which would accrue to you, under the present circumstances, if you wished either to sell out or to retire upon half pay, the loss being what is usually paid as over-regulation price, or the sum equal to over-regulation price which is usually given to an officer retiring upon half pay?—Not entirely; because we spoke also, of course, on behalf of the interests of our regiment. I have explained also how, by retiring upon half pay, we would lose the Regulation difference between our commissions in the Guards and a Lieutenant-colonelcy of the line.

1282. But that is the case, so far as regards the pecuniary question, affecting yourselves?—As far as regards the pecuniary loss to ourselves, it is entirely limited to that.

1283. (*Mr. Whitbread.*) Your demand is, that the contemplated absorption in the rank of field officer in your regiment should not take place until there is a non-purchase vacancy?—Exactly.

1284. But that in the mean time you should be allowed to exercise the ordinary option of retiring by the sale of your commissions or upon half pay?—Yes.

1285. (*Sir. J. Scarlett.*) And being succeeded by your junior?—Yes. What we felt was, as regards this letter of Mr. Cardwell's, that nothing could be more substantial than the indemnification to Colonel Bruce, because that benefit was purchased by the loss of a step of rank to every officer in his regiment. With regard to us, the proposal to treat us in the same way was rendered impossible by the very nature of the arrangement. The proposal was, in fact, limited to a *post obit* upon the life of one of our junior majors.

1286. (*Chairman.*) That is as regards yourselves?—Yes.

1287. But with regard to your field officers, if you became a major-general, precisely the same thing would take place in your regiment as has taken place in the Grenadier guards?—Yes; except that, as I stated before, the process would be one of ascension there, and in the Grenadiers it was one of declension.

1288. (*Mr. Whitbread.*) By way of strengthening your case you point to the case of some cavalry regiments whose officers have been marked for absorption and not absorbed until a non-purchase vacancy arrived in their regiments?—Yes, they have been perpetually renewed. They are being perpetually renewed amongst the cornets of the Household cavalry.

The witnesses withdrew.

CHARLES HAMMERSLEY, ESQ., examined.

C. Hammersley, Esq.

1289. (*Chairman.*) Have you prepared the tabular statement which you said you would lay before the Commission, of the regulation prices and the average over-regulation prices paid for commissions in the cavalry and the infantry?—Yes.

1290. Will you be good enough to put it in?—I will. (*The same was handed in*, App. X.)

1291. Have you also prepared a return of the number of promotions in the year 1869 in the regiments in your agency?—Yes, I put in that statement also. (*The same was handed in*, App. X.)

1292. Are the regiments in the West India and other colonial corps included in the average given in that tabular statement?—The two West India regiments for which we are agents are included.

1293. Does the same practice exist in those regiments of paying over-regulation price which exists in our home regiments?—I believe it does perhaps not quite to such an extent, because the officers are poorer men generally.

1294. The price given is less?—Yes, I should say that it was less.

1295. Has the average amount of the over-regulation payment in time of peace been the same or nearly so throughout the 30 years during which you have acted as agent?—I think it has varied very little. Perhaps it is rather less now than it was in the ante-Crimean period.

1296. Then in any case it is not upon the increase you think?—No.

1297. Have you any means of informing us of the earliest time at which the payment of sums in excess of the regulation is known to have existed?—I cannot trace the earliest case of it, but I should presume from the Act to which you referred to on the former occasion being passed in 1809 that the practice was rife then.

1298. Pending the negotiation for the purchase of a commission is a written engagement usually given by or on behalf of the officer to be promoted that he will pay the usual over-regulation money?—I think the retiring officer makes his own arrangement with the senior officer for promotion. He may either take a written guarantee, or he may be satisfied with his word that he will pay the money.

1299. Is the over-regulation price paid before the promotion is gazetted?—That is occasionally done, but I should say that it is not usually. A very careful man will insist upon having the over-regulation money lodged before he sends in his papers, but that is rather an unusual case of caution.

1300. Are you aware of any exchanges having taken place between officers in the purchase and the non-purchase regiments under Article 63 of the Royal Warrant of 1866. That Article says, "Exchanges "may take place between the officers of any of the "services designated in Article 59 whether the pur-"chase system be permitted or not in the regiments "concerned," have any such exchanges come under your cognizance?—I think there have been one or two in the Indian regiments.

1301. In the case of such an exchange would not the officer going from a purchase to a non-purchase regiment lose what he had given for his commission in the purchase regiment (I mean the regulation price), as he could no longer sell his commission?—He could not.

1302. If he bought his commission therefore, he would lose the regulation price?—Yes.

1303. Then where any such exchange is made, is money paid by one officer to the other?—I should think so decidedly, but I cannot exactly put my finger upon a case at this moment. I think there have been such cases, but I cannot speak positively. I see by referring to Hart's Army List that there is one officer who is reported as a purchase officer.

1304. In what rank?—A captain. He purchased his lieutenancy and his company, and therefore he must originally have been in a purchase corps, and then he has exchanged as a captain into a non-purchase regiment.

1305. What inducement could he have had to do that, unless he received money from the officer with whom he exchanged; he would lose his right to sell his commission after that, of course?—Yes.

1306. Consequently he would lose all that he had given for his commission?—The India Government have allowed officers on retirement from these regiments the value of their commissions.

1307. Do you mean the regulation value?—Yes, in those Indian regiments. That must be considered as a commutation of the half pay. Instead of going upon half pay, they allowed them to receive the value of their commissions.

1308. Even in those non-purchase regiments?—Yes.

1309. Where does the money come from?—The India Government provides it.

1310. (*Lt.-Gen. Peel.*) Were those cases of officers who had been in the Indian service previously, or were they officers brought in from the Queen's army?—The case that I recollect happened last year. It must have been an officer from in the Indian service.

1311. (*Chairman.*) Do you mean that an officer exchanging from a purchase regiment into a non-purchase regiment would be allowed, if he retired, the sale of his commission by the India Government?—Yes.

1312. Although he had never been in the Company's service formerly?—They allow that to their own officers certainly, and therefore I presume they would allow it to a Queen's officer who had exchanged into one of those regiments.

1313. The regulations say that an officer exchanging into a non-purchase regiment has no right to sell unless he shall exchange into a purchase regiment again; that "his right shall be put into abeyance"?—Yes.

C. Hammersley, Esq.

17 May 1870.

I really did not know that the question would be asked me, or else I could have followed out that case. There certainly was a case last year, in which the India Government allowed a retiring officer in a non-purchase corps the value of his commission, and it was paid by the India Office.

1314. But you do not know whether that was the case of an officer who had exchanged from a purchase regiment into one of those non-purchase regiments or not?—I think not.

1315. Then it may have been one of the officers who were originally in the Company's service before the transfer to the Queen took place?—Yes, he may have been originally in the Company's service; but after all that would only amount to allowing him to commute his pension. He would have been allowed otherwise, to retire upon pension, instead of which they paid him 1,200*l.* down for his commission.

1316. (*Lt.-Gen. Peel.*) Might not there be another reason for that, namely, that they could not move one of those regiments from India without the consent of the officers?—Officers having been posted to the regiments on their own application, their consent to move from India could hardly be necessary.

1317. (*Chairman.*) In the case of the exchange I have referred to, of officers from a purchase to a non-purchase regiment, I think you said you presumed that money was paid, but have you the same cognizance of that that you have of over-regulation price being paid in ordinary cases?—My information in all these cases I may say is very vague. I really cannot speak positively in any case. I see a sum of money go to an officer's account. Of course it is not my duty to inquire what it is for. I have no right to do so, and I do not inquire. I only form my own conclusions.

1318. In the return you put in of promotions in the year 1869 you have given the number of commissions by purchase, the number without purchase, and the number of those that were by purchase which were for the regulation price only. These last were 66 out of 455. Can you inform us under what circumstances these promotions took place for which the regulation money only was paid?—They were for various reasons. Some were occasioned by death vacancies, which were filled up by officers who were not entitled to a commission without purchase. Then again, there were promotions to the Indian staff corps; those are probationers. The vacancies created by their appointments were filled up generally without purchase, or on the payment of the regulation merely.

1319. If an officer becomes a probationer for the Indian staff corps does the promotion go in the regiment?—Yes, as a rule, it would go in the regiment, and that steps would be filled up on the payment of the regulation price. The officer appointed would pay nothing more for it than the regulation. For instance, most of them are lieutenants, the lieutenancy would be filled up by promoting an ensign, who would pay nothing beyond the regulation.

1320. (*Mr. Whitbread.*) When you said that a vacancy was filled up by purchase, because an officer was not entitled to the step without purchase, which officer did you mean was not so entitled?—All officers in succession to the retiring officer, assuming that they were not qualified by length of service to the step without purchase.

1321. (*Chairman.*) It would include cases of compulsory retirement, would it not?—It would include cases of compulsory retirement and promotion by death where officers were not entitled to promotion without purchase, and the vacancies created by officers being appointed probationers to the Indian Staff Corps.

1322. Therefore is it the case that few if any of these 66 cases are cases of ordinary regimental promotion by the retirement of an officer by the sale of his commission?—It is very difficult indeed to give any fair opinion upon the matter. I had considerable difficulty when I was endeavouring to give the Commission the information you were anxious to have in satisfying myself upon the point. I found sums passed through officers' accounts which I could not account for in any way whatever.

1323. But in all the 455 cases in which commissions were purchased, with the exception of these 66, some money was given in excess of the regulation price?—No, I cannot say that at all. I only know, speaking generally, that the practice is a very general one, but I am not at all prepared to say that all the difference between 455 and 66 represents promotions for which over-regulation price was paid.

1324. But the 66 are the only cases in which you have ascertained that nothing but the regulation price was paid?—Yes, for various reasons, either from forced retirements or death, or in the case of probationers.

1325. But in the case of death, the promotion is given in the regiment without purchase, is it not?—Not always; it depends on the service of the officer to succeed. If the senior officer has not served long enough to entitle him to promotion without purchase he would be called upon to lodge his money, and the Reserve Fund would get the benefit of it.

1326. (*Lt.-Gen. Peel.*) Or if the death took place in consequence of wounds within six months afterwards, that would be a purchase vacancy, because otherwise the friends of the officer who died would not get his money back again?—The money in this case would be provided by a vote from Parliament.

1327. (*Sir J. Scarlett.*) It has been stated by an officer who came to give evidence here, that he purchased an ensigncy twice over, can that be possible?—He must have retired and re-entered the service.

1328. He states that he purchased a half-pay ensigncy, giving the full price for it, and that he was called upon a second time to pay the full price of an ensigncy to be placed on full pay?—Of course if the officer says so, it is true, but I never heard of such case, and I do not understand how it could be.

1329. From your knowledge of the promotion generally you would imagine that that could not be the fact?—I should think that he must be mistaken about it; I never heard of such a case.

The witness withdrew.

Adjourned.

Monday, 30th May 1870.

PRESENT:

THE RIGHT HONOURABLE SIR GEORGE GREY, BART., M.P., G.C.B., IN THE CHAIR.

THE RIGHT HON. LIEUT.-GENERAL PEEL.
THE RIGHT HON. GEORGE WARD HUNT, M.P.
VICE-CHANCELLOR SIR WM. JAMES.
LIEUT.-GENERAL SIR JAMES YORKE SCARLETT, G.C.B.
MAJOR-GENERAL STEELE, C.B.
SAMUEL WHITBREAD, ESQ., M.P.
P. H. MUNTZ, ESQ., M.P.
R. H. KNOX, ESQ., *Secretary.*

LIEUT.-GENERAL SIR EDWARD LUGARD, G.C.B., further examined.

Lt.-Gen. Sir E. Lugard, G.C.B.
30 May 1870.

1330. (*Chairman.*) We understand that it was the practice formerly to allow an officer on full pay in a regiment to purchase a half-pay commission in the rank immediately superior to his own, selecting the officer with whom the arrangement was to be made; and then having got a step of rank by that means, to exchange again with an officer of equal rank on full pay—was that the practice formerly?—The practice, with exception of selecting the officer, still exists.

1331. Can a captain, for instance, in a regiment now make a private arrangement with a major on half pay to purchase his commission and then exchange with a major on full pay?—No, he cannot do the first of those things.

1332. That was the distinction to which I wished to call your attention. Was it the case formerly that in the case of those purchases of half-pay commissions the officer desiring to purchase selected the person with whom the arrangement was to be made, and consequently might make his own bargain with him?—Formerly officers on half pay were allowed to sell their commissions on condition of proceeding to settle in the colonies. Those commissions were purchased by full-pay officers serving in the grade below. They made their bargain with the half-pay officers, giving them in some instances very large sums of money. The officers on half pay, who sold them proceeded to the colonies, and in a great many instances returned immediately.

1333. Thereby evading the condition?—Thereby evading the condition.

1334. What did the officer having so purchased the half-pay commission do in order to get back upon full pay?—He might have been brought back to full pay if he had had any distinguished service by being appointed to fill some vacancy, or else he might have exchanged with an officer, giving him a bonus to take his place.

1335. I believe some alteration was made in that system a few years ago?—Yes.

1336. Will you state what it was?—In the year 1861 a very large sum had accumulated in the reserve fund and the Secretary of State determined to apply it to the reduction of the half-pay list. A circular was accordingly issued calling upon all officers who were fit for service either to serve or sell. The money for the purchase was provided from the reserve fund, but, as this fund was limited, although a general permission to apply to sell was granted, no claims to sell were allowed to be established. At the same time the permission to sell in order to settle in the colonies was withdrawn. Some months subsequently, as it was thought that this somewhat deprived the army of one means of obtaining promotion, a system of selling half-pay promotions to a limited extent was established, the money paid by the purchasing officers being credited to the reserve fund, to be applied to buying up the half-pay commissions of officers who might desire to sell under the circular of 1861, in order to prevent any excess of charge upon the half-pay list.

1337. Was the effect of the regulation before it was as so modified, that the half-pay officer selling did not sell to any officer who was on full pay, but sold in fact to the State?—Yes.

1338. Then did that, in fact, put an end to all private arrangements between full-pay officers and half-pay officers in respect of the purchase of these half-pay commissions?—Entirely.

1339. Did the further modification afterwards made to any extent restore the former state of things or was the selection entirely made by the Commander-in-Chief, still, of the officer who was to sell?—The selection was entirely made by the Commander-in-Chief.

1340. Without any arrangement being possible between an officer on full pay and a half-pay officer?—Without any arrangement whatever. The Commander-in-Chief kept a list of officers who were anxious to purchase half-pay promotion, and from that list he selected those officers who he considered had the best claims. In 1862 with the consent of the Treasury one half-pay lieutenant-colonelcy, two half-pay majorities, and three half-pay companies were given to be sold in this manner.

1341. Was the effect of that to put an end altogether to the possibility of a bargain between an officer on full pay and an officer on half-pay for the sale of the latter's commission?—Quite so.

1342. Therefore since that an officer on half pay selling his commission has been able, I presume, to obtain only the regulation price for it?—He has only been able to obtain the regulation price. I have a Return here showing the effect of the purchase of half-pay commissions under the Circular of 1861, giving for each year the number that have been purchased from the half-pay list at the regulation price. And I have another Return showing the number of unattached promotions that have been given in each year. (*Producing two returns.*)

1343. Will you hand them in?—(*The same were handed in*, App. XI.)

1344. Was the effect of that Circular to diminish the number of sales of half-day commissions or to increase them?—To increase them, certainly, because many officers did not like the condition of settling in the colonies. None would accept it except with the object of realizing something considerable by the sale of their commissions.

1345. Will you put in the Circular from which you just now read an extract?—I will, it is of the date of February 1861. (*The same was handed in*, App. IV.)

The witness withdrew.

LIEUT. JOHN BIDDULPH examined.

Lieut. J. Biddulph.

1346. (*Chairman.*) In what regiment do you hold a commission and in what rank?—I am a lieutenant in the 19th Hussars.

1347. Is that one of the three cavalry regiments which were added to the service on the amalgamation of the East India Company's army with that of the Queen?—Yes.

1348. Is the promotion in those regiments by seniority without purchase?—It is by seniority.

1349. The system of purchase does not apply to those regiments?—No, it does not.

1350. Have you been in the regiment since its formation?—Yes, ever since its formation.

1351. In what year was that?—In 1862.

Lieut. J. Biddulph,
30 May 1870.

1352. Had you before that been in the East India Company's service?—Yes.

1353. In the Bengal Cavalry?—Yes, in the Bengal Cavalry.

1354. In what rank did you join the 19th Hussars?—As lieutenant.

1355. How many lieutenants were above you at that time?—There were six above me, and then about six months after the regiment was formed, an option was given to the officers of reconsidering their vote and reverting to the Company's service, and two of them did so, which made me fifth.

1356. How do you stand now?—I am second now.

1357. Is any pension or allowance given on retirement to officers of those regiments who were formerly in the East India Company's service?—They still can claim pension under the old regulations of the Company from the Indian Government.

1358. After how many years' service?—After 22 years' service.

1359. If an officer retires before he becomes entitled to the East India Company's pension is he entitled by regulation to any allowance in respect of his service?—He is entitled to the same allowance as officers in purchase regiments who have not purchased.

1360. Is that 100*l.* for every year he has served?—Yes, up to the price of his commission.

1361. That is, if he has served more than three years?—Yes.

1362. He receives that by regulation?—Yes.

1363. Therefore every officer retiring from one of those regiments after three years' service, either receives, if he has served 22 years, the pension he would have been entitled to in the East India Company's service, or the same allowance that a non-purchasing officer in a purchase regiment would receive upon retiring?—Yes.

1364. Does the system exist in those regiments of paying any sum to a retiring officer in addition either to the pension or the regulation allowance to which he is entitled?—Yes, it has been customary to give a bonus. The practice has been to form a purse.

1365. Is that system similar to that which prevailed in the East India army before the amalgamation?—Yes.

1366. Will you state what the system is, taking if you can, as an example, any recent instance of a retirement in your regiment?—The senior major in my regiment retired last year, and this was the paper (*producing a paper*) circulated at the time.

1367. After what length of service did he retire?—After 30 years' service.

1368. Then he was entitled to the East India Company's pension?—Yes.

1369. Which he received I suppose?—Yes.

1370. What was the amount of it?—The pension of a major is nearly 300*l.* a year, it is just under that amount.

1371. What did he receive in addition to that from the officers of the regiment, what was the gross sum?—3,500*l.*

1372. How was that sum contributed by the officers in the regiment?—Each officer was called upon to contribute according to the scale which had always been acted upon in former cases of retirement.

1373. Can you inform us what that scale is?—The seniors of grades who actually got promotion by the step paid the largest sums.

1374. Have you got a statement of the sums paid by each officer of the regiment upon that occasion?—Yes, according to what they were called upon to pay.

1375. Will you explain what you mean by "called "upon to pay;" in what way are they called upon to pay?—The scale being formed, each officer was asked whether he was prepared to pay his share, and the amount that was not forthcoming from certain officers, who were not able or willing to pay, had to be made up by the others.

1376. Who calls upon them to state whether they are ready to pay or not?—When an officer wishes to retire it is customary for him to put the matter in the hands of the man most interested in getting the step; a major retiring would put it into the hands of the senior captain, and a captain retiring would put it into the hands of the senior lieutenant.

1377. Will you state in what way the officers are called upon to contribute?—The following is a letter written to me: "Sir,—Lieutenant-Colonel Richardson "having proposed to retire from the service for the "sum of rs. 35,000, I am directed by the Committee "of Management to forward to you the accompanying "scale of payments, and to request you will inform "me if possible by return of post whether you will "join in the purchase and are prepared to lodge the "amount specified against your name at Messrs. Cox "& Co.'s, Craig's Court, London, by the 15th March "next, to be held in deposit and credited to Lieut-"Colonel Richardson on his retirement appearing in "the 'London Gazette.'" It is signed by the senior captain.

1378. Is that a circular addressed to each officer of the regiment?—This was addressed to the officers in the left wing; we were separated at the time from the head-quarters of the regiment. This was written from the head-quarters by the senior captain to each officer in the left wing. A postscript was added: "A "margin has been left to cover defaulters; should "there be none, a refund will be made in proportion "to the scale of payments."

1379. Can you put in this enclosure to that letter, giving the scale which each officer was to pay?—I can: The second major, 800*l.*; the senior captain, 1,000*l.*

1380. The senior captain being the officer who would succeed to the majority?—Yes.

1381. (*Lt.-Gen. Peel.*) What advantage did the second major obtain?—It made him the senior major.

1382. (*Chairman.*) There were two majors at the time on the regiment; the junior major paid 800*l.* and became senior major, is that so?—Yes.

1383. The senior captain who got the majority paid 1,000*l.*?—Yes. The second captain paid 400*l.*, or rather I ought not to say that these sums were paid; I should rather say that that is what they were called upon to pay. The third captain was called upon to pay 150*l.*; the fourth captain 80*l.*; the fifth captain 60*l.*; the sixth captain 40*l.*; the seventh captain 30*l.*; the eighth captain 25*l.*; the senior lieutenant 550*l.*

1384. He got the troop?—Yes. The second lieutenant, 250*l.*; the third, 100*l.*; the fourth, 70*l.* (that was myself); the fifth, 50*l.*; the sixth, 30*l.*; the seventh, 20*l.*; the eighth, 15*l.*; the ninth, 10*l.* Then the cornets paid conjointly 180*l.*

1385. The cornets paid that amongst them?—Yes; but I believe it mostly came from one officer.

1386. Then was the payment of the 180*l.* arranged amongst the cornets themselves without any scale being fixed?—I believe so. The fact is, of late years it has not been possible to carry out this system in its integrity, on account of so many of the cornets refusing to pay because they had only entered the service to go into the Indian staff corps, and consequently it made no difference to them whether they got promotion or not.

1387. What was the effect of that? Was the 3,500*l.* paid to the retiring major?—Yes.

1388. By how many officers was it paid? You said there were some defaulters?—I think there were only four officers who did not pay.

1389. Including the cornets?—Not counting the cornets.

1390. Four officers amongst the captains, and lieutenants did not pay?—Yes.

1391. (*Sir J. Scarlett.*) And every one of those officers had paid something for former promotions, I suppose?—Yes.

1392. Therefore what they paid this time was in addition to what they had previously paid?—Yes.

1393. (*Chairman.*) If an officer is unable or unwilling to pay his share, I understand you to say that the deficiency is made up by the other officers?—Yes,

they make it up in the same proportion as they paid for the original step.

1394. In that case does an officer who has not paid receive on his retirement the same amount as if he had paid his share?—No; the chances are that he would not. We have only been a regiment for eight years, and therefore there have not been many cases of retirement yet.

1395. Does it make any difference in the amount received if an officer has obtained any of his steps without payment by a death vacancy?—No, he would not be considered to be entitled to ask less; he would not claim less; or he might do so, of course, but that would be a gift to the regiment.

1396. Are we to understand that this payment is quite voluntary?—Yes.

1397. In no degree compulsory?—In no degree compulsory.

1398. Is the position of an officer who refuses to pay his share at all affected in the regiment?—No, particularly if it is known that it is from want of means that he refuses.

1399. Has any exchange taken place into your regiment by officers from a purchase regiment?—Yes, there have been four exchanges.

1400. In what rank?—There were two captains and two lieutenants.

1401. Is money paid upon such an exchange to the officer coming from a purchase regiment?—Yes.

1402. Do you know what is paid in the case of the exchange of captains?—The case of one I do not know anything about. I do not think anything was paid in that case. In the other case I believe upwards of 2500*l.* was paid.

1403. (*Sir J. Scarlett.*) That was paid for the exchange from a non-purchase to a purchase regiment?—Yes, from a non-purchase to a purchase regiment.

1404. (*Chairman.*) From your knowledge of the practice in all these regiments, is it the general rule in case of such an exchange that money is paid to the officer who comes in from a purchase regiment?—Yes.

1405. Can you tell me what the payment was in the case of the lieutenants who exchanged?—I believe one lieutenant paid 1000*l.* The other I know paid some money, but what it was I do not know, as both officers were in England when the exchange took place.

1406. Is the scale of these customary payments which you mentioned just now the same in the cavalry as in the infantry regiments?—I do not know what sums are given in the infantry, but the same system prevails.

1407. The same system prevails in the nine infantry regiments which have been added in consequence of the amalgamation of the Indian army with the Queen's army?—Yes, I believe so. I know it does in some of them.

1408. Does it also prevail in the two other cavalry regiments which are not purchase regiments?—Yes.

1409. In the case of death is the whole sum so paid lost to an officer's family?—Yes.

1410. You mentioned the Indian Staff Corps just now. If an officer goes upon the Staff Corps does that make a vacancy in the regiment?—Yes.

1411. Is anything paid to an officer to induce him to compete for the Staff Corps with a view to a vacancy being made by that means?—No sum has ever been paid in my regiment, but money has been paid in some of the other regiments I believe.

1412. To induce an officer to go into the Staff Corps?—To induce an officer to compete for the Staff Corps.

1413. How are these payments made? I think in the letter you read the officers are requested to lodge the money at Messrs. Cox and Co.'s—take the case of the money you paid yourself, 70*l.*—how did you pay that?—I was requested to lodge it by a certain date and I did so.

1414. With Messrs. Cox and Co.?—The officer retiring told me that he wished to have the money in India, and I lodged it for him there; but the bulk of the money was lodged at Messrs. Cox and Co.'s.

1415. In the case of its being lodged at Messrs. Cox and Co.'s, of course there is some direction given as to whom it is to be paid?—It is lodged to the credit of the officer retiring.

1416. Just as is done in the case of a private banker?—Yes.

1417. Does a statement accompany it of the purpose for which it is paid, or is there merely a direction given that it is paid from A. B. to C. D.?—The only direction is that it is to be put to the account of such an officer.

1418. Can you state what is the comparative advantage enjoyed by an officer in any of these regiments and a non-purchasing officer in a purchase regiment as to promotion—in which is the promotion most rapid?—In a purchase regiment.

1419. Does a non-purchasing officer in a purchase regiment obtains his promotion quicker than one of the officers in these non-purchase regiments?—I should say so, judging by results.

1420. (*Sir J. Scarlett.*) How long have you been in the regiment?—Eight years.

1421. Did you join as a lieutenant?—Yes.

1422. You have been eight years rising from the bottom of the lieutenants to your company?—No, I have been eight years rising three steps from fifth to second lieutenant.

1423. What have you paid altogether for promotion in addition to that 70*l.* which you mentioned?—I had paid only for one step before; the senior major retired immediately after the formation of the regiment, just then a troop was reduced all through the service, and the step was absorbed, therefore we paid the money without getting any promotion by it among the subalterns, a captain was promoted to major. That caused the absorption.

1424. What was the sum you paid?—The major who retired received 3,600*l.*

1425. What was your individual share which you paid of that?—I think it was 60*l.* or 65*l.* I cannot recollect just now.

1426. We will take it as having been 60*l.*; you have paid 130*l.* then?—Yes.

1427. And you have got nothing for it as yet?—No, I have got nothing for it as yet.

1428. What will you probably have to pay before you get your troop?—I should consider that I shall have to pay about 800*l.* if I buy both steps.

1429. You will have to pay 800*l.* altogether?—I have two more steps to get; they will cost me about 800*l.*, besides what I have paid already.

1430. (*Chairman.*) Will you state what the average amount is that is paid by a cornet to become a lieutenant, by a lieutenant to become a captain, by a captain to become a major, and by a major to become a lieutenant-colonel in the regiment?—We have existed for so short a time that I could not tell you with any certainty, and particularly as the establishments have been altering a good deal. Now there are only three cornets on the strength of the regiment.

1431. I think you said that you yourself expected to have paid 800*l.* by the time you got your troop?—From being the junior lieutenant up to the time of getting a troop an officer would have to pay about 1100*l.* or 1200*l.*

1432. Do you take into account in that sum any payment that he may have made as a cornet?—No, beginning as junior lieutenant if he purchased each step he would have to pay about 1,100*l.* or 1,200*l.* to get his troop.

1433. (*Sir J. Scarlett.*) As you can get promotion without purchase, yours being a non-purchase regiment, why should you pay anything?—Because it makes officers who are entitled to pension more ready to retire.

Lieut. J. Biddulph.

30 May 1870.

1434. And quickens promotion?—Yes, it quickens promotion.

1435. (*Chairman.*) Have you made any calculation of what an officer would have to pay to obtain his majority, beginning from the bottom of the captains? From 1,500*l.* to 1800*l.* I should say.

1436. And to become a lieutenant-colonel he would have to pay in the same proportion, I presume?—We have not had a lieutenant-colonel retiring, therefore I could not give any sum for that.

1437. (*Sir J. Scarlett.*) Can you give us a general idea of what lieutenant-colonels expend before they get their lieutenant-colonelcy, what is reckoned in the service a fair sum?—We have been such a short time under these new conditions that I could not give it you. I can tell you what they used to get before the Mutiny took place, they used to get about 6,000*l.*, and sometimes 7,000*l.*

1438. Had they spent so much as that in getting it?—No; certainly not, taking death steps into consideration.

1439. (*Chairman.*) What we want to know is, what under the old system an officer would have had to pay to become a lieutenant-colonel?—I could not tell you, for I only joined the service in the middle of the Mutiny.

1440. Did you pay anything for your lieutenancy which you got before you came into the 19th Hussars?—No, I did not. I purchased one step in my old regiment, the Bengal Cavalry; then I was transferred to the 19th Hussars. Therefore the money I paid for that step in the Bengal Cavalry was lost entirely.

1441. You purchased one step?—Yes.

1442. Then you did pay something, although that was not a purchase corps?—Yes, this system existed in the old East India Company's service.

1443. What did you pay?—I only purchased one step; I paid 60*l.*

1444. Do you think that the 3,500*l.* which a major in your regiment lately obtained on retirement represents the amount he himself paid in order to obtain that rank, or did he make any profit by it?—I should say that he made a profit by it.

1445. (*Lt.-Gen. Peel.*) Are the officers in your regiment aware of the nature of the evidence you have given?—Yes, they are quite aware of it.

1446. (*Chairman.*) Were they quite willing that you should give us the information which you have given?—Yes.

1447. (*Lt.-Gen. Peel.*) You say that if an officer retires from one of these non-purchase regiments who has not served the prescribed time to entitle him to the Indian allowance he receives just as much as he would if he were in a purchasing regiment of the British army, an allowance for his services of 100*l.* a year?—Yes.

1448. From what fund does that money come? In a purchasing regiment the officer's commission is sold in order to pay him the 100*l.* a year to which he is entitled for his services, and whatever surplus is obtained goes to the Reserve Fund. Yours not being a purchasing regiment how is the 100*l.* a year procured?—I cannot say; but I can tell you the date of the order under which it was given to us. It was an order dated the 19th of February 1862.

1449. Do you know an instance of any officer having retired and having received 100*l.* a year for his services?—Yes, a lieutenant retired five months ago from my regiment and received 750*l.*

1450. From what source?—From the Indian Government I think, but the order by which we are given this is an order from the Horse Guards signed by Sir James Yorke Scarlett in February 1862.

1451. That is the order I suppose to which you refer (*handing a book to the witness.*)?—It is.

1452. Will you read it?—"With regard to the "addition of 12 non-purchase regiments of the line "to the British army, His Royal Highness the "General Commanding-in-Chief is pleased with the "concurrence of the Right Honorable the Secretaries "of State for War and for India to establish the following regulations. First, in non-purchase corps "of the line, no officers can sell their commissions. "Those who enter from the Indian service retain "their claim to Indian pension, and all others are entitled, with Her Majesty's approval, to retire on full "or half pay, according to the terms of Her Majesty's "warrants of the 14th October 1858 and the 28th "March 1861. Second, an officer joining a purchase "regiment from the Indian Service will be placed on "the same footing in all respects with the rest of the "officers of that regiment. Having forfeited all claim "to Indian pension, he will become entitled to retire "on full pay or half pay under the warrants above "specified. Non-purchase officers of such regiments "have the privilege of receiving, subject to the consent in each case of the General Commanding-in-"Chief and of the Secretary of State for War (which "is liable to be withheld if the retirement results "from misconduct) an allowance on retirement of "100*l.* for each year's service, whether in the British "or Indian army, provided the total amount does not "exceed the price of the commission resigned. By "order of His Royal Highness the General Commanding-in-Chief. JAMES YORKE SCARLETT, Adjutant-"General."

1453. (*Chairman.*) Is there anything in that order which excludes the officers of these non-purchase regiments from the benefit of the regulation?—No.

1454. And in practice you know that the allowance is given?—I know one case in which it was given, and it is our belief that we are entitled to the 100*l.* a year.

1455. (*Lt.-Gen. Peel.*) By that order?—By that order.

1456. (*Chairman.*) But you do not know whether it comes from the Indian or the Imperial Government?—No, I do not.

1457. You said that the position of a non-purchase officer in a purchase regiment was, you thought, better, in respect to his chances of promotion, than that of one of the officers in these regiments; is that the case?—It is our opinion and belief, amongst ourselves.

1458. Would a non-purchase officer, for instance, in a purchase regiment, would obtain his company sooner than one of the officers of these regiments?—Yes.

1459. With reference to those exchanges, for which you said that a large sum of money was given, what was the inducement to the officers to come into these non-purchase regiments; was it the payment of the money by the other officer?—They were officers who were serving on, I believe, in order to be enabled to retire upon full pay. I believe in both those cases it was so.

1460. I will take the case of the two captains who you said exchanged from your regiment into a purchase regiment, what was the inducement to the officers from the purchase regiments to come into your regiment? Was the payment of the money the whole inducement?—I believe so.

1461. Do you know the circumstances of those officers at all; had either of them been promoted from the ranks?—One captain and one lieutenant were promoted from the ranks.

1462. Then was the effect of that exchange that an officer who had been promoted from the ranks in a purchase regiment came into one of these non-purchase regiments, receiving, in the one case, 2,500*l.*, and in the other, 1,000?—Yes.

1463. (*Mr. Whitbread.*) Do you know how many years' service each of those officers had before he made this exchange, I mean the officers coming from the purchase regiment into your regiment?—I see by the Army List that one of the captains had about 11 years' service.

1464. (*Chairman.*) You said that there were two captains who exchanged?—Yes; the other captain has since died, and his name is not in the List, therefore I could not tell you how many years' service he had.

1465. (*Mr. Whitbread.*) There were two lieutenants also who exchanged, were there not?—Yes.

1466. What service had they at the time they exchanged?—The one who had risen from the ranks had eight years' service, and the other had also eight years' service; he came from an infantry non-purchase regiment, he did not exchange from a purchase regiment. But looking at the List reminds me that there is another officer who has just exchanged into our regiment from a purchase regiment, he has nine years' service.

1467. (*Chairman.*) In the case of an exchange from one non-purchase regiment to another, is there any money given or received?—Yes; there is a captain in a non-purchase regiment, who is now offering 1,500*l.* to exchange to one of our regiments.

1468. Is that, from infantry to cavalry?—That is, from infantry to cavalry.

1469. (*Mr. Muntz.*) You stated just now that a lieutenant retired and received 750*l.* for the value of his commission?—Yes.

1470. Did he retire under any peculiar circumstances, was it by his own wish that he retired?—He retired by his own wish.

1471. Was that 750*l.* a commutation of the half-pay he was to receive, or does he receive any half pay besides?—No, he does not receive any half pay.

1472. That was the total sum given to him?—Yes.

1473. You said that when an officer made up his part of the purse he lodged the money with Messrs. Cox and Co. to the credit of the officer retiring?—Yes.

1474. Is not that upon the condition that it is to be paid to the credit of the officer retiring when his name appears in the Gazette as having resigned?—The terms are that this is to be held in deposit and credited to him on the retirement appearing in the London Gazette.

1475. Supposing an officer refuses to contribute to this purse, what happens?—Then the sum he was called upon to pay will be made up by the other officers, according to the same scale as each was paying upon before.

1476. What will be his standing in the regiment afterwards; will he be looked upon in the same light as before, or will there be a slur upon him?—I do not think there would be a slur upon him. He would not be able to get so much money on retiring as he otherwise would have got.

1477. (*Mr. Whitbread.*) Will you complete your answer to a former question by stating the length of service of all the officers who exchanged from your regiment into purchase regiments?—One captain exchanging out of our regiment had 15 years' service, and the captain coming in his place had 11. In two cases the lieutenants going out and coming in had each about eight years' service. I think that is all I can give.

1478. Will you take the case of one of the officers who had risen from the ranks in a purchase regiment, and had exchanged into yours? Take a captain for instance, and tell me what was the pecuniary advantage to him of the transaction. Was the captain of 11 years' service whom you mentioned first an officer who had risen from the ranks?—Yes.

1479. In a purchasing regiment?—Yes.

1480. He had received as an inducement to exchange into your regiment a sum of how much?—Upwards of 2,500*l.* I believe that is about the sum. I have never asked the officer point blank, but I spoke to a brother officer just now, and he told me that he believed that was about the sum.

1481. Supposing he had wished to retire when he was in the purchase regiment, what sum could he have obtained?—I was never in a purchase regiment, so I cannot tell that.

1482. He could only have sold his commission with a claim to 100*l.* for every year he had served if abroad, and 50*l.* if at home; 1,100*l.* would have been the maximum which he could possibly have obtained?—Yes.

1483. So that he had a clear gain of 1,400*l.* by that exchange. Then, being in your regiment, can he now retire and claim 100*l.* for each year's service?—Yes, I think so.

1484. (*Lt.-Gen. Peel.*) What were the peculiar circumstances under which an officer of your regiment paid this 2,500*l.* to an officer exchanging with him from a purchase regiment?—The purchase regiment into which he wished to exchange was at home, and our regiment was not expected to come home for another seven years.

1485. (*Mr. Whitbread.*) Were there peculiar circumstances of that nature in the other case which you quoted, where an officer who had risen from the ranks, I think, to be a lieutenant in a purchase regiment exchanged into your regiment?—That also was a regiment that was in England and the officer benefited by giving his money, because he has now got his troop, though the exchange only took place two years ago.

1486. (*Chairman.*) How many lieutenants are there now above the lieutenant who exchanged with him in your regiment?—There are four senior to him.

1487. He would therefore have been fifth lieutenant now if he had remained in your regiment?—Yes. He would have been fifth lieutenant if he had remained in our regiment, whereas he now is a captain in the regiment he exchanged into.

1488. Did he purchase his commission as captain in that regiment?—According to this Army List, he is still gazetted as fourth lieutenant; therefore he must have done so. He has been gazetted to his troop, I know.

1489. You do not know whether he got his commission by purchase or not?—I cannot speak for certain about that, but apparently he must have done so.

1490. You say he must have done so, because it appears from a recent Army List that there are several lieutenants senior to him, whom he must have purchased over?—Yes, he has been gazetted within the last fortnight to his troop.

1491. Is this system looked upon with favour by officers in the non-purchase regiments?—No, but it is the only one by which we can get men to retire.

1492. Is there any desire to put a stop to it, or do the officers agree to its continuance with a view to promotion?—There is no desire to put a stop to it.

1493. Is it the only means by which they can get officers to retire?—Yes, it is the only means of accelerating promotion.

1494. If there was strict seniority promotion without the payment of any money to induce an officer to retire, the promotion would be still slower than it is now?—Yes.

1495. And you consider that it is now much slower even than to a non-purchase officer in a purchase regiment?—Yes.

1496. (*Mr. Whitbread.*) What date was it when the officer gave 2,500*l.* to exchange into a regiment at home?—It was in 1865.

1497. When did the regiment come home?—It has just come home.

1498. I suppose the officer had no notion that the regiment would have come home so soon, or he would not have made that exchange at that price?—It is impossible to say. The officer himself was in England at the time he negociated the exchange. I suppose he did not want to go out again. He only served on for another year and a half or so, and then retired altogether.

1499. Do you think that this system of providing such large bonuses for retiring officers will be maintainable by the regiment now that they are not receiving the Indian pay and allowances?—It is impossible to say. The system is on its trial now. We have always looked forward to the date when we should come home with curiosity to see how it would work, but at present if an officer in any regiment was to offer to retire, I believe he would get the same money.

Lieut. J. Biddulph.

30 May 1870.

1500. Do you think that he would get the same sum here as he would have got in India?—Yes, I think he would; but we have only been two months in England, and therefore we have not been at home long enough to see how it would affect us in that respect.

1501. (*Lt.-Gen. Peel.*) What is the difference between the pay and allowances you received out in India and those you receive in England?—A lieutenant here gets 9*s.* a day, and in India he gets about 450*l.* a year.

1502. Therefore to a man who has risen from the ranks and has no means except his pay, it is an advantage to be in India?—Yes, he would be much better off in India.

1503. (*Sir W. James.*) Does that figure include all allowances?—Yes.

1504. (*Chairman.*) Can a cavalry officer live upon his pay in India?—A captain certainly can.

1505. (*Lt. Gen. Peel.*) Can he in this country?—No.

1506. (*Chairman.*) Then that of itself would be a great inducement to a poor man to exchange into a regiment remaining in India?—Yes.

1507. (*Sir J. Scarlett.*) Are your expenses very much greater in India than they are in England?—Yes, in certain ways they are; we have to keep up a quantity of servants and we do not get any free quarters, we have to pay for them.

1508. (*Chairman.*) Still is not the balance very much in favour of an officer in India as it respects his pay?—Yes, particularly as he gets higher up in the service; I am only speaking with reference to the cavalry regiments, an infantry officer is not nearly so well off.

1509. (*Mr. Whitbread.*) Can you give us the difference of a major's pay at home and in India?—I cannot tell you what it is at home it is about 1,100*l.* a year in India.

1510. (*Sir W. James.*) Is that actually paid in money or does it include any allowances?—It is all paid in money, it covers the allowances.

1511. (*Mr. Whitbread.*) Will you give us the pay of a colonel in India?—The colonel of a cavalry regiment in command in India gets something like 1,800*l.*

1512. (*Chairman.*) Are there two majors in your regiment?—Yes.

1513. Is one to be reduced?—Yes.

1514. Is he now considered as a supernumerary?—Yes.

1515. In the event of a vacancy taking place in one of the majorities, no promotion therefore would go in the regiment, is that the case?—It would be very uncertain whether it would go in the regiment or not.

1516. You do not know exactly in what way the absorption is intended to take place?—No.

1517. No. Supposing on a vacancy occurring in one of the majorities, the promotion did not go in the regiment, I presume the major retiring on half pay, we will say, would receive nothing in that case from the other officers, would he?—He would expect to get money. As long as he was in the way it would always prevent promotion, and as long there is a step to be absorbed, it is our interest to get it absorbed as soon as possible.

1518. Then if he retired on half pay a sum would be made up to him, would it?—It is very hard to say, there has been no former case of that kind. A senior major retired immediately after the formation of the regiment, and then his step was absorbed; a captain was promoted but no lieutenant was promoted to be captain, but we had agreed to give the money before we knew that this would be the case, and therefore it made no difference in the payment.

1519. Will you be good enough to read this order (*handing an order to witness*) with regard to the retirement of officers from non-purchase regiments?—"It has been determined by the Secretary of State for "India in Council, with the concurrence of the Secre- "tary of State for War, and His Royal Highness the "Field Marshal Commanding-in-Chief, that in future "officers of the 12 non-purchase line regiments who "have entered those corps from Her Majesty's Indian "service, and may wish to retire from the army, and "may not be entitled under Indian Regulations to "either full or half pay, shall, subject to the approval "of the Secretary of State for India in Council "and His Royal Highness the Field Marshal Com- "manding-in-Chief, receive on retirement such sums "as officers of the same rank retiring from a purchase "corps would be entitled to under Article 84, part 1, "of the Royal Warrant of 3rd Feruary 1866, or under "whatever corresponding rules may be in force in "Her Majesty's British Service at the time."

1520. Does not it appear from that order that the allowance of 100*l.* a year is limited to officers in those regiments who were formerly in the East India Company's service?—Yes.

1521. Therefore in the case you referred to just now in which a payment has been made to an officer retiring, probably the officer had been in the East India Company's service before?—He had been in the East India Company's service.

1522. Is there any case of the retirement of an officer who had not been in the East India Company's service before, in which he has received that allowance?—No, none.

1523. Is it the general expectation of the regiment that the allowance will be paid to officers on retirement, whether they have been in the East India Company's service or not?—Yes.

1524. But the order does not appear to extend to them?—This order certainly does not.

1525. (*Mr. Muntz.*) Do you know of any other order that does?—I do not know what the order is, but it is my impression that there is one.

1526. (*Lt.-Gen. Peel.*) Do you consider that if a cornet is appointed to a cornetcy without purchase in your regiment, and after serving five or six years, he wished to retire he would receive the same allowance as if he was a non-purchase officer in a purchase regiment?—Yes. I cannot help thinking that there is an order to that effect, though I cannot quote it.

The witness withdrew.

DENHAM ROBINSON and ROBERT DAVEY, ESQUIRES, examined.

D. Robinson, Esq. R. Davey, Esq.

1527. (*Mr. Whitbread.*) What position do you hold?—We are clerks in the War Office and actuaries.

1528. You have recently been engaged in preparing some returns showing the average service of purchase and non-purchase officers in the infantry of the line, have you not?—We have prepared such returns incidentally in some calculations we have been making in regard to the Artillery for another committee.

1529. Will you tell the Commission what was the average length of service in the several ranks of the officers serving in 1870 and in 1852 who had purchased all their steps and those who had purchased none of their steps?—The officers of 1870 who have purchased all their commissions have on an average obtained the rank of lieutenant in $2\frac{8}{10}$ years, of captain in $8\frac{2}{10}$ years, of major in $17\frac{3}{10}$ years, and of lieutenant-colonel in $22\frac{3}{10}$. Those who have risen without purchase also on an average reached the rank of lieutenant after $2\frac{8}{10}$ years' service, that of captain after $9\frac{9}{10}$, major after $19\frac{1}{10}$, and lieutenant-colonel after $24\frac{9}{10}$. The officers of 1852 had served longer altogether, and those purchasing had a greater advantage over those who did not purchase. The purchasing officer obtained his lieutenancy after $2\frac{9}{10}$ years, his company after $8\frac{8}{10}$ years, his majority after $17\frac{5}{10}$ years, and his lieutenant-colonelcy after $21\frac{4}{10}$ years. The officer who did not purchase only became a lieutenant after $3\frac{4}{10}$ years, captain after $11\frac{3}{10}$ years,

major after $23\frac{6}{10}$, and lieutenant-colonel after 30 years. We can hand in two tables showing the average length of service under various combinations.

1530. (*Chairman*) (*producing the same*). Is it not the case that in the first of these tables the period of the last war is included, and in the other there is no period of war included?—Exactly.

1531. Would that account for the difference you have pointed out?—We think so. They are the average length of service at which the officers in the Army List for those years obtained their promotion.

1532. (*Lt.-Gen. Peel.*) The one year is 1870 and the other is 1852?—Yes.

1533. And the average applies to all the promotions which took place in the course of those years respectively?—No, it is taking all the officers of those years.

1534. You took all the lieutenant-colonels in fact?—Yes, and then all the majors, and then a large number of the captains, and so on.

1535. (*Mr. Whitbread.*) Have you any similar return which you can give us relating to the Artillery and Engineers and non-purchase regiments?—Yes. We can give you the service of the senior officer in each rank in the year 1870, and we can give it back to 1850.

1536. Can you give the service of the junior officer in each rank?—No; but it will be very nearly the same as that of the senior of the rank following.

1537. Will you give us that statement both in the Artillery and in the Engineers?—We can give it for the year 1870. In the Artillery the senior colonel has 38 years' service, the senior lieutenant-colonel 28, the senior captain 23, the senior second captain 16, and the senior lieutenant 12.

1538. (*Chairman.*) You speak of the senior lieutenant-colonel, but can you tell when he got his commission as colonel in order that we may see how long it took him to arrive at that position?—The service of the senior officer of the following rank would represent the time the junior of the rank above has taken to get there, or very nearly.

1539. (*Maj.-Gen. Steele.*) Would not Hart's Army List give it you?—Yes.

1540. (*Mr. Whitbread.*) Can you tell us the number of years on the average which it took to reach the rank of lieutenant-colonel?—Averages scarcely come into the Artillery, because they rise by strict seniority.

1541. What was the actual time it took to reach the rank of lieutenant-colonel by the Army List of 1870?—23 years.

1542. What was the time it took to reach the rank of major?—There is no such rank in the Artillery.

1543. Can you give us the time it took to become first captain?—16 years.

1544. (*Chairman.*) The rank of first captain in the Artillery is equal to that of a captain in the Line, is it not?—The rank of second captain also corresponds to a captain in the Line. A first captain in the Artillery, we believe, rather corresponds to a major in the Line.

1545. (*Sir J. Scarlett.*) There are no ensigns in the Artillery?—No, the junior lieutenants are paid as ensigns.

1546. (*Mr. Whitbread.*) Do you think that you could give us in a short time anything which would enable us to compare the length of service which it requires in the Artillery and the Engineers to reach the rank corresponding with those ranks in the Line?—I think the rank of first captain in the Artillery corresponds with the rank of major in the Line, for the Artillery officers hold it at about the same period that the Infantry officers hold the rank of major.

1547. It took 16 years to become a captain in the artillery?—It takes 16 years to become a first captain at the present time.

1548. (*Lt.-Gen. Peel.*) Has not the promotion in the Artillery varied very much in consequence of the augmentations of that corps?—It has been gradually deteriorating ever since the year 1857.

1549. Therefore the average promotion is very much affected by those augmentations?—Undoubtedly; it went down to a very low period indeed.

1550. (*Mr. Whitbread.*) Then it does not appear by your Return that a non-purchasing officer takes very much longer to reach the rank of lieutenant-colonel than a purchasing officer?—But that is entirely dependent upon the proportion between the ranks. The Line proportion and the Artillery proportion are not the same.

1551. I speak now of the Line. It does not appear by the answer you gave just now that a non-purchasing officer in a regiment of the Line takes very much longer to reach the rank of lieutenant-colonel than an officer who purchases every step?—On an average they have only taken $2\frac{6}{10}$ years longer; but of course there are many individual instances of much longer service.

1552. (*Chairman.*) Are you speaking now of the table of 1870, or of that of 1852?—Of 1870.

1553. Taking the table for 1852, what is the average?—$8\frac{6}{10}$ longer.

1554. (*Mr. Whitbread.*) To reach the rank of major by the table of 1870, a non-purchasing officer takes rather less than two years longer than a purchasing officer?—Yes, $1\frac{8}{10}$.

1555. And by the table of 1852 he takes nearly six years longer?—$6\frac{1}{10}$.

1556. (*Chairman.*) Are you now making a comparison between officers who have purchased all their commissions and officers who have purchased none, excluding those who have purchased only some?—I am now making a comparison between those who have purchased all and those who have purchased none.

1557. (*Sir W. James.*) As I understand it, you have now taken all the officers in each grade; that is to say, all the lieutenant-colonels, all the majors, all the captains, and so on?—Yes; all the lieutenant-colonels and majors and a large number of the lower ranks.

1558. I suppose the effect of the last war upon the average period of promotion is gradually diminishing, and that the difference is greater in the case of those who obtained their present grade last year. Take two officers who obtained their grade in the year 1870, the one having purchased, and the other not having purchased, would not the difference between their years of service be much more than that which you have given?—During peace the tendency is to a condition of things in which a purchasing officer will gain more than in a period of war.

1559. Has it not tended in that direction already to a great extent?—No doubt it has.

1560. (*Lt. Gen. Peel.*) The Indian non-purchase regiments have not been long enough in existence to enable you to base any calculation upon them?—We have not worked them out, they are not included in these averages.

1561. (*Mr. Whitbread.*) Will you put in a return showing the average service of the purchase and non-purchase officers of the infantry of the line in 1852 and 1870 respectively?—Yes, and we put in also another return headed "Average service of infantry officers "under various conditions." (*The same were handed in,* App. XII., XIII.)

The witnesses withdrew.

Adjourned to Tuesday the 14th of June at half past one o'clock.

Tuesday, 14th June 1870.

PRESENT:

THE RIGHT HONOURABLE SIR GEORGE GREY, BART., M.P., IN THE CHAIR.

THE RIGHT HON. GEORGE WARD HUNT, M.P.
MAJOR-GENERAL STEELE, C.B.
SAMUEL WHITBREAD, ESQ., M.P.
P. H. MUNTZ, ESQ., M.P.

R. H. KNOX, ESQ., *Secretary.*

C. A. Wood, Esq.
14 June 1870.

CHARLES ALEXANDER WOOD, ESQ., examined.

1562. (*Chairman.*) You are deputy chairman of the Great Western Railway, I believe?—I am.

1563. Have you formerly held various offices under Government?—Yes. I was formerly, as you are aware, connected with the Colonial Department, and I was also one of the Land and Emigration Commissioners, but before that I had been connected with Lord Hardinge. I was Lord Hardinge's private secretary at the War Office from 1828 to 1830. I also was one of his executors and had charge of his military papers. Being very much in his confidence, about the time of his death, I had frequent opportunities of communicating with various persons, on military matters, including the late Lord Herbert.

1564. Have you a son in a cavalry regiment?—I have. He is a captain in the 10th Hussars.

1565. When did he enter the army?—In July 1858. I had an offer of a commission in the 10th Hussars without purchase, and which, fearing the expense, I at first declined. At that time there was a great dearth of cavalry officers, and the Duke of Cambridge was kind enough to offer me the commission, which ultimately I accepted.

1566. Did your son afterwards become first for purchase of a lieutenancy?—In June 1859 he became first for purchase, and he was returned for purchase.

1567. You were prepared to pay for him the regulation price of his commission as lieutenant?—In 1859 when his name was returned for purchase, I was prepared to pay the regulation price on his behalf, but not more.

1568. Did a vacancy occur which he could have obtained by purchase?—A vacancy did occur.

1569. Was any application made to you to pay anything beyond the regulation price for the lieutenancy?—Some communications passed between officers of his regiment and myself, which notified my intention not to pay more than the regulated difference, and my reasons.

1570. Did he then purchase his next step?—He did.

1571. Did you pay anything more than the regulation price for him?—At that time I did not.

1572. Do you know whether he paid anything more than the regulation price, or did he obtain his lieutenancy for the regulation price?—He did not obtain his lieutenancy for the regulation price; it was obtained at a price beyond the regulation, although that fact was unknown to me at the time.

1573. You, in fact, paid nothing more than the regulation price?—Not in September 1859, when my son obtained his lieutenancy, and he was a minor, under age.

1574. He found the means of paying the over-regulation price from some other source?—He did.

1575. Have you also a ward in the cavalry?—I have.

1576. When did he enter the army?—In 1855.

1577. Do you know how he obtained his second commission; that of lieutenant?—By purchase at the regimental price.

1578. By the "regimental price" you mean including over-regulation price?—Yes.

1579. Did you, as one of his guardians, pay that for him?—I did. That was in the year 1857.

1580. Do you know what he paid?—The usual regimental price.

1581. Did he afterwards become first for the purchase of a troop?—He did, whilst serving in India.

1582. What took place on that occasion—did he obtain his troop by purchase in due course?—He became not senior subaltern, but first for purchase in the early part of the year 1860.

1583. And were you applied to as his guardian to supply him with the means of purchasing his troop?—I was.

1584. Did you supply him with those means?—I declined to purchase above regulation.

1585. Were you prepared to pay the regulation price for his troop?—I was.

1586. But you declined to pay any over-regulation price?—Yes, but as he was not then the senior subaltern I did not withdraw his name for purchase.

1587. What was the effect of that refusal on your part?—On two occasions captains were brought in, one from the Military Train and another from an infantry regiment, receiving from the Reserve Fund the difference between the cavalry and infantry prices, namely, 1,245*l.*

1588. Was that after the equalisation of the cavalry and infantry prices?—Yes; that equalisation took place in the autumn of 1859.

1589. Do you mean to say that upon each of those occasions on which an officer was brought in, if your ward had been prepared to pay the over-regulation as well as the regulation price he would have obtained his troop?—He would.

1590. Did he ultimately obtain his troop?—He did in December 1862.

1591. How much time had he lost by not paying the over-regulation price when he might first have obtained his troop?—About two years and a half. He might have had his troop in March 1860.

1592. How did he obtain his troop at the end of the two years?—By purchase.

1593. Did he then pay over-regulation as well as regulation price?—He paid the usual regimental price.

1594. With the concurrence of his guardians, of whom you were one?—Yes, I found the money.

1595. Will you state why you refused in the first instance to pay over-regulation as well as regulation price and afterwards consented to do so and paid it?—On the 28th June 1859 there appeared in the "Times" newspaper the proceedings in the case of the Queen *v.* Marshall, which was a Government prosecution instituted by the military authorities under the 49th George the Third, chapter 126, for trafficking in commissions.

1596. Are you aware of all the facts of that case, I believe you have read the report of it?—Yes, I have the report of that case here.

1597. You are aware that that case had nothing to do with the payment of over-regulation money. Was not it a prosecution of a person who had been guilty of trafficking in commissions and of obtaining money from a gentleman to procure him a first commission?—It was.

1598. But still it was under that Act of Parliament?—Yes.

1599. What effect then had that upon your decision as to paying the over-regulation price for your ward?—The proceedings in this case, as published in the "Times," raised the impression not in my mind only but in that of my father, who had considerable military experience and knowledge of public affairs, having been a long time in Parliament, and having had several sons in the army and paid large sums of

money for their advancement in the service, that the Government intended thenceforth to enforce the law as regarded over-regulation price. It was true that the clause in the Act of Parliament, under which the prosecution was instituted, did not affect payments in excess; but the Government having taken a step to put that statute in force, for another purpose, the opinion which my father had was that it was not safe thenceforth for anyone to pay over-regulation prices; and being then my adviser he insisted upon my taking the course I took in the case of my son, and also was aware of the decision to be taken, in the case of my ward, not to pay more than the regulation price for his troop. My father died in January 1860, and I afterwards wrote officially, on my own responsibilty.

1600. To whom were those official letters addressed?—In the case of my ward, the letter was addressed officially to the War Department, but I had previously had some communication with Mr. Sidney Herbert on the subject.

1601. And in the case of your son, to whom was the letter addressed?—In the case of my son it was a letter addressed only to Messrs. Cox and Co., and written by my father's dictation, but as that letter was not sent, I will not further refer to it.

1602. In the official letter which you wrote on behalf of your ward, did you state the grounds of your refusal to pay more than the regulation price?—Here (*producing some letters*) is the letter and the official answer. It was addressed to Sir Edward Lugard, as Under Secretary to Sir Cornewall Lewis; but perhaps you will allow me to explain the circumstances under which it was written. In the autumn of 1859 I had had a communication with Mr. Sidney Herbert, about his measure for equalising the cavalry and infantry prices, and that conversation which I had with him was followed by a letter from me to him instancing the case of my ward having lost his promotion by an officer being brought in over his head, and this is the answer, if I may be permitted to read it, which I received from him. "49, Belgrave Square, "March 21/60. My dear Mr. Wood. Thanks for "your letter. If my plan succeeds it will, I think, "bring down the prices of commissions to the regu- "lation, and if so would do away with the system of "bargain and extortion which now disfigures the "system and disgusts the public. Among the public "none are more injuriously affected than the parents "and guardians who are the real sufferers. I hope "you may succeed in your stand against an illegal "demand. A few such examples will be most "wholesome. Believe me, your's sincerely, Sidney "Herbert."

1603. What was the plan to which Mr. Sidney Herbert referred in that letter?—His plan was the equalisation of the cavalry and infantry prices, which came out in the autumn (in November, I think) of 1859. In the course of 1860 the Committee on Military Organisation, of which Sir James Graham was the chairman, took into consideration amongst other matters, this question of purchase, and Sir James Graham sought to introduce into the report this paragraph: 64. "With respect to the sale of com- "missions, His Royal Highness the Duke of Cam- "bridge acknowledged that he had no doubt the "regulation price was constantly and largely ex- "ceeded, notwithstanding the strict prohibition of "the law. He said that 'Officially he knew nothing "'of it—if he did that he should instantly take "'notice of it. He thinks it a very objectionable "'practice,' but 'does not see his way out of it, and "'is at a loss to know how to meet it.' He further "said 'that a military authority can only take cogni- "'zance of what comes to him officially, and as such "'I state positively that we are not aware of any "'more money being paid than in the usual way.' "What is 'the usual way?' is the important ques- "tion. Mr. Hammersley, a great army agent, de- "posed before the Commission on Sale and Purchase "that the price in the cavalry was frequently 100 "per cent. above the regulation." Then paragraph 65 is as follows: "Surely the time has arrived when "the law which prohibits such transactions should, "if noxious, be repealed, or should, if salutary, be "enforced."

1604. Was that a paragraph in the draft report submitted by Sir James Graham as the chairman of that Committee, for the adoption of the Committee?—It was so; on the 5th of July 1860 the committee met to consider their report, and on paragraph 64 being read, and the question being put that the paragraph stand part of the report, the Committee divided, Ayes 5, Noes 7, and Mr. Sidney Herbert recorded his vote in the majority. The proposed paragraph 65 was also disagreed to. I did not see that report until some time in the course of 1861. It was ordered by the House of Commons to be printed on the 9th July 1860. I cannot exactly say when I first saw it; but finding that two officers had come in over my ward's head, and that there was a probability of another doing so, for I had reason to know that a third case was then under consideration, as he had been applied to to know whether he would purchase or not, feeling also that there was a desire, as I presumed, on the part of the military authorities, to put an end to this system (though in that I was mistaken), I addressed an official letter to the War Office to learn the policy of Government. The way in which I tested *that* was by stating all the facts in the case of my ward, and by asking that when a captain did exchange from the cavalry to the infantry, for his own convenience, the public money should be withheld. I made no objection to an officer coming in when public money was not paid, but I did object to public money being paid to enable this system to continue. The answer which I received was that Sir Cornewall Lewis did not think that any alteration need take place in the rules of the service.

1605. Will you quote the actual terms of the letter from the War Department?—This is the original letter: "War Office, 27th September 1861. Sir, In "acknowledging the receipt of your letter of the "7th instant, I am directed to acquaint you that "while the Secretary of State for War highly dis- "approves of the payment of sums in excess of the "regulated value of commissions, he is not of opinion "that the recent regulations have in any way either "tended to increase this practice or to injure the "position of the subaltern officer; that the object "in allowing the difference between cavalry and "infantry to be paid from the Reserve Fund, in lieu "of its being paid as formerly by the infantry officer, "is to avoid as far as practicable perpetuating former "cavalry rates; that the recent regulations do not "appear to have increased the number of exchanges, "and that, after careful consideration, Sir George "Lewis has not deemed any departure from the "existing regulations to be necessary." This is signed by Sir Edward Lugard. Upon the receipt of that letter I returned my ward immediately for purchase, and I paid the usual regimental price. In the case of my son, when his turn came, at a later period, July 1867, I also did the same for him, feeling that the policy must have changed, and that there was, as I supposed, no intention on the part of the Government to enforce the law against any one who offended. My letter is perhaps too long to read to the Commission, but I stated the whole case, I suppressed no fact, and I felt that if my application was refused, I should probably not incur any penal consequences if I paid the over-regulation price. Promotion was of course a great object for my son and my ward, and I paid the money accordingly.

1606. Was your refusal, both in the case of your ward and in that of your son, to pay over-regulation price, founded entirely upon your apprehension that the Government were about to enforce the provisions of the Act of 1809 to which you have referred, and not upon any scruple on your own part to conform to the practice becamse it was a violation of the law?—Certainly, the former was solely and entirely the reason.

C. A. Wood, Esq.

14 June 1870.

1607. As soon as that apprehension was removed from your mind you conformed to the general practice and paid the over-regulation price?—Immediately.

1608. How did it happen that when your son, who was first for purchase, declined to pay the over-regulation price, another officer in the regiment had not the option of doing it. Was his name withdrawn from purchase?—It was not.

1609. Therefore the promotion could not go in the regiment because no officer could purchase over him, and an officer was brought in from another regiment to fill the vacancy?—In my son's case no officer was brought in from another regiment. In my ward's case an officer was brought in from the Military Train, and afterwards another officer was brought in from an infantry regiment. On both those occasions 1,245*l.* was paid from the Reserve Fund, and the promotion went, not in the cavalry regiment, but in the Military Train in the one case, and in the infantry regiment in the other.

1610. Was the effect of that that the promotion in the cavalry regiment was stopped for the time?—Yes.

1611. The step was lost to the regiment?—Those two steps were, for the time, lost to the regiment.

1612. What was the feeling produced in the regiment with regard to your ward?—A very uncomfortable feeling was produced; I had letters from various persons about it.

1613. To what effect were the letters; were they remonstrating against the course you had adopted?—Yes; they were from officers' friends at home. The regiment at that time was in India, on active service. My ward got promoted on to the staff and, for a time, was away from the regiment, and therefore he did not feel it.

1614. I presume the officers of the regiment knew that it was your doing, and not your ward's?—Entirely, I avowed it publicly; as long as my father was alive I had the support of his authority.

1615. It was in conformity with his opinion?—It was in conformity with his opinion and his wishes. I felt sure, from his experience, and the fact of his having had so many of my brothers in the army to provide for, that he could not be wrong in what he was directing me to do.

1616. (*Mr. Muntz.*) From the whole of this correspondence was it your impression that the Secretary at War sanctioned the payment of over-regulation money?—I could draw no other inference from the answer to my letter. I set out, in this letter of mine, the whole circumstances. I stated everything. I only asked, that in certain cases to prevent the payment of more than the regulation difference, public money should not be paid. I have the letter here, but it is a very long one.

1617. (*Chairman.*) Will you read that letter?—I will. It is addressed to Major-General Sir Edward Lugard.—"7th September 1861. Sir, I have the "honour to request that you will submit, for the "consideration of Secretary Sir George C. Lewis, "the following statement respecting payments from "the Reserve Fund to officers exchanging from "cavalry to infantry. By the late measure for "equalising the prices of cavalry and infantry com-"missions, officers, on exchanging from cavalry, may "receive from the public the difference, at former "prices, between cavalry and infantry. The effect "of this arrangement on cavalry prices and promo-"tion may be seen by a case in which I am per-"sonally interested and familiar with all the facts. "My ward, Lieut. ————, of the ——— Dragoons, "is now senior subaltern of that regiment, and about "18 months ago, in consequence, as I understood, of "an officer failing to pass his examination, became "first for purchase of a troop in it. Had over-"regulation or the usual regimental price then been "given, my ward, who was serving with credit "in India, might have been a captain about March "1860. But his guardians refused to pay the "requisite or regimental sum, *in excess*, and for that "refusal the following reasons were assigned to his "regiment. [These were reasons which I personally assigned in my correspondence with the officers, the senior lieutenant and his friends, who urged me to pay the over regulation.] "'So long as the "'Act making it penal to give over regulation was "'allowed by the authorities to lie dormant, the "'public might safely treat it as a dead letter. But "'when put in force, as it was last autumn, though "'for another breach of its provisions, and when the "'military secretary declared, that if sums in excess "'of regulation were given, 'it was irregular, and "'the parties took care to conceal it from him' "—(vide report of the case, Reg. *v.* Marshall and "others, Times, 28th June 1859)—'the position of "'any one who respects the law and the Queen's "'Regulations was thenceforth changed. I own, that "'individually I determined to be no party in future "'to a violation of the Act of Parliament. This "'was even before the late announcements. But "'since the commencement of the present session "'of Parliament the dearth of cornets has there "'been remarked upon, and the Government has "'equalised the prices of cavalry and infantry. It "'has, moreover, announced an early measure, to be "'framed in conformity with the recommendation of "'the latest Royal Commission on Promotion, namely, "'that beyond majorities no rank will be purchaseable. "'This announcement alone would justify any prudent "'man in refusing to pay a farthing more for rank "'than Government rules allow, even if no scruples "'of law or conscience might affect him. My inten-"'tion, therefore, is to adhere strictly to the law and "'Queen's Regulations.' These were the reasons "assigned to his regiment in March 1860, when Lieut. "——— became, not senior subaltern, but first for "purchase, for declining to give for his troop anything "beyond regulation. They have, however, as must "be admitted, since been weakened by the postpone-"ment of the Commissioners' measure, and the rejec-"tion of the 64th and 65th paragraphs of Sir James "Graham's draft Report on Military Organisation. "As regards these excessive prices, Sir James sought "to record, on the authority of the Committee of the "House of Commons, the following opinion. 'Surely "'the time has arrived when the law which prohibits "'such transactions should if noxious be repealed, "'or should, if salutary, be enforced.' (Par. 65, "P. P. 1860, No. 244, p. xxxv.) But his resolution "was negatived on a division, the Secretary of State "voting with the *majority!* On the expediency or "otherwise of these proceedings, I do not express any "opinion, and here merely refer to them because they "have an important bearing on the position which "Lieutenant ———'s guardians had assumed, in "compliance with what they certainly understood "to be the wish of the authorities. But to continue "his case: When the measure in question (namely, "equalising prices) came into operation, there were "in his regiment two captains, B—— and C——, "neither of whom for that rank had made any pay-"ment. Captain B—— purchased only his lieu-"tenancy, Captain C—— obtained every commission "without purchase, but both became entitled, by the "new measure, on exchanging, one to the Military "Train, and the other to the — Foot, and did receive "from the Reserve Fund, the difference at former "prices, namely, for the captaincy 1,425*l.* Had these "officers, instead of exchanging under the new regu-"lations, sold out under former rules, promotion then "might have gone in the cavalry, and possibly at "regulation; and there could have been claimed of "the public only 100*l.* for every year of their ser-"vice. But that sum, it is understood, these officers "may now claim, *in addition*, on retiring, when "promotion will not go in the cavalry; and con-"sequently to the injury of this branch of the service. "To all the subalterns of the Dragoons these ex-"changes were injurious. They took place, as before "stated, when Lieutenant ——— was not senior "subaltern; but now that he is in that position, if

C. A. Wood, Esq.

14 June 1870.

"he were to insist, as he may, on his right to purchase at regulation, the effect may be to introduce into his regiment more captains from infantry. But in consequence of the late decision, requiring in Indian regiments the absorption on any death vacancy of one captain, if he were now to be wholly withdrawn from purchase, his chance of promotion would be still further postponed; he therefore is retained on the purchase list. I have gone thus fully into his case, because it serves to illustrate the effect of one provision of the late measure which I conceive to be injurious to the public service; I wish, however, to be understood as not objecting to cavalry officers being allowed to exchange to infantry, or to the cavalry qualifications of those by whom the officers in question were replaced. My objection is to the employment of public money to facilitate such arrangements as above described, which, as I contend, have a tendency to keep up rather than bring down excessive cavalry prices. These prices men of moderate means cannot pay, and the authorities have publicly denounced. I, therefore, would respectfully suggest that since the prices of commissions have been equalised, principally with a view to prevent excessive cavalry prices, whenever exchanges from that branch of the service are sanctioned, they may be assumed to be for the convenience of officers, and on this account no payment from any public fund need be made. Lieutenant ————'s case will also serve to illustrate the position of some subalterns who have entered the cavalry in expectation of reduced prices. He entered the army before the late measure, and the refusal to give for his troop over regulation was simply founded on public principle, an adherence to which, unfortunately for him, has delayed his promotion. If, however, it be desired to officer the cavalry by introducing men of moderate means, but possessing in other respects qualities to make good cavalry officers, it is obvious that there should exist a reasonable prospect of their promotion; and that as this class cannot afford to purchase it at the present regimental prices, unless some change be made many young men now entering the cavalry may be greatly disappointed, and have to remain subalterns indefinitely, while there will be introduced over their heads and at the public expense, captains from infantry, into which branch of the service, if a cavalry *subaltern* wishes to exchange, it is understood that for him the opportunity rarely occurs. Instead, therefore, of applying public money in the way complained of, I respectfully submit that any available funds had better be applied towards liquidating sums actually paid *in excess*, provided they did not exceed the amount regimental custom may have established, and which in any case would have to be inquired into by competent and impartial authority." To that letter I received the answer I have already read to the Committee.

1618. (*Mr. Whitbread.*) Did those letters and remonstrances which you said you received come from the officers of the regiment?—Some came from the officers of the regiment and some from relations of officers. I received several during a period of 18 months or two years.

The witness withdrew.

L. Coleman, Esq.

LEONARD COLEMAN, ESQ., further examined.

1619. (*Chairman.*) When you were examined before you referred to a return put in by General Forster of the number of full-pay commissions in each rank in purchase corps which had been absorbed on reduction during the past five years?—Yes.

1620. Under what circumstances did those absorptions take place; were they in consequence of reductions which had been going on during that period?—Yes.

1621. What was the course adopted in order to effect those reductions. Was it the same as that which is adopted in the present reductions, or did it vary in any degree from that?—In 1866 the reductions were made through each rank, every other sale vacancy being absorbed.

1622. At present we have heard that in the case of the purchase vacancies the promotion goes in the regiment in every case, but that every alternate non-purchase vacancy is absorbed?—Yes.

1623. In 1866 only every alternate purchase vacancy went by promotion in the regiment?—Yes.

1624. Do you know whether the absorptions mentioned in this return represent cases in which officers retired receiving, in consequence of the absorption of their commissions, only the regulation price from the Government instead of receiving the regimental price from the officers who under other circumstances would have succeeded them?—I know nothing about the regimental price.

1625. We will assume the existence of a regimental price for the present purpose?—Officers who retired under those circumstances were paid from the Reserve Fund, of course receiving only what is termed the regulation sum.

1626. Will you be good enough to turn to question 1199 in your former evidence?—Yes.

1627. You were asked there whether you could explain the circumstances under which a lieutenant-colonelcy of the 7th Hussars was absorbed, and also in question 1202 a case was referred to of a lieutenant-colonelcy in the 1st Foot being absorbed. You did not then remember the circumstances; have you looked into those cases since?—I have.

1628. Are you able to state the facts?—In the former case an officer retired upon half pay, and was not succeeded.

1629. He retired upon half pay from the command of a regiment?—Yes, and his commission was absorbed. In the second case an officer retired upon full pay, and was not succeeded.

1630. By regulation those officers would receive nothing at all, would they?—We recognise no money passing at all.

1631. By this return, according to the summary at the end, it appears that the commissions of two lieutenant-colonels, 28 captains, 89 lieutenants, and 180 ensigns have been absorbed with purchase vacancies during those five years?—Yes.

1632. In those cases what was paid to the officers whose commissions were so absorbed, and out of what fund was it paid?—It was paid out of the Reserve Fund; they were paid what is termed the regulation sum.

1633. Then did they receive the regulation price only of their commissions?—I presume so. That is the only matter we know anything of.

1634. No officer succeeded in the regiment to any of those vacancies?—No.

1635. But at present, in the case of purchase vacancies officers succeed as usual?—Yes, as if there were no reduction at all.

1636. But is that a permanent arrangement, or does it depend upon the absorption of the commissions of subalterns in the regiment?—It depends upon whether the subalterns are absorbed. After that will come the question of absorbing the higher ranks.

1637. Then the same course might be resorted to which was resorted to in 1866, namely, of absorbing only every alternate purchase vacancy?—Yes.

1638. If that course were adopted, supposing an officer to wish to retire by the sale of his commission, in every alternate case of that kind he would obtain the regulation price, and the regulation price only, from the Reserve Fund?—Yes.

L. Coleman, Esq.

14 June 1870.

1639. And in case he had paid over-regulation price for his commissions, as there is reason to believe that many officers do, he would necessarily lose that, he could not recover it?—I presume any private arrangement that he may have made would be at his own risk. I know nothing about that.

The witness withdrew.

C. M. Clode, Esq.

CHARLES MATHEW CLODE, ESQ., examined.

1640. (*Chairman.*) Are you solicitor to the War Department?—Yes.

1641. How long have you held that office?—From May 1858.

1642. Are you able to inform us whether within your experience, or before your time by reference to the records of the office, any prosecution has ever been instituted under the Act of the 49th George the Third, chapter 126, against any person either as principal or agent for being concerned in paying more than the regulation price for the purchase of a commission or for an exchange?—If you mean a payment in excess of the regulation, the purchase being one which the regulation sanctioned, my answer is, No. That would be a prosecution under the 8th section of the Act. There has been no such prosecution in my time, and I wrote to Mr. Greenwood, the solicitor to the Treasury, who acted in these matters before the department was separated from the Treasury, and he has made a diligent search through his books from the year 1831, and he can find no trace of any such prosecution.

1643. Are you aware of any prosecution having been instituted under the third and fourth sections of that Act against any person for being concerned, either as principal or agent, in paying money to induce an officer to retire?—Yes; those sections have come under the consideration of the court on several occasions.

1644. I ask whether any prosecution has been instituted, either by the War Department or the Horse Guards, against any person for paying money to an officer to induce him to retire on full or half pay?—No, none.

1645. You referred just now probably to those cases which we have had before us, in which questions have arisen before a court as to the legality of such a transaction in the East India Company's army?—Yes; there has been the case of Graeme *v.* Wroughton, I think, and the case of Eyre *v.* Forbes.

1646. Those cases were not cases of prosecution, but were cases in which persons had sued on bonds given by officers to pay money. Under those circumstances did the court hold the bond to be illegal, because the transaction was illegal under the third and fourth sections of the Act?—Quite so.

1647. That is a totally different thing, is it not, from the prosecution of a person?—Quite different.

1648. No such prosecutions have taken place?—The only prosecution was the Queen *v.* Charretie, which arose upon an East Indian commission. It is reported in the 13th volume of the Queen's Bench Reports. That was in the year 1849, I think; and there was also the case of the Queen *v.* Armstrong, which is unreported, but which arose in the year 1859.

1649. Both those were East India cases, were they not?—No, the last was an army case.

1650. What was the nature of the prosecution?—We prosecuted in that case on several transactions. There were a great many militia commissions sold, but the prosecution mainly rested upon the receipt of money for a commission which had been given to one Cunningham.

1651. A first commission?—Yes, an appointment.

1652. That had no reference, had it, to the payment of over-regulation price?—No, none whatever.

1653. (*Mr. Hunt.*) Have instructions ever been given to you to see whether there were materials for a prosecution in a case where over-regulation price has been suspected to have been given?—None.

1654. You have never been instructed to investigate a case of that kind?—No; I have no recollection whatever of any such case.

1655. (*Chairman.*) Have you prepared a memorandum upon the effect of what is called the Brokerage Act, the 49th George the Third, chapter 126, as bearing upon the sale and purchase of commissions?—I have.

1656. Will you be good enough to put it in?—I will. I believe the memorandum contains all the cases that have ever arisen upon the Act in either aspect of it. (*The same was handed in,* App. XIV.)

The witness withdrew.

Adjourned.

APPENDIX.

APPENDIX I.

Memorandum showing the Rules and Regulations under which the Prices of Commissions in the Army have been limited from time to time.

Commissions in the Army have been sold and bought from the earliest period of the existence of a standing Army in England.

The prices originally given appear to have been arbitrary, but the act of sale seems to have been in all cases sanctioned by the Sovereign.

There are in existence clear evidences that all the Sovereigns from Charles II. to George I. objected to the practice, but it doubtless had become so general, and the applications to sell so pressing, that Regulations fixing the prices at which they might be sold were issued in 1719–20.

The prices then fixed, and the various changes which took place up to 1821, are given in Appendix I. to the Report of the Royal Commission of 1857.

The changes which have been made since that date are—

In 1854, the second Lieutenancies in Fusiliers and Rifle Regiments were converted into Ensigncies, and the price of the first Commission reduced from 500*l.* to 450*l.*

In 1856 the purchase of the Field Officers' Commissions in the Foot Guards was abolished, the highest Commission which could be purchased under Regulation being that of Captain and Lieutenant-Colonel, the price of which was maintained at 4,800*l.*

In 1860 it was decided to equalise the prices of the Commissions of the Cavalry of the Line with those of the Infantry of the Line.

The clauses of the Regulations of 1719–20 which limit the prices to be paid are:—

"That whatever officer shall desire leave to sell shall be obliged to resign his Commission at the rates and on the conditions hereafter mentioned; to which end the seller is not to be admitted to interfere, in any manner whatsoever, in the recommendation of his successor."

"Every officer desiring leave to dispose of his Commission shall sign such his request, and that he is content to resign at the price fixed, and lodge the same in the War Office that a successor may be appointed by His Majesty."

In 1766 the prices of the Commissions were altered on the recommendation of a Board of General Officers. The plan adopted by the board in fixing the new prices was, in the first place, to fix "what appeared to them a reasonable "price for the Commissions of Cornet and Ensign in the "respective corps, and which they might probably be sold "for in time of war as well as peace," and then "to esti- "mate every increase of pay after the rate of 100*l.* for "each shilling per diem, in a general view, not attending "minutely to fractional sums; and, in the next place, to "fix a certain proportional value upon each advancement "in rank, such as might, if possible, be extended to all the "different corps."

In making this recommendation the general officers gave their opinion that "if any deficiency should arise, by the "Commissions of Cornet, Ensign, or second Lieutenant not "producing the price allowed by the said estimate, the loss "should be sustained by the officer who obtains leave to "sell."

The warrant of February 1766 promulgating these new prices contained the following clause "that in all cases "where we shall permit any of the Commissions specified "therein to be sold, the sum to be paid for the same shall "not exceed the prices set down in the said Report; and all "Colonels, Agents, or other our Military Officers, are hereby "required and directed to conform strictly and carefully to "the Regulation hereby laid down and established upon "pain of our highest displeasure."

This clause was repeated in the subsequent warrants of July 1772, February 1773.

In 1783 the prices at which Commissions should be sold was again considered, and it was determined to make no change, and in making this fact known to the Army, a general order was issued by the Commander-in-Chief, and the following instructions were added:—

"When an officer is desirous to sell his Commission he is to make application in writing to the Colonel of the regiment he belongs to, or in his absence to the Field Officer commanding the regiment, praying for His Majesty's leave to dispose of his Commission at the regulated price, stating that he thereby means to resign all pretensions to any future rank or promotion in the Army, and solemnly declaring on the word and honour of an officer and a gentleman, that nothing beyond the price limited by His Majesty's Regulations is stipulated or promised, directly or indirectly; and that no other mode of compensation or gratuity is in contemplation of the parties, or shall be given or accepted in respect of such sale or purchase."

This declaration was to be accompanied by another on the part of the Commanding Officer "that he verily believes "the established Regulations with regard to price is in- "tended to be strictly complied with, and that no clandestine "bargain subsists between the parties concerned."

Application in writing was also to be made by the officer desiring to purchase "stating his pretensions accompanied "with a declaration on his part as is herein-before prescribed "with regard to the officer applying for leave to sell; "expressly pledging his word and honour as an officer and "a gentleman that he is not to give, nor will either now, "or at any future time, give by any means, or in any shape "whatever, directly or indirectly, any more than the regu- "lated price.

"And His Majesty has, by the advise of his Board of General Officers, been further pleased to declare his determination, that any officer who shall be found to have given, or to have stipulated or promised, directly or indirectly, to give anything beyond the regulated price, in disobedience of these His Majesty's orders, or by any subterfuge or equivocation to have evaded the same, and to have thereby shamefully forfeited his honour as an officer and a gentleman, shall be dismissed from His Majesty's service."

The forms to be used were,—

"Sir,

"I beg you will be pleased to obtain for me His Majesty's consent to the sale of my commission of

"In case His Majesty shall be graciously pleased to permit the same, my intention is thereby to resign all rights and pretensions to any future rank or promotion in the Army; and I do further declare and certify upon the word and honour of an officer and a gentleman, that I have not demanded or accepted, neither will I demand or accept, directly or directly, at any time or in any manner whatever, more than the sum of *l.*, being the price limited and fixed by His Majesty's Regulations, as the full value of the said Commission."

"Sir,

"I beg you will be pleased to obtain for me His Majesty's permission to purchase the —— ——

"In case His Majesty shall be graciously pleased to permit me to purchase the said Commission, I do declare and certify upon the word and honour of an officer and a gentlemen, that I will not either now or at any future time, give by any means, or in any shape whatever, directly or indirectly, any more than the sum of *l.*, being the price limited and fixed by His Majesty's Regulations, as the full value of the said Commission."

In 1786, three years subsequently, a circular letter was issued, in which occurred these passages:—"In future, "when on officer is desirous of retiring from the service, "either by the sale of his Commission, or by exchange to "the half-pay he shall not make any stipulation in regard to "the particular officer who shall succeed him;" and "it "being evident that by leaving their officers to select their "own successors, and by accepting their nominations, the "business of military promotion has in too many instances "been conducted in such a manner as to defeat the pur- "poses of His Majesty's Regulations, notwithstanding

Appendix I.—*continued.*

" every endeavour of office to enforce their due and punctual " observance."

These Regulations remained in force until 1804, when Circulars were again issued, insisting on compliance with the Regulations. One addressed to all Army agents, and one to officers in command of regiments.

Circular to Army Agents.

" Sir, 28th Sept. 1804.

" His Royal Highness the Commander-in-Chief having the strongest reason to believe (from the advertisements that have frequently appeared in the public papers) that an extensive correspondence is carried on with the officers of the Army by persons styling themselves Army brokers, to induce them to enter into pecuniary engagements for the purpose of obtaining Commissions, contrary to the established Regulations, and it being the earnest desire of the Commander-in-Chief to check, as much as possible, a practice so extremely prejudicial to the Service; I am commanded to call your attention to this important point, and to impress on you the necessity of the utmost vigilance in preventing, as far as may be in your power, any communication whatever with those persons and the officers in your agency, and to acquaint you that, should it at any time appear that any such Commission shall have been negotiated through your office, the Commander-in-Chief will consider it his duty to recommend to the colonels of the respective regiments, to notice such irregularity by withdrawing their regiments from that agency, and placing them in other hands.

" I have it further in command to desire that you may be pleased to convey to the officers commanding regiments in your agency, the most marked disapprobation of His Royal Highness of this improper and secret traffic; and to assure them that, if subsequent to the date of this letter, any Commission shall be discovered to have been so obtained, such Commission will be immediately cancelled, and the officer be reported to the King as having acted in direct disobedience to the orders of the Commander-in-Chief.

I have the honour to be,

To ———, Esq., Army Agent. Sir, Your obedient servant, J. W. Gordon."

Circular to Commanding Officers.

" Sir, 19th October 1804.

" I have the commands of His Royal Highness the Commander-in-Chief to transmit for your information and guidance, a paper containing directions to be henceforth exactly observed in the purchase and sale of all Commissions, according to His Majesty's Regulations, and which you will please to cause to be enforced in the regiments under you command.

Returns of officers prepared to purchase are to be made out in the accompanying form, and to be transmitted, in the first instance, as soon as possible after the receipt of this letter.

I have the honour to be, &c.,

Officer Commanding the ———— Regiment. J. W. Gordon."

Extracts from Regulations enclosed.

" His Majesty's Regulations, in regard to the sums to be given and received for Commissions in the Army, having, in various instances, been disregarded, to the great prejudice of His Majesty's service, His Royal Highness the Commander-in-Chief is pleased to direct, that when an officer is desirous of retiring from the Service and of having leave to sell his Commission, if his regiment is in Great Britain, he is to send his resignation in the usual manner, through the commanding officer of his regiment to his colonel; who, in transmitting the same to the Commander-in-Chief, may at the same time, if there are purchasers in the corps, recommend in succession the seniors of their respective ranks for purchase, both the colonel and commanding officers certifying that they are satisfied that no more than the sum stipulated by His Majesty's Regulations is given or received.

* * * *

" In causing these orders to be circulated to the Army, the Commander-in-Chief thinks proper to declare that any officer who shall be found to have given, directly or indirectly, anything beyond the regulated price, in disobedience to His Majesty's orders, or to have attempted to evade the Regulations in any manner whatever, will be reported by the Commander-in-Chief to His Majesty, in order that he may be removed from the Service; and it is also to be understood that the prescribed forms of application, for the sale and purchase of Commissions, and the usual certificates annexed thereto, are in all instances to be complied with."

These Regulations were of little avail in checking the payment of over-regulation money, and on proof being obtained of the Regulations having been evaded, the opinion of counsel was taken on the subject, which was to the effect, that there was no redress to be obtained from the parties involved, as there was no law to the contrary, and that it did not amount to a misdemeanor.

This resulted in the introduction into the Mutiny Act of 1807 of the clause forbidding the traffic in Commissions, which was as follows:—

47 Geo. 3. cap. 32. cl. 97.

" And whereas as great inconvenience has arisen to His Majesty's service from persons not authorised agents of regiments, troops, or companies, negotiating for the purchase and sale of Commissions, and much larger sums than are allowed by His Majesty's Regulations are often given and received for Commissions, and great frauds committed, be it therefore enacted, that every person not an authorised agent of any regiment, troop, or company, who shall negotiate or act as agent for or in relation to the purchase or sale of any Commission in His Majesty's Forces, and also every authorised agent as aforesaid, who shall take, accept, or receive any commission or sum of money or reward for negotiating the purchase or sale of any such Commission, or acting as an agent in relation thereto, shall forfeit for every such offence the sum of one hundred pounds, and treble the sum which shall be given or received for or in relation to any such Commission over and above the sum allowed by His Majesty's Regulations."

The celebrated inquiry into trafficking in Commissions followed in 1809, and in that year was passed the Act inflicting a punishment upon all officers of the Army paying sums in excess of the regulated prices on their promotion.

The Act is 49 Geo. 3. cap. 126., and is entitled " An Act for the further Prevention of the Sale and Brokerage of Offices."

It extends the provisions of 5 & 6 Edw. 6. cap. 16. to other offices.

Clauses 7 and 8 deal with the question of Commissions in the Army, and stand thus:—

" 7. Provided always, and be it further enacted, that nothing in this Act contained shall extend or be construed to extend to any purchases, sales, or exchanges of any Commissions or appointments in the Honourable Band of Gentlemen Pensioners, or in His Majesty's Yeoman Guard or in the Marshalsea, and the Court of the King of the Palace of the King at Westminster, or to extend to any purchases, sales, or exchanges of any Commissions in His Majesty's Forces for such prices as shall be regulated and fixed by any regulation made or to be made by His Majesty in that behalf, or to any act or thing done in relation thereto by any agents, provided that such agents shall be agents of regiments authorised by the Commander-in-Chief of His Majesty's Forces, or by Colonels or Commandants of regiments or corps, and shall act therein under such Regulations only as are or shall from time to time be established by His Majesty, and shall not cause or procure or knowingly permit or suffer to be printed or advertised any advertisement or advertisements, proposal or proposals, for any purchase or sale or exchange of any Commission, or any negotiation relating thereto, and shall not receive or take any money, fee, gratuity, or reward, or any promise, agreement, covenant, contract, bond, or assurance, or by any way, means, or device contract or agree to receive or have any money, fee, gratuity, or reward for acting in such behalf.

" 8. Provided also, and be it further enacted, that every officer in His Majesty's Forces who shall take, accept, or receive, or pay, or agree to pay, any larger sum of money, directly or indirectly, than what is allowed by any Regulations made by His Majesty in relation to the purchase, sale, or exchange of Commissions in His Majesty's Forces, or who shall pay or cause to be paid any sum of money to any agent or broker, or other person for negotiating the purchase, or sale, or exchange of any such Commission shall, on being convicted thereof by a general court-martial, forfeit his Commission, and be cashiered; and as an encouragement for the detection of such practices, such Commission so forfeited shall be sold, and half the regulated value (not exceeding five hundred pounds) shall be paid to the informer, and the other half, or the remainder, if more than five hundred pounds, shall go and be applied as His Majesty shall order and direct by any Regulations made from time to time in that behalf: Provided also, that every person who shall sell his Commission in His Majesty's

Appendix I.—*continued.*

Forces, and not continue to hold any such Commission in His Majesty's Forces, and shall upon or in relation to such sale take, accept, or receive, directly or indirectly, any money, fee, gratuity, loan of money, reward, or profit, or any promise, agreement, covenant, contract, bond, or assurance, or shall by any device or means contract or agree to receive or have any money, fee, gratuity, loan of money, reward or profit beyond the regulated price or value of the Commission sold, and also every person who shall wilfully or knowingly aid, abet, or assist such person therein shall be deemed and adjudged guilty of a misdemeanor within the provisions of this Act.

On the passing of this Act a general order was issued to the Army, dated 29th July 1809, reciting in full the above given clauses, with this instruction:—

"It is the Commander-in-Chief's Order that the following extract from an Act of Parliament, dated 20th June 1809, 'for the prevention of the sale and brokerage of offices,' shall be circulated for the information and guidance of the officers of the Army."

In the year 1815, in the second Mutiny Act passed that year, the clause against trafficking in Commissions was considerably strengthened and assimilated to the clause in the Act of 1809, by the insertion of these words:—

"And every person, whether authorised or not, as agent to some regiment, troop, or company, who shall take, accept, or receive any commission, sum of money, or reward for any negotiation relative to the purchase, sale, or exchange of any Commission in His Majesty's Forces, or who shall negotiate or bargain for or receive for his own use, or for the use of any other person or persons, any sum of money or other consideration, above the amount of the price allowed by His Majesty's Regulations for the purchase, sale, or exchange of any such Commission, or any sum of money or other consideration where no price shall be allowed by His Majesty's Regulations, shall for every such offence forfeit the sum of one hundred pounds, and treble the value of such sum of money or other consideration as he shall negotiate, bargain for, or receive above the amount of the price allowed by His Majesty's Regulations for such Commissions, in such cases where any price shall be allowed by His Majesty's Regulations, or treble the value of the sum or other consideration negotiated, bargained for, or taken and received in such cases in which no price shall be allowed by His Majesty's Regulations."

On 1st August 1821, His Majesty George IV. approved the new prices of Commissions, recommended by a Board of General Officers specially assembled to consider the question. The Board was presided over by the Duke of Wellington, and suggested that the price of every Commission in the Army should be raised.

Their reasons were given in their Report as follows:—

"We, the undersigned General Officers, having had a meeting thereupon and it appearing to us upon due investigation that the pay of Officers of certain branches of the Army has been increased since the above-mentioned Regulation of 1766; that the rates of half-pay have in like manner been increased; and that Commissions in the Army are of a higher value than that fixed for them by the aforesaid Regulations; we consider it to be expedient to revise the prices of the several commissions in the Army as fixed by such Regulation of 1766, as well as the difference between full and half pay in the Dragoons and Infantry, with a view of adapting the same to the present circumstances and the general interests of the Service.

"And we do accordingly most humbly offer to Your Majesty the following estimate, wherein the sum proper to be given for each of the Commissions referred to our consideration is, according to the best of our judgment, apportioned: And we are unanimously of opinion that the same, if it shall meet Your Majesty's Royal approbation, should be uniformly observed in the respective corps, whenever Your Majesty shall in your good pleasure permit such Commissions to be sold."

The prices of the Infantry Commissions were altered thus:—

——	1766.	1821.
	£	£
Lieutenant-Colonel - -	3,500	4,500
Major - - - -	2,600	3,200
Captain - - - -	1,500	1,800
Lieutenant - - -	550	700
Ensign - - - -	400	450

In the following January 1822, a complete collection of General Regulations and Orders for the Army was issued. They repeated verbatim those of 1804, above quoted, and included the forms of declaration to be made by Officers, and also the citations from the Act of 1809.

On 15th March 1824 a debate on the Mutiny Bill took place in the House of Commons, which was introduced by Mr. Hume. He urged that "there was scarcely one case in "ten in which officers received their Commissions at the "regulated price, though they thus certified that fact. "The Commander of the Forces and the Secretary at War "could not be ignorant of what was done, and ought "therefore to cancel such a useless declaration."

Sir H. Hardinge stated:—"That the regulation was "introduced to prevent the constant traffic in Commis- "sions, by which the Officers of the Army had been most "seriously injured. Under these regulations it was impos- "sible for a junior officer, however rich, to step over the "head of a senior officer, so long as the latter had the "means of putting down the stipulated price for his Com- "mission. It was certainly fitting in altering the system "to take care that the door should not be again opened to "that extensive jobbing which prevailed before the certifi- "cate was introduced."

Lord Palmerston stated:—"That the existing inconve- "niences had been for some time felt, and an attempt had "been made to remedy them by increasing the price of "Commissions. Still, however, in a case in which a num- "ber of officers were exposed to a temptation to which "they ought not to be subject, it was considered desirable "that the declaration should be recalled. Of course when "he said that this recall was under consideration, he should "not be understood to describe any specific measure which "it was intended to adopt." (Hans. Parl. Deb., 2s. v. 10.)

On the 2nd of April following, a memorandum was submitted to the King proposing the abolition of the forms of declaration hitherto required, and eliminating from the regulations all the words calling for them, substituting the following rules:—

That in order to prevent undue traffic in the sale, purchase, and exchange of Commissions, and the payment of prices exceeding the present regulations, the following shall be established and promulgated, under the sanction of His Majesty's authority, to the Army, in substitution of such parts of the existing regulations as it would be necessary to cancel in order to give effect to this arrangement.

That the forms of application for permission to sell a Commission in the Army, for the purchase of promotion, and for permission to exchange, as now prescribed by His Majesty's General Regulations and Orders for the Army, pages 53, 54, and 55, should be abolished.

That the quarterly returns of officers who are desirous of purchasing promotion, either in their own corps or in any other regiment, should continue to be sent in, as at present, according to the form prescribed in page 52 of the said Regulations and Orders, with the addition of the following certificates, signed by the Colonel or Commanding Officer of the regiment.

First. That he has ascertained by reference, through the Regimental Agent to the responsible persons, that in each case there is good and sufficient security that the purchase money will be forthcoming when called for.

Second. That of the individuals so returned as purchasers, A, B, C, &c. are in all respects deserving of promotion and those whom he would not hesitate to recommend, whenever the vacancy shall offer, as fit for the duties of the higher and more responsible Commission.

When the regiment and commanding officer are abroad, the commanding officer to state the security to which reference is made, and the Military Secretary will ascertain through the agents whether that security be good and sufficient, it being understood that if the answer be not at once satisfactory, the individual will be struck out of the list of purchasers.

That this Quarterly Return, so certified, shall be the only communication made on the subject of promotion by purchase, and that when a resignation is sent in, it shall be considered unconditional and irrevocable, and no successor shall be pointed out or recommended. In all cases the individual selected for the purchase, or his sureties, will be called upon to lodge the purchase money with the agents.

If the senior who may have been returned as a purchaser, and whose money shall have been certified to be forthcoming, should decline the purchase when selected for it, or his sureties should decline it for him, he or they will be called upon to state the reason for so declining to the Military Secretary, for the Commander-in-Chief's informa-

Appendix I.—*continued.*

tion, and if the explanation should not be considered satisfactory, his name will be struck out of the future list of purchasers.

The candidate who may be selected from reference to the Quarterly Returns, for the purchase of promotion out of his own corps, will be directed to lodge the purchase money without being acquainted in what regiment he is to obtain the promotion, nor will any application for purchase of promotion which point out the expected vacancy be admitted.

In all cases of exchanges between officers, both on full pay, whether of Cavalry or Infantry, or from Cavalry to Infantry, the recommendations must be signed by the Colonels or commanding officers of the respective regiments, accompanied by a declaration, signed by the individuals and certified by the Colonels or commanding officer, that "they do not intend to sell out or retire upon half pay "after effecting such exchange, but that it is their *bonâ fide* "intention to join and do duty with the corps to which they "exchange immediately. The leave of absence that may "have been granted to either, or both, being cancelled by "such exchange."

That no officer of Cavalry who shall apply for permission to retire on half pay will be permitted to receive the difference between full pay of Cavalry and full pay of Infantry, but his exchange will be viewed as being, to all intents, an exchange to the half pay of his own branch of the Service, receiving the difference between full and half pay, and subject to the restrictions applicable to such exchanges.

That in exchanges to half pay, either with or without the differences, or from Cavalry to Infantry, the application must be general and unconditional, and the officer upon full pay will not be allowed to point out his successor, who will be indiscriminately selected by the Commander-in-Chief without any previous notice to the parties.

It is further most humbly submitted to His Majesty that it shall be declared that in all cases when the Regulations shall appear to the Commander-in-Chief to have been infringed or evaded, the promotion or exchange shall be at once cancelled; and in all cases where proof can be obtained that the provisions of the Act 49 Geo. 3. c. 126, and the 134th Clause of the Mutiny Act have been infringed, the Commander-in-Chief will take measures for giving full effect to the penalties which attach to such offence.

Approved,

2nd April 1824. G.R.

These were forwarded to the Adjutant-General on 5th April by the Military Secretary with a letter to this effect:—

"Sir,

"His Majesty having been graciously pleased to signify his pleasure that the forms of application for the sale, purchase, and exchange of Commissions hitherto prescribed in pages 53, 54, 55, of the General Regulations and Orders of the Army should be abolished, and that certain alterations and additions should be made in the existing Regulations with a view to prevent undue traffic in the sale, purchase, and exchange of Commissions, I am directed by the Commander-in-Chief to submit to you enclosed the Regulations as altered and amended, and to desire that you will circulate the same to the Army with His Majesty's commands that they may be substituted for those contained under the head of 'appointment of persons to Commis-'sions in the Army,' &c., &c., from page 45 to 56.

(Signed) H. Taylor."

The pages 53, 54, 55, alluded to, are those containing the forms of declaration.

In the year 1829 the clause in the Mutiny Act was condensed, the preamble omitted, and made to stand thus,—

And be it enacted "that every person not being an "authorised Army agent, who shall negotiate or act as "agent for or in relation to the purchase, sale, or exchange "of any Commission in His Majesty's Forces, shall forfeit "for every such offence the sum of one hundred pounds; "and every person whether authorised or not as an Army "agent who shall receive any money or reward in respect "of any such purchase, sale, or exchange, or shall negotiate or receive for any purpose whatever any money or "consideration where no price is allowed by His Majesty's "Regulations, or any money or consideration exceeding "the amount so allowed, shall forfeit one hundred pounds, "and treble the value of the consideration where the Commission is not allowed to be sold, or treble the excess of "such consideration beyond the regulated price."

The clause has been inserted in every Mutiny Act passed since 1829 to the present time.

In the year 1837 a new edition of the King's Regulations was issued, and two of the most important of the regulations which were introduced in 1824 were omitted, viz.:—

"The quarterly return so certified is to be the only communication made on the subject of promotion by purchase; and when a resignation is sent in, it will be considered unconditional and irrevocable, and no successor is to be pointed out or recommended."

And, "The candidates who may be selected from reference to the quarterly returns for the purchase of a promotion out of their own corps will be directed to lodge the purchase money, without being acquainted in what regiment they are to obtain the promotion; nor will any application for the purchase of promotion, which points out the expected vacancy, be admitted."

Until the year 1866 the prices of Commissions had been regulated by General Orders issued by the Commander-in-Chief. The compilation of these General Orders issued from time to time is called the King's or Queen's Regulations and Orders for the Army; they chiefly relate to discipline and the internal economy of the service.

The financial rules and regulations of the Army were contained in Royal Warrants, promulgated by the Secretary at War, or the Secretary of State. A complete codification of these, so far as they governed pay and promotion, was issued in 1866, and the prices of Commissions were for the first time included in the Pay Warrant, and were no longer regulated by the Queen's Regulations.

The new edition of the Queen's Regulations was issued in 1868, Art. 137 of which thus refers to this change:—

"The Royal Warrant for the pay, promotion, &c. of the Army contains the general Regulations regarding the purchase and sale of military Commissions, and the rules by which the appointment, promotion, exchange, and retirement of officers are governed."

In transferring the regulations which fixed the prices of Commissions from the Queen's Regulations to the Royal Warrant, the quotations from the Act of 1809 were dropped, and special attention was no longer drawn to the stringent provisions of that Act against the payment of over-regulation prices.

APPENDIX II.

General Order of August 1783, containing Regulations for Purchase and Sale of Commissions.

Orders.

Head Quarters, 14th August 1783.

His Majesty having referred to his board of general officers to consider whether any alteration should be made in the prices of commissions as fixed by His Majesty's Regulations; and also of the most proper means to confirm and make effectual His Majesty's former directions on that subject; and the report and opinion of the said board having been approved by the King; the Commander-in-Chief has, in consequence thereof, received His Majesty's orders to signify his royal pleasure to the several colonels of regiments, that the following regulations relative to the buying and selling, or exchanging of commissions, be for the future strictly and invariably adhered to throughout every corps in His Majesty's service, the troops of Horse Guards and Horse Grenadier Guards, and the royal regiment of Horse Guards excepted.

The prices of commissions are to remain the same, as apportioned and fixed by His Majesty's former regulations.

When an officer is desirous to sell his commission he is to make application in writing to the colonel of the regiment he belongs to, or, in his absence, to the field officer commanding the regiment, praying for His Majesty's leave to dispose of his commission at the regulated price, stating that he thereby means to resign all pretensions to any future rank or promotion in the army, and solemnly declaring, on the word and honour of an officer and a gentleman that nothing beyond the price limited by His Majesty's regulation is stipulated or promised, directly or indirectly, and that no other mode of compensation or gratuity is in

Appendix II.—*continued.*

contemplation of the parties, or shall be given or accepted in respect of such sale or purchase. This application is to be transmitted by the colonel, if in Great Britain, or else by the commanding officer of the regiment, to the adjutant general, when His Majesty shall think fit to entrust to any officer the command in chief of his forces; otherwise to the Secretary at War, accompanied with a declaration from the said colonel or commanding officer of the regiment, that he verily believes the established regulation with regard to price is intended to be strictly complied with, and that no clandestine bargain subsists between the parties concerned.

The same mode is to be observed in all cases of exchange from half-pay to full-pay, as well as of exchange from one corps to another.

The colonel or commanding officer is at the same time to transmit the names of such officers in the regiment as are willing to purchase in succession, and as he shall recommend for that purpose.

But when the Officers recommended are not the eldest in their rank, he must signify his reasons why the senior officers are not recommended.

Application in writing must also be made by the officer who desires to purchase, stating his pretensions, accompanied with the like declaration on his part as is hereinbefore prescribed with regard to the officer applying for leave to sell, expressly pledging his word and honour as an officer and a gentleman, that he is not to give, nor will, either now or at any future time, give, by any means, or in any shape whatever, directly or indirectly, any more than the regulated price.

And His Majesty has, by the advice of his board of general officers, been further pleased to declare his determination that any officer who shall be found to have given, or to have stipulated or promised, directly or indirectly, to give anything beyond the regulated price, in disobedience to these His Majesty's orders, or by any subterfuge or equivocation to have evaded the same, and to have thereby shamefully forfeited his honour as an officer and a gentleman, shall be dismissed from His Majesty's service.

The above orders are to be regularly entered in the orderly book of each regiment, together with the particular forms hereunto annexed, which are to be made use of by all officers who may hereafter have occasion to apply to their respective commanding officers in any of the cases referred to therein.

By order of the
COMMANDER-IN-CHIEF.

FORM to be made use of by officers when they apply to their respective commanding officers for leave to sell their commissions.

SIR,

I BEG you will be pleased to obtain for me His Majesty's consent to the sale of my commission of

[Here he is to specify the commission intended to be disposed of, adding, in case he may have purchased it, the following words, "which I purchased;" and if not, such other reasons as he may have to offer as grounds of his pretensions to that indulgence. After having fully stated these, he is to add as follows, viz.]

In case His Majesty shall be graciously pleased to permit the same, my intention is thereby to resign all right and pretension to any future rank or promotion in the army; and I do further declare and certify upon the word and honour of an officer and a gentleman that I have not demanded or accepted, neither will I demand or accept directly or indirectly, at any time, or in any manner what, ever, more than the sum of £
being the price limited and fixed by His Majesty's Regulation, as the full value of the said commission.

FORM to be made use of by officers when they apply to their respective commanding officers for leave to purchase commissions.

SIR,

I BEG you will be pleased to obtain for me His Majesty's permission to purchase the

[Here he is to specify the commission he is desirous of purchasing, also the particular grounds on which he founds his application, after having stated which he is to add as follow, viz.]

In case His Majesty shall be graciously pleased to permit me to purchase the said commission, I do declare and certify, upon the word and honour of an officer and a gentleman, that I will not, either now or at any future time, give by any means, or in any shape whatever, directly or indirectly, any more than the sum of £
being the price limited and fixed by His Majesty's Regulation, as the full value of the said commission.

FORM to be made use of by officers when they apply to their respective commanding officers for leave to exchange their commissions with officers on half-pay.

SIR,

I BEG you will be pleased to obtain for me His Majesty's permission to exchange with

[Here he is to mention the officer's name and rank with whom he is desirous of exchanging (who must of course be of the same rank with himself), and the number or name of the reduced corps to which he belongs, assigning, at the same time, his reasons for making the application for such exchange, &c., after which he will add as follows, viz.]

In case His Majesty shall be graciously pleased to permit me to make the said exchange, my intention is thereby to resign all right and title to any future promotion or provision in the army; and I do further declare and certify, upon the word and honour of an officer and a gentleman, that I will not, either now or at any future time, demand or accept, by any means, or in any shape whatever, directly or indirectly, any more than the sum of £ ,
being the difference between the value of my commission and that of the said half-pay, as the same is limited and fixed by His Majesty's Regulation.

N.B.—In a case where an officer means to go from full to half-pay without taking any difference, the same is to be expressly stated in his letter of application to the commanding officer for leave to make such exchange, in consideration of which he will not forfeit his pretensions in the army, but may apply upon any proper occasion afterwards to be reinstated in it.

The above application is to be accompanied with one drawn up in the same form (*mutatis mutandis*) by the half-pay officer with whom the exchange is proposed to be made.

By order of the
COMMANDER-IN-CHIEF.

No. 6.—PRICES of COMMISSIONS, as apportioned and fixed by His Majesty's Regulations.

War Office, 14th of August 1783.

		Full Price of Commissions.	Difference in Value between the several Commissions in succession.	Half-pay at 10 Years' Purchase.	Difference in Value between Half-pay and Full Pay.

RICHARD FITZPATRICK.

APPENDIX III.

CLAUSES OF THE WARRANT OF FEBRUARY 1866, REGULATING PAY AND PROMOTION.

PART 1.—PAY AND PROMOTION.—DIVISION I.—OFFICERS.

SECTION I.—APPOINTMENT, PROMOTION, AND RETIREMENT OF COMBATANT OFFICERS.

I.—General Officers.
II.—Field Officers.
III.—Captains.
IV.—Regimental Promotion.
V.—Rank on Retirement.
VI.—Promotion on the Half-Pay List.

I.—GENERAL OFFICERS.

Separate lists of officers.

1. The names of General Officers shall be borne upon two separate lists. The first shall contain the names of those on the establishment; and, *in italics*, the names of those who, having been promoted specially, are supernumerary to the establishment. The second shall contain the names of those who remain on the half-pay of their last regimental Commission.

Establishment.

Establishment of General Officers.

2. The establishment of General Officers shall be as follows for the four branches of our Service, which shall be kept distinct for the purposes of promotion:—

Ranks.	Branches. 1. Guards and Line.	2. Artillery.	3. Engineers.	4. Marines.	Total by Ranks.
Generals	52	6	3	2	63
Lieutenant-Generals	84	10	5	3	102
Major-Generals	136	16	8	5	165
Total by Branches	272*	32†	16‡	10	330

* To be hereafter increased from the Indian Staff Corps.
† To be hereafter increased from the Royal (late Indian) Artillery.
‡ To be hereafter increased from the Royal (late Indian) Engineers.

Field Marshal.

3. The rank of Field Marshal shall be conferred without reference to seniority.

Promotion of General Officers.

4. Promotion on the establishment from the rank of Lieutenant-General to that of General, and from the rank of Major-General to that of Lieutenant-General, shall be made, as vacancies occur in the respective branches, according to seniority.

Promotion to the Establishment.

5. Every vacancy on the establishment of General Officers shall be filled by the promotion of the senior qualified Colonel of the same branch of the Service, or by the transfer of a General Officer of the same branch from the Supernumerary List, as provided in Article 12.

Colonel's qualification for promotion.

6. A colonel shall be qualified for promotion to a vacancy on the establishment of Major-Generals after—

a. Actual service for five years as a Regimental Field Officer, or as mounted officer of the Foot Guards.

b. Actual service on the Staff for five years as a substantive Field Officer in one or more of the following appointments:—

Deputy Adjutant-General.
Deputy Quartermaster-General.
Military Secretary of the Viceroy of India.
Inspector-General of Militia.
Inspector-General of Volunteers.

Appendix III.—*continued.*

Assistant Adjutant-General.
Assistant Quartermaster-General.
Military Secretary, or Assistant Military Secretary, where there shall be no Military Secretary, to a General Officer exercising supreme command on a station, or to a Plenipotentiary abroad.
Deputy Director of Works.
Superintendent of the Barrack Department.
Deputy Inspector of Volunteers.
Commissioner to the Head-quarters of an allied army.
Military Attaché to a Foreign Embassy.
Member of the Council of Military Education.
Commandant of the Cadets' College, Sandhurst.
Commandant of the Staff College, Sandhurst.
Major and Superintendent of Studies at the Cadets' College, Sandhurst.
Deputy Assistant Adjutant-General.
Deputy Assistant Quartermaster-General.
Major of Brigade.
Member of the Ordnance Select Committee.
Assistant Inspector of Volunteers.
Inspector of Clothing.
Military Superintendent of a Manufacturing Department.

Or in such other like appointment as shall from time to time be specially approved by Our Secretary of State for War and Commander-in-Chief.

c. Service for eight years, with rank not below that of Lieutenant-Colonel, and the substantive rank of Field Officer, as Equerry to the Sovereign.

d. Uninterrupted service, either regimental or on the Staff, from the date of promotion to the rank of Field Officer by brevet for service in the field, to the date of succession to the rank of Major-General.

Promotion without qualifying service.

e. Service, as specified in paragraphs *a*, *b*, or *c*, with the rank of Regimental Field Officer or, as mentioned in paragraph *d*; if the Officer be obliged to go on half-pay before having completed the qualifying period on account of reduction or of ill health contracted in and by Our service (as certified by a Medical Board), or on account of wounds received in action.

When Staff service shall count.

7. An Officer's Staff service shall reckon towards the qualifying period for the establishment from the date of his Commission to the Staff, or, if not commissioned, from the date of assuming duty at home, or of embarking for a staff appointment abroad, and until the date of disembarkation, if he shall return home without delay. Acting Staff Service shall not reckon unless the appointment shall be subsequently confirmed.

Colonels disqualified.

8. An officer shall not succeed to a vacancy on the establishment of Major-Generals who shall be on half-pay and shall have received the difference in value between a half-pay and a full-pay Commission without having previously paid it; or who shall have gone on half-pay at his own request in time of war before completing an aggregate full-pay service of thirty years, of which period five years shall have been with the rank of Regimental Field officer.

Supernumeraries.

By temporary commissions.

9. Temporary Commissions, as General, Lieutenant-General, or Major-General, may, for the convenience of Our service, be conferred, without regard to seniority, on Lieutenant-Generals, Major-Generals, and Colonels respectively; and if the Officer during the continuance of such temporary command shall have conducted himself to Our satisfaction, the rank so held may, upon the recommendation of Our Commander-in-Chief, be converted into permanent rank, after having been held for five years in time of peace, or for any shorter in the field during war.

Rank of Temporary Major-Generals *inter se.*

10. Colonels appointed to act temporarily as Major-Generals shall take rank among themselves, while so temporarily acting, according to the dates of their Commissions as Colonels. They shall rank as junior to all permanent Major-Generals, but as senior to all Brigadier-Generals.

By distinguished service in the field.

11. Promotion may be conferred upon a Lieutenant-General, Major-General, or Colonel, without regard to seniority, for distinguished service in the field; in such case the recommendation of Our Commander-in-Chief, detailing the services for which the Officer is promoted, shall be published in the General Orders of the Army and in the "London Gazette."

Not to form part of establishment.

12. An officer not below the rank of Colonel, promoted after temporary service in a higher rank or for distinguished services in the field, shall be placed on the Supernumerary List, and shall not be placed on the establishment in his new rank until the time when he would have attained such rank by seniority; that is to say, so soon as the qualified surviving Officer who stood next senior on the list to the officer promoted under Article 9 or 11 shall have attained the same rank on the establishment, the next vacancy shall be filled by the transfer of the supernumerary General Officer to the establishment.

Transfer to establishment.

13. A supernumerary General Officer absorbed under Article 12 into the establishment shall have seniority according to the date of his permanent rank as Major-General, and shall rise to be Lieutenant-General and General, whether before or after his absorption into the establishment in accordance with that seniority.

Seniority on absorption into establishment.

On the Half-pay of former Commissions.

Promotion of Colonels not qualified for fixed establishment.

14. When a vacancy on the establishment of General Officers shall cause the promotion of a Colonel qualified for such promotion, under Article 6, or the transfer of a supernumerary Major-General to the establishment, under Article 12, every Colonel of the same branch who shall be senior to the Officer so promoted or transferred, but who shall not be qualified, in the terms laid down in Article 6, for promotion to the establishment of General Officers, shall be promoted to the rank of Major-General, but shall continue to receive only the half-pay of his last regimental Commission, unless he shall desire, with the approval of Our Secretary of State for War, to remain on the list of Colonels, and shall not be holding a qualifying appointment.

Quondam temporary Major-Generals.

15. A Colonel who shall vacate an appointment as temporary Major-General (under Article 9), and whose temporary rank shall not have been made permanent, may, with the approval of Our Commander-in-Chief, be made an honorary Major-General, and shall retain that rank until he succeed (if qualified under Article 6) to the establishment in virtue of his seniority on the list of Colonels.

Promotion to Lieutenant-General and General.

16. A Major-General on the half-pay of a former Commission shall be promoted to be Lieutenant-General, and similarly a Lieutenant-General to be General, when the surviving Officer on the establishment who was next junior on the list of Colonels shall obtain such promotion.

Brigadier-General.

Brigadier-General.

17. The rank of Brigadier-General shall be conferred as local or temporary rank only.

18. Colonels appointed to act temporarily as Brigadier-Generals shall take rank among themselves, while so temporarily acting, according to the dates of their commissions as Colonels.

Amalgamation of British and Indian Establishments.

List A. General Officers.

19. There shall be a List (A.) of Indian General Officers, to which all Indian Officers shall be promoted from the present Indian List, until all who were Colonels in the Indian Royal Artillery or Engineers, or Lieutenant-Colonels in Our Indian Staff Corps, before the 18th February 1861 shall have succeeded to the rank of Major-General according to Indian regulations. Major-Generals shall rise on this list until transferred under Articles 24 or 27.

20. There shall also be three other lists as follows:—

Lists B., C., D., Colonels &c.

(B.) A list of all Colonels of British Cavalry, Guards and Line, and of those Colonels of Indian Staff Corps who had not attained the rank of Lieutenant-Colonel before the 18th February 1861.

(C.) A list of Colonels and Officers of lower rank of Royal Indian Artillery, promoted on or after 18th February 1861.

(D.) A list of Colonels and Officers of lower rank of Royal Indian Engineers, promoted on or after 18th February 1861.

Lists E. and F.

21. From (B.) promotion shall be made direct to the British Establishment.

From (C.) promotion shall be made intermediately to a List (E.) of General Officers of Indian Artillery.

From (D.) promotion shall be made intermediately to a List (F.) of General Officers of Indian Engineers.

Promotion to British Establishment.

22. When the junior Officer on Lists (C.) and (D.) respectively shall have been promoted to Lists (E.) and (F.), promotion shall thenceforward be made to the British Establishment, the Officers on such lists being incorporated with it.

Further increase of British Establishment.

23. When a vacancy shall occur on List (A.), to which a Colonel of the Staff Corps on List (B.) would have succeeded had promotion to List (A.) been continued, an addition of one shall be made to the first branch of the British Establishment, by the promotion to it of the senior qualified Colonel of that branch on List (B.), whether he

Appendix III—*continued.*

be a British Officer or an Officer brought in from the Staff Corps. This shall continue until the number of General Officers added to the British Establishment, including the first transfer, shall be one for every twenty-eight Combatant Officers in the three Staff Corps.

Transfer of General Officers of Staff Corps to British Establishment.

24. On the first such addition being made under Article 23, the General Officers of the Staff Corps on List (A.) shall be transferred to the British Establishment, which shall be increased by the same number as the Indian Establishment will be diminished by such transfer.

Extinction of List A.

25. Promotion into List (A.) shall, after the transfer provided for in Article 24, be limited to Officers of Cavalry and Infantry of Our late Indian Army, who shall not have joined Our Indian Staff Corps.

Maintenance of proportions after amalgamation.

26. As the number of General Officers on the first branch of the British Establishment increases, under the operation of Art. 23, the establishment of Generals, Lieutenant Generals, and Major-Generals shall be from time to time so adjusted as to maintain as nearly as may be the proportions now existing in the British service; but any reductions that may be requisite shall be made only by gradual absorption of every third vacancy amongst supernumeraries in the higher grades.

Intermediate Establishments of Indian Artillery and Engineers.

27. The establishments of Lists (E.) and (F.) shall be as follows:

	Artillery (E.)	Engineers (F.)
Generals - - -	5	2
Lieutenant-Generals - -	8	4
Major-Generals - - -	13	6
Total - -	26	12

If on the formation of Lists (E.) and (F.) a greater number of Officers shall be transferred from the present Indian List (A.) than the above Establishments, the supernumeraries shall be reduced by the absorption of every third vacancy; but if only a smaller number than the Establishment shall be transferred, then the deficiency shall be made up by the promotion of the senior qualified Colonel in the Royal (Indian) Artillery or Royal (Indian) Engineers, as the case may be.

New Establishment for Artillery and Engineers.

28. Upon the incorporation of Lists (E.) and (F.) with the British Establishment, the number of General Officers of Royal Artillery shall be fixed at 58, and of Royal Engineers at 28, and promotion shall thenceforward be regulated by Art. 5.

	Royal Artillery.	Royal Engineers.
Generals - - -	11	5
Lieutenant-Generals - -	18	9
Major-Generals - - -	29	14
Total - -	58	28

II.—Field Officers.

Colonels.

Promotion to Colonel.

29. A Lieutenant-Colonel may attain the rank of Colonel—

a. By regimental succession in Our Artillery, Engineers, or Marines.

b. By brevet on appointment to be one of Our Aides-de-Camp.

c. By brevet as a reward for distinguished service in the field.

d. By brevet after serving five years upon full pay with the substantive rank of Lieutenant-Colonel, or five years as a Major and Lieutenant-Colonel, or as Major in the Household Cavalry; or as a Mounted Officer of the Foot Guards.

e. By brevet after five years' satisfactory service as substantive Field Officer (with the rank of Lieutenant-Colonel) as—

Deputy Adjutant-General.
Deputy Quartermaster General.
Military Secretary to the Viceroy of India.
Inspector-General of Militia.
Inspector-General of Volunteers.
Assistant-Adjutant General.
Assistant Quartermaster General.
Military Secretary (or Assistant Military Secretary where there shall be no Military Secretary) to a General Officer exercising supreme command on a station, or to a Plenipotentiary abroad.
Deputy Director of Works.
Superintendent of the Barrack Department.
Deputy Inspector of Volunteers.
Commissioner to the Head-Quarters of an allied Army.
Military Attaché to a Foreign Embassy.
Member of the Council of Military Education.
Commandant of the Cadets' College, Sandhurst.
Commandant of the Staff College, Sandhurst.
Major and Superintendent of Studies at the Cadets' College, Sandhurst.
Deputy Assistant Adjutant-General.
Deputy Assistant Quartermaster-General.
Major of Brigade.
Member of the Ordnance Select Committee.
Assistant Inspector of Volunteers.
Inspector of Clothing.
Military Superintendent of a Manufacturing Department.

Or in such other like appointment as shall from time to time be specially approved by Our Secretary of State for War and our Commander in Chief.

f. By brevet after five years' command of a Depôt Battalion as Major (with brevet rank as Lieutenant-Colonel).

g. By brevet after eight years' satisfactory service, as a substantive Field Officer, with the rank of Lieutenant-Colonel, as Equerry to the Sovereign, or in a Civil situation under Government approved by Our Secretary of State for War and Commander-in-Chief.

h. By brevet after eight years' full pay service, with the brevet rank of Lieutenant-Colonel conferred for distinguished service in the field.

Major in temporary command of a battalion.

30. A Regimental Major, with the brevet rank of Lieutenant-Colonel, who shall fall into temporary command of a Regiment, Battalion, or Depôt Battalion, in the absence of the Lieutenant-Colonel, for a period exceeding one month, shall reckon such period as part of the five years required to qualify for the rank of Colonel.

Major commanding a wing or a mixed force.

31. Where a Regiment or Battalion serving abroad shall be so divided as to constitute two distinct commands, and one portion shall be under the command of the Regimental Major, who is also a Brevet Lieutenant-Colonel; or when a Brevet Lieutenant-Colonel shall be in command of a mixed force of at least 400 men of different Corps for a consecutive period of not less than one month, or where he shall draw the command pay of such command for any period in consequence of the death or removal of the Commanding Officer, Our Commander-in-Chief may, with the approval of Our Secretary of State for War, allow such service, or portions of such service, to reckon as part of the period required to qualify for the rank of Colonel.

Reckoning of Staff Service.

32. An Officer's Staff Service shall reckon towards the rank of Colonel from the date of his Commission to the Staff, or if not commissioned from the date of assuming duty at home, and from the date of embarking for a staff appointment abroad until the date of disembarkation, if he shall return home without delay. *Acting* Staff service shall not reckon, unless the appointment shall be subsequently confirmed.

Lieutenant-Colonels and Majors.

Promotion of Major to Lieut.-Colonel.

33. A Major may attain the rank of Lieutenant-Colonel:—

a. By regimental succession.

b. By promotion to a half-pay Lieutenant-Colonelcy.

c. By brevet, if senior in the Army rank of Major, in succession to a vacancy on the establishment of General Officers.

d. By brevet for distinguished service in the field.

e. By brevet on removal from the appointment of Assistant Adjutant General, Assistant Quartermaster General, Military Secretary, or Assistant Military Secretary, after five years' satisfactory service therein as a substantive Field Officer.

f. By appointment to be Deputy Adjutant General or Deputy Quartermaster General abroad where there shall not be an Adjutant General or Quartermaster General.

Promotion of Captain to Lieut.-Colonel.

34. A Captain in the Royal Artillery, Royal Engineers, or Royal Marines, may attain the rank of Lieutenant-Colonel by regimental succession.

Appendix III.—*continued.*

ut. and ttain in ot Guards.

35. A Lieutenant and Captain in the Foot Guards may attain the rank of Captain and Lieutenant-Colonel by regimental succession.

omotion Major.

36. A Captain, after six years' full pay service in Our Army, may attain the rank of Major :—

a. By regimental succession.

b. By promotion to a half-pay majority (not applicable to Royal Artillery or Royal Engineers).

c. By brevet, if senior in the Army rank of Captain, and on service, in succession to a Major promoted under Art 33, clause *c*.

d. By brevet for distinguished service in the field.

omotion Majors d Cap- ns by evet.

37. When a vacancy shall occur on the establishment of General Officers, the senior Major on the General List of the Army, shall be promoted to be a Lieutenant-Colonel and the senior Captain on service to be a Major.

Indian Amalgamation.

dian nalgama- on (inter- ediate).

38. All promotions to the rank of Lieutenant-Colonel and Major in consequence of vacancies amongst General Officers shall, until the general fusion herein-after provided for in Art. 39, fall in each case to that service (British or Indian) to which the General Officer creating the vacancy belonged; and such promotions shall be made under the regulations now in force in either service.

dian nalgama- ation inal).

39. When the first addition shall be made (under Article 23), on account of Indian Staff Corps to the British establishment of General Officers, all the Officers of the Staff Corps, and when the Lists (E.) and (F.) shall be commenced (under Article 27), all the Officers of the Royal (Indian) Artillery or Royal (Indian) Engineers, including in each case the General Officers, shall be transferred in the order of seniority to the General Seniority List of the British Army, and brevet promotion up to the rank of Lieutenant-Colonel, in succession to vacancies on the establishment of General Officers, shall be governed by such seniority.

III.—Captains.

romotion Captain.

40. The rank of Captain shall be attained by regimental succession, or by promotion to the half-pay list.

ualifica- ion for aptain.

41. An Officer shall not be eligible for the rank of Captain until he shall have served two years as a Subaltern Officer.

IV.—Regimental Promotion.

Non-purchase Corps.

uccession y seniority.

42. Promotion in the Royal Artillery, Royal Engineers, Non-purchase Regiments of Cavalry, and Infantry, or any other Non-purchase Corps, and to the regimental ranks of Lieutenant-Colonel and Major in Our Foot Guards shall be by seniority, unless it shall appear expedient to Our Secretary of State for War and Commander-in-Chief that the vacancy be otherwise filled.

ndian Staff Corps.

43. Promotion in Our Indian Staff Corps shall be regulated by length of service in the following manner :—

After 12 years' service, including four in the Staff Corps, a Lieutenant shall become Captain :

After 20 years' service, including six in the Staff Corps, a Captain shall become Major :

After 26 years' service, including eight in the Staff Corps, a Major shall become Lieutenant-Colonel :

An interval of two years shall, however, intervene between each step.

Purchase Corps.

Succession by sale and purchase.

44. In the Household Cavalry, Foot Guards (up to the rank of Captain and Lieutenant-Colonel), Purchase Regiments of Cavalry and Infantry of the Line, and Colonial Corps, or any other Purchase Corps, succession to a vacancy caused by an Officer permitted to retire from the service by the sale of his Commission, shall be given to the senior qualified Officer of the next grade who shall be prepared to purchase his promotion; and so on throughout the ranks below, unless it shall appear expedient to Our Secretary of State for War and Commander-in-Chief that the vacancy shall be otherwise filled. In such case an Officer of the same rank may be brought from half-pay, or a qualified Officer of the proper rank may purchase in from some other regiment. But the succession to the Officer purchasing in from another Corps shall be in such other Corps.

Succession to non-pur- chase vacancy.

45. If a vacancy shall arise by the promotion of an Officer to the rank of Major-General, or by the death of an Officer, or from any other cause producing a non-purchase vacancy (except augmentation), the promotions in the several ranks necessary to fill up the vacancy shall, unless it shall appear expedient to Our Secretary of State for War and Commander-in-Chief that the vacancy be otherwise filled, be given to the senior qualified Officer of each lower rank. Upon an augmentation of the Regiment such vacancy may be filled by an Officer of suitable rank from half-pay, from another Regiment, or, under special circumstances, by the succession of the senior qualified Officer of the next grade.

Return to full from half-pay.

46. An Officer who has been placed on temporary half-pay shall, while in receipt of half-pay, or within five years of its discontinuance, be eligible to be brought, by exchange or otherwise, to full pay, and to reckon previous full pay service.

First Appointments.

Artillery and Engineers.

47. Commissions as Lieutenants in Our Artillery (except in the Coast Brigade) or in Our Corps of Engineers shall be given exclusively to Cadets who, having passed through the course of instruction prescribed for Our Royal Military Academy, shall prove themselves best qualified at a final examination. Candidates for examination for admission into the Royal Military Academy shall be between 16 and 19 years of age.

Guards, Line, and Colonial Corps.

48. A Commission as Cornet and Sub-Lieutenant in Our Life Guards, as Cornet in our other Regiments of Cavalry, Ensign and Lieutenant in Our Foot Guards, or Ensign in Our Infantry of the Line and Colonial Corps, shall be given :—

I. *By purchase*, if in succession to a vacancy caused by sale, retirement to half-pay, or in certain cases, on augmentation for benefit of the Reserve Fund :—

(*a.*) To a Cadet at Our Royal Military College who shall have been unsuccessful at a competitive examination, but who shall have attained the minimum number of marks required for qualification.

(*b.*) To a Graduate in Arts of the Universities of Oxford, Cambridge, Dublin, London, Edinburgh, Aberdeen, or St. Andrews, or of the Queen's University, Ireland, without examination.

(*c.*) To a candidate who shall have obtained the standard number of marks at an examination for Direct Commissions.

II. *Without purchase*, if in succession to a vacancy caused by death, retirement to full-pay, and augmentation, except in certain cases, and in succession to Regimental Field Officers on promotion to Major-General :—

(*a.*) To Our Cadets and the Indian Cadets at the Royal Military College who pass the qualifying examination.

(*b.*) To Cadets at the Royal Military College who shall have succeeded on obtaining a place amongst those to whom Commissions can be awarded.

(*c.*) To Our Pages of Honour who have passed the qualifying examination.

(*d.*) To deserving Non-commissioned Officers.

Commissions sold for benefit of the Reserve.

49. Cornetcies, or Ensigncies, or the appointment of Ensign and Lieutenant in Our Foot Guards, may however be sold for the benefit of the Military Reserve Fund, notwithstanding that such vacancies shall have arisen otherwise than by sale.

Royal Marines.

50. Appointment to first Commissions in Our Royal Marines shall be made by Our Lord High Admiral or by Our Lords Commissioners of the Admiralty in accordance with the rules for the guidance of Our Royal Marine Forces.

Indian Staff Corps.

51. Appointments shall be made to Our Indian Staff Corps from Officers of Regiments serving in India, who shall be under the rank of substantive Field Officer, and who shall have served at least three years with their Regiments, including two years in India. Such Officers shall at first be appointed on probation.

Limits of age.

52. On examination for a first Commission, a candidate must be between the ages specified below, except in the case of promotion from the ranks, or of a Page of Honour to the Sovereign, who may be appointed to the Foot Guards at the age of 16 years and six months.

——	For Examination for Direct Commissions.	For Graduates in Arts under Art. 48.
For the Cavalry -	From 18 to 22 years	18 to 25 years.
„ Infantry -	„ 18 to 20 „	18 to 23 „
„ Colonial Corps	„ 18 to 26 „	18 to 28 „

Succession to Vacancies.

Captain promoted into a Depôt Battalion.

53. If a Captain be promoted without purchase under Art. 58, from a Regiment to be a Major in a Depôt Batta-

Appendix III.—*continued.*

lion, the Captaincy vacated, shall, as a rule be filled from the half-pay list.

Officer proceeding to half pay.

54. When an Officer of 25 years service shall retire upon half-pay the vacancy shall, as a rule, be sold for the benefit of the Reserve Fund, except in cases where the Officer retiring on half-pay will probably obtain the rank of Major-General within a period of two years, and where the Officers next for promotion in the Regiment have been, from various circumstances, placed in an unfavourable position as compared with other Corps, but from the length and distinguished nature of their service have a claim to be favourably considered; when it will rest with Our Secretary of State for War to decide, upon the merits of each case, to what extent the vacancies should be filled up by purchase or otherwise.

Qualifications for promotion.

55. Officers shall not be recommended to Us for promotion to the ranks of Lieutenant and Captain unless they shall have previously passed the requisite examination; but Officers serving with their Regiments at distant Foreign Stations may, at the discretion of Our Commander-in-Chief, be promoted provisionally.

Depôt Battalions.

To constitute one purchase Regiment.

56. The Depôt Battalions of Our Army shall be regarded for the purposes of Promotion and Exchange of their Lieut.-Colonels, Majors, and Adjutants, as one Purchase Regiment of Infantry of the Line; the Adjutants ranking as Captain.

Promotion to Lieut.-Colonel.

57. A Major may succeed to a death vacancy among the Lieutenant-Colonels after four years' service in the substantive rank of Major, and to any other vacancy after two years' such service in his Battalion or three years such service in a Depôt Battalion and in the Line taken together.

Promotion to Major.

58. The succession to a Majority shall be given to an Officer from half-pay, to a Captain in the Line, or to the senior Adjutant, provided he shall have served 10 years in the Army, including three years as Adjutant of a Depôt Battalion.

Rules of Exchange.

Exchanges between officers on full pay.

59. Subject to the sanction of Our Commander-in-Chief, Officers of equal Regimental rank on full pay serving in Our Cavalry, Military Train, Foot Guards, Infantry of the Line and Colonial Corps, and Officers (below the regimental rank of Field Officer) in Our Indian Staff Corps may exchange with one another, provided that the Commanding Officers of the respective Regiments or Corps certify that the desired exchange does not originate in any cause affecting the honour, character, or professional efficiency of the Officers, and provided also that a Certificate of a Military Medical Officer is transmitted, in each case declaring that the Officer is in a fit state to serve at the station where the Corps into which he applies to exchange is quartered. Each Officer shall also declare that he does not intend to sell out or retire upon half-pay, after such exchange, but that it is his *bonâ fide* intention to join immediately and do duty in the Corps to which he proposes to exchange; and as a rule no Officer shall be permitted to retire within six months of the date of his exchange.

Exchange fromCavalry to Infantry.

60. An Officer of Cavalry in the service previous to 31st January 1860, permitted to exchange to full or half-pay of Infantry, may, if entitled, be allowed from the Reserve Fund the former difference between the values of the Commission of his rank in the Cavalry and Infantry respectively.

Exchange from foreign service.

61. A Regimental Officer, under orders to join a Regiment or Battalion on active service, or to embark with a Corps destined for active service, shall not be permitted to exchange into another Regiment, except on the ground of ill-health, certified by a Military Medical Officer.

Guards' officers exchanging.

62. A Major and Lieutenant-Colonel of Our Household Cavalry, a Captain and Lieutenant-Colonel, Lieutenant and Captain, or Ensign and Lieutenant of Our Foot Guards, shall be permitted to exchange with an Officer of Our Cavalry, Military Train, or Infantry of the Line holding Regimental rank designated by the higher rank of the Guards' Officer exchanging.

Exchange between purchase and non-purchase regiments.

63. Exchanges may take place between the Officers of any of the services designated in Article 59, whether the purchase system be permitted or not in the Regiments concerned; but an Officer exchanging from a Purchase Regiment into a Non-purchase Regiment shall put into abeyance those rights of sale which he may have acquired by purchase or service, nor shall those rights be revived unless he again exchange into a Purchase Regiment. On the other hand, the Officer from the Non-purchase Regiment who shall exchange into a Purchase Regiment shall acquire the privileges of sale in respect to any Commissions he may have purchased; and as regards any other Commissions, he privileges of sale granted (in Art. 84) to an Officer in respect of his previous service, who has not purchased all his Commissions.

Exchange to half-pay.

64. An Officer on full pay of less than 25 years service, may exchange with an Officer of like rank and suitable age on half pay, provided Our Secretary of State for War and Commander-in-Chief are satisfied with the reasons given for such exchange. Such Officer, if he shall have served on full pay for 25 years, may receive the difference in value between a full-pay and half-pay Commission of his rank, provided another Officer shall be willing to pay it. The Officer on full pay will not, however, be permitted to designate his successor, who shall be selected by Our Commander-in-Chief.

Service in ranks.

65. In the case of an Officer promoted from the ranks, two years' service in the ranks shall, for purposes of sale, count as one years' service as a Commissioned Officer.

Exchanging officer to the bottom of the list.

66. An Officer exchanging into a Regiment shall be placed, for Regimental seniority, below all Officers holding the same Regimental rank at the time of his exchange.

Supernumerary and Seconded Officers.

Rights of Supernumerary Officers.

67. An Officer supernumerary to the establishment of his Regiment shall retain all his military rights, with his claims to promotion, by purchase or otherwise, precisely as if he remained on the active list of such Regiment.

When made Supernumerary.

68. An Officer of Cavalry or Infantry may be continued as supernumerary on the strength of his Regiment, when appointed—

a. As Assistant Adjutant-General, Assistant Quartermaster-General, or Assistant Inspector of Volunteers, if a Regimental Major.

b. As temporary Assistant Commissary-General, or Deputy Assistant Commissary General, if a Captain or Subaltern.

c. As Professor or Master, or Captain or Lieutenant of a Company of Cadets, at Our Royal Military College or Staff College.

d. As Inspector of Musketry, or Captain Instructor or Lieutenant Assistant Instructor of Musketry at the Schools of Musketry.

Officers holdingStaff Appointments.

69. Promotion in succession to an Officer made supernumerary shall go in the Regiment without purchase; and the Cornetcy or Ensigncy vacated shall be sold for the benefit of the Reserve Fund.

Death of Supernumerary Officer.

70. If a Supernumerary Officer shall die while employed in any of the above appointments, no promotion shall take place in his Regiment.

Supernumerary Major purchasing Lieut.-Colonelcy.

71. If a Supernumerary Major shall purchase the Lieutenant-Colonelcy of his Regiment, the Supernumerary Majority shall be absorbed by payment from the Reserve Fund of the difference between the amount to be paid by the Major so promoted and the amount required for the Lieutenant-Colonelcy.

Promotion of Supernumerary Captains and Subalterns.

72. If a Captain shall be promoted to the rank of Major, a Lieutenant to the rank of Captain, or a Cornet or Ensign to the rank of Lieutenant, by purchase, while seconded or supernumerary, the Supernumerary Commission shall be absorbed by payment from the Reserve Fund of the difference between the sum paid by him and the amount required for the superior Commission.

After cessation of Staff Appointment.

73. A Supernumerary Major, on completion of his five years' service, or on resignation of his appointment on grounds satisfactory to Our Commander-in-Chief and Secretary of State for War, shall continue as a Supernumerary till the first vacancy shall occur into which he can be absorbed. If, however, he shall resign his appointment on grounds not satisfactory to Our Commander-in-Chief and Secretary of State for War, or shall be displaced for misconduct or incapacity, he shall be placed upon the half-pay list; or if not entitled to half-pay shall be required to sell his Commission.

Captain promoted to Major.

74. A Supernumerary Captain, on attaining the regimental rank of Major, whether by purchase or otherwise, shall join his Regiment.

Promoted Subalterns to continue supernumerary.

75. A Supernumerary Cornet, Ensign, or Lieutenant, shall, on succession to higher Regimental rank, whether by purchase or otherwise, become a Supernumerary in his new grade, if he be retained in the appointment, and shall carry up with him the officer next for promotion.

Field Officers of Artillery or Engineers employed on the Staff.

76. A Regimental Colonel or Lieutenant-Colonel of Artillery or Engineers, employed as Colonel on the Staff, or as Deputy Adjutant-General, Deputy Quartermaster-General, Assistant Adjutant-General, or Assistant Quartermaster-General, shall remain on the establishment of his Brigade or Corps.

Captains and Subalterns of Artillery or Engineers.

77. A Captain or Subaltern of Artillery or Engineers employed as Professor or Master at the Royal Military College, Sandhurst (comprising the Staff College and Cadet's College), or Royal Military Academy, Woolwich,

Appendix III.—*continued.*

or as Assistant-Inspector of Studies at the latter Institution, shall be continued as Supernumerary on the establishment of his Regiment or Corps.

Seconding of officers.

78. When an Officer shall have held an appointment in a civil situation for a period not exceeding six months he may be seconded in his Regiment, and his place therein may be filled up. While seconded he shall continue to hold his position in the Regiment and shall be promoted when his seniority shall entitle him to promotion, but he shall not have any military authority or status whatever. After ten years shall have elapsed from the period of seconding, the Officer shall, as a rule, either rejoin his Regiment as a Supernumerary Officer drawing a sum equal to the half-pay of his rank until absorbed, or shall permanently retire on full pay or half-pay, as his past service may determine. The pay of a seconded Officer shall be issued from the funds of the civil department in which he may be employed.

Seconded service shall reckon as full pay service.

Retirement by the Sale of Commissions.

Who may not sell.

79. No Officer shall be permitted to retire by the sale of his Commission whose life is certified to be in serious danger.

Prices of Commissions.

80. The prices which may be given for Commissions in Our Army shall be as follows:—

Rank.	Full Price of Commissions.	Difference in Value between the several Commissions in succession.	Difference in Value between Full and Half-pay.
	£ s. d.	£ s. d.	£ s. d.
Life Guards.			
Lieutenant-Colonel	7,250 0 0	1,900 0 0	—
Major	5,350 0 0	1,850 0 0	—
Captain	3,500 0 0	1,715 0 0	—
Lieutenant	1,785 0 0	525 0 0	—
Cornet and Sub-Lieutenant	1,260 0 0	—	—
Horse Guards.			
Lieutenant-Colonel	7,250 0 0	1,900 0 0	—
Major	5,350 0 0	1,850 0 0	—
Captain	3,500 0 0	1,900 0 0	—
Lieutenant	1,600 0 0	400 0 0	—
Cornet	1,200 0 0	—	—
Foot Guards.			
Captain (with rank of Lieutenant-Colonel)	4,800 0 0	2,750 0 0	—
Lieutenant (with rank of Captain)	2,050 0 0	850 0 0	—
Ensign (with rank of Lieutenant)	1,200 0 0	—	—
Cavalry and Infantry of the Line.			
Lieutenant-Colonel	4,500 0 0	1,300 0 0	1,314 0 0
Major	3,200 0 0	1,400 0 0	949 0 0
Captain	1,800 0 0	1,100 0 0	511 0 0
Lieutenant	700 0 0	250 0 0	365 0 0
Cornet or Ensign	450 0 0	—	150 0 0

Cavalry Officers.

81. An Officer of Cavalry of the Line, who had purchased his Commission or Commissions therein prior to the 31st January 1860, shall, on retirement by sale, be paid from the Reserve Fund in respect of each Commission so purchased a sum equal to the difference in value between such Commission at the rates of sale permitted before that date for Cavalry Officers, and at the rates specified in Art. 80.

Cavalry Majority.

82. A Captain of Cavalry purchasing his Majority shall be required to pay the full sum of 1,400*l.* if he shall have purchased any previous step at the rate specified in Art. 80; but if otherwise, he shall only be required to pay 1,350*l.*, the remaining 50*l.* being made up from the Reserve Fund to the retiring officer.

Portion of purchase money may be withheld.

83. An Officer retiring by the sale of his Commission shall not be entitled to receive the price awarded him until the arrangements for filling the vacancy are sufficiently complete to enable the payments to be made.

Sale of Commissions not purchased.

84. An Officer shall not be allowed to sell any Commission which he shall not have previously purchased, nor the Commission of a rank in which he shall not actually have served, unless with the sanction of Our Commander-in-Chief and Our Secretary of State for War, after service on full pay of 20 years or upwards. An Officer who shall have served less than 20 years and more than three years, and who shall have obtained any or all of his Commissions without purchase, may be permitted to receive, on retiring from the service, the full value of such Commissions as he may have purchased, or of a first Commission granted without purchase for distinguished service in the field; and in respect of his other non-purchase Commissions, if he be compelled to retire by ill health, misfortune, or other stringent cause, a sum not exceeding 50*l.* for every year of home service, and 100*l.* for every year of foreign service, foreign service being counted from the day of embarkation to the day of disembarkation in the United Kingdom. It shall, however, be competent for Our Secretary of State for War to award any larger sum, not exceeding the regulation value of the surrendered Commission, in consideration of special service.

Pages of Honour.

85. First Commissions granted without purchase to Pages of Honour to the Sovereign, to Cadets of the Royal Military College, to those gentlemen who brought Volunteers from the Militia, or raised men under special circumstances for Our Army, shall after two years' service be regarded as purchase Commissions.

Surplus purchase money.

86. When an Officer shall be required by Regulation to pay more for promotion than the selling Officer is allowed under Art. 84 to receive on his retirement, the balance shall be paid to the Military Reserve Fund.

Officers appointed to Commissariat.

87. An Officer appointed to the Commissariat Department on probation shall, on confirmation of his rank as Deputy Assistant Commissary-General, resign his Regimental Commission, and be allowed the regulation price of any Commission or Commissions he may have purchased.

Retirement to Full or Half Pay.

Retirement at age of 60.

88. A Regimental Lieutenant-Colonel shall retire from the command of a Regiment or Battalion on attaining the age of 60 years, unless it shall be reported to our Commander-in-Chief by the General Officer inspecting the Regiment or Battalion that it would be for the good of Our service that the said Officer should continue in command. If an Officer so retiring have attained the rank of Colonel, he shall retain his right to succeed in his turn (if qualified) to the establishment of General Officers.

Retirement on full pay.

89. When there shall be a vacancy in one of the establishments of Retired Full-pay Officers, an Officer on full-pay of the same branch shall be recommended to Us for succession to such establishment, under the Regulations for Retired Full-pay.

Retirement on half pay.

90. After 25 years' full-pay service, an Officer shall have an unqualified right to retire on half-pay. An Officer of Our West India Regiments, after 18 years' service, of which 12 have been rendered in one of Our West Indian Regiments, shall also have an unqualified right so to retire.

Superior Staff appointments.

91. An Officer, not being of the Artillery or Engineers, who shall be appointed to the Staff in any rank equal or superior to that of Deputy Adjutant-General, shall be

Appendix III.—*continued.*

required to relinquish his regimental position, and be placed on half-pay.

Military Reserve Fund.

Administration of. 92. The administration of the Military Reserve Fund shall be vested in Our Secretary of State for War.

V.—Rank on Retirement.

Promotion on retiring on full pay. 93. Every Officer permitted to retire upon full pay, except under clause 88, shall be granted a step of Honorary rank; but such Officer can have no further promotion unless he shall have retired from Our Royal Artillery or Royal Engineers as a Regimental Field Officer in consequence of wounds or ill-health contracted in the service before the 3rd November 1854, in which case he shall succeed to the higher ranks *pari passu* with the surviving Officer who stood next below him on the effective establishment at the time of his retirement.

On coming from half pay to serve or sell. 94. An Officer, not below the Regimental rank of Captain, who shall be brought from half-pay to full-pay, whether to serve or sell, may be granted brevet promotion, provided the Officer next junior in Army rank on the Full Pay list shall have become entitled by seniority to such brevet promotion.

On retirement from Artillery and Engineers. 95. Officers of Our Royal Artillery and Royal Engineers retiring on permanent half-pay at their own request, under Part II. of this Our Warrant, shall not be entitled to any further promotion.

VI.—Promotion on the Half-pay List.

Death vacancies. 96. For every three vacancies in the substantive rank of Lieutenant-Colonel occurring by death on the half-pay list, one Major serving upon full pay may be promoted without purchase to the rank of Lieutenant-Colonel on half-pay; —in like manner, for every three vacancies in the rank of Major, one Captain may be promoted without purchase from full pay to the rank of Major on half-pay; and for every three vacancies in the rank of Captain, one Lieutenant on full-pay may be promoted without purchase to the rank of Captain on half-pay. The vacancies caused by these promotions shall, as far as practicable, be filled by Officers from half-pay, or a supernumerary Commission shall be absorbed, or a Commission sold for the benefit of the Reserve Fund.

Deputy Adjutant-General and Deputy Quartermaster-General abroad. 97. An Officer after five years' service abroad as a Deputy Adjutant-General or Deputy Quartermaster-General shall be entitled to a step of substantive rank on half-pay without purchase.

Superintendent of Studies. 98. A Captain on half-pay, on appointment as Major and Superintendent of Studies at Our Royal Military College, may be promoted to the rank of Major on half-pay without purchase.

Adjutant of Depôt Battalion. 99. After six years' good service as Adjutant of a Depôt Battalion an Officer shall be granted a step of substantive rank on half-pay without purchase.

Extract from the Queen's Regulations of 1868.

SECTION 4.—COMMISSIONS AND PROMOTION OF OFFICERS.

I. Appointment, Promotion, Exchange, and Retirement.
II. Examinations for Promotion.

I.—Appointment, Promotion, Exchange, and Retirement.

Royal Warrant. 137. The "Royal Warrant for the Pay, Promotion, &c. of the Army," contains the general regulations regarding the purchase and sale of military commissions, and the rules by which the appointment, promotion, exchange, and retirement of officers are governed.

Qualifications for commissions. 138. All recommendations or applications for direct commissions are to be addressed to "the Military Secretary Horse Guards," and are to certify the eligibility of the person recommended in respect to education, character, connexions, and bodily health, and to state his christian name, surname, age, and place of abode. The qualifications required for commissions will be made known to the friends of candidates, as well as the time and place of the examination to be passed before any commission is granted.

Notification in "London Gazette." 139. The London Gazettes published by authority, in which all military appointments, promotions, exchanges, and removals are inserted, and which are transmitted by the Secretary of State for War to the general officers commanding on foreign stations, are to be considered as official notifications of the appointments, &c. so published; as are also intimations from regimental agents.

Officers joining on appointment. 140. Officers, on being newly appointed to commissions in the army, are to join their regiments or depôts within two months from the dates of their appointment, or at such period as may be directed by the Adjutant-General. The period of two months is allowed to officers under the above circumstances, to enable them to provide themselves with the necessary equipments, and to join their regiments or depôts in any part of the United Kingdom. Officers, on joining their regiments or depôts, are to report themselves personally to the commanding officers. The same rule is to be observed on an officer joining any garrison or military station.

Officers failing to join. 141. In the event of an officer failing to join at the expiration of two months, he is to be reported in the subsequent regimental returns, "absent without leave" from the date of his appointment, and a special report of his absence is to be transmitted to the Adjutant-General at the end of the following (or third) month after the date of appointment, in order that, if no satisfactory account can be obtained as to the cause of his absence, his case may be brought under the consideration of the Commander-in-Chief, with a view to his appointment being cancelled.

Quarterly returns of officers for purchase. 142. Quarterly returns (on W. O. Form 727) of all officers prepared to purchase promotion are to be transmitted from each regiment of cavalry and infantry to the Military Secretary, and are to be accompanied by certificates signed by the commanding officer, viz.:—

1st. "That he has ascertained by reference, through the "regimental agent, to the responsible persons, "that in each case there is good and sufficient "security that the purchase money will be forth-"coming when called for."

2nd. "That of the individuals so returned as pur-"chasers, A. B. C., are in all respects deserving "of promotion, and those whom he would not "hesitate to recommend, whenever the vacancy "shall offer, as fit for the duties of the higher "and more responsible commission;"—or, if otherwise, he is to state his reason for withholding his recommendation. The omission in this return of any officer's name that had previously been entered should always be accounted for in an explanatory note.

In the case of an officer wishing to purchase promotion *out of his regiment*, a separate application must be forwarded to the Military Secretary, and recommended by the commanding officer, stating whether it is for Line or Colonial corps.

Duplicate to regimental agent. 143. A duplicate of this return is to be forwarded to the regimental agents; and, unless officers' names are inserted in these returns, or they shall notify their intentions direct to head-quarters at intermediate periods, stating the reason for previous omission—which reason must be certified by the colonel or commanding officer—they can have no claim to succession by purchase.

Purchase money. 144. When the regiment is abroad the commanding officer is to state the security to which reference is made. In all cases the individual selected for the purchase, or his sureties, must be prepared, when called upon, to lodge the purchase money immediately with the agents.

Purchase list. 145. If the senior who may have been returned as a purchaser, and whose money shall have been certified to be forthcoming, should decline the purchase when selected for it, or his sureties should decline it for him, he or they will be called upon to state the reason for so declining to the Military Secretary, for the Commander-in-Chief's information; and if the explanation should not be considered satisfactory, his name will be struck out of all future list of purchasers. When instructions have been once issued for the money for the promotion of the officer first on the purchase list to be lodged in the hands of the agents, it is then too late, so far as the existing vacancy is concerned, for a senior officer who may have previously withheld his name from such list, to return himself for purchase.

Exchanges on full pay. 146. All applications for exchange between officers on full pay are to be forwarded to the Military Secretary, and recommended by their respective commanding officers, and are to be accompanied, in accordance with the provisions of the Royal Warrant, by a declaration from each officer—certified by commanding officers—to the effect "*that the "exchange recommended does not originate in any cause "affecting the honour or character or professional efficiency "of the officers,*" and further, "*that they do not intend to "sell out or retire upon half-pay after effecting such ex-"change, but that it is their* bona fide *intention to join im-"mediately and do duty with the corps into which they*

Appendix III.—*continued.*

" exchange, the leave of absence which may have been granted " to either or both being cancelled by such exchange."

Medical certificate.

147. The certificate of a military medical officer will also be required in each case, to the effect *" that the officer is in " a fit state of health to serve at the station where the corps " into which he applies to exchange is quartered."*

Officers on leave exchanging.

148. Officers on leave of absence wishing to exchange are to make their application in sufficient time to enable their successors to join at the expiration of the leave originally granted.

Exchanging when registered abroad.

149. In the medical certificates required by the terms of the Royal Warrant, Part I., to be furnished in all cases of regimental officers wishing to exchange after they are placed under orders to proceed on foreign service, it must be clearly stated whether the cause of the officer's inability to proceed abroad has or has not arisen subsequently to his having been ordered to embark.

On removal from one corps to another.

150. Officers who are removed from one corps to another, either on promotion, exchange, or appointment from half-pay, are, if at home, to report themselves in writing immediately on such removal being made known in the London Gazette, to the Adjutant-General, Horse Guards; and if abroad, to the general officer commanding at the station, with the view to their receiving instructions regarding their further movements.

From one battalion to another.

151. When an officer belonging to one battalion is promoted into a vacancy in another battalion of the same regiment, he is to continue to do duty in the former until the official notification of his promotion is received, accompanied by an intimation from the Adjutant-General of the battalion to which he is to be posted. Officers have no choice as to the particular battalion in which they are to serve, but will be posted in the manner most conducive to the interests of the service.

Court of inquiry on officers taken prisoners of war.

152. With a view to prevent any officer who may have been taken prisoner by his own neglect, or by any other unofficer-like conduct, from obtaining any of the advantages laid down in the Royal Warrant, a Court of Inquiry is, as soon as possible, to be assembled by order of the general officer commanding the forces, to investigate the circumstances under which the capture took place. After having sifted the facts as far as may be in its power, the Court is to state its opinion whether his capture is to be attributed to the chance of war to which he was exposed, or whether it occurred from any unofficer-like conduct on his part. The president and members of the Court are to make the following declaration previously to commencing the proceedings :—

Declaration.

" I, A.B., do declare upon my honour, that I will duly " and impartially inquire into, and give my opinion as to " the circumstances under which Captain C. D. became a " prisoner of war, according to the true spirit and meaning " of Her Majesty's orders and regulations on this head; " and I further declare, upon my honour, that I will not " on any account, or at any time, disclose or discover my " own vote or opinion, or that of any particular member " of the court, unless required to do so by competent " authority."

The proceedings of the Court are to be transmitted by the general officer in command of the forces to the Military Secretary.

Application for retirement by sale.

153. Commanding officers in forwarding to the Military Secretary applications from officers to retire from the service by the sale of their commissions, are to transmit the military medical certificate required by the terms of the Royal Warrant for Pay, &c., Part I. In all cases where the whole of the commissions have not been purchased, the foreign service of the officer is to be detailed.

Regimental claims.

154. Commanding officers are at the same time to transmit a certificate that all regimental claims against the officers retiring have been paid. In the event of any such claims remaining unliquidated, the officer's written consent for their amount being stopped from the proceeds of the sale of his commission, and lodged in the hands of the regimental agent, for payment of the claims upon the order of the commanding officer, is to be appended. When there is a difficulty in ascertaining that there are no regimental claims, the officer retiring is to leave in the regimental agent's hands so much of the proceeds of the sale of his commission as may appear advisable to the commanding officer, until the latter shall have satisfied himself that all such claims have been settled.

Successors to vacancies.

155. In forwarding applications for officers to retire from the army, commanding officers are invariably to name the officers whom they recommend to succeed to the vacancies, and in the event of the adjutancy falling vacant a successor of the same rank as the officer vacating the appointment should at once be nominated, who must have passed through the prescribed course of instruction at one of the schools of musketry, unless the regiment should be serving abroad, in which case an officer may be appointed adjutant subject to confirmation, and to his passing the course of musketry at a subsequent period.

Quitting regiments.

156. Officers who give in the resignation of their commissions, or who apply to retire on half pay are not, in consequence, to quit their regiments, until their names names shall appear in the " London Gazette," or until they receive permission from competent authority to do so.

Temporary half pay.

157. Every officer under 25 years' full pay service, who from wounds or ill health contracted in and by the service shall become unfit for duty, and who shall be desirous of retiring temporarily upon half pay, is to transmit his application to the Military Secretary through the commanding officer, accompanied by a certificate of a board of medical officers, explaining the cause of his becoming unfit for service.

Embodied militia in districts.

158. Commanding officers of regiments of embodied militia, when serving under a general officer's command previously to submitting the resignation of any officer to the Lord Lieutenants of their respective counties, are to make a communication of their intention through the general officer commanding the brigade, to the general officer commanding the division, who, if he sees no objection to the resignation being accepted, will signify the same to the commanding officer of the militia regiment, for the information of the Lord Lieutenant.

II. Examinations for Promotion.

Infantry and Cavalry.

Ensigns.

159. Before officers are recommended for promotion to the rank of Lieutenant, the commanding officer is to apply to the senior officer of the district or station for a Board to examine and report upon their qualifications as under :—

(*a.*) They must have a thorough knowledge, and must give an account, of the duties they have to perform as regimental orderly officers,—as officers commanding guards,—or as subaltern officers of guards under officers of superior rank.

(*b.*) They must have a thorough knowledge of, and be able to put a company through, the various exercises and evolutions prescribed in the first two Parts of the " Field Exercises of the Infantry;" and they must be acquainted with the rifle drill and practice, and the theoretical principles of musketry, as defined in the authorised book of instruction.

(*c.*) They must know exactly the place of all the company officers in every situation of the battalion, and be able to command a company in battalion exercise.

(*d.*) They must be acquainted with such parts of the Queen's regulations and orders for the army as relate to the duties and conduct of a subaltern officer, and with the Mutiny Act, and Articles of War, so far as is necessary for the performance of their duties as members of a court-martial.

(*e.*) They must be acquainted with the regulations of the army in regard to the pay and messing of the troops, the supply of clothing and necessaries, and all details regarding the weight of, and mode of carrying, the various articles of the soldier's kit, arms, accoutrements, and ammunition.

Cornets.

160. In addition to such portions of the foregoing as may apply to the cavalry service, it is necessary, in the case of Cornets recommended for promotion to the rank of lieutenant :—

(*a.*) That they shall have learnt their foot-drill and sword exercise, and have been instructed in the single and double ride.

(*b.*) That they shall be able to put a troop through the carbine, lance, and sword exercise, and to exercise both a squad and troop in the drill and evolutions prescribed in the cavalry exercise-book.

(*c.*) That they shall be able to command a troop in squadron exercise.

(*d.*) That they shall have made themselves masters of the detail of saddlery, the mode of fitting the saddle, bridle, &c., and of the whole equipment of the cavalry soldier and his horse.

Lieutenants.

161. Lieutenants in the cavalry and infantry will, in addition to the foregoing, before they are recommended for promotion to the rank of Captain, be required to show that they are further duly qualified, as follows :—

(*a.*) They must have a thorough knowledge of the provisions of the Mutiny Act and Articles of War, and of the forms and proceeding of courts-martial; and must give evidence of having

Appendix III.—*continued.*

studied some of the standard works on military law.

(*b.*) They must understand perfectly the evolutions of a regiment of cavalry or a battalion of infantry, as laid down in the regulations for those services respectively.

(*c.*) They must be acquainted with the light infantry drill, duties of outposts, patrols, escorts, advanced and rear guards.

(*d.*) They must perfectly understand the interior economy of a troop or company, and the established system of keeping their accounts.

(*e.*) They must be thoroughly acquainted with the Queen's and War Office Regulations applicable to their own branch of the service.

(*f.*) They must be competent to take charge of a troop, company, or detachment, in every position in which it may be placed.

(*g.*) And they will be required to show that they have a sufficient knowledge of field fortification and reconnoissance.

Composition and report of Board.

162. The Board of examination is to consist if possible of three field officers; but on no occasion, when it can be avoided, is any officer of the same regiment as the candidate to be a member. In all cases the Board will ascertain by practical examination, as well as by verbal and written answers to questions, whether the officer is instructed in the subjects specified in the preceding paragraphs. The questions are to be written on half margin, and the replies inserted opposite to them. The Board will mark in red ink its correction of any mistakes in the answers, and will certify in each case that "the candidate has not received "any assistance from books or other sources." The report of the Board to be on a separate sheet, and when officers of different regiments are examined by the same Board the report in connexion with each regiment is to be made separately.

Report, how forwarded.

163. The General officer commanding will forward the report of the Board, and the written questions and replies, to the Adjutant-General, accompanied by his own observations thereon regarding the nature of the examination, the correctness of the answers, and eligibility of the officer examined.

Officers when to be examined.

164. Every cornet or ensign is to be examined on the different points herein specified, before he has completed one year's service, and should he fail to qualify himself for promotion within that period, his commanding officer must report, through the general officer commanding, for the information of the Commander-in-Chief, whether it is owing to a want of diligence and attention on the part of the officer, or to sickness or other circumstances over which he could have had no control.

Penalty of neglect to pass.

165. No officer will be recommended for promotion to the rank either of lieutenant or captain unless his examination papers and certificate of qualification have been received by the Military Secretary; but the Commander-in-Chief will in all cases select the senior officer who may have qualified for promotion to the higher grade.

Artillery.

Lieutenants of artillery.

166. The examination of lieutenants of artillery for the rank of captain will include all the subjects required from officers of the line of corresponding rank, except that a general knowledge only of the evolutions of cavalry and infantry will suffice. In addition to the foregoing, lieutenants of artillery are to be examined as to their acquaintance with the more special duties of their arm of the service. The following list of subjects will serve as a guide to the nature of the examination:—

(*a.*) Field-gun drill. Exercise of heavy guns on ground and traversing platforms; mortar drill, rocket drill, Armstrong-gun drill, practice with hot shot, and molten-iron shells, gyn and transporting carriage drill.

(*b.*) General duties of the men, and principles involved, in mounting and dismounting ordnance generally, in placing guns on towers, in embarking and disembarking ordnance, and in moving ordnance up steep inclines; also the tackle, &c. required in the above operations.

(*c.*) Different pieces of ordnance in use throughout the service at the time of examination, their weight and calibre, and the special purpose of each description of ordnance.

(*d.*) Ammunition employed with ordnance generally; ammunition employed with Armstrong guns; general construction of a congreve rocket, and the principle of its motion; manufacture and action of fuzes and tubes; the advantages of the rifle action, and the principle upon which it depends; essential points with regard to rifling ordnance; general principles of breaching; position and employment of artillery in the field; considerations which regulate the rapidity of artillery fire; principles connected with the manufacture and construction of artillery carriages; general knowledge of laboratory duties.

(*e.*) Embarking and disembarking horses; management of horses on board ship.

(*f.*) To be able to define technical artillery terms, &c. in such a way as to make them understood by the non-commissioned officers and men under their command, such as—1. Point blank; 2. Point blank range; 3. Dispart; 4. Chambers; 5. Preponderance; 6. Different kinds of artillery fire; 7. How elevation gives an increase of range; 8. Windage; 9. Deviation, &c. &c.

(*g.*) Subalterns who have been one year or more in the horse brigade, or in a field battery, will be required, in addition to the foregoing subjects, to be thoroughly acquainted with stable duties, and horse artillery or field battery movements and details; all others will be required to have a general knowledge of these subjects.

When to be examined.

167. Every officer on becoming the 30th on the list of lieutenants must be prepared to undergo the required examination. An officer, however, who wishes to be examined at an earlier period may, after four years' service, apply for such examination.

Board for examination of Artillery Officers.

168. Instructions will from time to time be issued to the General or other officer commanding districts or stations to assemble a Board, to consist of three officers, viz., a field officer (of the artillery, if possible), an officer of the staff, and a captain of artillery, or an officer of that corps who may have already passed the examination. Either the gunnery instructor or the firemaster should, when practicable, be selected for this duty. If it be impossible to obtain a staff officer, a captain of the line should be substituted; if a second officer of artillery cannot be had, an officer of engineers should be substituted; but either the president or one member of the Board must be selected from the artillery.

Examination how conducted.

169. That portion of the examination which can be best replied to in writing will be conducted by means of questions prepared by the deputy adjutant-general of artillery, and forwarded to the general officer commanding the district. The *vivâ voce* and practical examination will be conducted by the board of officers, who will satisfy themselves that the officer under examination not only possesses the requisite knowledge himself, but that he is able to impart that knowledge in a clear and satisfactory manner to the non-commissioned officers and men under his command.

Report of Board.

170. The Board will then forward through the General officer its report, together with the written answers, to the Adjutant-General of the forces; and, in returning to him the written answers, the president of the Board will certify that they are the bonâ fide performances of the candidates, without assistance. The written papers will then be examined by the deputy adjutant-general of artillery, and the result, together with the opinion of the Board, reported to the Commander-in-Chief.

Extracts from the Royal Warrants of October 1858, March 1861, and January 1863, regulating Retired and Half-Pay.

Unattached Pay, Retired Full-Pay, and Half-Pay.

21. It is our further will and pleasure that the grants of unattached pay, and other rates of pay to general officers, not being colonels of regiments, and of retired full pay, and of half-pay, to officers of our army, shall be regulated by this our Royal Warrant, to be administered and interpreted by our Secretary of State for War, as the sole and standing authority for regulating such grants.

Unattached Pay.

22. Officers removed from their commissions as field officers in regiments of Foot Guards, in consequence of being promoted to be general officers, shall receive unattached pay according to the following scale; viz., lieutenant-colonel, 600*l.* a year; major, 550*l.* a year.

23. Officers promoted to be general officers from full or

Appendix III.—*continued.*

half-pay commissions in the line, shall, if duly qualified to be placed on the fixed establishment, receive unattached pay of 1*l.* 5*s.* a day.

24. Regimental colonels of Artillery and Engineers, promoted to be general officers, shall receive the net full-pay of their former rank, and regimental field officers of those corps so promoted, shall receive the unattached pay of 1*l.* 5*s.* a day, until they shall be appointed colonels commandant of battalions.

25. A general officer being colonel of a regiment, in the event of his regiment being reduced, may be placed, in the first instance, as supernumerary upon the said establishment of unattached pay, at 1*l.* 5*s.* a day; but shall fall into the first vacancy that may occur therein, until re-appointed colonel of a regiment.

26. A colonel promoted to the rank of general officer, as a reward for distinguished service in war, or in consequence of having held a command with temporary rank as general officer, shall, while supernumerary to the fixed establishment, receive the unattached pay of 400*l.* a year, until he shall fall into a vacancy on the fixed establishment of general officers.

Retired Full-Pay.

29. The retired full-pay list of field officers and captains of the Guards and line shall be fixed at 60,000*l.* a year, and of the Artillery at 48,000*l.* a year; all officers who were on the full pay retirement previously to the Royal Warrant of 1840 being considered supernumerary to the establishment of 60,000*l.* and 48,000*l.* respectively.

30. *See* new clause 30, circular No. 675 (page 15).

31. The retirement of officers of the Royal Artillery and Royal Engineers shall not be confined to the ranks of lieutenant-colonel, captain, and lieutenant, but may include a proportion of unattached general officers and regimental colonels who, relinquishing the prospect of succeeding to the command of battalions, shall be permitted to retire on 600*l.* a year.

32. Lieutenant-colonels of Royal Artillery and Royal Engineers, with the rank of colonel, of not less than 30 years service, will be permitted to retire on 400*l.* a year; and lieutenant-colonels, of shorter periods of service, and officers of inferior rank, of Artillery and Engineers, on their regimental pay, subject to the provisions of clause 30, as to unfitness from ill-health and wounds received in action.

33. The retired pay of lieutenant-colonels shall be 20*s.* a day.

34. Each officer placed on the retired full-pay list shall receive a step of honorary rank, together with the full-pay of the rank from which he retired (or the special rates applicable to officers of the Royal Artillery and Royal Engineers); but such officer cannot be further promoted.

35. The regimental field officers of Royal Artillery and Royal Engineers who have been placed on the retired full-pay list, or who may have retired on half-pay as such, in consequence of wounds or ill-health contracted in the service anterior to our Warrant of the 3rd November 1854, shall be promoted in succession up to the rank of colonel and general officer, when those who stood next below them on the effective establishment are so promoted. On attaining the rank of general officer, a number not exceeding eight of the Royal Artillery, and four of the Royal Engineers, shall be allowed to receive 400*l.* a year each, and the two seniors of the Royal Artillery, and the senior officer of the Royal Engineers who shall have been promoted, and each receive 50*l.* a year, in addition to the before-mentioned sum of 400*l.* per annum.

36. Officers appointed to veteran battalions shall not, on their reduction or retirement therefrom, acquire any claim to retired full-pay.

37. That officers commanding regiments shall be required to retire thereform on attaining 60 years of age, unless it be reported to our Commander-in-Chief by the general officer inspecting a regiment, that its condition and discipline are such as to prove that it would be advantageous to the service for the commanding officer to continue in the command of his corps. Officers retiring under this provision will be allowed the rate of retired full-pay fixed by this our Royal Warrant, retaining their prospect of becoming general officers, and their right to unattached pay as general officers in lieu of retired full-pay, provided such officers shall at the period of their retirement hold the rank of colonel in the army, and have fulfilled the conditions of service required by Article 27.

Temporary Allowance in the nature of Half-Pay.

Service of less than three years.

38. An officer having served less than three years will, if reduced, receive only a temporary allowance of half-pay, according to the following scale:—

Services on Full-Pay.	Temporary Allowance.
Under 1 year	for 1 year.
1, and under 2 years	for 2 years.
2, and under 3 years	for 3 years.

The temporary allowance ceases at the termination of the above recited periods, or sooner if the officer shall have been previously placed on full-pay.

Re-appointment within five years.

39. An officer who has been placed on temporary half-pay is eligible to be appointed to a full-pay commission, either by exchange or otherwise, provided his appointment takes place within five years after he has ceased to receive temporary half-pay, in which case his former service is allowed to reckon.

40. The exchange to full-pay, under the preceding article, may be made with a full-pay officer entitled to half-pay.

Sale of Commission.

41. An officer who has been reduced with only a temporary allowance, having purchased his commission, may receive the regulated price thereof from the public through our Secretary of State for War, and the public shall be reimbursed by the sale of a first full-pay commission, which would otherwise have been conferred without purchase; but these sales shall not be required in any greater proportion than one for every two such vacated commissions.

Half Pay.

Liability to forfeiture.

42. The half-pay of the army is granted as a remuneration for past military services, and also as imposing an obligation on the officer to return to his military duties whenever called upon; therefore, any officer not obeying the call is liable to forfeit his half-pay, if not incapacitated by illness.

Wounds received in action.

43. An officer shall be entitled to be placed on the half-pay establishment if compelled to retire in consequence of wounds received in action.

Ill-health contracted on duty.

44. An officer having served more than three years shall be entitled to be placed upon the half-pay establishment, if compelled to retire in consequence of ill-health contracted on duty, as certified by the medical board or medical officers to whom he has been referred for examination. Unless the result of such examination be received by our Commander-in-Chief and Secretary of State for War, he will be considered to have retired upon half-pay for his own convenience.

45, 46. *See* clauses 45 and 46, Circular No. 675 (pages 15 and 16).

Garrison appointments.

47. No garrison commission or appointment shall give an officer any claim to half-pay on retirement.

Residence of half-pay officer.

48. The residence of the half-pay officer is to be stated every quarter in his declaration, whether his half-pay be received by an agent or by himself.

No right to sell or commute.

49. No officer on half-pay shall, of right, have a claim to sell or commute his half-pay; the permission shall be governed by such consideration of the individual case as may induce our Secretary of State for War and Commander-in-Chief to recommend it.

Sale of commission by officers having a claim to half pay.

50. If a subaltern officer, whose service confers a claim to half-pay, be desirous of retiring from the army by the sale of his commission, the following rules should be observed:—

1. If he purchased his commission, the regulated price may be granted (whether he should be receiving half-pay or a temporary allowance in the nature of half-pay).
2. If he did not purchase his commission, and had served less than seven years on full-pay in the army, he may be allowed to receive 100*l.** for each year of service as a commissioned officer, not however exceeding the regulated price of the commission he held.
3. If a non-commissioned officer shall have been promoted to the rank of an ensign or cornet, or adjutant, he shall not have a claim to retire, by the sale of his commission, unless he shall have served in the army as an officer on full-pay upwards of one year, in which case he may be awarded the full price of the commission which he shall have received without purchase, or such proportion thereof as, with reference to the length of his actual service, shall be deemed proper by our Secretary of State for War and Commander-in-Chief.

*Now 100*l.* for each year of foreign service, and 50*l.* for each year of home service.

Artillery and Engineer officers retiring on half pay at their own request.

51. The following number of officers of the Royal Artillery and Royal Engineers will be permitted to retire on permanent half-pay, at their own request:—

	Artillery.		Engineers.	
Lieutenant Colonels	2	annually	1	annually.
Captains of not less than 24 years' service	3	annually	3	every two years.
Lieutenants of not less than 20 years' service	1	annually	1	every two years.

Appendix HI.—*continued.*

Officers who may have been previously on temporary haly-pay, in consequence of reduction, will be allowed to reckon such time in making up the requisite number of years of service.

Officers retiring under this clause shall not be eligible for any further promotion.

52. An officer of any of the under-mentioned ranks, having entered the service since the termination of the war in 1815, and having been permitted to exchange to half-pay, not on account of ill-health, but for his private convenience, before he had served seven years on full-pay, shall be allowed only the old rate of half-pay specified in the following Schedule:— Certain officers who have been permitted to retire for their own convenience.

	Cavalry.		Infantry.		Artillery and Engineers.	
	New Rate.	Old Rate.	New Rate.	Old Rate.	New Rate.	Old Rate.
	Per diem. £ s. d.	Per diem. £ s. d.	Per diem. £ s. d.	Per diem. £ s. d.	Per diem. £ s. d.	Per diem. £ s. d.
Colonel Commandant	—	—	—	—	1 15 4	1 2 0
Colonel	0 15 6	0 13 0	0 14 6	0 12 0	0 16 9	0 12 0
Lieutenant-Colonel	0 12 6	0 10 0	0 11 0	0 8 6	0 11 8	0 8 6
Lieutenant-Colonel on Major's pay	—	—	—	—	0 10 1	0 7 6
Major	0 10 0	0 8 0	0 9 6	0 7 6	—	—
Captain	0 7 6	0 5 6	0 7 0	0 5 0	0 7 4	0 5 0
Ditto of Artillery, Engineers, and Infantry, having superior brevet rank, and provided he shall have served as Captain on full-pay for at least two years immediately before retirement to half-pay	—	—	0 8 0		0 8 4	—
Ditto of Cavalry with brevet rank, exchanging to half-pay after two years' full-pay service, with a Captain of Infantry	—	—	0 7 6	—	—	—
Lieutenant	0 4 8	0 3 0	0 4 0	0 2 4	0 4 2	0 2 6
Ditto of Artillery, Engineers, and Infantry, if commissioned seven years as a Lieutenant in the regular army at the date of being placed upon half-pay	—	—	0 4 6	—	0 4 8	0 2 6
Ditto of Cavalry, of five years' standing, if entitled to reckon two years for the battle of Waterloo	0 5 2	—	—	—	—	—
Cornet	0 3 6	0 2 6	—	—	—	—
Junior Lieutenant of Artillery or Engineers	—	—	—	—	0 3 2	0 2 0
Ensign	—	—	0 3 0	0 1 10	—	—
Adjutant, if not commissioned as Lieutenant	0 4 0	0 4 0	0 4 0	0 4 0	—	—

If the retirement should be for the public convenience, by reduction or otherwise, or in consequence of ill-health certified by a Medical Board, the officer will be allowed the new rate of half-pay.

Promotion to unattached rank and half-pay.

53. For every three vacancies occurring by death on the British half-pay list, in the rank of Colonel and Lieutenant-Colonel, one Major serving upon full pay may be promoted to the unattached rank and half-pay of a Lieutenant-Colonel, viz., 11*s.* a day; in like manner, for every three vacancies in the rank of Major, one Captain may be promoted from the full-pay to the unattached rank and half-pay of a Major; and for every three vacancies in the rank of Captain, one Lieutenant may be promoted to the unattached rank and half-pay of Captain.

The officers so promoted under this Regulation shall retain their claims to pensions for their widows at the rate accorded to their new ranks.

The vacancies which these promotions will create on the full-pay list shall be in all cases filled from the half-pay list.

54. Service on the Staff shall be considered as full-pay service.

Given at Our Court at St. James's, this 14th day of October 1858, in the Twenty-second Year of Our Reign.

By Her Majesty's Command,
J. Peel.

Victoria R.

Whereas we have judged it expedient to revise certain parts of Our Royal Warrant of the 14th October 1858, which regulate the full and half-pay retirements of officers of Our Army; it is Our will and pleasure, that instead of the provisions contained in clauses 30, 45, and 46 of the aforesaid Warrant, which are hereby cancelled, those contained in this Our Royal Warrant shall be adopted.

New clause 30.

The Colonels, Lieutenant-Colonels, Majors, and Captains of the Guards and Line, allowed to retire upon full pay, shall be selected and recommended to us by Our Commander-in-Chief, with the concurrence of Our Secretary of State for War, and appointed according to their regimental, and not according to their brevet rank.

But no officer shall be placed on the retired full-pay list until after a service of 30 years as a commissioned officer on full pay of a regiment, or in a staff situation; or if promoted from the ranks, until after an aggregate period of not less than 30 years' service in all grades, of which at least 15 years shall have been as a commissioned officer on regimental full pay, or on the staff; unless under special circumstances arising from ill-health contracted in the service, or in consequence of wounds received in action, it shall be deemed expedient by Our Secretary of State for War to reduce such service to any shorter period than 30 years.

New clause 45.

An officer having actually done duty in some regiment or corps, or in some other military capacity as a commissioned officer in the public service, for a period of at least three years, shall be entitled to be placed on the half-pay establishment on reduction from full-pay.

An officer who has been promoted from the ranks shall be entitled to the benefit of this provision after one year's service on full pay as a commissioned officer, and at least five years' service as a non-commissioned officer.

New clause 46.

No officer shall be permitted to retire upon permanent half-pay until after a service of 25 years as a commissioned officer on full pay of a regiment, or in a staff situation; or if promoted from the ranks, until after an aggregate period of not less than 25 years' service in all grades, of which at least 10 years shall have been as a commissioned officer on regimental full pay, or on the staff; unless the retirement shall be occasioned by unfitness for service, resulting from wounds received in action, or from ill-health, certified to have been contracted in and by military service, or shall be in accordance with the provisions laid down for officers of the Royal Artillery and Royal Engineers in clause 51 of Our Royal Warrant of the 14th October 1858.

Additional clause.

The provisions in clauses 30, 45, and 46, for officers of the Guards and Line promoted from the ranks, are also applicable to the same class of officers of the Royal Artillery and Royal Engineers.

Given at Our Court at St. James's, this 28th day of March 1861, in the Twenty-fourth year of Our Reign.

By Her Majesty's Command,
Herbert.

Appendix III.—*continued.*

Exchanges to Half-pay under 25 Years' Service.

VICTORIA R.

WHEREAS by our Royal Warrant of 28th March 1861, We were pleased to revise clauses 30, 45, and 46 of Our Royal Warrant of 14th October 1858: And whereas it has been represented to Us that it is expedient to further revise clause 46 of the said Royal Warrant of 14th October 1858, Our will and pleasure is, that officers of less than 25 years' service, who have performed sufficient service to justify a temporary retirement from active duty, may be permitted to exchange to temporary half-pay with any officer of corresponding rank already on the half-pay list, who may be desirous of returning to full-pay, to serve or to sell; provided the age and other qualifications of the officer returning to full-pay shall be approved by the Field-Marshal Commanding-in-Chief of Our army, and Our Secretary of State for War: And provided also, that the grounds upon which the retiring officer applies for permission to go to temporary half-pay shall be satisfactory to the Field-Marshal Commanding-in-Chief, and Our Secretary of State for War, and that the arrangement shall not be disadvantageous to the public service.

Given at Our Court at St. James's, this 31st day of January 1863, in the twenty-sixth year of Our Reign.

By Her Majesty's Command,
G. C. LEWIS.

APPENDIX IV.

CIRCULAR MEMORANDUM addressed to the ARMY at Home and Abroad.

Horse Guards, S.W., 15 February 1861.

1. His Royal Highness the General Commanding-in-Chief has had under his consideration the necessity of recalling to Full Pay Service all officers now on Half-pay who are able to serve, and wishing also to give to officers on Half-pay the opportunity of retiring from the service by the sale of their Commissions: he hereby announces, with the concurrence of the Secretary of State for War, that they will be permitted to do so, to a limited extent, in the manner and under the restrictions herein-after specified.

2. This arrangement to include General Officers who may be in receipt of the half-pay only of the regimental rank in which they retired.

3. The individuals disposed to avail themselves of this arrangement shall make application to the General Commanding-in-Chief, through the Military Secretary, according to the Form annexed.

4. The sales to take place under the following restrictions, viz.:—

No person to be allowed to sell who has passed the age of 60 years, or who cannot produce a certificate from the Army Medical Department at Head Quarters, or, if in a colony, the certificate of a medical board, or if no medical board can be assembled, the certificate of the Senior Medical Officer, showing that his retirement does not result from impaired constitution threatening earlier dissolution than a person of his age may expect in the common course of nature.

5. The price of the Commissions to be paid to the officers selling out shall be the regulation price of the rank in which they retired, or such portion as their services may entitle them to, less the difference received by them between full and half-pay.

6. It is to be understood that no officer on the Half-pay List, who may hold a garrison situation, will be permitted to retain it if he should sell under this arrangement.

7. The time allowed for the operation of this regulation shall be limited to six months for officers at home, and to one year for officers residing in the colonies.

8. Officers selling their Commissions under this Regulation will be granted the Brevet Rank to which they might be entitled had they been restored to Full-pay to sell in the usual manner, their names being retained as Retired Officers in the Army List accordingly,

9. As the funds at the disposal of the Secretary of State for War for this purpose are limited, the applications will be considered in the order in which they are received; and when the funds are expended no further sales will be allowed.

10. Officers of Artillery and Engineers on the Half-pay List who may be desirous of availing themselves of the benefit of this Regulation, so far as the provisions thereof can be made applicable to them, are at liberty to make application accordingly; but as such officers are not, under ordinary circumstances, eligible to dispose of their Commissions by sale, each application as received will be specially considered with reference to the previous service of the officer.

By command,
JAMES YORKE SCARLETT,
Adjutant-General.

APPENDIX V.

RETURN of the Number of Promotions in the several Purchase Corps of the Army to the various Ranks, distinguishing those which went by purchase and those without purchase, during the year from 1st April 1869 to 1st April 1870.

Total		2	7	—	2	28	43	89	58	180	120

The figures in italics are not included in the above totals. They represent vacancies which in the ordinary course would have been filled by officers from half pay to serve or sell; the total number of these absorptions is stated below.

Lt.-Colonel 1; *Majors* 3; *Captains* 95; *Lieutenants* 35; *Cornets* 2.

Horse Guards,
10 May 1870.

W. F. Forster,
Military Secretary.

APPENDIX VII.

Extract from the Memorandum of the Duke of Wellington laid before the Select Committee on Army and Navy Appointments in 1833.

In the Memorandum prepared by the Duke of Wellington for the Select Committee on Army and Navy appointments in 1833, the following observations occur:—

But there is another view of the subject which ought to be taken into consideration, the case of Officers who pay more than the regulated price for their Commissions of Lieutenant-Colonel, of whom there have been hundreds of instances.

The writer of this paper knows of one who paid 6,000 guineas for his Lieutenant-Colonelcy of a regiment of Infantry. He received the order of the Bath (which is now the Grand Cross) before he was promoted to be Colonel of a regiment of Infantry of the Line, at the end of 12 years after his promotion to be a Lieutenant-Colonel.

During that time he served upon his pay.

He surely is entitled to carry to the account of the sacrifices which he made in order to render his service, the accumulation on the purchase money of his Commission of Lieutenant-Colonel, at least, till he was promoted to be Colonel of a regiment.

Appendix VII.—*continued.*

If he had been promoted to be Lieutenant-Colonel without purchase, as he might have been, in His Majesty's Army, or as he would have been in any other service, or as he would have been in the corresponding rank of the Navy, and had equally lived upon the pay of his rank, he would have had in his pocket the purchase money of his Lieutenant-Colonelcy, and the accumulation of interest upon that sum, at the moment he was promoted to be Colonel of a regiment.

But supposing the reward of this Officer's service to be 1,100*l.* per annum, it is obvious that he had paid 6,000 guineas 12 years before; and even if nothing else is taken into consideration, it will be admitted that the reward, even in this most favoured case, was not extravagant, considering what is given in other services in the British Navy, and the rewards for exertions and services in other professions.

APPENDIX VIII.

Correspondence between the Military Secretary and the Home Office respecting an Officer who had paid Over-Regulation.

Horse Guards,
13 October 1834.

Sir,

Captain Bird, late of the 55th Foot, having submitted to the General Commanding-in-Chief papers by which it appears evident that Lieut. Cary, then of that regiment, and now a Captain in the Royals, agreed in the month of December 1830 to give Captain Bird the sum of 300*l.* above the regulation for the Company, his Lordship has for some time had under his consideration the manner in which it would be best to mark the King's disapprobation of the infraction of the regulations, and finding that much inconvenience would result from the promotion being cancelled, several officers who were promoted or appointed in consequence of it, but who were as it appears no party to the transaction, being at this moment with the 55th in India, his Lordship has recommended to His Majesty that Captain Cary should be deprived of one year's rank in the Army, and that his Commission should be dated 6th January 1833, instead of 6th January 1832.

It being understood that Captain Bird has obtained the appointment of Adjutant to the South Lincoln Militia since he quitted the Army, the General Commanding-in-Chief deems it right to bring these circumstances to the knowledge of the Secretary of State in the hope that he will consider whether it may not be possible to punish Captain Bird to the same extent as Captain Cary.

I have, &c.,
F. R. Somerset.

S. M. Phillipps, Esq.,
Downing Street.

My Lord, 25th November 1834.

In reference to the correspondence that has recently passed between your Lordship and myself respecting the conduct of Adjutant Bird, of the South Lincolnshire Militia, I am now directed by the Duke of Wellington to acquaint your Lordship, for the information of the General Commanding-in-Chief, that the case having been referred to the Lord Lieutenant of the above county, his Lordship is of opinion that that officer is deserving of some mark of censure and reprehension. It has therefore been suggested to Lord Brownlow by his Grace for consideration whether, in the event of an application by Adjutant Bird for the Brevet Rank of Captain, it would not be proper to decline appointing him to that rank for the present.

(Signed) S. M. Phillipps.

Lord F. Somerset.

APPENDIX IX.

Evidence given by H. R. H. the Duke of Cambridge before the Select Committee on Military Organisation.

The following evidence was given before the Select Committee on Military Organisation, in August 1859, by His Royal Highness the Duke of Cambridge, at the time that the correspondence as to the emoluments of officers in the cavalry, and the prices of the commissions in that service, was proceeding between the War Office and the Treasury.

3993. (*Mr. Secretary Sidney Herbert.*) Have not a good many doubts been expressed as to the legality of selling commissions beyond the regulated price?—There is no doubt upon that point.

3994. Therefore a system which is not itself a legal system is now practised in the army?—If it came to our knowledge officially that there was more given for a commission than the regulated price, there is no doubt that it would be illegal. But we do not know it; it is scrupulously kept out of our view, because it is known to be illegal.

4053. Has it not been suggested as a cure for the deficiency of the candidates, that the expenditure should be reduced, by doing away with the stoppage for forage, for example?—Yes; I think that that is a most unjust stoppage.

4055. I believe the Treasury answered to that, that they thought it was the high price of the commission which deterred gentlemen from coming in?—Yes, so I have understood.

4056. And they therefore proposed that the regulated price should be lowered?—Yes.

4057. If the regulated price were lowered, would it really affect the value of commissions one sixpence, excepting the first commissions?—No, only the first commissions.

4058. (*Chairman.*) I wish to ask your Royal Highness a question upon this very point, and bearing upon a former answer your Royal Highness gave; your Royal Highness has said that officially you are not cognizant of the prices paid above regulation?—I am not.

4059. Mr. Hammersley is one of the great firm of army agents?—He is.

4060. If prices much above regulation are paid, he is a good witness on the subject, is he not?—I should think so.

4061. Mr. Hammersley, I think, before the commission on the sale and purchase of commissions, gave evidence that the price paid in the cavalry for commissions was frequently 100 per cent. above the regulation?—I can only say that of course it is scrupulously kept out of our sight, and that it is impossible for me, in my official capacity, to say what is given, or what is not; but if we found officially that more was given, it certainly would be contrary to law.

4062. The regulation price of a lieutenant-colonelcy is 6,000*l.*, is it not?—Yes.

4063. I may be wrong, but my impression is, that Mr. Hammersley stated that as much as 14,000*l.* had been given; frequently 12,000*l.*, and that the position of a junior officer in a regiment, who was unwilling to contribute to that amount above the regulation, was most painful; that the major, the captain and the lieutenant concurred, but that the cornet objected, and that the person to whom he would naturally look to sustain him in the objection, which was according to law, would be the lieutenant-colonel; but that the lieutenant-colonel himself was a person who had a deep interest in obtaining a large sum above the regulation; if such, though not known to your Royal Highness officially, should be the state of the practice in the cavalry regiment, would not that be a reason why young men, even of fortune, should be slow to enter the cavalry?—I have no doubt of it.

4064. Though your Royal Highness is not officially aware of it, yet your Royal Highness probably can hardly entertain a doubt that this practice obtains largely?—I do not doubt it; but I can positively state that, officially, I know nothing of it, and that it is impossible that we should, for if we did know it officially, we should instantly take notice of it.

4065. When an army agent has declared, before a commission, that this practice does obtain to a great extent, is it not worthy of strict scrutiny, whether that statement be well founded or not, so that your Royal Highness may

Appendix IX.—*continued.*

obtain official cognizance of it?—It must be a transaction of honour, and it was tried formerly; there used to be a certificate given on honour, that not more than the regulation price was given, but it was done away with, because it was found that it was evaded.

4066. That there was a temptation to violate an honourable pledge?—Certainly.

4067. Is not the acknowledgment of a very general practice, hardly consistent with honour?—Where money is concerned it is a very difficult thing for any authority to limit the mode in which that is to be distributed; I should be very glad, for one, if I could see any way in which we could, officially, put a stop to it; but I am really at a loss to know how it is to be done.

4068. Your Royal Highness would admit the importance of that question, and would perhaps assure us that it would not escape your consideration whether any means could be devised of checking what your Royal Highness believes to exist, and what would appear to be inconsistent with the discipline of the regiment, and with the willingness to enter the cavalry?—I should be delighted, as far as I am concerned, and all those connected with me, if anybody could suggest any means by which it could be put a stop to; I am sure that I should be the first to jump at it; but I admit at the same time distinctly, before this Committee, that I am at a loss to know what rules or regulations could be laid down to prevent a larger sum than the regulated price being paid, because where money is concerned, it is between man and man, and it is impossible for any authority to check it.

4069. And even in the seniority services this difficulty is found to exist, is it not, where sale and purchase it not allowed?—Yes, it does exist even in the Indian army, where there is supposed to be no purchase at all; I believe there is no doubt that a purse is made up by all the juniors, and I, myself, think that it is better to have that under certain regulations, than to leave it in that sort of chance way, where I think even greater acts of injustice might be done than in the other way.

4070. (*General Peel.*) The practice of paying more than the regulated price for a commission is not confined to the cavalry?—Certainly not; it runs throughout the army.

4071. (*Chairman.*) But the relative price above the regulation is higher in the cavalry than in the infantry, is it not?—The regulation price itself is higher, and therefore naturally the other would be higher; for instance, a cornet in the cavalry pays 850*l.* by regulation, and an ensign only 450*l.*; that is nearly double.

4072. What is a lieutenant-colonelcy in the cavalry as compared with a lieutenant-colonelcy in the infantry?—I do not recollect at this moment; it is all laid down. I should be very sorry if the Committee had any notion from what I said, that I thought the system existed to greater extent in the cavalry than in the infantry; I believe that it is general throughout the army.

4073. (*Mr. Secretary Sidney Herbert.*) When your Royal Highness speaks of the expense of commissions in the cavalry being a part of the reason why the cornetcies have remained unfilled, there is also the circumstance of the more expensive habits of cavalry regiments?—Certainly.

4074. (*Sir De Lacy Evans.*) Did your Royal Highness happen to glance your eye over the evidence given by Mr. Hammersley; is it not observable that he states that the per-centage of extra money paid is largest in the Guards, next largest in the cavalry, and least in the infantry?—Yes, I believe so.

4075. Therefore it really is greater in the cavalry than in the infantry?—Yes, I believe it is.

4076. And therefore that may have to do with the matter of the difficulty of obtaining candidates?—Certainly.

4077. But your Royal Highness has expressed a wish to do away with this illegal system, if it be possible?—Yes.

4078. As it appears, without the slightest difficulty whatever, this great army agent told the Commission all about the matter, there is no secret whatever about it; it is clear that if the Commander-in-Chief should require those gentlemen to state to him what the real facts were, steps might be taken to check this matter?—A military authority can only take cognizance of what comes to him officially, and as such, I state positively that we are not aware of any more money being paid than in the usual way, because, if an officer sells out he sends in a request to retire by the sale of his commission; the officers apply for the purchase of the commission; they do not say what is given or what is not given, and therefore we can only take for granted that the regulation is complied with; if it is not complied with, of course it is in the breast of those gentlemen who make this private arrangement amongst themselves. I think that if a case of that sort were to be brought before a court, no court would be able to decide that the officer had paid more than the regulation price.

4079. Is there not a regular authority given by the Commander-in-Chief to the army agents, to transact this business of exchange and purchase?—No, the army agent has nothing to do with it; the army agent is the individual who acts between man and man; but the case all comes officially to the Commander-in-Chief.

4080. Does not the agent make a report to the Commander-in-Chief?—Yes, that the money is lodged, but only the regulated price.

4081. With regard to the illegal part, which is certainly one of the most important parts of this arrangement, if your Royal Highness sees a total impossibility of getting rid of this illegality, would it not be better to arrange with the Government that the law prohibiting this proceeding should be abrogated, and that everybody should buy these commissions in the market without impediment?—I think that it is a very objectionable practice, but I do not see my way out of it, I must admit; I am at a loss to know how to meet it.

4082. (*Mr. Walpole.*) If it did come to your Royal Highness's knowledge officially that more than the regulation price was given, you would then deal with the case?—I should treat it as an illegal matter.

4083. What would happen?—I should represent to the Secretary of State that such and such had been the case, and I should ask him if he did not think it a case for prosecution.

4084. (*General Peel.*) The army agents know of many other pecuniary transactions of the officers besides this?—Certainly we have nothing to do with the army agents except that they tell us that the money is lodged.

4085. (*Colonel Percy Herbert.*) Supposing that Mr. Hammersley, or anybody else, paid 1,000*l.* or 5,000*l.* across the counter from one officer purchasing to another officer selling, and that your Royal Highness endeavoured to extract that fact from him, you would not be likely to meet with much success?—Certainly not.

4086. He would conceal that fact, although he states it generally before a Commission?—Certainly.

4087. With reference to the Indian service, the habit is, I believe, to subscribe a purse?—So I understand; I have heard it; I believe it is so.

4088. Is it not your opinion that there is pressure placed upon officers who are unwilling, either from want of means or otherwise, to pay their quota to that purse?—Certainly; because in that case, as I understand it, everybody must pay. In the case of a commission purchased, it is merely an individual officer concerned, and if he chooses not to pay more than the regulation price, or not to pay the regulation price, he does not purchase at all, he is the only person affected; but in the Indian army, as I understand it, everybody is affected.

4089. And it is a very great source of inconvenience to the young officers, and is the cause of their being called upon to contract debt in the junior ranks?—I think so; it seems to me reasonable to suppose.

4090. So that it is a more objectionable system in the Indian army than the other which holds in the Queen's army?—I quite think so.

4091. (*Colonel Lindsay.*) If the recognized payment of money for commissions was done away with, would it not be still done?—If you did away with purchase to-morrow, I believe that those officers of the army who were rich, would, somehow or other, induce those above them to leave, in order to make room for them.

4092. (*Colonel Percy Herbert.*) Is it not the case that promotions which now go without purchase are by report paid for very largely by officers; in the case of officers retiring, for instance, on full pay?—I have no doubt of it, though I know nothing of it officially.

4093. But you have no reason to doubt that large sums of money are paid for those things?—I have no doubt of it.

4094. (*Colonel Lindsay.*) In the present regimental system

Appendix IX.—*continued.*

of seniority, it is very difficult to put a stop to it?—If anybody would suggest to me, how it could be stopped, I should be the first to jump at it; but I have never found anybody suggest any mode of stopping it, and have never found any means myself.

4095. (*Mr. Horsman.*) I think your Royal Highness said, that the reason why there was such a number of vacancies in the cavalry was, because the candidates were of a class that did not choose to face the examination?—I think so; I think that it is not because they could not pass it just as well as the others, but they are in a position of life in which it is no great object to them, and they do not choose to run the risk, many of them; as they must pass the examination, and as there is the risk of being plucked, they think it is not worth their while, as they only wish to be in the army for two or three years.

4096. Does not this high amount of money passing, which is admitted to be so objectionable, and which your Royal Highness seee so much difficulty in checking, rather tend to confine the candidates for the cavalry to that class?—As Mr. Herbert has said, the whole cavalry service is so much more expensive, that it requires a man with more means to go into the cavalry than into the line. There is no doubt, as I said before, that whenever a man has the means he will, somehow or other, try to get an advantage by the means at his command, privately of course, not officially.

APPENDIX X.

STATEMENT showing the Regulation Prices and Average Over-Regulation Prices in Cavalry Regiments of the Line.

——	Regulation.	Over-Regulation.	Total.
	£	£	
Cornet - - - -	450	—	450
Lieutenant - - -	250	575	825
Captain - - -	1,100	2,006	3,106
Major - - - -	1,400	1,600	3,000
Lieut.-Colonel - -	1,300	1,794	3,094
	4,500	5,975	10,475

This calculation is independent of the sums recoverable from the Reserve Fund in cases where officers have paid the old cavalry rate.

STATEMENT showing the Regulation Prices and Average Over-Regulation Prices of Infantry Regiments of the Line.

——	Regulation.	Over-Regulation.	Total.
	£	£	£
Ensign - - - -	450	—	450
Lieutenant - - -	250	100	350
Captain - - - -	1,100	600	1,700
Major - - - -	1,400	800	2,200
Lieut.-Colonel - -	1,300	1,000	2,300
	4,500	2,500	7,000

RETURN of Promotions in the Year 1869 in Regiments in Messrs. Cox & Co.'s Agency distinguishing Purchase and Non-purchase.

Number of Commissions.	By Purchase.	Without Purchase.	For Regulation.	In consequence of Retirement on Full Pay, Half Pay, Promotion on the Staff, and Deaths.
571	455	116	66	83

The above return is to a great extent imperfect as the arrangements for promotions are made between the officers themselves, and except when the over-regulation money is placed to an officer's account in our hands we have little or no knowledge of the fact.

Craig's Court, 9th May 1870.

Cox & Co.

APPENDIX XI.

RETURN showing NUMBER of COMMISSIONS of HALF-PAY OFFICERS bought up by Reserve Fund under the Circular of 15th February 1861.

Year.	Lieut.-Colonels.	Majors.	Captains.	Lieutenants.	Ensigns and Cornets.

DENHAM ROBINSON.
ROBT. R. F. DAVEY.

APPENDIX XIV.

MEMORANDUM on the BROKERAGE ACT.

The construction of the 49 Geo. 3. c. 126 is aided by a very brief reference to the law as it stood prior to 1809, and to the antecedent circumstances that gave rise to the legislation upon the two subjects, viz., illicit agency and purchase which are embraced in the Act.

It must be premised that the Court of Chancery having in* 1682 held that military commissions were not included in the operation of the 5 & 6 Edward 6. c. 16., it was within the competency of the Crown to declare whether these Commissions should or should not be purchaseable, and to lay down the conditions to be observed by the officers on taking-up or surrendering their commissions to make purchase transactions lawful.†

So far as they need here be referred to, these conditions have always regulated (1st) the sum (and by whom) to be paid or received; and 2ndly, the qualifications to be possessed by the appointed or promoted officer.

A transaction unauthorized by the Crown, or in which the Crown is deceived, either as to amount of the consideration really paid, or as to the qualifications of the purchasing officer, would be voidable at the option of the Crown, and the persons evading or violating the regulations liable to punishment for a misdemeanor at common law.‡

However, the regimental system of appointment and promotion in the army has always been attended with these accompanying evils (1) illicit agency, and (2) unauthorized purchase, subjects which are in some way connected, and therefore dealt with together, by this statute, but require a separate consideration.

I. Illicit agency is of old growth, and its inducements have been invariably the same, viz., the assumption—true or false—for a corrupt consideration of a power to influence the Crown directly through the Minister or indirectly through the commanding officer to appoint the candidate. Of its illegality there can be no question. "I lay down this rule" (said Lord Henley in 1763) "that if a man sells his § "interest to procure a person an office of trust or service "under the Government it is a contract of turpitude, it is "acting against the constitution, by which the Government "ought to be served by fit and able persons (recommended "by the proper officers of the Crown for their abilities) "and with purity." * * * "By this means the most "innocent and pure officer of the Crown whose business "it is to recommend, may have his honor traduced and "scandalized."

It happened that circumstances in their nature similar to those disclosed in the case before Lord Henley, arose in 1809, and called for the interference of Parliament. Agency offices had been opened in the city for the purchase and exchange of government offices, and as corrupt transactions came to the knowledge of the Ministry, indictments were preferred against the offenders.* While these proceedings were pending, and to facilitate legal proceedings for the conviction of future offenders, the Bill for the 49 Geo. 3, was introduced into the House of Commons by Mr. S. Percival. "The practices lately disclosed† consisted not in "the sale of offices by those who had the power to give "them away, but in the arts of those who pretended to "have influence over such persons, and issued public "advertisements, giving occasion to the notion that these "abuses prevailed to a much greater extent than they "actually did. This was the description of abuse which "his proposed law had in contemplation." * * * * *

"The material point then would be to make it highly penal to solicit money for procuring offices, or to circulate any advertisement with that view. This circumstance would go further than any other to check this abuse."

On referring to the Act it will be seen that by secs. 1 and 2 it extends to military commissions the operation of the 5th & 6th Edward 6. c. 16., thereby (in effect) disabling any person wrongfully purchasing from holding office. It then proceeds by secs. 3, 4, 5, and 6 to prohibit illegal practices in language which though extremely copious is not easily abridged.

(*a.*) It is a misdemeanor by the 3rd section, to sell or take money for any commission or for any resignation, or for the consent or voice of any person to such commission or resignation.

(*b.*) By the 4th section, to take or give money for any (real or pretended) interest, recommendation, or negotiation whatever, relating to any resignation or commission, or for the consent or voice, &c.

(*c.*) By the 5th, to open or keep any house, room, or office for transacting any business relating to vacancies, or sale or purchase of resignations, transfers or exchanges of commissions.

Appendix XIV.—*continued.*

A penalty of 50*l.* is declared recoverable by sec. 6 from any person advertising or publishing any house, &c. set up, or the name of any person as broker or agent for any of the purposes aforesaid; and that the authorized acts of duly appointed army agents might not be brought under the penal clauses, these are excepted from the operation of the Statute by the 7th section, but these agents are prohibited from receiving any special pecuniary reward for their services.

The main purpose of the Act was therefore to eradicate illicit agency, and the 3rd and 4th sections have come under the consideration of the Courts at Westminster in criminal proceedings. Indictments have been sustained under the 3rd section in Reg. *v.* Charretie 13. Q. B. Rep. 447–462, and under the 4th section in Reg. *v.* Marshall (July 1859), unreported. In another aspect (their effect upon civil contracts) the same sections have come under notice in Hopkins *v.* Prescot, 4. C. B. Rep. 579; Story *v.* Clifton, 9. C. B. Rep. 121; Græme *v.* Wroughton, 11. Exch. Ca. 157; Eyre *v.* Forbes, 12. C. B. (N. S.) 197; Eicke *v.* Jones, 11. C. B. (N. S.) 633.

Two of these cases have an important bearing on the present inquiry, for in 1855 the Court of Exchequer (in Græme *v.* Wroughton) held that the system long in vogue in the Indian army of regimental subscriptions * given to a senior officer for the resignation of his commission was illegal, the officers also being guilty of a misdemeanor under the 4th section of the Act (p. 160), and the Court of Com. Bench in 1862 (Eyre *v.* Forbes) came (substantially) to the same conclusion.

II. In regard to the purchase system, the official acts of the Crown in former reigns have been those of a mediator between the officers in the old regiments retiring and succeeding to commissions. In new regiments the colonel before accepting his letter of service for raising the levies, made some specific arrangement as to his sale of commissions and the rights of the officers to half pay on reduction. The Crown, however, never engaged, either directly or indirectly, to guarantee to any officer in old or new regiments the return of any money even paid under regulation for his commission. Hence the purchasing officer, as such, had no pecuniary rights against the Crown, nor such a property in his commission that he could either assign or mortgage it in favor of a creditor.† Indeed, if this fundamental rule should ever be reversed, dismissals from the service will probably be followed by actions of law from the displaced officer or soldiers claiming damages, which hitherto they have failed to get, for the loss of property, as recent instances of such actions at law (see Dawkins *v.* Rokeby, 4 Los & Fir., 806, by an officer, and Freer *v.* Marshall, ib. p. 485, by a soldier.

What one officer was *compelled* to pay for the retirement of another, and to insure the regimental promotion at a sum not more than this regulation price, were objects kept in view in all the Royal Warrants issued* prior to 1809, but that a price fluctuating with many incidents (as of peace or war, and the probable service or command of the regiment), and in excess (more or less) of the regulation, has always existed in the army, is scarcely a subject of doubt, nor is it less certain that the Crown through its responsible servants was cognizant of it.†

This fact, present to the mind of the late Duke of Wellington in 1833 justified his statement "that three-"fourths of the officers of the army receive but little for "their service besides the honor of serving the crown."

Until the 49 Geo. 3. c. 126. was passed, the purchase system had never been expressly sanctioned by Parliament, and having regard to the terms used in the earlier sections of the Act to put down illicit transactions, it became essential to introduce the 7th and 8th to protect the admitted purchase system as it then existed under Royal Warrants. Hence therefore the purchases, sales, or exchanges of any commission at regulation prices, were exempted by these sections from the operation of the Act.

Further to preserve the regulation price from excess or addition, any officer paying a larger sum, and continuing in the army, was made liable on conviction thereof by a general court martial, to forfeit his commission, and to be cashiered, the value of such commission (under 500*l.*) being given as to one-half to the informer, and as to the other to such purpose as the Royal Warrants should direct. Any officer receiving such a sum and quitting the army was also liable to conviction by a civil court as a misdemeanor.

I am not aware that any conviction, either by a court-martial or civil court, has ever been sought for under section 8, which contained these provisions, or that any regulation or Royal Warrant was ever issued under the Act to direct the application of half of the forfeited commissions.

INSTRUCTIONS

For the Committee appointed to consider the question of the Supersession of Colonels of Her Majesty's British Army by those of Her Majesty's Indian Forces.

---

1. The Committee will enquire into the effect of the existing Regulations on the present and future relative position of the Colonels of the two Services.

2. If the Committee should be of opinion that these Regulations operate unjustly or unequally on the interest of Officers of either Establishment, they will report what alteration should be made in them, having regard to the Parliamentary Guarantee given to Officers of the Indian Establishment by the Acts of 1858 and 1860.

3. The Committee will limit their Recommendations to courses which shall not involve increased charges upon either Imperial or Indian Revenues.

War Office,
3rd August, 1869.

REPORT.

TO THE RIGHT HONOURABLE, THE SECRETARY OF STATE FOR WAR.

1. We have carefully considered the matters referred to us by your Instructions of the 3rd day of August, 1869, a copy of which is prefixed to this Report; and we have now to submit the views which we entertain, and the conclusions we have arrived at in regard to them. In doing this we have had the great advantage of having the case of the English Army stated and supported by Major-General Sir Percy Herbert, K.C.B., and by Colonel Adye, R.A.; and of having that case commented on and examined by Major-General Balfour, R.A., formerly of the Indian Army. Appendix A. *Evidence.*

2. It is matter of familiar history that up to a comparatively very recent period the Indian Army was entirely distinct and separate from the Royal Army.

3. It was subject in the last resort, like all other bodies and persons in all Her Majesty's dominions, to the supreme power of the Crown and Legislature of this Realm.

4. But, subject to this, it was essentially the Army of the East India Company.

5. Its ranks and grades were essentially local; and an officer in the East India Company's Service was without real military rank, precedence or position, except within the limits of the Charter of that Body.

6. For reasons of high State policy, as well as for military reasons, it was considered essential that there should be a large European Force in the East Indies; that such Force should not be composed merely of Europeans enlisted for the East India Company and for local Indian service, but that it should comprise also a large element of the purely Royal Army. The British Army was therefore called upon to furnish for Indian service, as an Auxiliary Force, a large Contingent; and the nature and duration of the foreign service, which was thus enforced in rotation on the British Regiments, bore heavily, as it continues to bear heavily, on that Army. There being the two Armies in India, serving together under circumstances which required a body of the one and a body of the other to be in the same brigade or garrison, or other Command, questions of precedency and relative rank, and of right to command, could not but arise, and they did frequently arise between the two Armies.

7. The Regulations for the promotions of the Lieutenant-Colonels and Colonels of the Royal and East India Company's Armies previous to the introduction of the new rules for promotion in 1854, are correctly stated in the Report of the Committee, of which Colonel Egerton was the President, in January last; and the arrangements made at different times to prevent the supersession of the Lieutenant-Colonels of either Army in consequence of the Lieutenant-Colonels of the Indian being occasionally promoted to the rank of Colonel by the Regimental Line step before they became entitled to it by the Royal Brevets are also therein explained. It may be sufficient, therefore, for us to state that, as at that time the East Indian Officers held no rank except as above stated, the supersession of the Lieutenant-Colonels and Colonels of the one Army by the other was sufficiently guarded against by these arrangements, and no inconvenience had for several years been felt from their operation. Appendix D.

8. The promotions up to the rank of Lieutenant-Colonel in the Royal, and of Major in the Indian Army being regimental were very unequal in different Corps, but it was the object of every Regulation on the subject of promotion for both Services to prevent the supersession of any Officer after he had attained the rank of Lieutenant-Colonel.

9. It seems to have been from the first a point of jealous military honour on the part of both Armies that no officer of the higher ranks of either should be superseded by, so as to be placed under the command of, a junior Officer, obtaining promotion by the rules of his own Army. The authority of the Duke of Wellington, and afterwards of Lord Hill, is cited in support of this as a legitimate pretension of the Royal Officers, and it has repeatedly received the sanction of the Military Authorities at home. Appendix D.

10. In the year 1837, there occurred a very striking illustration of the extent to which this feeling was carried, was allowed to operate, and was respected and acted on. There was in the Indian Army a very extensive promotion by which several Officers obtained steps, without any corresponding promotion in the Royal Army. The then Commander-in-Chief in India thereupon, in conformity with the principles enunciated by the Duke of Wellington and Lord Hill, but without any communication with the Local or Home Government of India, issued a General Order, giving the Local Rank of Major-General in each Presidency to British Officers serving in such Presidency, so as to restore and maintain their

relative military position towards, and precedence over, the Officers of the Indian Army, with whom they were serving, or might in the ordinary course of military duty be called on to serve. These are known in Army history in India as the "Fane Brevets."

11. There was a slight expression of regret that this should have been done without previous communication with the Authorities in India; but the local promotions were allowed to remain undisturbed, and the system was continued down to the year 1854. In 1854 the two Armies were still thus separate and distinct: the one the Imperial Army of the Sovereign; the other the Local Army of the East India Company. That year is a memorable epoch in the history of both Armies. The Royal Army, from causes peculiar to itself, and with which the Indian Army had nothing to do, had all its channels of promotion so choked up that the average age of the Colonels promoted to be Major-Generals in 1851 was 60, a state of things felt to be fraught with great mischief to the public service, and to be a real grievance to the Officers whose chances of rise in their profession were so delayed. Promotion, too, except the ordinary Regimental promotion, came by fitful and uncertain Brevets of an extent determined by no positive rule; and an Officer who just missed by one having a step in the Brevet of 1846 had to wait five weary years for the Brevet of 1851, a very considerable portion of the remaining life of a veteran. A Royal Commission of the highest political and military authority was appointed to consider the whole subject; and upon their recommendations embodied in a Report, carefully elaborated and exhaustive, a very comprehensive series of measures was, in the year 1854, adopted with a view to remedy the evils felt, and to remove the grievances complained of. Additional retirements on full pay were granted at the time and provided for prospectively, with a view to accelerate promotion; and it was also provided that Army promotion, instead of being by occasional or periodical Brevets, should be continuous and certain,—there being a fixed Establishment of General Officers, each vacancy in which, as a general rule (and subject to some special provisions as to supernumerary General Officers), should be filled up by the advancement of the Senior Colonel on the List.

The Right Hon. Sidney Herbert.
Viscount Hardinge.
Earl Cathcart.
Earl Grey.
Lord Panmure.
Lord Seaton.
Sir John S. Pakington.
The Right Hon. Edward Ellice.
Sir John F. Burgoyne.
Sir Hew D. Ross.
Colonel Knollys.

12. But in recommending and establishing this System, the Commissioners took into very careful consideration the peculiar circumstances of the Non-purchase or Seniority Corps, viz., the Royal Artillery and Royal Engineers, and came to the conclusion (which was adopted and acted on) that there should be distinct and separate Lists of General Officers for them, and that additional pecuniary inducements should be given to the Senior Officers to retire. It was felt that from the comparative slowness of promotion in those Corps, and the comparatively advanced age at which in them Officers attained the position of Lieutenant-Colonel, some such special measures and provisions were needed to meet the peculiarity of their case and to maintain the efficiency of the Service.

13. The number of General Officers for the General List was fixed at 234, viz., 134 Colonels of Regiments and 100 General Officers on Unattached pay; while, "guided by the analogy of the Army, and the relative numbers of the Officers in the Ordnance Corps," 24 General Officers were assigned separately for the Artillery and 12 for the Engineers.

14. A very important change was also made in the mode by which Lieutenant-Colonels were advanced to the rank of Colonel. That advancement had, up to that time, been given according to the strict rule of Seniority, without reference to services performed, except in the case of Officers who became full Colonels by virtue of their appointment as Aides-de-Camp to the Sovereign. This practice was, after most careful consideration by the Commission, altered, and it was provided that such promotion (except where given as a reward for very distinguished conduct, or by virtue of the appointment as Royal Aide-de-Camp) should thenceforth be given by service alone, that is, should be given to all Officers on their completing three years of service with the rank of Lieutenant-Colonel in the command of a Regiment, or as the Field Officers and Senior Captains and Lieutenant-Colonels of Battalions of the Guards, termed "mounted Officers," or as Lieutenant-Colonels on the Staff in situations necessarily held by Officers of that rank, or as Field Officers of the Artillery or Engineers. In some special cases six years' service was required. The Commissioners, however, recommended, out of regard to existing vested interests, that this Regulation should not apply to the then existing Lieutenant-Colonels or Majors, and that there should be, moreover, a General Brevet before any of their suggestions were adopted. There was, accordingly, a very extensive General Brevet in that year.

15. Neither the Commission in recommending, nor the Government in adopting, this great scheme of reform, appear to have taken into consideration anything relating to the Indian Army, nor to have been guided at all in the extent and manner of promotions provided for the Royal Army by any reference to the relative position which might thereafter be occupied by the Officers of the Royal and the Officers of the Indian Army.

16. Contemporaneously with this new system of advancement and promotion granted

to the Royal Army, one similar, based on substantially the same principles, was introduced into the Indian Army.

17. In 1855, the number of General Officers for the Indian Army was fixed at 220, and continuous promotion of Colonels by seniority to the vacancies in the Generals' List was provided for.

18. The new System as to the promotion of Lieutenant-Colonels to Colonels was also adopted for the Indian Army, making it depend not on seniority but on qualifying service,—either Regimental or in certain Staff appointments.

19. It appears by the Report of the Royal Commissioners, 17th June, 1854, on which the Warrant of October 1854 was founded, that the number of General Officers for the Guards, Cavalry, and Infantry of the British Army was determined by the number of General Officers on the List on the 30th April of that year, and for the Ordnance Corps by the relative numbers of the Officers of those Corps to those of the Guards and Line; but it is to be observed that between the 30th April and the issue of the Warrant in October, the large Brevet of 20th June, 1854, had been granted, which so greatly increased the number of Generals above that which was on the List on the 30th April, that it was not till June 1857, that the excess was absorbed by the promotion of one Colonel after every third vacancy. In the Indian Army, on the contrary, the number of General Officers being far below the new fixed Establishment, 95 Colonels were promoted to complete it, and the promotions were carried down to February 1854, or seven years in advance of the Colonels of the Line Army.

20. The number of 220 is so nearly in the same proportion to the number of Combatant Officers in the Indian Army, as that which the number of Generals in the Royal Army bore to that of the Full-pay Officers in that Army, that there can be little doubt that it was fixed with reference to the scale adopted in the English Army.

21. Although the number of Generals allotted to the two Armies was substantially similar and equal, there was a great disparity as between the different grades of General Officers; for while in the British Army there were 59 Generals and 85 Lieutenant-Generals to 138 Major-Generals, there were allotted to the Indian Army 145 of the lower grade, but only 50 Lieutenant-Generals and 25 Generals.

22. The following official Memorandum was published in the "London Gazette" of May 1, 1855:—

"MEMORANDUM.

"*Horse Guards, April 25th*, 1855.

"IN order to remove any doubt which may exist as to the rank and precedence of the Officers of "the Honourable East India Company's Service, it is Her Majesty's Pleasure that officers of the "Honourable East India Company's Service, whose commissions shall be signed by Authorities duly "deputed to do so by Her Majesty, shall have rank and precedence with officers of Her Majesty's "Regular Army according to the dates of their Commissions, in all parts of Her Majesty's Dominions "or elsewhere."

23. The Scheme adopted as to the Royal Army in 1854 did not in all respects prove satisfactory, and a new Commission was accordingly appointed in 1858. Upon their report a considerable addition was made to the number of General Officers assigned to the Line, which was increased from 234 to 260, the Commissioners stating that by reason of the great increase in the number of Officers in the Army since the War with Russia, the existing Establishment was not, in their opinion, sufficient to afford to those Officers a sufficiently early prospect of rising to the rank of Major-General, with the advantages belonging to it.

The Right Hon. Sidney Herbert.
His Royal Highness the Duke of Cambridge.
The Duke of Newcastle.
Earl Grey.
Lord Panmure.
Lord Rokeby.
The Right Hon. Edward Ellice.
The Hon. Sir J. Yorke Scarlett.
Sir W. F. Williams.
Sir J. M. F. Smith.
Sir Henry K. Storks.
Colonel Eyre.

The following Table appears in their Report, page 14, showing the number of Non-commissioned Officers and Men voted, the number of Officers on full-pay, and the number of General Officers in various years from 1816 to 1858:—

Year.	No. of Non-commissioned Officers and Men voted.	No. of Officers on Full-Pay exclusive of Colonels of Regiments.	No. of General Officers being Colonels of Regiments, and No. in receipt of Unattached Pay, excluding asterisk General Officers.
1816	182,625	13,191	580
1829	103,527	5,915	434
1835	95,513	5,478	379
1843	123,717	5,764	333
Jan. 1854	137,045	5,585	239
Nov. 1854			274
1858	194,498	8,447	234

24. But that which was most complained of was the Regulation by which a Lieutenant-Colonel commanding a Battalion, or holding certain equivalent situations on the Staff for three years, unless shown to be unfit, became *ipso facto* a full Colonel.

25. This complaint is discussed very fully in the Report, and in the result the Commissioners came to the conclusion that, in making the changes in 1854, the vested interests of the existing junior Lieutenant-Colonels had not been sufficiently protected; and they recommended (and the recommendation was adopted) that as many as 115 Lieutenant-Colonels who had been passed over should at once receive rank as Colonels, and have their commissions antedated so as to place them above as many as 206 Colonels, their juniors, who had in the meantime been promoted under the Regulations of 1854.

26. But in remedying the grievance to individuals, admitted by them, the Commissioners of 1858 gave their clear and emphatic approbation of the principle of the measure of 1854.

27. They say as follows in the 31st paragraph of their Report :—

"It must be recollected, however, that the Commission of 1854 had to deal with a very serious "evil. There can be no doubt that a system by which those who served and those who did not, "advanced 'pari passu' to the head of their profession was essentially unjust both to the individuals "and to the Service. Under this system zealous officers who clung to their profession, and who "acquired experience and knowledge of their duties by commanding battalions, or by service in "equivalent situations on the Staff, had no advantage over others who never commanded more than a "company, or had served little, if at all, since they did so, and never as a Lieutenant-Colonel; on the "contrary, both were alike promoted to the rank of Colonel and Major-General, and became alike "eligible for responsible command, and alike recipients of the honour and advantage of the rank. It "is true no doubt that in many cases the want of experience was not the fault of the officer, who "would gladly have served had the opportunity been afforded him; but the claims of no profession "can be equalized, and good and ill fortune as to their opportunities must attend all men in all possible "careers. The public service requires that the experience should have been acquired; many never "seek to acquire it, but at any rate the experience cannot be dispensed with because some who seek "it are so unfortunate as not to obtain it."

28. The Commissioners o 1858 also, for the future, fixed five years instead of three as the qualifying period, and eight years in those cases in which six years had been previously required.

29. It is important to observe that in the Indian Army, there being no half-pay, the number on which the Establishment of General Officers was calculated included all the Officers of that Service who had to be provided for by that Establishment; but in the British Army there is a long list of Officers on Half-pay who are entitled to rise to the rank of General Officers. Many of these Officers have been placed on Half-pay by reductions in the Army at different times, and from the Half-pay List the Field Officers for the Staff of the Army are now taken. In the 8,447 officers upon which the Establishment for General Officers was calculated in 1858, none of those on Half-pay appear to be included, as it is stated in the heading of the column that the number is of Officers on Full-pay, exclusive of Colonels of Regiments. This Establishment therefore provides only 1 General for every 32 Full-pay Officers, and allows nothing for the Half-pay.

30. With regard to the Indian Army, again the example of the Authorities at the Horse Guards was followed, and the Regulations were modified and corrected by Royal Warrant of 1859.

31. Then there occurred the great Mutiny in India, which led to the resumption by the Crown of the Government which had been delegated to the East India Company.

32. By the Act of 1858, which provided for that resumption, it was enacted in the 56th Section :—

"LVI. The Military and Naval Forces of the *East India* Company shall be deemed to be the *Indian* "Military and Naval Forces of Her Majesty, and shall be under the same obligations to serve Her "Majesty as they would have been under to serve the said Company, and shall be liable to serve "within the same territorial limits only, for the same terms only, and be entitled to the like Pay, "Pensions, Allowances, and Privileges, and the like advantages as regards Promotion and otherwise, as "if they had continued in the service of the said Company."

33. By this Act the then existing Indian Forces became part of the Royal Army, but still with a distinct organization.

34. It is not necessary to state in detail the well-known facts, consequent on the Mutiny, of the disappearance of half the Native Army, and of so large a proportion of the European soldiers who had been enlisted for the service of the Company, and declined to be transferred to the service of the Crown.

35. A reorganization of the Indian Army became necessary, and as such reorganization made the number of Officers in the Indian Army far in excess of the future requirements of the Service, the Indian Authorities held out large pecuniary and other inducements to their Officers to retire altogether from the Service, and those inducements were so far successful, that as many as 134 Lieutenant-Colonels, 98 Majors, and 77 Captains, accepted the Government offers and retired.
